The Port Operator or Terminal Representative will advise the Master of the ship as to shore communication and any signal needed for local requirements.

Ship's crew with an officer in charge will assist in all operations as advised by the Port Operator or Berth Operator. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Lighting: Manifold and mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

Notice of Readiness: Notice of readiness will be received by the Port Operator who is the Botas Representative. Provided the vessel is ready to load, lay time will commence in 6 hours after receipt of Notice of Readiness.

Deck Watch: A responsible ship's officer shall be on watch on board at a point near the ship's tanks which are receiving oil during the process of loading and NOTICE IS HEREBY GIVEN that the Terminal Representative have received instructions to stop loading immediately whenever this rule is disregarded.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil during the process of loading.

All pipe-lines and hoses shall, while rigged for loading crude oil be directly and continuously under supervision. No crude oil shall be allowed to escape or overflow.

BALLAST: Vessels should arrive with sufficient ballast for safe handling of vessel under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, sloop, or ballast tanks or bilges which is liable to pollute these waters.

Ballast water must be declared and signed by the Master and delivered to the Terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

It is an offence to discharge dirty ballast or pump out bilges.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps may be taken. Hospital and doctor are available at Ceyhan 25 kms., Adana 75 kms., and Iskenderun 65 kms., distance from Botas (Ceyhan) Terminal

DENSITY (Salinity): About 39 p.p.m.

FRESH WATER: Available at jetty. Rate 25 t.p.h. Arrangements to be made through Agent.

FUEL: Not available (may be available in 1979).

CONSULS: There are no Consuls at the port.

REPAIRS Not possible.

SURVEYORS: There are no classification societies at the port.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines with routes to Istanbul and Ankara. Airport is situated 75 kms, from Botas (Ceyhan) Terminal. Twice daily service to international airport Istanbul.

TIME: GMT plus 3 hours in Summer time, GMT plus 2 hours in Winter time.

HOLIDAYS: New Year's Day (from December 31st, 1200 hrs., to January 1st, 2400 hrs.), National Sovereignty Day (from April 22nd, 1200 hrs. to April 23rd, 2400 hrs.), Spring Day (May 1st), Constitution Day (May 27th), Sports Day (May 19th), Victory Day (August 30th), National Holiday from October 28th to October 30th, 2400 hrs.), Shakear Bairam (3 days moveable), Kurban Bairam (4 days moveable).

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: Cannot be connected on board.

SERVICES: There are no special services.

SHORE LEAVE: Crew permitted to go ashore.

INDENTIFICATION CARDS: Seamen's book is sufficient.

REGULATIONS: In addition to Harbour Regulations all ship Masters are at all times responsible for the application of all safety precautions as prescribed in the international oil tanker and terminal safety guide.

SHIPMASTER'S REPORT: November 1978.

Documents: Turkish health form (supplied when vessel boarded), 2 stores lists, 2 crew declarations, 8 crew lists.

Pilotage: Compulsory. Pilot meets ship 1 mile South of the pier at the anchorage zone.

Anchorages: At least 1 mile South of Southern end of jetty.

Restrictions: Max. drafts 72 to 98 ft. at berths 1 and 2 and 66 to 72 ft. at berths 3 and 4.

Max. Size: 300,000 d.w.t.

Health: Free pratique granted at anchorage or when berthed.

Radio: Via Mersin.

VHF: Communicate with Botas Terminal Channel 16 at least 4 hours before arrival. Uses Channel 22 for talking.

Radar: None.

Tugs: 3 of 2,600 h.p. and 1 of 1,200 h.p. All provided with fire fighting equipment.

Berthing: Normally facing Southwards (bow to sea) for emergency purposes.

Cranes: 1 on each berth.

Medical: A doctor is available ashore but vaccinations not possible.

Density: 1025.

Fresh Water: Available at all berths, arranged through Agent.

Fuel: Not available.

Fire Precautions: I.O.T.T.S.G. safety check list is utilised.

Consuls: See "Iskenderun".

Repairs: Repairs to engines alongside may be permitted with written permission from Terminal Management.

Dry Docks: None.

Surveyors: None.

Gangway/Deck Watchmen: Not required.

Customs Allowances: 200 cigarettes and 1 bottle per man.

Repatriation: Possible via Iskenderun and Istanbul.

Time: GMT plus 3 hours in November 1978.

Services: Limited fresh stores available.

Shore Leave: Permitted.

Identification Cards: Shore passes issued.

Mail: To U.K. takes about 5 days. None received due late orders.

General: No large scale B.A. chart available but B.A. 2632 is adequate if radar working. A Turkish Chart No. 334 is available. The position we anchored (2.1 miles South of jetty in 35 m.) was thick mud on bottom and good holding ground with wind from North about force 7. At present berthing only during daylight but sailing any time. Each berth is equipped with shore gangway. Dirty ballast can be accepted up to 40,000 tonnes and clean up to 60,000 tonnes at a rate of 4,500 t.p.h. Loading rates up to 20,000 cu.m.p.h. on berths 1 and 2 and up to 10,000 cu.m.p.h. on berths 3 and 4. S.G. about 0.8459 (API 35.78) at 60/60F. with a loading temperature (November) of about 80°F. The oil is Kirkuk blend crude from Iraq. There are facilities for storing about 1,000,000 tonnes. Berths 1 and 2 manifold 6×20 in. with reducers to 16, 18 or 20 in. if required. Berths 3 and 4 manifold sizes 16 in. with reducers to 12, 14 or 16 in. if required. Automatic couplings may be used. At berths 3 and 4, 4 hoses can be connected if distance between ship's manifold centres is more than 150 cm. There is a Doppler approach system on jetties but it has not been calibrated. All moorings on quick release hooks and usually 3 head, 2 breast and 2 back spring moorings for 140,000 d.w.t. tankers, same aft. For berthing 2 tugs make fast with their own lines, 1 tug at each end of main deck and 3rd tug stands by. For unberthing 1 tug makes fast to bow and stern with ship's rope (not wires) and 3rd tug stands by. Pilot will not use pilot hoist but requires accommodation ladder when in ballast and disembarks with pilot ladder. 7 Notices of Readiness and dry certificate required by Pilot, 1 of each and 1 ullage report required by Agent. Agent takes ashore certificates of Safety, Construction, Safety Equipment, Safety Radio, Loadline and Class. No early departure procedure available and ship stays on berth up to 2 hours after loading awaiting papers. N.O.R. is made out to I.N.O.C. – Bagdhad – Botas – Ceyhan. Pilot requires separate cabin as he acts as Loading Master, also cabin required for 1 Customs official and possibly Agent. Abnormal ship/shore differences appear to be usual as evidenced by the fact that when you handed them a letter of protest they hand you a reply at the same time.

Authority: Botas District Management.

GENERAL: The main engines of all vessels while at the berth shall be kept ready for immediate use. Deck power (steam) is to be maintained at all times and water pressure shall be maintained on the fire fighting system.

Repairs which may prevent the working of the vessel's main engines may only be undertaken in the Port with the written permission of Botas Representative.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the Pilot or Port Health Officer, may approach any vessel entering the Port and no other person may board until Free Pratique has been granted.

Whistle or siren to be available at all times.

Boarding of Vessel: The control of persons boarding vessel is the ship's responsibility. Boarding should be restricted to Botas employees on duty and to persons authorised by the Port Authorities as advised by vessel's Agent.

Stores/Provisions: It is forbidden for provisions or other items to be received or discharged whilst loading is in progress. Launches, other than the Botas's mooring launch, should not lie alongside the vessel.

Tanker Safety: Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

I.O.T.T.S.G. Safety Check List: The tanker safety check list must be completed after inspection of each item prior to commencement of and during loading. The berth operator is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

Signals: The following signals must be shown when vessel is in the Port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire-fighting and vacating the berth in case of an emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors ready for use.

(b) Fire-mains must be under pressure.

(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment on each Loading Berth: Equipment is provided for fire fighting on the platforms or exposure protection for the platforms, and the tankers being loaded as follows;

(a) 2 elevated foam/water monitors are mounted on each access tower on the platform capable of delivering 3,550 i.p.m. (800 g.p.m.) of water or foam solution, and has a throw of 60 m. Each monitor is remote controlled from the control room and has flexibility of full horizontal rotation and vertical reflection.

(b) 2 deck level manual water spray monitors of 450 i.p.m. and 2 foam branch pipes of a capacity of 450 i.p.m. of foam delivery used to extinguish fires on the manifolds.

(c) A number of portable dry chemical and CO_2 extinguishers are located in various locations.

(d) Numerous numbers of foam pourers and water spray facilities located under the deck for water surface foam blanketing and fire smothering.

(e) Water curtain facilities are provided on the loading towers to prevent fire spread to and from the berths.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

The Emergency and Fire Signal is:

1 or more blasts of the ship's whistle, each blast of not less than 10 seconds duration supplemented by a continuous sounding of general alarm system.

AUTHORITY: Iskenderun Liman Baskanligi.

AGENT: See "Iskenderun".

ISKENDERUN: 36.35 N. 36.10 E. (See Plan Book)

DOCUMENTS:

5 Crew Lists.

4 Passenger Lists.

2 copies Transit Cargo Manifest.

3 copies Inward Cargo Manifest, of which one must be legalised by Turkish Consulate at loading port. If no consulate existing same to be certified by local Customs Officer or Authorities.

1 set Bills of Lading.

2 copies Cargo Stowage Plans.

Health Documents.

2 Stores Lists.

Ship's Certificates.

PILOTAGE: Compulsory. Ordered by Agent on basis of Master's ETA. International Code signals used to call Pilot who boards at harbour entrance. 2 pilot boats available.

ANCHORAGE: Safe anchorage in open roadstead at 0.5 to 0.75 mile from shore. Vessels over 30,000 tons d.w.t. work cargo at anchorage using ship's gear to lighters and pontoons. Vessels loading/discharging to lighter should anchor as close as possible to harbour entrance but not less than 800 m. from the pier.

MAX. SIZE: At anchorage, no limitations. Alongside pier, length 166 m., draft up to 30 ft. Also see "Tankers".

HEALTH: Pratique obtained on arrival. Master required to show vessel's Health Declaration and Certificate of Registry. Crew vaccination certificates to be produced if required. Sanitary certificate required if live animals on board.

RADIO: Istanbul Radio, call sign TAH. Izmir Radio, call sign TAN2.

TUGS: 4 tugs available of 300, 700, 970, and 1,200 h.p. respectively.

BERTHING: Jetty 509 m. long can accommodate 2 large vessels and several small vessels simultaneously.

Berth No. 1 at jetty head, 48 m. length, 35 ft. depth.

Berth No. 2, South side, 166 m. length, 28–32 ft. depth.

Berths 3 and 4, suitable only for tugs and small vessels.

Berth No. 5, North side, 166 m. length, 29–34 ft. depth.

Due to shelving depths vessels of 20,000 to 30,000 d.w.t. berth partly alongside and lighten cargo then shift once or twice further in.

The T.M.O. have a silo of 20,000 tons capacity which can deliver up to 300 t.p.h. Loading capacity of ore, 200 t.p.h., Unloading capacity for coal, 150 t.p.h.

Inner Port, used only by pontoons, lighters and tugs.

Priority given to Army, food relief and passenger ships.

STEVEDORES: 2 consecutive shifts of 8 hours each day. At anchor, approximately 100 tons can be handled each shift, for general cargo. Baled cargo, 125 tons per shift. Bagged cargo, 150 tons per shift.

Gangs secured by Agent through the Port Monopoly, 24 hours prior arrival.

MEDICAL: Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

TANKERS: 2 buoy mooring berths operated by Mobil Oil and Petrol Ofisi, suitable for vessels up to 50,000 tons d.w.t.

No slop reception facilities.

FRESH WATER: Supplied only by barge, two available each of 250 tons capacity.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended. 3 shifts of 8 hours each. Extra tariff for Sundays and holidays.

OPENING/CLOSING HATCHES: May be opened/closed by ship's crew. May be performed by stevedores at tariff rates.

CUSTOMS ALLOWANCE: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS: Vice-consulates of Sweden, Norway, Netherlands, France, Greece, Italy and Iran.

REPAIRS: Welding and other minor types of repairs are possible.

REPATRIATION: Can be arranged.

AIRPORT: Adana Airport, served only by domestic lines with routes to Beirut and Istanbul. Airport situated 140 km. from Iskenderun. Twice daily service to international airport Istanbul.

POLICE/AMBULANCE/FIRE: Police 1044; Ambulance 1443; Fire 1000.

TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.

HOLIDAYS: New Year's Day (commencing 1200 hrs. Dec. 31st); National Sovereignty Day (April 23rd, half day April 22nd); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); October 28th (half day); October 29th and 30th; Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).

SHIPMASTER'S REPORT: Customs and health clearance is performed at anchor outside the port. Vessels should anchor about 0.5 miles North of the landing stage in the main part of the town. All officials and Agents arrive by boat and when clearance is given the Pilot comes out. Vessels with cargo for the chemical works at Sariseki (3.5 miles North of the main port) the procedure is the same except that a Pilot is not required.

Customs, Immigration, and Health officials require 4 crew lists on arrival. The Agent will require 2 more crew lists prior to the vessel's departure for clearance with the Harbour Master. On departure the vessel will anchor off again while outward clearance is obtained.

Summer time is in operation all over Turkey from 1st April until 30th September each year.

AUTHORITY: Harbour Master, Iskenderun.

AGENT: Gulf Agency Co. Ltd., POB 277, Iskenderun. Tel. 1277. Telex 68124. Cables: "GACSHIP" Iskenderun.

ISTANBUL: 41.01 N. 28.58 E.

DOCUMENTS: *Operating Vessels*

5 Crew Lists.

6 Passenger Lists.

3 Stores Lists.

1 Transit Cargo Manifest.

2 Inward Freighted Manifests.

2 Inward Non-freighted Manifests.

Copies of relevant Bills of Lading accompanying Inward Manifests, Ship's Certificates (Deratisation, Tonnage, Safety, Safety Radio, Class or Freeboard).

3 ships safe money lists. (if there is no money on board, please issue three lists as follows: *There is no money on board).*

Harbour Masters Sailing Permit (which must be exchanged at each Turkish port and kept on board).

Transitting Vessels

Master to present only Tonnage and Deratisation Certificates during Sanitary Control at both Straits (Canakkale and Buyukdere).

PILOTAGE: For both operating and transitting vessels, Pilot secured by the Agent through the Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. Pilot boarding vessel with service boat hoisting red and white flag. Pilot boarding vessel off Haydarpasa and Seraglio or off Kavak. Pilotage for entering and berthing in harbour areas is compulsory. Pilotage through Bosphorus is optional. All Pilots can be contacted by VHF Channel 16.

Also see "Shipmaster's Report".

ANCHORAGE: Free and safe anchorage in roads off Marmara coast approach to Istanbul. It is however recommended to anchor as near as possible to the harbour. Anchoring at other anchorage areas is subject to special permission via Harbour Master. Good anchorage off Haydarpasa and off Yenikapi, Ahirkapi for large vessels and for smaller vessels there is a good anchorage between Dolmabahce Palace and Kurucesme.

RESTRICTIONS: Ships carrying hazardous cargoes (inflammable, explosives, corrosives, etc.) are not allowed to enter the harbours. Ships can anchor in roads outside the harbour at any time without Pilot. Ships to operate upon arrival at night can enter the harbours with Pilot and with special permission through the Port Monopoly Administration. 48 hours' notice has to be given to the Harbour Master of Istanbul for vessels calling at Istanbul and/or passing in transit through Bosphorus.

Vessels entering the Black Sea must keep to the European side and those leaving the Black Sea must keep to the Asiatic side of the fairway.

MAX. SIZE: No limitation of draft in open roadstead, at anchor. Max. draft in port alongside quay: 10 m. for dry cargo ships. Tankers up to 48 ft. draft can berth at Haramidere oil port.

HEALTH: Sanitary control of both transitting and operating vessels performed at the Straits entrance (Canakkale and Buyukdere). Ships entering from South must slow down at Canakkale and ships arriving from North must slow down at Buyukdere for Sanitary Control. In case of non-performance of such control due to bad weather, Master has to inform Agent in time and have to stop and wait at South Entrance of the Bosphorus until Sanitary Control is performed otherwise heavy fine would be levied.

Also see "Shipmaster's Report".

RADIO: Wirelesses to be routed to Agent via Istanbul Radio. Call sign of Istanbul Radio Station is THA. Frequency MW 500 m. Ships can also communicate with Agent by radio telephone on frequency 2182 kc/s. It is recommended that ships be on watch for any radio telephone call by Agent for any berthing and operation arrangement.

TUGS: Arranged by Agent. Tug-boat compulsory for vessels over 2,000 grt, charged per hour or fraction of each operation.

2 of 970 h.p., 1 of 620 h.p. and 1 of 200 h.p. Lighters: 1 of 100 tons, 6 of 150 tons and 3 of 230 tons.

BERTHING: Priority to Army food relief and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

Wharves:	*length* m.	*Depth of Water* m.
Karakoy (ex Galata) exclusively for passenger vessels	520	7–10
Salipazari	600	10
Sarayburnu	240	6
Camialti and Haskoy (Golden Horn)	68	3–4

Haydarpasa. This port, protected by 2 breakwaters of an overall length of 1,709 m., has quays of 1,988 m. total length, that may simultaneously accommodate 6 medium-sized vessels and where cargo operations may be made direct to and from wharves or railway trucks.

The draft of water at the quays varies between 6 and 10 m.

Silos: 4 grain silos are available:

Capacity	*Delivery per hour*	*Intake per hour*
34,500 tons	200 tons	100 tons
20,000 tons	120/150 tons	90/100 tons
10,800 tons	120/150 tons	90/100 tons
5,280 tons	120/150 tons	90/100 tons

Equipment – Total number of cranes: 31.

Electrical Cranes along the quays:
3 of 1.5-ton capacity
10 ,, 3 ,, ,,
6 ,, 5 ,, ,,
1 ,, 6 ,, ,,
1 ,, 8 ,, ,, (coal winch)
1 ,, 25 ,, ,, (fixed with swinging boom)
1 ,, 25 ,, ,, (gantry crane on rails)

Rubber Wheeled Mobile Cranes:
6 of 5-ton capacity
1 ,, 8 ,, ,, with caterpillar tracks
1 ,, 10 ,, ,, ,, ,, ,,
1 ,, 18 ,, ,,

BULK HANDLING: Three grain silos are available:

One of 34,500 ton capacity with 200 ton delivery/100 ton intake per hour.

One of 10,800 ton capacity with 120–150 ton delivery, 90–100 ton intake per hour.

One of 5,280 ton capacity with 120–150 ton delivery, 90–100 ton intake per hour.

TANKERS: The oil port called Haramidere is a small bay open to Southern winds and 60 km. distant from Istanbul in the Sea of Marmara. There are buoys and an oil pumping platform in this bay. Tankers can berth by dropping 2 anchors and mooring by stern at these buoys or at platform. Average sea depth is 48 ft.

Ambarli: Position 40° 58′ N., 28° 42′ E. Max. size 250,000 d.w.t. Vessels moor by the stern to a dolphin platform (offshore).

BRIDGES: There are 2 bridges: Galata Bridge is between Eminonu and Karakoy: Ataturk Bridge is between Unkapani and Azapkapi. Both bridges are opened in the morning for vessels entering the Inner Harbour (Golden Horn). Vessels wanting to pass through the bridges have to give notice in due time to the Harbour Master of Istanbul.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival. Average loading and discharging rates of about 150–200 tons per gang per shift depending also on the kind of goods. Discharging operations are generally performed alongside the wharves and loading operations at buoys; however, as stated above, can also be effected alongside simultaneously with discharging. Working hours: Monday to Friday 0800/1200 and 1300/1700 hrs; Saturday 0800/1200 hrs.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

DENSITY: Always variable due to strong currents, however, can be reckoned as 1015.

FRESH WATER: Supplied by barge and shore installation at the rate of 30–60 t.p.h.

FUEL: Diesel oil, gas oil and bunker fuel can be supplied by barge at transit cost, subject 48 hours pre-advice. Fuel supplied only against advance payment in foreign exchange (dollars, sterling or Swiss francs).

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Owners or Master to decide whether this work should be underaken by the stevedores or by the crew.

CERTIFICATES: Safety, Safety Equipment, Safety Radio, Class and Freeboard documents.

CUSTOMS ALLOWANCE: 40 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operating. However, ship using own means when such cranes are not available. Full lights to be supplied by ship.

IDENTIFICATION CARDS: Seaman's book is sufficient.

REPAIRS: At the Golden Horn are 3 graving-docks:
One 388 ft. length, 72 ft. width at entrance
Two 279 ft. ,, 62 ft. ,,
Three 600 ft. ,, 63 ft. ,,

At Istinye (in the Bosphorus) are:
1 floating dock 137.50 m. length, 21.25 m. width with 8,500 tons lifting capacity. 1 floating dock 67.82 m. length, 30.40 m. width with 5,000 tons lifting capacity. 1 floating dock 126.14 m. length, 34.0 m. width with 10,000 tons lifting capacity. In cases of necessity floating docks of 5,000 and 10,000 tons capacity can be united and be put in operation as single floating dock with 15,000 tons lifting capacity. Every kind of repair can be effected at Istinye docks.

At Fener (Golden Horn) is a dry dock for vessels up to 600 tons, and at Kaskoy (Golden Horn) is a dry dock for vessels up to 176 tons. There are also some privately owned. All kinds of repairs can be effected.

SURVEYORS: American Bureau of Shipping, Bureau Veritas, Germanischer Lloyd, Lloyd's, Norske Veritas.

REPATRIATION: Crew exchange and repatriation is possible for citizens of Italy, Great Britain, Benelux, Sweden, Norway, West Germany, Austria, Switzerland, France, Ireland, U.S.A., Iceland, Pakistan, Monaco, Australia, Canada, Japan, New Zealand, Spain, Cyprus, Portugal, Tunis, Kenya, Iran, Yugoslavia, Romania, Morocco. Citizens of other states not specified above are subject to a Turkish visa.

AIRPORT: Yesilkoy Airport is an international airport with daily connection to everywhere. Airport distant 15 km. from Istanbul.

TIME: GMT plus 2 hours, GMT plus 3 hours in Summertime.

HOLIDAYS: New Year's Day (Dec. 31st p.m. and January 1st); National Sovereignty (April 22nd p.m. and April 23rd); Spring Day (May 1st); Sports and Youth Day (May 19th); Sheker Bayram (3 days) (movable); Courban Bayram (4 days) (movable); Liberty/Constitution Day (May 26th p.m. and May 27th); Victory Day (August 30th); Proclamation of the Republic (Oct. 28th p.m. to Oct. 30th). In the event of a holiday ending on a Friday, the Saturday that follows is considered also as a holiday in full, and normal working starts as of Monday morning 0800 hrs.

POLICE/AMBULANCE/FIRE: Fire Istanbul 21 42 22, Uskudar 33 20 30; Police 27 45 00; Ambulance Istanbul 21 15 95, Beyoglu 44 49 98, Uskudar 33 04 01.

TELEPHONES: No installation for connection facility on board.

SERVICES: Tank cleaning (gas-free service), deratisation, compass adjusting carried out by experts of shipyards or Turkish Maritime Lines.

SHORE LEAVE: Crew members are allowed ashore at all times.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and South-bound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: Required at Buyukdere, Ship's Register, De-Rat, Crew List and certificate issued at Canakkale North-bound.
AUTHORITY: Marmara Bulgesi Liman ve Denizisleri Mudurlugu.

AGENT: Gulf Agency Co. Ltd., POB 1230–Karakoy, Istanbul/Turkey. Cables: "Gacshipping" – Istanbul. Telex 22213. Tel. 44 29 80, 457652.

IZMIR: 38.25 N. 27.09 E.

DOCUMENTS:
5 Crew Lists.
4 Passenger Lists.
2 Manifests of Transit Cargo.
3 Manifests of Inward Cargo, 1 of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
2 sets Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ships Certificates.

N.B. Ship's particulars form is to be filled in by Masters upon arrival at Izmir, and remitted to the Port Authorities.
PILOTAGE: Vessels are permitted to arrive and sail from Izmir by day and night. After entering the Gulf of Izmir, Masters who are not familiar with the waters, require a Pilot at Pelican Spit. The pilotage from Pelican Spit to Izmir is not compulsory and Masters must notify their Agents at least 12 hours in advance giving their ETA at Pelican Spit and ask for a Pilot.

Pilot can be contacted on VHF Channel 16.
ANCHORAGE: In the Outer Harbour, 300 m. outside Old Port breakwater, ample space for vessels to anchor. Cargo operations cannot be performed at anchor unless vessels have red label cargoes aboard for Izmir or in transit.
RESTRICTIONS: Docking of ships at the old port is not permitted during night, but ships can sail any time during night. At the new port, docking is permitted during night (weather permitting) also ships can sail any time during night. There are no tides at Izmir.
MAX. SIZE: Vessels of any size with a max. of 33 ft. draft can operate at Izmir. There is a pipe-line for oil-carriers in the Gulf of Izmir where tankers with a max. draft of 33 ft. can operate.

In Old Port, length restricted to 165 m., max. draft 8 m.
HEALTH: Vessels to show their Sanitary Certificate – if available aboard – also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if the vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard. If quarantine (fumigation) of the vessel is necessary, very considerable time is lost, and expense incurred because vessel must proceed to Fumigation Station at Klazomene, located at about 20 miles from Izmir (in the Gulf of Izmir) where fumigation can be effected and bad cases hospitalised.
RADIO: Izmir Radio Station: call letters TAN2. Istanbul Radio Station: call letters TAH.
TUGS: Tugs are compulsory for vessels of more than 2,000 grt. At Harbour Master's estimation, 2 tugs will be used for vessels over 4,000 g.r.t. in case of bad weather. Dues will be collected for each tug.

Four tugs of 200, 300, 970 and 1200 h.p. continuously available.
BERTHING: *Old Port:* Location Lat. 38° 25′ N. Long. 27° 10″ E. Harbour entrance to port 130 ft. wide, depth 40 ft., harbour length 1,200 m., harbour width 700 m. (Pilots boards 0.25 mile off entrance).

Precaution to be taken against N.E. and South winds. Mooring stern to quay. Operations effected by means of lighters. Altogether 8 vessels can berth in Inner Harbour with a draft of 24 to 30 ft.

Alsancak: Located at a distance of about 2 miles from the old port. Depth alongside berths 22 to 33 ft. Pilot's board vessels outside breakwater old port. Presently 9 cargo vessels of various sizes (mainly medium and small sizes) otherwise 5 to 6 large vessels can operate at the new port. There is also a berth for 1 large passenger vessel or 2 small size vessels.
BULK HANDLING FACILITIES: Grain silo has capacity 40,000 tons. The conveyor can deliver between 2,500 and 3,000 tons in 24 hours.

Bulk ore loaded by grabs. Daily loading capacity per shift of 8 hours is between 750 to 1,000 tons.
STEVEDORES: Straight time 0800–1200, 1300–1700 hrs. Overtime 1800–0200, 1300–1700 hrs. (Saturdays). Sundays and holidays as well as Saturdays from 1300 hrs.: overtime charges 50% increase on S.T. charges.

For overtime discharging operations at the new port, handling charges (overtime) from ship's tackle to the Custom's warehouse, are for account of the ship.

9 men per gang aboard (6 labourers, 2 winchmen, 1 hatch tender) 3 lightermen or men on the Dock.

Extra men used to reinforce regular gangs and in hatches congested with cargo for discharge secures a quick despatch.
MEDICAL: Advance notice optional. There is a local English-speaking doctor for service on board vessels.

Hospitals: U.S. Military Hospital, French Hospital, Government Hospital (Memleket). Doctors available to board ships or patient to proceed to their clinics.

U.S. Military Hospital for emergency cases only.
TANKERS: Izmir is a discharge port for tankers. Socony Mobil Oil receives petroleum products in bulk through a pipe-line at a distance of about 1 mile from their shore installations. Depth at the end of the pipe-line is 33 ft. The pipe-line is of 12 in. and the pumping is effected through a flexible of 10 in. at an average of about 450/500 t.p.h.

British Petroleum, receives petroleum products at jetty where the tankers berth stern to with a max. draft of 23 ft. Pumping is effected by the vessel from her stern with a 6 in. flexible hose.

Petrol Ofisi receives petroleum products at their jetty. Vessels berthed stern to with a draft of 17 ft. Same procedure for pumping as for British Petroleum. The above three installations are located in the Gulf of Izmir opposite the new port of Alsancak.
FRESH WATER: Fresh water is available for drinking. The water is given both from dock or by barge. Water is supplied by Port Monopoly. Delivery at the dock about 20 t.p.h. By barge about 40 t.p.h.

Two barges each of 200 tons capacity available.
FUEL: All kinds of fuel available subject to 24 hours' advance notice. Fuel supplied only against advance payment in free foreign exchange direct to Agent of the vessel.
DEVELOPMENTS: New port of Alsancak to be extended during the next five years by the construction of a breakwater, docks, warehouses totalling a berthing capacity of additional 5 to 6 cargo vessels.
GANGWAY/DECK WATCHMEN: Services of the watchmen recommended. Three shifts of 8 hours per day.
OPENING/CLOSING HATCHES: This work can be carried out by crew. If carried out by stevedores the cost is charged to vessel.
CERTIFICATES:
Deratisation Certificate.
Registry.
Vaccination Certificates (if required).
Health Certificate.
CUSTOMS ALLOWANCE: 50 cigarettes for each member of the crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. Wine and/or spirits: One litre for each member of the crew in an open bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
CONSULS:

U.K. General Consulate	tel. 32501
West Germany Consulate	" 34916
U.S. Consulate General	" 32137
Italian Consulate	" 33882
Greek Consulate	" 32622
Belgian Consulate (Honorary)	" 24110
Danish Consulate (Honorary)	" 24018
Norwegian Consulate (Honorary)	" 32066
French Consulate General	" 23116
Luxemburg Consulate (Honorary)	" 35737
Swedish Consulate (Honorary)	" 24878
Netherlands Consulate (Honorary)	" 32064
Finland Consulate (Honorary)	" 24930
Spanish Consulate (Honorary)	" 33689

REPAIRS: Ship's repair shops available: Denizcilik Bankasi (Turkish State-owned), Lui Tius (private). Deck and engine repairs are possible.
DRY DOCKS: No dry docks available.
REPATRIATION: All facilities available for crew changes and arranging necessary repatriation.
AIRPORT: Airport from dock – distance 30 kilometres. Airport is served by Turkish Airlines with 5 flights per day (local flights in connection with Istanbul International flights). Also one daily flight from Izmir to Athens (Greece) and back by Turkish Airlines.
TIME: Local time 2 hours ahead of GMT. Summertime GMT plus 3 hours.
HOLIDAYS: New Year's Day (from December 31st 12.00 hrs. to January 1st, 24.00 hrs.); National Sovereignty Day (from 22nd April, 12.00 hrs. to April 23rd, 24.00 hrs.); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); National Holiday (October 28th, 12.00 hrs. to October 30th, 24.00 hrs.); Sheker Bayram (3 days) movable; Kurban Bayram (4 days) movable.

On these days offices are closed. Work in port is allowed by paying 50% overtime to the S.T. wages. The overtime for the National Holiday (Oct. 29th) is paid 100% on the total regular overtime, which makes 300%. On the first days of Sheker and Kurban Bayram work aboard is unlikely.
POLICE/AMBULANCE/FIRE: Police, tel. 22771; Ambulance, tel. 22319; Fire, tel. 22222.
TELEPHONES: It is possible to place telephones aboard vessels at the new port of Alsancak.
SHORE LEAVE: Crew members are allowed to go ashore.
REGULATIONS: Berths at the new port of Alsancak are obtained on basis of the time and date of arrival of each vessel. If the port is congested, vessels wait for their turn at anchor.
DELAYS: During the active export season, some delays occur varying one or two days.
AUTHORITY: Izmir Harbour Master.

AGENT: Gulf Agency Co. Ltd., POB 857, Izmir. Tel. 32755 and 32864. Telex 52371. Cables: "GACSHIP" Izmir.

MERSIN: 36.47 N. 34.38 E. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
4 Passenger Lists.
2 Transit Cargo Manifests.
3 Inward Cargo Manifests, one of which must be legalised prior arrival by Turkish Consulate at loading port; if no Turkish Consulate, same to be certified by local Customs Authorities.
1 each of the Bills of Lading accompanying Manifests.
2 Cargo Stowage Plans.
Health Documents.
Ship's Certificates (Safety Equipment, Safety Radio, Class and Freeboard Documents).
2 Store Lists.

PILOTAGE: Agent orders Pilot through Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. Pilot boards vessel with service boat hoisting red and white flag. Sound signals: 2 long and 1 short blast. Pilot boards vessel outside main breakwater. Shipmaster can use VHF station according existing international frequencies.

ANCHORAGE: Safe anchorage in open roads outside main breakwater.

RESTRICTIONS: No particular restrictions. Ships can anchor in roads outside main breakwater at any time without Pilot.

MAX. SIZE: No limitation of draft in open roadstead, at anchor. Maximum draft in port alongside quay: 11.6 m. for tankers, 9 m. for other ships.

HEALTH: Clearance is effected on arrival. Vaccination Certificates to be presented if required. If suspected disease on board radio Agents full details before arrival.

RADIO: Istanbul Radio, call sign TAH, Izmir Radio, call sign TAM2, Mersin Radio TAM5. Wireless messages to be routed to Agent, preferably via Istanbul Radio. Port VHF service in operation.

TUGS: Tug boat compulsory for vessels over 1,000 grt. charged per hour or fraction of each operation. 4 tugs available up to 1,200 h.p.

BERTHING: Priority to Army, food relief and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

	Length m.	*Depth m.*
Quay No. 1 (Passenger Quay)	175	10
Quay Nos. 2 and 3	274	10
Quay No. 4	150	10
Quay Nos. 5, 6 & 7	493	10
Quay Nos. 8 & 9	275	10
Quay Nos. 10, 11, 12 & 13	each side 577	6 to 8
Quay Nos. 18 & 19 (ore and coal)		10

BULK HANDLING FACILITIES: At Quay Nos. 8 and 9 there is conveyor system which can deliver 600 t.p.h. from each spout. Discharging rate 100 t.p.h. from each of the 2 suckers.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, to be ordered 24 hours prior to arrival.

Generally 2 consecutive shifts of 8 hours per day. Discharging/loading rates average:

100 tons per shift general cargo.
200 tons per shift bagged cargo.
150 tons per shift baled cargo
175 tons per shift bulk ore

Max. rate for ore 400 tons per shift if grab loading.

MEDICAL: Master to inform Agent by cable if urgent medical aid is required upon arrival, also indicating if possible seriousness of case in order that adequate steps can be taken.

TANKERS: Quays No. 20 and 21, 350 m. long, berths on each side with depth of 12.5 m.

ATAS Refinery Terminal: Depth in harbour channel, 11.2 m. and, in approaches to channel, 12.3 m. Turning basin 1,148 ft. diameter, depth 42 ft. 8 in. Depth alongside berths 48 ft. 6 in.

Maximum length 229 m., draft 11.6 m. Tankers up to 12.19 m. draft have berthed.

Tankers in ballast up to 15,000 d.w.t. may berth/unberth at any time, day or night. Other vessels manoeuvre in daylight hours only.

One finger pier, berths for 2 tankers, 10-in. hose connections to 26-in. shore line. No facilities for slop disposal ashore.

Fresh water available from barge 100 tons each load.

DENSITY: Salt water 1025.

FRESH WATER: Fresh water supplied to tankers by barge but otherwise by shore installation at the rate of 30/35 t.p.h.

FUEL: Almost all kinds of fuel available in transit and facilities for delivery to ships.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: Owners or Masters to decide whether this work should be undertaken by the stevedores or by the crew.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operated. However, ship using her own means when such cranes are not available. Full lights to be supplied by ship.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS: Lebanon, Italy, Norway and Sweden.

REPAIRS: Welding and other minor types of repairs are possible.

REPATRIATION: Repatriation can be arranged by air.

AIRPORT: Adana Airport served only by domestic line THY (Turkish Airlines) with routes to Cyprus (ERCAN), Ankara and Istanbul. Distance is 75 km. from Mersin. Twice per week to Cyprus (ERCAN), twice daily to Ankara and 3 times daily to Istanbul.

TIME: GMT plus 2 hours, Summertime GMT plus 3 hours.

HOLIDAYS: New Year's Day, 1.5 days (31st December 0.5 day. 1st January 1 day); National Domination 1.5 days (22nd April 0.5 day, 23rd April one day); Spring Day, 1 day (1st May); Youth and Sport Day, 1 day (19th May); Liberty and Constitution Day, 1.5 days (26th May 0.5 day, 27th May 1 day); Victory Day (20th August); Republic Day 2.5 days (28th October 0.5 day, 29th and 30th October); Ramazan Day 3.5 days (14th September 0.5 day, 15th, 16th and 17th September), every year 10 days earlier start; Kurbam Day 4.5 days (21st November 0.5 day, 22nd, 23rd, 24th and 25th November), every year 10 days earlier start; All Saturdays and Sundays.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 3439; Ambulance 3555; Fire 0000.

TELEPHONES: No installation for connection on board.

GENERAL: Two consecutive shifts every day, the first one starting 0800–1700 hrs. and the second one at 1700–2400–0100 hrs. Agent may provide extra men if necessary to help ship's despatch. Ships have to hoist a Turkish flag.

SHORE LEAVE: Crew allowed shore leave.

AGENTS: Gulf Agency Co. Ltd., PO Box 328, Mersin. Turkey. Cable Address: "Gacship" Mersin. Telex: 67141. Telephones: 1080, 3730.

SAMSUN: 41.19 N. 36.21 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign vessels. Ordered by Agent subject to vessel's advance notice of ETA.

ANCHORAGE: Good anchorage in the Outer Harbour.

TUGS: Tugs are available.

BERTHING: Harbour protected by two breakwaters, entrance width 300 m., depth 11.9 m.

One quay, 956 m. long, depth alongside from 6.5 to 11 m., providing 4 deep-water berths.

FRESH WATER: Available from the quay.

FUEL: Not available.

STEVEDORES: Working hours for general cargo: From 0800 to 2400 hrs. in 2 shifts.

For bulk cargo: 24 hours operations in 3 shifts.

TRABZON: 41.01 N. 39.46 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign flag vessels. Arranged by Agent subject to vessel's notice of ETA in advance.

ANCHORAGE: In the Outer Harbour off the breakwater.

MAX. SIZE: Vessels up to 29 ft. draft.

TUGS: Two tugs available. Towage compulsory for vessels over 550 tons.

BERTHING: Main wharf 410 m. long, depth alongside 10 m. Vessels may be loaded and discharged while moored stern to the breakwater.

FRESH WATER: Obtainable from the quay.

FUEL: Fuel oil obtainable in limited quantities.

STEVEDORES: Working hours from 0800 to 1200 hrs. and from 1300 to 1700 hrs. Overtime can be arranged.

REPAIRS: There are no repair facilities.

ZONGULDAK: 41.28 N. 31.49 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilots obtainable from Coaling Company, Pilot boards off port entrance by launch. Ordered by Agent subject to vessel's ETA given at least 24 hours before arrival.

ANCHORAGE: Good anchorage off the harbour in depth of 13 fathoms, sand and mud bottom.

Anchorage prohibited South of a line drawn in direction 292.5° distance 7.5 cables from head of the Northern breakwater. The Southern limit of this area is a line drawn in direction 262° from the head of the Northern breakwater to the shore.

RESTRICTIONS: Harbour entrance between breakwaters. Entrance width 600 ft.

Traffic signals displayed from signal mast on Northern breakwater, as follows:

2 black balls or 2 red lights, meaning "Harbour closed."

2 black cones or 2 green lights, meaning "Harbour open."

A black ball over black cone or red light over green light, meaning "Do not attempt to enter".

A black cone over a black ball or green light over a red light, meaning "No tug available."

A black ball between 2 black cones or red light between 2 green lights, meaning "Wait. You will be piloted into the harbour."

3 black balls, or 3 red lights, meaning "Because of unfavourable weather you cannot be piloted into the harbour."

TUGS: Available.

BERTHING: Coal quays length 1,650 ft. depth alongside 10 m.

Cargo quay length 500 ft. depth alongside 10 m.

Northern Breakwater, 2 berths, at inner end with depth of 7 m. alongside.

FRESH WATER: Available from the quays.

FUEL: Only coal bunkers available.

Union of Soviet Socialist Republics

GENERAL: ALL PORTS:

(a) List of Soviet ports and port roads opened for foreign vessels:

I. Arctic Ocean Ports

1. Murmansk
2. Onega*
3. Archangel
4. Mezen
5. Naryan-Mar
6. Igarka

*Since 1971 the port of Onega is closed for foreign vessels from 1st September to 31st December early.

II. Baltic Sea Ports

1. Leningrad
2. Vysotsk
3. Vyborg
4. Tallinn
5. Pyranu
6. Riga
7. Ventspils
8. Klaipeda

III. Black Sea Ports

1. Reni
2. Izmail
3. Kilia
4. Belgorod-Dnestrovsky
5. Illyichevsk
6. Odessa
7. Kherson
8. Novorossiysk
9. Tuapse
10. Poti
11. Batumi
12. Yalta
13. Sochi
14. Sukhumi
15. Grigrevsky

IV. Azov Ocean Ports

1. Zhdanov
2. Berdyansk

V. Pacific Ocean Ports

1. Nakhodka
2. Aleksandrovsk-Sakhalinsky
3. Makarevsky (or Due) Roadstead
4. Octyabrsky
5. Shakhtersk
6. Uglegorsk
7. Kholmsk
8. Nevelsk
9. Makarov Roadstead
10. Poronaisk

(b) Addresses and telephone numbers of V/O "Sovinflot", V/O "Sovfracht", V/O "Sovsudopodyom" and V/O "Soyuzvneshtrans":

Vsesoyuznoe Obyedinenie "Sovinflot" acts as General Agent in providing services to Soviet and foreign flag vessels.

Postal address: V/O "Sovinflot", 1/4 Zhdanov Street, Moscow, 103759, U.S.S.R.

Tel. 296–50–32. Cables "Sovinflot Moscow". Telex 7217 and 7236.

Vsesoyuznoe Obyedinenie "Sovfracht" – All Union Chartering Association carries out operations connected with chartering of foreign and Soviet tonnage for transportation of goods, both for the Soviet foreign trade organisations and foreign charterers respectively.

Postal address: V/O "Sovfracht", 32/34 Smolenskaya-Sennaya Square, Moscow, 121200, U.S.S.R.

Tel. 244–24–11. Cables "Sovfracht Moscow". Telex 7168–7172, 7541, 7542.

Vsesoyuznoe Obyedinenie "Sovsudopodyom" performs offshore and deep-sea salvaging, ship-raising and underwater engineering works, deep-sea towage and dredging.

Postal address: 7 Shabashevsky Lane, Moscow, 125315, U.S.S.R.

Tel. 151–02–32. Cables "Sovsudopodyom Moscow". Telex 7197.

Vsesoyuznoe Obyedinenie "Soyuzvneshtrans" – handles transportation and forwarding of export and import cargoes on Soviet territory as well as transit of goods via the U.S.S.R.

Postal address: V/O "Soyuzvneshtrans", 32/34 Smolenskaya-Sennaya Square, Moscow, 121200, U.S.S.R.

Tel. 244–39–51. Cables "Suyuzvneshtrans Moscow". Telex 7266, 7291.

(c) Guiding principles to comply with when calling at U.S.S.R. ports: When calling at U.S.S.R. ports Masters of all foreign flag vessels are requested to comply with the Instructions and Provisions of the Government of the U.S.S.R. published annually in issue No. 1 of the U.S.S.R. Notices to Mariners, Special Instructions for vessels calling at U.S.S.R. in each particular sea basin published by the General Department of Navigation and Oceanography of the Ministry of Defence of the U.S.S.R. (GDNOMD).

All vessels calling at U.S.S.R. ports must also abide by the Customs and Obligatory Harbour Regulations of each particular port of call which are obtainable through the local Inflot agencies, viz. shipping agents for foreign flag vessels at U.S.S.R. ports.

(d) Ship/shore radio link: Ships' communication with ports of call is usually maintained through the local port radio stations, some information of which is given in the respective entries for the ports.

Ships' radio stations and/or radio-telephones (excluding VHF), must not be operated when the vessel navigates or lies at anchor within the limits of the port boundaries as well as when calling at or leaving the port, except in emergency, e.g.:

when giving distress signals;
when rendering assistance to other vessels in distress;
while making way through the ice;
after having obtained special permission of the Harbour Master.

Note: Superiority in use of radiocommunication means is given to an icebreaker when leading a convoy of ships through the ice; in case there are two or more icebreakers in a convoy – to a leading icebreaker.

Vessels equipped with VHF radiotelephones must keep them operated in the calling Channel stipulated by the Obligatory Harbour Regulations when navigating within a port limit.

(e) Notice of arrival: At first 48 hours and later 2 hours prior to arrival at a port (roadstead) of destination (in case of tankers and ships carrying perishable goods – 72 and 12 hours respectively) Masters must give through the Inflot Agency notice to the Port Administration about vessel's ETA.

According to Charter Parties, Sale Contracts and other documents stipulating conditions of carriage of goods by sea, Masters should give necessary information to additional addresses at stipulated time.

The Port of destination Authorities should be immediately informed by the Master about all unforeseen delays during the voyage.

In the preliminary notice the Master should state the following information:

Name and Nationality (flag) of the ship;
Port of departure (last port of call);
Draft fore and aft; cargo carrying capacity, volume of holds. Measures of hatches, number and location of tween decks, etc.;
Nature and total quantity of cargo and stowage plan; heavy lifts (over 3 tons) be shown separately;
Amount and position of water ballast (for tankers only);
Failure of cargo handling gear, if any;
Whether vessel requires supply of electric power from shore for the lighting purposes;
Health and sanitary conditions of the ship;
Request for port services.

Vessels calling at ports for bunkers, fresh water, provisions, etc., only, should advise their ETA, etc., to the Port Administration as per details shown above.

The Port of Call Administration should provide Masters of calling vessels with all necessary information regarding anchorage, berthing and handling of cargo not later than 2 hours prior to vessel's arrival.

All possible damages to a vessel which may occur either for lack of all relevant details mentioned above or due to untimely and/or incorrect information given by the Master to the Port Authorities when advising ETA, etc., are to be for the vessel's account.

Since for some ports time and terms of giving Notice of Arrival are different from those mentioned above, Masters are advised to look for the precise information in the entry for the particular Port of Call.

(f) Pilotage: Pilotage is compulsory for all vessels when calling or leaving U.S.S.R. sea ports, as well as when mooring and unmooring. In addition the Pilots perform shifting berths and other duties related to the harbour operations.

A Pilot having boarded a vessel shall be advised by the Master of the precise draft and other particulars necessary for safe pilotage of a vessel.

According to the Merchant Shipping Code of the U.S.S.R. the Master of a vessel shall be obliged to pay a fine in an amount of double the rate due as pilotage fee for incorrectly declaring the draft, length or breadth of a vessel or its net registered tonnage, irrespective of the liability established by law for the consequencies which may occur as a result of the incorrect information.

A Pilot should be ordered through the local Inflot Agency 12 hours prior to vessel's arrival at the Pilot boarding place. More accurate information should be given 4 hours prior to arrival unless otherwise stated in the Obligatory Harbour Regulations.

(g) Anchorages: A vessel approaching the Port of Call and not having been boarded by a Pilot immediately on arrival, or for any other reason, shall anchor in the anchorage area specially designated for the purpose and under no circumstances let its hull go across the boundaries of this area or prevent other vessels from using the leading lights, navigation marks or lights.

No anchorage is allowed in the prohibited zones shown on the charts, in special manuals for navigation and/or in the Obligatory Harbour Regulations as well as those announced in the appropriate Notices to Mariners.

No anchorage is allowed at a distance of less than 1.5 cable length off fairways and leading lines as well as in depths not providing a vessel with a safe anchorage while drifting on the anchor chain.

No vessel shall anchor within the water area of a shipbuilding yard after being refused to carry out repairs.

It is prohibited to change a vessel's anchorage by drifting.

Vessels carrying explosives or inflammable liquids must anchor in the areas recommended for them only.

All vessels when at anchor shall carry the lights or the marks as to the International Regulations for prevention Collisions at Sea. Apart from that every vessel by night, when at anchor, shall be illuminated from stem to stern with additional lights placed so that the hull be as far as possible visible from the surface of the water.

Vessels using a kedge anchor shall, in addition to the lights and the marks as to the International Regulations for Prevention Collisions at Sea, conspicuously display by night a white light and by day a red flag lowered from the stern by the anchor chain to the extent of half of the side's height.

In restricted visibility whether by day or night, every vessel when at anchor shall use sound signals conforming strictly with the International Regulations for Prevention Collisions at Sea.

All vessels when in port must hoist their national flags on the stern's flagstaff.

During Winter months all vessels when in Arctic ports must hoist their national flags daily until they are visible and during Summer from 0800 to 2000 hrs.

Masters of all vessels when at anchor are not allowed without the Harbour Master's consent, except in emergency, and/or in case of Port and Boarding officials, to give anybody permission to come alongside in a private launch or a small rowing boat whether under oars or sail and board a vessel.

Swimmers must not be allowed to come on board a ship.

Should, in case of emergency, swimmers have been taken on board or strangers have been discovered aboard a vessel, the Master of such ship shall forthwith without delay report the fact to the Harbour Master and shall later hand those people over to the Representatives of the Port Administration.

(h) Regulations for entering and leaving U.S.S.R. ports: When approaching U.S.S.R. ports all vessels must follow the recommended courses announced in issue No. 1 of the U.S.S.R. Notices to Mariners.

All vessels when approaching a port or a Pilot's boarding place as well as when leaving a port during the daytime must keep their National flags hoisted. A vessel's National flag must be kept hoisted on the stern flagstaff from 0800 hrs. in the morning up to sunset, and the U.S.S.R. National flag on the fore mast. In arctic ports during a prolonged period of light time National flags must be kept hoisted from 0800 till 2000 hrs.

Every vessel coming from abroad shall hoist Quarantine Signals of the International Code of Signals depending on health and sanitary conditions on board.

For entry permit a vessel must contact the Port Control service either by VHF radio-telephone or by means of visual signals, viz, by day, hoisting her call-sign, and by night, making call-sign signals in Morse Code by searchlight or by Morse-lamp.

No ship shall enter the Harbour until the proper signal has been hoisted at the signal station or by a pilot boat authorising such entry.

No vessel is allowed to enter the Harbour until the prohibition signals hoisted at the signal station shall have been lowered down.

If entry is refused a vessel must immediately slow down, alter course and if possible leave the fairway, and drift or drop her anchor in the recommended area.

Turn of entry to the Harbour is controlled by the Port Administration with regard to tonnage of vessel, nature of cargo, weather conditions in the port area, readiness of the port to start cargo operations and other circumstances.

Simultaneous entry of two or more vessels to the Harbour or vice versa is not allowed in the majority of ports.

In all cases a vessel entering the Harbour must give way to the outgoing one not preventing her manoeuvrability.

(i) Sanitary and Quarantine requirements: It is prohibited by law to contaminate inner and territorial waters of the U.S.S.R. with any kind of substances which are considered to be unhealthy for people or harmful to alive resources of the sea. It is also prohibited to discharge into the sea oil contaminated, faecal, washing waters and oil residues; no rubbish, waste foodstuff shall be thrown into the water. The list of harmful substances is published annually in issue No. 1 of the U.S.S.R. Notices to Mariners.

Not later than 6 hours before arrival Masters of all vessels coming from foreign countries to the U.S.S.R. ports should advise Quarantine Authorities by radio through Inflot Agency giving full details of health conditions on board as well as sanitary conditions at the last port of call.

If medical assistance is required on board Master has to contact Inflot Agency. All vessels with open sewage system are prohibited to call at ports of the U.S.S.R.

No shore connection is allowed to a vessel until free pratique is obtained.

Foreign vessels are granted free pratique after the arrival formalities have been accomplished by the Boarding Officials, viz, Health Authorities, Customs and Immigrations.

Masters are advised to ask a Sanitary Officer for inoculation, vaccination, fumigation, de-contamination, etc., if required, whilst he is on board a ship together with the other Boarding Officials.

Veterinary Certificates of Good Health are required for the livestock, all kinds of meat, animal food and raw meat stuff brought to the U.S.S.R. ports from abroad. Certificates should be issued by the proper authorities of the country from which the cargoes have been exported.

Masters should have a Phytoquarantine Certificate for the goods of vegetable nature.

It is prohibited to take ashore fruit, vegetables, grain seeds, plants, plant products, etc., without a certificate issued by a local branch of the U.S.S.R. Agricultural Quarantine Inspection; animals and birds are also not allowed to be brought ashore without a Veterinary Certificate.

(j) Documents:

Upon arrival at a U.S.S.R. port: The following ship's documents should be produced by the Master to the representative of Inflot Agency for further examination by the boarding officials upon arrival at a U.S.S.R. port (Also see "Annex 2" below):

Ship's Patent.
Measurement Certificate.
Load-line Certificate (or International Load-line Exemption Certificate).
Passenger Ship Safety Certificate.

Upon arrival at the port of destination the Master must fill in the following standard IMCO shipping documentation forms:

General Declaration, 2 copies.
Cargo Declaration, 4 copies.
Ship's Crew Personal Effects Declaration, 2 copies.
Crew List, 4 copies.
Passenger's List, 4 copies..

In Addition the ship's administration should declare to the Inspector of the Health Authorities the following documents:

Ship's Health Certificate;
Deratisation Certificate;
International Certificates of Vaccination;
Maritime Sanitary Declaration.

The Master fills in a form of the Master's Declaration (Shipowner's address, cargo, cases of illnesses on board, if any, etc.) with the Agent's assistance.

In accordance with article 38 of the Merchant Shipping Code of the U.S.S.R. a foreign flag ship which, on calling at a U.S.S.R. port, raises doubts as to her meeting the requirements of safe navigation may, irrespective of whether she possesses the necessary ship's papers mentioned above, be subjected to an examination by way of technical survey on the same basis as ships sailing under the State Flag of U.S.S.R.

The Obligatory Harbour Regulations to be complied with fully during a vessel's stay at a U.S.S.R. port should be handed over to the Master either by Pilot or by representative of the Harbour Master's Office, or by Agent.

ANNEX 2

The Memoranda for Masters of Foreign Vessels calling at Soviet Ports.

1. On arrival of the ship the Master is to submit to the representatives of the port authorities the following documents (IMCO forms) duly signed by ship's administration:

General Declaration (Form I). Filling in of points 8 and 11 is not compulsory (5 copies).

Cargo Declaration (Form II). (4 copies). Filling in of point 6 is not compulsory; points 7, 8 and 9 are to be filled in only for:

a) cargoes for which Bills of Lading were not issued (names of Shippers and Consignees to be stated);
b) transit cargoes;
c) cargoes for other Soviet ports;
d) cargoes of agricultural origin;

Ship's Stores Declaration (Form III) – not required.

Crew's Effects Declaration (Form IV). Amount of Captain's and Crew members' valuables (gold, silver, platinum, jewellery, bonds, travel checks, etc.), personal fire arms and cartridges (ammunition), explosives and narcotics are to be stated in point 2 (2 copies).

Crew List (Form V) (4 copies).

Passenger List (Form VI) (4 copies).

2. The Master of a ship is to instruct all members of the ship's crew that in accordance with the Rules in force in Soviet ports:

Exportation and importation of Soviet currency is forbidden;

No articles are permitted to be taken ashore or brought on board the ship without permission of the Custom House Authorities;

Articles taken ashore or brought on board the ship and concealed from Custom's control shall be regarded as smuggled goods liable to confiscation with a fine imposed;

Likewise, the sale of any articles of foreign origin on the territory of the USSR will be regarded as smuggling;

No wastes shall be thrown into the water or on the quay; the discharge of oil contaminated water and/or oil residues is prohibited;

All mooring ropes must be fitted with rat-guard plates;

Only one gangway must be led ashore at night when loading or discharging is not carried out;

It is prohibited to take ashore grain, seeds, plants, plant products, soil, etc. as well as animals and birds;

Violation of the above-mentioned rules will entail penalty in accordance with the laws of the USSR.

Upon sailing from a U.S.S.R. port: No other documents apart from those mentioned are required in order to obtain the authorisation to leave the port.

No vessel is to get under way without having obtained the permission of the Harbour Master.

The authorisation to leave the port shall be given after a vessel herself and her draft shown in the Master's Statement have been checked by a Port Authorities' representative.

The Harbour Master may not allow a vessel to leave the port, if:

(1) The Cargo Loading Regulations have not been fulfilled, *i.e.* a vessel is considered overloaded or wrongly loaded in case:

a) a vessel's load lines corresponding to the maximum depth to which she should have been loaded are under water without any list;
b) the cargoes loaded in the holds and/or on deck have not been made fast in a proper manner or have not been made fast at all;
c) a vessel has a bad list* caused by faulty loading or her stability does not correspond with the ship's documents;
d) a vessel loaded with bulk or liquid cargoes has not used the necessary materials or accommodations to prevent cargoes from shifting or overflowing in case of vessel's pitching and rolling;
e) the deck cargo is considered as danger to the safety of a vessel and the safety of life on board caused by faulty loading;
f) the corresponding regulations for loading of dangerous cargoes or cattle to be carried by vessel have been broken;
g) other loading regulations have not been abided by in the course of loading.

(2) Under other circumstances which may cause a danger to the safety of a vessel and the safety of life on board, as well as in case when the ship's documentation regulations have been infringed.

(3) When the port dues, tolls and fines have not been paid.

All expenses which may occur due to a vessel's possible delay in the port in connection with the reasons stated above are to be for the Owner's account.

Note: *According to the Harbour Regulations a vessel is not allowed to leave a port if her list exceeds 5° or she has a trim by bow which was not specified by her construction.

(k) Customs Regulations and Allowances: Commodities and articles not designed for the port of call are not allowed to be taken ashore and should be sealed by a Customs Officer, if necessary, immediately after the clearance formalities have been accomplished or after the part of the delivered cargo loaded and stowed at the same place has been discharged.

In all U.S.S.R. ports alcohol and tobacco articles are allowed to be taken ashore in small quantities and for personal consumption only.

(l) Berthing: Berthing can only be effected with tug assistance and a State Pilot on board. Likewise, no vessel shall leave or shift berth without employing the services of a Pilot authorised by the Port Administration to make the voyage in question.

Vessels must take up the berths assigned to them and conform strictly to the Obligatory Harbour Regulations in force.

A Pilot or the Agent shall provide the Master with all necessary information as regard to depths, tugs, conditions in the Harbour, etc., before mooring and shifting berth starts.

The responsibility for the safety of a vessel during her manoeuvring and berthing as well as for possible damages to a berth or other port facilities shall always rest with the Master.

No vessel is allowed to change berth due to handling of cargo or for any other reason unless the main engines, the mooring winches, the steering gear, etc., are in good working order and there is sufficient number of the members of the crew to ensure shifting berth when required.

It is strictly prohibited to work with vessel's propellers when lying alongside berth. To avoid damage to the underwater parts of a berth while mooring or unmooring every vessel must have the main engines going "dead slow" until her stern is 10 m. from the quay.

When berthing, Masters should use strong and reliable mooring lines and make them fast over the quay pile-moorings and bollards only. It is strictly prohibited to make fast mooring lines over any part of the quay equipment which has not been intended for that purpose.

When lying alongside berth, every vessel must have a gangway or a gangway board with a lifeline secured along, led ashore and made fast. There should be a life net under the gangway platform and a lifebuoy nearby. Gangways must be sufficiently illuminated at night.

(m) Stay in port at berths: When lying alongside berths, all vessels to be moored by long safe ropes which are to be kept fast at all times, and constant watch should be kept by day and at night.

All mooring ropes must be fitted with rat-guard plates.

From sunset to sunrise all vessels' decks, cargo decks and gangways must be illuminated.

Every vessel, whether in the outer roads or in the harbour, must always have on board a sufficient number of crew to be able to ensure both the ship's safety and her everyday routine. Vessel's fire-fighting and life-saving equipment must always be ready for use on board or to render assistance to other vessels or shore objects in case of emergency.

When in port, no vessel is allowed, without having obtained the Harbour Master's permission, to make repairs to the main engines or to the ship's auxiliary equipment thus depriving her of the opportunity to shift berth at short notice in case of emergency.

It is not allowed, without the permission of the Port Administration, to use vessel's boats, underwater oxygen and any underwater apparatus of other types.

No vessel is allowed to clean boilers or discharge any sort of chemicals or organic products into the water, giving off smoke and sparking from vessels' funnels.

(n) Ship's movement in the harbour and shifting berths: No vessel shall leave or shift berths without the permission of the Port Authorities. In case there are no provisions in the Contract of Carriage of Goods by Sea or in the Bill of Lading, a vessel shall accomplish one shifting from berth to berth during the course of her loading and shifting upon unloading to the loading berth at the Owners' risk and expense. Any subsequent shifting shall be at the expense of the goods.

All shiftings in the port connected with a vessel's needs, viz. bunkering, loading supplies and/or provisions, making repairs, etc., shall be at the expense of the vessel.

All haulings both during the course of loading and unloading shall also be at vessel's expense.

(o) Tugs assistance: Tugs, if necessary, are usually ordered by the Master according to a Pilot's advice.

In some ports use of tugs during mooring and shifting berths is compulsory due to the heavy conditions of navigation.

Masters shall be charged for tug assistance, if required, according to the current port rates. Time for use of tugs shall be counted from the moment of leaving their usual berthing place up to the moment they return.

Notes: In all the U.S.S.R. ports 1 hour time is fixed for passage of a tug-boat to a vessel from her usual berthing place and vice versa after she has accomplished her assistance, except the port of Archangel where 2 hours time is applied. For detention of a tug-boat a vessel shall be charged as per usual working time.

For cancellation of a tug, a vessel shall be charged full rate, including detention time and time of passage of a tug from the berth to the vessel and vice versa.

When ordering a tug for unmooring, Master should fill in and sign a special application form given by the Agent. The actual time of completing the towage shall be approved by the Master of a towed vessel.

In ports where the towage is compulsory when mooring and shifting berths, the Master shall be charged for the tugs' assistance whether used or not, and having refused tugs shall be held responsible for the consequences thereupon.

(p) Notice of readiness: In case there are no special provisions in the Contract of Carriage of Goods by Sea, the Master shall, during the established office hours upon the accomplishment of Customs formalities and having obtained free pratique, deliver through his Agent in the port, viz. Inflot Agency, a notice of the ship's readiness for loading or unloading to the consignee or the shipper.

The notice of the vessel's readiness shall be considered accepted if she is actually ready to load the cargo into or unload it out of all the vessel's holds or tanks.

(q) Handling of cargo: All cargo handling areas in the ports are under control of the Port Administration which shall provide vessels with labour, tally staff, sheds and warehouses, employees, etc.

To ensure successful handling of cargo the vessel shall, when required by shippers or consignees, receive or discharge cargo day and night, as well as on Sundays and holidays, furnishing free of charge all necessary cargo handling gear. Though in most ports the cargo handling is done by port cranes both from the quays and lighters, a vessel shall, in some ports, use her own cargo handling equipment, which has to be in good working condition.

In the latter case, the Master shall produce to the Agent the Cargo Equipment Certificate which must be valid.

Loading or unloading time is calculated as to the rates stipulated in a Charter Party or according to the Customs of the Port in the absence of same.

Should the port labour participate in the opening or closing of hatches, a vessel's administration shall be responsible for the rules of safety engineering to be complied with.

Opening and closing of mechanised ship's hatches shall always be done by the ship's crew.

Should shore cranes be used for loading or unloading instead of a vessel's cargo-handling equipment, the Master shall beforehand remove aerials, aerial halyards, stay rods, wires, etc., crossing the air space over a ship's hatches and preventing the shore cranes' derricks from free circulation.

The vessel's derricks shall not project over the sides.

(r) Agency: All foreign vessels upon arrival at the U.S.S.R. ports are attended by the maritime agencies Inflot.

Inflot agencies provide foreign vessels with the following services:

Inform the Port Authorities and other organisations about vessels' expected time of arrivals (ETA), nature and quantity of cargo to be handled, expected time of loading or discharging, etc.;

Render assistance to the Masters in obtaining Pilots, tugs, berths, launches, etc.;

Perform all the necessary formalities connected with the vessels' arrival and departure;

Ensure that Masters are acquainted with the Port Rules, Obligatory Harbour Regulations as well as other documents and instructions issued by the Port Authorities;

Give advice to the Shipowners and other interested parties regarding vessels' movement and the prospects for the handling of cargo;

Render help in speeding up cargo—handling operations;

Provide vessels with supervisors and tallymen;

Prepare time sheets and submit them to the Masters, Port Authorities and Shippers (Consignees) for their further approval;

Sign on Masters' behalf cargo and other documents;

Arrange bunkering, delivery of fresh water, provisions, technical supplies and all kinds of ship-repairs;

Render help to the members of the crews in obtaining medical assistance;

Make payment of dues, charges, fines (if any), etc., on behalf of the Shipowners and for their account;

Take all necessary measures for improvement of the handling of cargoes and ships' services;

Look after the Court (Arbitration) cases and cargo claims on behalf of the Shipowners;

Make Sea Protests as well as translation and duplicating of any documents on Masters' requests;

Repatriate members of the crews from the U.S.S.R. to their home ports;

Invite surveyors qualified by the U.S.S.R. Register of Shipping to conduct vessels' surveys;

Make extension of ships' documents;

Render help to the Shipowners in delivering and redelivering of their vessels on time charter;

Assist in arranging cargo fumigation on board;

Perform any commissions on the instructions of the Shipowners in regard to the ships' services and protection of their interests before any Authorities.

It is in the interest of the Master to advise Inflot Agency timely information as regard to a vessel's name and flag, ETA, gross register tonnage; draft fore and aft; position of cargo in hold (stowage plan); number, weights and location of heavy lifts, number and length of oversized (over 9 m.) pieces and Owners' cable address and telex number thus putting the Agent in a position to calculate the approximate sum of the disbursement expenses and ask the Shipowners to remit same (disbursement accounts are to be paid before vessel's departure).

Note: Bearing in mind the fact that most of the shore offices are closed on Sundays and holidays, the Master shall cable to Inflot Agency well in advance his order for bunkers, repairs, technical supplies and cash to enable the Agent to make necessary arrangements.

All branches of Inflot Agency work round the clock, including Sundays.

Cable address of any branch of Inflot Agency is "Inflot", e.g. "Inflot Leningrad".

(s) Fire safety measures: Fire safety measures at U.S.S.R. ports must comply with the provisions of the International Code for the Carriage of Dangerous Goods by Sea. Every vessel upon arrival at a port must keep constant fire watch day and night and have fire-fighting and life-saving equipment always ready for action. Members of the crew must keep strictly to the Fire Safety Regulations especially during vessels' stay at oil and timber berths. Giving off smoke out of the funnels is strictly prohibited. In all the U.S.S.R. ports a fire brigade could be called over the phone by dialling 01 in case of fire.

(t) Medical assistance: Medical assistance, if required, is available, including vaccination and inoculation as well as dispensary and hospital treatment in all the U.S.S.R. ports. In case of emergency an ambulance or a doctor should be called for by telephone – 03 in all the ports.

(u) Customs of the ports: Customs of the ports should apply in case:

(1) there is no Contract of the Carriage of Goods by Sea at all;

(2) there are no provisions in a Charter Party or in the Bills of Lading in respect of items covered by these Customs;

(3) a Charter Party or a Sale contract and/or any other Contracts of the Carriage of Goods by Sea specially refer to these Customs of the Ports.

(v) National and general holidays of the U.S.S.R.: National and general holidays in the U.S.S.R. are fixed.

5 days working week with 2 holidays has been introduced for most of the industrial enterprises, government and commercial offices and other institutions. Saturdays and Sundays are weekly holidays in the U.S.S.R.

The other holidays are:

1st January (New Year's Day); 8th March (International Women's Day); 1st and 2nd May (Days of International Workers' Solidarity); 9th May (World War II Victory Day); 7th and 8th November (Anniversary of the Great October Socialist Revolution, 1917); 7th October (U.S.S.R. Constitution Day).

Places of Recreation for foreign seamen: In the majority of the Soviet commercial sea ports foreign seamen can spend their spare time in the International Seamen's Clubs which can offer concerts by professional and amateur actors and singers, evenings of public hearing of the recorded Russian and foreign music.

Soviet and foreign films, etc. The sightseeings are usually organised by the local excursion bureaux.

ARCHANGEL: 64.32 N. 40.31 E.

LOCATION: A White Sea port. Archangel is situated at the mouth of the Severnaya Dvina river, in the S.E. corner of Dvina Bay. A part of the harbour is situated at the Northern end of the Povrakulsky Island, at the junction of the Maimax river and the Kuznechikha river, and is called the Economia Avant-port. The total length of the port area is about 30 miles.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Notices of ETA in accordance Soviet Wood Charter Party. Pilot boat located in area of the light buoy "Mudyugsky I". VHF Channel 16. Pilot boat is tug-boat with word "Pilot" on wheelhouse. Vessels awaiting Pilot may anchor at safe distance to North from pilot boat location. In event bad weather pilot boat goes to shelter, being available by VHF radio.

While waiting for a Pilot, vessels may lie at anchor at a safe distance to the North from the pilot boat location.

In the event of bad weather a Pilot shall board a vessel at a sheltered place shown by him.

When a Pilot is not able to board a vessel due to weather conditions, a pilot boat is usually situated on the Southern side of the Mudyug Island. In this event vessels should anchor at the entrance of the channel from seaward and wait for a Pilot's arrival.

ANCHORAGES: There are several places which can be used by foreign vessels for anchorage. They are:

(1) The outer roads with depths from 10.0 m. to the North and N.W. from the reception buoy "Mudyugsky I".

(2) The Chizhovsky roadstead with depths of 7.0–9.0 m. is used by all vessels while the Customs formalities are carried out both before entering and leaving the port.

(3) The Solombala roadstead with depths of 5.0–9.0 m. is used by vessels for anchorage while awaiting a berth for loading cargo.

(4) The roadstead of the Maimaksansky timber port with depths of 5.0–9.0 m. is used by vessels while awaiting a berth for loading cargo or when awaiting good weather for going to sea being fully loaded.

(5) The Lower-town roadstead with depths of up to 6.0 m. is used for anchorage by coastal traders.

(6) The Town roadstead with depths of 6.0–9.0 m. is used for anchorage by vessels while waiting for bunkering or time for passage under the railway bridge.

(7) The Krasnoflotsky roadstead with depths of 9.0 m. is used for anchorage by vessels awaiting a berth for loading or a passage time under the railway bridge. The ground at all roadsteads – mud and sand; anchoring is performed according to the Pilot's recommendations.

RESTRICTIONS: Ice breaks up in April. Port area open from end of April through to November.

During the time of high water vessels can enter the port through the approach channel Berezovy Bar if having length not more than 160 m. and draft not exceeding 7.9 m. Changes of passage drafts are published in the U.S.S.R. Notices to Mariners. Vessels going to timber mills No. 2 and No. 3 as well as to the cargo area Bacariza pass through the central draw span of the railway bridge twice during 24 hours (by day and night). During bad visibility (less than 5 cables) movement of vessels within the port is not allowed.

HEALTH: All vessels coming from foreign countries inspected by Sanitary Office. If no diseases vessel obtains free pratique. If vessels entering after calling at another U.S.S.R. port, pratique automatic.

RADIO: All information from sea may be routed through Murmansk Radio (UMN) and Archangel Radio (UGE), A1 500 kc/s., A3 2182 kc/s.

All vessels when approaching the port of Archangel should establish radio contact through the coastal "Archangel radio" station which operates 24 hours per day on the following frequencies:

Call Sign	Frequencies working (kc/s)	Frequencies calling (kc/s)	Type of trans-mission	Time	Remarks
UGE	500	500	A1	H24	
UXN	6237	6268.5	A1	H24	Operates from 05 mins. – 15 mins. each hour.
	8610	8362	A1	H24	
	12795	12540	A1	H24	
	16867.5	16726	A1		
Archangel-radio	2182	2182	A3	H24	During navigation only
	13119.5	—	A3H		
	(mHz)	(mHz)			
"Port" (Port control)	156.80	156.80	F3	H24	,,
"Lotswakhta" (Pilots' watch)	156.80	156.80	F3	H24	,,
"Inflot" (Inflot agency)	156.80	156.80	F3	HX	,,

The storm signals station is situated in the Solombala area on the embankment of the Severnaya Dvina River named after George Sedov (64° 35′ N., 40° 30′ E.).

Storm signals are shown by the International Code of Signals by day and by Morse system at night.

Masters of vessels proceeding to the port of Archangel should advise ETA and all necessary information to the Inflot Agency as per conditions of the "Soviet Wood" Charter Party.

24 hours prior to arrival advise ETA to Inflot Agency. Four hours prior to approaching the "Mudyugsky I" Masters should advise more precise time of arrival.

TUGS: If necessary ordered 2 hours before arrival and normally join vessel near berth. Usually use ship's lines.

BERTHING: To certain extent depends upon tides. 37 berths available with depths alongside up to 8.5 m.

There are a large number of berths in the port along the river front, as well as at the Economia Avant-port.

Berths are equipped to handle timber, wood-pulp, paper, machinery and general cargo. There are enclosed warehouses and concrete floor sheds in the port.

CARGO HANDLING FACILITIES: Berths of the commercial port are equipped with mobile electric cranes of up to 20 tons capacity. Loading of timber from berths of timber mills is made by electric cranes and vessels' cargo gear. There are also floating cranes from 5 to 100 tons capacity as well as other cargo handling equipment and intraport transport means.

BRIDGES: Vessels proceeding to load cargo at sawmills 2 and 3 have to pass under bridge which is opened twice a day.

STEVEDORES: No particular ETA advices to stevedores/shippers required except those mentioned in Soviet Wood C/P. Loading rates, etc., also stipulated by Charter Party.

Mobile electric cranes of up to 20 tons capacity are operated on the quays. There are also floating cranes of up to 50 tons capacity, other cargo handling equipment and intra-port transport facilities. Sometimes, cargo handling is by vessels' gear.

MEDICAL: If any medical attention or prompt assistance required, Master has to contact Agent. No advance notice required. Clinic and hospital available.

DENSITY: Fresh water practically throughout port.

FRESH WATER: Usually delivered by self-propelled barges (minimum charge for 15 tons). A few berths equipped with shore water lines.

FUEL: Bunkers (diesel oil, gas oil, fuel oil) can be taken from barges stationed in the Town roadstead or can be delivered by lighters.

FIRE PRECAUTIONS: While lying alongside timber berth vessel to take maximum fire precautions.

DEVELOPMENTS: For the immediate future no draft increase expected. Some berths under reconstruction and cranes being installed to load timber.

GANGWAY/DECK WATCHMEN: Not available from shore. Usual watch kept by ship's crew.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CERTIFICATES:
Seaworthiness.
Measurement.
Loading Line.
Cargo Equipment.
Safety Equipment Certificates.
Deratisation Certificate.
CUSTOMS ALLOWANCE: Tobacco/wine: No quantity limits, but not allowed to be brought ashore.
IDENTIFICATION CARDS: Only Seamen's Books required.
CONSULS: No Consuls in Archangel.
REPAIRS: All types of repairs possible, also underwater surveys.
DRY DOCKS: There are floating docks with capacity up to 7,000 tons.
REPATRIATION: Repatriation and crew changes require visa formalities.
AIRPORT: Airport near town. Served by regular airlines.
TIME: GMT plus 3 hours (All year).
HOLIDAYS: General holidays: all Sundays and Saturdays: January 1st (New Year's Day); March 8th (World Women's Day); May 1st, 2nd (World Labour Day); May 9th (Victory Day); November 7th, 8th (Great October Socialist Revolution Day); December 5th (U.S.S.R. Constitution Day). Cargo work on these days at shippers' discretion.
POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.
TELEPHONES: Can be arranged on board.
SERVICES: Compass adjusting, radar and radio repairs, etc.
SHORE LEAVE: Each crew member properly signed in Ship's Articles and having valid seamen's Book allowed ashore.
DELAYS: On account of rain when loading timber.
NAVIGATION: Masters proceeding for loading timber should bear in mind that the swing bridge on their way to timber mills No. 2 and No. 3 is open twice daily.

All vessels with drafts of less than 3.6 m. especially when engaged in towing timber rafts, should keep out of the way of deep-drafted vessels when passing through narrow places and approaching channels both at sea and in the river, and should not hamper their safe passage in such places. They should also safely pass vessels engaged in dredging of a channel.

When approaching a bend in a channel, every vessel should beforehand give a signal by 1 prolonged blast on her whistle or siren, reduce her speed and when it is safe and practicable, keep to that side of the channel which lies on the starboard side of such vessel.

Every Master when passing through a narrow channel, or approaching a bend in a channel should take positive early action prescribed by the International Regulations for Preventing Collisions at Sea to avoid a risk of collision with a vessel approaching from the other direction.

Deep draft vessels shall not overtake each other when navigating in the channel of the Beresovy Bar. A vessel proceeding to the port along the course of the channel must keep out of the way of another vessel leaving the port.

No vessel shall navigate in the port harbours in restricted visibility when navigational lights, marks, leading lights, buoys, etc. are not visible.

Ice: At the head of Dvina Bay drift-ice extends as far as 12 miles from the shore by the end of November. The Severnaya Dvina estuary usually gets frozen over at the beginning of November. At Dvina Bay the ice usually breaks up in April and at the Severnaya Dvina estuary – at the beginning of May. Thus, navigation in the port area lasts between 6 – 7 months from May till October.

Powerful ice-breakers, ice-strengthened vessels and tugs are maintained by the Port of Archangel Authorities to assist in navigation of the Dvina Bay waters and off the coast when ice conditions prevail.

Tide: The tidal range at the head of Dvina Bay reaches 0.8 m. – 1 m. and at Mudyug Island 0.1 m. – 0.5 m.

The in-going flood stream is usually stronger and about 1 hour longer in duration than the out-going ebb stream.

Sometimes the in-going stream at the bar of Severnaya Dvina may be hardly observed, being reduced to a few minutes of slack water. It may run steadily for some time then gradually attains its usual strength and goes on to set up to the time of high water.

The tidal streams in the Severnaya Dvina are considerably influenced by both strength and direction of the wind.

Moderate Northerly and Westerly winds increase the height of the tide and hold the fall of the water.

Only the in-going flood streams have been observed at the Severnaya Dvina estuary at springs. The extreme tidal range of the water level observed there is about 4 m.
AUTHORITY: Harbour Master.

AGENT: Shipping Agency "Inflot", Archangel. Tel. 35874, 38573, 34040.

BATUMI: 41.39 N. 41.38 E. (See Plan Book)

DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Compulsory. Batumi situated in South of Black Sea Caucasian coast, at head of Batumi Bay. Navigation is year round. Navigational range marks to note when approaching port are: Batumi beacon, Burun-Tabia light, Batumi light buoy with siren and Batumi leading light marks. When proceeding Batumi, Master should give 96 hours notice prior arrival, advising Port Controller and "Inflot" Agency: time of arrival, description and quantity of cargo brought in, location, ship's draft and length, as well as declare services required. 4 hours prior to approaching port, Master shall advise more precise time of arrival. Inflot will arrange Pilot.

Pilot boards vessel either at the Receiving Buoy or in the outer port roads. Watch is kept by a pilot boat day and night.
ANCHORAGES: The port harbour is protected by a mole from the seaward and provides a safe anchorage except at times when South-Westerly, Westerly and North-Westerly winds blow and the "Tyagun", strong variable current with surge is formed.

At the time of "Tyagun" vessels are recommended to stop cargo handling operations and go out to sea.

During South-Westerly winds which are considered particularly dangerous and usually accompanied by heavy surge, Masters should observe special precautions and take all necessary measures to avoid impact with the mole.

The outer roads of the port with depths of about 9–20 m. and 0.5 cable in width, extend for a distance of about 1.5 miles to the East-North-Eastward from the Batumi light buoy along the edge of the shoal. The bottom is mud and sand.

The inner roads are situated between the Western coast of the Batumi Bay and the shoal extending from the Southern and South-Easterly coasts of the Bay. Depths in the inner roads are between 25 m. – 11.5 m.

The anchorage in the inner roads is exposed to Northerly winds. However it is not safe during strong winds blowing from other directions.

Every vessel when in the inner roads must take necessary measures so as not to drag her anchors.

The recommended anchorage is in the outer roads at a distance of 7.8 cables to N.N.E. from the Eastern side of Batumi Point, depths 9–14.4 m.

In the outer roads vessels may anchor only after having obtained the Harbour Master's permission and according to Pilot's recommendation.

In the inner roads vessels may obtain anchorage only Eastward of the entrance leading line. It is strictly prohibited to lie at anchor both on the leading line and to the West of it.
BALLAST: In case of stormy weather, in Autumn and Winter particularly, vessels without cargo must enter the port with ballast water on board, having ensured fore draft not less then 1.5–1.8 m.

Ballast water should not be contaminated with oil residues.
RESTRICTIONS: Vessels may enter and leave the port at any time of day and night. All vessels when entering or leaving the port must have keel clearance of not less than 0.3 m. (1 ft.).

In the event of stormy weather vessels approaching the port at time of S.W. and N.W. winds particularly, should obtain Harbour Master's entry permit. Vessels coming to the port without cargo are obliged to enter the port with ballast water taken in such a way that bow draft should not be less than 1.5 – 1.8 m. Ballast water must be clean. If due to the "Tyagun" vessels are not allowed to enter the harbour, they should anchor either in the outer or inner roads.

All necessary information as regard to changes of wind, possibility or turn of entry to the port for vessels at anchor in the outer roads, is given by the Harbour Master over the VHF radio-telephone or by the signal station by flags of the International Code of Signals, in Morse Code or by semaphore signals.
MAX. SIZE: For oil carriers: Berth No. 1, 175 m. LOA 31.6 ft. draft; Berth No. 2, 165 m. LOA 30.5 ft. draft; Berth No. 3 165 m. LOA 30.5 ft. draft; Berth No. 4, 150 m. LOA 29.5 ft. draft: Berth No. 5, 212 m. LOA 29.5 ft. draft. For Cargo ships: Two berths where vessels may discharge. Maximum draft 32.5 ft.
RADIO: All vessels when approaching the port of Batumi should establish radio contact via Batumi Radio port radio station operating 24 hours per day on the following frequencies:

	Frequencies (kHz.)		*Type of*	
Call Sign	*Working*	*Calling*	*Trans- mission*	*Time*
UHK	8695	8366	A1	H24
"Batumi-Radio"	2182	2182	A3	H24
"Udarnik–2" (Port Control)	156.8*	156.8	F3	H24
"Usluga" via CPR**	156.8*	156.8*	F3	H24

*Frequencies are given in mHz. **CPR – Central Port Radio Station.
Shore signal station is situated 1.6 cables W.N.W. from Batumi Point. International Code signals, and sometimes storm signals, are hoisted at the mast of the signal station.
BERTHING: The berths of the port with depths alongside of up to 10.5 m. are equipped to handle crude oil and oil products, bulks (coal, grain, ores) and general (machinery and mechanical equipment) as well as passenger shipping. There are covered warehouses and concrete floor sheds in the port.

A vessel should lie at a berth with her bow directed to the port entrance and with her anchor dropped from the proper side. Berthing in the harbour may only be effected with tugs' assistance.

A vessel may be berthed at the outer side of the Oil Jetty after having obtained the Harbour Master's permission.

Vessels entering or leaving the harbour are not allowed to pass vessels loading at the outer (Northern) side of the Oil Jetty at a distance of less than 80 m.

The berths of the port are equipped with electric cranes of up to 10 tons capacity. There is also a floating crane of 100 tons capacity.

Other cargo handling equipment, covered warehouses and concrete floor sheds are available.

TANKERS: Mooring buoys are placed to the North of the oil jetty and a pipe-line for loading tankers of up to 40,000 d.w.t. is led up to them. Mooring of such tankers is effected with tug assistance under control of the Senior Port Pilot. Vessels moored to these buoys should drop 2 anchors from the bow with 7–8 shackles of anchor chain and strong mooring lines should be lead to mooring buoys from the stern and made fast.

When lying at mooring buoys a vessel should keep a 24 hour VHF watch on receiving Channel and observe corresponding rules of the Port.

TIDE: The range of water level in the port area is small and is due to the effects of strong winds. The maximum range observed 0.6 m.

MEDICAL: Medical attendance in local seamen's hospital. Masters to advise by radio prior arrival of medical attendance required on board.

DENSITY: 1018.5.

FRESH WATER: Supplied ex-shore to ship directly. Maximum pressure 20 t.p.h. Also supplied ex water barge. Maximum quantity delivered by barge is 650 tons. Pressure about 60–80 t.p.h.

FUEL: Bunkers may be taken at the oil berths and can also be delivered by bunkering vessel to a ship handling non-dangerous cargo. In the latter case fire precautions must be strictly observed by the vessel taking bunkers.

FIRE PRECAUTIONS: No special precautions. There is one fire-fighting boat.

OPENING/CLOSING HATCHES: According to Charter Party and contract.

CUSTOMS ALLOWANCE: Tobacco. No restrictions. Wine and/or spirits. No restrictions.

IDENTIFICATION CARDS: Not required.

CONSULS: Turkey.

REPAIRS: Only minor repairs are possible.

AIRPORT: Batumi connected by airlines with different towns in Soviet Union. Airport situated about 5 km. from port.

TIME: GMT plus 4 hours (All the year round).

HOLIDAYS: New Year's Day; 8th March (Women's Day); 1st May; 7th–8th November; 5th December; but port works on those days.

SHORE LEAVE: Crew members allowed ashore till midnight.

SHIPMASTER'S REPORT: There is now a sea-loading berth at this port immediately outside the harbour, the vessel lying to 2 anchors and stern on close to the breakwater and close Eastward of the harbour entrance.

The stern is secured to 2 buoys, using ship's ropes, 5 to a port quarter buoy and 3 to a starboard quarter buoy.

The bow is in about 60 ft. of water and the stern in about 42 ft., and vessels of up to about 40,000 tons d.w.t. are loaded there, this vessel loading safely to a draft of 37 ft. 6 in.

Two 10-in. pipe-lines are connected on the starboard side, 1 for discharging ballast ashore and 1 for loading at a rate of about 1,600 t.p.h. The charge for discharging ballast ashore is 7 kopeks per ton and it is not permitted to discharge any ballast into the harbour.

1 copy of a money list was required.

AUTHORITY: The Port of Batumi Authority.

AGENT: The port of Batumi Main Maritime Agency "Inflot", postal address: 5 Gogebashvili Street, Port of Batumi, U.S.S.R. Cables: Inflot Batumi. Tel. 9–24–15.

BELGOROD-DNESTROVSKY: 46.12 N. 30.21 E.

GENERAL: The commercial sea port of Belgorod-Dnestrovsky is situated on the North-Western part of the Black Sea coast, on the right side of the Dnestrovsky Estuary (the Southern Basin), at a distance of 80-90 km. to the S.W. of the port of Odessa. Navigational season lasts all the year round, with powerful (600-1,200 h.p.) tug assistance during severe Winters. The Tsaregradsky Lighthouse and the Tsaregradsky Leading Line should be used as guiding points when approaching the port.

Vessels should approach the port along the channel of the Dnestrovsky Estuary which is provided with a good navigational marks system.

PILOTAGE: A Pilot usually boards vessel at Reception Buoy No. 1 (Lat. 46° 04′ N. Long. 30° 30′ E.) situated 1.2 miles to the S.E. of the Tsaregradsky Lighthouse.

ANCHORAGE: The port outer roads with depths of up to 14 m. are situated 0.5 mile to the S.E. of the Reception buoy. The holding ground is good. There are 2 inner roadsteads. One situated on the beam of the Bugas port area and well protected from wind from all directions but Southern is used for anchorage while awaiting lifting of the bridge. The second inner roadstead is situated within the port area of the protecting mole.

RESTRICTIONS: Vessels are allowed to navigate along the channel during daytime only. The port can be entered by vessels with draft of up to 5.2 m. and the maximum height (from the water level) of 26.5 m. Vessels having draft more than 4.5 m. should follow the channel at a speed not more than 5 knots.

During bad visibility vessels which are not equipped with radar are not allowed to navigate along the channel. Vessels are piloted under the bridge 2-3 times daily (during daytime only).

RADIO: Communication is effected through the port radio station "Belgorod-Dnestrovsky-Radio"

Call sign	Frequencies (kHz) working	calling	Kind of transmission	Time of work
"Belgorod-Dnestrovsky-Radio"	156.8	156.8	F3	H24

Notice of Arrival: When approaching the port of Belgorod-Dnestrovsky Masters of vessels should not later than 48 hours prior to arrival advise the Harbour Master of ETA, draft, maximum height of a vessel in ballast (from the water level up to the top of a mast), kind and quantity of cargo, services required to the vessel. 24 and 4 hours prior to arrival the Master should advise more precise ETA.

TUGS: If necessary, are ordered by the Master after having consulted the Pilot.

BERTHING: The berths of the port have depths alongside of up to 6.5 m. and are equipped to handle timber, containers, generals (rubber, non-ferrous metals, pipes, tinned products, fresh vegetables, fruit and citrus fruit) and other cargoes. There are covered warehouses and open concrete floor sheds in the port.

A port area Bugas is situated 14 km. to the South of the port, at the mouth of the Estuary.

Vessels fully laden with ballast water are as a rule allowed to moor at berths if winds do not exceed force 6. A vessel of a smaller size may be turned broadside to a loaded vessel of a bigger size but not vice versa. It is strictly prohibited to turn a third vessel broadside on to another two vessels having been turned broadside earlier.

Opening and closing of mechanised hatches is usually performed by the vessel's crew. Opening and closing of ordinary hatches is carried out by the crew on arrival and departure of a vessel and by the dockers during cargo handling operations. On the berths and on the port territory there are cranes of 10 tons lifting capacity.

FRESH WATER: Available at berths.

FUEL: Diesel oil available.

REPAIRS: Only minor repairs are possible.

CONSULS: None.

TIME: GMT plus 3 hours all year round.

AUTHORITY: The Port of Belgorod-Dnestrovsky Authority.

AGENT: The port of Belgorod-Dnestrovsky Maritime Agency "Inflot".

Postal address: 81, Shabskaya Street, 272300 – Belgorod-Dnestrovsky, the city of Odessa, region, U.S.S.R.

Cables: Inflot Belgorod-Dnestrovsky. Telephone: 2-21-01; 2-56-73. Telex: 425.

BERDYANSK: 46.45 N. 36.48 E. (See Plan Book)

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The port of Berdyansk is situated in the N.E. part of Berdyansk Bay, on the Northern coast of the Azov Sea.

Inner roads and port facilities are protected from Southern and S.E. winds by a mole and a breakwater.

Navigation in the port is all year round, but in Winter ice-breaker assistance is necessary for about two months.

Vessels should proceed to the harbour through the approach channel, with least depth of 7.0 m.

PILOTAGE: Pilot meets vessel at Reception buoy No. 14.

ANCHORAGE: Vessels may obtain good anchorage with depths up to 7.0 m. in the port of Berdyansk outer roads situated on both sides of the approach channel leading into the harbour.

The outer roads are well protected from Northerly winds, but during Southern and S.W. winds the anchorage is troublesome.

At time of strong S.W. swell ships in the outer roads are usually effected by heavy pitching and rolling, and plenty of cable should be paid out on both anchors. Holding ground in outer roads is shell and mud.

RESTRICTIONS: Vessels can enter and leave at any time of day and night.

At least 0.3 m. (1 ft.) keel clearance at low tide is required to enter or leave the port. The max. permitted draft for entry to the port is 6.7 m., and length 160 m.

Speed of vessels proceeding through the approach channel should not exceed 6 knots. Vessels are not allowed to enter the approach channel or navigate in the harbour in restricted visibility and fog.

RADIO: *Notice of arrival:* 48 hours prior to arrival at the port Masters should advise the port administration via the local Inflot Agency time of arrival and the maximum draft of a vessel. Not later than 4 hours prior to approaching reception buoy No. 14, placed at the beginning of the approaching channel, Masters should advise more precise ETA to the Harbour Master.

Vessels should establish radio contact through "Berdyansk Radio" port radio station operating 24 hours daily on the following frequencies:

Call Sign	Working	Calling	Type of transmission	Time
UBH	500/418 kc/s.	500 kc/s.	A1	H24
UBN	6345 kc/s	4202 kc/s	A1	H24
Berdyansk-Radio	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

BERTHING: Berths of the port with depths alongside of up to 8.25 m. are equipped to handle general and bulk cargoes (ores, mineral-building materials), metals, cotton, foodstuff, vegetables, etc., and passenger traffic. There are covered warehouses and concrete floor sheds in the port.

Quay are equipped with electric cranes of up to 32 tons capacity. There is also a floating crane and other cargo-handling equipment and intraport transport facilities.

FUEL: Available in limited quantities.
FRESH WATER: Supplied at berths.
REPAIRS: Only minor hull and machine repairs.
TIME: GMT plus 3 hours (All year round).
AUTHORITY: The Port of Berdyansk Authority.
AGENT: Maritime Agency "Inflot" at the port of Berdyansk. Postal address: 9 Uritsky Street, 332400-Berdyansk. U.S.S.R. Cables Inflot Berdyansk. Tel. 3-34-42, 3-92-639.

GRIGOREVSKY: 46.35 N. 31.10 E. (approx.).

GENERAL: New port under construction in Grigorjyevskiy Liman, about 16 miles N.E. of Odessa. Port expected to commence operations 1976, and to have a depth of about 14 m. Port is to be used for shipment of chemical products.

IGARKA: 67.24 N. 86.30 E. (See Plan Book)

GENERAL: A sea and river port, Igarka is situated about 344 miles Southward of the mouth of the Enisei river which flows into the Enisei Gulf of the Kara Sea.

The port is open for navigation about (130-135 days) from July till mid-November. Ice first begins to form in the second half of October.

No tidal range is observed in the port waters.

The port of Igarka specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Pilotage is carried out round the clock. Master of a vessel approaching the port of Igarka from seaward has to order Pilots via the Chief of the Igarka Hydrobase and the Master of the Pilot boat 48 hours prior to arrival to the Oshmarino Point where the river Pilots usually meet vessels. Confirm ETA 24 and 6 hours before arrival.

In case of bad weather, Pilot boards a vessel at a place as directed by the Pilot boat. Since the distance of pilotage from the Pilot station up to the port of Igarka is about 360 miles, 2 Pilots are usually required for the service.

The Master of a vessel should use VHF radio-telephone (calling frequency 156.8 mHz) or radio-telephone (calling frequency 500 kHz) for establishing the radio contact with a pilot boat in order to check the time and the place of boarding/unboarding of a Pilot.

ANCHORAGE: Information on best location of anchorage, if required, will be given by the pilot boat.

The anchorage in the outer roads is bounded on the East by the leading lines of Igarka and Northern Igarka leading marks, on the West by the leftbank of the Enisei river, on the North by the beam line of the buoy of Igarka Oseryodok, on the South by the leading line of Port of Igarka entrance leading marks.

In the event of bad weather or main engine trouble a vessel should lie at anchor in a place as directed by a river Pilot, who shall advise a Master all necessary data about the anchorage.

RESTRICTIONS: Vessels can enter or leave the port 24 hours per day.

To ensure safe passage across the Lipatnikovsky and Turushinsky bars of the Enisei river, vessels proceeding to the port of Igarka must have draft not exceeding 7.3 m. (see "Max. Size.)

MAX. SIZE: Max. LOA 160 m. Also see "Restrictions".
HEALTH: Not later than 4 hours before arrival, Master to radio "Inflot" advising health condition on board. International code quarantine signals to be shown on arrival at port limits. No one, except Pilot and Port Authorities, may board or leave the ship until free pratique is given after port health inspection.
RADIO: Radio communication is effected through the "Igarka-Radio" port radio station operating on the frequencies given below.

	Frequencies (kHz)		*Type of*		
Call sign	*working*	*calling*	*trans-mission*	*Time of work*	*Remarks*
UFR	500	500	A1	H24	Operates during navigation only
"Sever" (Port)	156.65*	156.8*	F3	H24	

*Frequencies are given in mHz.

Notice of arrival: As per conditions of the "Soviet Wood" Charter Party.

TUGS: Normally join vessel with Harbour Pilot on approaching port. Vessels at anchor order tugs through "Inflot". Ship's tow lines used.
BERTHING: Tug assistance for berthing is compulsory. A berthing Pilot boards a vessel from a tug either in the outer roads or in the port. Depths alongside berths are up to 7.5 m.

After having approached a berth at a safe distance, a vessel, in most cases, should cast 2 anchors and then with tug assistance, turn stern to the Island and moor with 3 mooring ropes led from the stern. When mooring, a vessel should have ready on board 4 mooring ropes each not less than 100 m. in length (3 ropes to be led ashore and 1 prepared for a tug.).

Vessels moored in the inner roads must have strong ropes which should be made fast over the pile moorings only.

If 3 or 4 vessels are moored at the quay, the outside ones should have a red light exhibited in the middle of each mooring rope led ashore.

Notice of readiness and other conditions of loading – as per the "Soviet Wood" Charter Party. Opening and closing of hatches by ship's crew.

When a vessel is moored in the inner roads, stern to the Island, loading is by floating cranes; when at berth – ship's derricks are used.

Loading is done by ship's wire strops, with a test label attached to every strop.

MEDICAL: Medical assistance is free, hospital facilities available – all arrangements made by "Inflot".
DENSITY: Fresh water.
FRESH WATER: May be taken from the river in places indicated by the Pilot, but not in the port area.
FUEL: Not always available.
GANGWAY/DECK WATCHMEN: Ship's crew to provide watchmen services.
OPENING/CLOSING HATCHES: By ship's crew.
IDENTIFICATION CARDS: Required for crewmen going ashore.
CUSTOMS ALLOWANCE: Only reasonable quantities for personal consumption may be taken ashore.
REPAIRS: Only minor repairs.
REPATRIATION: No facilities.
AIRPORT: Situated 1.5 km. away, 1 daily flight to Krasnogarsk.
TIME: GMT plus 7 hours (all the year round).
HOLIDAYS: No official holidays are observed during the navigation season.
POLICE/AMBULANCE/FIRE: Police, tel. 0-02; Ambulance, tel. 0-04; Fire, tel. 0-01.
TELEPHONES: Telephones cannot be connected on board vessel.
SHORE LEAVE: Permitted during 0600–2400 hrs. subject to police control.
GENERAL: It is forbidden for crew to swim in the harbour.
AUTHORITY: Port of Igarka Authority.
AGENT: "Transflot". Cables: "Transflot" Igarka.

ILICHEVSK: 46.20 N. 30.39 E. (See Plan Book)

GENERAL: The port of Ilichevsk is situated on the N.W. coast of Black Sea, on the right bank of the Sukhoi Liman, about 15 miles S.W. from Odessa City.

The Sukhoi Liman is divided by dams into 3 parts called Basin No. 1, Basin No. 2 and Basin No. 3.

A part of Basin No. 1 bounded by the leading line of the Port of Ilichevsk leading lights, thence by the S.W. coast of the Liman, thence by the Southern Sand Headland, is called the Inner Roads of the port.

The berths for large sea-going vessels are along the Western side of the Southern Sand Headland, thence along Southern and S.W. sides of Basin No. 1.

The berths of the Western side of Basin No. 1 are used by fishing trawlers.

Navigation in the port is year round. Ice usually begins to form in the second half of December and finally disappears in February. Ice-breaker assistance is required in severe Winters for about a 30 day period.

DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: A Pilot usually boards a vessel in the outer roads at the approach light mid-channel buoy. (Lat. 46° 18′ 24″ N., Long. 30° 43′ 30″ E.). In the event of bad weather the place of embarkation or disembarkation of a Pilot can be changed with a Master's approval.
APPROACHES: The approach channel leads from seaward into Basin No. 1. Depths in mid-channel are 13.5 m. Strong Easterly and Southerly winds may cause heavy surge in the channel influencing a vessel's manoeuvrability.
ANCHORAGES: A good anchorage can be obtained in the outer roads situated at a distance of 2 miles off the coast between the parallels of 46° 17′ N. and 46° 21′ N. The outer roads are open to all winds blowing from N.E. via S. up to S.W.

The anchorage (on charts marked as No. 24) is situated about 1.2 mile to the S.E. of the port entrance.

The holding ground is grey mud and clay. Depths in the roads are 19.2 m.–25.5 m.

RESTRICTIONS: Entry to the port can be effected day and night.

Vessel's speed should not exceed 5 knots when navigating along the channel.

MAX. SIZE: The maximum permitted draft is 11 m. length 260 m.

Vessels drawing over 11 m. must obtain the Harbour Master's permit for entry to the port.

HEALTH: Foreign vessels granted free pratique when berthed alongside and all arrival formalities accomplished by the boarding officials, irrespective whether day or night. If berthing delayed, under certain circumstances vessel may be granted free pratique at roads where anchored. Event suspected disease Master shall inform Agent by radio. When arriving from another Soviet Black Sea port, free pratique automatic.
RADIO: Channel 16 (156.80 mc/s) for radio-telephone used for calling only, with subsequent switch to any other Channel. All information adressed to ship's Agent, Cable address "Inflot Ilichevsk", Telex No. 232448. Port Radio UEH.2.

Radio contact can be established through the port radio station "Ilichevsk Radio" operating 24 hours daily on the following frequencies:

Call sign	Frequencies (kHz) Working	Frequencies (kHz) Calling	Type of trans-mission	Time of Work
"Ilichevsk Radio"	2535	2535	A3	H24
"Ilichevsk Radio-10" (CPR**)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz

**CPR – Central Port Radio Station.

The port radar station gives all possible information to all vessels navigating in restricted visibility and in the absence of floating marks, from the point of a Pilot's embarkation up to the port.

Radar navigation is controlled by a Pilot.

A signal post for regulating the movement of vessels is situated at the Northern side of the entrance to the port.

TUGS: Normally join vessel when approaching mooring berth. Ship's lines used. Number of tugs required for berthing shall be ordered by the Pilot with the Master's consent.

BERTHING: Quays with depths alongside of up to 11.5 m. are equipped to handle oil, general, bulk and other cargoes. There are mechanised warehouses and open concrete floor sheds.

Electric cranes of up to 41 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 300 tons, other cargo-handling equipment and intra-port transport means.

Opening and closing of mechanised hatches is always done by the ship's crew.

TIDE: The range of the water level caused by strong winds may reach 1 m. The rise of the water level is due to Northerly winds and the fall of the water level to Southerly winds.

The changes of the water level caused by variation in atmospheric pressure ("Seish" phenomena) are observed periodically. This phenomena can last from a few minutes up to several days and the range of the water level may reach 0.6 m.

STEVEDORES: No particular ETA advices required.

RADAR: Port Radar Station gives all possible technical information to any vessel navigating within Station's broadcast zone, if requested. Navigation in channel controlled by Port Radar Station. Communication between Station and vessels established by radio-telephone on international frequencies.

MEDICAL: Medical assistance rendered immediately when requested. Hospital facilities available. Particular inoculations required prescribed by International Sanitary Regulations.

DENSITY: Average density 1.010.

FRESH WATER: Available at quays and by barge.

FUEL: Bunkers available.

DEVELOPMENTS: At present port only partially constructed. Work of further development being carried out.

GANGWAY/DECK WATCHMEN: Watch carried out by crew.

OPENING/CLOSING HATCHES: Mechanical hatches by crew.

CUSTOMS ALLOWANCE: No restrictions. Free use on board.

CARGO GEAR: No additional requirements. Cargo work usually carried out by means of shore cranes.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Good facilities. All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

DRY DOCKS: Docking arrangements settled with Black Sea Steamship Co. of Odessa, Lastochkina 1 Street. A floating dock, 250 m. length, 18 m. depth. There is a new floating dock with a lifting capacity of 15,000 tons.

AIRPORT: The distance from Odessa Airport about 30 km.

TIME: GMT plus 3 hours. (All year round).

HOLIDAYS: Official Holidays are Sundays and following Calendar dates: January 1st, March 8th, May 1st, 2nd, 9th, November 7th, 8th, December 5th.

POLICE/AMBULANCE/FIRE: All mentioned services easily obtained through Agent.

TELEPHONES: Can be placed on board.

GENERAL: Shipowners recommended deposit funds for disbursements prior to arrival. All bank operations carried out by Vneshtorgbank of Moscow.

SERVICES: Shipchandler's supplies, technical equipment supplies, laundry, car hire.

SHORE LEAVE: Permitted.

DELAYS: Vessels berthed at specialised berths depending upon cargo. Delays if berths occupied. Normally no delays in bunkering.

AUTHORITY: Port of Ilichevsk Authority.

AGENT: The Port of Ilichevsk, Maritime Agency "Inflot". Postal address: The Port of Ilichevsk, Odessa Region, U.S.S.R. Cables "Inflot Ilichevsk". Tel. 628–658, 628–661, 628–556. Telex 232448, 232245.

IZMAIL: 45.20 N. 28.51 E. (See Plan Book)

GENERAL: A sea and river port, Izmail is situated on the left bank of the Kiliiskoe Ghirlo (Kilia Mouth) of the Danube river, between the 92nd and 94th km.

Navigation in the port lasts about 317 days per year. The Danube river usually becomes frozen over at the end of December or early January. In the more severe Winters navigation can be effected with ice-breaker assistance.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Pilot should be ordered through "Inflot" before leaving the port of Sulina giving vessels ETA at Izmail. Alterations in ETA whilst vessel is navigating the Sulinsky channel should be advised to "Inflot". Also refer to Sulina, Romania.

Navigation in the Kilia Mouth up to the port of Izmail is allowed with a Port of Izmail Pilot on board, who should be ordered through Inflot Agency after leaving the port of Sulina. ETA at the Chatal of Izmail should be stated in the message. Masters should keep the Port of Izmail Harbour Master informed of all delays in the Sulina Channel and, if necessary, advise alterations in ETA at the Chatal of Izmail.

ANCHORAGE: Vessels can obtain anchorage in the roads situated in the area between 91.4 km. and 92 km. Depths in the roads from 5 m.-15 m., the holding ground is soft mud.

RESTRICTIONS: Izmail port is situated on the left bank of the Kilia channel, channel depths are 10-20 m. Reni port is situated on the left bank of the Danube, channel depths are 10-20 m. Ice-breakers assistance is available during periods when the Danube is frozen. Draft and length of the vessel entering the port of Izmail should be the same as of vessels navigating through the Sulina Channel.

HEALTH: International code quarantine signals are to be shown on arrival and free pratique is given by the quarantine doctor who will board the vessel to examine Master's Health Declaration.

RADIO: Vessels can establish radio contact via the port radio station Izmail Radio operating 24 hours per day on the following frequencies:

Call sign	Frequencies (kHz) Working	Frequencies (kHz) Calling	Type of trans-mission	Time of work
UJO-3	472	468	A1	HX
UJO-5	12966	12552		
	8586	8361		
	4227	4886		
"Izmail"-Radio" (CPR)**	156.6*	156.8*	F3	HX

*Frequencies are given in mHz. **CPR–Central Port Radio Station.

TUGS: Tugs shall be ordered by the Master as directed by the Pilot.

BERTHING: Vessels drawing up to 8.25 m. can enter the port and moor at berths with same depths alongside.

Quays are equipped to handle general and bulk cargoes, metals, chemicals, timber and passenger shipping.

There are enclosed warehouses, open concrete floor sheds and a grain elevator.

Simultaneous berthing and shifting berth of two or more vessels at neighbouring berths is not allowed. On the quays there are electric cranes of up to 15 tons capacity. There are floating grain elevators, floating cranes with lifting capacity of 15 tons and other cargo handling equipment and machinery.

FRESH WATER: Available in unlimited quantity.

FUEL: Bunkers available.

GANGWAY/DECK WATCHMEN: Gangway watchmen compulsory, carried out by ship's crew.

OPENING/CLOSING HATCHES: According to the customs of the port opening and closing of hatches is usually by ship's crew but it can also be done by stevedores for vessel's account.

CUSTOMS ALLOWANCE: No restrictions on crew consumption tobacco and alcohol on board. It is prohibited to take these items ashore.

IDENTIFICATION CARDS: Required for crewmen going ashore.

REPAIRS: Hull and machine repairs can be effected.

REPATRIATION: Can be arranged.

AIRPORT: Regular connections with internal services.

TIME: GMT plus 3 hours all the year round.

TIDE: Changes of water level in the river are due to effects of the wind and seasonal increase and decrease of the amount of water brought down from the shore. In Winter: rise of water level is due to the ice piling up. Max. range of the water level is about 4.0 – 6.0 m.

Max. rise of water level is in April, May and June, usually caused by Easterly winds. The least water level is observed in August September and October, due to Westerly winds.

HOLIDAYS: New Year's Day (1st January), National Women's Day (8th March); Worker's Day (1st and 2nd May); Victory Day (9th May); Anniversary of October Revolution (7th and 8th November); Soviet Constitution Day (5th December).

POLICE/FIRE/AMBULANCE: Izmail – Police, tel. 316; Fire, tel. 524; Ambulance, tel. 600. Reni – Police, tel. 205; Fire, tel. 210; Ambulance, tel. 203.

SHORE LEAVE: Allowed up to midnight.

AUTHORITY: The Port of Izmail Authority.

AGENT: The Port of Izmail Maritime Agency "Inflot". Postal address: 14 Port Street, Izmail, U.S.S.R. Cables "Inflot Izmail". Tel. 9-01-81, 9-05-29.

KHERSON: 46.37 N. 32.37 E. (See Plan Book)

GENERAL: The sea and river commercial port of Kherson is situated on the right bank of the Dnieper River and on the left bank of the Koshevaya River.

The port is open for navigation all the year round but in severe Winters ice-breaker assistance is required.

Ice at the estuary of the Dnieper finally disappears in the first half of March.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The port is accessible for sea-going vessels. The approaching channel is very well marked by navigation marks; therefore, there are no difficulties in navigating a vessel along it when entering or leaving the port.

PILOTAGE: Compulsory. Navigational range marks, leading marks of Stanislov, Adjigolsky beacons, Verbchansky and Maliy Kasperovsky leading light buoys, and spar buoys. Master advises Port Controller and Inflot Agency ETA minimum of 96 hours prior notice.

Masters of vessels proceeding to the port of Kherson must advise ETA to the Harbour Master and Inflot Agency at the Port of Odessa 24 hours prior to arrival at the Vorontsov lighthouse. More precise time should be given 6 hours before approaching the lighthouse.

After having embarked a Pilot at the Vorontsov lighthouse, vessels proceed to the port of Kherson. Upon passing the Port of Odessa, Master should advise ETA to the local Inflot Agency at the port of Kherson.

ANCHORAGES: A part of the Dneiper river from the Northern border of the town of Kherson, nearly up to the Maly Potemkin Island, is considered as the Port of Kherson Roads.

The anchorage for foreign flag dry cargo vessels is situated in the area restricted by 2 imaginary lines of the leading marks located on the left bank of the Dnieper River, upwards from the mouth of the Konka River and lower of basin (creek) No. 2.

The recommended anchorage for foreign flag tankers is situated in the area stretching down the river from the oil piers towards leading line No. 7, South-westward of the upper leading marks clearing the place where a submarine cable is laid.

RESTRICTIONS: The permitted draft for passing through the channel is 7.8 m. but it may vary depending on weather conditions.

In the Summer the channel is open for navigation 24 hours a day.

Speed of vessels having draft over 5 m. should not exceed 10 knots whilst navigating through the channel.

There are no length restrictions for vessels entering the port.

Navigation through the channel in restricted visibility is strictly prohibited.

HEALTH: No automatic pratique.

RADIO: Ship-shore radio link can be established through the port radio station operating 24 hours on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
ICI	6430	6314.2	A1	HX
UHZ	500	500	A1	H24
"Kherson Radio"	2182	2182	A3	H24
"Mesyats" (CPR)**	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

**CPR – Central Port Radio Station.

A signal mast is located on the roof of the sea passenger terminal.

BERTHING: 9 berths, depths up to 8.4 m.

Mooring is effected with port Pilot assistance. Number of tugs required for mooring is determined by Pilot with Master's consent.

Cranes of up to 10 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment, intra-port transport included.

Berths of the port, with depths of up to 8.25 m. alongside are equipped to handle general and bulk cargoes (ore, chemicals, building materials), metals, grain, timber, cotton, cement, food products, etc., as well as passenger traffic. There are enclosed warehouses, a grain elevator and open concrete floor sheds.

TIDE: Changes in the water level observed in the port are due to the effect of the wind and variation in atmospheric pressure. The maximum range of the water level caused by winds may reach 2 m.

The changes of the water level due to variation in atmospheric pressure ("Seish" effect) are observed at times. They may last from a few minutes up to several days and may reach 0.58 m.

MEDICAL: Hospital facilities available.

FRESH WATER: Available alongside and by barge.

FUEL: Available.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done by the ship's crew. It may also be done by port workers for vessel's account.

REPAIRS: Only minor repairs can be carried out. There are no dry docks in the port.

TIME: GMT plus 3 hours (all year round).

AUTHORITY: Port of Kherson Authority.

AGENT: The Port of Kherson Maritime Agency "Inflot". Postal address: The Sea Passenger Terminal, Port of Kherson, U.S.S.R. Cables "Inflot Kherson". Telex 273132. Tel: 29-13-51, 29-14-41.

KHOLMSK: 47.03 N. 142.03 E. (See Plan Book)

GENERAL: The seaport of Kholmsk is situated on the Western coast of Sakhalin Island, in the Tartarsky Strait of the Japan Sea and at the head of Nevelskoy Bay.

The port is open for navigation all the year round but starting from January up to the middle of March drift ice and sludge can appear in the harbour and on the coast line during Westerly winds making the navigation more complicated.

The outer roads of the port are bounded by an arc of 7 cables length radius, the centre of which is marked with a light located on the Southern mole of the Commercial Harbour.

The port is divided into 3 parts: The Kovsh (a basin), The Commercial and Fishing Harbours. The Commercial Harbour is situated in the centre of the port area. It is protected by the Southern and Northern moles. The entrance to the Harbour 150 m. wide, is situated between these 2 moles. Due to shoal water along the coast, there is not much space for vessels manoeuvrability in the Commercial Harbour. Cargo berths are situated in a basin (The Kovsh) of the Southern part of the Harbour.

The Port of Kholmsk, due to its position, size and weather conditions in the area, cannot be used as a sheltering port.

During Westerly and N.W'ly gales, particularly in the Autumn and Winter (October — March) the heavy sea swell penetrates into the Kovsh (mainly from the N.W.) causing the variable current with surge (the "Tvagun"). Due to this phenomena the stay in port is not safe therefore Masters of all vessels are recommended to leave the port for sea after having received a storm warning of a gale coming from Westerly or N.W. directions.

All vessels proceeding to the port of Kholmsk in the Autumn and/or Winter must have available on board a sufficiency of fuel, fresh water, provisions and strong manila ropes, be seaworthy in all respects, thus ensuring vessel's safety during a possible stay in the open sea roadstead.

In case there are no vacant berths in the port, vessels are not allowed to enter the harbour without prior permission.

It is also prohibited to enter the harbour after a storm warning has been received by vessel despite the fact that there are vacant berths in the port.

PILOTAGE: Pilot meets a vessel in the outer roads. In the event of bad weather, when Pilot is unable to come on board, vessel should follow in the wake of pilot boat.

ANCHORAGES: There are no anchorages protected from the wind in the Nevelskoy Bay.

During off-shore winds vessels may anchor in the outer roads situated opposite the port entrance. The outer roads are open to Westerly winds.

Masters should bear in mind that during the period of navigation fish nets are usually laid in the outer roads. The seaward side of the border of the fish nets, situated about 8 cables length off-shore, is usually marked by wooden buoys with flags.

Anchorage in the outer roads may also be obtained at 4 – 6 cables length off shore. Depths are from 18 m. to 20 m. Holding ground sand and stone.

A vessel should proceed to the anchorage along the leading line of the port of Kholmsk leading lights. At a distance of half a mile off the port entrance, a vessel should steer off the leading line at 2 – 3 cables length and then drop anchor.

The holding ground is better in the Southern part of the outer roads than in the Northern part.

When at anchor, a vessel may not approach the leading line closer than 1.5 cables length.

RESTRICTIONS: Vessels may enter the port at any time of day or night.

MAX. SIZE: The maximum permissible draft for entry to the port is 6 m. length – 100 m. Since depths in the channel may vary at times, the Port Authorities shall undertake to advise the Masters of incoming vessels accordingly.

RADIO: Ship-shore radio link can be established through the port radio-station Kholmsk Radio operating 24 hours a day on the following frequencies:'

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of Work*
UHO	500	500	A1	H24
Kholmsk Radio	4361.6	4063	A3	HX
Kholmsk Radio	–	4066.1	A3	HX
	2182	2182	A3	H24
UQB Port	8675	8370	A1	H24
UQB	3605	4186	A1	H24
Kholmsk Radio "2" (Harbour Master)	156.8*	156.8*	F3	H24
Kholmsk Radio	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

The port signal station is situated at the Southern mole base. There is also a radar station in the port.

BERTHING: Berths with depths up to 8.5 m. alongside, are equipped to handle general and bulk cargoes, metals, timber, food products, etc., as well as passenger traffic.

Number of tugs required for assistance is usually agreed between Pilot and Master.

Cranes of up to 37 tons capacity are operated on the quays. There are also other cargo-handling equipment and intra-port transport facilities. There are enclosed warehouses and open concrete floor sheds.

FUEL: Not available.

FRESH WATER: Available.

REPAIRS: Only minor repairs can be carried out. There are no dry docks in the port.

TIDE: Changes in the water level are of small account. They are mainly due to the irregular diurnal tides. The maximum range of the water level observed is 0.4 m.

TIME: GMT plus 11 hours. (All year round).

AUTHORITY: The Port of Kholmsk Authority.

AGENT: The Port of Kholmsk Main Maritime Agency "Inflot". 6 Morskaya Street, Port of Kholmsk, Sakhalin Island 649620, U.S.S.R. Cables "Inflot Kholmsk". Tel. 22-86; 34-92.

KILIA: 45.26 N. 29.17 E. (See Plan Book)

GENERAL: The port of Kilia is situated on the left bank of the Kilia inlet of the Danube River, 47 km. from the estuary. The depths of the water within the port area vary from 3 m. up to 22 m. The holding ground is clay and mud. The season of navigation in the port area lasts from March till December depending on time when the Danube River is getting frozen over.

Sea-going vessels with the draft up to 7 m. are loaded/discharged with the use of buffer barges.

Berths of the port are equipped to handle general and bulk cargoes, metals and timber. There are open concrete floor sheds and a covered warehouse.

PILOTAGE: Carried out by the Pilot service of the port of Izmail.

ANCHORAGE: Allowed in the 48 km. post area, in 5 m. depths according to the Pilot's instructions.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night. Movement of vessels during fog is not allowed.

RADIO: Communication can be effected via the port radio station the "Kilia-Radio".

Call sign	*Frequencies (mHz) working*	*calling*	*Type of trans-missions*	*Time of work*	*Remarks*
UJM-3	—	—	A1	H8	Radio communication with the shore only
Kilia-Radio – 1	156.8	156.8	F3	H12	

Notice of arrival: Masters of vessels going to the port from the seaward via the Kilia inlet should advise the port of Izmail Harbour Master their ETA 24 hour prior to arrival at the Reception buoy area. More precise time of arrival should be advised at a later time.

TUGS: Approaching and shifting berth is performed without tug assistance.

BERTHING: The berth is equipped with 5 ton caterpillar cranes. There are also floating cranes, other cargo handling equipment and interport transport means.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

TIME: GMT plus 3 hours all year round.

CONSULS: None.

AUTHORITY: The Port of Kilia Authority.

KLAIPEDA: 55.43 N. 21.07 E. (See Plan Book)

GENERAL: A Baltic seaport, Klaipeda is situated in a narrow strait called the Morskoi Canal, which connects the Kursky Gulf with the Baltic Sea.

The port of Klaipeda comprises the Morskoi Canal consisting of 2 harbours: the Zimnyaya and Zavodskaya, the Fishing Port and the Dane river quays situated by the roadway-bridge.

The Southern half of the Kurshsky Gulf and a part of the Dane river some distance up from the estuary become frozen over every Winter for quite a long time. A part of the port situated to the North of the Dane river mouth gets frozen over very seldom but the entrance to the Morskoi Canal may be packed by the drift ice in the course of a few days.

The port is open for navigation all the year round but in the Winter time ice will be managed with ice-strengthened tugs' assistance.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The width of the approaching channel to the port is 100 m. and depth 11.5 m. Depths of the channel at a distance of 400-600 m. from the entrance to the Sea Canal are subject to changes due to lots of sand and mud brought down from the Kursky Gulf by the Spring floods, in particular. The entrance to the Sea Canal is protected by the Northern and Southern moles.

The length of the fairway of the Morskoi Canal from the entrance up to the Secluma-Kyaules-Nugara shoal at the entrance to the Kursky Gulf is 4 miles, width varies from 180 m. to 300 m. and the depths are from 6 m. to 9 m. at the mean water level.

The permissible drafts for vessels navigating along the Morskoi Canal are as follows: Up to 7 m. from the canal entrance up to the Zimnyaya (Winter) harbour, but further up to the Fishing Port situated 1.5 miles to the South of the Dane River estuary – not more than 6.0 m. from the Fishing Port up to the Timber Harbour – not more than 5.0 m.

PILOTAGE: A Pilot boat usually meets a vessel at light buoy No. 7 (Lat. 55° 44′ N., Long. 21° 00′ E.). It carries the Pilot flag by day and lights prescribed for a Pilot boat by night.

Pilot's watch is kept 24 hours a day except in periods of dense fog and strong N.W. winds over Force 7 Beaufort Scale.

On the Harbour Master's decision agreed with the Master of a vessel the pilotage can be performed up to the entrance of the port with the assistance of the coastal radar station.

The Pilot station is situated between Oil Pier No. 1 and berth No. 15.

ANCHORAGE: A good anchorage can be obtained in the outer roads at receiving light buoy No. (55° 44′ N., 21° 00′ E.).

The outer roads are situated at a distance of 2 miles to W.N.W. from the entrance to the Morskoi (Sea) Canal. Depths are from 19 m.-23 m.

The holding ground is sand and clay. Anchorage in the outer roads is not safe during heavy seas caused by Westerly winds.

RESTRICTIONS: Day and night entrance. Max. permissible draft 8 m. Anchorage at inner roads limited to vessels under 100 m. length.

MAX. SIZE: Length and breadth unlimited. Max. permissible draft for all vessels entering the port, 9 m.; and for tankers loading at installations outside main port area, 10 m.

RADIO: Vessels can establish radio contact through the port radio station Klaipeda Radio operating 24 hours per day on the following frequencies:

Call sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time of work*
UNM-2	500	500	A1	H24
	455	454	A1	H24
	4229	4183	A1	HX
	6427	6275.25	A1	HX
	8701	8370	A1	HX
	12703	12552	A1	HX
Klaipeda Radio	2182	2182	A3	H24
Klaipeda Radio (CPR)**	156.8*	156.8*	F3	H24
Dispatcher (Port Control)	156.8*	156.8*	F3	H24
Ocean (Pilot Service)	156.8*	156.8*	F3	H24
Neltegavan (Oil Harbour Port Control)	156.8*	156.8*	SRZ	

*Frequencies are given in mHz

**CPR – Central Port Radio station.

Vessels' traffic in the roads and harbours is controlled by the signals exhibited at the signal stations situated at the entrance to the port.

Storm signals are shown at the same stations and also at the Fishing Port signal station.

TUGS: Ordered by Pilot if necessary. Mooring and unmooring of large sea-going vessels can be effected with tugs' assistance only. Number of tugs to be ordered depends on the weather conditions and can be agreed upon between Master and Pilot. Master should order tugs by radio well in advance.

BERTHING: No specific requirements. Vessels allocated berth according kind of cargo to be loaded/discharged and their turn.

The quays of the port with depths alongside of up to 10.8 m. are equipped to handle general, bulk and liquid cargoes as well as passenger shipping. There are enclosed warehouses and concrete floor sheds.

Cranes of up to 40 tons capacity are operated along quayside and by warehouses. There are also other cargo handling facilities including a coal loading installation and floating cranes up to 50 ton capacity.

STEVEDORES: Report 48 hours, then 12 hours prior arrival giving ETA, and 72 hours then 12 hours prior arrival advising perishable goods, characteristics of vessel, gross capacity, number and measurement of hatches, tween-decks, shelter-decks, description and quantity of cargo, stowage plan, heavy lifts, pieces of above 3 tons each especially indicated. Day and night loading/discharging operation, Sundays and holidays included.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board.

TANKERS: Three berths. Max. draft 9 m. Shore facilities for discharge of ballast.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: Deliveries only by bunker barge.

GANGWAY/DECK WATCHMEN: Compulsory for gangway checking. Guard net and life buoy required.

OPENING/CLOSING HATCHES: Normally by crew.

CONSULS: No Consuls at Klaipeda.

REPATRIATION: No facilities for crew changes. Arranging any necessary repatriation at Captain's request effected by Immigration Authorities.

AIRPORT: At Palanga (25 km. from Klaipeda), served by regular lines; Palanga-Moscow, Palanga-Leningrad, Palanga-Riga. Airport at Klaipeda – some regular flights per day: Klaipeda-Vilnius, Klaipeda-Kaunas, Klaipeda-Kaliningrad.

POLICE/AMBULANCE/FIRE: Tel. Police, 02; Ambulance, 03; Fire, 01.

GENERAL: In case of stormy weather or dense fog vessels are lying at Outer Roads until entering permitted by Harbour Master. In such cases vessels lying alongside berth to be shifted to Inner Road.

CERTIFICATES: All ship certificates required on every call.

CUSTOMS ALLOWANCE: Cigarettes and wine/spirits on board limited by personal requirements; take ashore max. 2 packets cigarettes, no wine/spirits.

REPAIRS: All kinds of repairs for vessels of 10,000 d.w.t. can be effected.

TIME: GMT plus 3 hours. (All year round).

TIDE: There are periodical alterations in the water level, chiefly due to the effects of the wind. In general, strong Westerly, Northerly, N.W. and sometimes S.W. winds raise the water and Southerly and Easterly winds lower it.

The water level usually begins to rise suddenly. It rises very quickly but lasts for a very short period of time. The max. difference between high and low level is usually observed in Autumn and Winter.

Sometimes the changes in the water level can be caused by the considerable variation in atmospheric pressure ("Seish" effect).

TELEPHONES: May be arranged on board.

SHORE LEAVE: Crew members allowed ashore with shore-pass obtainable from Immigration Authorities.

AUTHORITY: The Port of Klaipeda Authority.

AGENTS: "Inflot" Agency. Address: Klaipeda 235801, ul. Platchioy 18. Tel. 6-42-70, 6-32-36. Cables: Inflot, Klaipeda. Telex: 179 and 159.

LENINGRAD: 59.56 N. 30.18 E. (See Plan Book)

GENERAL: A Baltic Sea port, Leningrad is situated on the islands of the Neva Delta, at the head of the Nevskaya Guba (Neva Bay), in the Eastern extremity of the Gulf of Finland. Year-round navigation is possible with ice-breaker assistance from the end of November until middle of April. Ice first begins to form in the middle of November, when usual Winter frosts come, and in January (time varies with the season) all the area becomes completely covered with fast ice.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The Kronstadt Korabelny Farvater (Kronstadt Ship's Channel) which is about 12 miles in length, extends from the port of Leningrad Entrance light buoy to the Leningrad Morskoi Canal, which is about 15 miles in length, and leads to the entrance of the sea commercial port of Leningrad. The least bottom width of about 80 m. is in the part of the Canal which is protected by 2 dams (moles).

PILOTAGE: Pilots usually board and disembark vessels at the port of Leningrad approaching light buoy (Lat. 60° 02′ N., Long. 29° 26′ E.). In case of bad weather a vessel should follow the Pilot boat up to the Kronstadt roads where a Pilot will come aboard the ship.

ANCHORAGE: Vessels approaching the port from seaward should take anchorage off the port of Leningrad Entrance light buoy. The depths in the roads are between 20–25 m. and the holding ground is mud and sand.

RESTRICTIONS: No restrictions on night entry, no tide in Leningrad. Vessels with drafts 8.5 m. and more, and length 170 m. and more, must be towed when proceeding in the Leningrad Morskoi Channel from the Lesnoi Mole Roads (Timber Mole Roads) up to the Neva Gates.

All vessels navigating within the port must keep strictly to the following regulations:

(a) Vessel's speed should not exceed 10 knots when navigating in the Kronstadt Korabelny Farvater and in the open part of the Leningrad Morskoi Canal (from the entrance up to the moles).

(b) When navigating in the channel between the moles of the Leningrad Morskoi Canal as well as in the Bolshaya Neva river from the Neva Gates up to Lieutenant Schmidt bridge and also in the Ekateringofka river, vessels speed should not exceed 6 knots.

(c) In the inner roads and in the port harbours, Masters should navigate with a speed ensuring the safety of vessel but never exceeding 6 knots.

MAX. SIZE: Draft restriction 10.5 m. No restrictions as to the length of a vessel.

HEALTH: Master coming from foreign port shall report every sick passenger or crewman; Health Authorities board together with Customs and Immigration and if find all in order grant free pratique. Each vessel shall produce Deratisation Certificate and Sanitary Patent.

RADIO: Cable Agent "Inflot" ETA, draft and other data, information required via Leningrad Radio Station. All vessels when approaching the port of Leningrad should establish radio contact via the coastal Leningrad Radio station operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UDB	500	500	A1	H24
	484	480	A1	H24
URD	6,425	6,273	A1	H24
	8,687.6	8,365		
	12,693	12,546		
Leningrad-Radio	13,175.5	12,396.5	A3	HX
Leningrad-Radio	2,182	2,182	A3H	H24
Leningrad-Radio	8,767	—	A3A	HX
Leningrad-Radio	—	8,236.4	A3A	HX
Leningrad-Radio 1–5 (Port Control via CPR**)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

**CPR – Central Port Radio Station.

Port radar station gives all possible information to any vessel navigating in the Kronstadt Korabelny Farvater and Leningradsky Morskoi Canal during restricted visibility, from the Leningrad entrance light buoy (Lat. 60° 02′ N., Long. 29° 26′ E.) up to the dams (moles) of the Leningrad Morskoi Canal. Navigation is usually controlled by a Pilot on board the vessel.

Signals regulating vessels traffic in the harbour gates, called the Nevskie Vorota (Neva Gates), as well as signals indicating that the Leningrad Morskoi Canal is closed for Westward bound traffic are hoisted at the Commercial port signal mast situated on Kanonersky Island, at the Western side of the Neva Gates. Storm signals are shown at the same mast.

Signals for vessels approaching the entrance to the Commercial port of Leningrad from seaward are hoisted at the pilot vessel.

Traffic prohibition signals, when the pilot vessel is absent from her usual position may be exhibited at a vessel specially designated for this purpose.

TUGS: Normally join incoming vessels at Inner Road. Ships lines usually used.

The number of tugs a Master should order for inward and outward towage as well as for shifting berths in the harbour depends on Pilot's advice.

BERTHING: Berths of the port, with depths alongside of up to 11.5 m. are equipped to handle general and bulk cargoes (coal, ores, grain, building material), sugar, metals, timber products, etc. There is also a passenger and container terminal, warehouses, cold stores and concrete floor sheds.

Opening and closing of hatches is usually done by the ship's crew, otherwise according to the charter party conditions.

The port of Leningrad is equipped with modern cargo-handling facilities. There are floating, container handling, fixed and mobile shore cranes, an elevator, fork lifts and other mechanical equipment.

TIDE: Considerable rises of water level may be caused by strong Westerly winds – and falls by Easterly winds. Usually the changes in water level are greater during the Autumn and Winter months. During Autumn and Winter the range of level may reach 1.2 m. from the mean water level and sometimes even more.

During Spring and Summer it is never more than 0.5 m. The greatest rises in the water level are observed in the Neva Bay. The extreme difference in level between the maximum rise and the minimum fall of these seasonal changes observed is about 3.5 m. At the mouth of the Neva river the greatest changes in the water level are caused by the S.W. Autumn gales. The difference in level usually reaches 0.2 m. – 0.3 m. and only sometimes up to 1 m.

STEVEDORES: Ordered by Agent.

RADAR: Pilot in contact with radar service.

MEDICAL: Masters to advise Agent prior arrival if medical attendance required aboard.

DENSITY: Fresh water in port area.

FRESH WATER: Most berths supplied by shore installations, otherwise barges.

FUEL: Bunkers available, usually delivered by lighters.

FIRE PRECAUTIONS: No smoking allowed in port area, except in places specially allocated.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: According to charter party.

CERTIFICATES:

Passenger Ship Safety.
Safety Equipment.
Safety Radiotelephony.
Safety Radiotelegraphy.
Exemption certificate.

CUSTOMS ALLOWANCE: No restrictions on board.

IDENTIFICATION CARDS: Needed, will be given on arrival.

CONSULS: The Consulates of Czechoslovak Socialist Republic, German Democratic Republic, German Federal Republic, Iran, Japan, Polish People's Republic, People's Republic of Bulgaria, Republic of Cuba, Sweden and United States of America are situated in Leningrad.

REPAIRS: All types of repairs for vessels of up to 10,000 d.w.t. can be carried out in the port.

DRY DOCKS: Available.

TIME: GMT plus 3 hours, no alterations during year.

POLICE/FIRE/AMBULANCE: Police 9692; First-Aid from Port 503; from Town 03; Port Fire 8509, 8536, 8973; Town Fire 01.

AUTHORITY: Port of Leningrad Authority.

AGENT: Main Maritime Agency "Inflot". Postal address: 1 Gapsalskaya Str., Leningrad 198035, U.S.S.R. Tel.: 251-12-38; 251-28-77; 216-99-77. Telex: 505, 506.

MEZEN: 65.50 N. 44.04 E.

GENERAL: A commercial seaport, Mezen is situated at a distance of 22 miles to the South of the mouth of the Mezen river flowing into the head of the Gulf of Mezen, in the White Sea.

The port area is bounded on the North by a line connecting the Ryabinov and the Nerpinsky points and on the South by the parallel of 65° 50′ N., Northward of the town of Mezen. The anchorage at the Kuloi river mouth is also included at the port of Mezen area.

Drift ice in the Gulf of Mezen appears in the first half of November. By the middle of February the Bay becomes completely frozen over. Ice finally disappears in the first half of May.

The port is open for navigation about 5 months of the year, starting from the end of May or beginning of June.

Ice-breaker assistance cannot be effected in the outer roads in the event of fast ice.

Tidal streams are observed in the Mezen river. The tide is semi-diurnal with two high waters and two low waters a day.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. A Pilot meets a vessel at an anchorage buoy, at the Mezen river bar (Lat. 66° 12′ N., Long. 44° 04′ E.), at a distance of 22 miles off the port of Mezen. In the event of bad weather a Pilot at his discretion, may board a vessel in the outer roads.

Pilotage cannot be effected at night.

A Pilot cannot board a vessel earlier than 2 hours before the high water in the Semzha river, and a vessel may be piloted into the port not later than 1 hour before the water in the river reaches its high level.

Pilots do not board vessels in rough water (if the wind is over Force 6 Beaufort scale).

In case Pilot cannot embark a vessel in the outer roads, Master should follow in the wake of pilot boat up to Tolstic Point (Lat. 66° 04′ N., Long. 44° 05′ E.) where a Pilot will board ship. After leaving the port Master should disembark Pilot on to pilot boat at Tolstic Point and then follow it up to the outer roads of the port of Mezen.

ANCHORAGE: Anchorage can be obtained in the outer roads and in certain places of the Mezen river situated between the outer roads and the Kamenka settlement.

The outer roads are situated at the Mezen river mouth. They are bounded on the South by a line connecting the Ryabinov and the Maslyany Points.

Vessels in the outer roads are subject to effects of the N.W. and N.E. winds and heavy waves caused by them. The depths in the outer roads are about 7 m. The holding ground is sand, mud and rocks. Anchorage can be obtained in the inner roads with depths at low water of up to 4.5 m. – 5 m. (length of area is 1.5 mile and width up to 150 m.).

The inner roads are situated opposite the Kamenka settlement. A good anchorage can be obtained there by two vessels simultaneously. The anchorage at Burnovsky Point with depths from 4.5 m. – 5.5 m. can be used by two loaded vessels drawing up to 4.2 m.

RESTRICTIONS: Vessels may enter port only in daytime on high water. Masters have to pay full attention to Pilot's advice as river has varying bends.

MAX. SIZE: The permitted draft for the entry to the port is announced monthly by the Port Authorities. It should not exceed 3.9 m. – 4.2 m. The maximum permitted length is 70 m.

HEALTH: As for "Archangel".

RADIO: Vessels can establish radio contact through the port radio station Mezen Radio operating 24 hours a day on the following frequencies:

Call sign	*Working*	*Calling*	*Type of transmission*	*Time*
UZT	500 kc/s	500 kc/s	A1	HX
Dispatcher (Port Control)	160.65 mc/s	156.80 mc/s	F3	H24
Port (Harbour Master's Office)	156.70 mc/s	156.80 mc/s	F3	HX

BERTHING: The floating dams are used as mooring berths in the port. The depths alongside at low water are about 3.5 m. Vessels drawing 3.9 m. – 4.2 m. are usually grounded while loading at low water.

The port of Mezen specialises in timber exports but other cargoes are also handled at berths. Covered warehouses and open concrete floor sheds are available.

Tug assistance for mooring berths is not compulsory. Berthing is usually done in the daytime. Tugs, if necessary are ordered by Master according to the Pilot's instructions.

Rendering of Notice of Readiness and opening and closing of hatches are usually done in accordance with the "Soviet Wood" charter party.

Loading of timber is done by ship's winches.

TIDE: The difference between two successive high waters and low waters is small but the range of the tide changes considerably. At the Kamenka settlement the mean range of the tide is 2.8 m. and the mean range of the spring tide is 3.1 m. At the Semzha river the mean range of the spring tide reaches 7.7 m. Everywhere in the Gulf of Mezen the differences in the duration of falling and of rising water are big and in some places of the Gulf of Mezen they may reach 5 hours.

Considerable changes in the water level are observed in the Spring. They are usually caused by the seasonal increase in the amount of water (due to melting snow) brought down by the rivers.

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

FUEL: Supplies not guaranteed.

FRESH WATER: Fresh water can be supplied from the berths.

TIME: GMT plus 3 hours (all year round).

AUTHORITY: The Port of Mezen Authority.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Mezen.

Port – "Inflot", Kamenka Settlement, 164650-Mezen, Archangel region, U.S.S.R. Cables "Inflot Mezen-Kamenka". Tel. The timber mill exchange – "Inflot".

MURMANSK: 69.00 N. 33.03 E. (See Plan Book)

GENERAL: A Barents Commercial Seaport and Fishing Port, Murmansk, is situated at the Eastern coast of the Southern elbow-shaped bend of the Gulf of Kolsky, between the Zeleny (Green) and Khaldeev Points. It is the last unfrozen port of the Northern seas route.

In very severe Winters the Southern and middle elbow-shaped bends of the Gulf get frozen over for a short period of time in February or March, during calm and frosty weather. In mild Winters drift ice is observed. The Northern part of the Gulf never gets frozen over. The port of Murmansk is open for navigation all the year round. In the event of ice conditions in the Gulf of Kolsky, ice-breaker assistance will be effected in compliance with the Harbour regulations in force.

The port area occupies nearly all Southern elbow-shaped bend of the Gulf of Kolsky. The port of Murmansk consists of 2 harbours: the Commercial and the Fishing Harbours. The Commercial Harbour is divided into 4 areas: The Rudny (Ore), The Ugolny (Coal), The Central, and Passenger Terminal.

The Fishing Port extends to the South of the Passenger Terminal.

DOCUMENTS: Also refer to beginning of U.S.S.R. section.

Muster roll, 6 copies (IMCO form)
Crew List, 2 copies (IMCO form)
Passenger List, 6 copies (IMCO form)
General declaration, 5 copies (IMCO form)
Cargo Manifest, 2 copies (IMCO form)

PILOTAGE: Compulsory. Pilot station is situated at Tuva-Goobay in Kilsky Bay, position 69° 11′ 09″ N., 33° 34′ 08″ E. ETA to be given to Agents 96, 48, 24 and 12 hours before arrival. It is vital that ETA be sent thus if vessel is to obtain the services of a Pilot. Pilot launch is distinguished by word "Pilot" in black letters on both sides. Pilots can be contacted on VHF Channel 16. Every vessel should drift whilst waiting for Pilot since depths in the Pilot station are too big to permit anchorage.

During rough sea Pilot is not able to board a ship at the Pilot station area. In this event vessel should follow the Pilot boat in the wake of it up to the Salny Island and embark a Pilot Southward of the Island at a place indicated by Pilot boat.

ANCHORAGE: At the Pilot station depths are too great to permit anchorage, but there is sufficient sea room for vessel to await Pilot with engines stopped. Anchorage with depths from 20 m.–35 m. is situated in the Southern elbow-shaped bend of the Gulf of Kolsky, Westward of the Kievaraksky leading line (the port outer roads). The holding ground is good.

Every vessel waiting for mooring berth should anchor Westward of the Kievaraskky leading line but not obstructing other vessels' traffic.

It is strictly prohibited to lie at anchor Eastward of the Kievaraksky leading line. If, in case of emergency, a Master has to lie at anchor in the prohibited area, he should immediately report the fact to the Harbour Master of the Commercial port of Murmansk.

RESTRICTIONS: Vessels can enter the inner roads of the port at any time of day or night.

The speed of vessels navigating within the limits of the Gulf of Kolsky is restricted by the following limits:

(a) It shall not exceed 12 knots in the area bounded by the parallels of the Letinsky Point and the Northern side of the Salny Island.

(b) It shall not exceed 10 knots in the area bounded by the parallels of the Northern side of the Salny Island and Pinagory Point.

(c) It shall not exceed 6 knots in the area Southward of Pinagory Point.

MAX. SIZE: Vessels up to 39 ft. max. draft for berthing.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting pratique which will be given on arrival.

RADIO: Murmansk Radio operating 24 hours on 2182 kHz. Coastal radio station UMN operating 24 hours on 500 and 472 kHz. Coastal radio station UMV operating 24 hours on 13080 kHz.

Radio contact can be established through the port radio station Murmansk Radio, operating 24 hours a day on the following frequencies:

Call sign	*Working*	*Calling*	*Type of transmission*	*Time*
UMN	500 472	500 468	A1	H24
UMV	12,730	12,555	A1	H24
UMV	6,400 8,690 *1660	6,274.5 8,368 16,716	A1	HX
Murmansk-Radio	2,182	2,182	A3	H24
Murmansk-Radio	8,757.6	—	A3H	HX
Rascat (Radar & Pilot Service)	161.50 mc/s	156.90 mc/s	F3	H24
	161.70 mc/s	157.10 mc/s	F3	H24
Port (CPR)* (Pilot Service)	160.95 mc/s	156.35 mc/s	F3	
	161.90 mc/s	157.30 mc/s		
	161.95 mc/s	157.35 mc/s		
"Inflot" (Shipping Agency)	156.70 mc/s	156.70 mc/s	F3	

*CPR – Central Port Radio Station

The pilot service operates through the "Port" (CPR) and "Rascat" (CPR) – Central Port Radio Station.

Radar/VHF link:

In the South circular bay, movement of all vessels is severely controlled by coastal radio station "RASCAT" (VHF Channel 18). All vessels under way must make contact with BRLC and carry out the recommendations received.

All vessels when at anchor or navigating in the Gulf of Kolsky must keep constant radio watch.

The port radar station gives all possible information to any vessel navigating in the Gulf in the restricted visibility. Radar navigation is usually controlled by a Pilot on board a vessel.

Storm predictions are transmitted on Channel 16 VHF for vessels in the vicinity. Vessels at moorings are warned through the Agent "Inflot".

Notice of Arrival: Every foreign vessel on approaching the Gulf of Kolsky must ask for entry permission into the Gulf from the Toros Island signal station by exhibiting her International Code letters by day and at night her call sign should be made in Morse code by searchlight.

VHF: Port VHF maintains contact between Pilots and ship within harbour limits, and between ship and shore. Calling on Channel 16 working channel will be according to instructions from shore.

TUGS: Normally join vessel in the inner area of the port. Tug's lines are used.

BERTHING: Main berths, depth alongside 32 ft. at low water. Average height of tide about 3.9 m. Vessels berth port or starboard side alongside at Master's and Pilot's discretion. The berths of the Commercial Harbour with depths alongside of up to 10.5 m. are equipped to handle general and bulk cargoes, metals, machinery, chemicals, foodstuff, etc.

There are enclosed mechanised warehouses for apatite including open concrete floor sheds.

It is prohibited to approach a berth without sounding a prolonged blast of the whistle. Same signal should be sounded when leaving an outer berth and the inner basin, as well as when passing a vessel lying at anchor in the outer roads.

Berths of the port are equipped with mobile electric cranes of up to 40 tons capacity. There are floating cranes with lifting capacity of up to 90 tons, and other cargo handling equipment and intra-port transport. Since loading/unloading is usually done by the port cranes, there are no specific requirements to vessels cargo gear.

STEVEDORES: Arranged by Agent on basis of Masters ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

MEDICAL: Hospital and medical facilities available. Vaccination can be arranged. If doctor required on board Master should inform Agents by radio or VHF.

DENSITY: At the berth varies between 1006 and 1025.

FRESH WATER: Available from most berths, otherwise supplied by barge. To avoid delay recommended to order before arrival.

FUEL: All grades available. Delivered by barge. Advance notice required.

DEVELOPMENTS: Reconstruction is being carried out in order to speed up loading of iron-ore and other cargoes.

GANGWAY/DECK WATCHMEN: Not obligatory.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: At first Russian port of call certificates of tonnage and those required by International Convention will be required for examination.

CUSTOMS ALLOWANCE: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: There is no local representation.

REPAIRS: All kinds of repairs can be carried out for vessels of up to 40,000 dwt.

DRY DOCKS: Large dock; length 173 m., width 45 m. Small dock; length 141 m. width 30 m.

TIDE: Changes of the water level in the Gulf are due to the tides. The tide is semi-diurnal with two high waters and two low waters a day. The difference in time of high and low water is about 6 hours. The range of the tide at mean neap is about 2.4 m. and at mean spring 4.5 m. The extreme range of water level is usually observed during the Autumn months and the lowest during Spring.

TIME: GMT plus 3 hours.

TELEPHONES: Ambulance, tel. 003, 395 and 422; Fire service, tel. 252 and 524.

AUTHORITY: Murmansk Sea Trade Port.

AGENT: The Port of Murmansk Main Maritime Agency "Inflot", 19 The Port Settlement, Murmansk 24, U.S.S.R. Cables "Inflot Murmansk". Tel. 2-56-66; 2-51-97. Telex 128.

NAKHODKA: 42.47 N. 132.52 E. (See Plan Book)

GENERAL: A commercial port, Nakhodka is situated in Nakhodka Bay, in the N.W. part of the Japan Sea.

Sometimes America Bay is covered with sludge which is frequently driven out by winds into the sea.

From the beginning of January to March the Nakhodka Bay is usually covered with thin ice which can easily be broken by vessels and driven out into the sea by favourable winds.

The port is open for navigation all the year round.

Changes of the water level in the Nakhodka Bay are of small account but the rise of the water level caused by strong Southerly winds blowing for considerable periods of time, may reach quite a high level.

The Northern part of the Nakhodka Bay from the entrance up to the line connecting the Lindgolm and Basnin Points is occupied by the Commercial port. The fishing port is situated Southward of this line.

The most dangerous wind for vessels lying in the Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to the water level and produces waves of up to 3 m. height in the Bay.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage in the port of Nakhodka is compulsory for all vessels irrespective of nationality and ownership with the exception of the local coasters.

Foreign vessels proceeding to the port from the seaward should first make course to the approaching point, Lat. 42° 27′ 2″ N., Long. 132° 57′ E. All vessels are recommended to approach this point by following the course 350.5° within the 1-2 mile wide traffic lane leaving the traffic separation zone on the port side.

From the approaching point a vessel should follow the course 000° for 8.2 miles within the 1 mile wide traffic lane leaving the traffic separation line on the port side at the entrance to the area of the "circular motion".

After having entered this area a vessel should steer anti-clockwise within the 2 mile wide traffic lane. Upon leaving the area of the "circular motion" a vessel should keep on the Vkhodnoi leading line of the lighthouses of the Nakhodka Bay and follow this course up to area No. 176 (the quarantine anchorage and the Pilot boarding area).

Vessels approaching the Novitsky Bay should follow the Vkhodnoi leading line up to area No. 177 (the Quarantine anchorage).

Foreign vessels leaving the port of Nakhodka and/or the Novitsky Bay should follow the opposite course. After having entered the area of the "circular motion" vessels should steer anti-clockwise in the 2 mile wide traffic lane.

Having left this area a vessel should follow course 180° steering 8.2 miles within the 1 mile wide traffic lane leaving the traffic separation line on the port side, she should then turn and follow the course 190.5° within the 1-2 mile wide traffic lane up to the exit point of the traffic separation area leaving the separation zone on her port side.

To avoid damage to a vessel and/or any port installation vessels should be moored/unmoored by the method of parallel mooring (unmooring) with tug assistance.

Being at 10 m. distance from a berth a vessel is allowed to use her main engine in case of emergency only.

ANCHORAGE: A safe anchorage can be obtained in the area "A" with depths from 13.0 m. – 20.0 m. and in the anchorage "D" area with depths from 18.0 m. – 28.0 m. The holding ground in both anchorages is mud, sand, sand with mud, stone.

The "A" area is a quarantine anchorage which serves as the Pilots' boarding place and an anchorage for deep sea-going vessels over 3,000 d.w.t.

The "D" anchorage area (No. 177) is an anchorage for tankers proceeding to the oil port situated in the Novitsky Bay. Boundaries of the anchorages are shown on the chart.

To lie at anchor in the Nakhodka Bay, in the fairway and in the dredged harbours, except in emergency, is strictly prohibited.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. There are no size restrictions for entry to the port, except for vessels having the maximum permitted draft.

Anchorage for tankers is allowed only in the "D" area (area No. 177).

MAX. SIZE: The permitted draft for vessels proceeding to the Commercial port is 9.7 m., 9 m. for the Fishing port and 8.6 m. for the Passenger Terminal.

Vessels drawing over the permitted draft must obtain Harbour Master's permission prior to entry to the port.

HEALTH: Advise "Inflot" by radio in advance if there is any case of quarantine illness on board the ship. Smallpox vaccination is compulsory for all crew members. If vessel is arriving from a cholera area, then cholera inoculations are also required.

RADIO: Radio communication can be effected via the radio station of the Primorsk Shipping Company – "Nakhodka-Radio" some data of which is given in the table below.

	Frequencies (kHz)		*Type of*	
Call sign	*Working*	*Calling*	*trans-mission*	*Time of work*
UKI	500	500	A1	H24
UKK—3	8510	8448	A1	
	12990	12627	A1	HX
"Port—5"	156.8*	156.8*	F3	HX
"Lotos" (Port Control)	156.8*	156.8*	F3	H24
"Golos—1" (Port Service & Pilot Watch)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

The traffic and storm signals are exhibited at the Signal Station situated 2.5 cables Westward of Shefner Point.

TUGS: Tug and mooring launch assistance available. Tugs join the vessel in America Bay as directed by Master or Pilot. Ship's tow lines are used.

BERTHING: May be effected at any time of day or night. In daytime vessels mooring position will be marked by a flag and at night by a red lantern. These signals mark the point where the ship's bow should be at the mooring.

The berths of cargo handling port area No. 1 have depths alongside from 8.6 m. up to 10.2 m. and are equipped to handle potassium salt, grain, equipment, cables, wire ropes, metals, phosphorus, etc.

The berths of cargo handling port area No. 2 have depths alongside from 9.5 m. up to 10.2 m. and are equipped to handle grain, coal, cement, foodstuff and general cargoes.

The berths of cargo handling port area No. 3 have depths alongside from 8.8 m. up to 11.8 m. and are equipped to handle timber, sawn timber, 20 ft. and 40 ft. ISO containers, equipment, machinery and other cargoes.

Passenger vessels are handled at two berths with depths alongside 8.8 m. and 6.1 m.

Electric cranes of up to 41 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 300 tons and other cargo handling equipment, intra-port transport included.

Loading and/or unloading is usually done in accordance with conditions and rates stipulated by Charter Parties and Sales Contracts.

STEVEDORES: Arranged through "Inflot".

MEDICAL: Medical service is free. All requirements should be ordered in advance through "Inflot".

FRESH WATER: Can be supplied at the berth or by barge.

FUEL: Available.

TANKERS: Slop reception facilities are available.

DEVELOPMENTS: Constructing new port at Urangel, 8 miles from Nakhodka, having: Coal pier, annual capacity 10 million tons. Coal conveyor, annual capacity 5 million tons. Wood chip conveyor system, annual capacity 800,000 tons. Container system.

OPENING/CLOSING HATCHES: Can be carried out by stevedores.

CUSTOMS ALLOWANCE: No restrictions on tobacco and alcohol on board ship. Only tobacco required for personal consumption may be taken ashore.

CONSULS: North Korea, tel. 55310. Japan, tel. 56360.

WIND: The most dangerous wind for vessels lying in Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to water level and sends heavy waves of up to 4 m. height into the Bay.

REPAIRS: All kinds of repairs for vessels of up to 25,000 dwt. can be carried out.

REPATRIATION: Can be arranged during the Summer months provided passport and documentation in order. During Winter months there are no facilities for foreigners to reach nearest international airport so repatriation is only possible via infrequent passenger ships to Japan.

AIRPORT: Nearest international airport is at Khabarovsk, 1,000 kilometres away. Vladivostok is now closed to foreigners or international traffic, though sometimes used for air freight.

TIME: GMT plus 10 hours all the year round.

SHORE LEAVE: Permitted subject to police control.

AUTHORITY: The Port Authority of Nakhodka.

AGENT: The Far Eastern Main Maritime Agency: "Inflot". Postal address: 692900 USSR Primorski Kray, Nakhodka, ul Leninskaia 2. Telegraphic address: Inflot Nakhodka. Telephones: 5–62–33, 5–61–55.

NARYAN-MAR: 67.38 N. 53.00 E.

GENERAL: A commercial port, Naryan-Mar is situated in the S.E. part of the Barents Sea, at a distance of 70 miles from the Pechora river mouth on the right bank of the Gorodetsky Shar Creek.

The port is open for navigation for a period of 100-110 days in the year.

In the Pechora river inlet first ice usually begins to form between 20th and 25th October, but sometimes appears at the beginning of the month.

The inlet becomes completely frozen over at the middle of December. Ice finally disappears at the end of June or sometimes beginning of July. Changes in the water level in the Pechora Inlet, due to melting of ice in Spring, have not been observed.

The formation of ice in the rivers flowing into the Pechora Inlet usually depends upon the time of the appearance of ice in the Inlet itself. Rivers, as a rule, become frozen over by the middle of October. The ice in the rivers usually breaks up earlier than it finally disappears in the Pechora Inlet.

The Pechora river at the Kuya settlement area becomes frozen over at the end of October, and the ice there finally disappears by the end of May.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Besides information stipulated in Soviet Wood Charter Party, vessels approaching pilot buoy may contact Port Authorities or Pilot in first fifteen minutes of any odd hour from 0700 till 2300 hrs. (Moscow time), frequency 2182 kc/s. Signals for Pilot to be given in accordance with International Code. Pilot boat wooden, standard type, white painted, with word "Pilot" in black letters on wheel-house. Pilot usually boards vessel at the Pilot Anchorage light buoy (lat. 68° 30′ N., Long. 54° 32′ E.). In case of bad weather, and in extraordinary circumstances Pilot shall embark vessel in the Srednevskie Islands area. In this event a vessel approaching the port from seaward should follow pilot boat in the wake of it, up to the Srednevskie Islands leading line where Pilot will be able to board ship.

Master of a vessel proceeding to the port of Naryan-Mar should order a Pilot through the Harbour Master 24 hours prior to arrival at the Pilot Anchorage light buoy and advise more precise ETA not later than 4 hours before approaching it.

Master should order Pilot not later than 2 hours prior to shifting berth and/or leaving the port.

ANCHORAGE: A recommended anchorage for foreign vessels is situated in the area with the central point 68° 30′ N., 54° 33′ E. The depths in the anchorage are from 5.4 m. — 6.6 m. Also Inner Roads where anchorage will be indicated by Pilot.

An anchorage can be obtained at the right bank of the Pechora river off Urpinsky leading line No. 24. Depths are from 4 m. — 17 m. The bottom is sand and mud.

Good anchorages with depths from 5 m — 10 m. can also be obtained opposite Zakhrebetny Bay and N.E. of the town of Naryan-Mar.

All vessels arriving from abroad or leaving the port for abroad, must anchor opposite Zakhrebetny Bay for the performance of port formalities.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night.

The permitted draft for entry to the port is about 4.5 m. but it is usually advised by the Port Authorities at the beginning of navigation. The maximum permitted length of a vessel is 110 m.

The entrance to the port is by the fairway leading from the Pilot Anchorage light buoy across the Pechora river bar.

The bar itself is the extensive shoal water area extending Northward of the Bolvansky Nos. Point. Three channels are dredged across the bar: The Receiving Channel, the Bar Channel and the Povorotny Channel. The last one serves as turning-point from the Receiving Channel into the Bar Channel. Vessels drawing not more than 4.9 m. can pass across the bar only at high water level.

It is prohibited to enter or leave the port through the Bar Channel and/or Receiving Channel as well as to navigate in the port area during dense fog, heavy rain and snow falls, strong winds of over Force 6 and absence of floating marks.

With the appearance of ice in the Pechora Inlet and in the Pechora river, entry to the port is not allowed without Harbour Master's permission.

The speed of a vessel navigating from the Pilot Anchorage light buoy through the Receiving Bar Turning, Alekseevsky, Polovsky, Kuisky, Urpinsky and other Channels shall not exceed 6 knots, with the exception at the part of the Pechora river between the Zakhrebetny and Srednevsky Channels where it is allowed to navigate with speed not exceeding 12 knots.

When passing floating cranes nearby, lighters and vessels lying alongside the port quays, every ship should proceed at dead slow speed.

MAX. SIZE: Draft declared by Port Authorities after being checked in the beginning of the season, and is about 15 feet.

HEALTH: Vessels inspected by sanitary officer. If no diseases, vessel obtains free pratique. Pratique automatic when vessel arrives from another Russian port.

RADIO: Naryan-Mar Radio.

	Frequencies (kHz)		*Type of trans-*	*Time of*	
Call sign	*working*	*calling*	*mission*	*work*	*Remarks*
UOY	500	500	A1	HX	
Naryan-Mar-Radio 1	156.8*	156.8*	F3	HX	Operates during period of navigation only

*Frequencies are given in mHz.

Storm warnings for vessels' traffic in the Pechora Inlet area for the coming 24 hours are transmitted via both the Central Port Radio and VHF radio.

Notice of Arrival: Should be given in accordance with the "Soviet Wood" Charter Party conditions.

BERTHING: The port of Naryan-Mar specialises in timber exports. Depths at the berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds.

The necessary number of tugs for entering or leaving the port as well as for shifting berth shall be agreed upon between Pilot and Master.

A mooring berth is usually indicated by a Pilot. Shifting berths without having obtained Harbour Master's permission is not allowed. Ship's tow lines are usually used during towage.

Diesel portable cranes of up to 6 tons capacity are operated on the quays. There are also track-laying cranes of up to 12 tons and floating cranes with lifting capacity from 35—40 tons.

STEVEDORES: As per "Soviet Wood" Charter Party.

MEDICAL: No advance notice required. Clinic and hospital available.

DENSITY: Fresh water irrespective of tide.

FRESH WATER: Delivered by tanker.

FUEL: Not guaranteed.

GANGWAY/DECK WATCHMEN: To be provided by vessel.

OPENING/CLOSING HATCHES: According to "Soviet Wood" charter party.

CERTIFICATES:

Seaworthiness.
Measurement.
Load line.
Cargo Equipment.
Safety Equipment.
Deratisation Certificates.

CUSTOMS ALLOWANCE: Tobacco/Wine. No quantity limits.

IDENTIFICATION CARDS: Only Seamen's Books.

CONSULS: No Consuls.

REPAIRS: Small repairs only.

DRY DOCKS: None.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport served by regular lines and situated near town.

TIME: GMT plus three hours. No seasonal alterations.

TIDE: Changes in the water level in the port area depend upon tides and effects of the wind.

The tide is semi-diurnal with two high waters and two low waters a day. The range of the tide varies from 0.9 m. — 1.8 m. Changes in water level are caused by the effects of the wind and may reach 1 m. — 1.5 m.

HOLIDAYS: See "Archangel".

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Can be arranged on board.

SHORE LEAVE: Each crew member properly signed in ship's Articles and having valid Seaman's Book is allowed ashore.

DELAYS: Caused by rains, when vessel loading cargo of sawn goods.

AUTHORITY: The Port of Naryan-Mar Authority.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Naryan-Mar. Pechora Timber Mill Khatanzeisky, the Port of Naryan-Mar, Archangel Region, U.S.S.R. Cable "Inflot Naryan-Mar". Tel. "Inflot" via the timber mill switchboard 30-70, 31-05.

NEVELSK: 46.40 N. 141.51 E. (See Plan Book)

GENERAL: The sea fishery port of Nevelsk is situated in the Tatarsky Strait, in the Southern part of the Nevelsky Bay. The port is open for navigation all the year round.

Changes of the water level are mainly caused by in and off-going tidal floods.

The port consists of two parts. The Outer part includes a part of the Nevelsky Bay water area with the imaginary boundaries drawn by an arc of 1.5 mile radius from the light mark installed on the Southern point of the Western breakwater. The Inner port consists of the harbour of the fishing port, the Small and the Northern Scoops. The boundary of the Inner is the line connecting the points of the Southern and the Western breakwaters.

The Master of a vessel when entering the port should keep on the leading line of the green leading light marks located at a distance of 5.5 cables to the North of the Southern point of the Naga reef. The true direction of the Leading line is 259° 2′ – 079° 2′.

The port of Nevelsk bearing in mind its position, size, weather and hydrological conditions is not and cannot serve as a sheltered port as it is only partially protected from the effects of the sea swell and winds blowing from Southerly, Westerly and N.W'ly directions and is not protected from S.W'ly winds at all. Therefore deep sea-going vessels cannot be allowed to enter the port during storm warnings. It is dangerous to stay in the port when heavy S.W'ly winds are expected.

PILOTAGE: Effected round the clock. The master of a vessel should order a Pilot via the Harbour Master's office.

ANCHORAGE: Situated in the Outer port to the South of the leading line and to seaward of the 20 m. contour. The anchorage is not protected from Westerly and Northerly winds and waves. The bottom is sand. The anchorage in the inner area is dangerous as the ground there (stone plate) does not hold anchors well.

RESTRICTIONS: The permitted draft is determined by the Harbour Master. Vessels having draft over 5.8 m. are allowed to enter the port after having obtained the Harbour Master's permission.

TUGS: Tugs ordered by the Master for mooring and unmooring meet vessels within the boundaries of the Inner port.

RADIO: Communications can be effected through the port radio station "Nevelsk-Radio".

Call sign	*Frequencies (kHz)* *Working*	*Frequencies (kHz)* *Calling*	*Type of transmission*	*Time of work*
"Nevelsk-Radio – 1"	2740	2740	A3	H24
"Nevelsk – 31"	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

BERTHING: All vessels entering the port are moored to the berths according to instructions of a port controller.

The berths of the port with depths alongside from 5.8 m. up to 6.5 m. are equipped to handle general, bulk liquid and other cargoes. There are closed warehouses, open concrete floor sheds and a cold store in the port.

It is recommended to use manilla mooring ropes due to insufficient protection of the port from effects of winds, waves and strong variable current with surge (so called the "tyagun".).

Opening and closing of hatches is usually done by the crew. All deep draft vessels are loaded/unloaded in the roads.

The berths of the port are equipped with 5 ton portal cranes. There are other cargo handling facilities and intraport transport.

FRESH WATER: Available in limited quantities.

FUEL: Diesel oil available.

TIME: GMT plus 11 hours all year round.

REPAIRS: Possible for vessels up to 4.0 m. draft.

CONSULS: None.

AUTHORITY: The Port of Nevelsk Authority.

NOVOROSSIYSK: (Including Sheskharis-Oil Harbour) 44.43 N. 37.47 E. (See Plan Book)

GENERAL: The port of Novorossiysk is situated in the N.E. part of the Black Sea, in the Bay of Novorossiysk, 60 miles S.E. of the Kerch Strait.

The port is open for navigation all the year round. Ice very seldom appears in the port area. Sometimes, in the very severe Winters particularly, a very narrow strip of thin ice (so called "zabereghi") may be formed on the coast line.

In Winter, strong, gusty N.E. winds (called "Bora"), reaching hurricane force at times, blow from the coastal mountains. Due to these winds, vessels lying at anchor in Novorossiysk Bay may very quickly become covered with ice when the temperature of the air is cooled below freezing-point.

It is impossible to enter the port when "Bora" blows, therefore, all vessels are recommended to leave Novorossiysk Bay for the open sea beforehand or lay at anchor in the Yuzhnaya Ozereika roads, at a distance of 8.5 miles Westward of the entrance to the port of Novorossiysk or in Anchorage area No. 77, to the South of the Doob Point, until the weather improves.

The range of water level in Novorossiysk Bay caused by the effect of the winds, does not exceed 0.6 m. The changes of water level, due to variation in atmospheric pressure ("Seish" effects), are observed at times. The "Seish" may last up to several days. The maximum range of water level, due to the "Seish", observed in Novorossiysk Bay is 0.6 m.

The port consists of 2 harbours – the Dry Cargo Harbour and Oil (Sheskharis) Harbour.

The inner roads are situated at the head of Novorossiysk Bay are divided from the outer roads by the Western and Eastern Moles. The outer roads are situated between the moles and the Southern border of the port.

The Dry Cargo Harbour situated inside the inner roads is protected by 2 (Western and Eastern) moles.

2 passages, the Western and Eastern, divided by Penaisky Shoals, lead to the inner roads through the port area. The Western passage is wider in comparison with the Eastern, and vessels may enter outer roads passing through it by one course.

DOCUMENTS: Refer to beginning of U.S.S.R. section

Shipmaster's Report: (1975) Notwithstanding the instructions for documentation for all U.S.S.R. ports referred to at the beginning of the section, the Novorossiysk Port Authorities require the following:

General Declaration (IMCO FAL form 1)	3 copies
Cargo Declaration (IMCO FAL form 2)	2 copies
Ship's Stores Declaration (IMCO FAL form 3)	2 copies
Crew Effects Declaration (IMCO FAL form 4)	2 copies
Crew List (IMCO FAL form 5)	6 copies
Passenger List (IMCO FAL form 6)	4 copies

PILOTAGE: Compulsory: 96 hours prior arrival cable Inflot giving ETA, name vessel, gross tonnage, exact draft, type of engine. Flag sound and Morse signal G. Pilot meets vessel at 44° 37′ N.: 37° 52′ E. Movement of vessel within inner harbour – only under Pilot guidance. If Pilot is not available vessel should anchor in area No. 52, opposite the Kabardinka settlement, recommended as an anchorage, and wait until Pilot arrives.

ANCHORAGE: Anchorage in the outer roads of the port is allowed almost everywhere but most convenient places for the purpose are to be considered the following 4 areas. The first one is area No. 52 situated to the North of the Doob Point.

Depths there vary from 12 m. to 27 m., the holding ground is mud. In the event of winds blowing from seaward Masters of all vessels are recommended to leave this area for the inner roads. Areas No. 16 and No. 63 are the second and the third anchorage places situated, respectively, 2.5 and 8 cable lengths Westward of the Penai Point. Depths there are from 13 m. to 27 m., the holding ground is mud and mud with shell. The fourth place is area No. 51 situated 6 cable lengths South-eastward of the port entrance. Depths there are from 20 m. to 24 m.

Vessels approaching the port of Novorossiysk with N.E. gales ("Bora") blowing, or caught by the storm whilst lying in the outer or inner roads, or after having received storm warning, should use every opportunity to proceed to sea or lay at anchor in the Yuzhnaya Ozereika Roads, having the main engines ready and keeping constant anchor watch.

Under the circumstances, every vessel should keep regular radio contact with port radio station.

Masters of vessels lying at anchor in the outer roads and/or in the port, are usually warned beforehand about the forthcoming N.E. winds. Since these winds may reach hurricane force during a very short period of time, particularly in Winter, all Masters lying at anchor in Novorossiysk Bay are recommended to pay careful attention at every change of the weather, to watch position of vessel to be able to prevent her drifting about anchor and proceed to sea in due time.

RESTRICTIONS: No restrictions on night entry into the Inner Roads, Mooring and/or unmooring, both in the Dry Cargo Harbour and the Sheskharis Oil Harbour cannot be effected during Southerly or N.E. winds over Force 7.

MAX. SIZE: The permitted length for entry into port is 250 m., draft 11 m. for dry cargo vessels and 13.5 m. for tankers.

HEALTH: Free pratique automatic for vessels coming direct from U.S.S.R. port. From other countries, usual procedure of sanitary inspection applies.

RADIO: Vessels can establish radio contact through port radio station Novorossiysk Radio operating 24 hours a day on the following frequencies:

Call sign	Frequencies (kHz) Working	Frequencies (kHz) Calling	Type of transmission	Time of work
UDN	500	500	A1	H24
Novorossiysk-Radio	2,182	2,182	A3	H24
UFN	8,663	8,358	A1	H24
UFN	12,919	12,537	A1	H24
	17,100	16,730	A1	HX
	4,245	4183.5	A1	HX
"Novorossiysk-Radio – 9-12" (CPR)**	156.8*	156.5*	F3	H24

*Frequencies are given in mHz

**CPR – Central Port Radio Station.

All vessels passing through the traffic controlled zone and/or anchored there have to keep constant VHF radio watch on Channel 16.

The port signal station is equipped with radar which gives all possible information for ensuring safe pilotage, and also helps Pilots in shifting vessels within the port inner roads.

TUGS: The following number of tugs and their power are stipulated for mooring operations in accordance with size of vessels to be berthed:

Ship's length	*Number of tugs and power*
from 50 to 100 m.	1 tug, from 150 i.h.p. to 600
from 101 to 160 m.	2 tugs, from 600 i.h.p. to 1,200
from 161 to 200 m.	2 tugs, 1×2,300 i.h.p., 1×1,200 i.h.p. or 3×1,200 i.h.p.
from 201 to 250 m.	3 tugs, from 1,200 i.h.p. to 2,300
over 250 m.	4 tugs, from 1,200 i.h.p. to 2,300

Notes:

1. Exceptions to the above regulations are possible if the Ship Master consents to deviations and the Harbour Master grants permission for the same. But the deviations should not affect the safety of mooring operations.

2. While manoeuvring ships to the Sheskharis Berths or jetty No. 25 one more tug of 150 i.h.p. is engaged regardless of the ship's size in view of the constructive features of the berths.

BERTHING: When proceeding in inner harbour vessels must keep both anchors ready to let go; ships to be moored by safe ropes which to be kept tight at all times. Also be ready to use anchor chain over bollard according to Pilot's recommendation. Strictly prohibited to work with propellers lying alongside berth. All mooring ropes must be fitted with rat-guard plates.

The quays of the Dry Cargo Harbour with depths alongside of up to 11.5 m. are equipped to handle general and bulk cargoes (coal, ore), metals, timber, sugar, grain, cement, fruit and vegetables.

Berths of the port are equipped with modern cargo handling facilities. There are portal cranes of up to 40 tons capacity, a floating crane with lifting capacity of up to 100 tons, automatic and electric cargo lifters and other equipment.

Opening and closing of hatches is usually done by ship's crew with the help of portal cranes at dry cargo berths, if ordered by Master, grain berth excluded.

Ores are loaded in compliance with the Temporary Regulations for Carrying Ores handed over to the Shipmaster by Inflot Agents during inwards clearance.

Following are the basic requirements of above Regulations to the ores being loaded *(a)* moisture contents not higher than 12% (if other percentage is not stipulated by Charter Party); *(b)* angle of repose is not less than 35°.

Grain and other bulk cargoes are to be loaded in strict conformity with the International Convention.

STEVEDORES: All necessary services including stevedoring work available under Port Authority guidance. Port cargo-handling regions where ships berth managed by Port Authority and used for stevedoring, tallymen service, storage, etc. On the matters connected with services available, foreign vessels have to apply to Port Authority through Maritime Agency "Inflot".

MEDICAL: In case of accident (emergency), medical attendance rendered at any time. Hospital facilities available. Also inoculation, vaccination, etc.

TANKERS: Bearing in mind N.E. gales, oil carriers lying alongside oil pier must have boat-ropes lowered to water and illuminate them at night. All scupper holes on main deck must be closed tightly. Master responsible for overflow of oil in the vicinity of harbour and has to bear harbour cleaning costs. No repair work can be done on tankers lying alongside oil pier. No ballast water may be pumped out, no garbage or refuse thrown overboard. Ballast water to be pumped into shore slop tank.

The Sheskharis Oil Harbour is situated in the Eastern part of the outer roads, 2.2 miles N.E. of the Penai Point. It is protected by a mole from the South and oil jetty from the North. The base of the jetty is used as a berth for fire-fighting boats.

Large vessels are not recommended to approach the head of the mole since the rock-bottom with depths from 12 m.–15 m. extends at 50 m. length Westward.

Since it is not safe to stay alongside berths in the Sheskharis Oil Harbour during strong winds blowing from any direction, all tankers, after having received a storm warning should take urgent measures to leave for sea.

Depths at the berths of the Sheskharis Oil Harbour are up to 14.5 m.

To ensure safe loading/unloading of oil products as well as to expedite the vessel's turn around time, every tanker should be equipped with cargo manifolds capable of fitting 8–12 in. shore-loading connections.

These manifolds should allow the upward connection with shore cargo flanges of not less than 1 m. in height and located on deck at 3 m.-5 m. length from side of vessel.

DENSITY: About 1010–1014.

FRESH WATER: Available from shore; minimum quantity invoiced at 15 tons.

FUEL: Most grades available. Fuel for tankers can be supplied ex-shore. Bunkers for dry cargo vessels are usually delivered by lighters.

FIRE PRECAUTIONS: All operations involving open fire and sparks are prohibited on oil pier. 2 fire-extinguishers, thick felt and sand must be ready beside hose connection.

GANGWAY/DECK WATCHMEN: Gangway watch compulsory and carried out by crew.

OPENING/CLOSING HATCHES: Normally by crew, otherwise according Charter Party.

CUSTOMS ALLOWANCE: No quantity limits but nothing allowed to be taken ashore.

IDENTIFICATION CARDS: Crew members get shore passes.

CONSULS: No Consulates in port or its vicinities.

REPAIRS: All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

Cargo Superintendent's Report: 1975.

The Novorossiysk Shiprepair Yard is capable of carrying out any ship repairs, and is equipped with three floating docks. I was unable to obtain information on the size of these docks, but estimate they are capable of handling vessels in the 100,000 ton range.

REPATRIATION: No facilities exist for effecting crew changes. A crew member may be repatriated due to family reasons or sickness but repatriation requires visa formalities.

AIRPORT: Nearest airport (Krasnodar) served by regular internal lines is situated at 150 km. from port.

Cargo Superintendent's Report: 1975.

Novorossiysk has its own airport, connected to the regular inland line's service. There are daily services to and from Moscow via Kharkov.

TIME: GMT plus 3 hours; no alterations during year.

HOLIDAYS: New Year's Day, 8th March (World's Women's Day); May 1st, 2nd (Labour Day); May 9th (Victory Day); November 7th, 8th (Great October Socialist Revolution Day); December 5th (U.S.S.R. Constitution Day). Cargo work can be arranged on those days.

POLICE/AMBULANCE/FIRE: Police, 02; Ambulance, 03; Fire, 01.

TELEPHONES: Can be arranged to be fitted on board.

SHORE LEAVE: Crew members are allowed ashore. Crew members of foreign vessels get shore passes which grant them permission to stay ashore till 2400 hrs. Crew members who lose their shore passes as well as those late from ashore, are not granted shore leave any longer in conformity with local regulations.

AUTHORITY: The Port of Novorossiysk Authority.

AGENT: Main Maritime Agency "Inflot", 13 Portovaja Str., Tel. 6-22-49, 6-22-85, 6-26-78. Cables: "Inflot" Novorossiysk. Telex: 8217.

ODESSA: 46.29 N. 30.44 E. (See Plan Book)

GENERAL: The port of Odessa is situated on the N.W. coast of the Black Sea in the S.W. part of Odessa Bay.

The port is open for navigation all the year round, but with ice-breaker assistance in severe Winters about 30 days of the year. Ice first begins to form in the second half of December and finally disappears in February. After ice has formed it is often broken up by strong winds and stormy weather. In mild Winters ice has not been observed in Odessa Bay.

Range of water level caused by winds depends on force and periods they blow, and may reach 0.6 – 1.0 m.

Atmospheric pressure has also a direct influence on the water level ("Seish" effect), but is weaker than effects of the wind. The "Seish" may last from a few minutes up to several days causing change of water level up to 0.58 m.

DOCUMENTS: Refer to IMCO forms.

PILOTAGE: Compulsory. Arranged through Inflot, but vessel to give 12 days, 96, 24 hours and 6 hours notice through Odessa radio. Pilot boat recognised by international pilot flag. Vessel requiring Pilot shows international flag "G". Pilot boards in region of anchoring place No. 62 at a distance 2.5 miles E. off Vorontzov lighthouse. Fenders should be on side where Pilot boards.

Vessels leaving the port of Odessa for the port of Kherson should proceed there under control of a State Commissioned Pilot.

Area limited by a circle with a radius of 3 miles with its centre at the Vorontzov lighthouse, as well as anchoring place No. 64 are announced to be "Traffic control zone". Vessels approaching zone from the sea must communicate with "Odessa Port Control" on VHF, Channel 14 (156.7 mHz.) and act in accordance with its instructions.

ANCHORAGES: The Outer Roads, between the port and Severny Odessky Cape, depths up to 14 m. Open to winds from N.E. to S.S.E. Good holding ground.

On arrival at the outer roads, vessels should lie at anchor whilst waiting for a berth at the anchoring place No. 62 in accordance with instructions given by "Odessa Port Control".

RESTRICTIONS: Vessels enter only with Pilot and should have lights according to Pilot's instructions. Vessels berthed depending on kind of cargo carrying or loading.

Vessels can enter and leave the port at any time of day or night.

Medium size vessels when entering or leaving port must have keel clearance not less than 1 ft.; large vessels not less than 2 ft.

Vessels are allowed to moor at berth only after having obtained Harbour Master's permission, and when the corresponding signal is exhibited at the signal station.

The speed of a vessel shall not exceed 4 knots when passing through the channel and/or in the port water areas marked by navigational marks.

Large vessels laden with ballast water only, are allowed to moor to berth if winds do not exceed Force 6. A vessel of small size may be turned broadside on to a loaded vessel of a larger size, but not vice versa.

It is strictly prohibited to turn a third vessel broadside on to 2 other vessels having been turned broadside earlier. In the event of ice a vessel may turn broadside on to another vessel only after having obtained Harbour Master's special permission.

MAX. SIZE: The maximum permitted draft is 11.5 m. Length up to 230 m.

HEALTH: Free pratique given on berthing or at the anchorage. In case of suspected disease Master must inform Inflot by cable. Free pratique cannot be granted automatically.

RADIO: Vessels can establish radio contact through the port radio station Odessa Radio operating 24 hours a day on the following frequencies:

Call sign	*Working*	*Calling*	*Type of trans-mission*	*Time*
UDE	500 kc/s.	500 kc/s.	A1	H24
UFB	8,685 kc/s.	8,361 kc/s.	A1	H24
	12,950 kc/s.	12,535.5 kc/s.		
Odessa Radio	2,182 kc/s.	2,182 kc/s.	A3	H24
	3,310 kc/s.	3,180 kc/s.	A3	H24
	17,258.5 kc/s.	—	A3H	HX
	—	16,463.5 kc/s.	A3	HX
	22,706 kc/s.	—	A3H	HX
	—	22,080.5 kc/s.	A3	HX
	4,364.7 kc/s.	—	A3H	HX
Odessa Radio	—	156.80 mc/s	F3	H24
Odessa Port Control	156.70 mc/s.	156.70 mc/s.	F3	H24
Odessa Pilot	156.70 mc/s.	156.80 mc/s.	F3	H24
Odessa Inflot (Shipping Agency)	166.65 mc/s.	156.00 mc/s.	F3	H24

Traffic and storm signals are exhibited at the port signal station located on quay No. 2 of Quarantine Mole.

RADAR: Shore-based radar provides positioning and radio-assisted pilotage in poor visibility for inward and outward going ships, on request.

TUGS: Tugs meet vessel in place indicated by Master through Pilot.

BERTHING: 38 berths available with depths alongside from 7 m. up to 12 m.

STEVEDORES: Portal electric cranes of up to 45 tons capacity are operated on the quays by the warehouses. There are grain-loaders and floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intraport transport.

Opening and closing of mechanised hatches is always done by the ship's crew.

Opening of hatches on arrival and closing of non-mechanical hatches after loading of cargo has been completed, is done by ship's crew.

Opening and closing of non-mechanised hatches in the course of loading or unloading is done by port workers.

MEDICAL: Advance notice for medical attendance required. Notice should be given to Inflot. Hospital facilities available in case of emergency.

TANKERS: No reducing pieces necessary. Oil slop facilities available. The Oil Harbour is situated in the Northern part of the port (the inner roads), Northward of Rabochaya Harbour which is formed by a "T"-shaped mole extending E.S.E. off-shore. The bottom of the Eastern side of the mole is dangerous, therefore vessels are recommended not to approach it closer than 100 m.

DENSITY: Average density 1.0012 varying with season.

FRESH WATER: Fresh water may be supplied ex shore or ex water barge. Minimum quantity ex barge 15 tons.

FUEL: Bunkers can be supplied, and to be ordered 72 hours before arrival.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: See "Stevedores".

CUSTOMS ALLOWANCE: Tobacco. No limits on board vessel, but when going ashore not more than 1 or 2 packs. Wine and/or spirits not to be taken ashore.

CARGO GEAR: All cargo gear must have certificates for maximum weight capacity.

IDENTIFICATION CARDS: Necessary.

CONSULS:

Bulgarian Consulate tel. 66-60-92
Indian Consulate tel. 22-43-33
Cuban Consulate tel. 25-14-69

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Available.

REPATRIATION: Can be arranged.

AIRPORT: Distance to airport 10 miles. Direct airlines with several socialist countries and with the rest of the world through Moscow. Planes fly to Moscow 3 times a day.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: Work can be arranged on below mentioned holidays through Sovfracht, Moscow, at special rates. Holidays: 1st January, 8th March, 1st and 2nd May, 7th October, 7th and 8th November.

POLICE/AMBULANCE/FIRE: Police (Militia), 02 from town; 902 from port.

TELEPHONES: Telephones may be installed on board.

SERVICES: Tank-cleaning equipment available.

SHORE LEAVE: Crew members allowed to stay ashore till midnight. Master without limitation.

DELAYS: Vessels berthed in turn.

AUTHORITY: The Port of Odessa Authority.

AGENT: The port of Odessa Main Maritime Agency "Inflot". Postal address: 1 Vakulenchuk Square, Odessa, V-4 U.S.S.R. Cables "Inflot Odessa". Tel. 22-39-02, 293-37-81, 293-38-01; Telex 185.

ONEGA: 63.54 N. 38.06 E. (See Plan Book)

GENERAL: The port of Onega is situated on the right bank of the Onega river (3–4 miles up from the mouth), flowing into Onezhsky Bay off the White Sea.

Port open for navigation for about 6–7 months per year, starting from May. In Autumn, when the river is covered with ice, assistance of ice-breaker is required but may not be rendered regularly.

Opening and closing of the port for navigation as well as turn and order of entering the port is usually regulated by the Port Authorities.

Changes of water level in the river depend on tide, spring floods and effects of the wind.

The tide is semi-diurnal with two high and two low waters a day. At the Onega river mouth the range of the tide at mean springs may reach 2.7 m.

The rises of the water level are due to North-westerly, Northern and North-easterly winds. The falls of the water level are usually caused by South-easterly, Southerly and South-westerly winds.

The Onega river becomes frozen over at the beginning of November. Ice begins to form in October and usually breaks up at the end of April or early May.

A vast area of shoal waters is situated at the mouth of the Onega river.

Access into the Onega river is by the Karelsky Fairway. Vessels drawing up to 6.1 m. may pass through it at high water.

Since depths in the river vary, Masters are recommended to get in touch with the Harbour Master to make enquiries about the existing least depth in the fairway before entering the river.

The port specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. A Pilot should be ordered by the Master 24 hours prior to arrival at the Letny Orlov Pilot Station. A Pilot meets a vessel at a distance of 0.7 mile Westward of the Letny Orlov Point.

ANCHORAGE: Vessels drawing up to 2.4 m. can obtain anchorage in the Town roadstead below the Severoles wharf. The roadstead situated opposite timber mill No. 32 – 44 can be used as anchorage by vessels drawing up to 3.55 m.

During winds blowing from the North-westward vessels are recommended to anchor in the Petchak area of the Solovetskie Islands, with depths of 10 m. at 1 mile distance offshore.

During Southerly winds of 5-6 force, a safe anchorage with depths of 10 m. can be obtained in the Konyukhov Inlet, 1 mile offshore.

In case of North-westerly storms, vessels lying on the Karelsky roads should anchor in the Purnema area with depths from 6 m. to 10 m. where an anchorage light buoy is installed (64° 20′ N., 37° 27′ E.).

The recommended anchorages for vessels proceeding to the port of Onega along the fairway are situated in the following places:

1. On the line of the Town of Onega leading marks and on the beam line of the front mark of Pikhnemsky No. 2 leading line. Depths are from 3.7 m.–4 m., the bottom – mud and small stone.
2. In the area of the Onega river, a short distance Northward of the town of Onega leading marks, opposite the Export quay. The least depth in the area is 4 m., its length – 700 m., the bottom is mud and small stone.
3. Southward of the Pristansky (Quays) leading line but not passing over the line of the Pristansky Sekushchy (Quays Crossing) leading marks to the Eastward of it. The depths are from 3 m. – 3.7 m., the holding ground – mud, small stone and stone.

RESTRICTIONS: Vessels having draft not more than 3 m. may enter port at any time, but with draft more than 3 m. only 1 hour before high water.

The speed of vessels having the maximum draft should not exceed 8 knots. The movement of vessels within the port area is not allowed during restricted visibility.

MAX. SIZE: The max. permitted draft is usually announced at the beginning of the navigation season after sounding of the fairway has been accomplished. It varies from 5.1–6.4 m. Max. permitted length is 124 m.

HEALTH: Alongside or on the Roads all vessels coming from aboard inspected by Sanitary Office representative. If no diseases, vessel obtains free pratique. If vessel enters directly after calling at another Russian port, pratique automatic.

RADIO: Besides Murmansk and Archangel, Onega Radio (UZS), 500 kc/s.; VHF of pilot office at port of Onega (Channel 16).

Vessels can establish radio contact through the port radio station Onega Radio operating 24 hours a day on the following frequencies:

Call sign	Frequencies (kHz) Working	Frequencies (kHz) Calling	Type of transmission	Time of Work	Remarks
UZS	500	500	A1	H24	
"Onega-Radio – 1" ("Inflot Agency")	156.8*	156.8*	F3	H24	Operates during navigation only
"Onega-Radio – 2" (Port Control)	156.8*	156.8*	F3	H24	On request
"Onega-Radio – 3" (The Harbour Master's Office)	156.8*	156.8*	F3	H24	Operates during navigation only

*Frequencies are given in mHz.

The Onega storm signals station is located on the roof of the Harbour Master's office. Day signals warning about forthcoming storms and strong winds in the Onega Bay area are exhibited at mast of the signal station.

TUGS: The number of tugs required for mooring/unmooring and shifting berths is determined by the Master after having consulted the Pilot. Tugs should be ordered 6 hours prior to leaving the port for sea.

BERTHING: Depths at the port berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds. Loading of timber usually by ship's gear.

STEVEDORES: No particular ETA advices to stevedores/shippers. Loading of timber usually carried out by ship's winches at average rate of 24 stds. per hatch per working day.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available. Usually delivered by tankers.

FUEL: Availability not guaranteed.

GANGWAY/DECK WATCHMEN: Usually by ship's crew.

OPENING/CLOSING HATCHES: In accordance with "Soviet Wood" charter-party conditions.

CUSTOMS ALLOWANCE: No restriction on quantity, but nothing to be taken ashore.

IDENTIFICATION CARDS: Only Seamens Books required.

REPAIRS: Small repairs only.

REPATRIATION: Subject to visa formalities.

AIRPORT: Nearest at Archangel.

TIME: GMT plus 3 hours. (All the year round).

HOLIDAYS: See "Archangel".

SHORE LEAVE: Allowed up to midnight.

AUTHORITY: The Port of Onega Authority.

AGENT: A branch of the port of Archangel, Main Maritime Agency "Inflot" at the port of Onega. Postal address: 164880 – The Port of Onega – Archangel Region, U.S.S.R. Cables "Inflot Onega". Tel. Timber Mill Switchboard 33–33, "Inflot".

POTI: 42.09 N. 41.39 E. (See Plan Book)

GENERAL: The port of Poti is situated 2 miles North of the Rioni river mouth and on the S.E. coast of the Black Sea.

Port open for navigation all the year round.

Changes of the water level in the port area are caused by the winds and usually reach 0.6 m.

The max. range of the water level observed in the river is 0.9 m.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Radio 96, 48 hours prior arrival to Port Controller and Inflot Agency advising ETA, description and quantity of cargo, location and weight of heavy lifts, if any, number of passengers, ship's length and draft, as well as any services required. Confirmation of ETA required 4 hours prior arrival. Inflot will arrange Pilot basis above information.

Pilot will board vessel in the outer roads at 5 cables length from the Poti light buoy. (42° 09′ N., 41° 37′ 07″ E.).

The Harbour Master will give the Master of a vessel appropriate instructions if the Pilot is not able to disembark in the outer roads due to stormy weather or heavy waves.

ANCHORAGE: In outer port which is protected by Novy Severny, Yuzhny, and Zapadny Moles, and by Zapadny Breakwater. Safe anchorage for deep drafted vessels, except in periods when "Tyagun", a strong variable current with surge, occurs, with winds from N.W., W., and S.W.

The outer roads are bounded by two parallels – 42° 12′ N. and 42° 08′ N., by the meridian of 41° 35′ E. and the coast line.

The roads are open to winds blowing from the sea. Therefore, in the event of stormy weather vessels are recommended to leave anchorage in the outer roads for sea.

Protected by the New Northern, Southern and Western moles the port ensures a good anchorage for deep-drafted vessels, except periods when North-westerly, Westerly and South-westerly winds form a strong, variable current with surge ("Tyagun"). Strong Westerly, South-westerly and Easterly winds make the entry to the port more difficult.

A good anchorage with depths of 10 m. to 30 m. can be obtained at a distance of 1.3 miles N.W. and 1.1 mile West of the head of the Western mole.

Vessels are prohibited from anchoring in the S.W. part of the Southern Harbour and in the centre of the Inner Basin.

RESTRICTIONS: Vessels are prohibited from entering the port when the entrance and the leading lights are covered with fog.

Vessel's speed shall not exceed 4 knots in the port areas marked by navigation marks.

There are no restrictions for night entry.

MAX. SIZE: The max. permitted draft for entry to the port is 9.4 m. and the length from 170 m. to 190 m.

HEALTH: Free pratique automatic for vessels from another U.S.S.R. port. Other vessels are boarded on arrival.

RADIO: Vessels can establish radio contact through the port radio station Poti Radio operating 24 hours on the following frequencies:

Call sign	Frequencies (kHz) Working	Frequencies (kHz) Calling	Type of transmission	Time
UVB	500/421	500/425	A1	H24
"Palmira" (Port Control)	156.8*	156.8*	F3	H24
"Fontan" (CPR)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

**CPR – Central Port Radio Station.

Traffic signals for vessels entering and leaving the port are exhibited at the signal mast located at the head of the Northern mole.

BERTHING: The port of Poti comprises three harbours: the Yuznaya (Southern), Severnaya (Northern) and Vnutrenniaya (inner) harbours. 15 berths in port, with depths up to 8.35 m. alongside.

Berthing in the port can be effected with tug assistance only.

The berths of the port, with depth alongside up to 9.75 m., are equipped to handle general and bulk (ore, coal) cargoes, mineral oil products, metals, fruits, vegetables, etc., as well as passenger traffic.

Portal electric cranes of up to 20 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 100 tons.

MEDICAL: Qualified medical service is available free of charge, including dispensary and hospital treatment.

STEVEDORES: Arranged by Inflot.

DENSITY: About 1015, variable with season.

FRESH WATER: Fresh water supplied ex shore to ship directly or ex water barge in boundaries of port.

FUEL: Bunkers in small quantities are available. Fuel in quantities over 500 tons will be supplied if an order is placed not less than 5 days prior to a vessel's bunkering. Bunkers are delivered by barges.

CUSTOMS ALLOWANCE: No restriction on quantities but nothing to be taken ashore.

CONSULS: See "Odessa".

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

AIRPORT: Nearest at Odessa.

TIME: GMT plus 4 hours all year round.

HOLIDAYS: 1st January (New Years Day); 8th March (International Women's Day); 1st, 2nd May (Workers' International Solidarity Day); 9th May (Victory Day); 7th, 8th November (Anniversary of October Revolution); 5th December (U.S.S.R. Constitution Day).

POLICE/FIRE/AMBULANCE: Police service, tel. 0-2; Ambulance, tel. 0-3; Fire Service, tel. 0-1.

SHORE LEAVE: Crew members allowed ashore up to midnight.

AUTHORITY: The Port of Poti Authority.

AGENTS: The Port of Poti Maritime Agency "Inflot". 52 Lenin Street. 384691 – Port of Poti, U.S.S.R. Cables: Inflot Poti. Telephones: 9-32-27; 9-33-48.

PYARNU: 58.23 N. 24.29 E.

GENERAL: The port of Pyarnu, a sea fishing port, is situated in the N.E. part of the Riga Bay, at the estuary of the Pyarnu river falling into the Pyarnu Lakht.

Vessels, with a draft of 4.5 m. can reach the port by the channel about 2.5 mile long and about 60 m. wide.

At the estuary of the Pyarnu river the channel is protected by two moles extending S.W. from the shore. Depths at the berths are of up to 5 m. Changes of the water level within the port aquatorium are due to tides caused by winds.

Vessels proceeding to the port by the channel are recommended to have sufficient keel clearance bearing in mind requirements of good sea practice. The pilotage is carried out with due regard to the existing water level compared usually with the mean water level at the Kronstadt tide-gauge. Data of the exact depth of the channel can be obtained from the Harbour Master's office. The harbour of the port is usually frozen over from November till April. During mild Winters the port is open for navigation all the year round.

PILOTAGE: The port of Pyarnu has no special Pilot service. In view of this Pilots for entry or leaving should be ordered at the port of Tallinn Harbour Master's office through maritime Agency "Inflot" at the port of Tallinn. Pilots embark at the port of Pyarnu roadstead.

ANCHORAGE: The port of Pyarnu roadstead occupies the whole of the middle part of the head of the Pyarnu Lakht limited by the 5 m. line.

When in the roadstead vessels may anchor on both sides of the Pyarnu-Morskoi leading line, beyond the boundaries of the fishing areas. The holding ground is good. The roadstead is sheltered from winds of all directions, except those blowing from the South and S.W.

Masters should bear in mind that there are a lot of fish nets laid in the Pyarnu Lakht. The boundaries of the fish net prohibited areas for navigation of merchant vessels are marked on the charts.

RESTRICTIONS: All traffic of vessels both in the harbour and in the approaches to the port is controlled by the Harbour Master's office, by a Master on duty.

Navigation in the approaching channel is allowed day and night, in turn, but only in one direction at one time.

It is prohibited for vessels to pass by each other and pass by vessels keeping the leading marks of the approaching channel in line as well as to cross the channel.

The priority to navigate in the channel is given to vessels leaving the harbour. In this case vessels proceeding to the port must give way to outgoing vessel not preventing her maneouvring. The turn of movement in the channel is stipulated by the port controller but the traffic of vessels itself is controlled by the Harbour Master's office.

Vessels navigating both in the channel and in the harbour must proceed at a moderate speed to avoid the possibility of causing waves.

If winds over force 6 Beaufort scale entry to the port, leaving the port and shifting berths is allowed by the Harbour Master or a person in charge only.

RADIO: Communication can be effected through the port of Pyarnu radio station.

Call sign	*Frequencies (kHz)* *working*	*calling*	*Type of trans-mission*	*Time of work*	*Remarks*
RKDF	500	500	A1	00.00— 06.00	12.00— 13.00
	487	—	A1	20.00— 21.00	
"BASIS"	1650	1650	A3	H24	From 15 to 15 min. of every hour

Notice of arrival: All vessels proceeding to the port from the seaward should advise their ETA to the Port Controller. Masters should also advise vessels' particulars and the purpose of visit.

TUGS: Tugs should be ordered through the Port Controller's service. Towage of vessels within the port is prohibited if wind over force 6.

BERTHING: Vessels having draft over 4.5 m. cannot berth. During S.W'ly and Westerly winds force 8 and over, when in the port, the Master or his Chief Mate must be on board and have sufficient number of the crew on board in order to secure the vessel safely.

Berths of the port are equipped to handle vessels loaded with fish and fish products, salt, timber, rod metal and some other cargoes. There is a closed warehouse and an open concrete floor shed for storage of salt. The Port Authority plans to build a new cold store with administrative buildings.

TIME: GMT + 3 hours all year round.

AUTHORITY: The port of Pyarnu Authority.

AGENT: No "Inflot" Agency at the port.

RENI: 45.26 N. 28.18 E. (See Plan Book)

GENERAL: The port of Reni is situated at a distance 25 miles up from the Izmail Chatal Point on the left bank of the Danube river.

The port is open for navigation for about 317 days of the year. In severe winters ice-breaker assistance is required.

The Danube river and Kilia Mouth become completely frozen over only in severe winters, at the end of December or early January. Ice finally disappears in February or early March.

Changes of the water level are due to effects of the wind and spring floods.

Maximum rises of the water level are usually observed in April, May and June, maximum falls August, September and October.

Maximum range of the water level observed in the river is 4 m. – 6 m.

DOCUMENTS: Refer to beginning of U.S.S.R. Section.

PILOTAGE: Compulsory. All vessels proceeding from the Izmail Chatal Point up to Reni and vice versa must navigate under control of a State Commissioned Pilot.

ANCHORAGE: Vessels should anchor in the port roads with depths from 10 m. to 20 m. The holding ground is clay and mud.

RESTRICTIONS: There are no time restrictions for the entry to the port. Both draft and length of vessels are limited by depths and width of the Sulin channel.

RADIO: Vessels can establish radio contact through the port radio station Reni Radio operating 24 hours per day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time*
IJN-3 (Port)	489	468	A1	HX
"Reni Radio – 1" (Port Controller's Office)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

BERTHING: Tug assistance is not compulsory. Tugs are available if requested by Master.

The port is accessible for large ships. The berths with depths alongside of up to 8.25 m. are equipped to handle general and bulk cargoes, crude oil and oil products, grain and food products.

Cranes of up to 10 tons capacity are operated on the quays. Also there are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

FUEL: Available.

FRESH WATER: Can be supplied ex shore and by barges.

OPENING/CLOSING HATCHES: According to the custom of the port, opening and closing of hatches is carried out by the crew. But it can be carried out by the port workers for vessel's account, if required by the Master.

REPAIRS: Only minor hull and engine repairs can be carried out. There are no dry docking facilities.

CONSULS: None.

TIME: Local time: GMT plus 3 hours all the year round.

AUTHORITY: The Port of Reni Authority.

AGENT: The Port of Reni Maritime Agency "Inflot". Postal address: 192 Dunai Street, The Port of Reni, U.S.S.R. Cables "Inflot Reni". Tel. 3-47, 3-46.

RIGA: 56.58 N. 24.06 E. (See Plan Book)

GENERAL: A Baltic seaport, Riga is situated at the mouth of the Daugava (Western Dvina) river falling into the Gulf of Riga.

The water area of the port is formed by the lower part of the Daugava river from the mouth up to a railway bridge, thence by the Milgravis channel and Sarcandaugava Creek.

The roadstead of the port is situated at the mouth of the Daugava river.

The entrance channel with depths of 10 m.–11 m. leads across the river bar into the port.

The port is open for navigation all the year round, but ice-breaker assistance is required about 4 months of the year.

The Gulf of Riga is frozen over for quite a long time. On the coast of the Gulf, ice first appears in December and finally disappears in April. The middle part of the Gulf gets frozen over only in severe Winters and for a short period. Usually ice in this area is mostly drift ice.

Considerable changes of the water level may be caused by strong winds and variation in atmospheric pressure ("Seish" effects).

The range of the water level caused by winds depends on the force of the wind, direction and period of time it blows.

Most sharp rises and falls of the water level are observed at the mouth of the Daugava river. They may reach at times 1.3 m.-1.8 m. higher and 0.9 m.-1.1 m. lower than the datum at Kronshtadt.

The level of the water in the port usually depends on the ordinary water level in the Daugava river.

The max. rise of the water level caused by winds may reach 2 m. higher and fall – 1 m. lower than the mean water level observed over a period of many years.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Inflot will arrange Pilot on receipt of ETA at Daugavgriva Buoy, which to be given 96, 48, 24 and 4 hours prior arrival. Also advise with ETA details of cargo, last port of call, passengers if any, ship's draft and length.

Pilot meets vessel at receiving light buoy No. 1 Daugavgriva (57° 06′ N., 23° 57′ E.). In case of bad weather, when Pilot is unable to come aboard, vessel should follow in the wake of a Pilot boat, up to the mouth of the river, where Pilot will board vessel.

4 hours prior to arrival at this buoy the Master should advise his ETA by VHF, Channel 14, via CPR.

Vessels leaving the port should navigate under Pilot control to receiving buoy No. 1 Daugavgriva.

ANCHORAGE: The best anchorage can be obtained in the port of Riga roads, at a distance 4 miles off the Daugavgriva lighthouse, bearing 310° Westward of light buoy No. 1. Depths in the anchorage are from 22 m. to 35 m. The bottom is mud and sand. It is not recommended to come closer to the shore without a Pilot on board.

The port of Riga roads are situated N.W. of the entrance to the mouth of the Daugava river.

The roads are open to winds blowing between S.W. and N.E.; therefore, in Autumn, when these winds prevail, anchorage there is unsafe.

In periods when heavy waves in the roads are caused by fresh Northerly winds, vessels are recommended to leave the roads for shelter in the port or go to the open part of the Gulf of Riga.

The depths in the roads are from 15 m. to 30 m. Holding ground is good.

RESTRICTIONS: Permitted draft for the entry into port is between 7.5 m.-9.5 m. at the mean water level.

Entry to the Daugava river and the port of Riga is accessible for vessels having drafts ensuring safe passage across the river bar.

As a rule, vessels passing along the channel are requested to have keel clearance not less than 0.45 m.

The speed of vessels navigating in the Daugava river should not exceed 6 knots.

There are no restrictions as to length of vessel and time of entry to the port.

Large vessels laid up with ballast water are not allowed to shift berth during winds force 6 Beaufort scale and over.

MAX. SIZE: Max. permitted draft for vessels going to berths of the port for discharging is 9.75 m. in fresh water, if the water level is "O" datum at Kronshtadt.

Vessels having draft more than 9.75 m. are being discharged into barges in the inner road which has 2 mooring buoys, 3 miles from the mouth of the river. Max. permitted draft for vessels going to the inner road is 10.50 m. in fresh water, if the water level is "O" datum at Kronshtadt.

Also see "Shipmasters Report".

HEALTH: Pratique obtainable after vessels mooring when Health Officials visit vessel with Immigration and Customs Officers. Health Inspector to be informed of any medical assistance required.

RADIO: *Notice of Arrival:* In Winter when the Irben Strait and the Gulf of Riga are completely frozen over and ice-breaker assistance is required, vessels proceeding to the port of Riga should advise Harbour Master their ETA to the edge of the ice, vessel's ice classification and estimation in days for the expenditure of fresh water and fuel available on board to the moment of approaching the edge of the ice.

Vessels can established ship-shore radio contact via the port radio station Riga Radio, operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz) Working*	*Frequencies (kHz) Calling*	*Type of trans-mission*	*Time of Work*
UKB	500	500	A1	H24
UKB	489	468	A1	H24
UDH	4,236	4,184	A1	H24
	8,506	8,367	A1	H24
	13,070	12,547.5	A1	H24
"Riga Radio"	—	4,066.1	A3	HX
"Riga Radio" (CPR-Central	4,364.7	—	A3H	—
Port Radio)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

TUGS: Use of tugs is obligatory. The number of tugs depends on length of the vessel and place of berthing.

BERTHING: Berths of the port with depths up to 9.7 m. alongside are equipped to handle general and bulk (ore, coal) cargoes, metals, timber, grain, food products and passenger traffic.

Number of tugs to be ordered for entry assistance or for shifting berth is decided by Master in accordance with Pilot's recommendation.

Cranes of up to 45 tons capacity are operated on the quays and by the warehouses. Also, there are floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intra-port transport.

Opening and closing of hatches is usually done in accordance with conditions of Charter Party.

MEDICAL: All medical assistance available.

STEVEDORES: Arranged by Inflot who should be given necessary information in advance.

DENSITY: About 1002.

FRESH WATER: Only available ex-berth.

FUEL: Fuel is usually taken at the oil jetties. Bunkers may also be delivered to the roads or supplied by lighters at a berth during loading/unloading of non-inflammable cargoes.

GANGWAY/DECK WATCHMEN: Recommended. These duties normally performed by crew.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCE: No restriction on quantities, but nothing may be taken ashore.

IDENTIFICATION CARDS: Seaman's Book required.

CONSULS: None.

REPAIRS: Repairs possible for hull, machinery, radio and navigational equipment. Floating crane available, capacity 100 tons. All kinds of repairs for vessels up to 30,000 d.w.t. can be carried out.

REPATRIATION: Only subject to visa restrictions.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: 1st January, 8th March, 1st and 2nd May, 9th May, 7th and 8th November, 5th December.

POLICE/FIRE/AMBULANCE: Advise Inflot.

SHORE LEAVE: Crew allowed ashore.

SHIPMASTER'S REPORT: 1976:

On approaching the area where Irbenskiy Lt./VI should have been placed, it was found that the Lt./VI and buoys had been removed for the Winter season and replaced by spar buoys, although these could not be observed on the radar or visually due to the adverse weather.

Two other vessels were waiting for daylight transit of the channel, I also decided to wait for daylight due to a 5 fathom bank being recorded on the chart.

On entering the channel it appears to be very much wider than indicated on the chart also where the chart has the channel buoys in a straight line this was not so, although the alteration of the channel could have been due to the use of the Winter buoys.

In Baltic Pilot Vol. II vessels are allowed to enter at 26 ft. 3 in. This is incorrect as the maximum draft is now 32 ft. Vessels up to 37 ft. were at the anchorage, where they are lightened up to 32 ft. before proceeding into the harbour.

Two berths were being used for the discharge of grain, by shore cranes into wagons.

In the early hours of Sunday morning, 4th January, the temperature being −14° C, a thin film of ice formed in the harbour, this had disappeared by mid-afternoon. Except for this occasion no ice was seen at all in the Baltic, although the climate was very cold.

The Bond was not put under seal, but they were very strict on currency list, 3 copies being required, also the total amounts of each different currency is required.

AUTHORITY: Port of Riga Authority.

AGENT: The Port of Riga Main Maritime Agency "Inflot". Postal address: 6 Vilis Latsis Street, 226180-Riga, U.S.S.R. Cables "Inflot Riga". Tel. 33-15-37; 33-97-03. Telex 1157.

SOCHI: 43.34 N. 39.43 E. (See Plan Book)

GENERAL: The port of Sochi is an ice-free port, situated at the mouth of the Sochi river, S.E. of the Uch-Dere Point, in the Eastern part of the Black Sea.

The port is protected by the Caucasian chain of mountains from cold N.E. winds but it is open to winds blowing from Southerly and Westerly directions when heavy waves may roll over the port moles causing heavy swell in the harbour.

The port mostly handles passenger traffic.

There are passenger terminals, one of which serves hydrofoil ships only. About 3 million passengers visit the port yearly.

A cargo pier is equipped to handle fruit, building materials and cars. There are enclosed warehouses on the cargo pier and on one of the passenger terminals.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilot boat usually meets vessel at a distance of about 1 mile from the port. In the event of bad weather or restricted visibility, vessel should anchor or drift at a safe distance from the port until Pilot arrives.

ANCHORAGE: Deep drafted vessels may obtain anchorage in the outer roads Westward of the Northern mole. The depths in the roads are from 11 m. to 13 m.

Some distance Westward, in depths 20 m. – 23 m., there are mooring buoys which can be used during vessels' stay in the roads.

Anchorage can also be obtained at 1.3–1.5 mile distance S.S.W. of the Sochi lighthouse. Depths there are about 29 m. The bottom is mud with sand, and small stone closer to the shore.

Anchorages are open to winds blowing from the sea.

RESTRICTIONS: There are no time restrictions for entry to the port.

In case of stormy weather entry to the port is difficult due to the swell caused by heavy waves in the approach and in the narrow entrance to the port.

In the event of heavy surf vessels must anchor in the outer roads since entry to the port is impossible.

Entry to the port is not allowed during heavy waves over force 4 and winds over force 6 as well as during bad visibility.

During the Autumn-Winter period the port of Sochi cannot be used as shelter port, because lying in the port is dangerous due to the strong variable current ("Tyagun") usually caused by gales blowing between S.E. and N.W.

Under these circumstances the Port Authorities cannot guarantee safety to a vessel which, after having received a storm warning, did not make for sea, and bear no responsibility for the consequencies.

MAX. SIZE: The maximum permitted draft is 8 m., length 190 m.

RADIO: Vessels can establish ship-shore radio contact through the port radio station Sochi Radio, operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz) Working*	*Frequencies (kHz) Calling*	*Type of trans-mission*	*Time of work*
UZB	500/516	500	A1	H24
"Smena" (Port Controller)	156.8*	156.8*	F3	H24
"Sochi-Radio" (Radio Operator of the Port Controllers' Office.)	2,310	2,310	A3A	0800–2300

*Frequencies are given in mHz.

A signal station is located at the Sochi lighthouse from which visual signals are shown.

BERTHING: A vessel intending to enter port with tug assistance should keep the Sochi mid-channel leading marks in line ahead and stop the main engines in due time to allow vessel to come to the state of "no motion" at a distance of 1 mile from the port entrance. Only under these conditions is a tug allowed to approach a vessel and receive or cast off the tow rope.

Due to a small port area and heavy water streams caused by vessels' propellers Masters of vessels of 2,000 g.r.t. and over must order 1 tug for entering and leaving the port; for vessels of 4,000 g.r.t. and over 2 tugs are required. Shifting berth is allowed during winds not exceeding force 5 Beaufort scale. Opening and closing of hatches on dry cargo vessels is carried out by the crew; on passenger vessels cargo hatches are opened and closed by the port workers.

There are two portal cranes of 5 and 10 tons lifting capacity, 10 ton caterpillar cranes, fork-lifts and other cargo handling equipment.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at nearly all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours all the year.

AUTHORITY: The Port of Sochi Authority.

AGENT: A branch of the port of Novorossiysk Main Maritime Agency "Inflot" at the port of Sochi. Postal address: 1 Voykov Street, Sochi, 354000, U.S.S.R. Cables "Inflot Sochi". Tel. 99-05-86; 996-62-70. Telex 128.'

SUKHUMI: 42.57 N. 41.00 E. (See Plan Book)

GENERAL: A Black Sea passenger port Sukhumi is situated at the head of the Sukhumi Bay, 2 miles E.N.E of the Sukhumi Point. The port is open for navigation all the year round. Both the port itself and the Gulf are open to winds blowing from the sea.

Several berths of the port are equipped to handle passenger traffic.

The port area is bounded by the shore line and the imaginary line connecting the Sakhumi Point and the mouth of the Kelasuri river.

The port is visited by regular and cruise passenger vessels.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: A Pilot meets vessel in the outer roads. Compulsory for foreign flag vessels.

ANCHORAGE: Anchorages are situated in the outer roads on the Northern coast of the Sukhumi Bay, opposite the mouth of the Beslet river.

A good anchorage can be obtained at the line of the Sukhumi leading light marks. Depths are from 12 m. to 50 m. The bottom is mud.

Master should watch carefully the Sukhumi leading light marks when approaching the anchorage and cast anchor only at the moment when the leading light marks are in line or some small distance closer to the shore.

At 2 cables length seaward of the leading line, the depths increase sharply and reach 130 m.

Whilst waiting for a berth vessel should lie at anchor at the line of the Sukhumi leading light marks. This anchorage is unsafe during gales blowing from the sea.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night.

MAX. SIZE: The max. permitted draft is 7.6 m., length 180 m.

RADIO: Ship-shore radio contact can be established via the port radio station Sukhumi Radio operating 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	
Call sign	*Working*	*Calling*		*Time*
UFF	500/450	500/454	A1	H24
"Sukhumi Radio"	2182	2182	A3	H24
"Privet" (Port Control)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

Storm signals are exhibited at a signal mast located on the roof of the Port Authority's office.

BERTHING: Vessels of up to 190.0 m. in length are allowed to moor at the new passenger pier. The permitted draft is restricted by the depth of water (7.8 m.). Vessels are not allowed to moor to berths during dense fog and in restricted visibility when navigational lights and the current indicator on the passenger berth are not visible. In this event vessel should anchor and disembark passengers in the outer roads.

When mooring, Master should bear in mind the direction of the current and the effect on the mooring angle of vessel.

By day, the direction of the current indicated by a sparbuoy located at the head of the passenger pier, and at night, by lights exhibited from the elevation of the front leading light.

A green light shown lower than the front leading light indicates Easterly current, and a red light, current of Westerly direction.

The rate of the current is usually determined by the Master himself.

Due to the constant influence of the current, mooring is usually effected without tug assistance.

Masters of vessels moored at the port berths should keep the main engines ready bearing in mind the fact that the outer roads of the port are not protected from the effect of winds.

There are no portal cranes on the passenger pier. Handling of cargo is done by caterpillar with lifting capacity of 12 tons.

FUEL: Can be supplied by lighters.

FRESH WATER: Supplied ex-shore.

REPAIRS: Not possible.

TIME: GMT plus 4 hours all the year.

AUTHORITY: The Port of Sukhumi Authority.

AGENT: A branch of the Port of Batumi Main Maritime Agency "Inflot" at the Port of Sukhumi. Cables "Inflot Sukhumi".

TALLINN: 59.26 N. 24.43 E. (See Plan Book)

GENERAL: A Baltic seaport situated in Tallinn Bay. Year-round navigation is possible. Tallinn Bay is usually frozen over in severe Winters only. In the Winter months the port of Tallinn is kept open for navigation by ice-breakers. The tidal range in Tallinn Bay is of very small account. The difference of the water level in the Bay is due solely to the effects of the wind. A rise of the water about 0.4-0.5 m. from mean water level is observed during N.W. and Westerly winds. The fall of the water is caused by S.E. and Easterly winds. It usually reaches 0.2-0.4 m. below the mean water level.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. 24 hour Pilot service is available. Pilots board vessels at the Tallinn Madal Bank (Lat. 59° 42′ 05″ N., Long. 24° 38′ 00″ E.). In case of stormy weather vessels should follow pilot boat to a sheltered position where Pilot is able to embark/disembark or use the assistance of the shore radar station. Pilot should be ordered by VHF through the "Inflot" Agency not later than 2 hours prior to arrival at the Pilots' boarding place.

ANCHORAGE: Anchorages are situated in the port of Tallinn outer roads. One of them, with depths of 14.0 m. – 22.0 m., is situated 2 cables to the North of the head of the Northern Mole; the other Eastward of the Tallinn leading line and N.E. of the mouth of the Pirita river. Depths are from 12.5 m. up to 31.0 m.

RESTRICTIONS: Vessels can enter or leave the harbour through the Northern or Southern entrances. Entry to the port through the Northern entrance can be used by vessels having draft of up to 8.5 m. The Southern entrance can be used by vessels having draft of up to 7.0 m. Depths of water in the Southern entrance area can vary due to the movement of deposits. Vessels can enter or leave the port at any time of day and night.

MAX. SIZE: LOA 155 m., width 22.0 m. and draft 8.5 m.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting pratique which will be given on arrival.

RADIO: All vessels when approaching the Port of Tallinn should establish radio contact via Tallinn Radio port radio station which operates 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	
Call sign	*Working*	*Calling*		*Time*
UNS	500	500	A1	H24
UAH	6485	6276.75	A1	H24
UAH	8476	8369	A1	HX
	12723	12541.5	A1	HX
	17077	16732	A1	HX
	4285	4185.5	A1	HX
"Tallinn Radio"	2182	2182	A3	H24
"Tallinn Port"	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

The movement of vessels within the port and in the outer roads is controlled by the Traffic Control Post located at the Port of Tallinn Authority building.

TUGS: Tugs assistance available for berthing subject to Pilots advice. Tugs can be ordered through Agents. Ship's lines normally used. When tugs are ordered in advance the cost will be charged to the vessel whether tugs are used or not.

BERTHING: Vessel will not be allowed to berth unless main engines and steering mechanism are in good working order. All vessels in port are required to fly their national flags between 0800 hrs. and sunset. On holidays and special occasions vessels may be expected to dress their ships if requested by Port Authorities.

The berths of the port with depths alongside up to 9.5 m. are equipped to handle general bulk and liquid (chemical products) cargoes, sugar, cement, metals, foodstuff, etc., as well as passenger traffic. Covered warehouses with mechanical equipment and concrete floor sheds are available.

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

CRANES: Loading and unloading is usually done by shore mobile electric cranes of up to 32 tons capacity, by floating cranes of up to 100 tons capacity and by other cargo handling equipment.

TANKERS: Tankers moor at berth No. 19, length 207 m., depth alongside 9 m. No slop facilities available. Tankers are normally required by the charter party to reserve a slop tank on board. Discharge of tank washings prohibited within 100 miles of the coast.

FRESH WATER: Supplied by pipe-lines at all berths.

FUEL: Bunkers are available and can be taken from the quays or delivered by lighters.

FIRE PRECAUTIONS: Masters of tankers are presented with a copy of Safety Regulations by the Agent on arrival.

GANGWAY/DECK WATCHMEN: Compulsory to maintain a gangway watch by ship's crew.

OPENING/CLOSING HATCHES: Normally opened and closed by ship's crew. In bad weather hatch covers are put on by stevedores.

CERTIFICATES: At first Russian port of call, certificates of tonnage and those required by international convention will be required for examination.

CUSTOMS ALLOWANCE: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: No local representation.

REPAIRS: Only minor repairs may be effected at machine shop ashore.

TIME: GMT plus 3 hours all the year round.

HOLIDAYS: All holidays are worked by stevedores.

TELEPHONES: Connection on board vessels can be made free of charge at berths number 7, 8, 9, 10, 13, 14, 15 and 16.

AUTHORITY: The Port of Tallinn Authority.

AGENT: The Port of Tallinn Shipping Agency "Inflot". 54-a Tuukri Street, 200106 – Tallinn, U.S.S.R. Cables: "Inflot", Tallinn. Telephones: 4-85-12; 4-88-25.

TUAPSE: 44.06 N. 39.04 E. (See Plan Book)

The port of Tuapse is situated between the mouths of rivers Tuapse and Pauk and the depths of 40 m. Year round navigation.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory in and out, possible at any time. Vessels await Pilot at anchorage. Pilots board and leave vessels in the outer roads behind the Pervomaisky Breakwater if the sea (swell) up to force 4. When leaving harbour during bad weather Pilot leaves vessels in the inner roads. Communication with Pilots on VHF channel 12.

ANCHORAGE: Depths up to 40 m. Position of anchorage, bearing to the entrance red light and distance is radioed by Harbour Master through Agent to each vessel prior to arrival (unless berth available). When at anchor, vessel shall keep VHF watch on VHF Channel 16.

MAX. SIZE: See "Berthing".

HEALTH: Sanitary officer boards on arrival or when berthed. No automatic free pratique. In the event of fever or any suspected epidemic disease onboard Masters shall inform the sanitary service immediately on arrival.

RADIO: All messages to Agent via Tuapse-radio, call sign UVW, calling frequency 500 kHz, working 430 kHz, A1, H24. VHF call sign "Tuapse-radio", calling 156.8 mHz (Channel 16), A3, H24, working frequency according to indication by shore radio operator. Phone connections to any port service.

Warning: Use of ship's MW and SW radio transmitters within 12 miles from the port is prohibited, except for distress, emergency and safety signals. When VHF unavailable, communication with UVW on MW band is allowed.

Arrival Advice: Masters shall send 96/72/48 and 24 hours ETA notices to "Inflot" agency, advising also quantity of ballast onboard and time required for deballasting ashore. Masters shall also advise quantity and grade of cargo, stowage plan, LOA and maximum draft, number of passengers, health condition of crew.

TUGS: Tugs are compulsory for berthing/unberthing or shifting, as well as when lying at inner anchorage. Tugs normally join vessels at the buoy marking the Pervomaisky breakwater. Ship's lines.

BERTHING: At any time with winds up to 12 m/sec. The port consists of 2 harbours, with 3 berths for dry-cargo ships (max. draft 11 m. (brackish water), LOA up to 220 m.) and 6 berths in the oil harbour for tankers (max. draft 12 m. (brackish water) LOA up to 250 m.). Oil harbour, shore cargo manifolds diameter 250/400 mm. All dry-cargo berths are equipped with portal cranes of 10 tons capacity. Loading/unloading usually by shore cranes. The port is not sheltered for vessels during strong S.E./S.W. winds. During strong gales from these directions lying in port is dangerous due to strong swell, especially the one called "tyagun" In this event vessels must leave harbour when recommended by the Port Authority. When lying in port the main engines shall not be immobilised without special permission by Harbour Master.

MEDICAL: First medical aid at any time; hospital facilities available.

DENSITY: 1011/1015.

FRESH WATER: Available from any berth, road delivery not possible.

FUEL: Fuel oil and gasoil available at oil berths or ex-lighters. Masters giving 72 hours notice.

FIRE PRECAUTIONS: Conventional rules for oil ports.

POLLUTION: Marine pollution shall be avoided by all means, specially due to proximity of health resort area. Any pollution is subject to heavy fines.

OPENING/CLOSING HATCHES: Normally by crew.

GANGWAY/DECK WATCHMEN: Not required. Gangways shall be lighted up and protected by nets.

CUSTOMS ALLOWANCE: No restrictions. Export/import of Soviet currency is forbidden.

IDENTIFICATION CARDS: Seaman's books are sufficient.

CONSULS: None.

REPAIRS: Emergency repairs. Floating docks subject to special arrangement.

REPATRIATION: Possible in emergency.

AIRPORT: Sochi – 120 km. Served by regular airlines.

TIME: GMT plus 3 hrs.

HOLIDAYS: 1st January, 8th March, 1st, 2nd May, 9th May, 7th October, 7th, 8th November. Work during holidays can be arranged.

TELEPHONES: Available for all vessels.

SURVEYORS: Leading world classification societies are represented by the Register of the USSR.

GENERAL: Deballasting or discharge of tank-washings facilities, craft for discharge of bilge water. Food waste and garbage, etc. shall be collected into special containers placed on board upon berthing. Laundry facilities. No boats, rafts, etc. shall be launched from vessels without special permission. All mooring ropes to be provided with rat-guards immediately upon mooring or shifting berths. Local representative of the Insurance Company of the USSR (Ingosstrakh) Ltd., and experts of the USSR Chamber of Commerce and Industry.

SERVICES: Compass adjusting and radar repairs.

SHORE LEAVE: Crew allowed ashore until midnight.

DEVELOPMENTS: Reconstruction works including dredging underway.

FIRE/AMBULANCE/POLICE: Telephones: Fire – 301; Fire-boat – 231; Ambulance – 003; Militia (Police) – 002. *Office hours:* 8 a.m. to 4 p.m., Saturday 8 a.m. to 2 p.m.

AUTHORITY: Tuapse Port Authority.

AGENT: "Inflot," Maritime Agency, 25, Gagarin Str., 352800, Tuapse. Cables: Inflot. Telex: 865. Phones: 71322, 71836, 71832, 71288, 71427.

VENTSPILS: 57.24 N. 21.32 E. (See Plan Book)

GENERAL: A Baltic Sea port, Ventspils is situated at the mouth of the Venta river. Navigation is all year round.

There are periodical alterations in the water level of the Venta river, chiefly due to the effects of the wind. The rise of the water level is usually due to moderate Westerly winds, and the fall is caused by Easterly winds.

The maximum rise of the water level in the Venta river is at the time of Spring floods.

The port of Ventspils comprises the Ventspils sea channel and a water area from the mouth of the Venta river up to the railway bridge. The port harbour can be entered by vessels with the maximum permitted draft in the bar approaching channel of 9.5 m. – along leading line No. 1 and 11 m. – along leading line No. 2 (at the datum at Kronshtadt for fresh water).

Since after strong gales depths of the approaching channel at the port entrance vary considerably due to alluvial of sand, the fairway of the channel is dredged from time to time.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage is compulsory both for entering and leaving the port.

Pilots board and leave vessels in the areas of Reception buoys "Ventspils-1" and "Ventspils-2". Pilot service is available round the clock when entering and leaving the port.

ANCHORAGES: Anchorage in the outer port road for vessels loaded with explosive or inflammable cargoes is allowed in area No. 86-a, for all other vessels – in area No. 86. Both areas are announced by the U.S.S.R. Notices to Mariners. Depths in the anchorage are from 15 m. to 18 m., the bottom is sand.

The Master of a vessel has to inform the Port Administration of the exact position of the anchorage stating the bearing and the distance from the North breakwater lighthouse.

The anchorage in the outer road is not safe during strong Westerly winds therefore vessels are recommended to drift while awaiting entry to the port or to go to sheltered places situated in the areas of the Kolkasrags point and the Gotland islands.

RESTRICTIONS: The maximum permitted length for vessels piloted through the Venta river channel is 185 m. when the draft is not more than 7.5 m. When a vessel's draft exeeds 7.5 m. her length should be not more than 160 m.

A valid ice-class certificate is required for entry to the port when the fairway is covered with ice.

When proceeding along the fairway and in the Venta river from the entrance to the Avant-port up to the railway bridge speed not to exceed 5 knots.

HEALTH: Pratique obtainable after mooring. Sanitary Inspector visits vessel after mooring together with Immigration and Custom House Officer. If medical care required the Sanitary Inspector has to be informed.

RADIO: Radio contact should be established via the Ventspils Radio port radio station which operates 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *working*	*calling*	*Type of transmission*	*Time of work*
UNI	500	500	A1	H24
"Ventspils-Radio"	2182	2182	A3	H24
"Ventspils-Radio"–7	156.8*	156.8*	F3	H24
"Nadzor"	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

Vessels' traffic both in the roads and in the harbours is controlled by signals exhibited at the Signal Station located on the Pilot tower, at the base of the Southern mole.

TUGS: Use of tugs for vessels of 100 m. in length and over when mooring and unmooring at berths situated in the Venta river, as well as oil piers, is compulsory.

Normally tugs join vessels within the port area.

BERTHING: Berthing of vessels and shifting berths is carried out round the clock. Vessels having length over 140 m. and draft over 7.6 m. when approaching the port through the Venta river channel are allowed to enter or leave the port, moor and shift berth during the day only and when winds do not exceed force 5.

Cargo berths with depths alongside up to 10 m. situated on the right bank of the Venta river are equipped for handling general and bulk cargoes, metals and timber. Berths of the Avantport are equipped for handling crude oil and oil products. They can receive vessels with the maximum permitted draft of up to 11 m. (at the datum at Kronshtadt). There are covered warehouses and open concrete floor sheds in the port.

There are enclosed warehouses, open concrete floor sheds and a grain elevator.

Quays are equipped with electric cranes of up to 45 tons capacity. There are floating cranes of up to 100 tons capacity, cargo handling equipment for bulk cargoes and machinery.

Opening and closing of hatches is normally done by the ship's crew.

STEVEDORES: Master's and/or shipowner's information of cargo details, stowage – especially for ships with inward general cargoes – is required in proper time. Information has to be addressed to Inflot Ventspils.

MEDICAL: Hospital facilities available. Advance notice desirable, however depends on kind of sickness. Particular inoculations, vaccination/fever certificates etc. not required.

TANKERS: All grades oil loaded by shore loading hoses in diameter of 200, 250, 280, 300 and 350 mm. Total 4 berths all fitted with deballasting installation for slops. Max. draft from 30 up to 36 ft.

DENSITY: In port about 1,002.

FRESH WATER: Fresh water available, delivered from shore or by barge.

FUEL: All grades available subject to prior inquiry. Bunkers can be taken from the oil-jetty or supplied by lighters.

GANGWAY/DECK WATCHMEN: Service of watchmen recommended; however, Captain's option.

OPENING/CLOSING HATCHES: Opening and closing of hatches normally is carried out by crew; however, at the Master's request may be carried out by shore men.

CERTIFICATES: Required to be on board:
Intern. Tonnage.
Intern. Class.
Load-line.
Safety Equipment.
Intern. Radio.
Certificates of Deratisation.

CUSTOMS ALLOWANCE: There is no restriction for crew use and bond locker is not sealed.

IDENTIFICATION CARDS: Seaman's Book required.

CONSULS: No Consulates.

REPAIRS: Small deck and engine repairs can be carried out.

DRY DOCKS: None.

REPATRIATION: Repatriation of crew left behind a vessel in hospital is arranged by other tramp-ships with Captain's consent. No facilities exist for effecting crew changes.

TIME: GMT plus 3 hours. No alterations during year.

HOLIDAYS: 1st January (New Year's Day); 8th March (International Women's Day); 1st and 2nd May (May Day Holidays); 9th May (Victory Day); 7th and 8th November (The Great October Socialist Revolution Day); 5th December (The U.S.S.R. Constitution Day). Cargo work never stopped on Holidays.

POLICE/AMBULANCE/FIRE: If required have to be ordered through Maritime Agency "Inflot".

TELEPHONES: No arrangements exist for placing telephones on board.

SERVICES AVAILABLE: Tankers' deballasting installation for slops; service for radar and VHF repairs; compass adjusting; workshop for ordinary deck and engine repairs; ship chandler service; bunker supply.

SHORE LEAVE: Crew members allowed ashore.

SHIPMASTER'S REPORT: 1976.

Anchorages:

Tanker: bounded by positions,

57° 28.4′ N.	21° 27.3′ E.
57° 29.7′ N.	21° 29.2′ E.
57° 28.2′ N.	21° 31.2′ E.
57° 27.2′ N.	21° 29.3′ E.

Cargo:

57° 25.3′ N.	21° 26.8′ E.
57° 28.0′ N.	21° 26.4′ E.
57° 26.1′ N.	21° 29.0′ E.
57° 26.7′ N.	21° 25.8′ E.

Buoyage:

No. 2 B.W. Conical Fl. 5 sec. (Approx. pos. 57° 25.7′ N. 21° 29.85′ E. to be expunged.

New Buoys:

No. 2	Fl.W. 5 sec.	Pos.	57° 25.6′ N.	21° 28.3′ E.
No. 3	Fl.W. 3 sec.	Pos.	57° 24.1′ N.	21° 30.65′ N.
No. 4	Fl.R. 3 sec.	Pos.	57° 25.16′ N.	21° 30.82′ E.

In harbour; No. 4 Fl.R. Con. and Red Conical Buoy about 2 cables E × S to be expunged.

Oil Piers: 3 in number.
No. 1 pier, berths Nos. 28 and 29 light outer end Qk. Fl.W.
No. 2 pier, berths Nos. 30 and 31 light outer end Qk. Fl.Or.
No. 3 pier, berths Nos. 32 and 33 light outer end Qk. Fl. Blue.

Depths alongside:		
	Berth 28:	10.0 m.
	Berth 29:	10.5 m.
	Berths 30/33	11.5 m.

After dredging in channel is completed to 12.5 m., depth at berth 32 and 33 will be 12.5 m.

Oil Pier No. 3 (Bearings, distances and positions here not confirmed). Existing dock face continued 24.5° approx. 1,100 ft. to join Northern breakwater.

No. 3 runs 283° for 1,100 ft. from position 24.5°, 2,000 ft. from Fl. R.Lt. in 57° 01′ N. 21° 33.5′ E.

Northern Breakwater: Inner extension from pos. 57° 24.69′ N. 21° 32.2′ E. 012° for 890 ft. to join main breakwater.

Under Construction: 3 berths for Petro-chemical industry along inner face of Northern breakwater, depth alongside to be 12.5 m.

Small harbour beside Pilot station, Southern side, completed and in use by small craft and fishing vessels. Small repairs in operation. Depth said to be 3.5–4 m.

Port operation in foggy weather said to be controlled by radio and millimetre (aircraft) type radar installation, one scanner of which is situated on tower near root of Southern breakwater.

Tugs: Alleged that 5 are available; 1 icebreaker type of 2,500 h.p. 2 medium size, and 2 small, 1 at least of which was propelled by Voith-Schneider gear of about 750 h.p.

Pilots: To call Pilots, use Channel 16 and call Ventspils radio who make arrangements with harbour office and Agents (Inflot).

During time vessel de-ballasting and loading; any problems can be resolved by call to Agents through Ventspils Radio.

Regulations: Fire Officers demand that suitable bonding wire be fitted (supplied by ship). No shore facility available.

Facilities: No. 1 pier has (building) tower crane for handling hoses. Nos. 2 and 3 berths are fitted with loading arms hoses and towers. Fresh water available. Bunker fuel available but not necessarily Marine Diesel.

Cargo Berths: There are believed to be 8 dry cargo berths, within the river port area, some with cranes, suitable for general cargo, together with storage buildings. Refrigerated/chilled cargoes have been handled.

Max. Size: Pilot stated that tankers of up to 60,000 tonnes displacement were possible at present, and that after dredging it should be possible to take up to 100,000 tonnes displacement.

To contact Agents, call Ventspils radio on Channel 27 and they make arrangements.

AUTHORITY: The Port of Ventspils Authority.

AGENT: The Port of Ventspils Maritime Agency "Inflot". Postal address: 18 Dzintaru Street, Ventspils, U.S.S.R. Cables: "Inflot Ventspils". Tel. 6-12-13; 5-13-69. Telex: 122.

VOSTOCHNY: 42.44 N. 133.03 E.

New port being constructed. Log-loading berth understood to be in operation and a chip berth completed. Container and coal berths to be constructed, depths up to 17 m.

VYBORG: 60.43 N. 28.44 E. (See Plan Book)

For Saimaa Canal see Index.

GENERAL: A Baltic Sea port Vyborg is situated at the head of the Gulf of Vyborg in the N.E. part of the Gulf of Finland.

The port area consists of a harbour protected from the North by the Castle bridge passing over the strait nearby the Castle of Vyborg and by the Smolyanoy point – from the West.

The port is open for navigation from April up to the middle of December. Ice in the Gulf of Vyborg begins to form normally about the middle of November. The Gulf usually becomes frozen over by the middle of December and the last ice finally disappears in April.

Whilst tidal range in the Gulf of Vyborg is of small account, considerable changes in the water level may be caused by strong winds (up to 1.6 m.), variation in atmospheric pressure (up to 1 m.), and the seasonal increase of the amount of water brought down from the land. The rise of the water level is usually caused by Southerly, S.W. and sometimes by Northerly winds. The maximum range of the water level in the Gulf is about 2.0 m.

The Vyborg Fairway (least depth 7.3 m.) leads from the entrance to the Gulf of Vyborg across the Transund roadstead up to the entrance of the Inner Vysotsky Roads. The Vyborg Sea Channel (least depth 6.5 m.) leads from the Inner Vysotsky Roads into the port, situated at the head of the Gulf. Both of these and the Fairway and the Channel, are open for navigation any time of day or night.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage in the port area is carried out round the clock. It is compulsory for all types of vessels. Pilots board and disembark vessels in the following places:

1. At the port of Vyborg;
2. At the Reception buoy, 5.1 cables Westward of the Northern point of the Mayachny Island (pilot station of the Vikhrevoy Island);
3. At the Brusnichnoe Lock berth or in the Lock itself.

In the case of rough weather when safe boarding or disembarkation of a Pilot at the Reception buoy of the Vikhrevoy Island pilot station is impossible, a vessel, with the Master's consent, may follow a pilot boat, in the wake of it from the Reception buoy up to the Large Transund Roadstead or as the case may be, from the Large Transund Roadstead up to the Reception Buoy.

The radio communication between pilot boat and vessel is effected through VHF radio, Channel 12.

In case the Master of a vessel does not agree to follow a pilot boat, he can:

(a) When approaching the port from the seaward lie at anchor at the Reception buoy area until the weather changes for the better;

(b) When leaving the port for sea, anchor at the Large Transund Roadstead at a place indicated by the Port Administration and wait until Pilot is able to disembark at the Reception buoy area.

Vessels approaching the port from seaward should order a Pilot at the same time as they notify the Port Administration of the time of their arrival at the point of meeting a pilot boat.

ANCHORAGES: There are 5 anchorages at Vyborg Fairway and at Vyborg Sea Channel areas.

Two are situated at the Large Transund Roadstead area, one – at the Small Transund Roadstead, one – S.E. and one – N.W. of the channel. Anchorage positions are shown on the chart.

The holding ground in the anchorages is sand, mud, stone and clay. The depths are from 11 to 17 m.

RESTRICTIONS: Vessels are allowed to enter or leave the port when winds do not exceed force 6. During daytime, when a vessel's length is not more than 125 m. and her draft does not exceed 6.5 m. (at the Kronstadt datum);

At night time, when a vessel's length is not more than 105 m. and her draft does not exceed 6.1 m. (at the Kronstadt datum).

Before entering or leaving the port Masters of vessels having length and draft exceeding those indicated above must obtain the Harbour Master's permission.

HEALTH: International code quarantine signals to be shown on arrival. Vessels placed in quarantine will be instructed where to anchor by the Pilot station.

RADIO: Radio contact can be established through the Vyborg Radio port radio station operating 24 hours daily on the following frequencies:

Call sign	Frequencies (kHz) working	calling	Type of trans-mission	Time of work
UNN	500	500	A1	H24
	444		A1	H24
"Vyborg-Radio" (Port Control	156.7*	156.8*	F3	H24
"Vyborg-Radio" (pilot service of the Saimaa Canal)	156.6*	156.8*	F3	HX
"Ostrov Vikhrevoy" ("Whirlwind Island") pilot station	156.6*	156.8*	F3	HX
"Zaliv Novinskogo" ("Gulf of Novinsky") pilot station	156.6*	156.8*	F3	HX
"Vyborg-Radio" (Inflot Agency)	156.6*	156.8*	F3	H24

*Frequencies are given in mHz.

Every vessel whilst proceeding along the Fairways and the Channel must have VHF radio-telephone in good working order, being able to ensure a reliable radio contact with the port of Vyborg and between vessels. If a vessel is not equipped with VHF radio, a Master can hire a VHF portable radio-set from a Pilot station (via Pilot) for a fixed charge.

TUGS: Available, ordered through "Inflot".

BERTHING: Can only be effected with Pilot on board. Berths of the port with depths alongside of up to 7.8 m. are equipped to handle general and bulk cargoes, timber, etc., as well as passenger traffic. There are enclosed warehouses and open concrete floor sheds.

Berths are equipped with electric cranes of up to 10 tons capacity. There are floating cranes of up to 15 tons capacity and other cargo-handling equipment and machinery.

Opening and closing of hatches is usually done by the ship's crew, but if required it can be done by port labour for vessel's account.

MEDICAL: "Inflot" to be advised in advance if any medical attention required.

DENSITY: Salinity 5%.

FRESH WATER: Available. Can be supplied by pipe-lines at all berths or delivered by barges.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually opened and closed by crew. Can be operated by stevedores on request.

CUSTOMS ALLOWANCE: No control on board the vessel. It is forbidden to take alcohol off the ship.

REPAIRS: Minor repairs can be effected.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: Cargo operations can be carried out on all holidays.

TELEPHONE: Connection to vessels is not possible.

SHORE LEAVE: Permitted subject to police control.

AUTHORITY: The Port of Vyborg Authority.

AGENT: The Port of Vyborg Maritime Agency "Inflot". Postal address: Inflot, PO Box 40, Vyborg, U.S.S.R. Cables "Inflot Vyborg". Tel. 52-01, 12-85 and 12-86. Telex 521.

YALTA: 44.30 N. 34.12 E. (See Plan Book)

GENERAL: An ice-free Black Sea passenger and commercial port, Yalta is situated at the head of Yalta Bay and on the Southern coast of the Crimea Peninsula.

The port is open for navigation all the year round.

The port is formed by a harbour protected by a mole. Depths in the harbour are up to 10 m.

Yalta is mainly a passenger port, but it is equipped to handle dry cargo vessels.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilot meets vessel in the outer roads, at a distance of 1 mile S.E. of Yalta lighthouse.

ANCHORAGES: The port outer roads are situated in Yalta Bay S.E. and Southerly of the port entrance. They are open to winds blowing between E.N.E. and S.W. At times vessels may be turned broadside to waves caused by Southerly winds.

A good anchorage may be obtained 5.5 cables S.S.W. off the head of the New Mole with depths from 15 m. to 17 m. The bottom is mud.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night. Vessels entering or leaving the port must have keel clearance of not less than 0.6 m.

MAX. SIZE: Permissible draft is 9 m., length 215 m.

RADIO: Ship-shore radio contact can be established through the port radio station Yalta Radio operating 24 hours a day on the following frequencies:

Call sign	Frequencies (kHz) Working	Calling	Type of trans-mission	Time of Work
UCD—9	500	500	A1	H24
Yalta Radio	2490	2100	A1	HX
Lazur (Port Control)	156.8*	156.8*	F3	H24

*Frequencies are given in mHz.

BERTHING: Cranes of up to 7 tons capacity are operated along cargo quays.

Handling of cargo at the passenger terminal is usually done by ship's cargo gear. A 5-ton shore crane may be ordered, if necessary.

TUGS: Tug assistance for mooring is compulsory. Masters of vessels entering the port must order at least 1 tug when mooring.

Masters of deep-drafted vessels must order a tug-boat when unmooring from berths Nos. 1, 3 and 5 if it is impossible to leave berth by drifting with the assistance of off-shore blowing wind.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours. (All year round).

AUTHORITY: The Port of Yalta Authority.

AGENT: A branch of the Port of Odessa Main Maritime Agency "Inflot" at the Port of Yalta. Postal address: 5 President F. D. Roosevelt Street, 334200 Port of Yalta, U.S.S.R. Cables "Inflot Yalta". Tel. 2-46-91. Telex 815.

ZHDANOV: 47.03 N. 37.31 E. (See Plan Book)

GENERAL: A sea port of Azov port, Zhdanov is situated 14 miles Northward of the entry into the Taganrog Gulf, at the Western end of it and at the mouth of the Kalmius river.

All-year round navigation is possible but during 30-90 days period of ice conditions with ice-breaker assistance for ice-strengthened vessels only.

Ice usually begins to form at the end of November or the beginning of December, and 3-4 weeks later the Gulf becomes completely frozen over. The increase of fast ice usually lasts up to the first half of February. As a rule the ice usually breaks up in the middle of March. It finally disappears at the end of March or, as an exception, in the first half of April.

The port of Zhdanov consists of the Outer and Inner Roads, the Ugolnaya (or the Coal) Harbour, the Grain Harbour, the Ship-repairing Basin, the Schmidt Harbour at the mouth of the Kalmius River, and the port of Azovstal situated Eastward of the mouth of the river.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Inform Kerch Harbour Master ETA 24 and 6 hours, off Kerch Strait. On arrival Kerch Pilot Buoy No. 21 (Lat. 45° 13′ 37″ N. Long. 36° 27′ 45″ E.), drop anchor and await Pilot; also keep continuous radio watch.

Not later than 4 hours prior to arrival at the mouth of the Coal Harbour approach channel, Buoy No. 16, a Master should order a Harbour Pilot.

ANCHORAGE: A good anchorage can be obtained in the outer roads of the port of Zhdanov situated opposite the port entrance. The depths in the roads are from 5 m. – 7 m. the holding ground is mud mixed with sand and shell.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. All vessels entering or leaving the port should have keel clearance not less than 0.5 ft. (15 cm).

The max. allowed speed in the approach channels is 4.5 knots and in the part of the Coal Harbour approach channel, protected by a wooden dam, only 3 knots.

The speed of a vessel may be increased in case of necessity to keep her course along the leading line or prevent her drifting off the channel due to the effect of current or wind.

MAX. SIZE: Draft 7.7 m., length/breadth no restrictions.

HEALTH: After presenting Vaccination Certificates free pratique obtained. After proceeding from one port of U.S.S.R. to another free pratique obtained automatically.

RADIO: Vessels approaching the port of Zhdanov should establish radio contact through Zhdanov Radio port radio station operating 24 hours daily on the following frequencies:

Call sign	Frequencies (kHz) Working	Calling	Type of trans-mission	Time of work
UDC	500	500	A1	H24
UBN	12732 17085 22365.5	12550.5 16734 22247.5	A1	HX
UBN	8620	8363	A1	H24
"Zhdanov-Radio"	2182	2182	A3	H24
"Port-Control"	156.8*	156.8*	F3	H24
"Port-Nadzor"	156.8*	156.8*	F3	HX

*Frequencies are given in mHz.

RADAR: The port of Zhdanov radar station gives all possible information to any vessel navigating along the Coal Harbour approach channels in the restricted visibility and during the absence of the floating navigation marks.

Radar navigation is controlled by a Pilot in charge.

Storm signals are exhibited at a signal mast located at the Dividing Pier.

TUGS: Available. Use ship's lines. Tug assistance for shifting berths is compulsory. Number of tugs to be ordered shall be advised by Pilot.

BERTHING: The berths of the port with depths of up to 8.5 m. are equipped to handle general, containers, bulk and liquid cargoes, timber, metals, food stuff, fruit, vegetables, etc., and passenger shipping as well. There are enclosed warehouses, open concrete floor sheds and a grain elevator.

On the quays there are electric cranes of up to 15 tons capacity, coal and grain loaders. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

The Grain Harbour is bounded by two piers – by the Dividing Pier from S.W. and by the Eastern Pier from N.E.

It is protected from S.E. winds by the Inner Roads Breakwater. There are numerous piles and dolphins along the Eastern Pier. The depths in the central part of the Grain Harbour are from 8.7 m. to 9.1 m.

The Schmidt Harbour is situated at the right bank of the mouth of the Kalmius River, at the S.E. outskirts of the town of Zhdanov. It is used by small vessels. The access to the Schmidt Harbour is by an approach channel dredged in the coastal shoal water. Navigation along the channel is ensured by leading lights.

Storm signals are shown at the station situated Southward of the entry to the Schmidt Harbour.

When proceeding to the Inner Roads through the shoal water vessels should use approaching channels leading to the Coal Harbour and the Avant-port.

The Coal Harbour approach channel is the main fairway for entry to the port of Zhdanov. It passes through a coastal shoal then enters the Southern part of the Coal Harbour.

Navigation along the Avant-port and the Coal Harbour approach channels is also ensured by leading lights, light buoys and spar buoys.

The access to the port of Azovstal is by a channel branching off N.E. of the Coal Harbour approach channel.

MEDICAL: Masters to advise by radio prior arrival of medical attendance required on board. Hospital facilities available. Vaccination Certificates to be presented.

DENSITY: About 1005.

WEATHER: The changes in the water level is mainly caused by effects of the wind, observed here all the year round. The fall of the water level is usually caused by Northerly and N.E'ly winds but rises of the water level are due to S.W'ly winds.

The range of the water level observed in the Gulf is about 1 m.

Changes of the water level can also be caused by variation in the atmospheric pressure, so called "Seish" effect. The "Seish" usually starts during calm weather and can last, on average, for about 24 hours.

The maximum range of the water level due to the "Seish" effect observed in August is about 0.6 m.

FRESH WATER: Delivered at berth. Also delivered by lighters.

FUEL: Supplied from the quays, and also delivered by lighters.

OPENING/CLOSING HATCHES: Crew allowed open and close, stevedores placing beams.

CERTIFICATES: Registered Tonnage Certificates required.

CUSTOMS ALLOWANCE: No quantity restrictions. Nothing to be taken ashore.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: The ship-repairing Basin is situated in the Northern part of the Inner Roads. It is bounded on the S.W. by the Eastern Pier and on the East by the Eastern Dam. The entrance to the Basin is situated between the heads of the Eastern Pier and the Eastern Dam. The depths in the Basin are from 6.1 m. to 6.5 m.

All kinds of repairs for vessels of up to 9,000 tons d.w.t. can be carried out.

DRY DOCKS: 2,500 and 5,000 tons.

REPATRIATION: All facilities for repatriation subject to visa formalities.

AIRPORT: 15 km. from port with regular airlines.

TIME: Local time GMT plus 3 hours (All year round).

HOLIDAYS: 1st January; 1st, 2nd, 9th May; 7th, 8th November; 5th December.

AMBULANCE/FIRE: Ambulance 025; Fire 01.

TELEPHONES: Can be placed on board.

AUTHORITY: The Port of Zhdanov Authority.

AGENTS: Zhdanov Main Maritime Agency "Inflot", 99 Admiral Lunin Prospect, 341010, Zhdanov, Donetsk Region, U.S.S.R. Tel: 5–10–34, 5–85–79. Cables: Inflot Zhdanov. Telex: 195.

NOTES

Please also advise Shipping Guides Ltd.

United Arab Emirates

ABU AL BU KHOOSH: 25.26 N. 53.08 E.

(See Plan Book)

LOCATION: The terminal is bounded by the following co-ordinates South of Sassan Oil Field.

(a) 25.31 N. 53.05 E.
(b) 25.29 N. 53.12 E.
(c) 25.26 N. 53.05 E.
(d) 25.26 N. 53.12 E.

Anchoring is prohibited within this area.

DOCUMENTS: Total ABK do not act as Agents. Vessels must have an Agent in Abu Dhabi in case of injuries or illness.

Early departure procedure: At the Master's option, he may, in order to expedite the turn-round of vessels and avoid undue delays caused by weather or other circumstances, use the early departure procedure. In this case Masters are requested to sign blank cargo documents.

Normally completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring delays of undue nature, the relevant documents will be airmailed to the Master to await the vessel's arrival at discharge port.

The official cargo, quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a letter of protest will be acknowledged by the Mooring Master.

Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward clearance: A tanker will be considered clear to depart Total ABK Terminal when the crude oil loading documents have been delivered to the Master, or in the case of E.D.P., clearance will be given through the Mooring Master.

Mail: Official ship's mail and the crew's personal mail will be handled by Total ABK and shipowner's debited accordingly.

PILOTAGE: Compulsory within the Terminal limits. Vessels to be moored at Total ABK Terminal will be boarded by a Total ABK Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the storage tanker, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. A qualified deck officer must be on watch at all times while the vessel is alongside the storage tanker.

ANCHORAGE: An area immediately South of Terminal limits is designated as the Anchorage Area, centred on position: 25° 26′ N., 53° 08′ E. This co-ordinate represents the centre of a circle with a radius of 0.5 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited.

NAVIGATION AIDS: The S.P.M. is fitted with a white light flashing the morse letter "U" every 30 seconds visible for a distance of 5 miles. A platform AK1 is situated in position 25° 29′ 30.5″ N., 53° 09′ 02.3″ E. and another in position 25° 29′ 37.5″ N., 53° 08′ 43.4″ E. which shows 2 flares in the N.E. direction (approximately) 10 m. and 600 m.

MAX. SIZE: Max. 270,000 d.w.t. Depth of water 29 m.

RADIO: Initial communication between vessels and Total ABK should be via Bahrain Radio (call sign GOU) which operates on a 24-hour basis. ETA in GMT to be sent 72, 48 and 24 hours prior arrival, through Bahrain Radio.

Communications within 60 miles of Terminal: Once ships are within 60 miles of ABK Terminal, communication may be established by radio telephone on International Marine VHF Channel 8. This frequency is monitored continuously.

Once contact has been made on Channel 8, further conversation should be conducted on either Channel 14 (156.7 mc/s), Channel 12 (156.60 mc/s) or Channel 15 or 17.

Communications after Total ABK Mooring Master has boarded: A Total ABK Mooring Master will board incoming tankers in the anchorage area and will bring with him portable VHF radio telephone units. From that time onwards, all and any communications between ship and the storage vessel will be conducted by the Mooring Master.

Radio transmissions for advice of tanker arrivals: Telegram to be sent by the storage tanker to the export tanker about 80 hours before her arrival:

Please advise your ETA in GMT 72, 48 and 24 hours before arrival to Total ABK Abu Dhabi, Telex AH 2347, via Bahrein Radio stop Cargo requirements stop Deballasting time if any stop Maximum loading rate acceptable stop Distance in metres from bow to manifold stop Flange dimensions of vessel's manifold connection stop 50 miles before arrival please contact terminal by VHF Channel 8 to receive berthing instructions stop Total ABK.

Mooring instructions: If vessels are obliged or instructed to anchor, they should do so in the recommended area about 3 nautical miles from the storage vessel.

TUGS: Two tugs, each with 72 tons bollard pull are employed by the export tanker when berthing alongside the storage tanker.

READINESS: After arrival at the anchorage area and when the tanker is ready in every respect to load, the Master may tender his notice of readiness.

Notices of readiness will be accepted provided one or other of the following events shall have transpired: (a) the Master shall have received the Mooring Master on board, or (b) the Master shall have dropped anchor in the anchorage area.

Port closed: Notices of readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the ABK Terminal Superintendent or his deputy.

MOORING: Weather permitting, Total Abu Al Bu Khoosh Terminal operates only from sunrise to sunset, 7 days a week. Vessels moor port side to the storage tanker "Jaranda" equipped with 5 Yokohama fenders on her starboard side, which is moored to the S.P.M. Launch may assist in berthing vessels under the direct control and supervision of the Mooring Master.

Preparation for mooring: Vessels are requested to have, on their starboard side, a Pilot ladder and/or Pilot hoist or accommodation ladder safely and securely rigged for immediate use and long enough to reach the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the starboard side both when boarding and leaving.

For vessels with a freeboard of 30 ft. or more, the accommodation ladder shall be rigged out, lowered down so the platform is not more than 10 ft. from the water level and a short pilot ladder, rigged to cover the access to the platform. Tankers are requested to have ready on the forecastle, 2 head lines, polypropylene if possible.

Tankers are requested to have ready on the port side amidships a derrick rigged and ready to pick up the hoses (16 in. diameter).

Hoses: The hoses shall be hoisted by the storage tanker's crane, but connected by ship's crew. The Mooring Master will advise the ship's Officer in charge concerning lifting techniques.

LOADING: All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the storage tanker constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 16, 14 or 8.

Failure of communications: Should all communications with the storage tanker fail, loading will cease immediately.

Emergency shut down: An emergency cessation of loading may be effected by use of the ship's VHF Channel 16.

Loading rates: Maximum loading rate will be 6,000 m.t.p.h.

Gases: ABK crude oil contains H_2S (sulphurated hydrogen). This gas quickly deadens the sense of smell so that a dangerous concentration cannot be detected by odour. During loading, gas should be vented off through the tanker's normal venting system. Personnel engaged in ullaging tanks should keep to windward and avoid breathing fumes as much as possible. Resuscitators, breathing apparatus and life-lines should be readily available.

Valve closure against high-speed loading; No valve which will stop or seriously impair or reduce the flow rate of oil from the storage tanker are to be operated without prior agreement with the Mooring Master. The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the storage tanker is to be advised and the pumping rate will be reduced to the required level. The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship. It cannot be over emphasised that to do so can be extremely dangerous and cause extensive damage to equipment.

BALLAST: Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Clean ballast; As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving. The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he thinks would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Inspection during loading: At night the sea around the vessel shall be adequately lit, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

MEDICAL: Medical and dental services are not available at the Terminal. In emergencies requiring hospitalisation, the patient will be hoisted to the helideck on the storage tanker and flown by helicopter to Dubai or Abu Dhabi.

FRESH WATER, FUEL, ETC.: Bunkers, fresh water, stores, boats for hire, repair facilities, facilities for changing ship's crew are not available at the Terminal.

SHORE LEAVE: Not possible.

GENERAL:

Radio equipment: Radio, radar or other electric equipment must not be energised while the vessel is alongside the SPM except VHF radios, telephone and communications equipment approved by the Terminal.

Repairs; While berthed at the Terminal, the ship's boilers, main engine, steering machinery and other equipment essential for manoeuvring shall be maintained in a condition to permit the ship to move away from storage vessel at short notice. Repairs or other work which may immobilise the ship should not be undertaken without prior arrangement with the Terminal.

Port Charges: Every vessel loading in the Abu Dhabi areas has to pay Abu Dhabi Government Port Dues. These are calculated according to Abu Dhabi Law.

SHIPMASTER'S REPORT: 1977: The following information may be of value to other Masters:

a. The holding ground in the anchorage is very bad, this vessel dragged her anchor (10 shackles out) in a Force 5 from the N.W.

b. Only documents supplied on departure were Bills of Lading, *no* port clearance documents supplied.

c. No Customs or Immigration Officials at terminal therefore no documents required.

d. Storage tanker holds 220,000 metric tons. She loads at a rate of 11,000 tons per day from the SPM.

SHIPMASTER'S REPORT: 1978: The storage tanker is about 800 ft. long (244 m.). On this vessel the centre of the manifold was 129.6 m. from the bow. We berthed with our bows level which meant our stern overhung the other vessel and we were not able to use our first ropes ashore leading from the after end of the poop.

Forward: (SV=Storage vessel). 2 headlines to SV. 1 spring to SV. One rope from SV with end to be turned up on own vessel's bits forecastle head. Two more headlines to SV and 1 spring from SV.

Aft: 2 sternlines to SV. 1 backspring to SV. 1 backspring from SV, eye on bitts. 2 more stern lines to SV.

OPERATORS: Total ABK – Abu Dhabi. Telex AH 2347.

ARZANNAH ISLAND: 24.47 N. 52.24 E.

A lighterage jetty is under construction in position 24° 46′ 56″ N., 52° 23′ 47″ E. with following dimensions which is expected to be ready by end of March, 1979.

Length 750 ft., width 100 ft., and depth alongside 20 ft.

Depth of water in the surrounding area is 4 ft. to 15 ft. to 1300 ft. offshore. Max. tide range is 6 ft. tide cycle 24 hours.

A temporary 180 ft. long slipway now in use with a channel depth of 18 ft.

Navigational lights presently available only on well jackets and production jackets near South end of island. Navigational lights are allocated but for the time being not established.

AUTHORITY: Amerada Hess Oil Corporation of Abu Dhabi.

AGENT: See "Mina Zayed".

DAS ISLAND: Abu Dhabi, 25.09 N. 52.52 E. (See Plan Book)

Conduct and movement of vessels within the port are controlled by the Harbour Master (Abu Dhabi Petroleum Ports Law No. 12 of 1973).

DESCRIPTION: Das Island lies some 100 miles N.W. of Abu Dhabi City, in the State of Abu Dhabi, largest of the United Arab Emirates. The island is the base for the export of crude oil by Abu Dhabi Marine Operating Company (ADMA-OPCO), and liquefied gas and by-products by Abu Dhabi Gas Liquefaction Company Ltd (ADGLC).

DOCUMENTS:

Bills of Health for Ports visited on voyage.

2 Crew Lists.

3 Manifests (1 original and 2 copies).

1 International Maritime Declaration of Health.

APPROACHES AND PROHIBITED ANCHORAGES: Umm Shaif and Zakum drilling areas situated some 20 miles East and 48 miles S.E. of Das Island. Bundug oil field lies approximately 15 miles West of Das Island. Together with their associated pipe-lines to Das are marked on the Admiralty Charts. Only selected towers equipped with lights, all other wellheads, drilling rigs and towers within drilling areas are unlighted. Unburied pipe-lines from wellheads to Island also in this area and *it is essential* that vessels do *not* steam into or anchor in it. Cautions have been issued in Notices to Mariners warning vessels against entering both Umm Shaif and Zakum areas and against anchoring in vicinity of Zakum Pipe-line.

Southern Route. Vessels should normally approach port from South and must pass not less than 3 miles South of drilling rigs and towers in Umm Shaif area, thence towards S.E. corner of Island. Vessels must leave port by this route unless they have to use Northern buoyed channel.

Northern Route: Using N.E. Buoyed Channel.

Is via buoyed channel, recently re-routed, details of the buoy stations and positions are:

Buoy No.	*Colour and Daymark*	*Position:*	*Light Characteristic:*
1	Black Conical	25° 27′ 27″ N. 53° 23′ 12″ E.	Fl. W. ev. 5 secs.
2	Red Can	25° 25′ 49″ N. 53° 23′ 25″ E.	Fl. R. ev. 5 sec.
2A	Red Can	25° 24′ 49″ N. 53° 17′ 12″ E.	Gp. Fl. (2) R. ev. 10 sec.
3	Black Conical	25° 25′ 13″ N. 53° 12′ 21″ E.	Qk. Fl. W.
4	Red Can	25° 24′ 14″ N. 53° 12′ 43″ E.	Fl. R. ev. 2 sec.
5	Black Conical	25° 23′ 54″ N. 53° 10′ 26″ E.	Fl. W. ev. 5 sec.
6	Red Can	25° 21′ 52″ N. 53° 09′ 59″ E.	Fl. R. ev. 5 sec.
7	Black Conical	25° 20′ 35″ N. 53° 04′ 54″ E.	Qk. Fl. W.
8	Red Can	25° 19′ 09″ N. 53° 06′ 02″ E.	Fl. R. ev. 2 sec.
9	Black Conical	25° 14′ 12″ N. 52° 56′ 48″ E.	Gp. Fl. (3) W. ev. 8 sec.
10	Red Can	25° 14′ 49″ N. 52° 58′ 54″ E.	Fl. R. ev. 3 sec.
11	Black Conical	25° 09′ 47″ N. 52° 54′ 06″ E.	Fl. W. ev. 2 sec.
12	Red Can	25° 11′ 11″ N. 52° 55′ 07″ E.	Qk. Fl. Red.

In addition to the buoys in the channel an additional buoy has been established approximately 1.6 miles North of Jazirat Das to mark the oil flare pipe complex. Details are:

Flare	Black Conical	25° 11.5′ N. 52° 52.3′ E.	Fl. W. ev. 5 sec.

Northern Route – Approach Das Island from Northwards. Keeping 4 miles to Westward and 5 miles to Southward until arrival Pilot station situated 2 miles S.E. of Southern loading terminal. Beware of submerged wreck with least depth 35 ft. over it in 25° 04′ N. 52° 52′ E.

PILOTAGE: Berthing Master will undertake pilotage, berthing and unberthing of tankers save that Master shall remain solely responsible on behalf of owners for safety and proper navigation. Berthing Master will normally board vessels approaching Das Island by Southern Route approximately 2 miles S.E. of Southern loading terminal (Berth 1). When approaching Das Island by Northern Route via buoyed channel Berthing Master will board from position between Nos. 12 and 11 Channel buoys. If adverse weather prevents boarding in this position Berthing Master will board in lee of Das Island. Vessels requested not to navigate at greater distance than 1.5 miles off Das Island when passing through cautioned area Eastwards of Das Island where anchoring is prohibited.

ANCHORAGES: Main anchorage for dry-cargo vessels is in about 40 ft. of water, approximately 0.5 mile from Harbour entrance South of tanker loading berth. Other anchorages for dry-cargo vessels lie to S.W. and West of the Island. Tankers should normally anchor approximately 1.5 to 2 miles S.E. of the Southern loading platform, should a berth not be immediately available.

Vessels should avoid anchoring in vicinity of submarine pipe-lines established to Eastward of Das Island.

Sea bed all round Island is rock, covered with a few inches of loose sand. Holding is poor and vessels are advised to pay out at least 60 fathoms of chain. Vessels at anchor, awaiting berths, lighters or any services provided by the port must at all times keep a listening watch using Channel 16 where possible. If a vessel is not equipped to operate on this Channel then any of the frequencies may be used by arrangement.

MAX. SIZE: No. 1 Tanker Berth is suitable for berthing tankers in ballast condition up to 90,000 Summer d.w.t. and when fully loaded up to 50,000 d.w.t. Minimum depth of water alongside the berth is 54 ft.

No. 2 Tanker Berth is suitable for berthing tankers in ballast condition up to 260,000 Summer d.w.t., fully loaded tankers of up to 130,000 d.w.t. and partially loaded tankers of up to 165,000 tons displacement with mean draft not exceeding 56 ft. Minimum depth alongside is 67 ft.

No. 3 Tanker Berth is suitable for berthing tankers in ballast condition up to 410,000 d.w.t. and with a loaded draft not exceeding 79 ft.

No. 4 LNG/LPG Tanker berth is suitable for berthing vessels up to 100,000 tons displacement with a mean draft not exceeding 47 ft.

Minimum depth of water alongside is 49 ft. The liquid part of the loading platform has 16 in. loading arm and an 8 in. bunkering point.

LNG loading rate 4,000 t.p.h. max. through 2 lines.

LPG loading rate 2,000 t.p.h. max. through 1 line.

Pentane Plus loading rate 2,000 t.p.h. through 1 line.

There are 7 mooring dolphins fitted with triple release hooks.

There are 6 berthing dolphins fitted with double release hooks. Each hook being of 100 metric tons capacity.

WEATHER AND TIDE: Prevailing winds are from the N.W. The rise of the tide can be up to 5 ft., usual variation is 3 ft.

HEALTH: Vessels arriving at Das must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform Abu Dhabi Marine Operating Company (ADMA-OPCO) if there is any person ill on board or if there has been sickness within the week prior to arrival. Pratique is granted by the Port Medical Officer through the Berthing Master or Agency Clerk.

Health Certificate with valid smallpox inoculation is compulsory and cholera inoculation (if coming from cholera-infected areas).

RADIO: Das Marine listens on VHF Channel 16.

Ship-to-Shore Radio communication from visiting vessels is channelled through Das Marine via. VHF Channels 6, 8, 9, 11, 12, 13, 14, 16, 18, 20 and 22. All other communication other than terminal VHF should be directed through Bahrain's Cable and Wireless Station.

All vessels bound for Das Island should give 72 hours notice of ETA via. Cable & Wireless Bahrain.

Das Island Radio Mast: A new radio mast has been installed on Das Island.

Geographical: Latitude 25° 08′ 30.396″ N.
Longitude 52° 52′ 43.903″ E.

Red lights visible all round the horizon have been established on the top of mast.

The original radio mast on the N.E. corner of Das Island has been demolished.

Arrival Messages: In the event of difficulties this information should be transmitted to Das via the Cable Wireless Station at Bahrain. As soon as direct contact is established between a vessel and Abu Dhabi Marine Operating Company (ADMA-OPCO) Radio Station, the latter will advise the route to be followed in approaching the Island.

Tankers when arriving to berth at the SBM from N.E. Buoyed Channel will receive from Das Marine a cable worded as follows: "Approach Das Island via. N.E. Buoyed Channel and when clear of Inner Buoys proceed direct to Pilot station situated 2 miles S.E. of South loading platform. Ship's derrick should be rigged on the portside. Advise soonest SWL of hose handling derrick or crane also confirm that you have a suitable fairlead forward of at least 26″×20″. Have ready on forecastle head one ships mooring rope, 120 fathoms in length. Ship's manifold should be ready to connect 2 × 16 in. BS cargo hose and 1 × 10 in. BS bunker hose.

Boat rope required along portside at manifold position. Accommodation ladder rigged starboard side. Mooring and hosing up by ship's crew. We request that cabin is available for Berthing/Loading Master who will remain on board throughout period in port. Mooring and hosing equipment is lifted on board when Berthing Master boards. Please ensure crew and port derrick ready and good lee is given. VHF Channel 16 available".

TUGS: Tugs provided by Abu Dhabi Marine Operating Company (ADMA-OPCO) must be used by all tankers when berthing and unberthing.

BERTHING: Full power must be available on main engines during berthing operations. Berthing Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck appliances inoperable, or if steering gear, telegraphs and whistles not in an efficient condition. Master should notify Berthing Master of any defects or peculiarities of vessel.

No. 1 Berth: No. 1 Tanker Berth approximately 0.75 mile off East coast of Das Island is served by submarine pipe-line from tankage on Island. Tankers berth against 4 flexible dolphins which protect berth operating platform. Six mooring dolphins are each provided with twin bollards. Hooks for backsprings located on operating platform are each equipped with 48 ft. length of 18 in. cable-laid manilla spring. Loading installation comprises 4 booms each equipped with 10 in. bore flexible hose for loading crude oil. Two similar booms available for loading and discharging bunkers. Fittings available to connect these hoses to 8 in., 10 in. and 12 in. manifolds to ASA 150 or BS 1560 – 1968, ASA 300 or BS. "H" details.

No. 2 Berth: No. 2 Tanker Berth is sited to the North of No. 1 Tanker Berth. It is of similar construction to No. 1 berth except that quick release hooks are provided on the mooring dolphins and on the breasting dolphins for securing vessels' backsprings. The loading installation comprises 4×16-in. booms with 16-in. hoses for crude oil loading, and 2×12-in. booms with 10-in. hoses for bunker loading. Fittings are available to connect to 4-in., 5-in., 6-in., 8-in. and 10-in. manifolds for crude oil loading with flanges to BS., ASA and metric standard details.

No. 3 Berth: No. 3 Berth is a Single Point mooring buoy and is situated approximately 7,500 ft. East of the East coast, in position Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ East.

The moorings for tankers are comprised of 2×15-in. circumference floating nylon ropes, terminating in a 3.75 in. dia. stud link chafing chain which is secured to the tankers forward mooring bitts using a 15-in. circumference nylon snotter. This equipment is provided by the Company.

The loading installation comprises 2×20-in. diameter floating hose strings terminating in 16-in. diameter tail hose for crude loading. For bunker loading and discharge 1×16-in. floating hose string, terminating in 1×10-in. tail hose, is provided. The flanges are to BS 1560.

Vessels using this berth will be required to be fitted with a bow fairlead on or near the centre line to accept the chafing chain. The minimum aperture dimensions are 24 in. horizontally and 18 in. vertically to permit direct connection. Alternative arrangements are provided for mooring vessels with smaller size apertures. However, this could result in delay, subject to weather conditions.

Vessels also require a derrick or crane capable of plumbing at least 2 ft. outboard of the ship's side over the entire length of the port manifold (including the bunker connection if required). SWL of the crane/derrick to be in accordance with the following requirements:

Less than 45,000 tons Summer d.w.t.	7 tons SWL
45,000 – 100,000 tons Summer d.w.t.	8 tons SWL
Over 100,000 tons Summer d.w.t.	10 tons SWL

Berths cannot be occupied during adverse Easterly weather. Loaded tankers only berthed at discretion of Port Officer and delays from tidal conditions, awaiting daylight, etc., may be incurred. Minimum acceptable length overall 525 ft. Vessels other than craft must not approach nearer than 2 miles to premises without a Berthing Master on board unless otherwise instructed by Port Officer. In approaching and leaving berths it is essential to avoid anchoring in area of submarine pipe-lines which run in approximately East and West direction some 2,500 ft. North of No. 2 berth. Weather and other conditions permitting, tankers can berth and unberth at all times. Every vessel berthing must fit adequate rat guards to all mooring ropes and wires.

GENERAL CARGO OPERATIONS:

(a) Declaration of Dangerous Cargo: Any dangerous cargo, whether intended for Das Island or not, must be declared to the Harbour Master, on arrival.

(b) Discharge or Loading of Dry Cargo: Cargo vessels discharge in the anchorage into barges using their own gear, and should arrive with derricks rigged.

A series of dumb barges (average capacity 120 d.w.t.) are normally available for landing all cargo. Charges are usually made for stevedoring services up to under ship's tackle and for supplying tally clerks on board the vessels.

For the handling of cargo, a labour force of up to 50 men is usually available.

Whenever possible, the island craft will come alongside immediately a vessel anchors and the Cargo Superintendent will board and discuss handling procedure with the Chief Officer. Discharge of cargo is carried out continuously provided weather and other conditions permit.

Vessels may be asked to provide winchmen.

(c) Cargo Manifests: 1 original and 2 copies of general cargo manifests are required.

LOADING: 2 grades of crude are available on each berth. Zakum Crude average API 40.5 and Umm Shaif Crude with average API 37.5.

Loading: Loading will not commence until the ship's loading officer reports the ship ready for loading and the shore loading staff are satisfied with the connections and preparations made for loading.

Loading and Discharging Rates:

No. 1 Berth

Crude oil loading maximum 5,000 t.p.h. with a maximum of 1,250 t.p.h. through each hose

Bunker discharging	1,800 t.p.h. approximately
Bunker loading	650 t.p.h. approximately

No. 2 Berth

Crude Oil loading	10 – 12,000 t.p.h. approximately
Bunker discharging	2,000 t.p.h. approximately
Bunker loading	750 t.p.h. approximately

No. 3 Berth

Crude Oil loading	10 – 12,000 t.p.h. approximately
Bunker discharge	2,000 t.p.h approximately
Bunker loading	1,000 t.p.h. approximately

The permissible maximum loading rate is entirely at the Company's option and will vary according to the circumstances and the type of tanker concerned, subject always to the Master's over-riding discretion.

Pumping Signals: Pumping Operations are controlled by a cable signalling system between the berth operating platform and the Control Room on the Island. The platform is also linked to the Island Automatic Telephone Exchange.

At No. 3 Berth, pumping operations are controlled by portable VHF radio telephone between the vessel and the Control Room on the Island.

BALLAST: There are no facilities for receiving vessels ballast ashore for treatment. All vessels must have clean ballast for overboard discharge.

Vessels using No. 3 Berth will be required to deballast and load simultaneously so that in normal circumstances they will not be flying light whilst moored at the buoy. It is therefore essential that the Company be promptly informed should the vessel be unable to deballast and load simultaneously without risk of admixture.

MEDICAL: Medical Officer resident on Island and Abu Dhabi Marine Operating Company (ADMA-OPCO) maintain small hospital. Medical attention only available in case of serious illness or emergency.

FRESH WATER: Not available.

FUEL: Medium fuel oils available from shore storage. Average API 17.5 and maximum viscosity 1,500 seconds Redwood.

FIRE PRECAUTIONS: Three fire-fighting tugs available.

GANGWAY: Shore gangways provided on No. 1 and No. 2 Tanker Berth and the new LNG/LPG berth.

CUSTOMS ALLOWANCE: No restrictions for tobacco. Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, is prohibited.

CONSULS: HBM Hon. Consul, Marine Department, Abu Dhabi Marine Operating Company (ADMA-OPCO), Das Island, Abu Dhabi. Tel. 546, Cables, Admarine Das Bahrain.

REPAIRS: Not available.

DRY DOCKS: None.
REPATRIATION: Not allowed unless an extreme medical case.
AIRPORT: ADMA operated private Airport.
TIME: GMT plus 4 hours.
POLICE/AMBULANCE/FIRE: Tel. Police 385; Ambulance 300; Fire 400.
SHORE LEAVE: Not permitted.
AUTHORITY: Marine Superintendent Das, Abu Dhabi Marine Operating Company (ADMA-OPCO), Das Island.
AGENT: *Dry Cargo:* See "Mina Zayed".

Tankers: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd. act as protecting Agent only.

DUBAI (Including Khor Dubai and Hamriya Port): 25.16 N. 55.18 E.

ALSO SEE "PORT RASHID".
COURTESY FLAG: UAE and Dubai.
PROHIBITED AREA: Work on the construction of the Dubai dry dock has commenced and all shipping is warned to keep clear of an area contained within a line drawn from Port Rashid Main Light (Lat. 25° 16.0′ N., Long. 55° 16.2′ E.) to a position (Lat. 25° 16.2′ N., Long. 55° 15.1′ E.) i.e. 272-1,850 m. from this light thence to the shore line on a Bearing of 180°. This has been declared a prohibited area.

Small craft, dredgers and hooper barges will be operating within this area. The main breakwater will consist initially of an island with the breakwater extending both seawards and shorewards from it.

White flashing beacons will be positioned at 400 m. intervals along the breakwater and in addition various construction lights will be exhibited.

Legal steps will be taken against any negligence whatsoever from Masters.

DOCUMENTS: Following should be airmailed to Agent prior ship's arrival: 6 copies Dangerous Cargo List, Stowage plan in duplicate, Hatch list in duplicate, 7 copies of cargo manifests, 1 copy of each Bill of Lading. On arrival, 3 crew Lists required.
APPROACHES: Open roadstead. Cargo discharged into barges.
ANCHORAGE: Marked by light buoy in position 310°, 1.06 miles from Nayif Tower. Recommended anchor to N.E. of light buoy in approx. position 25° 17′ 4″ N., 55° 16′ 16″ E. Depth 36 to 40 ft., holding ground considered poor, bottom sand and coral. The closer ships are able to anchor to the buoy, the faster turn-around on barges will be attained. *Warning:* Occasional strong N.W. winds, known as "Shamal" will make discharging impossible and *it is very important* that ships have engines on "stand-by" during such times. Ships allowed enter and leave anchorage at any time of day or night. Launch service through Agent's ship to shore from anchorage, and ship's own boats can also be used without Authorities' permission.
PILOTAGE: None.
RESTRICTIONS: All cargo discharged into barges at anchorage. Coasters with drafts of 11 ft. 6 in. or less can enter creek and discharge alongside. Such vessels usually require a tug boat to pilot them into the creek. Tugs available through Agent. Importation of artificial pearls is prohibited. Purchase of liquor forbidden except by permit.
HEALTH: Prior arrival, Masters are required to send a cable to the Port Health Dept. addressed "Quarantine-Municipality-Dubai" on the following lines:

(Vessel's name). . . ETA . . Hour . . Date . . .
Crew all healthy request free pratique
Master

Normally all vessels declared healthy by the Master are automatically allowed to berth immediately on arrival, and Health Dept. personnel will board vessels after berthing.

Arrival: Ships boarded immediately upon arrival weather permitting, and Masters then have to complete a short Arrival Report. No formalities of any kind with Port Authorities and ships allowed to arrive and sail at any time.

Departure: No port clearance is issued in Dubai. A letter will be issued by Agent which may be produced at next port of call instead of usual departure clearance.

RADIO: No port radio station. Cables from vessels outside Gulf may be routed through Muscat Radio, and from inside Gulf through Bahrain Radio. Vessels should advise Agent of ETA 72, 48 and 24 hours prior arrival. Some Agents also equipped with VHF calling Channel 16. Ship's radio station may be operated at anchorage.

Nearing Dubai and approximately 8-10 hours prior to arrival, vessel should switch on VHF Channel 16 and call Agent. On contact, change to one of Channels 14, 13, 12, 9 or 6 for further communication. Regular contact then maintained until departure from Dubai.

DISCHARGE TURN: Priority of discharge given to ships carrying mail and/or passengers for Dubai. Ships carrying less than 100 weight or measurement tons have priority and are supplied with one barge for discharge of cargo immediately on arrival, whether turn is in force or not. Should there be congestion, Agents require Stowage Plan showing clearly that all Dubai cargo is freely available and Master's signature on a request for discharge turn. Based on this, vessels will be registered for turn. Registration can only be performed during office hours.

After confirmed registration, at which will be given a deadline for turn, ships may proceed to other ports for discharge, but must return Dubai prior time and date given, otherwise turn is lost. Particular cargoes for H.H. The Ruler have priority. This should be evidenced by Manifests which will be produced to Customs Authorities in Dubai for approval. The cargoes must be accessible for immediate discharge, which should be verified by stowage plan.

BERTHING:
Khor Dubai: Khor Dubai Corniche Beacon 25° 16′ N., 55° 18′ E.
Approaches: Dredged to 5.5 m. The channel running parallel with Port Rashid lee breakwater.
Restrictions: Breakwaters will be lit shortly.
Draft at Berths: 4.5 m.
Tugs: May be arranged by Agent if required.
Fuel: Caltex supply fuel. Also Shell and BP.
Hamriya Port: Main Breakwater Light 25° 18′ N., 55° 20′ E.
Flag: UAE and Dubai Emirate.
Documents: The following should be airmailed to Agent prior to ship's arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
2 Freight Manifests.
7 Cargo Manifests.
1 Copy of Bill of Lading.
4 Crew Lists required (on arrival).

Approaches: Dredged to 6 m. between breakwaters. Breakwaters are lit.
Pilotage: Pilots can be obtained from Port Rashid by arrangement.
Restrictions: Vessels will not be allowed to remain alongside the quay when not working cargo if other vessels are waiting.
Draft at Berths: There are no berth numbers. However, there are 3 quays. One measuring 300 m. in length with a draft of 4.5 m., 1–160 m. and 1–900 m., the last 2 with draft of 6 m.
Tugs: May be arranged by Agent if required.
Radio: The Port Signal Station (call sign: "Khor Dubai" equipped with VHF and M/F SSB is situated near the entry to Dubai Creek. Vessels should contact the station by VHF Channel 16 or 12 or on RT 2182 K/cs. Signal station is manned 24 hours.
Pratique: Not applicable.
Berthing: Berthing is reported to Khor Dubai Report Station.
Fresh Water: Presently available at one point only. The supply is made by Port & Customs office and vessels may directly order their requirement or through Agents.
Fuel: Caltex supply fuel. Presently from one point only.
Cargo Handling: Port is not involved in the cargo discharge operation.

There is no equipment available in the port such as cranes, forklifts etc. and if required, to be arranged by Agent.

Neither shed nor yard is available and therefore cargo is accepted on direct delivery basis only.

Stevedores: No stevedoring company in the port, labour is arranged by Agent.
Telephones: No connections at the quays. However, there are telephones in the adjacent Customs office.
Lighterage: Available.
Shore Pass: After berthing, all passports and Seaman's books should be surrendered to the Customs office situated in the port area with 3 copies of crew list against which shore passes issued. Before sailing of the vessel, a clearance should be obtained from the Port & Customs office (Launch Section) and produced to the Customs office for releasing the Seaman's Books/Passports.
Authority: Port and Customs, Dubai.
STEVEDORES: Loading/Discharging Rates: Stevedores, tally clerks, supervisors, etc., will be supplied from shore at the same time as ships are supplied with barges. These people working under vessels' supervision and responsibility.

First Shift: from 0800 hrs. to 1800 hrs. Second shift: from 1800 hrs. to 2400 hrs. Third Shift: from 0000 hrs. to 0800 hrs. Very difficult to get stevedores to work third shift unless ship will complete within a reasonable time into the third shift. First 2 shifts always worked.

Drinking water must be supplied by ship free of charge to all men from shore but food to supervisors, tally clerks, watchmen and foremen.

Expected outturn working three hooks:

Bagged cargo	400–500 tons
Cased cargo	150–200 tons
Timber on deck	300–350 tons
Timber in hatches	200–250 tons

Usually five ships can work at one time.

MEDICAL: Qualified doctors available ashore and also a hospital. Most medicines available at fairly low prices. Dentist also available. Walking cases should be brought ashore *in the morning* for treatment, but in emergency, a doctor will board the ship.
TANKERS: See "Port Rashid".
FRESH WATER: Can be supplied at Dubai anchorage at following rates (approx.): quantities 600 tons, 75 tons, or 25 tons at one time.
FUEL: See "Port Rashid".
FIRE FIGHTING: No facilities available at anchorage.
CUSTOMS ALLOWANCE: *Tobacco:* 1,000 cigarettes or 200 cigars or 1 kilo of tobacco. *Perfumes:* 1 litre of toilet water (Eau de Cologne) and not more than 150 grams of perfume. *Currency:* Unlimited.

CONSULS:

Egypt
India
Iran
Iraq
Italy
Kuwait
Great Britain
Pakistan
Norway
Netherlands
Qatar
Saudi Arabia
Sweden
Switzerland
USA

Additional Embassies/Consulates in Abu Dhabi.

REPAIRS: Fully equipped engineering workshops, radar and radio technicians capable of carrying out extensive repairs available. Underwater cleaning, repairs and other works connected with this also available. See also Dubai Dry Dock under "Port Rashid".

DRY DOCK: Dubai Dry Dock expected to be in operation by Spring of 1979. The dry dock is adjacent to Port Rashid – See "Port Rashid".

REPATRIATION: Visa is required for non UAE citizens visiting Dubai for a period exceeding 7 days. Agent can assist provided complete passport details given well in advance. Excepted are British Subjects with right of abode in the UK who are permitted to remain in UAE without visas for a period of 1 month. For temporary visitors of other nationalities the Agent can arrange under its sponsorship transit visa valid for 7 days provided the person holds a ticket showing a confirmed flight out of UAE. However, person must leave UAE via airport through which he entered.

AIRPORT: Regular international scheduled flights. Also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: *Public Holidays in 1979:* 1st January; 10th February; 23rd June*; 6th August*; 25th August*; End of Ramadan 3–5 days holidays. End August. 1st November*; 21st November*; 2nd December; 25th December.
*Not fixed.

SHORE LEAVE: Officers and crew may come ashore during daylight hours for shopping and recreation. They shall then carry a valid passport, ID-card or Seaman Book, which will be placed at the Immigration Office when landing. The passport, ID-card or Seaman Book will be returned upon returning to ship. No alcoholic beverages allowed to be brought ashore.

GENERAL: Dunnage – not available. Heavy lifts – not available at anchorage. Shore cranes have lifting capacity up to 30 tons.

Weather: Summer months in the 40's and humid. Winter months in the 20's and dry.

Alcoholic Beverages: Allowed to be stored and consumed on board also in port, while sale of this and pornographic materials is strictly forbidden.

Accommodation: In 1978 construction of many hotels was completed and rooms in all price ranges are now readily available in Dubai on both the Deira and Dubai side.

Business Office Hours: Normally 0800 to 1300 hrs. 1600 to 1800 hrs. Government offices: 0800 – 1200 hrs. Banks: 0800 – 1200 hrs.

LAUNDRY: Available but about 2-3 days required.

PROVISIONS: Fresh vegetables, frozen stuff, bonded stores, etc., available. Requirements should be given immediately on arrival. (The liquor and beer prices are high.).

SURVEYORS: Lloyds.

AUTHORITY: Port and Customs Dept. Dubai Port Authority.

AGENT: Gulf Agency Co. (Dubai) Ltd. POB 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 431300. (24 hours service). Telex 45448, 45809 ("GACDB EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) Callsign "Confidence, Dubai".

Operators of ship-servicing and supply organisation: Crew-changes, mail spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

FATEH TERMINAL (offshore Dubai). (See Plan Book)

Oil Loading Terminal of the Dubai Petroleum Company.

Note: All tankers loading Fateh Terminal cleared by Dubai Petroleum Company, taking care of all necessary documentation concerning cargo. DPC does not charge owners/operators for this service. However, for all other agency services DPC refers owners/operators to regular shipping agents in Dubai.

According present oil company regulations vessels not allowed receive any deliveries or any launch alongside while loading at Terminal. Deliveries of mail, spare parts and performance of crew changes will, therefore, take place at Terminal anchorage, Dubai anchorage, or at a rendezvous point.

Weather permitting, Fateh Terminal operates 24 hours a day, 7 days a week and provided berth not occupied, tankers will be berthed upon arrival, day or night.

LOCATION: Fateh Terminal consists of the crude oil production and export facilities of the Fateh and S.W. Fateh Fields offshore Dubai, United Arab Emirates. The Terminal Limits are bounded by the following co-ordinates:

(1)	25° 40′ N.	54° 30′ E.
(2)	25° 40′ N.	54° 26′ E.
(3)	25° 33′ N.	54° 15′ E.
(4)	25° 30′ N.	54° 15′ E.
(5)	25° 28′ N.	54° 17′ E.
(6)	25° 28′ N.	54° 30′ E.

Within this area the anchoring of vessels is prohibited and the Terminal Safety Regulations have effect.

NAVIGATIONAL AIDS: Both SPMs are fitted with a white light flashing the Morse letter "U" every 30 seconds visible for a distance of 5 miles.

The three submerged oil storage tanks, platforms, bridges and production units exhibit lights flashing "U" in Morse and are also equipped with foghorns sounding "U" in the Morse Code every 30 seconds. Various working lights are also shown.

The two oil storage vessels Majmaa I and Majmaa II are fitted with a white light flashing the Morse letter "U" every 30 seconds visible for a distance of 5 miles.

Each vessel is also equipped with a continuously operating foghorn sounding the letter "U" in Morse at intervals of 30 seconds.

The Central Production and A Platforms exhibit lights flashing "U" in Morse and a foghorn every 30 seconds sounds the letter "U" in Morse.

Various working lights are also shown from the well platforms within the area. All are fitted with a white light flashing the Morse letter "U" every 30 seconds.

Each well platform is fitted with foghorns sounding "U" in Morse Code every 30 seconds.

Four flares in position:

(1)	25° 35′ 50″ N.	54° 25′ 50″ E.
(2)	25° 35′ 56″ N.	54° 25′ 20″ E.
(3)	25° 35′ 48″ N.	54° 25′ 18″ E.
(4)	25° 29′ 44″ N.	54° 18′ 29″ E.

give an orange light which may be visible at a great distance from the Terminal, depending on atmospheric conditions, in addition the flare structures show a white light flashing "U" in Morse every 30 seconds visible for 5 miles.

Numerous small unlit buoys for the use of working craft may be encountered within the Terminal area.

APPROACHES: On approaching Terminal, Masters of incoming tankers should head for Anchorage Area (see "Anchorage") where, under normal conditions, their vessel will be boarded by a DPC Mooring Master.

ANCHORAGE: An area immediately East of Terminal Limits is designated as the Anchorage Area, centred on position as follows:

25° 36′ N. 54° 31′ E.

This co-ordinate represents the centre of a circle with a radius of approximately 1 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited. For reference purposes, the anchorage area bearing from Port Rashid (Dubai) Light is 298° true, distance 44.6 miles and from Jazirat Sirri Light 187.5° true, distance 17.5 miles.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed on account of adverse weather conditions, etc.) Masters will be advised by radio and requested to anchor.

FACILITIES: For the export of crude oil 2 single point mooring buoys have been installed in positions:

(1) 25° 35′ 12.6″ N. 54° 25′ 46.3″ E.
Bearing 261° true 4.8 miles from anchorage.
(2) 25° 35′ 12.6″ N. 54° 24′ 35.0″ E.
Bearing 262° true, 5.7 miles from anchorage.

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be accepted provided one or other of the following events shall have transpired:

(*a*) The Master shall have received the Mooring Master on board or;

(*b*) The Master shall have dropped the anchor in the Anchorage Area.

Port closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the Fateh Terminal Superintendent or his Deputy.

Order of Berthing: Vessels will normally berth in order of arrival.

DOCUMENTATION: *Documentation and ship's agency:* In the normal course of events, DPC acts as tanker Agent and prepares all crude oil loading documents. For these services no charge is made.

Early Departure Procedure: At the Master's discretion. In order to expedite turn-round of vessels in this port and avoid undue delays caused by weather or other circumstances, Masters of vessels on arrival are requested to sign blank cargo documents.

Normally, completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring undue delays, the relevant documents will be airmailed to the Master to await the vessel's arrival at her discharge port.

The official cargo, i.e. quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a Letter of Protest will be acknowledged by the Mooring Master. Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Fateh Terminal when the crude oil loading documents have been delivered to the Master, or in the case of early departure, clearance will be given through the Mooring Master.

Mail: Official ship's mail and crew's personal mail will be handled and shipowners debited accordingly.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Fateh Terminal will be boarded by a DPC Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the SPM, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

The services of a Mooring Master are provided without charge, upon the express understanding and condition that when any Mooring Master furnished by DPC goes aboard a vessel for the purpose of assisting such a vessel, he becomes for such purposes the servant of the owners of the vessel and DPC shall not be liable for any damage or injury resulting from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of the assisted vessel.

RADIO: *Communications with DPC:* Cable Address: Dupetco, Dubai. Telex: DB 423.

Initial Communication: Initial communication between ships and DPC should be via Bahrain Radio (call sign GOU) which operates on a 24-hour basis.

Communications within 60 miles of Terminal: Once ships are within about 60 miles of Fateh Terminal communication may be established by radio telephone on International Marine VHF Channel 16 (156.8). This frequency is monitored continuously. Once contact has been made on Channel 16, further conversation should be conducted on either Channel 14 (156.7 mc), Channel 13 (156.65 mc), Channel 12 (156.60 mc), or Channel 8 (156.40 mc).

Communications after DPC Mooring Master has Boarded: A DPC Mooring Master will board incoming tankers in the anchorage area and will bring with him portable VHF radio telephone units. From that time onwards all communications between ship and platform will be conducted by the Mooring Master via the portable VHF units, unless owing to failure of portables it is necessary to revert to mains VHF Channels.

Advice of Tanker Arrivals:

Initial Estimated Time of Arrival (ETA): When a tanker bound for Fateh Terminal is within 72 hours of arrival at Fateh Terminal, the Master should notify DPC by cable via Bahrain Radio giving the following information:

(a) Name of tanker.
(b) ETA in GMT (Dubai time is GMT+4 throughout the year).
(c) Quantity of cargo required.
(d) Maximum loading rate.
(e) If the ship's hose connections are different from 16 in. or 12 in. standard ASA 150 lb. type, the size should be stated.

Subsequent ETAs: Sections *(a)* and *(b)* of the above message should be repeated via Bahrain Radio when the tanker is within 24 hours and again when within 12 hours of arrival at the Fateh Terminal.

Unreasonably insufficient or inaccurate ETA messages may alter the order of berthing of ships to the disadvantage of those ships giving sufficient and accurate ETA messages.

Radio Telephone Communication when Approaching Fateh Terminal: When about 60 miles off the Terminal contact may be made by radio telephone on International Marine VHF Channel 16, and communications should continue via this method until a DPC Mooring Master boards.

MOORING: *Preparation for Mooring:* Vessels are requested to have pilot ladder, hoist and/or accommodation ladder safely and securely rigged for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the port side both when boarding and leaving.

For vessels with a freeboard of 40 ft. or more, the accommodation ladder shall be rigged out, lowered down so the platform is not more than 10 ft. from the water level and a short pilot ladder rigged to cover the access to the platform.

Tankers are requested to have ready on the forecastle head the following:

(a) 2 towing ropes, polypropylene if possible.
(b) 2 messenger ropes, minimum lengths of 300 ft.

Tankers are requested to have ready on the port side amidships the following:

(a) Derrick rigged and ready to pick up from a launch.
(b) Mooring shackles.
(c) Wire strops and hose connection gear.

Securing of the Terminal's Nylon Ropes: On the near approach to the buoy, a launch will attach a ship's line to one of the Terminal's floating nylon ropes. This will be hove aboard and secured to the towing bracket if the ship is so fitted, or otherwise secured by a ship's or Terminal mooring wire previously passed aboard. The same operation will be repeated with the second nylon rope.

LOADING: *Lifting Hoses:*

SPM I: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift is 5 tons.

SPM II: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift will be 7 tons.

The hoses shall be hoisted and connected by ship's crew. The Mooring Master will advise the ship's officer in charge concerning lifting techniques.

Sundry Hose Connecting Equipment: Tankers shall be equipped with the necessary blocks, tackle, wrenches, gaskets, bolts, nuts, etc., to efficiently effect the hose connection.

Flange sizes: 16 in. – 12 in. reducers will come on board the tankers with the mooring gear thus enabling tankers with either 16 in. or 12 in. ASA 150 lb. flanges to connect directly to the Terminal hoses. Flange size 16 in. – 12 in., 16 in. – 10 in. reducers with ASA 150 lb. flanges are available if required to enable tankers with 12 in. – 10 in. manifold connections to connect to the Terminal hoses.

Communications During Loading: (See "Radio"). All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the Production Platform constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 16, 14 or 8 if the vessel is so fitted.

Failure of Communications: Should communication with the Production Platform fail, loading will cease.

Emergency Shut down: An emergency cessation of loading may be effected by the ship's VHF Channel 16.

Loading rate: At SPM No. 1 the maximum loading rate will be 40,000 barrels per hour. At SPM No. 2 the maximum loading rate will be 100,000 barrels per hour.

BALLAST: *Precautions Regarding Pollution:* It is the responsibility of the ship's Master to see that no crude oil (or bunkers', diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship whilst in the area. Drip pans should be used, especially when disconnecting hoses in order to prevent spillage overboard.

Scuppers to be Plugged: Before loading commences, all overside scuppers shall be made oil-tight.

No facilities for Receiving Dirty Ballast: At Fateh Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard. The dirty ballast will be collected into one tank, measured and left aboard.

Discharging Ballast at Night: During the discharge of ballast in darkness, the sea shall be adequately lighted in the area of discharge.

MEDICAL: At Fateh Terminal medical and dental services are not available. In emergencies requiring hospitalisation, the patient will be taken by boat from the tanker to the production platform, hoisted to the upper deck of the platform and flown by helicopter to Dubai. The shipowner will be charged for all expenses incurred.

FUEL: Bunker "C" is available at the Fateh Terminal Anchorage from an awaiting bunkering tanker, providing sufficient notice has been given. Arrangements should be made through local shipping agents in Dubai.

GENERAL: The following are not available at Fateh Terminal: fresh water, stores, boats for hire; repair facilities; facilities for changing ship's crew.

There is no shore leave.

AGENT: Gulf Agency Co. (Dubai) Ltd., POB 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel. 431300, (24 hours service). Telex 45448, 45809 ("GACDB EM").

VHF Radio: standing by on Channel 16 (156.8 mHz) communicating on Channels 14, 12 or 6, call sign "Confidence Dubai".

SSB Radio: standing by on 6910 mHz lower side band, communicating on frequencies 3539, 6910 and 7010 mHz. Call sign "Confidence Dubai".

FUJAIRAH: 25.07 N., 56.18 E.

Port under construction.

LOCATION: 3 km. North of Fujairah town and 20 km. South of Khor Fakkan.

DEVELOPMENTS: Facilities will include 10 berths for containers. Roll-on/Roll-off and general cargo. Depth alongside 10 m. No length restrictions. Also 4 berths for coasters with depth alongside of 7 m.

The first temporary berth will be available in 1978 and completion expected in 1981.

JEBEL DHANNA, Abu Dhabi: 24.11 N. 52.38 E.

(See Plan Book)

COURTESY FLAG: Vessels calling at ports in the State of Abu Dhabi should fly the flag of the United Arab Emirates, and the flag of the State of Abu Dhabi.

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Tower to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and min. width of 800 ft. between Nos. 7 and 10 buoys.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Nos. 13 and 20 buoys, leaving Alaq Island to starboard. From Nos. 13 and 20 buoys the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: Notice of Readiness will be received by the Company Representative provided the vessel is ready to load. Lay time will commence 6 hours after receipt of Notice of Readiness, berth or no berth.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

EARLY DEPARTURE PROCEDURE:

A. Early Departure Procedure is presently in effect at Jebel Dhanna.

B. This procedure will be offered to Masters on a voluntary basis but will exclude voyages of less than 10 days' duration.

C. Official declaration indicating acceptance/non acceptance will be signed by the Master on arrival.

D. If EDP is requested, Bill of Lading and Manifest will be prepared in advance except for cargo figures and be presented to Master for signature. Master may authorise Agent to sign all other documents on his behalf.

E. Bills of Lading and Manifest will be retained on board as indicated by documentation.

F. On completion of loading, the Terminal will endeavour to present completed cargo documents on board prior to sailing. In the event that the vessel sails before documents are completed vessel to maintain continuous radio watch after sailing, until cargo loaded quantities have been passed to the vessel by the Agent via Bahrain Radio. Advice of cargo loaded quantities should be transmitted to the vessel within 2 hours of sailing, and the quantities so advised should be inserted on Bills of Lading and Manifests.

G. In case of disagreement on Cargo figures, Master may authorise Agent to serve an official Letter of Protest.

H. All ship's documents, sent to London office under this procedure must be endorsed "EDP applied".

This procedure is used by all vessels loading at Jebel Dhanna terminal, but the oil company pointed out that a very limited use of this procedure is actually made inasmuch as all ship's documentation is generally put on board by the time a vessel has disconnected hoses, unmoored and is ready to sail.

PILOTAGE: Pilotage from Ghasha Tower inward and outward compulsory for all sea-going vessels. Give 48 hours notice of ETA, etc., to Agent via Cable and Wireless, Bahrain. On confirmation of ETA on VHF Channel 16 either to "Jebel Dhanna Radio" or "Jebel Dhanna Pilots", Pilot will board inward bound ship to West of Ghasha Tower Beacon and will conduct through Inner channel to berth. Pilots act as Mooring Masters and direct loading operations. Pilots disembark off Ghasha Tower outwards.

TIDES: In outer approaches, i.e. from Zarqa to Ghasha Tower, tides almost purely diurnal, but semi-diurnal effect becomes more evident as Dalma is approached and is (comparatively) most marked at Jebel Dhanna. However, this semi-diurnal effect not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day throughout length of approach and at Jebel Dhanna, but times of high and low water at various control points are not coincident.

High water at 01 buoy occurs on average about 1.5 hours before high water at Jebel Dhanna, but differences may be from about half-an-hour up to 2.5 hours.

Tidal Streams. In berth area, streams generally do not exceed 0.25 knot and are predominantly confined to S.E. and S.W. quadrants. In outer approaches, streams appear to attain a maximum of 1 knot approximately along line of route, but this information should be regarded with caution as it depends on limited observation.

ANCHORAGES: If berth not available, or if ships cannot sail immediately after loading, they can anchor in an area South of Buoys Nos. 13 and 20 and North of Berths. This area marked by No. 15 buoy to West, No. 22 buoy to East and by berths to South. Alaq Island lies in the middle of this area and is marked by 2 buoys No. 17 and N. Alaq and by S. Alaq Beacon.

RESTRICTIONS: Vessels must receive clearance from Jebel Dhanna Terminal to enter channel. This is to ensure that all outward-bound vessels are aware of traffic movements in channel. Mooring, loading and unmooring carried out by day and night.

MAX. SIZE: (Also see "Berthing"). Vessels up to 350,000 d.w.t. can berth at Jebel Dhanna.

Note: Draft of laden tankers leaving Jebel Dhanna controlled by depth in Inner Channel between Nos. 7 and 10 Buoys. This is 46 ft. below Chart Datum and Zero of predictions. An allowance of 3 ft. under keel is considered sufficient for vessels up to about 100,000 tons. 4 ft. for vessels between 100,000 d.w.t. and 225,000 d.w.t., and 5 ft. for vessels greater than 225,000 d.w.t.

With 3 ft. under keel general limitations as follows:

(*a*) Ships drawing 44 ft. may sail at any time on any day.
(*b*) Ships drawing 45 ft. will rarely have to use tides.
(*c*) Ships drawing 46 ft. will usually have to use tides.
(*d*) Ships drawing 47 ft. will *always* have to use tides.
(*e*) Ships drawing 48 ft. will *occasionally be neaped.*
(*f*) Ships drawing 49 ft. will be neaped 294 days ± per year. The best months are June, July and August. Meteorological conditions may reduce the tides by up to 1 ft.

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 5.5 in. circumference wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.' Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

HEALTH: International Maritime Declaration of Health. In case of suspected disease Agent to be informed on VHF Channel 16. Smallpox and cholera inoculation required.

RADIO: Vessels bound for Jebel Dhanna should give 48 hours notice of their ETA Ghasha Tower Beacon to their Agents via Cable & Wireless Bahrain, also advise the quantity of cargo required, SWL of derricks, number of hours ballast and maximum loading rate.

A continuous listening watch is maintained on Channel 16 – 156.80 Mc/s. by the Terminal at Jebel Dhanna, call sign "Jebel Dhanna". Vessel's ETAs should be confirmed using Channel 16.

The ship's Agents and "Jebel Dhanna Pilots" also maintain a listening watch on Channel 16. By calling "Jebel Dhanna Pilots" before arrival, arrangements can be made by radio regarding mooring, loading hose connections, etc., so that unnecessary delays to the vessel may be avoided.

TUGS: No tugs available.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys. Arrangements in advance by contacting Jebel Dhanna Pilots on Channel 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 sea-line berths Nos. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36-in. lines, and Nos. 3 and 4 supplied by 42-in. lines, each terminating in a header which passes under vessel in berth.

Berth	*Draft Accept-able* (ft.)	*Approx. d.w.t.* accept-able*	*Max. loading rate* (t.p.h.)	*Strings of flexible hoses*	*Length of sea line* (ft.)
No. 1	45	83,000	6,000	2×12 in., 2×16 in.	16,269
No. 2	46	85,000	6,000	2×12 in., 2×16 in.	16,427
No. 3	49	90,000	8,500	4×16 in.	19,000
No. 4	49	90,000	9,500	2×16 in.	17,200

*Deadweights shown for vessels loading full cargoes. Part Cargoes may be greater. Nos. 2, 3 and 4 Berths can accommodate VLCC's but No. 2 berth is restricted to vessels having a max. LOA of 1,100 ft.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows:

No. 1 Berth, 51 ft.; No. 2 Berth, 52 ft.; Nos. 3 & 4 Berths, 55 ft.

Swinging circle defined as 1.5 ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft. Rising tides permit deeper loading in berths.

Seawards ends of pipe-lines, terminate in 12 in. or 16 in. flexible hoses, there being 4 such strings of hoses at each berth. 2 taken up on each side of vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons and for 12 in. diameter hoses a SWL of not less than 5 tons.

Gear should be rigged on both sides of the vessel in order to lift hoses on either side or both sides simultaneously as required.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 12 in. or 16 in. hose as may be necessary.

Note: Where a vessel has 2 or more loading connections, those used should not be less than 7 ft. apart.

Hose Hang off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on both sides.

LOADING: *Flash Point:* The flash point of Murban Crude is below 32° F.

Crude Oil Temperatures: While every effort will be made to keep the loading temperatures of export crude below 150° F., there may be times when this temperature is exceeded.

Whenever possible Masters will be advised when this temperature increase is likely to occur, but in Jebel Dhanna the temperature ashore varies according to loading rate, production rate, changes in production pattern from the field, tank levels, etc., and the temperature difference between shore and ship varies according to loading rate, quantity of cargo taken, berth occupied and when last used, etc., thus the ship's temperature obtained on a previous voyage may be substantially different to that obtained on the current voyage and the previous vessel's temperature can be taken as an approximate guide only.

ADCO will not accept any responsibility for the failure by the Master of any tanker loading at Jebel Dhanna to take appropriate action to receive hot oil, prevent any damage to his vessel and/or injury to his crew.

H_2S Content: Murban crude contains concentrations of H_2S (Sulphuretted Hydrogen). Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned should be left with all possible despatch until adequate ventilation can be carried out. The combustible gas indicator may not detect this type of gas. The foregoing must be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. However, the under-noted precautions have been evolved as necessary to provide against a possible accident and should be strictly observed.

During loading gas should only be allowed to escape via the agreed venting arrangements.

When ullaging or sampling, personnel should stand facing at right angles to the wind direction and so avoid inhaling gas. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored which means that at least two people should attend the operation.

No one should enter any pump room or any compartment where gas could collect unless another person is standing by.

Life lines, breathing apparatus and resuscitator should be readily available.

As a precautionary measure, the gas ejector for pump room should be put into operation at any time entry is made into this space whilst the possibility of H_2S gas entering pump room from cargo or empty tanks exist.

Loading Operations: The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading. The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck has satisfied him that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs are to be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the Ship as to any signals needed for local requirements.

The Mooring Master will bring a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading, the cargo being received shall be frequently measured, thereby preventing loss of oil through a leaking hose. This particularly applies at night, as seepage of oil is practically invisible on the water during darkness.

Caution: The oil loading rates to ships are controlled on shore and an extremely dangerous situation can arise if a ship's valves are closed against the flow of oil.

Particular care must be exercised by ship's personnel to ensure that the Terminal is given timely advice should any reduction be required in the loading rate and adequate "Stand-by" notice must be given before the Final "Stop". At all times the Terminal must be advised when an increase in the loading pressure can be expected due to switching tanks, topping up, etc. To prevent excessive pressure from surge on ship/shore connections, ship's valves should be closed slowly.

The Terminal facilities at Jebel Dhanna have been designed so that tankers can be loaded by turbine driven loading pumps at max. rates up to 6,000 t.p.h. in berths 1 and 2, 8,500 t.p.h. in berth 3, and 9,500 t.p.h. in berth 4. Availability of max. loading rates is dependent on the number of berths occupied.

If vessel is unable to accept the max. loading rate available, then ADPC will be grateful if you will give a brief explanation of the reason for the limitation and we suggest some of the reasons which may govern your restrictions:

(a) Inadequate venting system.
(b) Condition of ship's lines and valves.
(c) Inexperience of crew.

and there may be other reasons.

We are anxious to obtain this information in order to assist in formulating plans for future development.

The quantity of cargo received on board is the responsibility of the ship and no overage may be sent back ashore.

When loading is completed, hoses will be disconnected and lowered to the sea bed, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Mooring Master or direct to sea.

BALLAST: No facilities for disposal of slops or dirty ballast.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

It is essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Mooring Master's requests as to ballast quantity and disposition.

Jebel Dhanna is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid having the vessel in a flying light condition.

There must be no cleaning of boiler tubes whilst ship is in port. All pumproom sea valves must be closed before commencement of loading.

DENSITY: 1.031.

FRESH WATER: Not available.

FUEL: Bunkers are not available at Jebel Dhanna. A vessel proceeding to a nearby bunkering port should repeat her ETA to Jebel Dhanna Terminal for information.

If ADCO have sufficient information concerning expected arrivals, taking into consideration time taken to bunker, they will advise Masters when they consider that probable delay at Jebel Dhanna can be avoided by the vessel loading cargo before proceeding to the bunkering port.

Similar advice may be given in exceptional circumstances when there is a possibility that unduly large stocks of oil may necessitate shutting down the field.

FIRE PRECAUTIONS: As laid down in the Abu Dhabi (Petroleum Ports) Law No. 12 for 1973 and IOTTSG Safety Guide.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: Tobacco: No restrictions in quantity on board but must not be conveyed ashore or from one vessel to another without appropriate written permit from Customs Authorities and Port Officer. Wine and/or Spirit: Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, prohibited without appropriate written permits from Port Officer.

Shipmaster's Report: 1978

All alcoholic liquor must be under bond and sealed.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS/DRY DOCKS: No facilities.

REPATRIATION: With sufficient notice Agents will assist in any repatriation. Landing permit is required for all sign on/sign off personnel for which Agent requires full name/nationality/seaman book/passport number and also 4 to 5 working days to process same. However, facilities are limited and if possible crew changes should be made at other ports.

Shipmaster's Report: 1978

Immigration Authorities require at least 4 days notice and preferably 7 days notice via Agent.

AIRPORT: One mile distant, small air strip owned by ADCO for private use. Nearest International Airport is Abu Dhabi the capital of the State.

TIME: Local time GMT plus 4 hours. No alterations made to clocks during year.

MEDICAL: A male nurse can occasionally be obtained from LAMNALCO, the piloting company, upon request of ship's Agent, but in case of extreme emergency an aeroplane can be chartered from Bahrain or Abu Dhabi to pick up the patient at Jebel Dhanna for transfer and treatment in Abu Dhabi, Bahrain or Dubai.

POLICE/AMBULANCE/FIRE: No Fire or Ambulance facilities available.

The Abu Dhabi Defence Force, Oilfield Security Section maintains a police post at Jebel Dhanna and is responsible to act in case of accident or other emergency, whether ashore or in territorial waters.

TELEPHONES: None.

SERVICES: None.

SHORE LEAVE: Crews not allowed ashore.

REGULATIONS: The Abu Dhabi (Port of Jebel Dhanna) Regulation 1967.

AUTHORITY: Abu Dhabi Company for Onshore Oil Operations (ADCO).

AGENT: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd., Jebel Dhanna, U.A.E. Cables: "Confidence Abu Dhabi". Telex: Abu Dhabi 2248. Tel: Jebel Dhanna 05–710–26. Radio: Marine VHF radio, stand-by Channel 16 (156.8 mHz) call sign "Confidence Jebel Dhanna".

KHOR FAKKAN: 25.22 N. 56.22 E. (See Plan Book)

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival, or must be forwarded to ship's Agent prior to arrival:

Immigration:

Crew Lists (2 copies)
Passenger Lists (2 copies)

Customs:

Crew Lists (2 copies)
Passenger Lists (2 copies)
Cargo Manifests (2 copies)
List of Alcoholic Beverages (2 copies)

Port Operator:

Certificate of Registry (1 copy) on request
Classification Certificates (1 copy) on request

The following documents should be handed to the Port Operator by the ship's Agent at least 6 working hours prior to the vessel's arrival.

Cargo Plan (1 copy)
Discharge List (1 copy)
Transhipment List (1 copy)
Dangerous Cargo Manifest (1 copy)
Refrigerated Container Manifest (1copy)

PILOTAGE: Pilotage is compulsory for all ships proceeding beyond the fairway buoy. Port Khor Fakkan will operate a 24 hour, 7 day a week pilotage service. Vessels approaching the Port should await Pilot to seaward of the fairway buoy. The extremity of the breakwater 25° 21′ 28″ N. 56° 22′ 43″ E.) is marked by a white occulting light visible 10 miles.

ANCHORAGE: A limited number of vessels may anchor in Khor Fakkan Bay to the North of the fairway with the prior approval of the Port Operator.

MAX. SIZE: Max. draft entering and leaving is 12.6 m. (40 ft.) range max. 2.5 m. – height of wharf at HW 1.8 m.

No restrictions on LOA.

HEALTH: Normal quarantine regulations apply. Radio pratique will be granted on receipt of radio message from Master via his Agent, stating that no serious illness has occurred during the preceding 30 days.

All crew members must be in possession of valid smallpox and cholera certificates. The Health Officer will board when the vessel is alongside.

RADIO: *Notice of Arrival:* Vessels should advise their Agent ETA Port Khor Fakkan, giving draft, LOA and intended cargo operations to be performed at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessel should contact Port Khor Fakkan signal station on VHF Channel 16 when within range.

VHF: Khor Fakkan Harbour Office can be contacted on Channels 16 and 74. All movement in and out of the harbour shall be notified to the control and permission to proceed obtained for each movement.

TUGS: 2×2400 h.p. (plus standby). Tug services are available for all ships entering the deep water harbour. At the discretion of the Port Operator, ships may be obliged to use the services of a tug or tugs. Tugs are fitted with VHF, fire fighting hoses, monitors and foam tanks.

BERTHING: Length of berth 430 m. Depth alongside 12.0 m. at LW Mooring gangs and berthing launches are provided.

Port Equipment: 2×40 ton Mitsubishi gantry cranes; 4×40 ton electric transtainers; 6 straddle carriers; yard tractors and trailers. Additional equipment such as forklifts, mobile cranes, pallets and barges available on request from the Port Authority.

Storage Facilities: The terminal comprises an area of 100,000 sq. m. and is capable of handling 150,000 t.e.u.'s per year.

Container Freight Station: A container freight station is available at Port Khalid, Sharjah close to the main highway linking Sharjah with its West coast neighbours.

STEVEDORES: *Working Hours:* The port will work on a 24 hour, 7 day a week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except Public Holidays.
First shift 0600 to 1500 hrs. (1 hour meal break)
Second shift 1500 to 2400 hrs. (1 hour meal break)

Normal working hours are subject to change during Ramadan when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1200 hrs., for work during the first shift on the following day and by 0900 hrs., for work during the second shift.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

FRESH WATER: Fresh water is obtainable. Agents must notify the tonnage required 48 hours prior to ship's arrival.

FUEL: No facilities at present.

REPAIRS: Marine engineering workshops capable of handling most repairs are available.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of the new Sharjah International Airport will permit efficient crew changes and repatriation. Offshore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ships passengers require a valid visa for transit or temporary stay.

AIRPORT: Sharjah and Dubai.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted to crew members provided identification card or seamen's papers are deposited with Immigration Office situated in the port and collected upon return.

GENERAL: *Pollution:* The provisions of the Khor Fakkan Maritime Law shall apply with respect to the operation of vessels in Khor Fakkan coastal waters.

Garbage disposal services are provided by the Port Operator and are compulsory.

Ships' Chandlers: Complete chandlering facilities are available, handling provisions, laundry and bonded stores.

Water for Labour: A supply of potable water is to be made available to port labour working on board a vessel.

AUTHORITY: Khor Fakkan Port Authority.

AGENT: Gulf Agency Co. (Sharjah) Ltd., POB 435, Sharjah U.A.E. Cables: "Confidence", Sharjah. Telex: 68019 ("Confid SH"). Phone: 22163, 23503.

MINA JEBEL ALI, Dubai: 25.08 N., 54.55 E. (See Plan Book)

FLAG: U.A.E. and Dubai Emirate.

DOCUMENTS: The following should be airmailed to Agent before ship's arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
7 Cargo Manifests.
2 Freighted Manifests.
1 Copy Bill of Lading.
3 Crew Lists required (on arrival).

APPROACHES: "Mina Jebel Ali" light float on centre line of final channel in 25° 15′ N. and 54° 47′ E. (Gp. Fl. 3 ev. 12 secs. 15 miles) with channel entrance bearing approximately 135° and approximately 12 miles from light float. Proceed with caution as dredging operations are under way.

PILOTAGE: Compulsory. Pilots will board in the area between "Mina Jebel Ali" light float and seaward end of buoyed channel.

RESTRICTIONS: Channel width to mid-1979: 125 m.×13 m. deep.
Channel width at end-1979: 175 m.×13 m. deep.

MAX. SIZE: LOA 225 m. with draft not exceeding 11 m.

Max. draft: In channels 11.5 m.
On quays Nos. 4a and 10: 10.5 m.

TUGS: 2×2,500 h.p. may be available.

RADIO: From 1st May, 1979 vessels should call "Jebel Ali Port Control" on Channel 16 VHF and then switch to working frequency agreed upon with Port Control.

HEALTH: Not applicable at present but expected to be the same procedure as at Port Rashid.

BERTHING: *Berths available:*

Mid 1979	*End 1979*
Quay No. 1 Berth 1-1a 320 m. each	3 Additional Berths
Quay No. 3 Berth 3	4 Additional Berths
Quay No. 4a Berth 2	2 Additional Berths
Quay No. 10 Berth 4	1 Additional Berth
	Quay No. 7 – 6 Berths
	Quay No. 8 – 2 Berths
	Quay No. 9 – 4 Berths

FRESH WATER: Not on quays in 1979.

FUEL: May not be available till mid or late 1979.

CARGO HANDLING: 2×40 ton container cranes operational by May 1979. Only Quay No. 10 will have covered shed in 1979.

STEVEDORES: By Port Authority of Jebel Ali.

LIGHTERAGE: Not available.

MEDICAL: As available in Dubai.

TELEPHONE: Not available.

GENERAL: Mina Jebel Ali is in the construction stage. Channel and basin dredging will continue throughout 1979.

Warning: Gas pipe-line installed 2 – 6 miles East of channel from shoreline to "Fateh" field. Vessels not to anchor East of centre line of channel.

REPORT: The following was received from Sir William Halcrow and Partners in February 1979.

Pilotage: Obligatory and provided by Port Authority.

Anchorage: To be defined by Port Authority. Poor holding ground qualities.

Navigation Aids: Harbour and approaches will be under radar surveillance from the end of 1979.

Entrance Channel: Channel will be opened in phases as follows:
End '78 – 125 m. wide×13 m. deep (below lowest water)
End '79 – 175 m. wide×13 m. deep
End '80 – 235 m. wide×16 m. deep.

Entry Restrictions: To be defined by Port Authority. Channel to be 20 km. long×235 m. wide×16 m. deep and incorporates 25° bend; bottom is rock; outer 17.5 km. of channel is unprotected but buoyed. Tidal range is 2 m. max.; cross current is tidal and parallel to coast and 1.5 knots max.; prevailing wind/waves on same bearing as channel (315°).

Radio: To be arranged by Port Authority. UHF and VHF will be available.

Berth Availability:

Quay	*Min. Depth of Water (m.)*	*Berth Length (m.)*	*No. of Berths Available*			
			Mid '79	*End '79*	*Mid '80*	*End '80*
1	14.0	300	1	3	5	7
2	14.0	300	—	—	—	2
3	14.0	300	2	3	6	8

5	11.5	180	—	—	—	12
6	11.5	180	—	—	—	1
7	11.5	180	—	6	6	20
8	11.5	180	—	2	2	2
9	11.5	180	—	4	4	4
10	11.5	180	5	6	6	6
		Total:	10	26	31	66

"Availability" defined as quay constructed with reclamation behind and full water depth in front. Roads, services and buildings may not be completed till later. Some berths will be allocated to specific users i.e. Ore and Container Berths.

Tankers: Tanker Berth operational by mid 1979, designed for 75,000 d.w.t. tankers, but approach channel restriction will limit size until end 1980.

Fresh Water: Limited quantities available at present; full water bunkering facilities will be available in due course.

Fuel: To be determined by Port Authority, probably barge bunkering.

Port Authority: Port Authority Jebel Ali, operational by mid 1979.

AUTHORITY: Port Authority of Jebel Ali.

AGENT: Gulf Agency Co. (Dubai) Ltd., POB 2404, Dubai, U.A.E. Cables: "Confidence Dubai" tel 431300 (24 hour service). Telex: 45541 and 45448 (AB GAC DB EM). Radio: Marine VHF, stand-by Channel 16. Call sign: "Confidence Dubai". RT: 2182 kc frequency.

MINA SAQR: 25.59 N. 56.03 E. (See Plan Book)

PORT LIMITS: 'Mina Saqr' and its limits include all waters, installations and the creek of Hanna bounded within 3 mile radius to seaward from the main breakwater light in position Lat. 25° 58′ 48.35″ N., Long. 56° 02′ 43.7″ E.

POSITION: Port Saqr is situated 15 miles by sea and 22 km. by road North of Ras Al Khaimah. On chart BA.2888 it is 1 km. North of Hanna Creek in Lat. 25° 58′ N., Long. 56° 03.5′ E. Jubail Al Harim (6,843 ft.) overlooks the port, and is 10 miles East. The port is bounded by main and lee breakwater.

DOCUMENTS: Following documents to be forwarded to the Agents at least 7 days prior to the vessels arrival:–
3 copies Dangerous Cargo List.
2 copies Stowage Plans.
2 copies Hatch List.
6 copies Cargo Manifests.
1 copy each of Bills of Lading.

On vessels arrival, 4 copies of Crew Lists, 4 copies of Vaccination Lists, Crew Health Certificates, Ships Certificates, etc. to be kept ready for inspection by the officers.

PILOTAGE: Pilotage is compulsory. Pilot may board from launch or by tug at approach buoy and in all cases a pilot ladder should be provided and a lee given. Pilot boards from 0600 hrs. to 2359 hrs., though generally vessels not wishing to work cargo immediately will not enter the port outside daylight hours. Vessels may leave up to 2359 hrs. or later by arrangement with the Harbour Master in special cases.

Master to contact 'Ras Al Khaimah Port Control' on VHF Channel 16 at least 2 hours prior to arrival. ETA cables to be sent to the "Harbour Master MINASAQR Ras Al Khaimah" and also to Agents. Vessels to keep listening watch on VHF Channel 16 and await instructions from port.

ANCHORAGE: The area bounded by the port limits and to seaward of the main breakwater has been reputed as an area with good holding ground. Depths are from 11 to 14 m.

RESTRICTIONS: Vessels may enter or leave the port between 0600 and 2359 hrs. or later by arrangement with Harbour Master in special cases. No restrictions on entering during tides.

MAX. SIZE: No restrictions on breadth of a vessel but length not to exceed 800 ft. for easy berthing. Permissible draft in all the berths is 38 ft. Range of tide is maximum 1.6 m.

HEALTH: Normal quarantine regulations apply and pratique is granted subject to port health authorities approval. The health officer boards the ship only when vessel alongside. Suspected disease or fever on board vessel to be reported to Harbour Master by cable prior arrival and await instructions.

RADIO: All cables to be routed through Bahrain Radio. Vessels should cable their Agent, at least 72 hours prior to arrival, the ETA, LOA, expected draft on arrival, cargo and hatchwise stowage.

VHF: Port equipped with VHF Radio standby Channel 16 with many other working channels. Port Signal Station is at present manned between 0700 hrs. to 1400 hrs. only but can be contacted from 2 hours prior to vessels arrival if advance ETA notice is given to the authority. Vessels should report the ETA, LOA, draft, details of cargo to be discharged, stowage, etc.

RADAR: Presently port not equipped with radar.

TUGS: Tugs join the vessel at anchorage, the practice being to secure alongside, using ship's lines. Derricks should be swung in and gangways hoisted. Tugs are fitted with VHF.

BERTHING: The harbour and entrance channel is 40 ft. MLWST. A draft limit is imposed of 38 ft. The harbour provides 165 acres of sheltered water and is enclosed by main and lee breakwaters. Deep water quays totalling 1,490 m. in length will provide berthing facilities for 7 ships. Included in this are 2 Ro/Ro ramps and 2 of the berths will be available for container traffic. Plans are now being developed for the installation of a container crane and supporting equipment.

The small boat harbour and fishing harbour provide a further 725 m. of quay, and offer a dredged depth of 15 ft.

All the 7 berths, including 2 Ro/Ro berths are now in operation.

Distance between quay and water level maximum 3.8 m. at LW and 2.2 m. at HW.

Discharging to be carried out using ships gear. All berths are general cargo berths. Berths Nos. 3 and 5 have ramps for Ro/Ro vessels.

CRANES: No shore cranes available at berths therefore vessels calling should be self-sustaining. Mobile cranes of various capacities available locally for hire if required. No floating cranes available at present.

BULK CARGO FACILITIES: No special berth allocated for discharge of bulk cargo. Bulk cargo handled at present are Iron Ore, Gypsum and Bauxite and vessels with this cargo are allotted any of the general cargo berths subject to availability. No conveyor system or special equipment exist at present and as such cargo is discharged using vessels derricks and suitable slings.

SPECIALISED CARGO-HANDLING FACILITIES: Have 2 berths, Nos. 3 and 5 with ramps to accommodate Ro/Ro vessels. Port has plans for installation of a container crane and supporting equipment.

BRIDGES: Nil.

STEVEDORES: Advance ETA cable to be sent by Master to the vessels' Agents to order required gangs to work on board vessels. Labour gangs are supplied by a labour contractor, holding monoply, and the gangs work on board the vessel directly under the supervision of the vessel's officers and the stevedoring company accepts no responsibility whatsoever for any damage either to the vessel or its cargo. Subject to proper stowage and vessels capability average rate of discharge per gang per day of 3 shifts working would be as follows;–

General cargo	Approx. 60/80 tons
Steel/Timber	Approx. 140/180 tons
Bagged cargo	Approx. 250/300 tons
Bulk Iron ore	Approx. 250/300 tons
Bulk Gypsum/Bauxite	Approx. 180/200 tons

Working Hours: 0700 – 1400 hrs. and 1600 – 2200 hrs.

MEDICAL: Advisable for Agents to receive at least 24 hour's advance notice of required medical attention but can also attend to this at short notice. Hospital facilities are available. Officers/Crew should have valid Smallpox, Cholera and Yellow Fever certificates.

TANKERS: No tanker berth in port or offshore. Tankers will discharge at any berth, through bunker line – this will be fuel and diesel oils only.

DENSITY: 1027.

FRESH WATER: Fresh water available in berth Nos. 1 to 6 with 2 points to service tanks fore and aft as required on a 24 hour basis. Cost of water will probably be Dh. 7/– per ton.

FUEL: Shell Markets (ME) Ltd. hold monopoly to supply bunkers (Fuel oil max. viscosity 1500 sec., Marine Diesel oil and Gas oil) to vessels in port. All sizes of reducers are available and the pumping rate is: Fuel oil 200 t.p.h.; Gas oil 250/300 t.p.h, subject to vessel's receiving capacity. Presently there are 6 bunker points in berths Nos.1, 2 and 3. Owners requiring bunker supply should stem nomination through Shell, London.

Marine lubricants of all brands can also be supplied provided nomination through the suppliers received sufficiently in advance.

FIRE PRECAUTIONS: The port has its own auxiliary fire brigade and, when required, the services of the Ras Al Khaimah fire brigade are available. The harbour tugs are fitted with fire fighting hoses and monitors.

CONSULS: None at this port but most of the consulates can be contacted at Abu Dhabi or Dubai.

REPAIRS: Few facilities are available at present but planned for the future. Fully equipped engineering workshops capable of carrying out fairly extensive repairs operate a 24 hour maintenance or repair service and are available from Dubai.

DRY DOCK: No drydock in Mina Saqr. The nearest drydock is the one under construction at Dubai which is expected to be ready early 1979.

SURVEYORS: Lloyds, ABS, NV and representatives of various classification bureaux and private surveyors reside in Dubai.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing of the hatches to be carried out by the crew with the assistance of the stevedores, if necessary.

CUSTOMS ALLOWANCE: Normally, bonded stores are not sealed by the customs authorities. However, only limited stock should be left with the officers/crew for their consumption on board vessel and the rest should be kept locked under the custody of the Master. Sale of bonded stores is strictly prohibited and persons indulging in this will be punished according to local custom.

REPATRIATION: Efficient crew changes and repatriation can be carried out on receipt of advance information.

AIRPORT: Ras Al Khaimah International Airport, situated about 45 kms. South of Mina Saqr, operate daily flights to various destinations.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: Normal Muslim holidays during which time port working hours will be restricted. Fridays are the weekly holidays.

POLICE/AMBULANCE/FIRE: Telephone numbers are:– 29351 for Police. 21251 for Ambulance. 21212 for Fire.

TELEPHONES: No arrangements for placing telephones on board vessels but each shed in the port is provided with a telephone and can be used for making local calls only.

For international calls, Agents offices situated outside port area should be used. Ras Al Khaimah has excellent communication to most countries as it has its own earth satellite station.

SERVICES: Ship chandlers, laundry, exchange of films, etc. available in Ras Al Khaimah. Radio/Radar repairs, tank cleaning equipment, scamping facilities, etc. can be arranged from Sharjah/Dubai.

SHORE LEAVE: Can be granted and for this purpose the agents should hand over a crew list to the immigration department who will issue shore passes. Prior to vessel's departure, Master to ensure that all shore passes are handed over to the Agents who will surrender them to the immigration department. Agents should advise Immigration Department by letter if any crew changes to be effected.

REGULATIONS: None.

DELAYS: No berthing delays.

DEVELOPMENTS: No major developments planned for the immediate future as this is a new port just completed.

AUTHORITY: Port Manager, Ras Al Khaimah Port Services.

AGENTS: International Shipping Agencies (Ras Al Khaimah) Ltd., P.O. Box 5162, Ras Al Khaimah, U.A.E. Cables: ISASHIP, Ras Al Khaimah. Telex: 9226 "ISASHIP RK". Tel: 21266, 21966.

MINA ZAYED (Abu Dhabi): 24.32 N. 54.23 E.

(See Plan Book)

COURTESY FLAG: Vessels calling at ports in the State of Abu Dhabi should fly the flag of the United Arab Emirates as a courtesy flag, and *not* the flag of the State of Abu Dhabi.

DOCUMENTS: 8 copies of Cargo Manifest are required, with full cargo particulars, such as Bill of Lading number, marks/numbers, description, weight and measurement. It is essential that all this information is given on the manifest for each consignment, and the manifests should reach the Agent prior to arrival of vessel in order to be submitted to the Port/Customs Authorities 48 hours before the ship is berthed.

Also stowage particulars should be given in full to enable the Agent to advise the Port Authorities of the equipment and labour required for efficient handling of the vessels.

PILOTAGE: Pilotage in Mina Zayed is compulsory.

Pilots will board incoming vessels 0.5 miles West of the Fairway Buoy. Ships should wait for Pilots in the area stated above and not enter the channel unless instructions to the contrary are given, and hoist the International Pilot signal.

Pilotage presently, and until further notice, is offered during daylight hours only, starting at 0300 hrs. GMT throughout the year – closing down as follows:

Pilots board in- and out-going vessels 1 hour before sunset or 1 hour before 1500 hrs. GMT whichever occurs first corresponding to the seasonal timings.

Night pilotage is offered, for the time being for Ro/Ro and container ships only, under the provision the ship's Agents provide mooring gang, pilot boat; and tug(s) if necessary; at the discretion of the Harbour Master.

RESTRICTIONS: The channel is 152 m. wide, marked by red and black light buoys on port and starboard sides. The channel presently has a depth of 9.2 m. Tides are diurnal; tidal ranges are: maximum 2.04 m. (6.7 ft.) – minimum 0.09 m. (0.3 ft.) during Spring and neap tides, respectively.

Also see "Pilotage".

ANCHORAGE: The area enclosed by a 2 miles radius between West and North of the Fairway Buoy in position 24° 34.1′ N., 54° 19.8′ E. Good holding ground; water depth – 10.0 m. A.C.D. Deep draft vessels find lightering anchorage West and North of "A.D. Delta" light buoy.

RADIO: Vessels are to give their ETA's by cable through Muscat or Bahrain Radio, addressed to "Port Authorities – Mina Zayed, Harbour Office". Telex 2731 Portex AH, at least 72 hours prior arrival.

VHF: Mina Zayed Port Control work 24 hours a day, information to be given on VHF Channel 16 and 67 as required by Port Control.

TUGS: 2 tugs are required on every ship when berthing. Four harbour tugs available, 2×2,400 h.p. and 2×1,600 h.p.

BERTHING: At present 16 berths; Nos. 4 to 9 and Nos. 14 to 19 for deep sea vessels up to 31 ft. draft. (No. 19 for bulk grain). Nos. 10–13 for small craft, total length of deep sea berths 2,320 m.

Tower crane for discharging available, mobile cranes of sizes varying from 5 tons capacity to 75 tons, 6 electric cranes are available, 5×5 tons, 1×10 tons. Also forklift trucks, etc., are available.

STEVEDORES: Arranged through Agent, labourers work under direct supervision of vessel and her officers. Normal working hours for stevedore labour are from 0700 to 2230 hrs. No floating cranes for heavy lifts but mobile crane of 75 tons capacity available for hire for shore work. Reasonable tariff for handling container, Ro/Ro, car-carrier also priority for berthing container, Ro/Ro, car-carrier vessels.

MEDICAL: Fully equipped Government hospital. Qualified personnel, and most medicines available.

TANKERS: See "Das Island" and "Jebel Dhanna".

FRESH WATER: Available at all berths in moderate quantities.

FUEL: Diesel oil and gas oil is available by barges.

FIRE PRECAUTIONS: The harbour tugs are fitted with fire-fighting equipment and in addition Mina Zayed Fire Brigade are available 24 hours a day.

LAUNDRY: Reasonably good laundries available at moderate rates.

PROVISIONS: May be arranged subject 48 hours notice to Agent.

AIRPORT: Regular scheduled international flights, also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: Friday is weekly holiday. Otherwise usual Muslim holidays observed. Cargo work generally not affected by holidays.

SHORE LEAVE: Permitted. A permit can be obtained from Immigration Department. Absolutely necessary that every crew member be in possession of valid seaman's book.

CLEARANCE: Port clearance must be obtained prior to departure.

DEVELOPMENTS: Two berths for container terminal will be equipped with the latest container cranes and equipment, 1 berth for Ro/Ro ramps. Completion date, June 1979.

Dredging channel to 13 m.; construction of a new dhow harbour West of Mina Zayed for small craft and for fishing boats depth 20 ft. with 2,000 m. of new quays.

AUTHORITY: Government of Abu Dhabi, Abu Dhabi Sea Port Authority.

AGENT: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd. POB 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 43008. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) and Marine HF, standing by on 3539 kc/s. Call sign "Confidence, Abu Dhabi". Telex 2248 ("GACAUH EM").

MUBAREK TERMINAL: 25.49 N. 55.11 E.

(See Plan Book)

LOCATION: The Mubarek Oil Terminal is situated off the island of Abu Musa, and is under the jurisdiction of the Emirate of Sharjah and operated by the Crescent Petroleum Company.

DOCUMENTS: One Crew List and valid Health Certificate.

EARLY DEPARTURE PROCEDURE: In force. Vessel's Agent signs all documents on behalf of the Master.

PILOTAGE: Vessels to be moored, anchored or manoeuvred at Mubarek Oil Terminal will be boarded by Company Mooring Master in the close vicinity of the suggested anchorage area. Vessels must not enter the restricted limits of the terminal unless a Company Mooring Master is on board.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Company Mooring Master's launch. A combination of pilot ladder and ships accommodation ladder so arranged that personnel can first use pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard the Company Mooring Master's portable radio. There should be adequate lighting at night. Vessels will provide a lee for the Company Mooring Master's launch when boarding and leaving.

The Company Mooring Master may require the vessel to anchor at any time he deems it necessary for the safety of the vessel or moorings or both or for infringement of the terminal regulations.

The Company Terminal Superintendent shall be the sole authority as to when the terminal is open or closed for normal working due to weather conditions.

NAVIGATION AIDS: A floating barge named *Baraka 1* (82,000 d.w.t.) 546 ft. long, used for storage of crude oil and for accommodation and headquarters of terminal personnel lies permanently moored in position 25° 49′ 43″ N., 55° 11′ 49″ E. approximately 065° 6,000 ft. from the terminal's single buoy mooring. *Baraka 1* is equipped with normal navigational warning lights and aids as required by convention.

A permanent fixed oil production platform, incorporating crude oil treating facilities, rises approximately 50 ft. above water at 25° 50′ 43″ N., 55° 11′ 49″ E., approximately 000° 6,079 ft. from the aforementioned *Baraka 1*. Said structures are equipped with 1 clear light flashing "U" code on each corner and a fog horn operating 2 seconds on and 18 seconds off. A permanently fixed flare structure (tripod) rises 150 ft. (flare tip) above water at 25° 50′ 56″ N., 55° 12′ 00″ E., approximately 037°, 1,716 ft. from the oil production platform.

READINESS: Notice of Readiness will not be accepted as at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered the time the Company Mooring Master boards the vessel, or the time the vessel is within the approved anchorage area, whichever occurs first. Notice of Readiness is to be in English.

ANCHORAGE: An anchorage area diameter 6,000 ft. has been established with the centre in position 25° 46′ 45″ N., 55° 13′ 13″ E.

When arriving by day display flag "Q"; by night display Red Light over White Light for Quarantine Service.

RESTRICTED AREA: A restricted area of approx. 38 sq. miles has been established with a boundary formed by an imaginary line from:

(a) 25° 54′ 26″ N. 55° 13′ 49″ E. in a W.S.W. direction
(b) 25° 15′ 14″ N. 55° 07′ 19″ E. thence in a S.S.E. direction to
(c) 25° 46′ 33″ N. 55° 09′ 37″ E. thence in a E.N.E. direction to
(d) 25° 49′ 44″ N. 55° 16′ 08″ E. thence in a N.N.W. direction to the position above.

RESTRICTIONS: Max. distance bow to manifold – 560 ft.

MAX. SIZE: 350,000 d.w.t.

HEALTH: Customs, Federal Police and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and "pratique" service. When arriving fly "Q" flag by day. And red over white light at night.

RADIO: Initial communication by radio between ship and Crescent Petroleum Company should be via Bahrain Radio, call sign "A9M", which operates on a 24 hours basis.

Company Mooring Master will have sole control of radio installations during the period a vessel is manoeuvring or moored, and no radio transmissions will be permitted on board ship except by the express permission of the Mooring Master in each case, only the Mooring Master may transmit on Channels 12 and 6 during the period he is on board. He will have a VHF radio telephone with him.

Mubarek Oil Terminal Radio Station call sign "Crescent–2" particulars are as follows:

Operated by Crescent Petroleum Company, Sharjah, position Lat. 25° 49′ 43″ N., Long. 55° 11′ 49″ E.

Frequencies: Channels 69 and 73 on VHF.

Hours of operation: 24 hours per day.

Mubarek Oil Terminal Control Centre keeps continuous watch on VHF radio telephone Channel 69. Vessel approaching the terminal not having Channel 69 will be contacted on Channel 16 when the terminal will request her to switch to an alternate channel.

Channel 73 is reserved for communications between ships in moorings and Mubarek Oil Terminal Movements Control Centre. This is a safety measure since oil flow to ships is controlled through Channel 73, which therefore must be clear at all times in case of need to stop oil flow for any cause.

Channel 16 is for calling and safety use only.

In emergency failure of Radio and/or Radio Telephone communication daylight lamp signalling may be used with the Oil Movements Control Centre located on *"Baraka 1"*.

It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival at the terminal giving ETA. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant, or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or Local Time. The 72 hour signal should include the following:

ETA.
Last Port of Call.
If any Sickness on Board.
If vessel has Clean Bill of Health.
Cargo quantity and Grades expected to be lifted in long tons.

The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Unreasonable insufficiency or inaccuracy in ETA messages may alter the order of berthing of ships to the advantage of those ships giving sufficient and accurate ETA messages. Acceptance of Notice of Readiness will also be affected by such insufficiency or inaccuracy.

On receipt of first signal from a vessel, terminal will transmit a message to her giving preliminary requirements of terminal. Masters are urged to comply with this in all details in order to facilitate vessel turnaround and government formalities.

TUGS: The Company maintains launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Company Mooring Master.

BERTHING: Vessels to load crude oil cargo will be normally accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Company radio station at Mubarek Oil Terminal, call sign Crescent-2, in order that they may be available when the weather is fit for resumption of operations. The Company reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. Further the Company reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

The Company Terminal Superintendent's decision on this will be final.

S.P.M.: The single point buoy mooring berth (SBM), 11 m. in diameter and located in 163 ft. of water, is designed to handle tankships in the 350,000 d.w.t. class, but fitted at present with hoses for vessels of 250,000 d.w.t. ASA 150 pound flanged connections and one 20 in. floating hose, reduced to 12 in. Tanker Rail Hose for connection to export tanker's loading manifold, the length of hose being 940 ft.

Average loading rate is 16,000 b.p.h. The SBM is also provided with one permanently attached 21 in. circumference synthetic fibre floating mooring lines.

EQUIPMENT: Vessels must have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension type winches may not be used except when they can be solidly locked and the constant tension feature not used.

All vessels should have ready messenger lines on forecastle head for bringing 2 mooring lines aboard from single point mooring (SBM).

Mooring winches on forecastle head for handling two 10 in. circumference synthetic fibre floating pick-up lines from SBM.

Adequate chafing gear to prevent damage to mooring lines.
Adequate mooring bitts to secure mooring lines.
Hose lifting winch, derrick and gear rigged for 7.5 tons.

HOSES: After the vessel is securely moored the cargo hose will be hoisted on the port side. The hose is lifted by ship's gear and crew, and all connecting of the hose will be done by them. The lifting derrick, equipment tackle, etc., should be topped off and ready on arrival. Terminal loading hose is fitted with ANSI 150 pound flat face flange and ships should have adapters and fittings to enable this hose to be connected to the ship's manifold. The Company Mooring Master advises the ship's personnel in hose lifting and connecting procedure; however, a deck officer must be present and must direct the ship's crew in all handling. The Company Mooring Master may reject a ship for unsatisfactory hose handling.

Do not close valves against crude flow.

Emergency flow stop signal if all communications fail will be a continuous sounding of the ship's whistle from either export tanker or *Baraka 1*.

CARGO SPECIFICATIONS:

Approx. Mubarek crude specifications:

Gravity	37 A.P.I. (approx.)
Sulphur	0.6%
B.S.&W.	Two tenths of one per cent or less by volume.
Metals	Not in excess of trace (100 PPM).
Viscosity	52 SSU at 120° F.
Flash Point	Below ambient temperature.
Pourpoint	30° F.
H_2S	Present

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Various consulates are located in Abu Dhabi and Dubai.

REPAIRS: No repairs, painting, etc., are to be made while berthing unberthing or in the berth.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship until time of leaving territorial waters.

TIME: Local time is GMT plus 4 hours throughout the year.

SERVICES: No supplies of any kind and no medical services (except in case of emergency and subject to a doctor being available), or other services are available at Mubarek Oil Terminal.

SHORE LEAVE: Not permitted.

GENERAL: *Light Dues:* The Middle East Navigation Aids Service (MENAS) charges light dues according to the size of the vessel and the number of visits to the Gulf during the year.

Positively no provision is made for dirty ballast: Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

Fire towing wires required fore and aft.

No swimming permitted whilst vessel in berth.

No fishing permitted at the berth or within the restricted navigation area.

AUTHORITY: Crescent Petroleum Company.

AGENT: Gulf Agency Co. (Sharjah) Ltd. P.O.B. 435, Sharjah. Cables "Confidence", Sharjah. Telex 68019 ("68019 Confid SH"). Telephone: 22163, 23503.

MUBARRAS ISLAND, Abu Dhabi: 24.26. N. 53.32 E
(HALAT AL MUBARRAS) (See Plan Book)

FLAG: All vessels calling at Mubarras are required to fly the national flags of Abu Dhabi which are available from ship's Agent.

LOCATION: Mubarras Island is located approximately Lat. 24° 28′ N., Long. 53° 22′ E., some 55 miles W. of Port of Abu Dhabi.

The island constitutes export terminal of crude oil produced by Abu Dhabi Oil Company Limited (Japan). Crude oil produced from the Company's Mubarras oilfield is transported to Central Facilities Platform (CFP) situated approximately 19 miles E.N.E. of Mubarras Island by 4 in. to 14 in. flowlines, thence relayed by a 18 in. transmission line to the Island. The Company has tank storage for 1,548,000 barrels of crude oil on the island.

Tanker loading is accomplished by means of a single-buoy-mooring (SBM) system installed about 8 miles offshore East of the Island.

Average API Gravity of crude oil to be located is 38° and flash point is below 35° Fahrenheit.

PORT LIMITS: The port area of Mubarras and its approaches cover the area bounded by straight lines connecting the following points:

(a)	24° 30.0′ N.	53° 36.0′ E.
(b)	24° 24.0′ N.	53° 36.0′ E.
(c)	24° 24.0′ N.	53° 27.0′ E.
(d)	24° 26.7′ N.	53° 21.7′ E.
(e)	24° 30.0′ N.	53° 21.7′ E.

Masters of all vessels entering the Port must follow instruction from the Company's Port Master as to approaches, anchoring, berthing and unberthing.

APPROACHES: *Approaches to Mubarras:* Japanese Charts No. 3173 and No. 3174 cover the approaches to Mubarras. For tankers arriving at Mubarras without necessary charts full information shall be given by telegram if a request is sent to "Confidence" Abu Dhabi via "GNV" Bahrain radio a few days before arrival.

Alternatively, if the vessel has VHF, the buoy positions shall be given to her upon request to "Mubarras Terminal" as she approaches but prior notice of requiring this service should be given in the vessel's arrival message.

Charts: The following charts are recommended for use in Abu Dhabi waters:

Japanese Charts Nos. 3173 and 3174
British Admiralty Chart Nos. 3733, 3734, 2889 and 3716.

Approaches to Mubarras – Navigational Aids:

Buoy Nos.	*Latitude North*	*Longitude East*	*Colour*	*Light Character*
Mubarras Approach	24° 57.00′	53° 18.39′	Red	Fl. R. ev. 5 sec.

7	24° 27.30′	53° 38.55′		
			240	2.20
8	24° 26.20′	53° 36.40′		
			261	3.10
9	24° 25.70′	53° 33.05′		
			Total Distance:	46.25

Anchorage Position	24° 26.80′ N.	53° 34.00′ E.
S.B.M. Position	24° 25.98′ N.	53° 31.54′ E.

Navigation in Shallow Waters: There are some shoals with depth of 14.9 m. (49 ft.) in the area between Buoy No. 14 and No. 15. Masters of outgoing vessels should pay due consideration to the effect of draw down at speed on vessel's draft in the shallow water, bearing in mind vessel's trim.

Conspicuous Marks: Quick flash White navigation lights (visibility range 5 miles) are fixed on following platforms and the flare stacks adjacent to each platform are visible from distance:

MR-6 Platform	24° 35′ 44″ N.	53° 43′ 53″ E.
CFP	24° 30′ 09″ N.	53° 42′ 09″ E.
AA Platform	24° 26′ 15″ N.	53° 39′ 53″ E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

PILOTAGE: Pilot is provided by the Company free of charge at the request of the vessel's Master based on express understanding and condition that he is aboard the vessel for the purpose of assisting the Master and becomes, for such purpose, the servant of the owners of the vessel.

It is recommended that the Master of the vessel calling at Mubarras for the first time requests Pilot to go aboard the vessel for both inward and outward passage of the channel. The Pilot will normally board the vessel in the vicinity of No. 5 Buoy and will advise the Master on approaches to the berth and he will remain on board to act as Mooring Master and direct loading operations.

Mooring Master: The Mooring Master provided by the Company will undertake pilotage, mooring and unmooring of the tankers.

The Mooring Master shall board vessels to be moored at SBM in the anchorage area or in the vicinity of No. 17 Buoy. The Mooring Master will advise the Master of vessel on approaches to the SBM, mooring, unmooring, connecting and disconnecting hoses and all other operations within the port area. All manoeuvring of vessels within the port area shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel shall remain solely responsible for the safety and proper manoeuvring of the tanker. Master or one of his qualified deck officers must be on the bridge at all times while the vessel is being manoeuvred.

ANCHORAGE: The tanker anchorage is within 0.5 miles radius of Lat. 24° 26.8′ N., Long. 53° 34′ E. Depth of water varies from 15.5 to 18 metres (50 to 59 ft.) The sea bed all around the anchorage is coral with approximately 6 ft. of loose sand. Holding is poor and a vessel is advised to pay-out at least six shackles of chain.

Vessels will be advised by radio of a suitable anchorage if both anchorage and the berth are not immediately available. Vessels should under no circumstances anchor or wait at the South area of Lat. 24° 57′ N. without obtaining prior approval of the Port Master.

Anchorage for Dry-cargo Ships: Anchorage for dry-cargo ships is directed by Port Master by VHF radio.

Prohibited Area for Navigation and Anchorage: The area within 1.15 miles radius from CFP is prohibited for navigation and anchorage. No vessels shall anchor within the range of 1.5 miles from submarine pipe-lines.

MAX. SIZE: See "Approaches" — depth over shoal areas; also see "Tides".

HEALTH: Vessels arriving at Mubarras Terminal must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform the Company if there is any person ill on board or if there has been sickness within the week prior to arrival.

Pratique is usually granted by Port Medical Officer through the Mooring Master or Agency Clerk.

RADIO: *Notice of Arrival:* Vessels should advise their ETA Mubarras at least 72 hours and again 24 hours before arrival through normal radio service. As an alternative to the route through Bahrain Radio Station (GNV) vessels may send their first message through Singapore or Bombay.

Confirmation of ETA should be made a few hours before arrival at "Approach Buoy" by calling "Mubarras Terminal" on Channel 16 VHF. After anchoring, vessels should advise their time of anchoring through VHF and thereafter maintain a continuous listening watch on Channel 16 until the Company's Mooring Master boards.

Tankers bound for Mubarras should advise their ETA and other information 72, 48 and 24 hours before arrival.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station. All cables should be addressed to the Company through ship's Agent.

The first message should be sent according to the following form, but any items which are the same with a recent previous voyage to this port may be omitted.

(1) ETA Mubarras.
(2) Last Port.
(3) Next Port.
(4) Deballasting time.
(5) Quantity of cargo required.
(6) Maximum loading rate.
(7) Diameter of cargo manifold.
(8) Distance from manifold to ship's side.
(9) Derrick capacity.
(10) Diameter of fairlead.
(11) Name of Master.
(12) Number of crew.
(13) Whether Pilot is required or not.

Radio Station in Mubarras Terminal Office.

Short-range communication to Mubarras Terminal office can be made by calling "Mubarras Terminal" on VHF radio telephone. Vessels should inform the office with their ETA preferably when they pass the Strait of Hormus. After anchoring, vessels should advise anchoring time and maintain a listening watch on Channel 16 until Mooring Master boards.

Call Sign: "Mubarras Terminal"

Frequency:	*Reception*	*Transmission*
F3	Ch. 16	Ch. 10, 12, 14

Operating Periods: Round the clock.

BALLAST: All vessels arriving at this port are required to have on board sufficient clean ballast to give a safe draft for manoeuvring purposes. Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring Master consider that it would not be safe to berth the vessel for loading. As a general rule, vessels shall not start discharging ballast until mooring is completed.

Upon completion of deballasting the Mooring Master will inspect the tanks. If the tanks are not satisfactory, he may require further pumping until such time as they meet the required standard.

It is strictly prohibited to discharge oil, oily water or other refuse that may result in pollution of the sea. International oil pollution regulations must be strictly observed by all vessels. *The terminal does not have facilities to receive oily ballast.*

TUGS: Following vessels are always available for use for marine operations at this port.

Name of Vessel	*G.R.T.*	*B.H.P.*	*Spd. (kt)*
No. 1 Union (Tug/workboat)	499	1,120×2	12
No. 2 Union (Passenger boat)	50	480×2	14
No. 3 Union (Mooring boat)	25	195×2	11

BERTH: *Position of Buoy:* Lat. 24° 25.98′ N. Long. 53° 31.54′ E. *Depth of Water,* 15.5 m. (50.85 ft.).

The berth is a single-buoy-mooring system consisting of a buoy 44.32 ft. (13.5 m.) in diameter, moored to 6 pendant legs of 3 in. high strength chain shackled to anchor piles at a radius of 855 ft. (260 m.), and having a rotating deck carrying the pipe-line and mooring connections.

One 32 in. crude oil line has been laid approximately 52,500 ft. (16 km.) from the shore to a position close under the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. underwater hose. The connection between turntable piping of SBM and tanker manifold consists of 1 hose string composed of 24 in. and 20 in. (Length 770 ft.) floating hoses and 2 hose strings composed of 16 in. (Length 120 ft.) tail hoses.

LOADING: The maximum loading rate of crude oil is 40,000 bbls./hr. or 6,400 kl/hr.

Notice of Readiness: The Master of each vessel should present a Notice of Readiness to load to the Company's Mooring Master who will sign it on behalf of the Company.

The Notice of Readiness should be tendered at the time of the vessel's arrival at the tanker anchorage area, which is, in principle, understood to be either the time of dropping the anchor in the anchorage, or, if the vessel does not anchor, the time that the Mooring Master boards to commence berthing.

The vessel, however, is prohibited from berthing unless she reaches No. 5 Buoy at least 5 hours before the sunset, and Notice of Readiness will not be accepted until the next sunrise even if the vessel has already anchored in the tanker anchorage area.

Notice of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with Port Master.

When the vessel is ready in all respects for loading the ship's officer must inform the Mooring Master who will transmit the necessary messages to the control room on shore. Mooring Master is authorised to control all the loading operations.

All cargo documents and shore figures are usually prepared on board and the Mooring Master will sign the documents on behalf of the Company.

MOORING: The Company reserves the right to refuse to accept for berthing or loading any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, unusual manifold connection, inability to comply with the Safety Regulations, or any circumstances which would create unusual risk to the Company's berth, facilities, personnel and equipment whatsoever.

Preparation: Before Mooring Master boards, vessels should have ready the following:

(a) Jacob's ladder on lee side.
(b) Hawser 1 each at fore and aft deck, polypropylene if possible.
(c) 1 steel crowbar.
(d) Port derrick with double wire rigged for minimum lift 5 tons.

After vessel is anchored, the Company's mooring and hose connection crew will board and pick up mooring and hose connection materials from tug/workboat. Vessel is requested to provide windlass and winch operators.

Mooring at Berth: Unless pilotage is required the Mooring Master will board the arriving vessels in the anchorage area. Vessels are requested to have pilot ladder safely and securely rigged ready for immediate use and long enough to meet the Mooring Master's launch. Vessels should have their crew standing by ready to receive mooring and hose connection materials and should maintain a lee until this is completed. Mooring Master will instruct the crew in the setting up of the forward mooring.

2 bollard ropes are made fast round the port bitts with their attached shackles about 5 ft. inboard from the fairleads as far forward as possible. The size of the fairlead opening should be at least 300 mm. (12 in.) to prevent chain from jamming in the fairleads.

Attached to the mooring connections on the buoy are two 18 in. nylon ropes (144 mm. dia., breaking strain 250 tons). These ropes are 50 m. long, and have at their free end a length of stud link chain which includes enlarged end link for receiving the shackles used on the deck of the tanker. From the outer end of this chain there are connected 2 mooring lines consisting of pick-up wires, pick-up ropes and a towing rope (port side only). The nylon rope is supported by "doughnut" floats and the chain is hung by large plastic buoys 5 ft. in diameter and coloured red and yellow.

Hose Connection: After completion of mooring the boat which has been holding the hoses clear during berthing will bring the floating hose to the ship's side and connect the derrick runner to the balance buoy. These are lifted aboard one by one and connected by distance piece which was already connected to vessel's manifold by hose connection crew during mooring operation.

Unmooring: After the hose disconnection is completed, mooring ropes are slacked off and then dropped into the water. Tug/workboat will come alongside either before or after the vessel backs off the berth, whichever is convenient, and will receive mooring and hose connection materials.

TIDES: The maximum tidal range in this area is 6 ft., the average tidal range at the Spring tide 3 ft. and the Chart Datum is 0.7 ft. below ISLW. Tidal stream is variable according to the place and the lay of the land. But the flowing tide usually runs South-Eastwards and ebbing tide North-Westwards. Speed of a current is around 2 knots at the highest.

"Tide and Current Table" is published annually by the Company, applicable to Mubarras and the surrounding area, and will be obtained on application to the Company.

WEATHER: Local weather at Mubarras is almost similar to that of Jebel Dhanna and Abu Dhabi City, being extremely hot and humid in Summer. Temperature sometimes soars as high as 50° Centigrade with almost 100 per cent humidity in July and August.

MEDICAL: The Company does not operate a clinic and hospital at Mubarras. But when necessary, Master may obtain medical attention for ship's personnel from the ship's Agent who may in the case of serious illness or injury recommend treatment at the Abu Dhabi government hospital. The ship owner will be charged for all expenses incurred.

FRESH WATER: Not available at Mubarras except in case of extreme emergency.

FUEL: Not available.

CONSULS: No consular business is available at Mubarras. However, various countries have representations in Abu Dhabi.

REPAIRS: There are no repair facilities at Mubarras. However, radar and electronics repairs are available in Abu Dhabi and technicians can be sent to Mubarras for repairs through notifying the ship's Agent.

SURVEYORS: Lloyds, ABS, Veritas surveyors are available in Bahrain and they can be brought in if ample notice is given to ship's Agent.

CUSTOMS: Under normal circumstances Customs officers do not board tankers at this port but upon arrival the Master is required to submit to the Customs through the ship's Agent a manifest of any cargo to be landed at Mubarras.

After loading is completed the Mooring Master will sign on behalf of Customs an outward manifest and issue the port clearance. These will be handed to the Master by the Agent.

REPATRIATION: Repatriation of ship's personnel may be accomplished by special arrangements through the ship's Agent who should be informed well in advance of the vessel's arrival. Launch or helicopter fare in case of repatriation will be charged to Owners.

TIME: Local standard time at Abu Dhabi is GMT +4 hours throughout year.

FIRE-FIGHTING: Tug/workboat "No. 1 Union" stationed at Mubarras Island is equipped for fire fighting. She is capable of pumping 1,700 gallons of water per minute from 3 nozzles and is usually on emergency stand-by during tanker loading operations.

GENERAL: *Engine:* The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst the vessel is on the berth.

Stores: Provisions and deck stores not available.

Divers: The services of the Company diver may be available to vessels where it is essential that a diver's services are required to enable a vessel to sail. All requests for such services should be routed through the ship's Agent to the Port Master.

Currency: All currencies approved except Israeli.

Mail: Mail can be received and sent through ship's Agent.

Dry Cargo Discharge: A "T" shaped jetty at Mubarras Island can accommodate a vessel with maximum 12 ft. draft. Discharge of dry cargo must be arranged well in advance through ship's Agent in Abu Dhabi who will supply labour and barges from Abu Dhabi. No gear whatsoever is available at Mubarras.

SAFETY:

No Smoking: Smoking on board the ship is strictly prohibited except in the smoking room situated in the aft accommodation and which has been jointly agreed between the Mooring Master and the Master.

The responsibility for the strict observance of the safety of these rooms rests with the ship, and the Company reserves the right to prohibit smoking in these rooms also should situation require at any time.

Accommodation: All accommodation doors, port holes and ventilators must be closed during loading operations, and doors and openings to machinery spaces in vicinity of ship's tanks are also to be closed.

Galley and Boiler Fires: As a general rule, the use of galley and boiler is not permitted. However, those appropriately equipped are considered safe for use, and their use will be mutually agreed between the Master and the Mooring Master.

Radio Equipment: Radio, radar or other electronic equipment must not be energized while the ship is on the berth.

Air-conditioning Units: For safety, it is preferable that these units recirculate the air within the accommodation but their use when drawing air from outside the accommodation may be permitted provided that the Master and the Mooring Master agree that no danger exists. Should any gas be detected within the accommodation or should there be any danger of gas within the accommodation these units must be stopped and the intakes closed. Window-type air-conditioners are forbidden at all times.

Ship's Fire-fighting Equipment: This equipment must be in constant readiness at all times with sufficient people on board for its efficient operation.

Fire Watches: While the vessel is within the port area a continuous and efficient fire watch shall be maintained on deck and in the engine room by the ship's crew. Fire-fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers must be available at the loading manifold while hoses are being connected and disconnected. Water should be available on deck service lines at all times and fire hoses connected at all fire stations for immediate use.

Swimming: No swimming in the sea berth area is permitted while vessels are on berth.

AUTHORITY: Abu Dhabi Oil Co. Ltd. (Japan).

AGENT: National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd. are appointed by Abu Dhabi Oil Co. Ltd. (Japan) as exclusive shipping Agents for all vessels calling at Halat Al Mubarras Terminal. The address particulars are as follows:

National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd., POB 377, Abu Dhabi, United Arab Emirates, Cables: "Confidence", Abu Dhabi. Telex: 2248. Tel.: 43008.

ETA messages shall be sent to National Shipping, Gulf Agency Co. (Abu Dhabi) Ltd., cable address: "Confidence", Abu Dhabi, via Bahrain Radio.

Vessels can otherwise communicate with NSGAC, Abu Dhabi, over Marine Radio HF, frequencies: standing by on 3539 kc/s. and transmitting on 2170, 2301, 2368, 2738, and 3539 kc/s., call sign "Confidence", Abu Dhabi.

Vessels equipped with SSB radios can also communicate with NSGAC, Abu Dhabi, on the frequencies, standing by on 6910 mHz lower side band and transmitting on 3539 and 6910 mHz, call sign "Confidence", Abu Dhabi.

Under favourable weather and transmitting conditions communication can also be performed over the VHF radio on the following frequencies: standing by on Channel 16 (156.8 mHz) and transmitting on Channel 9, 10, 12, 13 and 14, call sign "Confidence", Abu Dhabi.

PORT RASHID, Dubai: 25.16 N. 55.16 E.

(See Plan Book)

FLAG: U.A.E. and Dubai.

DOCUMENTS: The following should be airmailed to Agent prior to ship's arrival.

6 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
7 Cargo Manifests.
2 Freighted Manifests.
1 each Bill of Lading.
4 Crew Lists required (on arrival).

APPROACHES: Black and white Pillar Buoy, flashing every 10 secs. in position Lat. 25° 21′ N. Long. 55° 14′ E. Marked "Dubai Approach".

Main light in position Lat. 25° 13.7′ N. Long. 55° 17.3′ E. (Situated on top of the Dubai Trade Centre) Group Flash (W) 2 every 30 secs. 157 m. above MHWST. Visible 30 miles.

Main breakwater light flashing (W) twice every 30 secs. elevation 9 m. Lee breakwater light flashing (R) every 2.5 secs. elevation 9 m.

PILOTAGE: Compulsory. Pilot will board 24 hours a day, from a launch and a Pilot ladder should be provided and a lee given. Large vessels calling at the dry dock should provide an accommodation ladder with its lower platform within about 12 ft. of the waterline and a pilot ladder rigged on ship's side adjacent to the accommodation ladder platform.

ANCHORAGE: Vessels should contact Dubai Port Control VHF, Channel 16 shifting to a working Channel as instructed. Failing instructions they should anchor approximately 3 kms. from the port entrance. Holding ground – Generally poor.

RESTRICTIONS: Minimum depth in channel 13 m. Max. rise and fall 2.0 m.

MAX. SIZE: Max. draft 11.5 m. (38 ft.). No restriction on length or beam.

TUGS: Two 2,000 h.p., one 2,500 h.p. and one 1,300 h.p. are available the practice being to secure alongside with 2 tug ropes therefore gangway and derricks should be secured in-board.

Tugs are fitted with VHF. Contact should be made via Dubai Port Control or the Harbour Master.

RADIO: The Port Signal Station (call sign 'Dubai Port Control') is fully equipped with VHF radio and watch is maintained 24 hours per day on Channel 16, switching to Channels 14, 12, 9, 6, 67, 32 port operations are controlled on Channels 65A and 66A; the Signal Station is fitted with VHF direction finding and recording equipment to assist in prosecuting stations contravening international radio procedure and regulations.

The Signal Station is situated at the seaward end of No. 1 berth at a height of 57 ft. above sea level.

Vessels should contact Dubai Port Control requesting berthing instructions.

Vessels should advise their Agents the arrival time, LOA, draft and position of bunkers, connections if bunkers are required and advise amended ETA where possible by VHF. They in turn will pass the information on to the Port Authority.

HEALTH: Normal quarantine regulations apply and pratique can be given by the Pilot on cargo vessels, always subject to the Health Authorities approval. Health Authorities only board when the vessel is alongside, except in the case of a suspected ship.

BERTHING: Vessels should advise their Agents of their ETA length overall and draft by VHF if possible. Agents should also be advised of any explosives or hazardous cargo on board to determine if it should be offloaded before berthing or otherwise.

37 deep water berths with 27 storage sheds (each 400 ft.×200 ft.) adjacent are available as well as 4 berths restricted to vessels with less than 6.10 m. (20 ft.) draft. Extensive hard surfaced yard storage areas. Each berth provided with forklift trucks and trailers. Cargo is discharged direct to sheds or to storage areas where mobile cranes from 5 to 40 tons capacity operate or by direct delivery to consignee's vehicles. 2 container cranes of 35 ton capacity are available on berth No. 10 and 2 – 40 ton container cranes on berths Nos. 33 to 37 (to come into service mid-1979) together with Karrilift, Karricon and other associated container handling equipment operating in a controlled container terminal. Refrigerated containers – electricity connections available.

A restricted number of vessels may anchor within the harbour breakwaters under instructions from the Harbour Master if so required, and may discharge/load ex-lighters.

Depths at Berths: No. 1 berth 10 m. (33 ft.), No. 2 berth 9.7 m. (32 ft.), No. 10 berth 10 m. (33 ft.), No. 3 – 16 berths (except No. 10) 9.3 m. (30.5 ft.), No. 17 to 27 berths 11.5 m. (38 ft.), No. 28 to 37 berths 13 m. (42 ft.).

FRESH WATER: Available at all berths. Rate 30 t.p.h. per hose.

FUEL: Shell Bunker Fuels are available at berths Nos. 1 to 4, 6 to 9 and 17 to 37 in addition to Tanker Berth and include fuel oil, thin fuel oils, diesel and gasoil: 48 hours' notice should be given to local Agents or Shell Markets (M.E.) Ltd., P.O. Box 307, Dubai. Tel: 432500; Telex: 5478 DB; Cables: Shell Dubai. Marine Lubricants and chemicals are available for delivery to the ship.

TANKERS: Berth operated by Shell Markets (M.E.) Ltd. Capable of taking vessels up to 260 m. long. Max. draft 11.3 m., vessels of 11.3 m. but not over 11.6 m. draft may be berthed by arrangement with the Harbour Master at HW.

CARGO HANDLING: *Working hours:* Saturday – Thursday, 1st shift: 0700 – 1400 hrs. 1400 – 1600 hrs.; Special shift: 1800 hrs. 2nd shift: 1830 – 2359 hrs.; night shift: 0001 – 0530 hrs. Friday – 1st shift: 0700 hrs – 1400 hrs.; 1400 – 1600 hrs.; Special shift: 1800 hrs. 2nd shift: 1900 – 2359 hrs.; Special shift; full night.

The Port Manager may order full night working.

Each berth is provided with fork-lift trucks and trailers. Pallets to assist cargo handling are available without charge. Cargo is discharged direct to sheds (400 ft. by 200 ft.) or to storage areas where mobile cranes varying from 5 to 40 tons lift operate.

Ship: Ships gangs are available for distribution to vessels through Agents, vessels should advise their requirements before arrival. The gangs board and operate under the supervision of ship's officers. No quay cranes are provided, so ship's derricks/cranes must be used, together with cargo handling equipment. A close liaison should be maintained with the Cargo Superintendent or Shed Supervisor at all times.

Lighterage; When berths are fully occupied, vessels may discharge/load ex-lighters at anchorage.

STEVEDORES: Gangs available, ordered by Agent before vessel's arrival. Gangs board and operate under supervision of ship's officer. Ship's gear used. Working hours: See "Cargo Handling".

MEDICAL: Qualified doctors and hospital available at Dubai, also Dentists.

AIRPORT: International airport, 3.2 km.

DRYDOCK: *Dubai Drydock:* A complete ship repair facility, managed by a consortium of 2 companies, C. H. Bailey Ltd., and Bristol Channel Ship Repairers Ltd., expected to be in operation by Spring 1979 is located immediately to the East of Port Rashid. Vessels up to 1,000,000 d.w.t. can be docked. Approach areas dredged to 11.5 m. enclosed by breakwater.

Dock No. 1 370 m.×66 m. (350,000 tonnes)
No. 2 525 m.×100 m. (1,000,000 tonnes)
No. 3 415 m.×80 m. (500,000 tonnes)

Dockside Cranes:

2×120 tonnes Safe working load at 65.5 m. radius.
1× 25 tonnes Safe working load at 80.0 m. radius.
2× 15 tonnes Safe working load at 70.0 m. radius.

REPAIRS: Galadari Engineering; P.O. Box 355, Dubai; Tel: 660803, Telex: Gabros DB 5443; Al Nasr Engineering Co. P.O. Box 1106, Dubai; Tel: 223624; Telex: 5638 DB; Cables: Alnasr – Dubai, and the services of the large Dry Dock Complex capable of accepting vessels up to 1,000,000 d.w.t. (See "Developments").

Round the clock service which ranges from major boiler repairs to repair of main diesel engines and auxiliaries, underwater welding, shot blasting hull cleaning and diving services. Gulf Lux

Marine Services Ltd., offer a wide range of in-water service including scraping, blasting and recoating. Technical Engineering and Marine Services (TEAMS) have 1 slipway which can accommodate vessels up to 1,000 tons. They are also able to handle all kinds of engine and hull repairs.

OFFSHORE SERVICES: Crew changes, delivery of ship's mail, stores, spares, etc., can be effected by service boats or helicopters. This service is carried out by Gulf Agency Co. (Dubai) Ltd. See "Agent".

JOINING/REPATRIATION: Arriving crew holding valid seaman's book can be cleared from the airport and placed on board on the strength of a guarantee letter from the Agent to the Immigration Office.

Repatriating crew can be brought ashore with a similar guarantee tendering the airticket to the Port Immigration Office. They must be picked up from the ship 24 hours prior to departure.

TELEPHONES: Situated in sheds, no connection made to vessels.

SHORE LEAVE: Agents collect all passports on vessel's arrival, together with 3 copies of crew list. Temporary shore leave passes are issued by the Immigration Office (situated at the Southern end of Shed No. 4) against passports and Crew Lists.

GENERAL: Refer to "Dubai" for all general information.

AUTHORITY: General Manager. Dubai Port Services.

AGENT: Gulf Agency Co. (Dubai) Ltd. POB 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 431300. (24 hours service). Telex 45448, 45809 ("GACDB EM") Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) Callsign "Confidence, Dubai".

Operators of ship-servicing and supply organisation: Crew changes, mail, spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

RAS AL-KHAIMA: 25.45 N. 56.01 E.

There is a jetty, length 100 m., suitable for berthing smaller vessels, which is protected by a breakwater, and development plans include dredging the inlet to enable vessels with a draft of up to 25 ft. to berth.

DEVELOPMENTS: See "Mina Saqr".

AGENT: See "Mina Saqr".

RUWAIS: 24.09 N. 52.45 E.

Proposed temporary anchorage for construction cargo vessels is located between 24° 11′ N., 52° 44′ E. and 24° 10.6′ N., 52° 45′ E.

Approximate location of construction wharf is 24° 08.6′ N., 52° 45′ E.

Total length of the jetty 200 m. (completed). The jetty will be able to bear loads of 4 tons per sq. ft. A separate Ro/Ro jetty with a drive off ramp is also completed. The width of the opening where the Ro/Ro vessel will berth is 50 m. and the length 100 m. The height of the jetty at high water level is approx. 1.3 m. and chart Datum level 3.1 m. There is a temporary "L" shaped jetty with max. depth of 4 m. and length of between 60–70 m. for discharging cargo from barges.

Labour supplied by ADNOC's Sub-contractors.

Vessels proceeding to Ruwais must pass through Jebel Dhanna Tanker Channel where Abu Dhabi Petroleum Ports Operating Co. will be handling vessel up to anchorage.

AUTHORITY: Abu Dhabi National Oil Co. (ADNOC).

AGENT: See "Mina Zayed".

SHARJAH: (Mina Khalid) 25.22 N. 55.24 E.

(See Plan Book)

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival or must be forwarded to ship's Agent prior to ship's arrival:

Immigration:
2 Crew Lists.
2 Passenger Lists.

Customs:
2 Crew Lists.
2 Passenger Lists.
2 List of Alcoholic beverages.
2 Cargo manifests.

Port Operations:
2 Cargo Manifests.
2 Dangerous Goods List.
2 Stowage Plans.
Certificate of Registration.
Classification Certificates.

PILOTAGE: Pilotage is compulsory for all ships entering and leaving the deep water harbour. On entry, Pilots will board to seaward of the fairway buoy; a pilot ladder should be provided. Port Khalid will operate a twenty-four hour, seven-day week pilotage service.

ANCHORAGE: The fairway buoy in position Lat. 25° 22.9′ N. Long. 55° 20.85′ E. is a black pillar buoy flashing white every 1.5 seconds. Vessels approaching should await Pilot to seaward of fairway buoy, anchoring if necessary.

Protected Anchorage:

A limited number of vessels may anchor at moorings within the deep water harbour with prior approval of the Port Operator.

MAX. SIZE: Max. draft entering and leaving is 8.7 m. (28.5 ft.). Tidal range 1.2 m. (4 ft.). Deep water channel to berths Nos. 6 and 7 maximum draft is 10.15 m. (34 ft.).

HEALTH: Normal quarantine regulations apply.

Radio pratique will be granted on receipt of radio message from Master, via his Agent, stating that no serious illness has occured during the preceding thirty days. All Crew members must be in possession of valid smallpox and cholera certificates. The Health Officer will only board when the vessel is alongside.

RADIO: *Notice of Arrival:*

Vessels should advise their Agent ETA Port Khalid, giving draft, L.O.A., and intended cargo operations to be performed, at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessels should contact Port signal station on VHF Channel 16 (call sign "Sharjah Port Control") when within range. Working Channels 6, 9, 12 and 13.

TUGS: Tug services are available for all ships entering the deep water harbour. At the discretion of the Port Operator ships may be obliged to use the services of a tug or tugs.

Tugs are fitted with VHF.

The harbour tugs are fitted with fire fighting hoses and monitors and foam tanks.

BERTHING: Arrangements made with Harbour Master by ship's Agent for necessary berthing as required.

Berth No.	*Depth at LW*	*Date in Operation.*
1	30 ft.	In operation
2	30 ft.	In operation
3	30 ft.	In operation
4	30 ft.	In operation
5	30 ft.	In operation
6	34 ft.	In operation
7	34 ft.	In operation
		Ro/Ro berth
8	30 ft	Oct. 1978
9	30 ft.	Oct. 1978
10	30 ft.	Oct. 1978
11	32 ft.	Oct. 1978

Total length No. 1 and 2 berths 1,192 ft. (363 m.). Total length No. 3, 4, 5, and 6 berths 2362 ft. (720 m.).

Deep water berth No. 6 – 274 m. (900 ft.) No. 7 berth 220 m. (722 ft.).

Total length berths 8 and 9 – 360 m. (1,181 ft.). Berth 10 – 210 m. (689 ft.). Berth 11 – 195 m. (640 ft.).

Equipment Available: The Sharjah Container Terminal (SCT) which comprises berths 1 & 2 in the deep water harbour is equipped with Tango gantry cranes. These berths also are equipped with specialized equipment to handle containers in the storage area. Each berth is provided with fork lift trucks, trailers and yard hustlers to facilitate the movement of cargo. Pallets are available to assist cargo handling. Two heavy lift mobile cranes of forty and ninety-ton capacity are available on request from the Port Operator. Other equipment, including cranes, trailers, etc., will be made available upon request to the Port Operator with twenty-four hours notice.

Lighterage; Lighterage services are available.

Storage Facitlities: Storage facilities consists of six sheds (two of which are located in the Container Terminal area) having an area under roof of 28,000 sq. m. (300,000 sq. ft.). In addition, hard surfaced yards and Sharjah Container Terminal Stacking/Packing area provide extensive storage capacity.

Cold Store: A 3,000 ton capacity cold store (frozen and chilled) will be built on Berth 8, ready October 1978, with mechanical handling from ship's hold to store.

STEVEDORES: The port will operate on a twenty-four, seven-day week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except public holidays.
First shift 0600 to 1400 hrs.
Second shift 1400 to 2200 hrs.

Normal working hours are subject to change during Ramadan, when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. for work during the first shift on the following day and by 1100 hrs. on the same day for work during the second and third shifts.

MEDICAL: Upon application to ship's Agent, medical examination of Crew members can be arranged. Personnel will either be sent to private Doctor or to Public Health Department, as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

TANKERS: Tanker jetty situated in harbour on main breakwater. Draft alongside 30 ft. Limited bunkering facilities.

DENSITY: 1025/1028.

FUEL: Deliveries of fuel oil, gas oil or blends may be arranged through vessel's Agents. Marine lubricants will be delivered to ship's side. Both services require 48 hours notice.

FRESH WATER: Fresh water is obtainable at all berths.

REPAIRS: Good facilities for repairs.

DRY DOCKS: None.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of the new Sharjah International Airport will permit efficient crew changes and repatriation. Off-shore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ships passengers require a valid visa for transit or temporary stay.

AIRPORT: Dubai and Sharjah.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted for Crew members provided identification card or seaman's papers are deposited with Immigration office situated in the port and collected upon return.

GENERAL: *Pollution:* The provisions of the Sharjah Maritime Law shall apply with respect to the operation of vessels in Sharjah Coastal Waters. Garbage disposal services are provided by the Port Operator and are compulsory.

Ships Chandlers: Complete ship chandling facilities are available, handling provisions, laundry and bonded stores.

AUTHORITY: Sharjah Port Authority.

AGENT: Gulf Agency Co. (Sharjah) Ltd., POB 435, Sharjah, U.A.E. Cables: "Confidence" Sharjah, Tel.: 22163, 23503. Telex 68019 ("Confid SH"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz). Call sign: "Confidence" Sharjah.

Air-freighted spare parts and ships' mail to Sharjah should be addressed to GAC Sharjah, but sent to Sharjah International Airport or Dubai Airport marked "Ship's Stores In Transit for M/S . . ." Certificates of Origin should follow the air waybill or in cases of emergency be sent to GAC Sharjah, soonest after shipment. Cable "Confidence" Sharjah, of flight details and Air Waybill number.

UMM AL QAIWAIN: 25.35 N. 55.35 E.

LOCATION: Approx. 20 miles North of Sharjah.

PILOTAGE: Service not available at the present time.

RESTRICTIONS: Depth of channel is presently 10 m., width 100 m., tidal range +0.2 m. – +1.7 m.

MAX. SIZE: Max. size of cargo vessel that could be taken into the port is estimated to be 17,000–18,000 d.w.t., draft however is the controlling factor.

BERTHING: There are at present 2 berths, length 200 m., depth alongside 10 m. There is one additional berth with a depth alongside at present 9.5 m.

There is a turning circle with a radius of 250 m., the channel and turning circle are presently marked by black buoys, however, these buoys are small and expected to be replaced in the very near future by larger buoys which will be visible at distances of up to 5 km. There is lighting on the main wharf, this will later be extended to the whole port area.

FRESH WATER: There are lines to the quay, however, the pressure is not sufficient to pump any quantity.

FUEL: Gas oil can be made available.

ZIRKHU ISLAND (Jazttzarakku Island): 24.53 N. 53.05 E.

CHART: B.A. Chart No. 2889.

LOCATION: The island is situated 70 nautical miles WNW of Abu Dhabi.

ANCHORAGE: There is an unprotected anchorage 2 miles off the East coast of the island with 17 m. depth available, where cargo can be discharged on to barges. Labour has to be provided from Abu Dhabi at present.

RESTRICTIONS: There is a lot of coral around the island but there is an opening at the South end of the island where beaching is possible.

BERTHING: There is a temporary "T" head jetty on the SW corner of the island which is expected to be ready shortly, the main "T" head is 150 m. from shore, length of the "T" end 60 m. and width 10 m. The road to the "T" head is 140 m. long and 6 m. wide. Depth 1.75 m. at chart datum.

There is a breakwater on the East coast of island under construction, length 1,200 m. The 150 m. long jetty at the end of the breakwater is expected to be ready by mid-1979. Width of the breakwater 25 m. and the depth at the jetty will be about 4.25 m. at chart datum.

DEVELOPMENTS: An airstrip (under construction) on SW part of the island expected to be ready about February, 1979. 3 tanker mooring buoys are being located 25 km. North of the island. Bunkering and deballasting facilities will be available.

OPERATORS: Zakum Development Company.

AGENT: See "Mina Zayed".

NOTES

Please also advise Shipping Guides Ltd.

United Kingdom

HEALTH—ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations)

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these new rules the Master of a ship arriving from a foreign port must report to the port health authority†

(1) The occurrence on board during the voyage* of

(a) death, other than by accident,

(b) Illness where the person or persons concerned

(i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;

(ii) has or had diarrhoea severe enough to interfere with work or normal activities, or

(2) the presence on board of

(a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease

(b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.

(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (free pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must—

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the port health authority†

or, if the ship is not equipped with a radio transmitter, notify the port health authority†, wherever practicable before arrival and otherwise immediately on arrival;

(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the port health authority† (the codes are set out below);

(3) Until "free pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;

(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the expected area of the Council of Europe i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Spain and the United Kingdom.

4. Where it is necessary to obtain "free pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. An authorised officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2—3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the port health authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £100 plus £50 per day.

INTERNATIONAL CODE OF SIGNALS HEALTH CLEARANCE MESSAGES

ZS	My vessel is "healthy" and I request free pratique	Q
‡	I require health clearance	QQ
ZU	My Maritime Declaration of Health has a positive answer to question(s) (indicated by appropriate number(s))	
ZW	I require Port Medical Officer	
	ZW1 Port Medical Officer will be available at (time indicated)	
ZY	You have health clearance	
ZZ	You should proceed to anchorage for health clearance (at place indicated)	
	ZZ1 Where is the anchorage for health clearance?	
	I have a doctor on board	AL
	Have you a doctor?	AM

‡By night, a red light over a white light may be shown, where it can best be seen, by ships requiring health clearance. These lights should only be about 2 metres (6 feet) apart, should be exhibited within the precincts of a port, and should be visible all round the horizon as nearly as possible.

Health clearance may be given in three ways:—

a) Wholly in plain language

b) Partly in the above signal code; remainder in plain language

c) Wholly in the above signal code

Issued by the Health Departments of the United Kingdom.

†Or the local authority responsible for port health control.

*If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

ABERDEEN: 57.09 N. 02.03 W. (See Plan Book)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Aberdeen has a compulsory pilotage district and there are 10 licensed Pilots. Boatage service, although not compulsory, is available. There are 8 licensed boatmen.

There is a navigation control service equipped with harbour surveillance radar which is operated by Navigation Control officers who operate on a 24-hour basis.

RESTRICTIONS: Navigation channel. max. designed width 110 ft., max. designed depth at HWOST 34 ft. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at LAT 21 ft., clear width at entrance 140 ft.

MAX. SIZE: The port can normally accommodate a vessel of up to 525 ft. in length, 80 ft. in beam and drawing 30 ft. 6 in. of water, and at the various berths in tidal waters can handle expeditiously bulk containers and general cargoes. A vessel of length 545 ft. has been handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

RADIO: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

Tidal Harbour	length 3,461 ft.	Depth 26–34 ft. HWOST		
Albert Basin	,, 5,586 ft.	,, 25–29 ft.	,,	
River Dee (Navigable)	,, 1,884 ft.	,, 25–28 ft.	,,	
River Dee Dock	,, 1,398 ft.	,, 28–31 ft.	,,	
Upper Dock	,, 1,950 ft.	,, 18–30 ft.	,,	
Victoria Dock	,, 4,326 ft.	,, 22–28 ft.	,,	

Deep-water Berths:

No. 1 Atlantic Wharf. This is 480 ft. long with 30 ft. water at low tide and 42 ft. 9 in. at HWOST. Two-storey transit shed. Two 3-ton electric portal cranes. Excellent road and rail connection.

No. 2 Pacific Wharf. This is 525 ft. long with 32 ft. of water at low tide and 44 ft. 9 in. at HWOST. Open quay. 2 × 6 ton and 1 × 50 ton electric Portal cranes capable of handling heavy lifts and containers. Roll-on/Roll-off service operated by P&O to Shetland.

FRESH WATER: This service is provided by the Corporation of Aberdeen and is available at all quays.

REPAIRS: Ship-repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.

DRY DOCKS:

	Overall length (ft.)	*Breadth at entrance (ft.)*	*Depth on blocks (ft.)*	*Lifting capacity*
No. 1	180	29	16	700 tons
No. 4	180	38	18	1,000 tons

There are also 2 privately owned slipways and 1 drydock.

MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

CONSULS:

Belgium	G. D. G. Mackinnon, 23 Market Street
Denmark	R. P. H. Pirie, 62 Marischal Street
Finland	D. G. R. Stroud, 62 Marischal Street
France	G. D. G. Mackinnon, 23 Market Street
Germany	A. H. S. Lewis, 186 Albert Quay
Iceland	Awaiting appointment
Netherlands	R. Clark, 3 Bedford Road
Norway	D. G. R. Stroud, 62 Marischal Street
Portugal	Awaiting appointment
Spain	D. G. R. Stroud, 62 Marischal Street
Sweden	R. P. H. Pirie, 62 Marischal Street

AIRPORT: International airport nearby at Dyce. There are frequent daily jet services to London operated by British Airways, and in addition British Airways also operate services to Edinburgh, Glasgow, Prestwick, Wick, Orkney and Shetland. There are also services to Manchester and Birmingham.

Air Anglia operate direct services from Aberdeen to Amsterdam, Bergen, Stavanger, Edinburgh, Jersey, Leeds/Bradford, Newcastle, Norwich, Isle of Man and Teesside.

TIME: BST is GMT plus 1 hour. GMT during Winter months.

HOLIDAYS: 1st and 2nd January; Spring Holiday (variable date); Summer Holiday (variable date); September Holiday (variable date); Christmas Day (25th December).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

TELEPHONES: There are berths at which GPO telephone service can be made available to vessels. All operational posts are linked by telephone network.

AUTHORITY: Aberdeen Harbour Board.

AMLWCH: 53.27 N. 04.20 W. (See Plan Book)

PILOTAGE: Compulsory. Pilot boards in the vicinity of the S.B.M.

ANCHORAGE: Good anchorage available 3-5 miles East of Point Lynas in 15-18 fathoms.

APPROACHES: Clear and unimpeded from East or West.

RESTRICTIONS: Berthing may be delayed because of strong tidal streams, particularly during period of Spring tides.

MAX. SIZE: No restriction on length, breadth or deadweight. Max. draft 92 ft. (28.04 m.).

HEALTH: See "Health – All Ports" before first UK port.

RADIO: Advise ETA 72 hours prior to arrival, and confirm again 24 hours before arrival.

VHF: Port operates on Channels 16, 10, 12, 19 and 46.

TUGS: No tugs. 2 mooring launches each 1,150 h.p. One is in attendance throughout discharge. Launches equipped with VHF Channels 16, 6, 9, 10, 12, 13, 14, 25 and 26.

BERTHING: *SBM Location:* Lat. 53° 26.7' N. Long. 4° 19.8' W. Standard mooring connections using terminal equipment twin 18 in. nylon grommet moorings with 3 in. chafing chains.

Water Depth: Approaches 32.80 m. Berth 31.15 m. (LLW). UKC: For 'B' Class 3.11 m.

Hose System: 2×24 in.×354 m. surface strings, terminating into 2×20 in. rail hoses with 150 ASA flanges.

Line System: 2×40 in.×1.8 miles (sub-marine); 2×40 in.×3 miles (shore booster pumps to tankfarm).

Max. discharge rate: 23,000 cu.m. per hour.

Position of Cargo Hose Connections: Amidships starboard-side.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Not available.

BALLAST FACILITIES: None.

LIGHTERAGE FACILITIES: None.

SERVICES: Small quantities of fresh provisions only. No tank cleaning or dirty ballast facilities available.

REPAIRS: Small emergency repairs only.

GENERAL: Responsible Crew member on watch on fo'c'stle head throughout period on the mooring.

Whilst on the berth, no immobilisation of main engines or steering gear is permitted as ship's main engines must be continuously available on short notice to avoid contact with the SBM. Engines will normally be used astern to keep clear of the buoy at each slack water period.

Five shore personnel, namely 2 berthing supervisors and a support group of 3 men will remain on board while the ship is moored at the SBM.

The most stringent precautions must be taken to ensure no spillage of oil occurs.

OPERATORS: Shell Oil.

ARDROSSAN: 55.38 N. 04.49 W. (See Plan Book)

DOCUMENTS: Normal documents required:

Customs Documents.
Health Documents.
Crew List.
Passenger List.
Ship's Papers, etc.

PILOTAGE: Pilotage compulsory. Operated by Clyde Port Authority. Telegraphic address – "Harbour" Ardrossan. VHF Channels 16, 14 and 12. Signals for Pilot – flag, lamp or sound letter "G". Pilot taken on board approximately 0.75 miles S.W. of Breakwater Light.

24 hours notice required and amendment if ETA changes.

ANCHORAGE: 12 to 15 fathoms 1 mile S.W.

RESTRICTIONS: Two balls by day, or two red lights vertically by night, from a flagstaff at Montgomerie Pier, at elevations of 66 ft. and, 60 ft. indicate that vessels must not enter.

MAX. SIZE: Eglinton Dock approx. 420 ft. by 57 ft. by 16 ft./18 ft. (depending on tide). North Montgomerie Pier Tanker Berth – max. length 575 ft., max. draft, up to 70 ft. beam, 23 ft./26 ft.; over 70 ft. beam, 22 ft./25 ft.

HEALTH: All vessels requiring attention of Medical Officer shall show flag signal ZW by day, or between sunset and sunrise, either morse signal ZW by lamp, or a red light over a white light, not more than 6 ft. apart. Other vessels shall show flag signal "Q" by day, or between sunset and sunrise either morse signal Q by lamp or a red over a white light, not more than 6 ft. apart.

Certificate of Pratique will be issued by Customs Boarding Officer on receiving a satisfactory and fully completed Maritime Declaration of Health. No further formalities required at subsequent ports of call in the U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: VHF Channels 12, 14, and 16. Radio telephone per Portpatrick.

TUGS: As for Pilotage. (If second tug required orders to be given not later than 1600 hours and by 1530 hours on Friday for week-end work.) Tug's lines used – no additional charge.

BERTHING: No special requirements except with draft over 16 ft. when vessel may be delayed waiting for tide.

STEVEDORES: Orders to be given by 1130 hrs. previous day.

MEDICAL: No advance notice required unless medical attention is necessary immediately on vessel's arrival. No hospital facilities in Ardrossan, nearest hospital being at Irvine, 6 miles and Kilmarnock 16 miles.

TANKERS: Hoses 8in. Berths (1) Up to 3,000 d.w. (2) Up to approximately 20,000 d.w. Max. draft 22 ft./26 ft. depending on beam and tide.

DENSITY: Sea water 1025.

FRESH WATER: Available continually at all berths.

FUEL: Marine oils available ex pipeline, or by road tanker.

FIRE PRECAUTIONS: Patrolman required for hazardous cargoes.

DEVELOPMENTS: Roll-on/roll-off berth for specialised traffic.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CERTIFICATES: Following Certificates are requested: Load Line, safety radio, safety equipment, safety construction, deratisation, and Current Trinity House Light Bills.

CUSTOMS ALLOWANCE: Standard U.K. allowances.

IDENTIFICATION CARDS: Not required.

CONSULS: Norwegian Vice Consulate, Danish Vice Consulate: R. L. Alpine & Co. Ltd., Winton Buildings, Ardrossan. Tel. Ardrossan 3065.

REPAIRS: Limited repair facilities.

REPATRIATION: Customs Boarding Officer acts for Immigration Dept. and arrangements for repatriation can be arranged in conjunction with ship's Agent.

AIRPORTS: Prestwick 18 miles. Glasgow 25 miles.

TIME: BST, that is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: 1st and 2nd January; Easter Monday; Third Monday in July; First Monday in October; and Christmas Day. Cargo work may be available on certain holidays by special arrangement.

POLICE/AMBULANCE/FIRE: Police tel. Saltcoats 63966; Ambulance, Fire: Ask telephone operator.

SHORE LEAVE: No restriction.

AUTHORITY: Ardrossan Harbour Company Limited.

AYR: 55.28 N. 04.38 W. (See Plan Book)
TROON: 55.33 N. 04.40 W.

DOCUMENTS: *Customs Require:*

2 copies Form XS1.
Ship's Register.
Load-line Certificate.
Safety Radio Certificate.
Passenger List.
Crew List.

Port Health require:

Derating Certificate.

Agents require:

1 copy Form XS4.
Bills of Lading.
2 copies Manifest.

PILOTAGE: 24 hours notice of ETA required for Pilot via Agent or Dock Authority. Pilots listen on Channel 16 and work on Channel 14 VHF.

ANCHORAGE: To Pilot's advice. E'ly winds Ayr Bay, W'ly gales anchor East side of Arran Island.

RESTRICTIONS: Draft restriction at LW. Enter on Pilot's advice.

MAX. SIZE: 300 ft. in length and 18 ft. draft – depending on berth.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Local station, call sign GPK on 2381 kc/s. VHF radio only, operating on Channel 14 and listening on Channel 16.

TUGS: No tugs available.

RADAR: No radar station.

BERTHING: *Ayr:* Length of operational quays 1,450, depth 21 ft. *Troon:* Length of operational quays 5,700 ft, depth 24 ft.

CRANES: Three heavy lift cranes, one 5 tonne portal crane. 4×5 tonne, 1×6 tonne mobile cranes.

BULK CARGO FACILITY: Three mobile conveyors, one fixed high capacity coal appliance.
STEVEDORES: 24 hours notice of ETA should be given to stevedores.
MEDICAL: Hospital facilities nearby in town.
DENSITY: Varies according to weather.
FRESH WATER: Available at all berths, rates upon application.
FUEL: All grades available, 24 hours notice.
GANGWAY/DECK WATCHMEN: Deck watchman required; may be supplied by arrangement with stevedores.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCE: 0.25 lb. of tobacco or equivalent cigarettes, and one-sixth of a gallon wine/spirits per man.
IDENTIFICATION CARDS: Seamen's identity cards should be carried.
REPAIRS: Most engine and deck repairs available.
DRY DOCKS: Two at Troon, max. length 400 ft., breadth 50 ft.
AIRPORT: Nearest at Prestwick, 7 miles away, mostly International flights.
TIME: GMT plus 1 hour, reverting to GMT in Winter months.
HOLIDAYS: Official holidays: First 2 working days in January: Easter Monday; Spring Bank Holiday (1978 – May 29th); Ayr Races (2 days in third week in September); Christmas Day. No work at all on these days.
POLICE/AMBULANCE/FIRE: Dial 999, and ask for service required.
TELEPHONES: No connection on board vessel.
SERVICES: Special arrangements can be made for tank washing and compass adjusting through Glasgow.
SHORE LEAVE: No restrictions on shore leave.
AUTHORITY: British Transport Docks Board.

BARROW-IN-FURNESS: 54.07 N. 03.14 W. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port are a line joining Westfield Point (Lat. 54° 05′ 33″ N., Long. 03° 11′ 10″ W.) with Scar End Point on Walney Island (Lat. 54° 03′ 31″ N., Long. 3° 12′ 17″ W.).
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Health Declaration.
Ship's Certificates and Cargo Documents.
PILOTAGE: Pilot boards at Lune buoy, using Pilot cutter, usually 2 or 3 hours before high water.

The Heysham Lake Pilot vessel listens on 2182 kHz (MF) and is also equipped with VHF listening continuously on Channel 16. The working frequencies are 2241 and 2246 kHz and Channels 6, 12 and 14 respectively. Ships which are suitably equipped should pass their ETA through any United Kingdom Post Office Coast Station to their Agent 24 hours before arrival.
ANCHORAGE: At Lightning Knoll Buoy, depth of 10 m. at LW. In adverse weather conditions vessels proceed to Ramsey Bay, 16 km. away, for shelter. Piel Harbour to North of Piel buoy.
RESTRICTIONS: No docking after HW. Tidal range 6.4 m. – 9.76 m. Deduct 0.5 m. from height of high water to allow for invert at dock entrance. Access to the port, which is protected from the prevailing Westerly winds by Walney Island, is gained from the Irish Sea through the harbour along the well-defined Walney Channel. The depth of water on the Ramsden Dock entrance sill can range from 10.06 m. at high water springs to 6.4 m. at high water neaps.
MAX. SIZE: Length 183 m. Beam 23 m. Draft according to tide.
HEALTH: Vessels arriving from abroad are given pratique by Customs Boarding Officers. In case of suspected disease or fever on board notify Agent prior arrival. Agent will advise Port Health Authorities.

Also see "Health – All Ports" before first U.K. port.
RADIO: Local stations: Anglesey Radio, and/or Port Patrick Radio.
VHF: Port VHF service. Call sign 'Ramsden Radio'. Channel 16 (156.8 mHz) Calling and Safety. Channel 12 (156.6mHz) Port Operations.
TUGS: Liverpool tugs available on request. Notice required.
BERTHING:

Docks	Water area in Hectares	Width of entrance
Ramsden	24.8	30.48 m.
Buccleuch	12.6	30.48 m.
Devonshire	12.0	24.4 m.

Walney Channel Deep-water Berth: 259.10 m.×30.48 m.×10.06 m. depth.

Ramsden includes: Ramsden Dock Basin with three berths equipped for handling bulk cargoes with a total quayage of 378 m., taking vessels of up to 9.15 m. draft, and Anchor Line Basin with three berths 256 m., 152.4 m., and 274.3 m., long respectively, taking vessels of up to 7.3 m. draft. Anchor Line berth equipped for Ro/Ro traffic.
DENSITY: Salt water 1025.
FRESH WATER: Available from quayside hydrants.
FUEL: No stocks at Barrow. Can be supplied by road or coastal tanker.
GANGWAY/DECK WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Handled by ship's crew.
IDENTIFICATION CARDS: Seaman's Book or Passsport required by non-British crew.
CONSULS: Netherlands, Norway, Portugal, Spain. Tel. Barrow 22323.
AIRPORT: Nearest at Manchester, 100 miles distant. Flights to all parts. Local Airport facilities by arrangement.
TIME: As for other UK ports.
HOLIDAYS: As for other ports in England, plus New Year's Day (1st January).
POLICE/AMBULANCE/FIRE: Police: Tel. Barrow 24532; Ambulance: Tel. Barrow 24201, 21035 and 21363; Fire: Tel. Barrow 21363.
SHORE LEAVE: No restrictions.
AUTHORITY: Docks Manager and Harbour Master.

BARRY: 51.24 N. 03.16 W. (See Plan Book)

DOCUMENTS: See "Cardiff".
PILOTAGE: Telegraphic address of pilot station: S.E.W.P.A. Pilots, Pier Head, Barry Docks. Amount of advance notice of ETA required: 24 hours. Final confirmation to be given by VHF or RT when within 2 hours of pilot station. VHF channel or frequency to be used when contacting pilot boat or pilot station: VHF Channel 16 thence working Channels 6, 8, 10, 11, 22.

Pilot boat: motor launch black hull with "S.E.W.P.A. Pilot" in white on same. Brown superstructure. Light or sound signals to be made by vessels requiring a Pilot: flag G over numeral 6 flown by day, or 6 sounded on whistle or siren; flashed by lamp at night.

Exact area where pilot boat is located normally between Nash Point and Breaksea L.V. Smaller vessels may be boarded in Barry Roads.
ANCHORAGE: Barry Roads, 10 fathoms, safe anchorage. Large vessels should anchor West of Breaksea L.V. Small vessels 0.75 mile S.E. of Barry Dock Entrance.
RESTRICTIONS: Entrance only 4 hours before HW to 4 hours after HW.
MAX. SIZE: 575 ft. × 75 ft. × 31 ft. draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Barry Docks Radio, Channel 22.
VHF: Channels 16, 10, 11 and 22.
TUGS: Join vessel at Barry Road. Tug's or ship's lines utilised.
BERTHING: The port is fully equipped to receive all types of oil chemicals, including LPG. Also modern facilities exist for handling all types of bulk as well as conventional cargoes. A roll-on/roll-off berth is available. Container traffic is not a feature of the port.
BRIDGES: Bridge swung to vessel's requirements.
STEVEDORES: An early ETA essential. Enables planning to be effected in conjunction with other work in port.
MEDICAL: Hospital facilities available. Advance notice desirable.
TANKERS: 6 tanker berths, maximum draft 28 ft.
DENSITY: Density 1020.
FRESH WATER: 15/20 t.p.h. per hose.
FUEL: By barge or road transport.
GANGWAY/DECK WATCHMEN: The services of watchmen provided at discretion of Shipowner or Agent.
OPENING/CLOSING HATCHES: Work normally undertaken by ship's crew but the port will, if requested, provide a crane to assist in this work on completion of a "Hatch beam form". Riggers may be employed on this work at request of shipowner.
CUSTOMS ALLOWANCE: 1.5 oz. tobacco per day per man. 0.185 litre wine or spirits per day per man.
IDENTIFICATION CARDS: Not needed by Port Authority.
CONSULS: None. Many located at Cardiff 8 miles East of Barry.
REPAIRS: All types of repair undertaken by private ship repairers.
DRY DOCKS: One 940 ft. × 78.5 ft.
REPATRIATION: All facilities available.
AIRPORT: Cardiff (Wales) Airport, 4 miles, served by regular airlines.
TIME: British Standard Time, GMT plus 1 hour. Reverting to GMT in Winter months.
HOLIDAYS: Bank Holidays. Arrangements made to work if essential.
POLICE/AMBULANCE/FIRE: Call operator by dialling 999.
TELEPHONES: At main berths.
AUTHORITY: British Transport Docks Board.

AGENT: Lambert Brothers Ship Agencies Ltd., The Exchange, Cardiff, CF1 6RX. Telex: 49384. Cables Lambert Cardiff. Telephone: 0222 25201.

BELFAST: 54.36 N. 05.56 W. (See Plan Book)

DOCUMENTS:
1 Passenger and Crew List for Immigration.
1 Crew Declaration C142 (for HM Customs).
1 List of Ship's Stores (for HM Customs).
1 Maritime Declaration of Health.
1 Cargo Manifest.
PILOTAGE: Pilot station is situated on end of East pier at Carrickfergus. It is manned continuously. Vessels requiring a pilot should give as much advance notice as possible of ETA, but in any case not less than 1 hour. Pilots may be ordered through:
(i) Pilot Station Carrickfergus, tel. Carrickfergus 2329.
(ii) Port Operations Station, tel. Belfast 34422 Ext. 330, or Belfast 59107.
(iii) Belfast Harbour Office, tel. Belfast 34422 Ext. 225, 0900-1700 hrs. Monday-Friday.

There are two motor launches servicing pilots. "Eleanor Laura" is 51 ft. 6 in. long and "Mabel Helen" is 46 ft 8 in. long. Both vessels are painted black with word Pilot in white letters on each side.

Pilot launches may be contacted on VHF Channel 16 and working frequency Channel 6.

Usual international signals should be made for a Pilot. Pilots board from 1.5 to 2 miles S.E. of Carrickfergus. In poor visibility the pilot launch makes a sound signal of 4 short blasts. Vessels may be led into calm water before boarding.

ANCHORAGES: Safe anchorages, according to draft and size of vessel are available through Belfast Lough East of a line from Carrickfergus to Grey Point.

RESTRICTIONS:

Intended depths in the entrance channels: Victoria Channel, sea to Refinery berths – 30 ft. below datum. Refinery to Thomson wharf – 26 ft. below datum.

Musgrave Channel, 21 ft. below datum.

Herdman Channel, 21 ft. below datum.

MAX. SIZE: Vessels' size is restricted only by depth of water available. See "Restrictions", "Berthing", and "Tankers".

HEALTH: Use International Code quarantine signals. Master of a ship approaching a port in Northern Ireland from a foreign port other than an excepted port must ascertain state of health of all persons on board, and must fill in and sign Declaration of Health. It should be completed and ready to deliver to the Customs Officer, or authorized officer of the Port Health Authority, whichever first boards the ship.

If any suspected diseases on board, free pratique will not be granted by Her Majesty's Customs until the ship has been visited by the Port Medical Officer. Therefore in these cases notify PORTELTH BELFAST by radio in advance.

Also see "Health – All Ports" before first U.K. port.

RADIO: The best station for messages, cables, etc., is Port Patrick call signal GPK.

VHF: Belfast Port Operation and Information service is situated at N.W. corner of East Twin dock. A continuous watch is maintained on VHF R/T on Channel 16. Working Channel is 12. Call sign is Belfast Harbour Radio.

TUGS: Tugs are owned by Cory Ship Towage Ltd., Tel. No. Belfast 743278. They are fitted with VHF Channels 16, 14, 12, 8 and 6. Tugs normally meet inward bound vessels in vicinity of number 20 beacon. Use of tugs' lines is optional. Charge for use of each tug line is £5.

BERTHING: The following berths are equipped for handling containers or drive-on, drive-off traffic:

Berth	*Max. draft (ft.)*
Donegall Quay 3 (1×25 tonne derrick crane)	14
Donegall Quay 4 (2×7.5 tonne portal crane)	14
Donegall Quay 5 (No cranes)	14
Donegall Quay 6 (No cranes)	14
Ballast Quay & Spencer Dock (2×25 tonne derrick cranes)	18
York Dock A (No cranes)	24
York Dock 1 (1×35 tonne derrick crane)	24
Herdman Channel West (2×30 tonne transporter cranes)	18
Gotto Wharf (2×30 tonne transporter cranes)	21
Stormont Wharf 2 (200 tonne cantilever crane)	28

Unitank Storage Co. Ltd. have constructed a bulk liquid terminal for the storage of petroleum, chemical products, etc. Special tankers ship liquid gas to the storage installation of Calor Kosangas (Northern Ireland) Ltd. at Musgrave Channel.

STEVEDORES: Two schooling times per day for stevedoring gangs – 0800 and 1300 hrs. Gangs for all week-end work are schooled at 1300 hrs. on Fridays.

MEDICAL: All kinds of medical treatment are available. Agent should be given as much notice as possible for arrangements to be made. International vaccination certificates for smallpox are required.

TANKERS: Tankers have to observe (i) Belfast Harbour Commissioners By-Laws for loading, discharging, etc., of petroleum spirit. (ii) Chamber of Shipping Tanker Safety Code.

Capacity for 6,000 tons of tank washings to be processed at B.P. Refinery.

Tanker berths: B.P. oil refinery 35 ft. No. 1 oil jetty 28 ft. No. 2 oil jetty 28 ft. 6in.

DENSITY: Average density of water in Inner Harbour is about 1012, and Outer Harbour is about 1024.

FRESH WATER: Available at almost all berths. Delivery is by hose at a rate of approx. 30 t.p.h. Arrangements can be made through Dept. of Environment (Water Services Division). Tel. 749402.

FUEL: All grades of fuel oil are available. 48 hours advance notice of requirements should be given.

FIRE PRECAUTIONS: Ships have to observe (i) Belfast Harbour Commissioners By-Laws for regulating the use of fires, lights and electrical apparatus. (ii) Chamber of Shipping Tanker Safety Code.

Special precautions for vessels carrying petroleum, explosives, calcium carbide and dangerous goods are set out in the appropriate by-laws. A copy of general port fire notice, delivered to all ships on arrival.

GANGWAY/DECK WATCHMEN: Normally, a member of ship's company acts as watchman. Shore watchmen may be obtained through Agent.

OPENING/CLOSING HATCHES: Conventional beams and hatches and slab hatches are opened and closed by stevedores. McGregor or patent steel hatches are worked by ship's personnel. Ship's personnel are required to work all types of hatches at grain silos.

CERTIFICATES:

Register. Radio Certificate. Load Line Certificate. Safety Equipment Certificate. Safety Construction Certificate. Light Bills. Passenger Certificate if applicable. Chain Register. Derat Certificate.

CUSTOMS ALLOWANCE: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.

IDENTIFICATION CARDS: Seamen's identity cards required.

CONSULS:

Belgium	Hillsborough 682671
Denmark	Belfast 30581
Dominican Republic	Belfast 31265
France	Belfast 660325
Germany	Ballymena 41412
Italy	Belfast 778353
Netherlands	Belfast 43126
Norway	Belfast 24909
Spain	Belfast 27571
Sweden	Belfast 29281
Switzerland	Belfast 669651
Turkey	Belfast 25865
U.S.A.	Belfast 28239

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: East Twin dry dock, length of floor 1,100 ft. breadth of floor 167 ft., breadth of entrance 165 ft., level of sill 26 ft. 6 in. below datum.

Harland and Wolff building dock, length of floor 1,825 ft., breadth of floor and entrance 305 ft., level of sill 16 ft. 10 in. below datum.

Five other dry docks available.

REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.

AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom.

TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.

HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.

POLICE/AMBULANCE/FIRE: All can be contacted by phoning 999 and ask for services required. Additionally: Fire Brigade Belfast 22222; Ambulance Belfast 41212; Harbour Police Belfast 23555; *or* through Belfast Harbour Radio on VHF/RT Channels 16 and 12.

TELEPHONE: Telephone can be placed on board at certain berths.

SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.

SHORE LEAVE: Normally no restrictions on shore leave.

AUTHORITY: Belfast Harbour Commissioners.

BLYTH: 55.08 N. 01.30 W. (See Plan Book)

DOCUMENTS:

Certificate of Registry.

Load Line Certificate.

Wireless Telegraphy and/or Safety Radio Certificate.

Safety Equipment.

Ship Construction.

Light Dues Payments.

Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.

List of members of crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A).

Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by R/T when within 50 miles of port, and VHF when approx. 1 hour off port. Pilot boats black hull with words "Pilot" on Hull or Superstructure. Letters in white. Fly international Pilot Flag at masthead and at night show international light signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further weather permitting. Pilots board at Pier end area during adverse weather.

ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.

RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.7 m. LAT and approaches 8.6 m. LAT. Upper River and South Harbour 6.8 m. LAT. Rise of tide 4.3 m. springs, 2.1 m. neaps.

MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m.

For other berths max. length 190.5 m., draft 8.5 m.

HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health officer if Maritime Health Declaration is clean. If suspected diseases on board radio "PORTELTH BLYTH" in advance advising details.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio.

VHF: Details of movements within port given over VHF from port control office. Calling Channel 16, working Channel 12.

TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.

BERTHING: Alcan Bulk Alumina Terminal, depth alongside 10.4 m. LAT.

North Quay, South Harbour, depth alongside 8.5 m. LAT. Coal-loading berths and waiting berths, 5.2 m. to 8.6 m. LAT. West Quay, dredged depth 5.2 m. LAT. South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay dredged depth 6.8 m. LAT.

STEVEDORES: Blyth Harbour Commission, Traffic Department. South Harbour, Blyth. Tel. Blyth 3611/2. ETA requested day before arrival.

MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.

DENSITY: Sea water. Fresh water effect negligible.

FRESH WATER: Obtainable from shore hydrants. Rate of delivery approximately 20 t.p.h.

FUEL: BHC operate a bunkering Agency on behalf of Shell UK Ltd. 24 hours notice usually required. Grades gas oil and marine diesel.

GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCE: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.

IDENTIFICATION CARDS: Seaman's Book or Passport desirable.

CONSULS: Denmark, Norway, Netherlands.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 3 dry docks available No. 3–L 467 ft. 10 in. × B 60 ft. 9 in., No. 2–L 338 ft. 9 in. × B 44 ft. 10 in. No. 1–L 311 ft. × B 46 ft.

REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.

AIRPORT: 24 km. Served by regular airlines.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; Spring Bank Holiday and Late Summer Holiday. Cargo work can be arranged on these days by request.

POLICE/AMBULANCE/FIRE: Tel. 999.

TELEPHONES: Can be fixed aboard by arrangement.

AUTHORITY: Blyth Harbour Commission.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:

Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying G Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.

ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.

RESTRICTIONS: In accordance with state of tide and draft restrictions.

MAX. SIZE: Max. permissible length 149 ft. Draft 13 ft. on spring tides.

HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.

Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio Station is the best for a vessel to route ETA, etc.

TUGS: None available.

MEDICAL: Agents require advance notice of required medical attention. Hospital facilities available. Relevant medical information, i.e. fever, etc., required.

DENSITY: Sea water.

FRESH WATER: Unlimited quantity available. Delivery from shore pipe-line at the rate of 10 t.p.h.

FUEL: All grades available. Delivery by road tankers.

OPENING/CLOSING HATCHES: Normally carried out by crew.

IDENTIFICATION CARDS: Not required.

CONSULS: No local Consuls. Nearest port of availability, Hull, Yorks.

REPAIRS: Limited engine and deck repairs.

REPATRIATION: No facilities exist for crew change.

AIRPORT: Yeadon, 45 miles, served by regular airlines.

HOLIDAYS: Normal Bank Holidays. Cargo can be worked on these days.

POLICE/AMBULANCE/FIRE: Police Bridlington 72222; Ambulance 0482–881198; Fire 73585.

TELEPHONES: No arrangements exist for placing telephones aboard.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Bridlington Harbour Master: Harbour Commissioners.

BRISTOL: 51.27 N. 02.35 W. (See Plan Book)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
Home Office form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
Port Dues Certificate.
1 Passenger List.
Landing Card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Telegraphic address, Brispilot Avonmouth. Notice required, not less than 12 hours (preferably more) before arrival Breaksea Lighthouse buoy. VHF Channel, calling 16, working 6. A 58 ft. motor pilot boat, black hull, "Bristol Pilot" in large white letters amidships.

Position: Principle pilotage station. Breaksea station at Breaksea extends from a line drawn 180° from Sully Island. Weather and other circumstances permitting the motor pilot boat operates from Barry Harbour to board vessels expected to dock at Bristol.

Pilot boats in Bristol Channel have adopted distinctive pilot signals, made audibly during foggy weather when the fog signal for a vessel is heard, and by morse lamp at night in clear weather. The distinctive signal for Bristol pilots is the International Morse Code Number 2, viz ··---Vessels desiring to embark or disembark a pilot are invited to adopt a similar procedure.

ANCHORAGES: Barry Road affords good anchorage in moderate weather for vessels awaiting a Pilot. Walton Bay affords good anchorage within 6 miles of Avonmouth.

RESTRICTIONS: Avonmouth Docks. No restrictions at night. Sill clearance of 4 ft. for all vessels with a maximum draft of 34 ft. 6 in. salt water. There are restrictions on draft during neap tides to possible 28 ft. Range of high water – 33 ft. to 48 ft.

Portishead Docks. Sill clearance of 5 ft. for vessels up to 55 ft. beam. Sill clearance of 6 ft. for vessels up to 60 ft. beam.

MAX. SIZE: Avonmouth Docks. Max. length 690 ft., beam 95 ft., draft 34 ft. 6 in. salt water.

Royal Portbury: Max. length 950ft. Max. beam 130 ft. Max. draft 40 ft.

Portishead Docks. Max. length 415 ft., beam 60 ft., draft 26 ft. (normal tides).

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Health clearance by Port Medical Officer must be obtained.

Foreign arrivals which have had no sickness aboard do not need to submit Maritime Declaration of Health or to obtain Health Clearance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: Niton Radio, Lands End Radio, Portishead Radio.

RADAR/VHF: No port radar service, but an extensive VHF coverage exists from West of Barry Roads, to all dock entrances.

TUGS: Vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

Ships for Royal Portbury Docks are normally met by tugs West of Portishead Point.

BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times if necessary by arrangement with Dock Master.

STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.

DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides. Portishead Docks: The density is 1015.

FRESH WATER: Avonmouth and Portishead Docks: available at all berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25–30 t.p.h.

FUEL: Most grades available – 24 hours notice required.

FIRE PRECAUTIONS: According to local laws, available on request.

DEVELOPMENTS: *Royal Portbury Dock:* The Port of Bristol's new Royal Portbury Dock received its first commercial vessel on April 12th, 1978. The 1,000-acre site is being developed to provide space for modern cargo handling methods with provision for Roll-on/Roll-off cargoes.

Situated on the South bank of the River Avon opposite Avonmouth Docks, with a depth of water of 45 ft., Royal Portbury Dock is already handling unitised cargoes on the common user quays whilst other berths await development.

At the Oil Basin, a bulk liquid storage installation for petroleum, molasses and chemicals has been constructed. Major development schemes now operational include reconstructed and modernised grain discharging berths at the Royal Edward Dock.

GANGWAY/DECK WATCHMEN: Not absolutely necessary – Available if required.

OPENING/CLOSING HATCHES: If crew open hatches on the first day then they must continue to do so whilst vessel is discharging/loading, otherwise dockers attend to this.

CERTIFICATES:
- Load Line Certificate.
- Safety Equipment Certificate.
- Lloyd's Construction Certificate.
- Derat Certificate.
- Ship's Register.
- Light Bills.
- Safety Radio Certificate.

CUSTOMS ALLOWANCE: Customs allowance for crew members of British and foreign ships in British waters at present are:

Tobacco: (incl. cigars and cigarettes) – 30 grammes (1 oz.)

Spirits: (incl. liqueurs, perfume and toilet water) – 0.185 litre (0.75 of a bottle) of which not more than half may be perfume

Wine: 1.5 litres (2 bottles)

IDENTIFICATION CARDS: Not necessary unless being repatriated.

CONSULS:
- Belgian Consul
- Chilean Consul
- Danish Consul
- French Consular Agent
- Finnish Vice Consul
- German Consul
- Greek Consul
- Icelandic Consul
- Italian Consular Agent
- Netherlands Vice Consul
- Norwegian Vice Consul
- Portuguese Vice Consul
- Spanish Vice Consul
- Swedish Vice Consul

REPAIRS: All types of repairs are carried out.

DRY DOCK:

	Total length	*Length over blocks*	*Width of Entrance*	*Depth of water on sill*
Avonmouth Docks	875 ft.	850 ft.	100 ft.	32 ft.

REPATRIATION: Repatriation can be effected to all parts of world.

AIRPORT: Local airport approximately 12 miles away. London can be reached in 1.5 hours by train.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: New Year's Day; Easter (varies); May Day; Spring Bank Holiday (last Monday in May): Summer Bank Holiday (varies, usually last Monday in August); Christmas Day (25th December); Boxing Day (26th December). Work can be arranged on these holidays, although unusual to work 25th/26th December.

POLICE/AMBULANCE/FIRE: Avonmouth Docks. Can be contacted by telephoning Avonmouth 2591.

Portishead Docks. Emergency services obtained by dialling 999 at public call boxes.

TELEPHONES: Can be put on board at most berths.

AUTHORITY: Port of Bristol Authority.

AGENT: Hodder, Whitwell Ltd., Gloucester Road, Avonmouth, Bristol, BS11 9BH. Cables: "James Avonmouth". Tel. Bristol 823671. After Office hours: Bristol 822855. Telex: 44718.

BRIXHAM: 50.24 N. 03.30 W.

PORT LIMITS: The area below the level of high water enclosed by:—

(a) An imaginary line drawn from Shoalstone Point in the Parish of Brixham, extending in a west/north/westerly direction for a distance of 6,500 ft. or thereabouts, until it intersects the imaginary line next described:—

(b) An imaginary line drawn from the centre of the Old Quarry at O.S. Ref. SX91445723, in a north-easterly direction for a distance of 3,000 ft., or thereabouts, until it intersects the imaginary line first described, and:—

(c) The land line of the coast from the centre of Old Quarry aforesaid to the said Shoalstone Point.

DOCUMENTS:
- 1 Crew List,
- 1 Passenger List,
- 2 General Declarations (Customs),
- 1 Health document,
- 1 Manifest,
- 1 Each bill of Lading,
- 1 Ships papers,
- 1 Ships Certificate,

or

as for other Small U.K. Ports.

PILOTAGE: Trinity House Pilot, tel. Brixham 2214.

DEEP SEA AND COASTAL PILOTAGE: Pilots for Channel, North Sea, British Coast and Baltic. 48 hours before arrival radio "HUTCHINSON GRAVESEND" stating ETA off Brixham and port(s) of destination. On approaching Brixham contact Brixham Pilots on VHF Channel 16 and 9. Pilots board by motor-launch 1 mile N.E. off Berry Head. Pilot boats, length 40 ft. flying "G" flag and flashing "H". Pilots can also board at any British or Continental port as required.

Also see "London" — Pilotage.

ANCHORAGES: In Torbay. Middle of Bay on line Brixham (Victoria) Breakwater and entrance to Torquay Harbour. 6 fathoms chart datum.

MAX. SIZE: Depending on draft (36 ft. to 50 ft.).

HEALTH: See "Health – All Ports" before first U.K. port.

VHF: Berry Head Coastguard station, Harbour Office and Torbay and Brixham Shipping Agents on VHF Channel 16.

TUGS: None.

BERTHING: Small coastal vessels in Inner Harbour by arrangement with Harbour Master. Vessels up to 500 ft. (draft 26 ft.), at Jetty, on Brixham breakwater by arrangement with Brixham Bunkering and Devon Marine Ltd., (Telephone Brixham 2250), or with Harbour Master, Brixham.

MEDICAL Contact Brixham and Torbay Shipping Agents.

DENSITY: Salt water. 1025.

FRESH WATER/FUEL: Available from Brixham Bunkering and Devon Marine Jetty on Breakwater.

REPAIRS: Engine welding, plumbing by local firms.

SURVEYORS: Lloyds Agent – Mr. J. S. Churchill, 25 Fore Street, Brixham, telephone 2171.

REPATRICATION: No facilities.

AIRPORT: Exeter, 35 miles away.

POLICE/AMBULANCE/FIRE: Brixham 2231 or 3065 or 999.

SERVICES: No tank cleaning. Compass adjusting with arrangement with Harbour Master. (Tel: Brixham 3321.)

SHORE LEAVE: Allowed.

AUTHORITY: Harbour's Administrator, Torbay Borough Council, and Harbour Master.

BUDE: 50.50 N. 04.33 W.

GENERAL: Port little used by commercial shipping.

DOCUMENTS/HEALTH/CONSULS: Port not equipped to accept vessels from abroad.

PILOTAGE: Not normally available (special arrangements may be made).

ANCHORAGES: Outer Harbour dries out at half tide. Inner Harbour (Canal) 8ft. draft maximum.

MAX. SIZE: Inner Harbour (Entry via Lock) length 90 ft. Beam 25 ft. Draft 8 ft.

RADIO: MF Ilfracombe Radio. VHF Severn & Celtic.

FRESH WATER: Available via 0.5 in. hose pipe.

TELEPHONE NUMBERS: Harbour Master Bude 3111 (Office), Bude 3531 (Home), Coastguard Harland 235, Police Bude 2131.

SPECIAL REGULATIONS: Entry to the Harbour is made by leaving Chapel Rock (linked to the Main Land by a Breakwater) to starboard. Head towards the Lock in the Channel marked by 2 pairs of Leading Beacons.

The outer pair of Beacons, bearing 075° 30' (T) consist of a front mark – white Spar with Yellow Diamond Topmark, rear mark – white flag staff, both on cliff top on North side of Harbour.

The inner pair of Beacons, bearing 131° 30' (T) consist of a front beacon – white Pile Beacon with Yellow Triangle Topmark, rear beacon – white spar with Yellow Triangle Topmark, placed 0.5 cable West of Lock Entrance.

The approach to Bude, either from the North or South, should be made from a S.W. direct direction in line with the first pair of Leading Marks.

Immediately on passing Barrel Rock (0.5 cable North of Chapel Rock and marked by a Beacon Barrel) turn to starboard and pick up the inner pair of Leading Marks from which the Lock is clearly visible.

Entry to the Harbour at night not recommended.

Heavy ground swell and breaking seas may prohibit entry and exit.

The Harbour dries out at each Tide and entry of vessels is normally restricted to 2 hours either side of High Water.

For Locking, 18 ft. minimum of water above Chart Datum is required to Lock. A heavy swell may also prohibit the operation of the Lock.

Prior notification of arrival should be made to the Harbour Master if possible.

AUTHORITY: North Cornwall District Council.

CALEDONIAN CANAL: 57.27 N. 04.18 W.

PORT LIMITS: Craft are considered to be within the Canal when they have entered the sea lock structures.

DOCUMENTS: Masters of craft on through passage must report to the Sea Lock Office at Corpach with the ship's measurement certificates to enable toll declaration to be made. Masters of craft on partial passage starting and returning to the East coast should report to the Clachnaharry Canal Office.

PILOTAGE: Approach pilotage compulsory at Inverness end. Contact Inverness Pilots by Link Call through Kessock 217 (Ships of NRT under 100 tons are exempted). Pilotage within the Canal and West approaches optional. For Pilotage into Corpach from the West contact Mr. H. McKinnon at Corpach by Link Call to Corpach 304 and for Canal Pilotage, by Link Call to Caledonian Canal Office, Inverness 33140.

RESTRICTIONS: Entrances to sea locks restricted for 2 hours either side of low water Springs. There is generally no restriction at low water Neaps. The Canal is operated on normal manning from 0800 until 1700 hrs. (Sundays excepted).

MAX. SIZE: 48.770 m. (160 ft.) length overall × 10.670 m. (35 ft.) beam × 2.740 m. (9 ft.) draft fresh water or, alternatively, 45.720 m. (150 ft.) × 10.670 m. (35 ft.) × 4.110 m. (13 ft. 6 ins.) draft fresh water.

Corpach sea lock will admit craft to the Corpach Basin only of size 61.870 m. (203 ft.) length overall × 10.670 m. (35 ft.) beam × 4.110 m. (13 ft. 6 ins.) draft fresh water.

All dimensions are overall and *NOT* moulded.

HEALTH: Craft from foreign ports will be boarded by the Customs/Immigration/Health at the sea locks and they should fly the appropriate international flags on approach.

Also see "Health – All Ports" before first U.K. port.

RADIO: Western approaches via Oban radio. Eastern approaches via Wick or Stonehaven.

VHF: None.

RADAR: None.

TUGS: A Canal tug is available if required. Service should not be required on normal passage.

BERTHING: At Corpach Old and New Wharves (limited Customs approval). At Inverness Glenmhor and Glen Albyn Wharves below Muirton and Upper Muirton Wharf at the top of Muirton. Water depth available for craft having 4.110 m. (13 ft. 6 in.). Normally ships gear or road mobile cranes used. Corpach New Wharf equipped with 2 × 7-ton Derrick Cranes owned and operated by Scottish Pulp and Paper Mills.

BRIDGES: Road and rail swing bridges are operated to permit the passage of craft. Headroom restricted to 36.576 m. (120 ft.) by overhead electric cables near Inverness.

STEVEDORES: Traffic to Scottish Pulp and Paper Mills at Corpach unloaded by Pulp Mill gangs. Elsewhere arranged through Shipping Agent.

MEDICAL: Normal General Practioners service available at main centres along the Canal. Full Hospital facilities at Inverness.

FRESH WATER: Fire hose supply available at Glen Albyn Wharf, Inverness. Small domestic supplies available at the main lock flights. Hydrant supply at 30 p. per 100 gallons.

FUEL: Available by road tanker from principal oil companies by telephoning Shell, Inverness 38850 or Fort William 2404; Esso, Inverness 37222 or Fort William 2903.

REPAIRS & DRY DOCK: Limited repairing facilities at the Thornbush Slipway and Engineering Company Limited, Inverness.

AIRPORT: Highlands and Islands domestic flights from Inverness (Dalcross).

POLICE/FIRE/AMBULANCE: Emergency calls to these services on 999.

DEVELOPMENTS: Likely future headroom restriction to approximately 28.960 m. (95 ft.) over H.W. Springs in about 1980 upon construction of the new Kessock Bridge at Inverness.

GENERAL: The Caledonian Canal is part of the Customs Port of Inverness.

AUTHORITY: British Waterways Board. Caledonian Canal Office, Clachnaharry, Inverness.

CAMPBELTOWN: 55.26 N. 05.36 W. (See Plan Book)

DOCUMENTS: 2 Crew Lists; 2 Passenger Lists; 1 Store List; 1 Personal Effect List; Ship's Register; 1 Manifest or Bill of Lading.

PILOTAGE: Although *not* in Clyde Port Authority area, where large vessels are concerned, it is advisable to have the services of a qualified Clyde River Pilot or where applicable a Certificated Naval Pilot. As neither are based in Campbeltown, it is essential that at least 24 hours notice be given to Agent, when required.

ANCHORAGE: For large vessels in 6 to 10 fathoms in the area between the Orange leading lights and the Methe bank buoy, for smaller vessels a wider area can be used but south side of loch best holding.

HEALTH: Normal UK Port requirements. In event of disease or fever prior notice should be given to Agent.

Also see "Health – All Ports" before first UK port.

RADIO: All messages through normal coastal stations or by radio telephones via Portpatrick Radio when nearer port. Cables should be addressed to Agents as "Coal, Campbeltown".

RADAR/VHF: No port radar service. Direct contact with Harbourmaster and Agent still under consideration. P.O.L. Depot, Campbeltown can be called on 30 – 40 mile radius on Channels 6, 12, 18. Same channels for tugs, lying off port, when arranged previously.

TUGS: Must be ordered at least 24 hours beforehand as they come from Glasgow area further north on River Clyde. Precise requirements concerning arrival/departure times requested owing to heavy costs entailed for waiting time.

BULK CARGO FACILITIES: Berth for vessel up to 230 ft. in length with maximum permissable draft 12 ft. (Salt water). Discharge by shore crane, Maximum lifting 5 tons.

SPECIALISED CARGO-HANDLING FACILITIES: One berth for roll-on/roll-off ferry inside harbour, max. draft of vessel 8 ft., general cargo discharged.

STEVEDORES: Agents arrange all cargo discharges through another dept. of D. McNair & Son, including mechanical handling. Portable cranes only available. Ship's gear used when available to minimise costs.

MEDICAL: One casualty hospital available. Serious casualties transferred to Glasgow either by Air or road, according to condition. Four local doctors.

TANKERS: All intended arrivals should be notified to Officer-in-Charge, P.O.L. Depot, Campbeltown (Tel. No. 0586/2226) at earliest.

P.O.L. Jetty, minimum depth, 40 ft. One discharging berth available.

FRESH WATER: Available at all times, delivery by hose, cost per ton 10p.

FUEL: Marine Gas Oil supplied on commercial quay. Naval requirements by arrangement with P.O.L. depot.

REPAIRS: Minimal repairs only. Notify Agent as early as possible.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Ship's option.

CARGO GEAR: See "Stevedores". Ship's gear preferred where possible.

REPATRIATION: Air service available once daily in forenoon, except Sunday.

AIRPORT: Machrihanish – 3 miles distant.

TIME: G.M.T.

HOLIDAYS: New Years Day (1st January) Christmas Day & Boxing Day, 3 Statutory Local Holidays, Annual Holidays 1st fortnight August.

Work can be carried out by arrangement with Stevedores.

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: By arrangement.

SERVICES: Laundry/Dry Cleaner, Minimal Radar/Radio, VHF Repairs. No tank-cleaning equipment available or compass adjusting.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Not required. P.O.L. Depot request production of Seamen's Cards.

GENERAL: Basin of the Clyde Lat. 55° 25′ 30″ N., Long. 5° 35′ 30″ W.

Tides: Spring rise 8.9 ft; Neap rise 7.5 ft.; depth at sea entrance, 12 ft. low water spring tide; there is a rise of 8 ft. in spring tide in harbour.

DEVELOPMENTS: The outer end of the old quay will be reconstructed during 1979/80.

AUTHORITY: Commercial, Harbour & Loch Area – Strathclyde Regional Authority, c/o Harbourmaster, Campbeltown.

P.O.L. Depot, Campbeltown. Officer-in-Charge, Kilkerran Road, Campbeltown.

AGENT: McNair & Son, Kinloch Road and 27a Longrow, Campbeltown. PA28 6EG Tel. Nos. 0586/2020 or 2039. Cables – "Coal, Campbeltown". after hours – 2039 – Mr. Shaw.

CARDIFF: 51.29 N. 03.10 W. (See Plan Book)

PORT LIMITS: A vessel is considered as "arrived" when it is in the lock.

DOCUMENTS:

1 Crew List.

1 Health Form.

1 Port Immigration, i.e. Crew List, and where applicable, a passenger list.

Pratique issued by Customs.

1 List of Consumable Stores (tobacco, snuff, alcohol, etc.).

3 Bills of Lading (one original and two copies).

PILOTAGE: Channel pilotage and dock pilotage not compulsory except for vessels carrying passengers. Pilots embark from pilot cutters operating from Barry Harbour.

Pilot Cutters are marked on each side "Pilots" and operate radio continuous watch on VHF. Signal for pilot cutter – numeral 7 on whistle or siren. Telegraphic address Carpil Barry. Minimum of 24 hours notice required of ETA. VHF Channels 16, 9, 14 and 11.

4

ANCHORAGE: Barry Roads: Good anchorages in moderate weather in depths from 5 to 6 fathoms (9.1 to 11 metres) about 0.5 mile S.W. of the entrance to Barry Docks. Clay bottom.

RESTRICTIONS: Entry to docks restricted to a period of 4 hours before and 3 hours after high tide, according to size and draft of vessel.

Entrance lock 850 ft. length, 90 ft. wide.

MAX. SIZE:

Queen Alexandra Dock. LOA 660 ft., beam 88 ft., max. draft 34 ft.

Roath Dock. LOA 650 ft., beam 86 ft., max. draft 33 ft.

Vessels near max. dimensions may be accepted on certain tides after consultation with the Dock Master.

HEALTH: Maritime Declaration of Health to be made to Port Authority or Customs Officer, whoever boards ship first. In event of contagious fever on board, Port Health Authority must be advised by radio before arrival. No pratique necessary if vessel is entering port from another port in U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: Ilfracombe Radio and Portishead Radio.

VHF: A port operation VHF service maintained at dock entrance during tidal hours. Call sign "Cardiff Radio" calling on Channel 16 and operating on Channel 14. There is also "Severn Radio".

TUGS: Tugs normally join vessel 0.5 mile to seaward of Outer Wrach Channel Buoy, and arrangements for attendance of tugs should be made through ship's Agent.

BERTHING: Arranged through Dockmaster, and berths within docks are flat quays. Rise and fall usually varies up to 1 ft.

SPECIALISED CARGO HANDLING FACILITIES:

Grain: Spillers berth, 2 Suction Plants. Average discharge 900 tons per day (450 tons per 8 hours per gang).

Coal (Imports): Pontoon berth, Roath Dock. Self-discharging vessels. Average discharge 4,000-5,000 tons per day (2,000-2,500 tons per 8 hours per gang).

Suction Plant: Roath Dock. Average discharge 300-400 tons per day (150-200 tons per 8 hours per gang).

Petroleum Products: 5 Petroleum berths (2 in Roath Dock; 2 in Queen Alexandra Dock and 1 in Penarth Harbour). Average discharge approximately 448 cu.m. per hour.

There are no specialised berths equipped for containers, roll-on/roll-off traffic, liquid chemicals, LPG carriers, fertilisers, sulphur, etc.

BRIDGES: Bridges throughout the port can be operated on tide times.

STEVEDORES: Arrangements for employment of stevedores undertaken by Docks Board through ship's Agent.

MEDICAL: All facilities available. Agents should be advised in advance if medical services required.

TANKERS: Three tanker berths available, one in Queen Alexandra Dock, two in Roath Dock where there is also a tanker-cleaning berth. Special instructions are issued to Master on arrival at port.

Penarth. One berth, 500 ft. long.

DENSITY: 1018..

FRESH WATER: Available 24 hours daily from quayside, delivery 20 t.p.h. maximum.

FUEL: Fuel of all grades available.

FIRE PRECAUTIONS: For tankers, strict fire precautions required in accordance with latest safety procedures.

Emergency Action – Fire: In the event of an outbreak of fire (no matter how small) immediately dial 999 on the ship-to-shore telephone. When the operator answers, say "Fire", and wait until you are connected to the Fire Station Control. Then repeat: "Fire at the Petroleum Berth, Roath Dock". In event of the ship-to-shore telephone being inaccessible or out of order, use GPO call box situated on dockside road to stern of the vessel.

GANGWAY/DECK WATCHMEN: Performed by ship's crew and necessary for tankers.

OPENING/CLOSING HATCHES: Carried out by ship's crew.

CUSTOMS ALLOWANCE: Tobacco, 1 oz. per day per man, max. 8 days. Wine/Spirits, 0.25 pint spirits per man per day every 4 days.

IDENTIFICATION CARDS: Not needed.

CONSULS: Ships should contact Agent.

REPAIRS: All types of repairs possible.

DRY DOCKS: Dimension of largest dry dock 635 ft. × 75 ft. Dimension of smallest dry dock 600 ft. × 71.5 ft.

REPATRIATION: Facilities exist to exchange crews and repatriate to any part of world.

AIRPORT: Airport 11 miles from Cardiff, serving other airports to all parts of world.

TIME: Local time is British Standard Time, GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Good Friday; Easter Monday; Whit Monday (Spring Holiday); August (Summer Holiday) one day; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999 on public telephone service and ask for service required.

TELEPHONES: Ship/Shore telephone supplied at certain berths – service organized through ship's Agent.

GENERAL: Cardiff is a port which has very big range of tides and important that accurate ETA's and max. drafts supplied by ship's Master in order that Agent may place orders for tugs and Pilots in sufficient time to be in attendance when required.

AUTHORITY: British Transport Docks Board, Cardiff Docks.

AGENT: Lambert Brothers Ship Agencies Ltd., Exchange Buildings, Cardiff. Tel. 25201. Telex: 49348, Cables: "Lambert Cardiff".

CARRICKFERGUS: 50.43 N. 05.48 W. (See Plan Book)

PORT LIMITS: No. 1 Buoy Belfast Lough.

DOCUMENTS:

2 Crew Lists,
2 Passenger Lists,
1 Store List,
1 Personal effect List,
Ships Register,
1 Manifest or Bill of Lading.

PILOTAGE: Port Pilotage not compulsory but advisable. Pilots based at Carrickfergus Harbour. All Pilotage carried out by Belfast Pilots. Pilots board at No. 1 Buoy, Belfast Lough. Pilots can be contacted by VHF Channel 16.

ETA Messages: Advise Agents at least 24 hours before arrival through any British Coast Station. Pilots not less than 1 hour. ETA No. 1 Buoy (B) ETA GMT or BST (C) Draft SW.

ANCHORAGE: Midway between Harbour and Greypoint.

HEALTH: No Certificates required, in event of disease contact Agents.

Also see "Health – All Ports" before first U.K. port.

RADAR/VHF: Port Radar Service Nil. Harbour VHF Channels 14, 12 and 16 operated approximately 3 hours before H.W. to 1 hour after if ships are due.

TUGS: No tugs in Harbour but if required can be ordered from Belfast.

BERTHING: *Harbour Tidal:*

Depth alongside all berths MHWST	4.88 m.
Depth alongside all berths MLWST	1.83 m.
Max. draft of vessels	4.88 m.
Max. Beam of vessels	12.20m.
Width at entrance	16.20 m.

Quays:

Length of Commercial Quay	321 m.
No. 1 Berth (Caustic Acid)	61 m.
No. 2 Berth (Tanker Berth)	74 m.
No. 3 Berth (Most bulk cargoes)	76 m.
No. 4 Berth (Coal,Sulphur, Meal, etc.)	75 m.

Vessels discharging take bottom on soft mud.

Average Discharge 2 Grabs 150 t.p.h. at No. 3 and 4 Berth.

STEVEDORES: Provided by Messrs. John Kelly Ltd., Tel. 63612. Telex 74210.

TANKERS: Discharge controlled by Texaco Ltd., as plant is owned by them privately. Rate of discharge approximately 200 t.p.h. two 8 in. diameter pipes and one 6 in. pipe.

Usual safety precautions prevail.

Tankers not to enter Port without permission of Harbour Master.

Max. draft MHWST 4.88 m.

MEDICAL: One hospital available.

DENSITY: 1024.

FRESH WATER: Supplied alongside Quay approximately 10 t.p.h. Charge 10p. per ton.

FUEL: Supplied by Road Tankers. All grades available from major Oil Companies.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: All vessels by crew.

CERTIFICATES: Ships Register on arrival.

CUSTOMS ALLOWANCE: 200 cigarettes each crew member, spirit, wine, etc., at discretion of Water Guard.

CARGO GEAR: Three crawler mounted diesel grab cranes. Two 3100 KGs.,one 3045 KGs.

IDENTIFICATION CARDS: Not required.

CONSULS: None. Most countries are represented at Port of Belfast approximately 9 miles from Harbour.

REPAIRS: Light repairs and welding only major repairs can be arranged at Belfast.

DRY DOCKS: None. Nearest at Belfast.

REPATRIATION: Good facilities for crew changes. Good railway and bus services.

AIRPORT: Belfast Airport approximately 22 miles served by regular lines.

TIME: GMT, plus 1 hour in Summertime.

HOLIDAYS: New Years Day, Easter Monday and Tuesday. 12th and 13th July, Xmas Day and Boxing Day.

Port Stevedores cease work Friday before 12th July for a period of 14 days.

POLICE/FIRE/AMBULANCE: Carrickfergus 62021.

TELEPHONES: Not possible to place on board. Good phone service convenient to ships.

SERVICES: All services readily available from Port of Belfast.

SHORE LEAVE: After clearing inwards no restriction on shore leave.

SURVEYORS: Most Classification Societies based at Belfast.

AUTHORITY: Carrickfergus Borough Council and Harbour Master.

CLYDE PORT (Including Glasgow, Finnart, Faslane and Greenock): 55.51 N. 04.16 W. (See Plan Book)

DOCUMENTS: For Customs Clearance and to meet Immigration Authorities requirements, following valid documents are required:

Ship's Crew List.
Port Health Declaration.
Register, Load-line Certificate.

Safety Equipment, Safety Construction and Safety Radio Certificates.
Derat Exemption or Fumigation Certificate.
British Tonnage Certificate.
Copy Manifests and Bills of Lading.
Grain Form (No. S/107) if bulk grain.
Completed Customs Form C.142.

PILOTAGE: Compulsory pilotage.

(a) To the East and North of a straight line drawn from Kempock Point, Gourock, to Strone Church Spire; and

(b) Within the area bounded on the North-West by a straight line commencing at Cloch Point and thence proceeding in a S.S.W'ly direction to the point located at Latitude 55° 53.80' North, Longitude 4° 55.11' West (being the position of "N" Buoy); on the West by a straight line commencing at the position of "N" Buoy as aforesaid and thence proceeding in a S.S.W'ly direction to Cumbrae Elbow; and on the South by a straight line commencing at Gull Point and thence proceeding in a S.E'ly direction to Farland Head.

(Gourock pilot station) tel. Gourock 31331. "Gourock Pilots Radio" Channel 14 — frequency 156.7 Mc/s.

Optional pilotage is available to and from Cumbrae Island.

Vessel to advise Agent 72, 48 and 24 hours before arrival with subsequent advice of any changes to ETA, stating where Pilot required to board, ETA and draft.

Normal ladder, etc., for Pilot boarding.

Limits of Pilotage District:

(i) To the East of the Isle of Arran a line drawn due East and West across the river or firth of Clyde from the coast of Ayrshire to Corrygills Point on the East Coast of the Isle of Arran; and

(ii) in Kilbrannan Sound a line drawn due East and West across the river or firth of Clyde from the N.W. coast of the Isle of Arran to the coast of Kintyre being an extension of a line drawn due East and West from the Southernmost point of the island of Little Cumbrae to the N.W. of the Isle of Arran.

ANCHORAGES: As defined by Clyde Port Authority and in special circumstances (e.g. draft, condition of ship, hazardous cargo, etc.) under advice of Pilot.

Anchorages are available for vessels of all drafts in the Tail of the Bank area (off Greenock) and lower Firth of Clyde.

RESTRICTIONS: As defined by Clyde Port Authority and under Clyde Pilotage Authority requirements.

MAX. SIZE: As defined by Clyde Port Authority for berths in Glasgow and Greenock and subject to consideration of particular circumstances prevailing in each case.

HEALTH: The Master of a foreign-going vessel proceeding direct from a foreign port must send a wireless message to "PORTELTH GLASGOW" when he is required to do so under the Public Health (Ships) Regulations. Also see "Health – All Ports" before first U.K. port.

RADIO: Any GPO radio station.

There is a Port Operations VHF/FM system in operation utilising Channels 12, 14 and 16 in the International Maritime Band as under: West of Newark Castle, Port Glasgow Channel 12, East of Newark Castle, Port Glasgow Channel 14, calling up, Channel 16.

RADAR/VHF: Radar service not available. Port Radio service.

TUGS: As required by Master and under advice of the Pilot. Tug's lines only are used.

CONTAINER HANDLING FACILITIES: Container terminal at Greenock for two container ships to berth and work simultaneously. 22 straddle carriers and three transporter cranes available. Length of Quay 1,200 ft. Depth 42 ft. LWOST.

GRAIN HANDLING FACILITIES: *Meadowside Granary:* Total capacity, 176,000 tons. Six grain elevators, each with discharge rate of 200 t.p.h.

STEVEDORES: Arranged by Agent in accordance with Master's advice of ETA.

MEDICAL: Full medical and hospital facilities available.

TANKERS: Agents will advise Master by radio to prepare appropriate manifold connections. No slop facilities at Old Kilpatrick, Bowling, Faslane, Finnart. Facilities are available at Scott Lithgow Tank Cleaning Berth, Greenock, for the reception and processing of dirty ballast at 1,000 tonnes per hour and sludge at 800 tonnes per hour. Also available is a slop tank with a capacity of 1,800 tonnes.

Oil installations:

Bowling (ESSO): Private berth. Maximum length of vessels swinging off Bowling Basin is 550 ft. under suitable conditions. Berthing and unberthing is permitted day and night, according to state of tide.

A port regulation prohibits ships which are not gas free and have on board or have carried cargo with a flash-point of below 73 degrees from navigating the river East of Bowling.

Old Kilpatrick: Admiralty oil installation. Canting facilities in the river off Rothesay Dock, maximum length of vessels permitted is 630 ft. during daylight and under suitable weather conditions. Admiralty, Old Kilpatrick, advise maximum length at the berth is 570 ft., draft 30 ft.

Berthing and unberthing is permitted day and night, according to state of tide. Fully loaded vessels are berthed port side to at high water and must be capable of discharging over the tide. Light or partly loaded vessels may swing on arrival, berth starboard side to.

No low flash-point cargo may be discharged and vessels having low flash-point on board are not permitted at this berth.

Vessels which have carried crude oil as previous cargo are not permitted to load at this berth unless all tanks have been cleansed. There are no facilities for receiving dirty ballast.

Finnart: B. P. Installation. Maximum permissible size of vessel 330,000 d.w.t. — maximum draft 90 ft. salt water.

Faslane: Esso Petroleum. Maximum permissible size of vessel 40,000 d.w.t.

DENSITY: Port of Glasgow — Brackish.

FRESH WATER: Available at all berths by shore hose.

FUEL: All major oil companies represented in Glasgow. As much notice as possible required, all grades can be supplied.

FIRE PRECAUTIONS: As per Clyde Port Authority Regulations. Tanker berths — as per B.P., Esso and Admiralty Regulations.

GANGWAY/DECK WATCHMEN: At Master's discretion.

OPENING/CLOSING HATCHES: To be carried out by ship's crew.

CUSTOMS ALLOWANCE: On arrival from a foreign port with foreign cargo an allowance of 100 cigarettes per man for each four days in port, whilst discharging foreign cargo, and an allowance of a 0.25 pint of spirits is allowed for each man per day in port up to four days.

CARGO GEAR: Valid test certificates required for all cargo gear.

IDENTIFICATION CARDS: Not required.

CONSULS:

American
Brazilian
Danish
Ecuador
German
Italian
Panama
Spanish
Uruguayan
Belgian
Cuban
Dominican
Finnish
Netherlands
Liberian
Norwegian
Portuguese
Swedish

REPAIRS: All types of deck and engine repairs can be effected in the Clyde Area.

DRY DOCKS: Size of largest dock in Clyde area: Scott Lithgow dry dock, Greenock: 1,000 ft. long clear from gate to head of dock; 156 ft. cope to cope; 150 ft. clear width between altars; 145 ft. clear width at entrance; 45 ft. top of keel blocks to cope; 37 ft. draft on sill HWOST; 27 ft. draft on sill LWOST.

In addition, there are eight other dry docks in Glasgow/Greenock area.

REPATRIATION: Facilities for crew changes, and full repatriation services are available.

AIRPORT: Glasgow Airport (12 miles from city centre) and Prestwick Airport (30 miles from city centre) are served by most major domestic and international airlines.

TIME: BST (1 hour ahead of GMT) in operation. GMT in Winter months.

HOLIDAYS: Details of official dock holidays on which cargo work cannot be arranged can be obtained from the Marketing Department of the Port Authority on request.

POLICE/AMBULANCE/FIRE: These services can be called by telephone by dialling 999 or contacting Clyde Port Harbour by VHF.

TELEPHONES: Telephones can be placed on board at most docks by the G.P.O., charges vary according to berth, type of service and whether pre-pay call-box type or linked to exchange.

SERVICES: Tank cleaning. Facilities are available for service to ship's radio, navigation aids, etc.

SHORE LEAVE: Crew allowed ashore at Master's discretion and subject to compliance with Immigration and any other interested Authorities' requirements.

DEVELOPMENTS: An ore/coal terminal is under construction at Hunterston. The terminal will be able to accommodate vessels of 350,000 tonnes d.w.t. Completion is expected by the end of 1978.

AUTHORITY: Clyde Port Authority.

COLCHESTER: 51.54 N. 00.55 E. (See Plan Book)

PORT LIMITS: Brightlingsea anchorage.

DOCUMENTS: As normal British port.

PILOTAGE: Part of Trinity House London District. Sunk Pilot Cutter cruises near the Sunk light vessel. Give as much notice as possible by radio telephone or VHF Channel 16. River pilots are ordered by local Agents and board vessels at Brightlingsea anchorage.

ANCHORAGES: Off Brightlingsea, in 3 to 4 fathoms.

RESTRICTIONS: Vessels with deck cargoes of timber, and vessels which are large for the port not worked at night.

MAX. SIZE: Max. length at Colchester, 200 ft. Max. length at Rowhedge and Wivenhoe, 250 ft. Max. draft at Colchester, 12 ft. 06 in. Spring tides, 8 ft. 06 in. neap tides. Max. draft at Rowhedge and Wivenhoe, 14 ft. 06 in. Spring tides, 10 ft. neap tides.

HEALTH: Normal procedure. Any abnormal conditions advise Harbour Master. Pratique automatic if from U.K. port.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio, Humber Radio or Niton Radio. 2182 kc/s.

VHF: 'Colchester Harbour Radio', VHF Channel 14, Office hours watch plus tide time watch when ships expected. Vessels should call when approaching port anchorage, giving deepest draft, and keep listening watch on Channel 14 when manoeuvring.

RADAR: None.

TUGS: Small motor tug available through Harbour Master.

BERTHING: 1,000 ft. of private quays. 3,200 ft. of public (corporation) quays. All berths use shore equipment and handle all cargoes. Port dries at LW. (Berths at Wivenhoe 450 ft., at Rowhedge 500 ft. additional to above.)

CRANES: A number of 4/6 ton mobile cranes.

BULK CARGO FACILITIES: Bulk cargoes handled at most berths, 3 grain silos.
STEVEDORES: Arranged by Local Agents. Average rate for all cargoes 50 metric t.p.h.
MEDICAL: Advance notice if possible. Hospital available.
TANKERS: One oil depot for discharging only, light fuels handled. No slop facilities.
DENSITY: Density varies with tide, average 1015.
FRESH WATER: Fresh water points on quays, rate approximately 9 metric t.p.h, cost approximately £1 per tonne.
FUEL: All fuel deliveries by road tanker.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: Repairs can be carried out. One shipyard (J. W. Cook) at Wivenhoe.
SURVEYORS: Lloyds Agent can arrange.
GANGWAY/DECK WATCHMEN: Not normally required.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: British standard allowances.
CARGO GEAR: Shore gear, no heavy lifts.
REPATRIATION: Arranged by Agents.
AIRPORT: London 70 miles.
TIME: GMT.
HOLIDAYS: Normal British holidays, work sometimes arranged.
POLICE/AMBULANCE/FIRE: Tel. 999.
TELEPHONES: None.
SERVICES: Compass adjusting arranged by Agents.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
DELAYS: Normally tidal delays only.
AUTHORITY: Colchester Borough Council and Harbour Master.

COWES (including Newport, Isle of Wight): 50.46 N. 01.18 W.

DOCUMENTS: As for "Portsmouth".
PILOTAGE: See Southampton entry for sea pilotage. As Cowes is within the Isle of Wight Pilotage District, a Sea Pilot must be employed by all vessels subject to compulsory pilotage. Trinity House Cowes Pilots conduct vessels between the anchorage area and berths in Cowes Harbour and Newport, 5 miles further up the River Medina. Pilots board from launches *Thosbro 1 and 2*, which are equipped with VHF, Channels 16, 12, 9 and 6. A Pilot can always be obtained by making a link-call to Cowes 3812 or 2501 (24 hours service) or via Southampton Pilots VHF Channel 16.
ANCHORAGES: Vessels waiting to proceed to Cowes or Newport should anchor within the area bounded by Old Castle Point, "Prince Consort" light-buoy and the harbour entrance light-buoy. The prohibited anchorage on either side of the leading line must be respected, and vessels must not obstruct the fairway into Cowes, nor the deep water channel used by large vessels bound for Southampton. The mooring buoys are reserved for hovercraft and the Trinity House lighthouse tender. Mooring chains run East and West for 500 ft. from each of these mooring buoys. Tidal streams in the anchorage are strong. Cowes is an international yachting centre, and the anchorage is often crowded with small craft, especially during July, August and September.

Cowes Roads anchorage, North of the deep water channel, is used by large vessels waiting to berth in Southampton Water, taking bunkers or changing crews.
MAX. SIZE: Cowes – 300 ft. long, 17 ft. draft at high water springs. Vessels must expect to take the bottom in soft mud at low water. Newport – 150 ft. long, 8 ft. draft. Newport Harbour practically dries out at low water.
RESTRICTIONS: Tankers may load and discharge at all times, subject to the Petroleum Acts.

A channel marked by small orange buoys is reserved for the use of hovercraft. Other vessels using the area should do so with caution.

Overhead cables at Kingston; 115 ft. above MHWS.
FLOATING BRIDGE: A chain ferry plies between East and West Cowes. An all-round amber light is shown from the leading end of the bridge when under way. Approaching vessels should sound 1 prolonged blast on the whistle when not less than 0.5 mile away. The bridge gives way to all river traffic. The chains of the ferry are at least 2 ft. above the river bottom in mid-channel at all times.
HEALTH: See "Portsmouth".
RADIO: See "Southampton" entry for Sea Pilot communications. See "Pilotage" entry for local communications.

Southampton Port Radio, the port operations and radar station for the port of Southampton, will often assist in cases of difficulty, although there is no obligation for them to do so and they accept no responsibility. Southampton Port Radio VHF Channels 16, 14, 12, 11, 10, 18, 20 and 22. Medium frequency through Nitonradio.
TUGS: Tow-boat launches are available to assist vessels.
BERTHING: *Medina Wharf.* Vessels 17 ft., spring draft, length 270 ft. OAL. Loading and unloading bulk cargoes of stone, coal, fertilisers, grain, etc.

Kingston Wharf. As for Medina Wharf, above.
STEVEDORES: By arrangement with Agent and wharf owners. Normal working hours: 0800–1700 Monday to Friday. Overtime on Saturdays, etc., by arrangement. No work on public holidays.
MEDICAL: All medical facilities are available. Agent should be given advance notice of requirements. If call is solely to land sick personnel, see "Southampton" entry.
DENSITY: Cowes – 1025 salt water.

Newport – varies according to amount of recent rainfall and state of tide.
FRESH WATER: Available on all commercial wharves.
FUEL AND DIESEL OIL: Available by arrangement with Agent.
CRANES: Hammerhead crane at J. S. Whites, 50 tons. Medina Wharf: 2 grabbing cranes of 4.5 tons for bulk cargoes.
OPENING/CLOSING HATCHES: By ship's crew.
REPAIRS: All hull and engine repairs undertaken to vessels capable of Cowes entry. Graving dock for ships up to 200 ft. in length and 14 ft. draft.
SERVICES: Compass adjuster, radar and radio mechanics available from Southampton. Charts and general stores available locally.
OIL POLLUTION: Cowes and the Solent are world-famous yachting centres. Pollution is dealt with severely.
AUTHORITY: Cowes Harbour Commissioners. Harbour Master.

DARTMOUTH: 50.21 N. 03.34 W. (See Plan Book)

PORT LIMITS: A line from Inner Froward Point to Combe Point.
DOCUMENTS: Normal documents for U.K. ports.
PILOTAGE: No direct radio contact with Pilots. Contact local Agent or Berry Head Coastguard Station who will telephone Pilot.

Pilot station 5 cables S.S.E. Castle Ledge Conical Buoy.
ANCHORAGE: Vessels can anchor in 5 fathoms, 7 cables 150(T) from Kingswear Lighthouse. Or in a position as above, for Pilot.
RESTRICTIONS: Vessels up to 27 ft. draft can enter at any time.
MAX. SIZE: Max. length 400 ft., max. draft 26 ft.
HEALTH: Pratique granted by Customs on arrival.

Also see "Health – All Ports" before first U.K. port.
RADIO: Route cables, etc., through Niton or Lands End Radio Stations.
TUGS: Tugs are not normally available.
BERTHING: All berthing on midstream buoys.
MEDICAL: All medical services are available; if possible give notice of requirement.
DENSITY: Normally salt. 1025.
FRESH WATER: Available only for small vessels.
FUEL: Not available.
FIRE PRECAUTIONS: Normal.
GANGWAY/DECK WATCHMEN: It is advisable to have watchmen.
OPENING/CLOSING HATCHES: Crew open.
CARGO GEAR: Ship's gear.
REPAIRS: All repairs unless of a major or underwater type can be carried out.
REPATRIATION: Facilities exist.
AIRPORT: 35 miles from Exeter airport. Internal and short range Continental flights.
TELEPHONES: Not normally available, except for HM ships.
HOLIDAYS: Not applicable.
POLICE/AMBULANCE/FIRE: Dial 999 for emergencies. Local hospital adjacent to Harbour Office.
SHORE LEAVE: Permitted. Seaman's book adequate.
GENERAL: Dartmouth does not now operate as a commercial port except for small vessels up to about 800 d.w.t. en route to Totnes, although the harbour is suitable for ships of 18,000 d.w.t., and mooring buoys are available for such vessels.

Lay-up facilities available for small coasters.
AUTHORITY: Dart Harbour and Navigation Authority.

DOUGLAS: Isle of Man: 54.09 N. 04.28 W. (See Plan Book)

PORT LIMITS: Douglas Bay inside a line between Douglas Head and Banks Howe and Douglas Harbour proper.
DOCUMENTS: Same as for all U.K. Ports.
PILOTAGE: Not compulsory. Arrangements usually made at least 24 hours before vessels' arrival, through Ships' Agent, or to Harbour Master, Douglas – Telephone: 23813. Call Douglas Radio on Channel 16 and then transfer to Channel 12 for instructions when entering control area 3 miles off Douglas.
ANCHORAGES: In Douglas Bay:
Douglas Head bearing 196° T 7 cables in 6 fathoms.
,, ,, 199° T 9.3 cables in 7 fathoms.
,, ,, 200° T 8 cables in 6.5 fathoms
,, ,, 212° T 7.9 cables in 10 fathoms
RESTRICTIONS: Enter only on Harbour Master's instructions.
MAX. SIZE: Max. size of Cross Channel Vessels 350 ft. LOA, draft 13 ft.

Max. Size of Cargo Vessels 190 ft. LOA, draft 12 ft. Spring tides 9 ft., neaps to inner Harbour, dries out at LW.

Max. size of Tankers 230 ft. LOA, draft 13 ft. at LWOST.
HEALTH: See "Health – All ports" before first U.K. port.
RADIO: Port Patrick for vessels coming from North. Anglesey for vessels coming from South.
VHF: Douglas Radio manned when vessels expected. Channel 16 and 12 only.
RADAR: Port Radar available for use in fog or when required. Used with Channel 12 VHF.
TUGS: None.
BERTHING: Passenger vessels – 6 berths for vessels of 350 ft. in length, 13 ft. draft LWST at Victoria Pier and King Edward Pier. Roll-on/Roll-off linkspan now in course of installation.

Isle of Man Steam Packet Company Cargo berth – vessels 225 ft. LOA draft 13 ft., dries out at LW. Served by 28 ton crane for container traffic.

Cargo Vessels – Battery Pier (22 ton crane on 25 ft. radius) berth vessels 180 ft. LOA with draft 12 ft. aft, 8 ft. forward at LWST.

Coffee Palace berth will accommodate vessels of 190 ft. LOA draft 12 ft. Springs, 9 ft. Neaps, dries out at LW.

Market berth same as Coffee Palace berth.

Battery Pier – Tankers up to 230 ft. LOA, draft 13 ft. at LWOST. Gas Tankers can berth at inner end of Battery Pier, vessels of up to 180 ft. LOA, draft 12 ft. aft, 8 ft. forward at LWST. Discharging of Cargo vessels and Container vessels can be done by shore crane.

All berths at Douglas are salt water.

CRANES: One 22 ton crane on 25 ft. radius at Battery Pier. The other cranes are 5 ton mobile cranes, capable of lifting about 2–3 tons when working at full radius. One mobile grab crane.

BULK CARGO FACILITIES: Bulk cargoes of coal and scrap metal are handled at Coffee Palace and Market Berths described above.

Rate of discharge for coal about 60–70 t.p.h. by Grab crane.

SPECIALISED CARGO-HANDLING FACILITIES: Containers are handled at Isle of Man Steam Packet Company berth and by 22 ton crane at Battery Pier

L.P.G. cargoes are handled at inner end of Battery Pier as described above.

BRIDGES: Swing Bridge only to Inner Harbour.

STEVEDORES: Advice required to Ship's Agent. Rate of discharge – cement 60 t.p.h.; coal 60 – 70 t.p.h.

MEDICAL: Advise Agent when possible, alternatively contact Harbour Master with advance warning. Hospital available.

TANKERS: Tankers pipe-lines 6 in. 2 Tanker berths at Battery Pier – Max. draft. 16 ft. to be taken in on flood tide only. 13 ft. only at LW Spring tides. Discharging rate 180–200 t.p.h.

DENSITY: Density of water salt (1025).

FRESH WATER: Fresh water available on request to Agent or Harbour Master.

FUEL: Fuel delivered by Road Tanker only. Contact Manx Petroleums or Esso.

FIRE PRECAUTIONS: Fire precautions as normal.

CONSULS: None.

REPAIRS: Limited facilities only.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Could be arranged by Agent.

OPENING/CLOSING HATCHES: Handled by crew.

CUSTOMS ALLOWANCE: Same as U.K.

CARGO GEAR: Cargo can be discharged by ships own gear or Mobile cranes. 22 ton crane at Battery Pier.

REPATRIATION: Repatriation only done through arrangement with Agents.

AIRPORT: Ronaldsway Airport 8 miles from Douglas and served by regular air lines.

TIME: Same as U.K.

HOLIDAYS: Good Friday, Easter Monday, Spring Holiday, T.T. Friday (1st week in June), Tynwald Day (5th July), August Holiday, Christmas Day, Boxing Day, New Year's Day, 2nd January.

TELEPHONES: No connections to ships.

POLICE/AMBULANCE/FIRE: Police phone, 4616; Ambulance phone, 3661; Fire Brigade phone, 3333.

SERVICES: None.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Identification cards not required for British Ships. Same as U.K.

REGULATIONS: No unusual regulations.

DELAYS: Delays can be expected due to tidal conditions, or awaiting a berth; also delays caused by strong Easterly winds, which make Douglas Outer Harbour untenable.

AUTHORITY: Chief Harbour Master, Isle of Man Harbour Board.

DOVER: 51.07 N. 01.18 E. (See Plan Book)

DOCUMENTS: Required on arrival:

Crew List H.O. Form I.B.6. for H.M. Immigration.

Crew Declaration Form C.142 for H.M. Waterguard. (Duplicate).

Deratisation Certificate.

It is required to report and clear a vessel at Customs House if remaining in port more than 24 hours for loading and discharging cargo or embarking and disembarking passengers, with following:

Passenger List. Cargo Manifests. Ship's documents.

PILOTAGE: Requests for Pilot normally made by local Agent.

Vessels from Westward obtain Pilot from Pilot station, Folkestone.

Vessels from Eastward obtain Pilot from position approx. 1 mile S.E. of Dover Harbour Eastern Arm Head.

Vessels approaching Dover Harbour Entrances should do so with caution in accordance with instructions from Port Control. Masters are warned of the high frequency of cross channel vessels and hovercraft entering and leaving by both entrances.

Port Control: Signal Station situated at end of Eastern arm operates VHF Channels 74 (Port Control Frequency) if not fitted with Channel 74 vessels should call on Channel 16 and will be directed to use Channel 12.

Motor launches serving Pilots are also fitted with VHF Channels 74, 12 and 16.

DEEP SEA AND COASTAL PILOTS: For Channel, North Sea, British Coast and Baltic.

Contact agency 36 hours before arrival by radio, giving ETA Dover and destination port(s).

Agencies are: "Hutchinson Gravesend" and "Hammond Dover".

On approaching Dover contact Port Control by VHF for instructions and: For "Hutchinson" Pilot – hoist, flash or sound No. 1. For "Hammond" Pilot – hoist, flash or sound "B".

Pilots will also board at any UK or continental port as required.

ANCHORAGE: Limited space available in Outer Harbour. Contact Port Control in advance for instructions.

RESTRICTIONS: Attention is drawn to the strict requirement of obtaining permission to enter or leave the harbour. It will be noted that although the traffic control signal may be exhibited for entry/departure, every vessel manoeuvring to enter or leave the port is required to obtain specific permission to enter or leave, as the case may be.

Vessels awaiting permission to proceed should keep at a safe distance and clear of the entrance until so authorised. Responsibility for entering or leaving with caution and the safe navigation of each vessel subsequent to the receipt of permission to proceed continues to remain the responsibility of the Master.

Explosives – dangerous cargo: Declaration to be made and permission obtained prior to entering the harbour. Board not compellable to receive within the harbour any articles which in their opinion would endanger safety of harbour or vessels or goods.

HEALTH: Vessels arriving in Dover Outer Harbour are boarded by Water guard who grant pratique on arrival. Coastwise vessels from U.K. ports have automatic pratique.

Also see "Health – All Ports" before first U.K. port.

RADIO: Vessels from East use North Foreland Radio call sign GNF and vessels from Westward use Niton Radio call sign GNI.

RADAR/VHF: Port Control is fitted with radar and VHF, and Masters can make initial contact with Port Control VHF Channels 74, 16 and 12. Operational frequency is Channel 74. See "Pilotage".

TUGS: 2 tugs of 1,200 h.p. Tugs normally join vessels inside Dover harbour, but meet vessels outside by arrangement. Charges £90–£112 per movement. Tug's ropes normally used at a charge of £7.50 per rope.

BERTHING: All berths in Outer Harbour can be reached at all times. Those in dock can be reached from 2 hours before until up to 1 hour after each high water. All berthing requirements are allocated by Port Control.

Spring rise 19.4 ft. (5.9 m.). The Outer Harbour which comprises an area of approx. 600 acres with depths of water up to 30 ft. (9 m.) at MLWS is bounded by the Southern Breakwater (detached mole), the Eastern Arm and the Admiralty Pier. Anchorage restricted to limited area as shown on Admiralty Charts – normally used by vessels awaiting to berth or enter dock.

Western Docks: Comprising the Admiralty Pier, the Train Ferry Dock, the Inner Harbour, Tidal Basin, Granville and Wellington Docks.

Admiralty Pier: Length 4,140 ft. (1,260 m.), protects the Harbour from the West. There are 4 deep water berths with depths from 17 to 26 ft. (5.2 m. – 7.9 m.) at MLWS. The 3 inner berths are used for Cross Channel traffic, 2 berths being for passenger ferries only, and the third for roll-on/roll-off traffic.

Prince of Wales Pier: This separates the Inner and Outer Harbours and offers 1,600 ft. (488 m.) of berthing for vessels up to 23 ft. (7.0 m.) at MLWS. It should be noted that berthing on Prince of Wales Pier is only permitted by special arrangement with the Harbour Master.

West Hoverport: From July 1978 all hovercraft services will operate from here and Hoverport in Eastern Docks will transfer all operations to West Hoverport which is adjacent to and West of Prince of Wales pier. "Seaspeed" operate daily services for passengers and accompanied cars to Boulogne and Calais.

Train Ferry Dock: Adjacent to Admiralty Pier is operated by British Rail. Trains run direct into the ferries which operate daily services of Passengers and Freight to Dunkirk throughout the year.

Tidal Basin: Forming the entrance to the Wellington and Granville Docks is entered between the Admiralty and Prince of Wales Piers. It comprises an area of approximately 12 acres, the channel partly drying at low water. The entrance is 140 ft. (42.7 m.) wide with a depth of 19 ft. (5.8 m.) at MHWS. There are 2 berths in the Tidal Basin with quay frontage of 300 and 360 ft. (91.4 m. and 109.7 m.) respectively, at which vessels take the ground at low water. These berths are principally used for the discharge of stone, slag and aggregates.

Granville Dock: (Approach channel with depth of 21 ft. (6.4 m.) at MHWS).

This dock is non tidal and comprises an area of 4.5 acres with depths of water of 21 ft. (6.4 m.) at MHWS, 17 ft. (5.2 m.) at MHWN with a total quay frontage of 1,850 ft. (564 m.). The entrance is 65 ft. (19.8 m.) wide and depth on the sill at MHWS is 21 ft. (6.4 m.). Electric portal cranes of 3 tons are installed and 3 ton mobile cranes are available. Transit sheds and open storage space are available at the dockside.

Wellington Dock: Non tidal and comprises an area of 8 acres with depth of water of 15 ft. (4.6 m.) at MHWS, 11 ft. (3.4 m.) at MHWN. Total quay frontage of 2,500 ft. (762 m.). The entrance is 70 ft. (21.3 m.) wide and depth on sill at MHWS is 15 ft. (4.6 m.). Transit shed and open storage are available at the dockside. 3 ton mobile cranes are available. Patent slipway 567 ft. (173 m.) in length is capable of taking vessels on its cradle of up to 175 ft. (53. 3 m.).

Eastern Docks: The docks comprise the Eastern Arm, the Camber, Car Ferry berths and Hoverport.

The Eastern Arm: Length 1,700 ft. (518 m.) protects the Harbour from the East. Berthing for vessels up to 27 ft. (8.2 m.) at MLWS.

Consisting of 3 berths which are used for passengers (not cross-Channel passengers), general cargo and reefer vessels, regular coastal oil tankers and for vessels taking water or stores.

The Camber: A tidal basin divided from the Outer Harbour by the South Jetty and Pier "A", it comprises an area of 21 acres with a depth of water of 15 ft. (4.6 m.) at MLWS. A "Roll-on/Roll-off" freight berth operated by Townsend Car Ferries Ltd. provides daily freight services to Zeebrugge, with additional berthing accommodation for vessels with drafts from 10 to 14 ft. (3.0 m. – 4.3 m.) at MLWS

Car Ferry and Freight Terminal: Operated by Dover Harbour Board. Berths 1 and 2 are situated in the Camber, Berths 3 and 4 being situated to the Westward between Pier "A" and Pier "B". The Car Ferry/Freight Berths provide berthing for vessels up to 400 ft. (122 m.) in length with depths of water of 19 ft. (5.8 m.) at MLWS. Berths are connected with loading bridges to enable cars, coaches and freight vehicles to drive direct on board the vessels operating to Calais, Boulogne, Ostend and Zeebrugge. Shore facilities provide modern Reception Buildings, Customs Clearance Halls, Restaurant, Banking facilities, Shipping Operators' Offices, Freight Compound and Assembly Area, Forwarding Agents' Offices. Spacious Assembly Car Parks for vehicles. 2 Container Gantries each with a lifting capacity of 20 tons which have a combined lifting capacity of 40 tons are available at the Freight Terminal.

CARGO-HANDLING FACILITIES: Seven berths equipped for handling roll-on/roll-off traffic. Additional berths under construction.

STEVEDORES: No particular ETA required as ship's Agent makes all necessary arrangements. *Packaged Goods.* Approximately 25 tons per gang per hour average discharging rate.

MEDICAL: Medical assistance can be arranged by Agent to vessels passing Dover Harbour. Doctor will board a vessel in English Channel or on arrival at anchorage in Outer Harbour. Hospital facilities are available.

DENSITY: 1020.

FRESH WATER: Available to all vessels by pipe-line 25 t.p.h.

FUEL: Gas oil available from Shell Mex & B.P. Ltd., and Esso. 24 hours notice required.

GANGWAY/DECK WATCHMEN: Supplied on request.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Certificates to be obtained for foreign clearance, Register, Load Line, Safety Construction, Passenger and Safety Equipment.

IDENTIFICATION CARDS: Necessary plus passes for ships personnel at Eastern Arm berths having to pass through Eastern Docks terminal. Passes obtainable from Dover Harbour Board Staff at berths.

CONSULS:

Belgium	Dover 203 203	Netherlands	Dover 201 201
Denmark	,, 201 201	Norway	,, 201 201
Finland	,, 201 201	Portugal	,, 201 201
France	Folkestone 52561	Spain	,, 201 201
Germany	Dover 201 201	Sweden	,, 201 201
Italy	Folkestone 53692		

REPAIRS: Facilities available for minor engine repairs. Radio and Radar repairs also possible.

REPATRIATION: All facilities exist.

AIRPORT: Most repatriations by air through London Airport.

TIME: Local time BST 1 hour in advance of GMT. Reverting to GMT in Winter months.

HOLIDAYS: Official holidays: 1st January; Good Friday; Easter Monday; Spring Holiday (end May); August Bank Holiday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Dover 999.

TELEPHONES: Not available.

SERVICES: Repairs to radar equipment, compass adjusting, supply of charts and crew changes can be arranged outside Dover Harbour in the English Channel at all times.

SHORE LEAVE: Allowed.

AUTHORITY: Dover Harbour Board.

DUNDEE: 56.28 N. 02.57 W. (See Plan Book)

PORT LIMITS: A vessel is considered to be an "arrived ship" when:
(a) For berthing turn-arrival at Fairway Buoy.
(b) For Laytime – usually "off or at the berth" and subject to Charter-Party terms.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Tobacco Manifest.
1 Health Declaration.
Cargo Manifests.
Bills of Lading.
Derat.
Lights Certificate.

PILOTAGE: Port Control Service, call sign "Dundee Harbour Radio", maintains a 24 hour listening watch on VHF Channel 16 (156.8 mc/s and also operates on Channels 12 and 11 156.6 mc/s and 156.5 mc/s).

Pilotage is compulsory in Dundee Pilotage District. Pilots board incoming vessels within a 3-mile radius seaward of Tay Fairway Buoy or as close to as weather permits. The pilot boat is only on sea station when shipping is expected and accurate ETAs are essential.

ETA should be given 6 hours before arrival either by radiotelephone link call to Dundee Port Control 24121 or by radiotelegram to "Dockyard Dundee" Dundee. Amendments may be made up to 2 hours before the original ETA. When within VHF range (approx. 25 miles from Tay Fairway Buoy) ETAs may be confirmed by contacting "Dundee Port Control" on Channel 16 and transferring to Channel 12 to pass messages.

Pilot boats, when on station, keep a listening watch on Channel 16 and transfer to Channel 6 (156.3 mc/s) to pass messages.

ANCHORAGES: Pilots are instructed where to anchor vessels. There are 3 deep-water anchorages to accommodate vessels up to 28 ft. draft. 2 to accommodate vessels up to 22 ft. draft, and other minor anchorages.

RESTRICTIONS: Tide and draft 28 ft. at MHWS. Vessels enter 2 hours before HW. 26 ft. at MHWN. Vessels enter 2 hours before HW.

MAX. SIZE: Length 600/700 ft., beam 90 ft., draft 28 ft.

HEALTH: Health declaration on arrival – if clean, automatic pratique. Suspect disease as per international requirements. Pratique automatic if already called at another port.

Also see "Health – All Ports" before first UK port.

RADIO: Any UK coast station. Nearest stations – Stonehaven and Forth.

VHF: Tugs operate on Channels 16, 12 and 6. Also see "Pilotage".

TUGS: Tugs join vessel in vicinity of West Ferry. Tug lines optional, charge made if tugs lines used.

BERTHING: Deep-drafted vessels must arrive at the fairway buoy at least 2 hours before HW to berth on same tide.

King George V Wharf: grabbing cranes (fertilisers, coal), General cargo and tanker berths. 28 ft. MLWS.

Eastern Wharf: roll-on/roll-off berth. General cargo. 20 ft. MLWS.

Camperdown Dock/Victoria Dock: general cargo, live cattle quarantine station. 16 ft. draft.

No container or liquid chemical facilities.

CRANES: Queen Elizabeth Wharf: 2×5 ton portal cranes
King George V Wharf: 3×7 ton portal cranes
1×5 ton portal cranes
1×3 ton portal cranes
Caledon West Wharf: 1×120 ton fixed electric crane.

All other quays served by mobile cranes up to 45 tons.

STEVEDORES: One ETA to Agent or port suffices for all services.

MEDICAL: If vessel arrives from a suspect port (e.g. India/Pakistan) doctor will board and request smallpox certificates. Advance notice required for ordinary medication for arrivals week-ends. Hospitals and casualty stations available.

TANKERS: Diameter of hoses – 8 in. Slop discharge facilities not available. 2 tanker berths – 28 ft. draft. Discharge only.

DENSITY: 1005 oz. at MLWS. 1002 oz. at MHWS.

FRESH WATER: Available, 24 hour service. Delivery, hose from quays. Rate, 30 t.p.h.

FUEL: Small quantities gas oil by road tanker. Also at Princess Alexandra Wharf by arrangement.

FIRE PRECAUTIONS: Regulations are handed to Master on arrival.

GANGWAY/DECK WATCHMEN: Recommended for large vessels.

OPENING/CLOSING HATCHES: Stevedores will give weather cover only.

CERTIFICATES: As required by Board of Trade (Lifesaving, Radio, Registry, Medicines, Crew Agreement, Load Line) also derat.

CUSTOMS ALLOWANCE: Foreign-going, 25 cigarettes or 1 oz tobacco per day. 8 days allowance granted. Home trade, same as for foreign-going but only 4 days allowance granted. Spirits, quarter pint per day for 4 days, further issue granted after 4 days for foreign-going only.

CONSULS:

Belgium	23044	Netherlands	22267
Denmark	23044	Norway	23044
Finland	23111	Portugal	22131
France	26061	Sweden	25512
Italy	25174		

REPAIRS: Engine and deck repairs by Robb/Caledon Shipyard and Kestrel Tayside Marine and Angus Engineering.

DRY DOCK: Dry dock available for vessels of up to 500 ft. length, 46 ft. beam, draft 13 ft. 6 in. Springs.

SURVEYORS: Lloyds and DTI.

REPATRIATIONS: Facilities exist.

AIRPORT: Only U.K. flights available.

TIME: British Standard Time (GMT plus 1 hour). GMT in Winter months.

HOLIDAYS: 1st and 2nd January; 2nd Monday April; Last Monday July; 1st Monday October; Christmas Day. Cargo can be arranged for all days except Christmas Day.

POLICE/AMBULANCE/FIRE: Tel. 999.

TELEPHONES: Quay telephones installed.

SHORE LEAVE: At the discretion of the Master.

IDENTIFICATION CARDS: Not required.

REGULATIONS: Absolutely no smoking, penalty £50.

AUTHORITY: Dundee Port Authority.

FALMOUTH: 50.09 N. 05.04 W.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master, or Authority X S 4.
1 Home Office Form 1S6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate
Ship's Certificate of Register.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment and Construction Certificates.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.

PILOTAGE: This is a compulsory pilotage district. The Pilot will board from a cutter 2 miles South of St. Anthony's Lighthouse. In poor visibility a ship requiring a Pilot uses the distinguishing signal of "G" to which Pilot Cutter will reply with "H" Pilots operate R/T on Channel 16, 12 and 9.

ANCHORAGES: Vessels in excess of 665 ft. usually anchor in Falmouth Bay. Other vessels in outer harbour. Mooring Buoys available.

MAX. SIZE: See "Tankers".

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

TUGS: Available. On call during working hours and outside of hours when required if advance notice given. Tug's lines are to be used.

BERTHS: There is a large and 3 smaller dry docks and in addition, B.P. maintain a bulk storage plant. 13 deep-water berths. Combined frontage 8,000 ft. Vessels of 920 ft. have been accommodated. Draft LWOST 18 ft.–27 ft. depending on berth.

Offshore Exploration: Falmouth Docks and Engineering Co. operates an offshore supply base with all services and on an exclusive basis.

STEVEDORES: Employed through The Falmouth Docks and Engineering Co.

TANKERS: Tankers berth at Eastern Breakwater provided draft not more than 27 ft. berthing at H.W. Max. length 550 ft. Coast Lines Berth: Max. draft 16 ft. There is a tank-cleaning installation available. Tankers of 840 ft. with draft 17 ft. forward and 23 ft. aft have been accommodated at Eastern wharf.

FUEL AND FRESH WATER: All classes of fuel oil and diesel oil are available and water is piped on the Dock Company wharves. At the repair berths, or in Carrick Roads, bunkers and water must be delivered by barge. Water by tug in Carrick Roads.

CONSULS: Denmark, France, Greece, Netherlands, Norway, Sweden and Spain.

GANGWAY/DECK WATCHMEN: Available in shipyard on request.

OPENING/CLOSING HATCHES: Normally carried out by crew.

AIRPORTS: London (Heathrow and Gatwick) 5.5 hours via Reading, or Bristol, St. Mawgan, 35 miles.

MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 0.5 lb. tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

REPAIRS: All ship repairs can be carried out by local repair yards.

DRY DOCKS: Falmouth Shiprepair Ltd.

Queen Elizabeth Dock:	length	850 ft.	width	130 ft.
Falmouth Docks, No. 1:	,,	555 ft.	,,	75 ft.
Falmouth Docks, No. 3:	,,	750 ft.	,,	88 ft.
Falmouth Docks, No. 4:	,,	648 ft.	,,	86 ft.

TIME: British Standard Time is GMT. British Summer Time – GMT plus 1 hour (Summer).

HOLIDAYS: 1st January; Good Friday (variable date); Easter Monday (variable date); Spring Bank Holiday (variable date); August Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required. Or County Police, Penryn 72231; Dock Police, Falmouth 311400; County Fire Service, Falmouth 314274; Docks Fire Service, Falmouth 311400; Ambulance, Truro 2349.

TELEPHONES: Can be placed on board in dry dock and most repair berths but not at Eastern Oil Wharf.

SHORE LEAVE: Granted.

AUTHORITY: Falmouth Harbour Commissioners, Falmouth Docks and Engineering Co. (Statutory Co.).

FELIXSTOWE: 51.57 N. 01.21 E. (See Plan Book)

DOCUMENTS:

Stores List.
Crew List.
Health Declaration.
Manifests.
Bills of Lading.
Ship's papers, including Register, Load-line Certificate, Safety Equipment Certificate, Radio Certificate, U.K. Light Dues, if any.

PILOTAGE: Cork or Sunk Pilot station, Master's option. 12 hours notice ETA vessel Cork or Sunk Pilot Cutters to be given via G.P.O. Coastal Station (Northforeland, Humber Radio) stating g.r.t., max. draft, and port of destination. Cables: "Sunk Pilot Vessel" – Northforeland Radio within MF range. Sunk Pilot Cutter 2182 kc/s, VHF range 156.8 mc/s, VHF Channel 16 then transfer to 156.3 mc/s, VHF Channel 6.

ANCHORAGES: At Cork Light Vessel; Quarantine anchorage off Harwich Road; "Northshelve" off Harwich; and in River Stour.

RESTRICTIONS: All vessels up to 25 ft. draft can enter Harwich Roads day and night on any state of tide. Max. draft for Container Quays and Oil Terminal 30/33 ft. depending on tides. At least 3 ft. keel clearance required at all times between channel bed and keel of vessel.

MAX. SIZE:

(a) General cargo vessels: Dock Basin 145 ft. wide entrance. Depth 18 ft. LWOST. No lock gates. Suitable vessels able to leave on any state of tide.

North Quay: 640 ft. in length.
South Quay: 610 ft. in length.
East Quay: 430 ft. in length.
North Development: Depth 33 ft. LWOST.

(b) Container vessels. Container Terminal depth: 33 ft. LWOST. Approach Channel Harwich Harbour Estuary: 23.5 ft. LWOST.

(c) Roll-on, roll-off vessels; Ferry Terminal: Vessels up to 450 ft. overall. Depth 22 ft. LWOST. No. 3 Roll-on/Roll-off Bridge: vessels up to 500 ft. LOA. Depth 24 ft. LWOST.

No. 4 Roll-on/Roll-off Bridge: Depth 33 ft. LWOST.

(d) Tankers. Oil Terminal: Vessels 600 ft. overall. Depth 30 ft. LWOST.

HEALTH: Pratique flag in daylight and lighted signals in darkness to be displayed by vessel on arrival. Health Declaration to be given in writing or verbally by Master on arrival. If disease suspected, then report to pilot station who will advise Health Authorities.

Also see "Health – All Ports" before first UK port.

RADIO: Northforeland, Humber, Niton (or any other radio station convenient to vessel's position).

RADAR/VHF: Masters of all vessels are advised to read Notice to Mariners No. 5 of 1976 which outlines requirements and gives general directions for navigation in Harwich Harbour.

A new Operations Service jointly operated by the Harwich Harbour Conservancy Board and the Trinity House Pilotage Service, is provided from Harbour House, Harwich, and the Trinity House Pilotage Operations Service.

The new Service is provided by Harbour Board Officers and Trinity House Duty Pilots, co-operating mutually, on a continuous twenty-four hours a day basis to provide vessels using the Port with information and advice.

The following Communication facilities are available:

1. *VHF Radio Telephone*

Channel 16	Calling and safety.
Channel 12	Secondary Harbour Working frequency.
Channel 14	Prime Harbour Working frequency.
Channel 20	Harbour Board Radar information frequency.
Channel 11	Harbour Service frequency.
Channel 9	Pilotage Service frequency.
Channel 38	Trinity House frequency.

2. *Land Line communications*

(i) *Telephones*

Harbour operations:	Harwich 6535/6
Pilotage service:	Harwich 3129 and 6300

(ii) *Telex*

Trinity House Pilotage
Service and Harwich
Harbour Joint Operations Service: 98472

3. *Other Equipment*

The centre is provided with a standard Harbour Surveillance Radar 2, 16 in. conventional marine displays; also provided is an electronic tide gauge, wind direction and force instruments.

All vessels should provide timely advice of their arrivals and departures to and from the Port Complex and report their movements through the Harbour and its approaches as directed.

TUGS: Stationed at Felixstowe, join vessels Harwich approaches or where ordered by Pilots. Vessels to use tug lines at additional cost. Tugs on VHF Channel 16 (24 hours) Channels 6, 8, 9 or 12 working.

BERTHING: Regulated by Harbour Master through Pilot stations and tugs. Vessels able berth within restrictions of individual berths.

	Depth of water at LWOST	*Length of quay in feet*
Transatlantic Container Terminal	dredged annually to 33 ft.	2,040. Three container berths and 1 Roll-on/Roll-off berth
Dock Basin	18 ft.	East Quay 430; North Quay 640; South Quay 610. Vessels up to 350 ft. in length are accepted

	Depth of water at LWOST	*Length of quay in feet*
Ferry Terminal	22 ft.	360. Vessels up to 450 ft. in length are accepted
Northern Development	dredged annually to 24 ft.	No. 3 Roll-on/Roll-off bridge 450. Vessels up to 500 ft. in length are accepted
	dredged annually to 33 ft.	Dual purpose berth for General Cargo and No. 4 Roll-on/Roll-off bridge 1,100 ft.

CARGO HANDLING FACILITIES: *General Cargo Division:* Mobile pneumatic grain discharger, discharge rate 30 t.p.h. into silo with capacity of 6,400 tons.

Mobile cranes, capacity 30 tons. Scotch derrick crane, capacity 32 tons at 90 ft. radius.

Roll-on/Roll-off Division: No. 1 Berth: Transport Ferry Terminal. Upper and Lower deck loading ramps. Electric travelling crane, capacity 32 tons at 110 ft.

No. 2 Berth: One hydraulic loading ramp designed to carry loads up to 140 tons. Upper loading ramp designed to carry loads up to 32 tons.

No. 3 Berth: Hydraulic loading ramp designed to carry two lanes of traffic with loads up to 140 tons. Electric travelling crane with capacity of 35 tons at 95 ft. radius.

No. 4 Berth: Allows a combination of Roll-on/Roll-off and conventional vessels to be accommodated. The hydraulic loading ramp is designed to carry two lanes of traffic with loads of up to 140 tons.

Container Division: The Container Terminal South of the Ferry Terminal is equipped with one 40 ton and two 30 ton Portainer cranes capable of handling 20, 30, 35 and 40 ft. containers on automatic spreaders.

STEVEDORES: 24 hours notice required by Agent to advise stevedores of vessel's ETA, in order to arrange berthing and allocation of labour. All stevedoring arranged between Dock Company and vessel's Agent.

MEDICAL: Prior notice desirable through Agent to arrange attention. All services available.

TANKERS: 4-in. and 6-in. connections. No slop facilities. No facilities for gas freeing alongside or in harbour.

One tanker berth available. Vessels up to 600 ft. overall, max. draft 30 ft.

DENSITY: 1025 salt water.

FRESH WATER: Pipe-line connections to all quays. Delivery approx. 50 t.p.h. Barge service available for supplies to vessels at anchor.

FUEL: Only gas oil available, 35 sec. pipe-line and barge delivery. 24 hours notice required.

FIRE PRECAUTIONS: Standard precautions at all berths.

GANGWAY/DECK WATCHMEN: Not compulsory. If required, cost negotiable.

OPENING/CLOSING HATCHES: Work undertaken by crew.

CERTIFICATES:

Valid Derrick and Rigging Certificates.
Ship's Register.
Load-line.
Safety Equipment.
Radio.
Derat.
Construction.
(Light Dues Receipts).

CUSTOMS ALLOWANCE: 100 cigarettes or equivalent in tobacco or cigars per man. 1 bottle spirits.

IDENTIFICATION CARDS: Not necessary if in possession of Seaman's Book or Passport.

CONSULS: Royal Norwegian Vice-Consul Ipswich (9) 59281; Royal Swedish Vice-Consul Felixstowe 78844, Icelandic Vice-Consul Felixstowe 5651/4.

REPAIRS: Facilities exist for small repairs only.

DRY DOCKS: None available.

REPATRIATION: All facilities available.

AIRPORTS: Southend – 70 miles; Heathrow – 90 miles. International flights.

TIME: GMT. In Summer months, April to October, time advanced 1 hour.

HOLIDAYS: All normal Bank Holidays, but official notification of port closures for such holidays is given well in advance of relevant dates.

POLICE/FIRE/AMBULANCE: Emergency points on all quays. Tel. 300 or, outside dock area, 999.

TELEPHONES: Shore connections available by prior arrangement for vessels on regular trades.

GENERAL: ETA to Agent required 72 hours, 48 hours, and 24 hours prior arrival.

SERVICES: Most services available for dry cargo vessels, but no special tank cleaning or tank washing facilities for tankers.

SHORE LEAVE: No restrictions.

AUTHORITY: Felixstowe Dock & Railway Co.

AGENT: Hargreaves Fuel & Shipping, "B" Block, Container Control Office, Felixstowe Docks, Felixstowe, Suffolk. Tel: Felixstowe 6255, After hours, Felixstowe 2196. Telex: 98411. Cables: "Hargreaves, Felixstowe".

FISHGUARD: 52.01 N. 04.58 W. (See Plan Book)

DOCUMENTS: as for "Cardiff".

PILOTAGE: Local Pilot available on request. Pilotage compulsory.

ANCHORAGES: Eastward of a line joining Northern and Eastern breakwaters.

MAX. SIZE: Max. draft 19 ft.

HEALTH: See "Health – All ports" before first U.K. port.

RADIO/VHF: Fishguard Radio, VHF Channel 16 and 14.

TUGS: None.

FACILITIES: Stern loading, car and roll-on/roll-off Ferry Port.

CRANES: 2×6 tons and 1×22 tons.

STEVEDORES: No stevedores – vessels worked by British Railway staff.

MEDICAL: Doctors available. Hospital facilities 16 miles away.

DENSITY: 1025.

FRESH WATER: Available alongside quay.

FUEL: Available with prior warning.

GANGWAY/DECK WATCHMEN: Ship's crew.

OPENING/CLOSING HATCHES: Crew.

REPAIRS: Minor repairs by BR workshops and contractors.

SURVEYORS: At Milford Haven.

AIRPORT: Cardiff and Swansea.

CUSTOMS ALLOWANCE: 40 cigarettes. No wine or spirits unless proceeding on leave.

POLICE/FIRE/AMBULANCE: Dial 999. British Rail police on duty 24 hours.

SHORE LEAVE: Allowed.

AUTHORITY: Shipping and Port Manager.

FLEETWOOD: 53.55 N. 03.00 W. (See Plan Book)

DOCUMENTS:

Manifests.
Bills of Lading.
Ship's papers.
Crew Lists.
Customs Documents.
Health Documents.

PILOTAGE: Pilot to be picked up off No. 1 Fairway Buoy. Ordered through ship's Agent giving 24 hours notice of ETA.

ANCHORAGES: Good anchorage in outer limits of harbour in Lune Deeps in 14 fathoms.

RESTRICTIONS: Vessels under power must not navigate any portion of this harbour above No. 9 Buoy at a greater rate of speed than is necessary to navigate safely, also on passing other vessels, either steam or sail, hopper barges, pontoons in tow, etc., in the channels outside the above mentioned No. 9 Buoy and within harbour limits due care must be taken to pass them at a rate of speed that will not cause risk from displacement or what is commonly called "backwash", and that all vessels must be navigated in this harbour strictly in conformity with Rule 9 (Narrow channels) contained in the Collision Regulations for Preventing Collisions at Sea, 1972.

Vessels bound into Fleetwood must not enter the river without being sure they have sufficient depth of water to ensure their getting to the quays or piers to which they are bound.

In the event of any vessel grounding on the "Tiger's Tail" or in any other part of the Fleetwood Harbour, the Master shall not attempt to refloat the vessel by reversing the engines, or by any other means whatsoever, until all incoming vessels following have passed the stranded vessel and the channel is clear of shipping.

MAX. SIZE: (Within enclosed docks): 350 ft. LOA: 46 ft. 6 in. beam.

So far as draft is concerned, allowances have to be made for clearing the lock invert. These allowances vary according to the beam of the ship and the following scale may be taken as a guide:

Beam of Vessel		*Clearance Required*	
ft.	in.	ft.	in.
37	0	2	3
44	0	4	0
45	6	6	0
46	0	7	3
46	4	9	3
46	6 max.	10	3

HEALTH: See "Health – All ports" before first U.K. port.

RADIO: VHF Port Operations and Information Service. Call sign: Fleetwood Harbour Radio Channel 16 (156.80 mc/s): Calling and Safety. Channel 12 (156.60 mc/s): Port Operations.

All movements of vessels arriving for and sailing from the Harbour and Docks are controlled by the Harbour Master using the VHF Port Operations and Information Service located in the Harbour Master's Office on the West side of Fleetwood Harbour. (Lat. 53° 55′ 30″ N., Long 3° 00′ 12″ W.). This service is operated for the 24 hour period, and vessels must maintain a listening watch when approaching or leaving the Port. Messages must be restricted to matters appertaining to general navigation, berthing instructions and the safety of ships or persons within the Port Area. Messages of any other nature will not be accepted.

TUGS: Tug service operated by FFVOA Ltd., 190/192 Dock Street, Fleetwood.

BERTHING: Under normal conditions the lock gates operate for 2 hours each side of high water.

There is a 25 tonne capacity scotch derrick available for lifts at the Wyre Dock. 3 mobile cranes with 35 tonne capacity. The

General Cargo berths can be used for handling liquid chemicals and bulk cargoes. Grain can be shipped direct into silo (rate 200 t.p.h.) at one of these berths. There is a Roll-on/Roll-off berth in the harbour. This is a daily service to Larne and Dublin for wheeled vehicles and trailer loads.

STEVEDORES: Arranged through ship's Agent.

MEDICAL: Ship's Agent will organise medical attention if required.

DENSITY: 1015 at half tide; 1025 at high water.

FRESH WATER: Fresh water available through stand pipes. Charge according to consumption (sliding scale).

FUEL: All grades of fuel available.

FIRE PRECAUTIONS: No specific requirement outside usual "No smoking" precautions.

GANGWAY/DECK WATCHMEN: Ship's watchmen required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

REPAIRS: 2 slipways located in Fish Dock with lifting capacities of 1,050 and 250 tons respectively.

REPATRIATION: Arranged through ship's Agent.

AIRPORT: Squires Gate, Blackpool, 10 miles away.

TIME: GMT in Winter. GMT plus 1 hour in Summer months.

HOLIDAYS: Christmas Day and Boxing Day; New Years Day; Good Friday and Easter Monday; Spring Bank Holiday; May 1st; Autumn Bank Holiday.

Cargo working can be arranged on any of these days upon request.

POLICE/AMBULANCE/FIRE: British Transport Police available on Docks Estate. Ambulance 999; Fire 999.

TELEPHONES: Can be arranged through Post Office.

SERVICES: Compass adjusting.

SHORE LEAVE: Crew members are allowed ashore.

AUTHORITY: British Transport Docks Board.

FOWEY: 50.20 N. 04.39 W.

PORT LIMITS: The whole of the Fowey River to a line across the entrance to the harbour. A vessel is considered to have arrived on entering the harbour unless she is anchored just outside by the Pilot to await suitable conditions for entering, in which case she is considered to have arrived on being so anchored.

DOCUMENTS:

Crew and Passenger Lists are helpful, but not essential.
Aliens List is essential.
List of Bonded Stores, including beer.
List of Personal Dutiable Articles owned by Crew.
Bill of Health, if available.
De-Ratisation Certificate.
Manifest of all cargo on board.
Copies of Bills of Lading.
Stowage plan, if available.
Normal Ship's Papers.

PILOTAGE: Vessel requiring Pilot gives ETA as far in advance as possible to Agent. Vessel displays normal signals off port. VHF calling Channel 16, working Channel 9. Pilot boats are black. The Pilot boards off entrance. Vessels can anchor South of entrance if necessary.

RESTRICTIONS: Vessels can enter at any time, if their draft is less than 18 ft. Otherwise according to tide.

MAX. SIZE: 460 ft. in length. Loaded draft of 28 ft. Vessels of this draft have to be handled at or near high water.

Vessels up to 486 ft. in length have been handled, but subject to prior consultation with the Harbour Master and owners of the loading berths.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Land's End Radio, Niton, or Portishead.

TUGS: 2 diesel tugs are available and normally join vessels on entering entrance. Ship's lines usually used. Only 1 tug required for vessels under 350 ft. length.

BERTHING: Vessels waiting for berths are normally moored, using their own anchor with their stern to a buoy. On the berth, vessels require long ropes.

A new berth (2 berths) 550 ft. in length is completed. Depth alongside 23 ft.

CARGO FACILITIES: The port is specially equipped to handle china clay and ball clay in bulk and in bags. No other commodity passes through the port either inwards or outwards. There are 5 berths each with a 3-ton crane and a bulk conveyor capable of handling up to about 330 t.p.h.

STEVEDORES: Earliest ETA possible is required, especially when a vessel arrives over week-end.

MEDICAL: If Medical Officer is required on arrival, advise Agent earliest opportunity. Hospital facilities are available.

DENSITY: River fully salt at all states of the tide.

FRESH WATER: Available at all jetties, delivered by hose and rate very variable.

FUEL: Gas/Oil only available. As much notice as possible is advisable.

GANGWAY/DECK WATCHMEN: Not normally employed.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCE: 200 cigarettes or 0.5 lb. of tobacco, if foreign-going. Wine and/or Spirits. 0.5 pint if foreign-going.

Half this allowance for vessels arriving from home trade ports.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Belgium	J. H. Samuel, Trafalgar Square, Fowey. Tel. 3414
Finland	,, ,, ,,
France	,, ,, ,,
Sweden	,, ,, ,,
Denmark	Ross Carter, Albert Quay, Fowey. Tel. 3274.
Netherland	Ross Carter, Albert Quay, Fowey. Tel. 3274.

REPAIRS: Not possible. Minor repairs only.

REPATRIATION: Facilities exist.

HOLIDAYS: Saturdays, Sundays, and all Public Holidays.

POLICE/AMBULANCE/FIRE: Telephone 999.

TELEPHONES: No arrangements made for connection on board.

SERVICES: Compass adjusting can be arranged.

SHORE LEAVE: Allowed.

DELAYS: There is a possibility of delay in heavy rain.

AUTHORITY: Fowey Harbour Commissioners.

AGENT: Toyne Carter & Co. Ltd., Fowey, Cornwall. Tel. Fowey (072683) 3274. Telegraphic address: "Toyne Fowey". Telex: 45331 – AB: "Toyne G". After hours tel. Fowey 3428; 2370 or 2525. Ship's Agents and Shipbrokers.

GARSTON: 53.21 N. 02.54 W. (See Plan Book)

DOCUMENTS: HEALTH: and all general information, refer to "Liverpool".

RESTRICTIONS: Locking into/out of Garston commences 3 hours before HW and ceases 3 hours after for vessels of 250 ft. in length or under. Vessels over this length must enter when the river and dock are level – about 1 hour before HW to half an hour after.

MAX. SIZE: 500 ft. length, 63 ft. beam, draft about 6 ft. less than HW Liverpool.

RADIO: As Liverpool. VHF Channel 20.

BERTHING: *Stalbridge Dock:*

Width of entrance	65 ft.
Depth on sill	26 ft. 8 in.
Lock length	276 ft.
Total water area	14.5 acres
Length of quays	3,200 ft.

Old and North Docks: entered from Stalbridge Dock

Total water area	14 acres
Length of quays	4,610 ft.

Dock Facilities:

Stalbridge Dock:

	Capacity	*No.*
Cranes	10 tonnes	2
	7.5 tonnes	2
	6 tonnes	10
Coaling appliances	30 tonnes	2

High capacity fork and clamp lift trucks available.
Equalising beam giving a maximum lift of 18 tonnes available.

Old & North Docks:

Cranes	32 tonnes	1
	7.5 tonnes	2
	6 tonnes	9
	1.25–5 tonnes	4
Coaling appliances	23.5 tonnes	5

Warehouses 3,031 sq. m. (3,625 sq. yd.)

DENSITY: 1025.

FRESH WATER: Available Monday to Friday 0800 to 1600 hrs. All watering required outside of these hours is by arrangement and must be paid for at overtime rates. Rate of delivery, 10 t.p.h.

DEVELOPMENTS: Modernisation of coaling facilities under consideration. Further container berth under construction, anticipated becoming operational July 1978.

OPENING/CLOSING HATCHES: Hatches to be opened and closed by the crew except on request.

AIRPORT: Liverpool Airport, 1 mile distant.

HOLIDAYS: Normal English Bank Holidays. Vessels can be worked on these days but this involves additional payment.

POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.

TELEPHONES: No connection can be made to vessels.

GENERAL: Vessels are required to "stem" on entering the dock; that is, to send an Officer to the Pierhead Office to enter the vessel into the Stemming Book giving all details regarding the vessel and cargo and to sign the sheet.

AUTHORITY: British Transport Docks Board.

GOOLE: 53.42 N. 00.50 W.

PORT LIMITS: Goole is a river port with conservancy jurisdiction to the junction of rivers Humber, Ouse, Trent. However, laytime commences from commencement of next normal working shift after ship is on berth and ship's Agent has issued "Notice of Readiness". This may be 0800 hrs. or 1300 hrs. dependent on time of issue of notice.

Precedence of order of arrival of vessels is determined by arrival time at Ocean Lock Entrance, Goole Docks.

DOCUMENTS:
Bills of Lading/Manifests (prepared by Agents at port of origination).
"Imperfect" Customs Entry.
Request (to work vessel).
*Request for Immigration Officer to be in attendance – if carrying passengers.
*Crew List to Immigration Officer (for foreign personnel).
Ship's Register.
Ships Agent will normally notify Immigration Officer.

PILOTAGE: Compulsory from Spurn to Goole, two stages.
1st stage: Spurn Light Vessel to Hull Roads.
See "Grimsby" Pilotage.
2nd stage: Hull Roads to Goole. Pilot will board vessel in Hull Roads.

ANCHORAGES: Bull Anchorage on chart of Humber Estuary, or in Hull Roads, otherwise only on advice of Pilot.

RESTRICTIONS: State of tide, springs or neaps. Port entered during tidal hours, 3.25 hours before high water to half an hour after high water, according to draft. Pilots will advise.

MAX. SIZE: Vessels should be within following measurements: 300 ft. overall length, 50 ft. beam and 17/18 ft. draft. Vessels exceeding any of these measurements should seek advice before arranging to visit the port.

HEALTH: Pratique issued by H.M. Customs Waterguard (in absence of Port Health Official). Pratique accepted when entering after calling at another port in the U.K.
Also see "Health – All Ports" before first U.K. port.

RADIO: Via Humber Radio, call sign GKZ – call on Channel 16. Give ship's name and call sign and pass message. Also see "Hull" – VHF.

TUGS: Tugs available but not normally used. If required, to be arranged through Ship's Agent.

BERTHING: Berthing instructions given to vessel on arrival at entrance locks. No specific requirements.

SPECIALISED CARGO HANDLING FACILITIES: Three appliances for loading of rail-borne bulk cargoes, e.g. coal, coke, pitch, fluorspar, etc.
Two appliances for loading of canal-borne bulk cargoes (coal, coke, pitch, etc.).
Discharging of bulk cargoes by 12×7.5-ton and 5×6 tonne quay cranes, also 10 mobile cranes up to 40 tonne capacity, equipped with suitable grabs for sand, ores, fertilisers, coal, grain, sulphur, scrap iron, etc.
Road-borne bulk cargoes loaded by same grabs.
Two 32-ton Scotch derrick cranes for container handling.
50-ton and 40-ton electric travelling cranes for heavy lifts.
Roll-on/roll-off traffic (cars, etc.) accommodated at various berths. The docks are maintained at a constant level and specialised link span berths are not necessary.
No bulk liquid berths.

STEVEDORES: Arrangements made by Ship's Agent who should be given ample notice of time of arrival of vessel, Port Authority will advise.

MEDICAL: Ship's Agent will arrange for attendance of doctor on notification. Doctor's, dentists and hospital services available. Ship's Agent can arrange service required.

DENSITY: Water in Goole Docks is fresh water and is maintained at constant level. Entry is by locks. Density 1000.

FRESH WATER: Delivery by water-boat through hose-pipes. Rate 30 t.p.h.

FUEL: All grades available on reasonable notice being given to Ship's Agent.

FIRE PRECAUTIONS: No specific precautions unless there are exceptional circumstances, when special arrangements can be made with local Fire Service.

GANGWAY/DECK WATCHMEN: Necessary. Usually provided from crew. Otherwise by negotiation locally.

OPENING/CLOSING HATCHES: Responsibility of crew.

SHIP CERTIFICATES:
Ship's Register (including load-line).
Radio Safety.
Life-Saving.
Light Dues.
Change of Articles.
Deratisation Certificates.

CARGO GEAR: Normally not required, as ample port facilities available.

IDENTIFICATION CARDS: May be required to be produced to Immigration Officer or H.M. Customs offical, especially in the case of foreign flags.

CONSULS: France, Netherlands and Denmark.

REPAIRS: All types of deck and engine repairs possible by local ship repairers.

DRY DOCKS: No. 2 Dry Dock: 301 ft. length, 50 ft. width at entrance, 15 ft. depth on sill. Two other dry docks. The water in the wet docks at Goole is maintained at a constant level and all dry docks are entered direct from the wet docks.

REPATRIATION: Arranged by Ship's Agent.

AIRPORT: Humberside Airport. Daily services to Amsterdam, Aberdeen and London.

TIME: GMT in Winter; GMT plus 1 hour in Summer months.

HOLIDAYS: Good Friday; Easter Monday; May Day; Spring Bank Holiday (last Monday in May); late Summer Bank Holiday (last Monday in August); Christmas Day; Boxing Day and New Years Day. No cargo working on these days.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: No arrangements for ship connection.

SHORE LEAVE: No restrictions.

REGULATIONS: Visitors to vessels require permits from Port Authority and Master or ship's Agent. Smoking not permitted ashore in dock area.

AUTHORITY: British Transport Docks Board.

GRANGEMOUTH: 56.01 N. 03.43 W. (See Plan Book)

PORT LIMITS: At Grangemouth a vessel is not considered to be an "arrived vessel" until she is tied up at the allocated berth.

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 List of all high duty goods in crew's possession.
1 Cargo Manifest.
All Valid Certificates.

PILOTAGE: Compulsory in river. Pilot boards at Inchkeith. Pilot boat on VHF, also see "Radio".

ANCHORAGES: North of Grangemouth West Buoy, 2 fathoms. Charleston Roads 5 fathoms. East of Inchkeith, up to 8 fathoms.

RESTRICTIONS: 24 hour locking system in operation depending on draft. The height of the tide must always be taken into account when dealing with larger vessels.

MAX. SIZE: Dry cargo vessels: Length 600 ft., beam 90 ft. Tankers: Length 575 ft., beam 90 ft. Draft according to state of tide. Vessels other than tankers max. draft 25 ft. 6 in. Tankers, up to 32 ft. 6 in. max. draft.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Wick – Stonehaven – Cullercoats, coastal stations.
Port VHF (FM) Communications: Station: Lock Control Office, Lock Entrance, Grangemouth. This centre will maintain a continuous watch. Call sign: Grangemouth Docks.
156.8 Mc/s. Channel 16 calling and safety. All vessels should maintain a listening watch on this Channel and use it to establish contact with Grangemouth Docks. Once contact is established the Duty Operator will request vessels to shift to the Port Operations Channel.
156.7 Mc/s. Channel 14, Port Operations. A working Channel restricted to messages relating to the movement and safety of ships, and in emergency, to the safety of persons.
156.6 Mc/s. Channel 10, Inter-ship. A working Channel for tug-to-tug and tug-to-bridge communications.
156.3 Mc/s. Channel 6, Inter-ship. A working Channel for communication with other vessels.
No message of a personal character or messages of any other nature than those pertaining to the general navigation and safety of ships and persons within the Port Area can be accepted.

TUGS: Can join vessel at Hen and Chicken Buoy or Lock Gates. Optional use of towage lines. Cost for tug's line £15 per hawser.

BERTHING: The water in Grangemouth Docks is maintained at the same level by impounding pumps. On passing through the lock entrance berthing is allocated according to the nature of the cargo and draft of vessel.
The depth of water available at the berths varies in each dock, the max. depths being approx.: Grange Dock 26 ft.; Carron Dock 23 ft.; Old Dock 17 ft.

CARGO HANDLING FACILITIES: Bulk cargoes can be handled at most berths within the port. The East Wall berth has four 10-ton grabbing cranes. Other berths have 7.5 and 6-ton cranes. One 40-ton heavy lift crane. Container berth is 1,000 ft. long and has two 32-ton transporter cranes.
A Roll-on/Roll-off berth in operation. Liquid chemicals and LPG Carriers are handled at the BP jetties. No. 1 North Jetty, which is a common user jetty handles chemicals.

STEVEDORES: No particular advice necessary to stevedores. Essential, however, advise Agent 24 hours prior arrival, who will advise stevedores.

CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 5 ounces tobacco per man and equivalent of 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.

MEDICAL: No advance notice necessary. Hospital facilities available in immediate district.

TANKERS: B.P. Refinery (Grangemouth) Limited. Private jetties in Eastern Channel: Nos. 2 and 3, 32 ft. 6 in.; Nos. 4 and 5, 19 ft. 6 in. draft No. 1 North Side Jetty, pipe-lines connected to Ross Chemical and Storage Co. are 1.5 in. nitrogen line, 6 in. chemical line, 10 in. heavy fuel line, 2 in. fresh water supply, 8 in. motor spirit line, 8 in. gas oil line. Draft at No. 1 North 32 ft. 6 in.

DENSITY: 1019 average.

FRESH WATER: Available in most berths. Watermen supervise delivery on request. Delivery rate varies depending on berth.

FUEL: All grades available from oil installations.

GANGWAY/DECK WATCHMEN: Not necessary but can be done by ship's personnel.

OPENING/CLOSING HATCHES: Custom of port crew open and close hatches but stevedores will do so if required.

CERTIFICATES: For Customs Clearance valid Certificates in respect of radio, load-line, construction, safety equipment, deratisation, necessary.

CONSULS: Norwegian, Danish and Swedish consuls available locally.

REPAIRS: All types of repairs can be carried out afloat.

DRY DOCKS: Carron dry dock length 350 ft., breadth 50 ft., depth 22 ft. Middle dry dock length 335 ft., breadth 50 ft., depth 19 ft.
REPATRIATION: All facilities exist.
AIRPORT: 1 hour from Glasgow and Edinburgh airports where numerous connections for London thence world wide travel.
TIME: British Standard Time (1 hour ahead of GMT). GMT during Winter months.
HOLIDAYS: 1st and 2nd January; 1st Monday May; 3rd Monday July; 2nd Monday September; Christmas Day.
POLICE/AMBULANCE/FIRE: In public telephone dial 999 and ask for appropriate service. With dock circuit telephone dial 34 for Police or dial 51 and ask for Fire/Ambulance.
TELEPHONES: Telephones available at A and B sheds for placing on board.
SERVICES: Compass adjusting, calibrating, etc., can be done in river. No equipment for tank cleaning but can accept tank washings ashore.
SHORE LEAVE: Allowed.
AUTHORITY: Forth Ports Authority.

GRANTON: 55.59 N. 03.13 W. (See Plan Book)

DOCUMENTS:
1 Crew Declaration Form C.142 (Tobacco List).
1 Crew List.
1 Passenger List.
(Also see "Glasgow").
PILOTAGE: Pilot station Firth of Forth located at Granton, boarding station Inchkeith Island. Contact with Pilot cutters can be made on VHF Channel 16 and R/T 2182 kHz.
ANCHORAGES: Good holding ground at Inchkeith Island and Leith roadstead 18.3–31 m. Request should be made to Forth Navigation Service.
RESTRICTIONS: The entrance between the breakwaters is 103 m. in width. The rise of tide, 5.182 m. at springs and 3.658 m. at neaps, permits the entry or exit of vessels up to 6.7 m. draft at HW.

A red flag bearing St. George's Cross exhibited at the Middle Pier Head signifies that vessels should not enter the harbour until the flag is lowered. A green light takes the place of the flag during hours of darkness.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Forth, Stonehaven and Cullercoats radio stations.
RADAR/VHF: Port and estuary radar service. VHF contact can be made with Leith Harbour Radio on Channel 16. Forth Navigation Service now in operation.
TUGS: Sound signal for vessels requiring tug services is four long blasts. Tugs, if required, join the vessel in the roads. Ship's lines normally used. Tugs towing gear available, not compulsory.
BERTHING: *Middle Pier:* Quayage 347 m. max. depth 5.1 m. LWOST. In addition, there is a 137 m. crosspiece at the end of the pier where depth of water is 7.6 m. LWOST.

West Pier: Quayage 140 m. max. depth 7.0 m. LWOST.
TANKERS: Tankers up to 18,000 d.w.t. are accommodated at the end of the West Pier, adjoining port entrance.
MEDICAL: No advance notice of medical attention required. All hospital facilities available.
FRESH WATER: Available alongside at all berths.
FUEL: All grades available subject 24 hours notice in advance.
REPAIRS: Facilities available for all minor repairs.
AIRPORT: Edinburgh Airport, served by regular airlines, situated about 6 miles away.
HOLIDAYS: Public holidays observed annually: Third Monday in April; third Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd and 3rd January.
AUTHORITY: Forth Ports Authority.

GRIMSBY: 53.34 N. 00.04 W. (See Plan Book)

DOCUMENTS: See "Immingham".
PILOTAGE: Compulsory. *Humber Pilotage District–Spurn Pilot Station:* A Pilotage Control and Radar Station (telephone no. 096-46-392; telex no. 527393) has been established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N., Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a GPO Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "SPURN PILOT" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary intereference).

Inward bound vessels for Goole or the River Trent desiring to pick up Goole or Trent Pilots in Hull Roads should give at least 2 hours advance notice of their expected time of arrival in Hull Roads by signal through a GPO Coast Station to the Humber Ports Operation and Information Service (Telegraphic address "HUMBEROPS") or should immediately on arrival at Spurn report their expected time of arrival in Hull Roads by calling the above service ("HULL RADIO") on VHF Channel 16 then transferring to Channel 12 for passing arrival information.

Compliance with this procedure will ensure as far as possible, the shipping of Pilots without delay.
ANCHORAGES: Hawke and Sunk Roads, Haile, Spurn and Bull Anchorages. See "Hull". The Pilots will advise where to proceed to anchor and also provide Pilot.
MAX. SIZE: Maximum breadth 67 ft., maximum length of vessel that can be locked 268 ft. but vessels of greater length can enter docks on HW when all lock gates are open. 3 ft. clearance under the keel is required. Vessels having a draft of 19 ft. can normally enter the docks on any tide when the height of water is sufficient to allow 3 ft. clearance. Vessels with 21 ft. draft can be taken on spring tides. Vessels can enter usually approx. 3 hours before and 2.5 hours after high water.
HEALTH: Master has to report any "Reportable" illness as detailed in Form "Port 38" to "Porthealth Grimsby". Also see "Health – All Ports" before first U.K. port.
RADIO: Humber Radio, 2182 kc/s, or VHF Channel 16. Also see "Hull".
VHF: See "Hull".
TUGS: Normally join in Grimsby roads. Optional whether use ship's or tug's lines. Tugs operate from Immingham so plenty of notice required.
BERTHING: *Grimsby Docks:*

	Commercial Docks	Fish Docks
Entrance Locks:		
Length	90 m.	43.6 m. & 21.4 m.
Width	21.4 m.	10.6 m. & 13.0 m.
Sill level MHWN	6.8 m.	5.7 m. & 6.8 m.
Quay cranes	18 electric – capacity 3 to 10 tonnes 2 mobile cranes – for ship discharge	1 electric – capacity 15 tonnes 1 electric – capacity 5 tonnes 1 mobile – capacity 5 tonnes

There is one Roll-on/Roll-off berth in the Royal Dock, to/from Esbjerg and a second in the Alexandra Dock for the discharge of motor vehicles (VW).
STEVEDORES: Vessels are allocated labour in order of arrival so it is only necessary to give the Agent the ETA preferably before noon on the previous day. Normal working hours 0800 to 1700 hrs. Overtime can be worked 1700 to 1900 hrs. Monday to Thursday. On Saturdays and Sundays as required.
MEDICAL: Hospitals and all other medical facilities are readily available. If immediate attention is required on arrival please advise Agent by radio or telegram.
FRESH WATER: Available at all quays. Rate approx. 20 t.p.h.
FUEL: Normal gas and diesel oils available by both road and barge with at least 24 hours notice.
GANGWAY/DECK WATCHMEN: Not necessary, but the service is available if Master requires it.
OPENING/CLOSING HATCHES: Responsibility of the crew. The hatch beams can be removed and replaced by the shore cranes but there is an extra charge for this operation.
CUSTOMS ALLOWANCE: 200 cigarettes per 8 days. 1 bottle wine and 1 bottle spirits per 4 days. All seals to be broken.
CARGO GEAR: In accordance with the regulations laid down by H.M. Factories Inspector.
IDENTIFICATION CARDS: Some sort of identification whilst crew are ashore is advisable. (Seaman's Book or Passport).
CONSULS:

HARTLEPOOL: 54.42 N. 01.12 W.

DOCUMENTS: *Ship's Official Papers including:*

Ship's Register.
Ship's Construction Certificate.
Load Line Certificate.
Deratisation Certificate.
Safety Equipment Certificate.
Radio Equipment Certificate.
U.K. Light Dues Certificate.
Crew List.
Bills of Lading, Manifest and Stowage Plan (Usually sent in advance).
Ship's Stores List.

PILOTAGE: Call by VHF when 3 hours from port and again half an hour before arrival. 2 hours required for sailing. VHF Channel 16, 14, 12, 9, 8 and 6.

Pilotage not compulsory. Tel. No. Hartlepool 66030.

Pilots usually board in vicinity of Longscar Buoy from a cutter showing the usual international signals.

ANCHORAGE: N.E. of Longscar Buoy but special care must be exercised in vicinity of prohibited anchorages near Ekofisk Oil Pipe-line and River Tees Fairway.

RESTRICTIONS: Daylight entry only for vessels exceeding 24.4 m. beam. Entrance channel 1.1 km. long. 61 m. wide. Nominal dredged depth 5.7 m. below L.A.T.

MAX. SIZE: Overall length 181.3 m. Beam 29.2 m. reduced draft of 7.92 m. Vessels approaching any of the max. sizes must consult Dock Master in advance.

HEALTH: New Regulations. The Public Health (Ships) Regulations in force from 1st April, 1978. Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio. VHF Hartlepool Port Radio Channel 16 and 12.

TUGS: 2 twin screw diesel (1,200 h.p.) tugs available during tidal periods. Tugs ropes available at extra charge.

BERTHING: Victoria Harbour, Deep Water Berth. 295 m. Depth 9.5 L.A.T. Equipped with 10-tonne cranes.

Entrance to the enclosed docks at Hartlepool is by 'The North' entrance, Victoria Harbour, which has a depth of water 8.18 m. on the sill at M.H.W.S.T. the entrance width is 21.33 m.

North Basin (non-tidal)

No Cranes. Length of Dock 182.87 m. Depth on sill is 3.1 m. below L.A.T.

Central Dock (non-tidal).

No Cranes. Length of Dock 301.73 m. Width of Entrance 21.33 m. Depth alongside is 2.5 m. below L.A.T.

West Quay — Conveyor.

A dry cargo bulk loading appliance capable of loading any cargo of sizes up to 3 in. cube at the rate of 1,000 tonnes per hour, depending on density of cargo, into vessels of 8,000 tonnes carrying capacity or less, according to tidal conditions prevailing at the entrance locks.

North-West Corner.

Roll-on/Roll-off Berth. Max. length of vessel 135 m. Max. beam 18 m. Max. draft 6.25 m.

Union Dock (Non-tidal) 18 Cranes 10 tonnes – 3 tonnes. Length of quayage 1,551.94 m. Width of Entrance 20.32 m. Depth of Water of 2.2 m. below L.A.T.

Roll-on/Roll-off berth to handle loads of up to 450 tonnes. Max. length of vessel 85.34 m. Max. beam 14.93 m. Max. draft 5.79 m.

Coal Dock (Non-Tidal).

Length of Quayage 689.11 m. Width of Entrance 20.32 m. Depth of Water of 2.2 below LAT.

Jackson Dock (Non-Tidal).

Length of Quayage 600 m. Width of Entrance 20.32 m. Depth of Water of 1.6 m. below LAT.

STEVEDORES: All stevedoring undertaken by Port Authority on day work basis with voluntary overtime available (including week-ends). Shift working can also be provided.

MEDICAL: Full hospital and emergency services available at all times. Shore Telephone No. 999 or call on VHF 16.

DENSITY: 1025.

FRESH WATER: Available from shore hydrants and tugs at 20 t.p.h.

FUEL: Available by road and bunkering vessels.

GANGWAY/DECK WATCHMEN: Available by private arrangement through Agents.

HATCHES: To be opened and closed by ship's crew.

IDENTIFICATION CARDS: Seaman's Book or Passport advisable.

CONSULS:

Swedish
Norwegian
Danish
Netherlands
Portuguese
Belgium
West Germany
French Consular Agency
Finland

REPAIRS Deck and engine repairs available.

AIRPORT: Teeside Airport nearby with regular U.K. and Continental Services.

TIME: GMT and BST (GMT plus 1 hour) during Summer months.

HOLIDAYS: Normal Bank Holidays.

AUTHORITY: Tees and Hartlepool Port Authority.

HARWICH (Including Parkeston Quay): 51.56 N. 01.15 E. (See Plan Book)

DOCUMENTS:

1 Home Officer Form 1.B.6 may be obtained from HM Customs Boarding Officer.
1 C.142 Crew Declaration List.
1 Maritime Declaration of Health (Q Flag procedure).
2 Ship's report by Master.
1 Stores List.
1 Certificate of Deck Cargo Tonnage (if carried).
1 Grain Certificate (if carried).
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List required by vessels other than packet vessels.
1 Landing Card for each passenger.
1 Ship's Certificate of Registry.
1 Mercantile Marine Office Certificate – for British vessels only.
1 Load Line Certificate.

1 Radio Safety Certificate.

In addition Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage into the harbour is compulsory for all ships of 50 tons and over, with the exception of vessels of not more than 3,500 tons gross regularly employed in the home and coasting trades and not carrying passengers.

SUNK PILOT STATION

The Sunk Pilot vessel has a black hull, a buff funnel, the word "Pilots" painted on her sides and flying the Pilot flag, and at night exhibiting lights and signals in accordance with Rule No. 29 of the International Rules for the Prevention of Collisions at Sea, cruises in the vicinity of the Sunk Light vessel to provide Pilots for ships making for the Port of London and other ports in London Pilotage District and to disembark Pilots from outward-bound ships; if unable to carry out her duties there through stress of weather, she moves into smoother water. In these circumstances shipping is warned by means of radio navigation warnings broadcast from North Foreland, Humber and Scheveningen radio stations, which give her position.

The attention of Masters is drawn to the requirement of stopping and giving a satisfactory lee for the pilot vessel's boarding boats. These 18 ft. boats have a max. speed of 5 knots and if ships being served maintain excessive headway, unnecessary difficulty is caused to both the pilot vessel and boats, and the operation of shipping a Pilot will be unduly prolonged.

Masters must ensure that these boarding boats are clear of their ships before proceeding to avoid damage and to safeguard the lives of the Pilots and Boat Crews.

Ships proceeding to either Maldon or Heybridge Basin must exchange their North Channel Pilots for Essex River Pilots at the Knolls, in favourable weather conditions, and in Brightlingsea Roads in adverse weather conditions.

The attention of Masters of VLCCs is drawn to the special arrangements for Pilot boarding described below.

ETAs and Amendments: Ships requiring a Pilot at the Sunk station should give the pilot vessel, 12 hours in advance and through a Post Office Coast station, their estimated time of arrival, gross tonnage, maximum draft and port of destination. Confirmation of ETA should be given at least 2 hours before arrival. Anything less than 2 hours notice must involve ships in delay.

Contact Procedure: Vessels wishing to contact the pilot vessel at the Sunk by radio telephony direct may:

(i) when within MF range (approximately 50 miles), call on 2182 kHz. (MF).
(ii) when within VHF range (approximately 20 miles), call on Channel 16 (VHF).

The pilot vessel may also be contacted by either W/T or R/T through any Post Office Coast Station addressed Sunk Pilot Vessel Northforeland radio.

Working Frequencies: Having made contact on 2182 kHz. (MF) or Channel 16 (VHF) ships should transfer to the working frequencies as follows:

2241 kHz (MF) or any other agreed licensed intership frequency for passing messages; Channels 6 or 9 (VHF).

Pilot Boarding Arrangements for VLCCs:

The Masters of all VLCCs requiring a Pilot at the Sunk pilot station are requested to comply with the following directions so as to ensure that the boarding operation can be carried out safely and with the minimum of inconvenience to the ship.

The Master of the VLCC should establish voice contact with the Sunk Pilot Cutter at the earliest possible time, consistent with the maximum range of either VHF or MF communication, as described above.

The Sunk Pilot Cutter will advise the VLCC:

(a) The position in which the Pilot will board and the time of boarding;

(b) The mode in which the Pilot will board i.e. with the VLCC under way or at anchor. If the VLCC is advised that the Pilot will board with the ship under way then the speed ordered should be minimal, consistent with maintaining steerage way or, alternatively, the ship should be stopped in the water.

In the interests of the safe boarding of the Pilot the VLCC should not proceed inwards beyond the vicinity of the agreed boarding position.

CORK PILOT STATION

Boarding Point: To facilitate the arrival and departure of ships trading to and from the ports of Felixstowe, Harwich and Ipswich, a Pilot station operates in the vicinity of the Cork *Lanby* in a position Lat. 51° 56′ 42″ N., Long. 01° 27′ 06″ E. *This station is additional to, but is not a substitute for, the Sunk pilot vessel. It is for the use of ships bound to or leaving the above-mentioned ports whose normal course does not take them past the Sunk pilot vessel.* Full service is also provided at the Sunk station.

The Cork station is operated by a fast Pilot launch with black hull and white wheelhouse, flying the Pilot flag, and at night exhibiting lights and signals in accordance with Rule No. 29 of the International Rules for the Prevention of Collisions at Sea.

The attention of Masters is drawn to the requirement when being served by a fast pilot launch of maintaining headway throughout the operation of shipping or landing a Pilot.

ETAs and Amendments: Inward Bound Ships. Ships requiring a Pilot at the Cork station should apply to the Sunk pilot vessel in the same manner and giving the same information but stating their estimated time of arrival at the Cork.

Outward Bound Ships: Masters of ships about to sail from Harwich and Felixstowe and wishing to use the Cork pilot station should state this when ordering their Pilots for departure. However ships may carry their Pilots out to the Sunk pilot station should they so desire. Pilots for ships outward bound should be ordered by telephoning Harwich (code 02555) 3129 – see Harwich Shore pilot station below.

Contact Procedure: The Cork pilot launches keep a constant listening watch on Channel 16 (VHF).

Working Frequencies: Having made contact on Channel 16 (VHF) ships should transfer to the working frequency Channel 9 (VHF).

HARWICH SHORE PILOT STATION (OPERATIONS)

The Shore pilot station (Operations) is situated at Harbour House, Harwich and is part of the Port Operations Service jointly operated by the Harwich Harbour Conservancy Board and Trinity House. It should be noted that Pilots' accommodation and administrative offices are situated at the main pilot station at Town Quay, Harwich.

The pilot station (Operations) is manned by a Duty Pilot and is equipped with VHF, telex, telephone and radar.

All requests for the services of Pilots for ships bound into or out of Harwich and Felixstowe should be made to this station. Orders for Pilots for outward bound ships should state whether the Pilot will be landed at the Sunk or the Cork. Requests from inward bound ships for the services of the Ipswich Pilots and for the Pilots for the Rivers Colne, Blackwater, Crouch and Roach may also be passed through this station.

Contact Procedure: A 24-hour listening watch is maintained on Channel 16 (VHF). The call sign is "Harwich Pilots Radio".

Working Frequencies: Having made contact on Channel 16 (VHF) ships should transfer to the working frequencies, Channels 9 and 12 (VHF).

Ships not fitted with VHF may contact the pilot station (Operations) through the Sunk pilot vessel on MF.

Other communication details are:

Telephone number:	Harwich (code 02555) 3129 or 6300
Telex number:	98472, Pilots Harwich

ANCHORAGES:

Ewarton: Situated to the North and West of Parkeston Quay with an average depth of 3.5 fathoms at low water.

Parkeston: Situated to the North of Parkeston Quay, with an average depth of 3 fathoms at low water.

Shelf: Situated on the Western side of the main Channel between the North and South Shelf Buoys. Average depth of 2.5 fathoms at low water.

Inner: Situated at the Pitching Ground. Average depth 4.5 fathoms at low water.

Cork: Situated to the Westward of the Cork Light buoy. Area approx. 2 miles×1 mile. Average depth 4 fathoms.

RESTRICTIONS: Normal max. draft allowed alongside the berths at Parkeston Quay is 20 ft.

Normal cargo working at Parkeston Quay ceases at 2200 hrs., but berthing and night work by arrangement at any time.

MAX. SIZE: Normal max. permissible length 500 ft. arrangements for larger vessels can be made. Normal max. permissible breadth for roll-on/roll-off is 75 ft. Normal max. permissible draft – 20 ft. The height of the tide does not restrict a vessel berthing alongside the quay if her draft is within 20 ft.

HEALTH: Maritime Declaration of Health required (Q Flag procedure). Obtain Pratique through HM Customs Boarding Officer if no sickness on board.

If there is sickness on board the Customs Official will notify the Duty Port Medical Officer.

If the vessel is from another port in the U.K. Pratique is automatic.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio (call sign GNF) or Humber Radio (call sign GKZ) are the most convenient stations to pass ETA cables, etc., to Agents or receivers. The Pilot Land Station has a Surveillance Radar.

VHF: British Rail at Parkeston Quay keep a 24-hour listening watch on VHF Channel 16 and work on VHF Channel 18. Also see "Felixstowe" – VHF.

Harwich Harbour Conservancy Board operate Harbour Operations Station. Call sign "Harwich Harbour Radio". Listens on Channel 16 and operates on Channel 14. Channel 71 is the secondary working channel. The station is equipped with radar, information available on request on VHF Channel 20.

TUGS: 3 tugs are based at Harwich for use in the area – MT *'Sauria'* 1,600 h.p. MT *'Egerton'* 1,200 h.p. MT *'Langton'* 1,610 h.p. Tugs lines usually used, cost £7.20.

24-hour service, 7 days per week. Constant watch on 2182 kc/s. and Channel 16 VHF. Additional tugs up to 2,250 h.p. can be obtained from London at 24 hours notice.

BERTHING: There are 8 berths at Parkeston Quay, of which 2 are Portal Roll-on/Roll-off berths and 1 is a Pontoon Roll-on/Roll-off berth. Normally max. draft permissible alongside is 20 ft.

Berthing, etc., by arrangement. Applications for berths must be made through the Shipping or Port Manager, British Rail, Parkeston Quay, giving as much advance notice as possible.

Navy Yard – Harwich: Operated by Harwich Dock Co. Ltd.

Three berths

Berth No. 2-3: Length 540 ft. Depth 28 ft.

Berth No. 4 : Length 450 ft. Depth 14 ft.

Berth No. 5 : Length 400 ft. Depth 18 ft. (50 ft. extension under construction)

Each berth equipped with ramp.

Max. draft 26 ft. at No. 2-3 berth

Cranes:

2 Ajax C-60s. Mobile, capacity 60 tons.

1 Wild gantry crane – capacity 18.5 tons, for internal use only.

Other equipment includes 12 Tugmasters, 10 forklifts – capacity 10 tons, and three reefer points.

Fresh water available at No. 2-3 berth only.

STEVEDORES: All labour at Parkeston Quay are members of National Union of Railwaymen, and arrangements for their use must be made through the Shipping and Port Manager, British Rail, Parkeston Quay.

MEDICAL: Prior notice through British Rail, Parkeston Quay, desirable to arrange attention. All services are available.

TANKERS: A berth is available for tankers for the purpose of discharging and loading to the local oil refinery.

DENSITY: 1025 (sea water).

FRESH WATER: Fresh water can be supplied from quayside hydrants.

FUEL: Can be arranged by either barge or road tanker.

DEVELOPMENTS: Eastern end of Parkeston Quay to be lengthened in due course to provide more container berths.

GANGWAY/DECK WATCHMEN: Watchmen are not provided or required by the port, but ships may use their own watchmen.

OPENING/CLOSING HATCHES: To be carried out by ship's crew.

CARGO GEAR: There are 8 level luffing cranes, safe working load averaging from 3 tons to 10 tons, which can be used for discharging and loading. There are also 2 transporter cranes, 30 tons SWL.

IDENTIFICATION CARDS: Seaman's Identity Cards sufficient.

CONSULS: Dutch, German, Danish, Belgian.

REPAIRS: Minor repairs can be carried out by British Rail workshops at Parkeston Quay. As much advance notice as possible required.

REPATRIATION: All facilities available.

AIRPORT: Nearest is Ipswich, 22 miles; Southend, 70 miles.

HOLIDAYS: All normal Bank Holidays. Only passengers and car travellers are dealt with at Parkeston Quay on these days. Freightliners sail only if loaded before the holiday. Train ferries operate normal services.

POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.

TELEPHONES: Arrangements can be made, with advance notice given.

AUTHORITY: General Manager and Harbour Master, Harwich Harbour Conservancy Board.

HEYSHAM: 54.02 N. 02.55 W. (See Plan Book)

DOCUMENTS: As for other British ports plus Walney Light Dues.

PILOTAGE: Trinity House Pilotage Service, Barrow District. Compulsory for all vessels of 50 tons gross tonnage and over with the exception of vessels of not more than 1,500 tons gross regularly employed in the home and coasting trades and not carrying passengers. Also see "Barrow-in-Furness".

RADIO: Heysham Harbour Radio, VHF Channels 16 and 14.

MAX. SIZE: 480 ft. (146 m.) length, draft 17 ft.

HEALTH: See "Health – All Ports" before first UK port.

TUGS: None available.

ANCHORAGES: Heysham Lake. 0.5 mile N.W. of No. 1 Buoy. Position: 53° 59′.4 N., 3° 00.0′ W. Depth: 40 ft. at low water.

RESTRICTIONS: Entry possible at all states of tide. Harbour maintained at 4.1 m. below Admiralty chart datum of chart No. 2010.

BERTHING: Vessels may be berthed at any time. 1 Roll-on/Roll-off ramp. 2 Lift-on/Lift-off berths.

CRANES: 1×30 ton portal crane; 1×10 ton portal crane; 1×32 ton Scotch Derrick on North Quay; 4×7.5 ton portal cranes on South Quay.

DENSITY: Salt water.

FRESH WATER: Available from the quays.

FUEL: Gas oil by road vehicle.

GANGWAY/DECK WATCHMEN: Ship's watchmen required.

SHORE LEAVE: No restrictions on landing.

AIRPORT: Nearest, Liverpool and Manchester; 60 Miles.

REPAIRS: Small repairs possible, no docking facilities.

PROVISIONS: Available locally.

POLICE/AMBULANCE/FIRE: Telephone 999 in emergency.

AUTHORITY: Shipping and Port Manager, British Rail.

HOLYHEAD: 53.19 N. 04.41 W. (See Plan Book)

DOCUMENTS:

1 Crew List and where applicable a Passenger List.
1 Pratique issued by Customs.
1 Crew Declaration (C.142 for H.M. Customs).
1 List of Consumable Stores (tobacco, snuff, alcohol).
1 Declaration of Health.
1 Cargo Manifest.
1 Ship's Report.

PILOTAGE: Pilotage compulsory under Trinity House Authority. Local Pilot available on request.

ANCHORAGES – PROHIBITED ANCHORAGE: The breakwater affords partial shelter to the outer anchorage and complete protection to New Harbour; there are depths of from 19 to 42 ft. in the former and of from 17 to 40 ft. in the latter.

The accommodation for vessels of deep draft in New Harbour is limited. Small vessels should always proceed into New Harbour and anchor in the S.W. part, leaving the outer part and the roadstead for large vessels. The bottom is hard, overlaid with mud but the holding ground is sufficiently good if an adequate amount of cable is veered. During Easterly winds an uncomfortable sea is raised; vessels may then obtain shelter in the Eastern part of outer anchorage. Anchorage is prohibited within 1.5 cables on either side of the track followed by Mail Steamers from the head of the breakwater to the entrance to Old Harbour; the limits of this area are shown on charts.

MAX. SIZE:

Inner Harbour is restricted to vessels of 15 ft. draft and vessels exceeding this draft will only be accepted after consultation with the Shipping and Port Manager.

Outer Harbour: Vessels of approximately 60,000 tons can be accepted alongside the Anglesey Aluminium Jetty where the berth is dredged to 46 ft. at MLWS.

HEALTH: See "Health – All Ports" before first U.K. port.

TUGS: Available through Agents. Tugs up to 1,375 h.p.

RADIO: Holyhead Radio, VHF Channel 16, No Port Radar.

BERTHING: By prior arrangement with Shipping and Port Manager.

STEVEDORES: No stevedores. Vessels loaded and discharged by British Railways dock porters. Outside vessels berthing at Public Quay can be discharged and loaded by making prior arrangements with Agent.

MEDICAL: Medical Officer available. Stanley Sailors Hospital situated in close proximity to Harbour.

DENSITY: Salt water (1025).

FRESH WATER: Available at all berths within the Inner Harbour and alongside Anglesey Aluminium Jetty.

FUEL: Fuel oil and diesel oil available provided that adequate warning is given to Agent. Only 1 berth available for bunkering of large vessels of deep draft alongside Anglesey Aluminium Jetty.

Prior arrangements must be made with British Rail in conjunction with Anglesey Aluminium Metals Ltd., telephone Holyhead 3333.

No oiling barge available for bunkering vessels at anchor.

GANGWAY/DECK WATCHMEN: Required at all times when vessels are in port.

REPAIRS: Repairs can be carried out by the British Rail (SISD) workshops, dry dock available:

Dry dock: Length 412 ft., breadth 70 ft. 3 in., depth on sill 20 ft. at Spring tides.

AIRPORT: RAF Station Valley, Anglesey (6 miles away).

HOLIDAYS: Saturdays, Sundays and all Public holidays.

POLICE/AMBULANCE/FIRE: Tel. 999.

TELEPHONES: No telephone connection for outside vessels. Public telephone within port limits.

SERVICES: Compass adjusting can be arranged.

SHORE LEAVE: Allowed.

AUTHORITY: British Rail Shipping and International Services Division.

HOUND POINT: 56.00 N. 03.22 W. (See Plan Book)

Vessel called at Hound Point Terminal for the purpose of loading Forties Crude Oil (North Sea Oil). The terminal is operated by B.P. Position of terminal Lat. 56° 00′ 20″ N., Long. 03° 21′ 45″ W.

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Crew's Effects List.
1 Stores List.
All valid Certificates.

PILOTAGE: Pilotage in Firth of Forth is compulsory. Contact "Forth Pilot" VHF Channel 16. Pilot boards large vessels in vicinity of Fairway Buoy 56° 03.5′ N., 03° 00′ W. as there is limited depth and manoeuvring space at normal Pilot boarding ground East of Inchkeith.

ANCHORAGE: When vessel has to wait for Pilot, berth or tide, "Forth Navigation Service" will assign anchorage which are numbered "A1" to "A4". These anchorages are in a line E.S.E. to S.W. of Fairway Buoy. Good holding ground at anchorages.

RESTRICTIONS: Vessels will be berthed at slack water — flood or ebb — only. The same accounts in most cases for unberthing.

MAX. SIZE: Vessels up to 300,000 d.w.t. can berth at Hound Point Terminal with no defined restriction on LOA. Vessels berth starboard side alongside, heading East.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: *Arrival advice:* For advance notice refer to Charterer's instructions. In our case ETA was given to Agent upon sailing from Rotterdam.

RADIO/VHF: Estuary radar service. VHF contact can be made with Forth Navigation Service Channel 16. Hound Point Terminal operates VHF Channel 16; B.P. Grangemouth VHF Channel 16 (calling) and Channel 19.

TUGS: 4 tugs of about 3,000 h.p. each available. Tugs ropes are used.

BERTHING: Hound Point Terminal is a Sea Island in the Firth of Forth about 13 miles from Fairway Buoy. The approach channel from Fairway Buoy to berth is marked by buoys and has a guaranteed minimum depth of 66 ft. at LWST.

Maximum of 4 loading arms of 16 in. available for deballasting and/or loading. Loading rate about 8,000 t.p.h. by gravity and with 2 arms connected. This rate decreases as tank level drops.

When 4 arms are connected loading rate can be as high as 18,000 t.p.h. by means of booster pumps.

Facilities to receive any amount of dirty ballast are available. Discharge through 16 in. loading arms into 24 in. line with minimum of 5 kg/sq.cm. back pressure.

No need to prepare ship's derricks unless stores are taken on board. API of cargo about 36.7.

DENSITY: 1020 – 1025.

TIME: GMT in Winter. GMT plus 1 hour in Summer.

GENERAL: Outside the Firth of Forth, clear of the land on the South side, streams are weak, spring rate up to 1 knot, but at spring tide the velocity at the terminal is up to 3.5 knots (Refer to Tidal Stream Atlas).

AUTHORITY: Forth Ports Authority, Leith.

HULL: 53.44 N. 00.14 W. (See Plan Book)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ships Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing card for each passenger.
Ships Certificate of Registry.
Mercantile Marine Office Certificate – for British Ships only.
Load Line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
Derat Certificate.
Ships Register.
Light Bills.
Safety Radio Certificate.

In addition Manifests and Bills of Lading are usually sent to Agents direct from the loading Port.

PILOTAGE: Compulsory. Humber Pilotage District – Spurn Pilot Station. A Pilotage Control and Radar Station (telephone no. 096-46-392; telex no. 527393) has been established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N., Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a GPO Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "SPURN PILOT" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages. (Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward bound vessels for Goole or the River Trent desiring to pick up Goole or Trent Pilots in Hull Roads should give at least 2 hours advance notice of their expected time of arrival in Hull Roads by signal through a GPO Coast Station to the Humber Ports Operation and Information Service (Telegraphic address "HUMBEROPS") or should immediately on arrival at Spurn report their expected time of arrival in Hull Roads by calling the above service ("HULL RADIO") on VHF Channel 16 then transferring to Channel 12 for passing arrival information.

ANCHORAGES: The undermentioned anchorages have been designated for the use of sea-going vessels. Masters are asked to co-operate by using these anchorages and to avoid anchoring in the Fairway or elsewhere.

Spurn anchorage should normally be used by inward-bound vessels and Bull anchorage by outward-bound vessels and vessels awaiting a berth.

Spurn Anchorage. From position "A" 121° distant 3.65 miles from Spurn Lighthouse, in a 125° direction 1.60 miles; thence in a 020° direction 0.60 mile; thence in a 077° direction 1.00 mile; thence in a 347° direction 0.70 mile; and thence in a 257° direction 2.40 miles to position "A".

Haile Anchorage (Explosives): From position A, 216° distant 2.18 miles from Spurn High Lighthouse in a 284° direction 0.77 mile; thence in a 139° direction 0.80 mile; and thence in a 027° direction 0.46 mile to position A.

Bull Anchorage. From Position "A", 193° distance 2.1 miles from Spurn High Lighthouse, in a 090° direction 1.96 miles thence in a 294° direction 1.76 miles, thence in a 274° direction 0.93 miles, thence in a 206° direction 1.0 miles, thence in a 116° direction 0.88 miles, thence in a 026° direction 0.55 miles to Position "A".

AIRPORT: Nearest is Leeds/Bradford, approx. 60 miles from docks.

RESTRICTIONS: Vessels may be accepted through the day and night, the only restrictions being influence of tides, together with the undermentioned physical limitations. Although vessels may occasionally be penned into or out of the docks outside the HW period it is more usual for them to be handled during the period immediately prior to and following HW.

MAX. SIZE: The maximum permissible dimensions for a general cargo/bulk carrier vessel (excluding tankers) requiring a berth in the enclosed docks are as follows: King George & Queen Elizabeth Docks, length 630 ft., beam 80 ft., draft 33 ft. 6 in.

HEALTH: Pratique granted by Customs Authorities after berthing. If vessel from non-infected area pratique given after Master declares all well on board. If from infected area pratique given after Port Health Authorities doctor has examined crew and given health clearance to Customs Officer. In case of suspected illness Master can send radio to Port Health Authority – telegraphic address "Portealth" Hull. Pratique is automatic when entering after calling at another port or ports in the U.K. and being granted pratique there, unless of course, illness has developed whilst on passage from previous U.K. port.

Also see "Health – All Ports" before first U.K. port.

RADIO: Portishead Radio – call sign GKL but when within 200 miles of the Humber can go through Humber Radio – call sign GKZ.

VHF: Humber Ports Operation and Information Service.

The Humber Ports Operation and Information Service operates a VHF (FM) radio telephone service available to all vessels navigating the Rivers Humber, Ouse and Trent from the Humber Pilot Office Building, Queen Street, Hull.

A continuous watch is maintained on Channels 16 and 12. The call sign is "Hull Radio". The Telephone Number is Hull (0482)–223999. Telegraphic address "Humberops".

The Service provides information regarding the arrival, berthing, anchoring and departure of vessels and also information on navigational aids, navigation generally, visibility, and the safety of vessels and persons. Tidal information, including the height of tide at Bull Sand Fort and at Immingham in the Lower Humber, is also available on request. Messages of any other nature and messages of a personal character cannot and will not be accepted. Messages of this kind should be passed through the Post Office Ships Telephone Service via "Humber Radio" on Channel 26.

Other VHF (FM) Stations situated on the River Humber and the Channels used are shown below. These Stations provide direct communication between a vessel and the Dock or Pier Master at the place of destination. In general, vessels should obtain their navigation and safety information from the Humber Ports Operation and Information Service and their berthing, docking and other pre-arrival information from the Station serving their destination.

A general broadcast giving weather reports, tidal information and navigational warnings is made by the Humber Ports Operation and Information Service on Channel 12 every 2 hours commencing at 0103 hrs., prior notification being given on Channel 16.

Procedure:

(i) Vessels fitted with appropriate VHF R/T equipment on approaching the Humber should set watch on Channel 16.

Station	*Call Sign*	*Channel Nos.*	*Operational Times*	*Remarks*
BRITISH TRANSPORT DOCKS BOARD				
Hull Ports Operation and Information Service, Pilot Office, 50 Queen Street, HULL	"Hull Radio"	16 12	Continuous watch maintained	Calling and safety. Port Operations and Information.
Grimsby Docks	"Grimsby Docks Radio"	16 18 9	Continuous watch maintained	Calling and safety. Docking instructions for Grimsby Docks. Short range berthing instructions.
Immingham Docks	"Immingham Docks Radio"	16 19 22 9	Continuous watch maintained	Calling and safety Berthing instructions for tankers. Docking instructions for Immingham Docks. Short range berthing instructions.
Saltend Jetties	"Saltend Radio"	16 19	Continuous watch maintained	Calling and safety. Berthing instructions for tankers.
King George Dock	"King George Dock Radio"	16 20	Continuous watch maintained	Calling and safety. Docking instructions for King George Dock.

Goole Docks	"Goole Docks Radio"	16 14	Continuous watch maintained	Calling and safety. Port Operations and docking instructions for Goole.
Killingholme Signal Station	"Killingholme Radio"	21	Continuous watch maintained	Trawler operations.
CRUDE OIL TERMINALS (HUMBER) LIMITED (Operated by Conoco, Ltd.)				
Tetney Oil Terminal	"Tetney Base"	16 19 48	Continuous watch maintained	Calling and safety. Berthing instructions for Mono-Mooring Buoy.
SPURN SHIPPING COMPANY LIMITED	"Oil Base"	16	Continuous watch maintained	Short range berthing instructions for Immingham Oil Terminal.
HULL CORPORATION				
River Hull Port Operational Service	"Drypool Radio"	16 14	2 hours before HW Hull until 1 hour after HW Hull, Mon. to Sat.	Calling and safety. Port Operations in River Hull.
			0900–1100 hrs. Sat. irrespective of tide.	Inter ship use.

(ii) Vessels wishing to communicate with the Pilot Station should call "Spurn Pilot" on Channel 16 and shift to Channel 14 for exchange of traffic.

(iii) On entering and before sailing or moving in the Humber, vessels should call "Hull Radio" on Channel 16. When contact is established they will be requested to transfer to Channel 12 for exchange of arrival or departure information. Watch should then be resumed on Channel 16, unless requested to remain on Channel 12 for port operational reasons.

(iv) Vessels wishing to communicate with the Station serving their destination should do so at the appropriate time on the Channels shown in the Appendix, reporting their departure from Channel 16 to "Hull Radio". Vessels are advised that, when communicating with these Stations, contact with the Humber Ports Operation and Information Service can only be re-established through Channels 16 and 12 and it is particularly advisable to maintain a listening watch on Channel 16 whenever practicable in the event of unforeseen circumstances developing in the River.

All times in messages should be given in Local Time using the 24 hour notation.

TUGS: Head boat normally joins vessel in vicinity of Saltend, about 2 miles from dock, and the other tug or tugs connect with vessel when approaching the dock. Where vessel supplies own ropes for towage these to be good stout hawsers. Wire ropes will not be accepted. There is a charge for use of tug's hawsers.

BULK HANDLING FACILITIES: Container terminal at Queen Elizabeth Dock equipped with 2 transporter cranes, one 40 tons and one 35 tons capacity and 8 straddle carriers.

Roll-on/roll-off container services operated from King George, Queen Elizabeth and Alexandra Docks. Grain silo of 60,000 tons capacity.

STEVEDORES: Enable Agent order gangs important receive accurate ETA particularly when week-end work involved. Latest time to order gangs: Normal day work 0730 hrs. same morning. Saturday and Sunday 1100 hrs. Friday.

MEDICAL: Necessary for Agents to be advised of any urgent cases of illness in order that they can arrange for a doctor or if necessary an ambulance to be available immediately on berthing. Hospital facilities available.

If vessel required to remain in river awaiting berth arrangements can be made for any serious case to be taken from vessel by lifeboat and conveyed to Grimsby for immediate treatment.

TANKERS: The Oil terminal at Salt End handles refined or semi-refined chemical and petroleum products which are transferred from the vessel along the oil jetties through a series of chemical and service pipes which range from 4 in. for chemicals, 8 in. and 12 in. for spirit and 16 in. for fuel oils and molasses. Facilities available for the discharge of Slop residue.

There are 3 tanker berths at Salt End and maximum dimensions of vessels are length 670 ft., draft 34 ft.

DENSITY: 1013/1015.

FRESH WATER: King George and Queen Elizabeth Docks. Available at any time. Ex Quay. Rate of delivery – 15 t.p.h.

All other Docks. Available at any time. Ex Water Boat. Rate of delivery – 100 t.p.h.

If water required urgently after 1700 hrs. weekdays or on Saturdays or Sundays Agents must be notified in good time to enable them order men out.

FUEL: Fuel oil available, viscosity up to 3,500 secs. Redwood. Gas oil and diesel also available. At least 24 hours notice required.

FIRE PRECAUTIONS: Copy of Handbook "Emergency Arrangements" is handed to Masters of Tankers.

GANGWAY/DECK WATCHMEN: Watchmen available if required by Master.

OPENING/CLOSING HATCHES: Can be carried out by stevedores when ordered. Ship charged with actual cost, but ship's crew may do so if required.

CUSTOMS ALLOWANCE: Foreign trade – max. allowance 0.5 lb. cigarettes or cigars or tobacco. Home Trade – (Elbe/Brest limits) half the above. Wine and/or Spirits. Foreign Trade – 1 pint – opened. Home Trade – (Elbe/Brest limits) half the above allowance.

One further dock in King George Dock. Two further docks in Alexandra Dock. One further dock in Wm. Wright Dock.

AIRPORT: Humberside Airport. Daily service to Amsterdam, Aberdeen and London.

REPATRIATION: Crew changes can be effected and repatriation arranged by sea or air.

TIME: BST (British Standard Time) GMT plus 1 hour, GMT during winter months.

HOLIDAYS: Good Friday (movable Holiday); Easter Monday (movable Holiday); Spring Holiday (last Monday in May); Bank Holiday (last Monday in August); Christmas Day (25th December); Boxing Day (26th December).

Saturdays and Sundays are non-working days but overtime work can be arranged on a voluntary labour basis. Overtime work can be arranged on all the above holidays on a voluntary labour basis.

POLICE/AMBULANCE/FIRE: Emergency Calls – Police – Fire – Ambulance – Coastguard – Dial 999. Ask the operator for the service required.

TELEPHONES: Can be placed on board at the majority of berths in King George and Queen Elizabeth Docks.

SERVICES: Tank cleaning, facilities for discharge of tank washings slop (residue), compass adjusting, etc., available.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: British Transport Docks Board.

IMMINGHAM and KILLINGHOLME:

53.37 N. 00.12 W. **(See Plan Book)**

DOCUMENTS:

2 Copies Immigration, Crew and Passenger List, H.O. Form I.S.6 Supplied by Agents.

Form C.13 General Declaration (In duplicate).
Form C.14 Ship's Stores (In triplicate).
Form C.142 Crew Declaration (In duplicate).
Form C.143 Small Parcels List. (1 Copy) if appropriate.
Form D.C.1 Self Declaration Deck Cargo (In duplicate).
1 Copy Cargo Manifest.
1 Copy Dangerous Cargo List.

PILOTAGE: Compulsory.

Humber Pilotage District – Spurn Pilot Station: A Pilotage control and radar station (telephone no. 096-46-392; telex no. 527393) has been established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N., Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a GPO Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "SPURN PILOT" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward bound vessels for Goole or the River Trent desiring to pick up Goole or Trent Pilots in Hull Roads should give at least 2 hours advance notice of their expected time of arrival in Hull Roads by signal through a GPO Coast Station to the Humber Ports Operation and Information Service (Telegraphic address "HUMBEROPS") or should immediately on arrival at Spurn report their expected time of arrival in Hull Roads by calling the above service ("HULL RADIO") on VHF Channel 16 then transferring to Channel 12 for passing arrival information.

Compliance with this procedure will ensure, as far as possible, the shipping of Pilots without delay.

ANCHORAGES: Hawke and Sunk Roads – Spurn and Bull anchorages. The Pilot station will advise where to proceed to anchor and also provide Pilot. See "Hull".

RESTRICTIONS: No restrictions, vessels may enter the harbour day or night. Max. draft for entering harbour 34 ft. H.W. Compulsory Pilots boarding Spurn Light-vessel, decide whether vessel shall proceed up river or anchor and await suitable state of tide.

MAX. SIZE: Also see "Tetney Terminal".

Immingham Dock max. length 650 ft., breadth 86 ft., draft 34 ft. on density 1010.

National Coal Terminal, length no restriction, beam no restriction, draft average 30 ft. Also see "Berthing and Tankers".

HEALTH: Master to report any "Reportable" illness as detailed in form "Port 38" to "Porthealth Immigration". See "Health – All Ports" before first U.K. port.

RADIO: Humber Radio – 2182 kc/s. or VHF Channel 16. Dock Master VHF Channel 16. Tankers use Channel 19.

VHF: See "Hull".

TUGS: Will join vessel off dock entrance, optional use of tow lines. If using tug's tow lines, charge for this service, depending on vessel's length.

BERTHING: Unless Master or Agent indicates preference, the Port Authorities will decide which side alongside. River Pilot deciding in conjunction with Dock Master most suitable berthing time for harbour and river installations.

British Steel Corporation Ore Terminal:

Adjoins N.C.B. Terminal. Max. length 1,095 ft., max. draft subject to approach channel, 39–43 ft.

CRANES: 24 electric cranes 3–10 tonnes capacity and 1 electric derrick 32 tonnes capacity.

STEVEDORES: Firm ETA to Agent required if possible before noon on previous day before arrival.

MEDICAL: No advance notice necessary for medical treatment as all hospital facilities available.

TANKERS: Also see "Tetney Terminal".

Immingham Oil Terminal. Up to 280,000 d.w.t. with part cargo conducive with Humber dredged channel. Length up to 1,100 ft., breadth, no restriction, draft depends on height of water in channel, average 43 ft. Three 12 in. lines for crude oil. Two lines 12 in. and 10 in. all other products. One 8 in. line for bunkers.

Eastern Jetty. Max. Length approx. 650 ft. breadth, no restriction, draft depends on low water, average around 33 ft. 10 in., 8 in., 6 in. lines, depends on Receivers. Bunker line available.

Western Jetty. Max. Length approx. 800 ft. breadth, no restriction, draft depends on low water, average around 31 ft.

Killingholme North. Length 580 ft. max., beam, no restriction, draft 30 ft. 6 in. One 8 in. line. One 4 in. bunker line.

Killingholme South. Length 565 ft. max., beam, no restriction, draft 31 ft. One 8 in. line. Bunker line available. No slop tanks available.

DENSITY: In harbour 1010.

FRESH WATER: Available all berths by hose. Rate of delivery 20 t.p.h.

FUEL: 24 hours notice required. All grades available.

FIRE PRECAUTIONS: Copy of these regulations handed to the Master on arrival.

GANGWAY/DECK WATCHMEN: Watchmen not usually employed, but left to the discretion of the Master.

OPENING/CLOSING HATCHES: See "Grimsby".

CERTIFICATES:

Ship's Register.
Load Line.
Safety Radio.
Safety Equipment.
Safety Construction and any British Light Dues Receipts.
Derat Certificate.
Oil Pollution Certificate (Tankers).

CUSTOMS ALLOWANCE: 8 days – 200 cigarettes per person approx. Wine/spirits, 4 days – 0.25 pt. per day; this depends on the Customs Officer's discretion.

CARGO GEAR: This must comply with the Department of Employment and Productivity regulations. Normally discharge carried out by shore cranes, although overside berths available.

IDENTIFICATION CARDS: Seaman's book or passport sufficient for Crew members going ashore.

CONSULS:

Finland	Immingham 72387	Netherlands	Grimsby 43177
Denmark	Grimsby 57521	Norway	Grimsby 55324
Greece	Immingham 76246	Sweden	Immingham 72387

REPAIRS: All major repairs possible.

DRY DOCKS: 1. Length 225.6 m., width at entrance 17.1 m.
2. Length 182.9 m., width at entrance 27.4 m.

REPATRIATION: All facilities exist for dealing with crews and passengers.

AIRPORTS: Humberside Airport for Amsterdam, Aberdeen and London for International destinations.

TIME: GMT. Summertime, GMT plus 1 hour.

HOLIDAYS: Good Friday, Christmas Day, Boxing Day are regarded as closed holidays. All other holidays work will be carried out.

POLICE/AMBULANCE/FIRE: Police; Docks – Immingham 72414, 72068, 72067; County – Immingham 76444. Ambulance; – County – Cleethorpes 62912. Fire; 999 ask for Fire.

TELEPHONES: Public telephones available.

AUTHORITY: British Transport Docks Board.

AGENT: See "Grimsby".

INVERGORDON: 57.41 N. 04.10 W. (See Plan Book)

DOCUMENTS: *At Boarding on arrival:*

1 copy Maritime Health Declaration and Deratisation Exemption.
Lists C.142 – Crew's declaration of dutiable and prohibited goods obtained abroad or during the voyage.
Form I.B.6 – List of members of the crew who are aliens or who were engaged outside the United Kingdom.
List 142.A – Parcels list – small packages of merchandise and addressed packages not borne on the ship's report.
List of ship's surplus stores and live animals on board.
Account of cargo in unregistered spaces (deck cargo) if arriving from a port outside Home Trade limits.

At Customs House when making report:

Form XS1.3 (in duplicate) – Master's report inwards. (A third copy is required if the vessel is carrying cargo for another United Kingdom port or for export.)
Surveys 107 – grain-laden ships only.
Surveys 104 – if carrying deck cargo from outside Home Trade limits.
Forms PR.4, PR.8 or PR.10 – passenger returns in duplicate (1 copy for Customs 1 copy for Immigration). Vessels with passengers only.
Certificate of Registry.
Certificate of British Tonnage.
Light Dues Certificate relating to the vessel.
Certificate of Pratique; Form C.101 – these forms are issued by the Customs Officer who first boards the ship.

To the Agent:

Bills of Lading.
Cargo Manifests.

PILOTAGE: Pilotage not compulsory for Cromarty Firth except West of 04° 09' W. and to Admiralty Pier. Vessels under 300 g.r.t. are exempt. Cruising station of pilot boat is the Cromarty Lighthouse where Pilot will board. Pilot boat painted black hull, buff upper structure.

Approaching vessels may give their ETA to pilot station via VHF Channel 16, when in the vicinity of 30 miles, but a 24–hour notice will be required. In the event of bad weather, vessels will be guided by Pilot launch to safety where Pilot will board. Watch kept on VHF Channels 16 and 14 during normal office hours (at present) by Cromarty Firth Port Authority. Call sign "Cromarty Firth Base".

ANCHORAGES: In vicinity of Cromarty Bank Buoy and Cromarty Ness Light.

RESTRICTIONS: Vessels may enter between the hours 0600 and 2200 hours when Pilot will be available.

MAX. SIZE: Max. permissible length 800 ft., draft 36 ft. Also see "Berthing".

HEALTH: International quarantine signals to be used. Advise "Portelth Dingwall" in advance if any suspected diseases on board. Also see "Health – All Ports" before first U.K. port.

RADIO: Vessels approaching from North should pass their ETA cable via Wick Radio GKR 431, and vessels approaching from East via Stonehaven Radio GND 458 to their Agents.

VHF: Link calls through Cromarty Radio (based at Wick) Channel 16 and working Channel 28. Also see "Pilotage".

BERTHING: *Admiralty Wharf:* The wharf is the property of M.O.D. (Navy), however the berths are used regularly by commercial vessels.

Berths 1 and 2 (Outer South): Lengths 443 ft. Max. draft 36 ft. Max. LOA 800 ft. Also see "Tankers".
Berth 3: Max. draft 18 ft. Max. LOA 220 ft.
Berth 6: Max. draft 18 ft. Max. LOA 180 ft.

British Aluminium Pier: Outer Berth: Length 318 ft. Dredged depth 38 ft. M.L.W.S. (1974). Max. berthing length 900 ft. approx. using dolphins. (50,000 d.w.t.)

Inner Berth: Length 200 ft. Depth 20 ft. M.L.W.S. (1974).

CRANES: Mobile cranes up to a maximum 50 tons available from stevedoring firm.

TUGS: Caledonian Towage Co. Ltd. – Tel: Invergordon 852345 – suitable tugs stationed at the port which work in conjunction with Pilots. Tug's lines used.

STEVEDORES: James Jack (Stevedores and crane hirers) – Tel: Evantown STD (0349–83) 388/9. F. Lyons (Stevedores and crane hirers) – Burghead 360.

MEDICAL: Medical cases can be dealt with at short notice through local Agent. Hospital facilities available.

TANKERS: Vessels up to 800 ft. Max. draft 36 ft. may use Admiralty Wharf, Berths 1 and 2 combined.

DENSITY: 1022.

FRESH WATER: Obtainable alongside quay. Rate of delivery 50 t.p.h., each hydrant.

FUEL: This can be ordered through local Agent, delivery by road tanker, small quantities, notice required.

GANGWAY/DECK WATCHMEN: Gangways supplied free of charge with vessel responsible while on board. Watchmen supplied by ship's personnel.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: The following Certificates are required to be held on board for production when required:

International Load Line Certificate.
Safety Construction Certificate
Safety Equipment Certificate.
Safety Radio Certificate.

CUSTOMS ALLOWANCE: Following quantities are generally left out for use on board by each member of crew:

Ships arriving from foreign ports within Home Trade Limits: Tobacco 125 gms. (4oz. or 100 cigarettes). Spirits 0.185 litre (0.25 bottle), wine 0.375 litre (0.5 bottle).

All other ships from foreign ports: Tobacco 250 gms. (8 oz. or 200 cigarettes). Spirits 0.375 litre (0.5 bottle), wine 0.75 litre (1 bottle).

IDENTIFICATION CARDS: Not required.

REPAIRS: General repairs undertaken by Cromarty Firth Engineering Co. Ltd. – Tel: Evanton 291/551.

REPATRIATION: Can be arranged.

AIRPORT: Dalcross Airport at Inverness, operated by British Airways, distance from Invergordon 45 miles.
TIME: British Summer Time, 1 hour advanced on GMT. GMT in Winter months.
HOLIDAYS: 1st and 2nd January; 2nd Monday April; Last Monday July; 1st Monday October; Christmas Day.
POLICE/AMBULANCE/FIRE: Police, tel. Invergordon 852222 or dial 999; Ambulance, arrangements through local doctor, tel. Invergordon 852522; Fire Station, dial 999 and ask for their service.
TELEPHONES: H.M. ships only.
SHORE LEAVE: Allowed.
GENERAL: Permit must be obtained from Port Authority or Ministry of Defence when burning or welding is to be carried out.
AUTHORITY: Cromarty Firth Port Authority.

INVERNESS: 57.29 N. 04.14 W.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Customs and Excise and Health Documents.
Manifest.
Bills of Lading, etc.
PILOTAGE: Apply direct to Agent or to Pilot, telephone Kessock 217. ETA 24 hours. Pilot equipped with VHF. Pilot cutter blue launch with letter P. Pilot station Munlochy Buoy. Location of anchorage while awaiting Pilot – Munlochy Buoy.
ANCHORAGES: Munlochy Buoy in 5–8 fathoms. Beauly Basin in 15 fathoms. Munlochy Bay in 5 fathoms.
RESTRICTIONS: Vessels may enter and leave from 2 hours before HW until 2 hours after HW.
MAX. SIZE: Ship max. 300 ft. length, 20 ft. draft, high water springs. 18ft. draft, high water neaps
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Wick Radio.
TUGS: None.
STEVEDORES: Arrange through Agent. 24 hours notice required.
MEDICAL: Doctor available.
DENSITY: 1012.
FRESH WATER: Available on demand, 20 t.p.h., ex hose on quay.
FUEL: Marine diesel and petroleum on request.
GANGWAY/DECK WATCHMEN: Supplied by ship.
OPENING/CLOSING HATCHES: Done by crew.
CUSTOMS ALLOWANCE: Tobacco/Wines/Spirits. Usual amount allowed by Customs and Excise.
IDENTIFICATION CARDS: None.
CONSULS: Netherlands, tel. Inverness 31171.
REPAIRS: Thornrush Slipway Tel. 33813.
REPATRIATION: Facilities available.
AIRPORT: Dalcross, 7 miles from Inverness.
HOLIDAYS: 1st and 2nd January; Easter Monday; July Bank holiday; First Monday in October; and Christmas Day. All official holidays, cargo work can be arranged on these days.
POLICE/AMBULANCE/FIRE: Police Inverness 39191; Fire Brigade Inverness 222722; Ambulance Inverness 31511.
TELEPHONES: On Quay.
SHORE LEAVE: Unrestricted.
AUTHORITY: Inverness Harbour Trust, Harbour Master.

IPSWICH: 52.02 N. 01.10 E. (See Plan Book)

DOCUMENTS: Masters can conclude all documentation in port. Ship's Agent will give the necessary advice.
PILOTAGE: Normal International signals for "I require Pilot", VHF Channel 16 calling, Channels 9 and 12 working. 30 ft. launch painted black, with word "Pilot" in white on side, available at Sunk and Cork Light Vessels or Harwich Harbour. Desirable that Agents are advised of vessel's ETA at least two hours prior to vessel's arrival at Harwich Roads or, at the Master's option, at either the Sunk or Cork Pilot stations.

A new pilot station has been established in the Orwell Navigation Centre at Ipswich Dock head. The station will be manned from 0700 till 1900 hrs. by a duty Pilot, telephone Ipswich 211347, who will receive orders, and requests for information, regarding the pilotage of vessels in the Ipswich pilotage district.

Outside these hours, from 1900 until 0700 hrs. each day, all such orders and requests for information should be passed to the Orwell Navigation Centre. Telephone 55093, for onward transmission to the duty Pilot at home.
ANCHORAGES: No anchorages within port. All vessels will proceed direct to berth, otherwise anchorage provided in Harwich Harbour.
RESTRICTIONS: Vessels up to 1,500 g.r.t. taken up at night, draft not exceeding 16 ft. Max. length of vessel 460 ft. Max. draft 25 ft. 6 in. Large vessels navigate on flood tide only.
Night Navigation:

Vessels of up to 300 ft. length can navigate at any time providing the U.K.C.* is observed.

Vessels between 300 ft. and 360 ft. in length can navigate (providing the U.K.C. is observed) on a flood tide only. The deadline will be HW at Harwich.

Tankers of over 260 ft. in length will also not be allowed to navigate during darkness. Chemical tankers are also restricted to daylight navigation only.

*U.K.C.: Under Keel Clearance.

MAX. SIZE: 460 ft. overall length and 25 ft. 6 in. draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Masters to contact ship's Agent through North Foreland, Humber, Niton or Portishead depending on position of vessel. All these radio stations hold cable addresses and staff telephone numbers of Agents.

A 24 hour VHF radio facility has been established. Vessels arriving should contact "Ipswich Port Radio" on VHF Channel 16 on entering the River Orwell and report and/or maintain a listening watch as instructed. Channels 14 and 12 will be used for the passing of messages which should be restricted to the safety of navigation or persons.
TUGS: Tugs available in Harwich Roads and it is customary for tugs' lines to be used, for which there is, of course, an additional charge on the towage. It is advisable for vessels to give 4/6 hours' notice of arrival at Harwich Roads.
BERTHING: Vessels bound for berths in the Wet Dock should arrive off the lock two hours before high water.

Cliff Quay: Length: 3,250 ft (990 m.).

Depth of water alongside: 28 ft. (8.5 m.) below LWOST. Subject to silting.

Approach Channel: 19 ft. (5.7 m.) below LWOST.

Cranes: 15 portal jib cranes from 3.00 to 15.25 tonnes lifting capacity and one derrick crane capable of lifting 32.5 tonnes at 90 ft. (27.4 m.) radius, and 40 ft. (12.1 m.) outreach from the face of the quay.

Largest vessel which can be accommodated: 460 ft. (140.2 m.) overall in length, 25 ft 6 in. (7.7 m.) draft inwards, 24 ft. 6 in. (7.4 m.) outwards.

The Quay handles containers and heavy lifts up to 32.5 tonnes and is particularly well equipped to handle cargoes direct to and from both road and rail transport. The South end has been developed as a modern terminal for handling all types of general cargo, including containers, flats and palletised units. Spacious modern transit sheds, together with a container park, are sited conveniently behind this part of the Quay. Vessels up to 25 ft. 6 in. (7.7 m.) draft can be handled at the terminal.

West Bank Terminal: Stage 1 of this terminal provides (1) Container Berth 400 ft. (122 m.) in length dredged to 20 ft. (6.09 m.) alongside. (2) Roll-on/roll-off berth with a ramp 121 ft. (36.9 m.) long and 23 ft. (7 m.) carriageway capable of taking a 45.8 tonnes axle load. Water alongside 20 ft. (6.04 m.) at LWOST.

Two quayside portal cranes, one of 10 tonnes and one of 35 tonnes capacity and a 60 ft. (18.29 m.) 50 tonne weighbridge have been provided on Stage 1.

Stage 2A (under construction) will provide one 300 ft. berth, dredged to 20 ft. LWOST, and backed by 12 acres of land.

The Dock: The dock is situated within the town of Ipswich. It is some 26.25 acres (10.63 hectares) in extent and is approached by an entrance lock 300 ft. (91.4 m.) long by 50 ft. (15.2 m.) wide and ships up to 47 ft. 6 in. (14.4 m.) beam can be brought in.

The following are the depths on the outer sill: At HWOST, 23 ft. 6 in. (7.16 m.). At LWOST, 10 ft. (3.04 m.). At HWONT, 20 ft. 6 in. (6.25 m.). At LWONT, 12 ft. (3.65 m.).

Owing to the shape of the lock-pit modern vessels require the following clearances:

Beam	*Clearance*
40 ft. (12.19 m.)	3 ft. (0.91 m.)
42 ft. (12.80 m.)	4 ft. (1.22 m.)
45 ft. (13.71 m.)	5 ft. (1.52 m.)
48 ft. (14.63 m.)	5 ft. 6 in. (1.67 m.)

Inside, in addition to some 2,700 ft. (823 m.) of private quays owned by merchants having warehouses or mills adjoining, where small vessels can berth, there are the following quays owned by the Authority:

(i) *South West Quay:* This quay is 800 ft. (244 m.) in length with a depth of 19 ft. (5.79 m.) of water alongside at mean dock level. The quay is served by three modern 7.63 tonne portal electric travelling cranes and mobiles as required.

(ii) *Timber, Public Warehouse,* and *End Quays* total 940 ft. (286 m.) in length and have a depth of water alongside varying from 12 ft. (3.65 m.) to 20 ft. (6.09 m.). Public Warehouse Quay has transit shed and warehouse space behind the quay and is served by mobile cranes capable of lifting up to 5 tonnes.

(iii) *Tovell's Wharf* is a 600 ft. (183 m.) reinforced concrete quay with 22 ft. (6.70 m.) of water alongside. It is served by two 4 tonne and one 5 tonne electric travelling luffing cranes.

(iv) *Orwell Quay* is 775 ft. (236 m.) in length, with 18 ft. (5.48 m.) of water alongside and includes a combined container and roll-on/roll-off berth with a derrick capable of lifting 32.5 tonnes at 112 ft. (34.14 m.). Two transit sheds, with a floor area of 96,700 sq. ft. (8,983 sq. m.) are situated immediately behind the Quay apron together with further extensive covered and open areas.
STEVEDORES: Ship's Master normally advises his Agent of his ETA, disposal of cargo on board, and all relevant details. The Agent passes this information to Stevedores.
MEDICAL: All medical facilities available in port. Vessels requiring medical assistance on arrival should advise all details by radio telephone or on their ETA cables.
TANKERS: It is desirable that when Master of a tanker gives an ETA he also indicates the size of pipe-line, size of connection and discharging point in order that necessary arrangements can be made at discharging point of receiving oil terminal. There are no slop facilities at port of Ipswich, and all cleaning and gas-free operations must be carried out outside precincts of the Harwich Harbour Conservancy Board. Only one tanker berth at Ipswich but

there are six intake points on quay and it is usual for four coastal tankers to be accommodated, depending on the overall length and berth availablity. A maximum draft on the berth of 25 ft. 6 in.

DENSITY: Approx. 1020 oz. depending on the amount of fresh water in river due to heavy rain.

FRESH WATER: Available at all quays. Delivery by hose through meter at 10 t.p.h.

FUEL:

Gas oil 35 secs. Redwood.
Light fuel oil 200 secs. Redwood.
Medium fuel oil heated 950 secs. Redwood.
Heavy fuel oil heated 3,500 secs. Redwood.
At least 24 hours' notice required.

GANGWAY/DECK WATCHMEN: No watchmen required by Port Authority, but sufficient men available at all times to move vessels, if necessary.

OPENING/CLOSING HATCHES: Hatches opened by ship's crew.

CERTIFICATES: Following certificates are required by Agents in order to arrange Customs clearance:

Ship's Register.
Radio Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Derat Certificate.
British Tonnage Certificate, if required.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes, or equivalent in tobacco, per man. Wine and/or Spirits, One bottle per man.

CARGO GEAR: Cargo working gear is supplied by stevedores. Normally, quayside cranes are used for discharging and loading. In event of cargo gear being used in port, ship's gear certificate, duly certifying that all gear has been examined and is in every way workable and suitable for discharge and/or loading of cargo, is to be produced.

IDENTIFICATION CARDS: Not required as long as each crew member has in his possession a seaman's book and/or passport.

CONSULS: Vice-consul for Sweden and Vice-Consul for Norway. Tel. 59281.

REPAIRS: Only small repairs on board.

REPATRIATION: Facilities exist at port for effecting crew changing and arranging repatriation.

AIRPORT: A non-customed airport.

HOLIDAYS: Normal holidays for English ports.

TIME: GMT in Winter months. Summer time, GMT plus one hour.

POLICE/AMBULANCE/FIRE: In emergency dial 999. Otherwise Police – Ipswich 55811; Ambulance – Ipswich 56407; Fire – Ipswich 75345.

SHORE LEAVE: Allowed.

AUTHORITY: Ipswich Port Authority.

KING'S LYNN: 52.53 N. 00.15 E. (See Plan Book)

DOCUMENTS:

Pilot Note to be filled in and signed by the Master on completion of pilotage services both inwards and outwards.

Cargo tonnage return to be completed by the ship's Agent.

PILOTAGE: Pilotage is compulsory between an East-to-West line through Bar Flat Buoy in the Wash and the Freebridge at King's Lynn.

Vessels may be boarded and unboarded by pilot cutter in the Wash from approx. 2.5 hours before high water between Daseley Sled, the Sunk Buoy and Roaring Middle Light Float. Unless prevented by weather or breakdown a pilot cutter cruises between King's Lynn No. 1 Light Buoy and the Sunk Light Buoy approx. 2.5 hours before high water until such time as it is too late for a vessel to transit the Approach Channel on that tide.

Requests for a Pilot sent at least 24 hours before the service is required (with amendments if necessary up to 14 hours before) to the Pilot Office, Common Staith, King's Lynn (tel. King's Lynn 3411, telegrams "Conservator" King's Lynn) or through local Agent. The Pilot Office is at the Harbour Office and maintains VHF R/T watch on Channels 16 and 14 from 0900 to 1700 hrs. Monday to Friday and from 4 hours before high water until 1 hour after high water on each tide after 1700 and before 0900 hrs. The Pilot Cutter listens on Channel 16 when on station and is fitted with Channels 14, 12, 11 and 6 as working channels.

No. 3 and 4 Pilot Launches "Brackley" and "Denver" are 40 ft. fibre glass craft with blue hulls, white superstructure and orange tops to the wheelhouses. In the event of bad weather the pilot launch on duty will fore-run vessels into Daseley Sled (52° 53′ N. 0° 21′ 5″ S.) before boarding Pilots.

Requests for pilots for ships in port, should be made to the Pilot Office at least 2 hours before the Pilot is required to attend the ship. The signals to be used or displayed where the services of a pilot are required in accordance with the provisions of the Merchant Shipping (Pilot Signals) Order, 1970. Pilots are boarded and unboarded directly to and from the Pilot Cutter as conditions allow.

ANCHORAGE: In the Wash vessels anchor within an area bounded by the Roaring Middle Light Float and the King's Lynn No. 1 Light Buoy and the Sunk Light Buoy. Anchoring close to No. 1 buoy in sufficient depth of water assists early boarding of Pilots. Depth of water min. of 20 ft.

RESTRICTIONS: King's Lynn Harbour is situated on the River Great Ouse about 2 miles inland from its mouth, at the S.E. corner of the Wash.

The shipping channel in the approaches to King's Lynn and its approaches in the Wash is subject to changes in depth and direction as published on Admiralty Charts.

Harbour Master will advise in advance upon the suitability of vessels and tides. To navigate the approach channel with sufficient under-keel clearance over shoal areas, the vessel's max. draft plus 6 ft. should not exceed the height of the tide above dock sill.

All ship movements are at high water, times in accordance with a position list maintained at the Harbour Office on the basis of information supplied in advance from Masters of vessels and their Agents.

At the Docks entrance lock docking signals are exhibited from a signal mast. Gale warnings are exhibited from a signal mast on Common Staith.

MAX. SIZE: Max. dimension for vessels entering the Harbour: length 260 ft., beam 45 ft., draft 11 ft., on lowest neap tides, and 17 ft. on highest spring tides. Access over high tide only. Harbour Master to be consulted for vessels approaching these limits.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: The King's Lynn Conservancy Board operates in the River Great Ouse and its approaches in the Wash a VHF (FM) port operations and information radio-telephone service in the International Maritime Band, call signs: "King's Lynn Harbour Radio" (Channels 16, 14, 12 and 11); "King's Lynn Pilots" (Channels 16, 14, 12, 11 and 6).

British Transport Docks Board operates a docks operations and information service, call sign: "King's Lynn Docks Radio (Channels 16, 14 and 11).

TUGS: Controlled by King's Lynn Conservancy Board and in attendance at the discretion of the Board's Harbour Master. Vessels joined in the Wash Approaches and/or lower reach of River Great Ouse (Marsh Cut). Vessels should provide own hawsers. If ordered, tug hawser available.

Harbour Master may require any vessel to use and employ a tugboat.

BERTHING: *Alexandra Dock:* Size 780 ft. × 440 ft. Approached from the River Great Ouse and King's Lynn Harbour by a lock 50 ft. wide and 200 ft. between gates. The depth of water on sill is 22 ft. to 26 ft. (springs) and 18 ft. (neaps).

Bentinck Dock: Size 1,000 ft. × 400 ft. Connected with the Alexandra Dock by a passage and gates over which pass 2 swing bridges. Double-sided jetty 235 ft. long.

The quays of the 2 docks have a water frontage of approximately 1 mile and provide a total of 18 berths.

STEVEDORES: Gangs usually can be provided at minimum notice. Main commodities and handling rates: timber (60 tons pre-pack, pre-slung, per gang-hour), steel rods (70 tons per gang-hour), tinplate (90 tons per gang-hour), coal (75 tons per gang-hour), also roll-on/roll-off and container handling.

TANKERS: 4 tanker berths in enclosed docks. Discharge from vessels is to 6-in. connecting pipes feeding 8-in. pipes to storage tanks.

MEDICAL: It is advisable to give advance notice of required medical attendance via Agent. In emergency the Harbour Office will pass on requests received over the VHF R/T Port Operations and Information Service. For other medical information, refer to the Port Medical Officer of Health and H.M. Customs.

FUEL: Available at berths alongside King's Lynn Harbour on 24 hours previous notice. Light-grade fuel oil, gas oil, petrol and paraffin only.

FRESH WATER: Available on all berths through 4-in. pipes off hydrants from public supply.

OPENING/CLOSING HATCHES: Done by crew. Cranes available for heavy beams.

GANGWAY/DECK WATCHMEN: Vessels responsible for providing own gangways at King's Lynn Harbour berths, where the Regulations require the Master or other person having the care of any ship or other craft to have a proper number of hands on board to attend moorings and to comply with all the requirements and directions of the Harbour Master or his Deputy or Assistants.

CONSULS: Vice-Consul for the Netherlands and German F.R. Vice-Consul for Sweden and Denmark.

REPAIRS: Limited facilities only available locally for hull and engine repairs.

AIRPORT: Charter flights from Cambridge and Norwich airports about 45 miles from King's Lynn. Regular flights from London (Heathrow) about 100 miles from King's Lynn.

POLICE/AMBULANCE/FIRE: In emergency dial 999 and ask for the service required. Normal service: Police – King's Lynn 61311; Ambulance – King's Lynn 3503 or 3910; Fire Service – King's Lynn 5163.

HOLIDAYS: Cargo work usually available at overtime rates on Saturday and Sundays and on all public holidays.

AUTHORITY: The King's Lynn Conservancy Board.

LARNE: 54.51 N. 05.48 W. (See Plan Book)

DOCUMENTS: See "Belfast".

PILOTAGE: Not compulsory, though private pilots operate who, when required, are engaged by ship's Agent. Pilots board off Fairway Buoy. Port VHF. Channels 16 and 14.

ANCHORAGES: Inner anchorage in Larne depth up to 5 fathoms. Anchorage outside Fairway Buoy exposed in N.E. winds.

MAX. SIZE: Draft dependent on berth but max. 19 ft. at MLWS, and 20 ft. at MLWN. Oil tankers proceed to Ballylumford Power Station which lies across Larne Lough directly opposite Larne Harbour.

Approach channel has depth of 30 ft. at MLWS and berth has 35 ft at MLWS.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Portpatrick.
TUGS: Not based at Larne, only heavy-duty motor launches suitable for small vessels. As a rule tugs are not required for vessels using Larne Harbour.
BERTHING: 1 berth equipped with two 5-ton cranes for grabbing and general cargo work. 2 berths are equipped with cranes of 32 and 35-ton capacity for handling containers. 4 berths are equipped with roll-on/roll-off ramps, capable of taking loads up to 160 tons and ships up to 70 ft. beam.
STEVEDORES: Larne Harbour Ltd. carry out all the stevedoring. 24 hours notice required for arrangements.
MEDICAL: No advance notice required for medical attention, a hospital being situated 1 mile from harbour. No special inoculations or certificates required.
TANKERS: 1 tanker berth in Larne Harbour. Depth alongside, 18 ft. below datum. Max. length of vessel 260 ft. Pipe diameter 6 in. Discharging only. For Ballylumford, see "Max. Size".
DENSITY: 1025.
FRESH WATER: Unlimited by shore hose. Rate 7 to 10 t.p.h.
FUEL: Fuelling carried out by road tanker. Arrangements to be made through ship's Agent.
GANGWAY/DECK WATCHMEN: Agents arrange watchmen.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCE: Agents arrange with Customs.
IDENTIFICATION CARDS: Not required.
CONSULS: Consuls in Belfast can be contacted through ship's Agent.
REPAIRS: Limited repairs by local firms. Major repairs by Belfast firms.
REPATRIATION: Possible.
AIRPORT: 20 miles. Regular flights.
HOLIDAYS: 12th and 13th July, Easter Monday and Tuesday, Christmas Day, Boxing Day and New Year's Day. No cargo worked on these days.
POLICE/FIRE/AMBULANCE: Dial 999 and ask for Emergency service required.
TELEPHONES: Only on Cross Channel vessels.
AUTHORITY: Larne Harbour Ltd.

LEITH: 55.59 N. 03.10 W. (See Plan Book)

DOCUMENTS:
1 Crew Declaration Form C.142 (Tobacco List).
1 Crew List.
1 Passenger List.
(Also see "Glasgow".)
PILOTAGE: Pilot station Firth of Forth located at Granton, boarding station Inchkeith Island. Contact with pilot cutters can be made on VHF Channels 16 and radio-telephone 2182.
ANCHORAGES: Good holding ground at Inchkeith Island and Leith roadstead depths 18.3–31.0 m. Request should be made to Forth Navigation Service.
RESTRICTIONS: None. Vessels can enter harbour day or night.
MAX. SIZE: Governed by draft of vessels. Max. permissible draft alongside in Imperial Dock 9.1 m. and in Western Harbour 9.6 m.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Forth, Stonehaven and Cullercoats Radio Stations.
RADAR/VHF: Port and Estuary radar service. VHF contact can be made with Leith Harbour Radio on Channels 16. Forth Navigation Service now in operation.
TUGS: Attend inward-bound vessels in Leith roads. Tug's towline available but not compulsory.
BERTHING: Vessels arriving on max. permissible drafts of 9.1 m. and 9.6 m. normally docked by Pilots 1.5 hours before high water.
STEVEDORES: ETA advices given by Master to ship's Agent and conveyed by them to stevedores.
MEDICAL: No advance notice of medical attention required. All hospital facilities available.
TANKERS: 1 tanker berth available – max. permissible draft 9.1 m. Discharge lines 6 in. and 8 in. No slop discharge facilities.
DENSITY: 1015.
FRESH WATER: Available alongside at all berths.
FUEL: All grades available subject to 24 hours notice in advance.
DEVELOPMENTS: None envisaged at present.
GANGWAY/DECK WATCHMEN: Usually supplied by ship but shore watchmen arrangeable by special agreement.
OPENING/CLOSING HATCHES: Custom of the port is that this work is normally carried out by ship's crew.
CERTIFICATES:
Ship's Register.
Load-line.
Safety Radio.
Safety Equipment.
Cargo Construction.
Deratisation Certificates.
Light Dues receipt.
CUSTOMS ALLOWANCE: Usual amounts allowed by Customs and Excise.
CARGO GEAR: No additional requirements necessary to comply fully with local safety regulations as all gear supplied by stevedores.
IDENTIFICATION CARDS: Not required.
CONSULS:
Foreign Consular Offices in Edinburgh and Leith:

REPAIRS: Facilities available to carry out all types of deck and engine repairs.
DRY DOCKS: Largest dry dock "Imperial", length 167.6 m. width of entrance 21.3 m. depth over blocks at 7.3 m. also 2 smaller dry docks.
REPATRIATION: All facilities available for effecting crew changes and repatriation by sea, air and rail.
AIRPORT: Edinburgh Airport served by regular airlines and located approx. 9 miles from Leith.
TIME: British Standard Time, GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Public holidays observed annually: 3rd Monday in April; 3rd Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd, and 3rd January. Cargo work can be arranged on public holidays except 1st and 2nd January.
POLICE/AMBULANCE/FIRE: Tel. 999 and ask for service required.
TELEPHONES: Can be arranged with GPO or VHF Channel 16 with Leith Harbour Radio.
SERVICES: Compass adjusting facilities available.
SHORE LEAVE: No restrictions.
DELAYS: Minimal delays in berthing, loading and discharging.
AUTHORITY: Forth Ports Authority.

LERWICK: 60.09 N. 01.08 W. (See Plan Book)

PORT LIMITS: All waters contained within the following boundaries including Dales Voe and Aith Voe.

Straight line drawn from the N.E. extremity of Hawks Ness (60° 13′ 27″ N., 1° 10′ 00″ W. approx.) in an E.S.E.'ly direction to the N.E. extremity of Green Holm and thence in a S.E.'ly direction to the N.E. extremity of Score Head in the island of Bressay. Thence in a W.'ly and S.'ly direction along the high Water Mark of all foreshores to Whinna Skerry (60° 07′ 45″ N., 1° 07′ 17″ W. approx.). Thence in a straight line in a W.'ly direction to the S. extremity of Ness of Sound. Thence along high water mark of all foreshores in a generally N.'ly direction to Hawks Ness.
DOCUMENTS: See "London".
PILOTAGE: *Pilot Office:* At foot of Victoria Pier in Harbour Master's office. Lat 60° 09′ N., Long. 1° 08′ W. Limits of Pilotage District similar to Port limits given above. Licenced Pilots always available on 24 hour service subject to following correct procedure given below.

Call Sign: Lerwick Harbour Radio.

Frequencies: Calling: VHF Channel 16. Working: VHF Channel 12. Pilot Cutter: VHF Channels 6, 11, 12 and 16.

Port Control: Fitted with VHF Channels 11, 12 and 16. Continuous watch is maintained 24 hours per day, 7 days per week on Channel 16 except when working vessels on Channel 12.

Procedure: The Port Control Office controls the movement of all vessels arriving or departing by either entrance and all movement within the harbour from public or private quays or supply bases, whether such vessels are under the control of Pilots or not.

(a) Vessels requiring pilotage should arrange with Agent not less than 24 hours before arrival. Vessels without Agent should contact Lerwick Harbour Master through Coast Radio Stations not less than 24 hours before arrival. Vessels leaving ports less than 24 hours steaming away should advise time of sailing, projected speed and ETA at time of leaving last Port. Vessels inward from Continental Shelf should advise time of leaving location, projected speed and ETA at time of leaving last location. Amended ETA's should be

advised 2 hours before the time given in the last transmitted ETA. VHF contact should be made with Lerwick Harbour Radio while still 1 hour away when final pilotage and berthing arrangements will be made. Port control cannot guarantee a Pilot on station unless 1 hour's notice is given.

(*b*) ETA messages should also contain information on which harbour entrance is to be used, draft and length overall. Vessels entering by the South entrance will be boarded West of Kirkabister Lighthouse or near Knab Point if weather conditions are unsuitable. Vessels entering by the North entrance will be boarded abeam of the Green Holm and 0.5 miles N.E. of Beosetter Holm. If boarding conditions in this area are unsuitable the South entrance must be used.

(*c*) Pilot Cutter m.v. *Bard* is a 60 ft. converted wooden MFV. Black hull with large, white letter "P" on each bow, white upperworks and varnished wheelhouse. International pilotage signals are in use.

(*d*) Outward vessels should call the Port Control 1 hour before departure when information on traffic movement will be given and arrangements for pilotage will be made. When moving within the harbour all vessels should maintain a continuous listening watch on Channel 16. All vessels moving within the harbour should report to the Port Control immediately prior to leaving the berth or anchorage, whether a Pilot is on board or not.

(*e*) Pilotage within Lerwick Harbour is compulsory, but all vessels not carrying passengers are exempt.

(*f*) Telephone number of Lerwick Harbour Master and Pilot station is Lerwick 3462.

ANCHORAGE: Ample anchorages in harbour roads.

MAX. SIZE: Vessels up to 20 ft. draft and 320 ft. long alongside berth as routine. Vessels of greater length and for draft may be accommodated alongside after discussion with Harbour Master. Anchorages available for any size of vessel subject to prior consultation with Harbour Master, if above 10,000 g.r.t. No mooring buoys available.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Nearest Coast Radio station 'Shetland Radio'' Frequency and other details as for "Wick Radio" except for VHF working Channel which is Channel 27.

"Lerwick Harbour Radio" see "Pilotage".

TUGS: No tugs available but Pilot cutter will give towage assistance within her capabilities.

BERTHING: Berths are available for the handling of most cargoes including Roll-on/Roll-off and arrangement should be made through Agents well in advance of arrival. No berths available for handling liquid chemicals. Mobile cranes available from Harbour Authority up to 30 tons capacity or through private operation to 110 tons capacity.

STEVEDORES: Arranged through Agent.

MEDICAL: Medical aid can be arranged through Agent or Coastguard at any time day or night.

COASTGUARD: Lookout on top of Knab Point manned 24 hours a day. Fitted with MF and VHF Radio Channels 16, 13, 10 and Zero.

TANKERS: BP Oil have their own discharging berth. Tankers are also able to discharge at various Offshore Oil Industry Supply berths

DENSITY: Density 1025 at all states of tide.

FRESH WATER: Available at most berths, 65 to 100 t.p.h. No water boat.

FUEL: Gas oil available on demand.

FIRE PRECAUTIONS: No-smoking regulations in operation inside all transit sheds. Usual tanker terminal regulations in operation. Handling of explosives covered by local Bye-Law.

GANGWAY/DECK WATCHMEN: Ships usually supply own watchmen. No fixed sum if shore watchman is employed.

OPENING/CLOSING HATCHES: Crew open hatches.

CUSTOMS ALLOWANCE: Tobacco, wine/spirits; at the discretion of the Customs and Excise.

IDENTIFICATION CARDS: Foreign seamen have to supply same if left behind, i.e. hospital, etc.

CONSULS:

Denmark	(Vice)	3057
Finland	(Vice)	3057
France	(Vice)	3057
W. Germany		2556
Iceland		4121
Netherlands	(Vice)	3057
Norway		3057
Sweden		2556

REPAIRS: Repairs to fishing vessels and other small craft in steel, wood and fibre glass. Also engine and machinery repairs. Comprehensive electronics repair facilities.

DRY DOCKS: No dry dock available, slip available to take small vessels up to 100 d.w.t.

REPATRIATION: Facilities exist.

AIRPORT: 25 miles to airport. 5 services per day operated by British Airways. Charter flights by Dan Air and other airlines.

HOLIDAYS: Scottish holidays. Working can be arranged on these days if so desired.

POLICE/AMBULANCE/FIRE: Emergency telephone 999 or call Port Control VHF Channel 16. Harbour Master and Port Control 3462 night or day.

TELEPHONE: Ships telephones can be arranged.

SERVICES: No tank-cleaning equipment. Compass adjuster can be procured if necessary.

SHORE LEAVE: No restrictions.

AUTHORITY: Lerwick Harbour Trust.

LIVERPOOL: 53.32 N. 03.19 W. (See Plan Book)

DOCUMENTS: Required on arrival, Crew List Form I.B.6 to be completed; this list to include all passengers and any British subjects who joined vessel outside of U.K. If any person falling into this category should be on board they must not leave until permission to land is granted by Immigration Officer.

Customs Form C.142, Declaration of goods obtained abroad or during a voyage, must be completed and signed by Master, and each crew member. Health Declaration must be completed. Above forms should be obtained from Pilot.

Manifest and Bills of Lading should be forwarded to vessel's Agent so as to be available before vessels arrival.

Ship's Papers Required:

Ship's Register.
Certificate for British Tonnage (if issued).
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
International Load-line Certificate.
Derating Exemption Certificate.

PILOTAGE: At least 48 hours before arrival, inward vessels should give ETA Lynas/Mersey Bar to Agent. Agent will then arrange docking and advise Pilot Office, the Master will receive radio message giving final docking instructions.

Pilot Stations. Vessels arriving from South should take Pilot on board at Point Lynas. Contact shore based pilot station on VHF Channel 9 for boarding instructions. Pilot will board from 40 ft. pilot launch.

Vessels arriving from North should take Pilot at Mersey Bar Pilot Station at entrance to the principle buoyed channel leading to the Mersey. Contact pilot boat on VHF Channels 16 or 12 for boarding instructions.

Description of Bar Pilot Boat. Black top sides with 2 in. yellow ribbon and white boot topping to water line. Yellow funnel with black top. The name "Liverpool Pilot" painted on each side.

In heavy weather if Master of the pilot boat considers it imprudent to send a launch to put a Pilot on board an incoming vessel, he will make the appropriate signals by VHF, morse or other means that effect.

Also see "VHF".

ANCHORAGE: In the event of berths not being readily available for vessels, normally they must wait at the Mersey Bar Anchorage which is in the open roadstead. There are river anchorages, but these are only usually for vessels about to enter the dock system.

RESTRICTIONS: No restrictions on night entry, except VLCC's, tidal restrictions depend on vessel's draft and to which berth vessel proceeding, larger vessels usually have to wait for high water.

MAX. SIZE: Tranmere: up to 48 ft. (14.6 m.) draft dependent on tide. Birkenhead: up to 29 ft. (8.8 m.) draft. Liverpool Docks: up to 40 ft. (12.2 m.) draft.

Seaforth Dock: 50 ft. (15.2 m.) of water depth, up to 75,000 d.w.t.

HEALTH: Maritime Declaration of Health Form must be completed and handed to Customs Officer or Port Health Officer, whoever first boards ship. This form is obtainable from Pilot. In event of any suspected disease or fever on board, or if ship has called during last 4 weeks at any port in Brazil, China, Indo-China, India, Pakistan, Burma, Colombia and the port of Dar-es-Salaam, West African ports between Lat. 20° North and 20° South, the Master should, prior to entering port, make radio contact with Liverpool Port Health Authority, via Anglesey Radio or Port Radar Station (Signal "Portelth Liverpool") giving them following information:

1. Name of Ship. 2. Date of departure from and name of last infected port. 3. Number, ages and sex of any cases of infectious diseases or other relevant information. 4. Expected time of arrival at Rock Light. Before reaching the Rock Light if medical clearance has not been obtained the following signal must be displayed: by day – fly the flag signal "Z W". By night – show red light over white light.

When medical clearance is obtained pratique will be issued at discretion of Customs Officer.

If there is no suspected disease on board and vessel has not called at any of the above ports listed, Master can radio for Free Pratique. Unless otherwise instructed, Customs Officer will again issue pratique.

Vessels arriving from another U.K. port do not require pratique or health clearance.

Also see "Health – All Ports" before first U.K. port.

RADIO: Portishead Radio, call sign: GKL; Landsend Radio, call sign: GDL; Wick Radio, call sign: GKR; but on approaching Liverpool, the local radio station is Anglesey Radio, call sign: GLV.

RADAR/VHF: Vessels should establish contact by VHF/RT with the Port Radar Station call sign "MERSEY RADIO" before sailing and inward bound when within VHF/RT range and not later than when in the vicinity of the Bar Lighted Buoy.

Harbour Radar: The Liverpool Port Radar Station is now situated at the N.W. corner of the Royal Seaforth Dock Lat. 53° 27′ 56″ N. Long. 03° 02′ 22″ W.

The radar coverage extends seaward over Liverpool Bay for a radius of 20 miles from the station and in the River Mersey as far south as the approaches to the Manchester Ship Canal.

Vessels entering or leaving the Port in conditions of low visibility can, on request, be supplied with continuous information of their position whilst navigating in the river or sea channels, providing such vessels can be identified.

A general situation and movement statement, giving all intended movements inwards and outwards for the Port of Liverpool, Eastham, Bromborough, Garston and Cammell Lairds and approximate times at the dock entrance or river berth, together with a list of Local Navigation warnings in force, latest weather reports and area forecast, is broadcast on Channel 9 at 3 hours before each high water. This full statement is repeated with any amendments and the disposition of the River Anchorages North and South at 2 hours before each high water.

Any local navigation warning is broadcast on receipt on Channel 12.

A full list of navigation warnings is broadcast on Channel 9 every 4 hours, commencing at 0000 hrs. No separate broadcast of this list is made during the period from 4 hours before high water to 1 hour before high water as such warnings are included in the General Situation and Movement Statement. An updated taped recording of the above General Situation and Movement Statement is broadcast on request on Channel 4.

Docking Instructions: The VHF/RT Stations at the Dock Entrances and Stages are provided to facilitate docking and berthing operations and to provide direct communication between the Dock Master or Stage Master and a vessel. The Range of these stations is limited to a distance of 6 to 8 miles.

Tug Communications: Channels 8 and 10 are reserved for tug communications and should not be used for any other purpose. Due to the heavy working of these Channels, especially at tide time, and in order to minimise interference, vessels and their tugs when communicating to one another on VHF/RT, should, when possible transmit on reduced power.

Large Vessels Swinging: Vessels of 150 m. or over in length intending to swing in the river should give advance notice of at least 10 minutes to Mersey Radio of their intentions so that Mersey Radio can broadcast on Channel 12 a swinging warning to all ships.

Port VHF Radio Telephone Communications System:

*Includes Liverpool Landing Stage.

Local Priority Messages: A vessel which has an urgent message to transmit to Mersey Radio concerning urgent navigation matters and which message should receive priority over normal Port Operations R/T Communications, should indicate the urgency of the message by prefixing the call sign of the Port Radar Station with the spoken word "PRIORITY" i.e. "PRIORITY MERSEY RADIO" repeated 3 times followed by normal procedure.

In special circumstances such as the launch of a vessel or in an emergency such as a wreck, it may be necessary temporarily to establish a patrol for the control of traffic. Vessels will be warned of the existence of any such patrol by "Mersey Radio" and any such patrol vessels or launches will maintain a listening watch on Channel 12 and communicate with other vessels on Channel 6.

R/T Procedure

Channels to be used for calling and for Preparatory Signals: Mersey Radio and ship stations will call on Channel 12. Channel 16 should only be used for distress, urgency or safety communications.

Channels for reply: Calls received on Channel 12 should be replied to on the same Channel, but if calls are received on Channel 16, replies should be made on this Channel.

Indication of the Channel to be used for radio telephone traffic: When communication has been established on Channel 12 between a ship and "Mersey Radio", the shore station will indicate the number of the Channel to be used for passing and receiving information if Channel 12 is busy.

Times: All times in messages should be given in local time, i.e. B.S.T. or G.M.T., using the 24 hour notation.

R/T Discipline: To ensure that the full advantage of efficient communication is achieved, strict telephone discipline and attention to procedure, particularly on the calling Channel is imperative. Channel 16 must only be used for establishing contact between ship and shore or ship and ship, and must not be used for the passing of messages except in cases of distress within Port limits. Channel 12 should be used for establishing contact between ship and shore or ship and ship.

Sequence of R/T communication for vessels entering the River Mersey: (i) Vessels wishing to communicate with the Liverpool Pilotage District Point Lynas Shore Station should call "Lynas Pilot" on Channel 9. Channel 16 shall only be used in case of difficulty in establishing initial contact.

(ii) Vessels wishing to communicate with the Bar Pilot Cutter should call the Pilot Cutter on Channel 16 and shift to Channel 6 for exchange of traffic. The Pilot Cutter also maintains watch on M/F R/T on 2182 KHz.

(iii) When within VHF R/T range and not later than when in the vicinity of the Bar Lighted Buoy the vessel should establish contact with Mersey Radio on Channel 12 and pass her arrival information on Channel 12 or other Channel indicated by Mersey Radio, watch should be kept on Channel 12 unless instructed to remain on another working Channel for Port Operational reasons. A vessel at anchor at the Bar anchorage should keep watch on Channel 16.

(iv) Vessels requiring radar information or assistance will be requested to shift to Channel 18 or 22, or if a tanker for Tranmere, Channel 19.

(v) Vessels should inform Mersey Radio when they are ceasing to keep a listening watch on Channel 12. If they are shifting to a tug or a dock entrance or Tranmere Oil Stage Channel they should inform Mersey Radio of such intention.

Vessels sailing from the River Mersey: Vessels, on sailing from any Stage or Dock, should establish contact with Mersey Radio on Channel 12 and then maintain watch on that Channel unless instructed to remain on another working Channel for Port Operational reasons. Vessels requiring radar information or assistance will be requested to work on Channel 18 or 22, or if a tanker from Tranmere, Channel 19.

TUGS: Join vessel after passing Rock Light. Normally use tug's lines but optional. Charge for tug's hawsers.

STEVEDORES: Earliest possible ETA to be given to arrange gangs.

MEDICAL: If doctor is required to attend immediately on arrival of vessel, prior notice will be required, but generally doctor is arranged for most convenient time after vessel's arrival. All seamen should be vaccinated against smallpox.

Hospitalisation is available, but seamen will only be admitted if immediate treatment is required. It is preferred for foreign seamen requiring hospital treatment to be repatriated, if able to travel.

Dentist available by appointment only.

BULK HANDLING FACILITIES: Seaforth Grain Terminal designed to accommodate up to 75,000 d.w.t. vessels, length 850 ft. Max. draft 42 ft. Discharge capacity up to 2,000 t.p.h. Two marine towers with storage for 100,000 tons.

The container terminal at Seaforth Dock provides four berths, each 900 ft. in length, max. draft 42 ft. Equipment includes five container cranes and 24 straddle carriers.

Four berths equipped for container handling provided on North side of Seaforth Dock. Each length 900 ft. depth 42 ft.

Bulk handling of sugar at North side, Huskisson Branch Dock No. 3. Two berths each equipped with four grab cranes delivering direct to conveyors.

Iron ore is handled at North Bidston Dock. This berth has a quay frontage of over 1,000 ft. and can accommodate vessels of 28.5 ft. draft. There are three transporters, each with an hourly free digging capacity of 350 tons which discharge either into road or rail vehicles via 175-ton hoppers, or into coasters or barges.

At Cavendish Quay there are two 20-ton cargo level luffing jib cranes with a grabbing capacity of 15 tons. Each crane is designed to handle up to 450 t.p.h. The loading of bulk materials into either road or rail wagons is speeded up by the use of two 100-ton capacity mobile weigh hoppers.

Duke Street Wharf also has specialised facilities for the handling of these commodities. There are four 7.5 ton electric level luffing cranes, each with a lifting speed of 250 ft. per minute. There is good road access to this berth where vessels drawing up to 28.5 ft. can be accommodated.

Packaged forest products are handled at two adjacent berths at Seaforth with a combined quay length of 1,400 ft. with a back-up area of 18 acres which includes approximately 15 acres for timber stacking with a timber-storage barn.

Meat is handled at the following berths: North 2 Alexandra and No. 2 Seaforth. Seaforth meat terminal, with an 800 ft. quay, can handle the largest refrigerated ships in commission.

There are 7 berths in the port with roll-on/roll-off facilities, namely South No. 3 Seaforth, S10, S6, the B+I Terminal, Princes Dock, Nelson Dock and North 3 Canada.

Birkenhead: East Tower grain berth can accommodate vessels up to 630 ft. length, max. draft 29 ft. 6 in.

Buchanans Mill, max. length 475 ft.* draft 28 ft. 6 in.; Ranks Mill, max. length 475 ft.* draft 28 ft. 6 in.; Spillers Mill, max. length 450 ft.* draft 28 ft. 6 in.

*Up to 500 ft. by special arrangement.

TANKERS: Oil tanker cleaning and slops discharging may be carried out at Rock Ferry Tanker Cleaning Jetty.

Tranmere South Stage – Capable of accommodating tankers up to 100,000 d.w.t., max. draft 40-48 ft. (12.20-14.60 m.), depending on height of tide.

Tranmere North Stage – Capable of accommodating tankers up to 275,000 d.w.t. after lightening to 140,000 tons, max. 48 ft. (14.60 m.) at high water.

Queen Elizabeth II Dock, Eastham – 4 berths – can take vessels of 28,000 tonnage dependent on height tide and vessels dimensions. (See "Manchester".)

DENSITY: River Mersey salt water. Docks approx. 1020.

FRESH WATER: Available at all berths, ex quay. No water barges available. Rate of delivery 15-20 t.p.h.

FUEL: Most major oil companies are represented and can supply range of fuels of various viscosities. Notice required depends on the berth at which vessel is lying as bunkers are supplied ex lighter at most berths. Notice required can vary depending on availability of barges, but generally at least three to four days notice is required.

FIRE PRECAUTIONS: Tankers may not carry out repairs whilst at discharging berth unless permission is obtained from Harbour Authorities. Fire precautions notice is placed on board by Harbour Authorities.

GANGWAY/DECK WATCHMEN: Watchmen not necessary but available if required.

OPENING/CLOSING HATCHES: Carried out by ship's crew for bulk cargoes and by stevedores for general cargoes.

CERTIFICATES:

Register/Certificate of Measurement.
Certificate of British Tonnage (if issued).
Safety Radio Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Load-line Certificate.
Derating Certificate.
Cargo Gear Test Certificates.

CUSTOMS ALLOWANCE: Crew members who remain on vessel during vessel's stay in port may be allowed, under certain conditions, to keep for their own use on board small quantities of any tobacco, spirits and other goods declared on Customs Form C.142. The amount allowed depends on the number of days the vessel is in port.

CARGO GEAR: Cargo Gear Certificates must be produced with the necessary up-to-date endorsement.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries have representatives in Liverpool:

Argentina
Belgium
Bolivia
Brazil
Chile
Colombia
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany
Greece
Haiti
Iceland
Italy
Japan
Liberia
Netherlands
Norway
Panama
Paraguay
Peru
Philippines
Portugal
Spain
Sweden
Thailand
Uruguay
U.S.A.
Venezuela

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Largest – length 950 ft.×140 ft. Also 15 smaller dry docks.

REPATRIATION: Can be effected, but must be arranged through Agent, so that Immigration Clearance can be arranged.

AIRPORT: City Centre to Airport approximately 7 miles, regular service to London for international connections.

TIME: British Standard Time, which is one hour in advance of Greenwich Mean Time, reverting to GMT in Winter months.

HOLIDAYS: Good Friday; Easter Monday (alterable); last Monday in May; last Monday in August or first Monday in September, whichever may be closest to August 31st. December 25th-26th and New Years Day. Weekly holidays Saturday, Sunday. Cargo can be worked on official holidays, other than 25th-26th December, also arrangements can be made for cargo to be worked on Sundays.

POLICE/AMBULANCE/FIRE: Telephone 999, ask for service required.

TELEPHONES: A temporary telephone can be placed on board a vessel, at most berths, whilst in port.

SERVICES: Tanker cleaning and slops services at Rock Ferry Tanker Cleaning Berth. Compass adjusting, D.F. Calibration can be arranged.

SHORE LEAVE: All bona fide crew members may be granted temporary shore leave during the vessel's stay in port, on condition that they leave in the same ship. This permission does not apply to any alien member of the crew who is refused leave to land by an Immigration Officer, or to whom an Immigration Officer has given notice prohibiting him from landing without leave.

AUTHORITY: Mersey Docks and Harbour Company.

AGENT: Lambert Brothers (Ship Agencies) Ltd., Peel House, 5 Harrington Street, Liverpool, L2 9UG. Tel. 051-236 7206. Telex: 629510. Cables "Lambert Liverpool".

LONDON and Thames District: 51.30 N. 0.05 W.

(See Plan Book)

PORT LIMITS: The seaward limit means lines drawn from 51° 37′ 00″ N. 00° 57′ 19″ E. (Foulness Point in the county of Essex) to 51° 46′ 05″ N. 01° 20′ 32″ E. (Gunfleet old Lighthouse) and thence to 51° 26′ 36″ N. 01° 25′ 30″ E. and thence to 51° 24′ 55″ N. 00° 54′ 21″ E. (Warden Point in the county of Kent).

An arrived ship is considered (subject to Charter Party terms) to have arrived when vessel is instructed to anchor at a designated anchorage, as ordered by the Port Authority, if berth where vessel's operations are to be carried out is not available. Otherwise when vessel is alongside. Usual anchorage for larger vessels is below Southend, which is allocated to vessels by the Port Authority.

DOCUMENTS:

1 copy of HM Customs and Excise form C.142 to be completed showing each crew members declaration as to the amount of cigarettes, tobacco, spirits, wine, radios, lighters, etc., belonging to them on board the ship to enable Customs to ascertain if in conformity or excess of requirements.
1 copy of HM Immigration Office (pink form) showing Master's declaration of crew members on board.
1 copy of List of Passengers on board, showing names, place of joining vessel, passport details.
Ship's Register to be available for inspection on arrival.
List of space occupied by cargo in unregistered space.
Chief Engineer's declaration as to the quantity of fuel carried in double bottom tanks.
Details of any livestock on board.
Ship's Stores declaration arrival Form C14 to be completed.
Details of previous ports of call.

PILOTAGE: Pilotage by licensed Pilots in London pilotage district is compulsory unless previous exemption is granted.

Vessels approaching from South enter the pilotage area off Folkestone Harbour position (Lat. 51° 04′ 37″ N. Long. 01° 11′ 21″ E.).

Vessels approaching from the North collect the Pilot at Sunk Pilot Cutter which operates in the vicinity of the Sunk Light Vessel off Harwich. Also see "Harwich".

Radio Communication – General: The maximum range for radio messages is about 20 miles for VHF. The shore Pilot stations and shore based fast launches operate on VHF only.

Attempts to establish communication at extreme ranges cause much unnecessary interference. The first estimated time of arrival should be sent through a Post Office Coast Station giving at least 1 hours' notice of the ETA. Anything less than 1 hour's notice *must* involve ships in delay. The maximum range for MF radio messages is about 50 miles.

Ships should if possible remain in direct contact with the pilot launch or pilot vessel on their approach, as this facilitates shipping the Pilot.

FOLKESTONE PILOT STATION

Pilot launches, with black hulls and white wheelhouses and flying the pilot flag, operate from a shore station at Folkestone to provide Pilots for ships making the port of London and other ports in the London Pilotage District and to disembark Pilots from outwardbound ships. The conspicuous building is 77 ft. high and flies a pilot flag by day; by night it displays an illuminated sign with the word "Pilots". The launches normally ship and land Pilots in a position 225° distant 1 mile from Folkestone Pier Light in fine weather but farther off in bad weather.

A shore VHF station is maintained at Folkestone (Lat. 51° 04′ 37″ N. Long. 01° 11′ 26″ E.), and all requests to ship and land Pilots off Folkestone should be made to it.

Ships requiring a Pilot at the Folkestone Station should give the shore station, 12 hours in advance and through a Post Office Coast Station, their estimated time of arrival, gross tonnage, maximum draft and port of destination. Any adjustment to this time should be given at least 2 hours before arrival. The message should be addressed to "Pilots Folkestone".

The following Channels are in use by Folkestone Shore VHF station (call sign "Folkestone Pilots Radio"):

Channel 16 (Calling): A 24 hour listening watch is kept on this Channel, and ships should make contact on it.

Channel 9 (Working): After initial contact has been made on Channel 16, a transfer should be made to Channel 9 for the exchange of operational messages. It is stressed that the shore station has no other working frequency and that ships wishing to communicate with it must have Channel 9 fitted.

Masters of ships approaching Folkestone are advised to maintain a listening watch on Channel 16 so that they can receive any messages for their ships from the Pilot station.

Masters are warned that it is difficult to receive VHF signals from Folkestone when their ships are to the Westward of Dungeness owing to the presence of very large buildings.

The station is manned by a duty Pilot and is equipped with telex, telephone, radar and a daylight signalling lamp. The communications details are:

Tel. Folkestone (code 0303) 56766.
Telex 96381, Pilots Folkestn.
Telegraphic address "Pilots Folkestone".

Ships without VHF should send any amendment of their ETA in sufficient time to allow its delivery through the Post Office telex network. Ships without VHF should also establish their identity by visual means during their final approach.

If requested Folkestone Station Pilots may also be embarked off

Brixham 1.5 miles N.E. of Berry Head in position 50° 24′ N., 3° 27′ W., or off Cherbourg at buoy CH I in position 49° 43′ N. 1° 40′ W. 24 hours notice is required by Folkestone Pilot Station for picking up at Brixham, and 36 hours for Cherbourg.

Should a deep drafted vessel not wish to approach too closely to the Folkestone pilot station, then the pilot cutter will meet this vessel 1 mile to the South-east of the East Road port red can lighted buoy, Gp fl. 4 red every 15 seconds, which is moored about 4.75 miles North-eastwards of Dungeness in position 50° 58′ 18″ N., 01° 03′ 48″ E.

N.E. SPIT.

Ships bound to or from ports between Amsterdam and Dieppe inclusive may land or ship their Pilots by means of a pilot launch which operates as required, but does not cruise, in the vicinity of the N.E. Spit Buoy, but it is emphasised that ships from beyond these 2 ports or bound to ports beyond them are required to ship or land their Pilots at the Sunk or Folkestone Pilot stations.

A shore VHF station operates from North Foreland Lighthouse (51° 22′ 27″ N., 01° 26′ 49″ E.) which is linked by land-line to the Pilot station at Folkestone. The call sign is "North East Spit Pilots Radio" and the only Channel available is Channel 9. A 24-hour listening watch is kept on this Channel.

Advance notification of ships requiring services of a Pilot at the N.E. Spit should be given 6 hours beforehand through a Post Office Coast Station, addressed "Pilots Folkestone", or by telephone to Folkestone (code 0303) 56766 or telex 96381.

"North East Spit Pilots Radio" should then be contacted when within VHF range.

Communication with North East Spit pilot launch may be made on Channel 9 VHF. A ship about to ship or land her Pilot should keep in radio contact with the pilot launch.

Ships without VHF should send their ETA or any subsequent amendment in sufficient time to allow its delivery through the Post Office telex network.

The N.E. Spit Pilot will board vessels between the "Elbow Bury" and the "East Margate Buoy", depending on weather, from a fast launch which is based in Ramsgate Harbour.

RIVER MEDWAY

Messages for the Medway Pilots may be passed through the launches of the Medway Ports Authority, call sign "Medway Patrol". They keep a continuous watch on 2,182 kHz.

Ships bound for the River Medway are requested to call on 2,182 kHz., when 20 to 30 miles from Sheerness, stating their estimated time of arrival, requirements and draft. When contact has been made on 2,182 kHz ships should transfer to 2,241, 2,246 or 2,301 kHz or other licensed intership frequency for passing messages. Ships may also call the Medway Port Operations Service, call sign Medway Radio, when within 20 miles of Sheerness, on VHF Channel 16, transferring to Channel 14 for passing messages.

Sea Pilot leaves vessel at Gravesend when River Pilot boards for final river passage.

PROCEDURE FOR OBTAINING THE SERVICES OF A LICENSED TRINITY HOUSE CHANNEL PILOT.

Ships outward bound from above Gravesend: Masters are requested to give advance notice of estimated time of arrival at Gravesend. Masters of ships fitted with VHF may pass this information direct to Gravesend Radio on the appropriate Port Operations Channel.

Channel Pilots for outward-bound ships are obtainable only from the Royal Terrace Pier, Gravesend, from where they board ships by means of black-painted pilot vessels flying the pilot flag, in response to the statutory signals or a VHF message to Gravesend Radio. In thick or foggy weather 1 prolonged blast followed by 4 short blasts should be sounded by means of a whistle or fog horn or a VHF message should be sent to Gravesend Radio.

In addition to the above, the following signals should be displayed:

Ship's gross registered tonnage	*By day* *International* *Code pendant*	*by night* *White lights*
Not exceeding 2,000	—	1 over the starboard bow
Exceeding 2,000 but not exceeding 6,000	3	1 over the bridge
Exceeding 6,000 but not exceeding 12,000	2	1 over the starboard bow and 1 over the bridge
Exceeding 12,000	1	1 over the starboard bow

Ships outward bound from below Gravesend or shifting between the Nore or Sheerness and Gravesend: When the services of a Channel Pilot are required for shifting a ship inwards between the Nore and Sheerness and Gravesend, or for conducting a ship outwards from below Gravesend, a telephone message should be sent to the Channel Pilots, tel. Gravesend (0474) 3619, stating Name of ship. Time and place at which Pilot is required to join ship. Where bound, Ship's gross tonnage. Ship's draft.

It is particularly stressed that the Pilot must be given adequate time to travel from Gravesend to the ship for her time of sailing, and that allowance must be made for the slowness of night travel and the inaccessibility of some wharves and moorings.

PROCEDURE FOR OBTAINING THE SERVICES OF A LICENSED TRINITY HOUSE RIVER THAMES PILOT.

Duty Pilot: A Trinity House River Thames Duty Pilot is available in the Information Room at the Gravesend pilot station. He can be contacted by telex (Pilot Gravesend 96444) or by telephone Gravesend (0474) 67716/7. Among his duties is the provision of information to Shipowners and Agents, and the Duty Pilot will be pleased to give advice and guidance on the pilotage of ships in the River. The Duty Pilot is in continuous touch with the Duty Officer of the Thames Navigation Service.

Ships outward bound or shifting: When the services of a Trinity House River Thames Pilot are required for piloting a ship down river to Gravesend, or for shifting a ship in the river above Gravesend, a telex message should be sent to Pilot Gravesend 96444. If the message cannot be passed by telex the same information should be given by telephoning Gravesend (0474) 67716/7.

The telex message must start with the word "Pilot" to show that it is an order for a Pilot, and to be consistent with other information now received at the Pilot station by telex, should be in the following form:

1. *Order for Pilot.* The word "Pilot" should be used to show that it is an order for a Trinity House Pilot rather than general information on expected movement. This should be on a separate line from the other information.
2. *Time Pilot required.* This should be expressed as a time on the 24-hour clock followed by a date, e.g. 1035/15 or 2215/16.
3. *Ship's Name.*
4. *Draft.* This should be given in feet.
5. *Berth where lying.* If a shift is required the shift should be shown as "FM Smiths WHF to Jones WHF". If one location is given this is the place where the ship is lying and where the Pilot is required. The abbreviation FM (From) should precede the place where the ship is lying in all messages.
6. *Route or where is bound.* This should state N., S., or E. to show where ship is bound, i.e. N. for ships outward bound to the North, S. for ships outward bound to the South, and E. for ships outward bound to near continental ports between Amsterdam and Dieppe. If an outward Channel pilot is required the letter P should be added so that it reads NP, SP or EP.
7. *Name of Owner or Agent.*

The message should start with the heading of "Pilot" and should continue as follows:

Time	*Ship*	*Draft*	*Berth*	*Route*	*Agent*
2030/15	*Tasman*	13	FM Robinsons WHF	S	E. Wright
0010/16	*British Isles*	18.5	FM Hightown Tier	NP	Despatch Co.
0830/17	*Nicola*	14	FM Black Bys to Spring WHF		Noel S.S. Co.

It is particularly stressed that the Pilot must be given adequate time to travel from Gravesend to the ship for her time of sailing, and that allowance must be made for the slowness of night travel and the inaccessibility of some wharves and moorings. Normally a minimum of 3 hours is required.

Inward bound ships: It is most important that all inward bound ships notify their estimated time of arrival at Gravesend and keep this information up to date. An estimated time of arrival should be given by using the Post Office public correspondence service through North Foreland Radio at least 3 hours before arrival at Gravesend and preferably immediately after the embarkation of the Sea Pilot. When in VHF range this information may be passed direct to Gravesend Radio on the appropriate port operations channel. In addition the following supplementary information should be communicated: draft, and, if known, berth and name of Agents.

Trinity House River Thames Pilots for inward-bound ships are obtainable only from the Royal Terrace Pier, Gravesend, from where they board ships, by means of black-painted pilot vessels flying the pilot flag, in response to the statutory signals or a VHF message to Gravesend Radio. In thick or foggy weather the letter "G" in Morse code should be sounded by means of a whistle or fog horn or a VHF message should be sent to Gravesend Radio.

Table of Abbreviations: Abbreviations used in this notice are: FM=From. WHF=Wharf. N=The route of an outward ship is to the North. S=The route of an outward ship is to the South. E=The route of an outward ship is to near continental port between Amsterdam and Dieppe. NP=The route of an outward ship is to the North and she requires a Channel Pilot. SP=The route of an outward ship is to the South and she requires a Channel Pilot. EP=The route of an outward ship is to the East and she requires a Channel Pilot. Bys=Buoys.

Pilot Ladders: Instances of the use of unsatisfactory and unsafe pilot ladders continue to be reported by Trinity House Pilots.

Faulty ladders endanger the lives of Pilots.

Instructions have been issued to all Trinity House Pilots to report immediately any pilot ladders which do not comply strictly with the provisions of the Merchant Shipping (Pilot Ladders) Rules 1965, the Merchant Shipping (Pilot Ladders) (Amendment) Rules 1971 and the Merchant Shipping (Pilot Ladders) (Amendment) Rules 1972.

Masters of ships are reminded of their obligation to comply with the statutory rules and are requested also to comply with the following Trinity House recommendations, ensuring that:

1. The Officer responsible for the embarkation and disembarkation of the Pilot is a Watch-keeping Deck Officer.
2. The ladder is in one length and does not consist of two or more lengths shackled or lashed together.
3. The ladder is secure.
4. The ladder is used solely for embarking and disembarking Pilots.
5. A light is provided so that the pilot ladder overside and also the position where the Pilot boards the ship is adequately lit.

6. The ladder is clean and free from oil and grease.

7. Means are provided to enable the Pilot to pass safely and conveniently from the head of the ladder into the ship or on to the ship's deck. Where portable stanchions and accompanying bulwark step ladders are used for this purpose, the portable stanchions *must* be rigidly secured to the ship's structure against being unshipped and supported at not less than 2 points to prevent lateral movement, and the bulwark step ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow firm grip. *Under no circumstances should a stanchion or handrail be attached to the bulwark step ladder.*

8. The ladder is in good condition and its treads remain horizontal. The treads are to have a rough upper surface.

9. The length of the ladder does not exceed 30 ft. Whenever the distance from sea level to a point of access to the ship is more than 30 ft., access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

10. The ladder is rigged so that each step rests firmly against the ship's side.

11. Spreaders are provided not more than 10 ft. apart to prevent the ladder twisting.

12. 2 manropes and a safety line are provided; and a lifebuoy with self-igniting light is available.

13. The ladder is rigged well clear of discharges and water outlets, and at a place where most lee can be given to the Pilot Vessel.

14. Where a pilot hoist is used a ladder must be at hand ready for use in case the hoist fails.

The Masters of small, "all-aft" ships, in which the main deck is frequently awash when a Pilot is being shipped or landed, or of any type of ship in which the bulwark rails are below the deck of the pilot vessel coming alongside, are asked to provide a boarding platform on each side of the forward end of the raised quarter deck and on the same level as that deck.

The platform should be easily accessible from the quarter deck and should have adequate handrails, those on the outboard side being portable. Fittings should also be provided for the rigging of a pilot ladder. When a pilot ladder is rigged from a boarding platform the top rung of the ladder should be not less than 12 in. nor more than 15 in. below the level of the platform. The top of the ladder should be secured at least 3 ft. 6 in. above the platform in such a way as to make a safe handhold for the Pilot entering or leaving the platform.

If a pilot ladder is unsafe a Pilot may refuse to board, thus delaying the ship. If the ladder is unsatisfactory for boarding the Master of that ship renders himself liable to a fine of double the amount of the pilotage dues involved, for failure to comply with the pilotage act 1913; and if the ladder does not meet the statutory requirements, the Master renders himself liable to a fine not exceeding £50 in accordance with the Merchant Shipping Act 1894.

RESTRICTIONS: Certain restrictions are placed on the navigation of vessels carrying petroleum, chemicals, explosives and other hazardous commodities.

Vessels which are carrying any of the above mentioned cargoes should call Gravesend for details of these restrictions and ascertain whether it is permitted for them to navigate.

Notwithstanding any of the aforementioned restrictions, all vessels should comply with the "General Directions for Navigation in the Port of London 1975". (Copies obtained from the Director of Marine Operations, Port of London Authority, Thames House, Gallions Entrance, London, E.16.).

The tides at London Bridge have a range of 4.6 m. at mean neeps and 6.6 m. at mean springs.

The sea approach to Shellhaven is dredged to allow the passage of vessels to 13.7 m. at mean neap tides. The depth to Gravesend Reach is about 7.9 to 8.1 m. below LAT.

THAMES NAVIGATION SERVICE:

Traffic Co-ordination Centre, Gravesend: This centre programmes all movements within the port, including the docks. All information required by the Authority regarding ETA, ETD, etc., should be passed through this centre. Also deals with all matters concerning provision of tugs in docks, floating derricks, dummy pontoons, or other services for vessels in dock, moorings in the river and any enquiry reference bye-laws, regulations, etc.

Gravesend Radio: VHF R/T Channel 16, Working Channels 12 and 20.

Radar coverage – Erith to Tongue Anchorage. Information supplied on request.

All vessels to report to this station on entering the port or before leaving the berth and whilst manoeuvring in the River. Also report position at stated intervals at points laid down in Notice to Mariners.

Tidal heights – Tilbury to Estuary given on request and included in navigation broadcast given every 30 minutes on the hour and half-hour.

Warden Point Radar: VHF and radar coverage for Thames Estuary from Southend to outer limits. Channels 12, 16 and 18 on direction from Gravesend.

Gallions Radio: VHF Channel 16; Working Channels 14 and 22; coverage of Gallions Reach. All vessels entering the area above Crayfordness leaving the berth, manoeuvring and whilst on passage, report to this station.

Navigation broadcast given every 30 minutes at 15 and 45 minutes past the hour.

Receives advance warning of intention to pass through Thames Flood Barrier Diversionary Channel (see below).

Tidal heights at Royals given on request.

Barrier Control: VHF Channel 22. Radar coverage Woolwich Reach; Blackwall Reach to Fords (proposed). This station is situated adjacent to the Thames Barrier on the south side of Woolwich Reach. It exercises traffic control over ALL vessels and craft wishing to proceed through the Barrier Control Zone which extends from Margaretness to Blackwall Point. All vessels intending to navigate through the northern diversionary channel must pass their ETA's to Gallions Radio on VHF Channel 14 when:

(a) Passing Crayfordness Point inward bound.

(b) On leaving a berth which lies between Crayfordness Point and Margaretness Point inward bound.

(c) When clearing Tower Bridge outward bound.

(d) On leaving a berth or lock between Tower Bridge and Blackwall Point outward bound.

For full details regarding traffic control in the Thames Barrier Control Zone see Notice to Mariners No. 5 of 1978. Vessels wishing to leave from a berth within the Barrier Control Zone should first obtain permission to proceed.

Patrol Service: 24-hour patrol by launches fitted VHF Channels 16, 14, 12, 6 and radar. Can be contacted through Gravesend or Gallions Radio.

Liaison is maintained through the Thames Navigation Service with Owners, Agents, Pilots, Watermen and all emergency services.

For help, advice, assistance or any matter affecting ships and shipping, contact: Thames Navigation Service:

Traffic Co-ordinator	Gravesend 60311
Duty Officer	Gravesend 68111
Duty Officer, Gallions	01-476-7801

ANCHORAGES: Great Nore and Little Nore anchorages allocated by Medway Port Operations, all other anchorages allocated by the Thames Navigation Service dependent upon the size and draft of vessel, the length of stay required at the anchorage and the specific details of the vessel, i.e. explosives, petroleum, etc.

MAX. SIZE: Tankers:

Berth	*Depth at low water*	*Size-length*
Coryton	14.0 m. maximum	1,100 ft.
Shellhaven	14.6 m. maximum	1,200 ft.
Holehaven	11.2 m. maximum	720 ft.
Purfleet	8.6 – 11.2 m. maximum	700 ft.
Grays	11.2 m. maximum	620-750 ft.

Other river and tanker berths restrictions apply according to tides and berth.

Deep-draft tankers for berthing at Shellhaven is sometimes over a period of 2 tides. Passage on the 1st tide to deep water anchorage, vessel to leave anchorage on make of 2nd tide and arrive off the installation half an hour before high water of this tide.

HEALTH: No automatic pratique, or radio pratique given. The London Maritime Declaration of Health Form which is normally handed to the ship by the Pilot boarding vessel is to be completed and strictly complied to. Any doubts can be clarified by VHF to Thames Navigation, Gravesend, who will connect to the Port Doctor, or to "Northforeland Radio". Pratique is issued by the Customs at the berth after health requirements adhered to, and must be retained on board or if doctor boards at Gravesend.

Also see "Health – All Ports" before first U.K. port.

RADIO: Outside UK waters from the South call long range station "Portishead Radio"; approaching London, "Niton Radio" or Northforeland Radio giving Agents draft and ETA.

TUGS: Tugs usually pick up vessels for Shellhaven and Holehaven in reaches approaching berth, or Gravesend for berths/docks up river. Tug lines can be hired to ships.

BERTHING:

Cargo Berths: The Port of London Authority operate the three enclosed dock systems:–

India & Millwall Docks
Royal Docks
Tilbury Docks (Essex)

Facilities for general cargo handling, Roll-on/Roll-off and container handling can be provided in each dock system according to specific requirements. In particular the PLA operate deepwater, common user container, forest products and Roll-on/Roll-off facilities at Tilbury Docks.

The Tilbury riverside grain terminal is capable of handling vessels up to 83,000 tonnes. Enquiries for services should be made to:

The Co-ordinator of Marketing & Operations,
North Side, Royal Victoria Dock, London E16.

In addition tenants provide facilities within Tilbury Dock as follows:–

Containers Lo/Lo: Northfleet Hope Container Terminal – Tilbury Container Services.

Forest Products: Canadian Transport Terminals Ltd. – No. 42 Berth.

Forest Products: Seaboard Pioneer Terminal Ltd. – No. 46 Berth.

Forest Products/Ro-Ro: Svenska Terminal in London Ltd. – No. 44 Berth.

Container/Ro-Ro: Brostrom Cargo UK Ltd. – Nos. 25/26 Berth.

General Cargo/Container/Ro-Ro: West Africa Terminal Ltd.

Depths of water available upon request.

River Cargo Berths: Privately operated ships handling facilities are provided on the riverside as follows:

Victoria Deep Water Terminal.

BRIDGES: No bridges below Tower Bridge which opens for shipping on request.

STEVEDORES: Ordered by the Agents; no ETA to stevedores from vessel necessary; labour to be ordered by 1200 hrs. day before required.

MEDICAL: Not necessary to contact Agents once port health requirements satisfied unless urgent medical treatment required on board on arrival. All medical treatment, vaccinations available.

DENSITY: Varies according to position and tides.

FRESH WATER: Available at all berths either from shore or barge.

FUEL: All types, grades available by barge, or from terminals.

FIRE PRECAUTIONS: Tankers – no smoking on open decks, only cabins. Deck fire hoses to be connected. Explosive workings at Chapman anchorage, same precautions. Red flag to be flown by these vessels. Fire tug to be in attendance when explosives being worked. Smoking not permitted in the docks or berths.

GANGWAY/DECK WATCHMEN: Available but not compulsory, Master's discretion.

OPENING/CLOSING HATCHES: Liner vessels by crew, with stevedore assistance. Tramp vessels according to charter party.

CUSTOMS ALLOWANCE: Customs usually permit 200 cigarettes or 0.25 lb. tobacco per person on board for 4 days. They can refuse to issue duty free or amount allowed at their discretion. Usually permit 1.3 pints or 1 bottle spirits per person for 4 days. They can issue less or refuse to allow as duty free at their discretion.

CERTIFICATES: These certificates to be on board.

- Ship's Register.
- Load Line.
- Safety Radio.
- Safety Equipment.
- Safety Construction.
- Derat. Exemption.
- Previous U.K. Light Due Bills.
- Cargo Gear and Chain Register complying to U.K. Factory Acts.
- British Tonnage Certificate if available.

CARGO GEAR: To comply with U.K. Factory Acts, valid chain and Cargo Gear Register to be on board. Stevedores usually supply cargo slings, etc.

IDENTIFICATION CARDS: Seamen's identity book required to be retained on board in port.

CONSULS: All British Commonwealth countries are represented in London by a High Commissioner's Office.

Most foreign countries maintain embassies or a consular representative in London.

REPAIRS: All repairs, gas freeing possible; pre-advice recommended.

DRY DOCKS: Largest dry docks at Tilbury, 752 ft. length, 133 ft. breadth; King George Docks, 750 ft. length 128 ft. breadth. There are smaller dry docks available.

REPATRIATIONS: All facilities exist for changing crews, repatriations.

AIRPORTS: All flights serve London Airport, about 18 miles from centre of London. Gatwick and Southend Airports serve local and Continental services also.

TIME: British Standard Time which is 1 hour in advance of GMT. GMT during Winter months.

HOLIDAYS: No work is available on official holidays usually. Official Days: 1st January; Good Friday; Easter Monday; Whit. Monday; August Monday; Christmas Day; Boxing Day. Some weekend work is possible at certain berths only, at overtime rates.

POLICE/AMBULANCE/FIRE: Contact by telephone; dial 999 and ask for service needed.

TELEPHONES: Ship to shore connections available at most berths.

SERVICES: All types of service for navigational aids, radar, compass adjusting, nautical instruments repaired, slop discharge barges available. Tank-cleaning, gas-freeing services available.

SHORE LEAVE: Crew members allowed ashore but must rejoin on sailing.

REGULATIONS: No livestock allowed ashore without permission Customs and Port Health Authorities.

AUTHORITY: Port of London Authority.

AGENT: Lambert Brothers Ship Agencies Limited, 193-207 High Road, Ilford, Essex. Telegrams: "Lambert Ilford" and "Lambert London EC3". Telex: 897147 and 897435. Tel.: 01 553-3311.

LONDONDERRY (incl. Moville): 55.00 N. 07.20 W.

(See Plan Book)

The main port of Londonderry is situated about 21 miles from the sea on the River Foyle.

PORT LIMITS: Extend from Lifford Bridge to a line drawn from Greencastle Fort in the County of Donegal to the Tower on Magilligan Point in the City and County of Londonderry.

DOCUMENTS: For Londonderry see "Belfast". For Moville see "Dublin".

Since the Port of Londonderry falls within the Republic of Ireland and the United Kingdom, both Governments are concerned in regard to Customs documents. Moville, which is situated down river from Londonderry, is located in the Republic of Ireland and is the anchorage where deep-sea vessels lie prior to proceeding to Londonderry. Should vessels discharge cargo or load cargo at this anchorage, Irish documents are required. The port is under the control of the Londonderry Port and Harbour Commissioners who are recognised by both Governments.

PILOTAGE: The Londonderry Port and Harbour Commissioners are the Pilotage Authority for the Londonderry Pilotage District. For information regarding pilotage application should be made to The Secretary, Harbour Office, Londonderry, Northern Ireland.

Pilotage is compulsory, vessels taking the Pilot at the Foyle Buoy or Fairway Buoy, about 2.5 miles N.E. from Dunagree Point, Innisshowen Head.

The Pilot station is located at Carrickarory Pier, Moville, 55° 10' 57" N.; 07° 03' 27" W.

Deep-sea vessels usually take Pilot 2 hours before High water time Londonderry, so as to arrive at Londonderry on the top of High Water.

Pilotage service may be obtained in response to following signals:

Inward-bound vessels: By day. 1. The International Code Signal G; 2. The International Code Signal P.T.; 3. The Pilot Jack hoisted at the fore; 4. By daylight signalling lamp to the pilot station. If required after hours telephone Pilot Station direct. Tel. Moville 92.

By night. 1. The pyrotechnic light, commonly known as a blue light; 2. A bright white light flashed or shown at short or frequent intervals just above the bulwarks for about a minute at a time; 3. The International Code Signal P.T. by flashing; 4. By signalling lamp to the Pilot Station.

By day or night. 1. By VHF (FM) radiotelephony to the pilot station at Carrickarory Pier. 2. By VHF (FM) radiotelephony to the pilot launch "Foyle Leader."

In poor visibility. By sounding the letter G in Morse Code on the steam whistle or siren.

As visibility to seaward from Carrickarory Pier is restricted it is important that Owners, Masters or Agents notify the Harbour Master (tel. Londonderry 63680) or outside Office hours the Pilot station (tel. Moville 92) of the name of vessel; estimated time of arrival at the Fairway Buoy; draft of water of the vessel. It is also important that VHF (FM) communication be established with pilot station or pilot launch "Foyle Leader" as early as possible before arrival in Lough Foyle. Call signs, frequencies and procedure are as follows:

VHF (FM) Communications:

1. Pilot Station at Carrickarory Pier, Moville: Call sign "Foyle Pilots". Equipment VHF (FM) R/T single frequency working. A continuous listening watch is kept on Channel 16 (156.80 mc/s.) except when pilot launch is operating, when watch is transferred to the launch. When communication has been established on Channel 16 (calling and safety channel) operators should switch to Channel 12 (156.60 mc/s.)

2. Pilot launch: Name of vessel "Foyle leader". Call sign MIBC Equipment VHF (FM) R/T single frequency working. When launch is operating a listening watch is kept on Channel 16 (158.80 mc/s.). When communication has been established on Channel 16 (calling and safety channel) operators should switch to Channel 6 (156.30 mc/s.).

3. Harbour Office, Londonderry: Call sign "Harbour Office" Equipment VHF (FM) R/T single frequency working. All vessels fitted with VHF (FM) R/T while navigating in the river or at anchor in Moville Bay should keep a listening watch on Channel 16 (156.80 mc/s.). When communication has been established on Channel 16 (calling and safety channel) Operators should switch to Channel 12 (156.60 mc/s.).

Messages must be restricted to those related to the movement of vessels and safety of vessels and persons. Messages of any other nature and messages of a personal character cannot be accepted.

Outward-bound vessels and vessels shifting:

When the services of a Pilot are required for an outward-bound vessel or for shifting a vessel, 2 hours notification should be given to Harbour Master (tel. Londonderry 63680) during office hours, of name of vessel; time of departure; draft of water of vessel; where bound. Early notification should be given to enable Pilot to board vessel in good time.

ANCHORAGES: The only anchorage at Londonderry is located at Moville.

MAX. SIZE: For vessels using main port of Londonderry, overall length 500 ft., draft (salt water) 23 ft. 6 in., beam 60 ft.

For vessels using E.B.N.I. Oil Jetty, Coolkeeragh, Londonderry, overall length 600 ft., draft (salt water) 23 ft. 6in.

Maximum draft of ships is increased to 24 ft. on Spring tides at Coolkeeragh and Londonderry.

HEALTH: Pratique is automatic except in the case where the Master suspects one of the dangerous diseases on board when he should notify the Agent.

Also see "Health – All Ports" before first U.K. port.

RADIO: Malin Head Radio Station, Republic of Ireland, covers W/T transmissions and Portpatrick Radio Station, Scotland, covers R/T transmissions.

TUGS: One tug is available which is under the control of the Londonderry Port and Harbour Commissioners.

BERTHING: Vessels of deep draft or large dimensions can only berth at Londonderry to arrive on top of high water. Decisions in this matter are taken by the Pilots in conjunction with the Harbour Master.

The reconstruction in ferro-concrete of 300 ft. of existing wharf at Coal Cranes Berth, Queen's Quay, made a total length of ferro-concrete wharves of approximately 2,000 ft. All berths have been dredged to give depth of 25 ft. at LWOST.

The Commissioners have also completed reconstruction in ferro-concrete of Berth 15.

The port is especially adapted for shipment of live stock on large scale. The pens for reception of cattle, sheep and pigs for inspection by Government veterinary officers before shipment are situated close to shipping berths, and are completely roofed over for protection of animals. (It is likely that this facility will close end of 1978).

STEVEDORES: ETA advices should be given before 1600 hrs. on week-days to arrange work for the next morning and before 1100 hrs. on Saturday to arrange work for Monday morning.

MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.

TANKERS: No slop facilities available. Deep-sea tankers discharge heavy fuel oil for electricity power station at E.B.N.I. Jetty, Coolkeeragh, diameter of pipes 8 in. Crew are required to connect and disconnect hoses under port conditions.

DENSITY: Water at Londonderry is brackish and average density 1015 to 1018.

FRESH WATER: Available at all berths direct from shore lines.

FUEL: Gas-oil and light marine diesel available by road tankers. Shell Mex and B.P. can supply light, medium and heavy fuel oil by road tanker.

GANGWAY/DECK WATCHMEN: Can be covered by crew; shore watchmen available if required.

OPENING/CLOSING HATCHES: This is required to be carried out by ship's crew under local port labour conditions.

CARGO GEAR: Ship's winches and derricks should be in good working order and have BOT Certificates or equivalent. Winches are also required to plough grain on grain vessels. Cluster lighting is required for night work.

IDENTIFICATION CARDS: Not obligatory but should be carried.

CONSULS:

Portugal Vice-consul – A. Mackenzie, Esq., 22 Strand Road, Londonderry. Tel. 62033.

Norway Vice-consul – A. Mackenzie, Esq., 22 Strand Road, Londonderry. Tel. 62033.

Norway – Under the Nordic Treaty, Norway also acts for Denmark, Finland, Iceland and Sweden.

REPAIRS: Deck and engine repairs are carried out by a local engineering works. No major repairs available.

REPATRIATION: Can be arranged by ship's Agent on request.

AIRPORT: The nearest airport to Londonderry is Aldergrove (Belfast) Airport, which is 80 miles from Londonderry.

HOLIDAYS: Port Holidays at Londonderry are: St. Patricks Day (17th March); Easter Monday; 1st Monday and Tuesday in August; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required, or Police 65161; Ambulance 65171; Fire 61815.

TELEPHONES: No telephones available for connecting on board.

SERVICES: No tank cleaning available or facilities for discharging of tank-washings. Compass adjusters available from Glasgow.

REGULATIONS: Copies of Port Bye-Laws may be obtained through Agent.

AUTHORITY: The Londonderry Port and Harbour Commissioners.

LOWESTOFT: 52.29 N. 01.45 E.

DOCUMENTS:

Crew List (at least 2 copies).
Passenger List (at least 2 copies).
Manifest (at least 3 copies).
Customs & Health Documents (normal U.K. regulations).
Ship's Papers (to be presented to Customs or Port Authorities).

PILOTAGE: Pilots on standby at all times. Pilot launch fitted with VHF and maintains listening watch on Channel 16. Pilots can also be ordered by RT via Humber and Northforeland Radio, hence by phone.

Pilot's private telephone no. Lowestoft 4970 or Lowestoft 61976, or at the Lowestoft Harbour Masters Office, tel. Lowestoft 2286 (this number manned 24 hours). Pilot boat, black hull, white upper work with "Pilot" painted on each side. Light and sound signals as laid down in the International Code of Signals.

Pilot boards vessel at West Holm buoy or East Newcome buoy. Vessel should not approach harbour closer than these limits when awaiting Pilot.

ANCHORAGES: Pilotage anchorage North of a line joining West Holm buoy and Lowestoft Lighthouse.

RESTRICTIONS: No specific restrictions provided the height of tide is sufficient for draft of vessel. Large vessels normally enter on high water slack tide due to cross currents at entrance.

There are regulations governing the passage of vessels through the harbour entrance. Masters of vessels shall observe the Harbour Control Light which is a white flashing light situated below the fixed red light on the South Pier Lighthouse. This light is visible except between 232° to 286° true from the light. When this light is flashing vessels may proceed to sea, but no vessel shall enter the harbour. At all other times vessels may enter the harbour, but no vessel shall proceed to sea.

A green light is shown on the North Pier head and a red light on the South Pier Head, from sunset to sunrise. A green light is shown from sunset to sunrise on each of the Inner Pier Heads. These lights will become visible to the person in charge upon his vessel entering the harbour. A reed signal is fixed on the South Pier Head for use in foggy weather, 4 blasts of 2 seconds each will be given every minute.

MAX. SIZE: Max. length approx. 300 ft. Draft 16.5 ft. MHS.

HEALTH: See "Health – All Ports" before first U.K. port.

TUGS: 2 tugs are available; tug's lines normally used.

BERTHING: *Outer Harbour* (comprising Hamilton and Waveney Docks and Trawl and Yacht Basins). Used largely for fish traffic:

Width at entrance	150 ft.
Depth at entrance	22 ft. MHWS
Water area	40 acres
Length of quays	4,500 ft.
Depth of water at quays	18 ft. MHWS
	12 ft. MLWS

Inner Harbour. Used for general cargo and grain traffic.

Water area	70 acres
Length of quay	6,500 ft.
Depth of water at quays	20 ft. MHWS
	14 ft. MLWS

STEVEDORES: Shipping Agent should be advised of ETA, etc., to enable gangs to be available.

MEDICAL: Advance notice desirable of medical attention required on arrival. Hospital facilities available in Lowestoft.

FRESH WATER: Can be supplied at various points on quays from hydrants with waterman in attendance. Normal hours 0800 to 1700 hrs. Monday to Friday, outside those hours overtime rates payable. Approx. flow 15 t.p.h.

FUEL: Marine diesel available from road tankers or fuelling points within the docks. 24 hours notice is normally required for supplying gas oil or boiler fuel; this comes from road tankers.

FIRE PRECAUTIONS: Local fire services available in an emergency. Special arrangements can be made for taking fire-fighting equipment to sea. Normal harbour fire-prevention regulations apply to all berths.

OPENING/CLOSING HATCHES: Carried out by crew.

CONSULS: Belgium tel. Lowestoft 2301
Denmark ,, ,, ,,
France ,, ,, ,,
Netherlands ,, ,, ,,
Norway ,, ,, ,,

REPAIRS: All types of deck and engine repairs are possible in the port.

DRY DOCKS: One dry dock. Length 248 ft. Width at entrance 48 ft. Depth of water on sill 13.5 ft. MHWS.

AIRPORTS: Nearest international airport served by regular airlines is London (Heathrow). Smaller airport at Norwich (27 miles) not served by regular airlines.

POLICE/AMBULANCE/FIRE: In an emergency dial 999 and ask for service required. For normal enquiries: Police Lowestoft 2121; Ambulance Lowestoft 2572; Fire Lowestoft 2227.

GENERAL: Helipad on Dock Estate, also Heliport at Beccles (8 miles away).

Air/Sea Rescue Services at R.A.F. Cottishall (35 miles).

Royal National Lifeboat Institution, lifeboat berthed at Lowestoft.

200-ton crane available for heavy lifts.

Modern transit sheds, cattle lairage facilities.

SERVICES: Compass adjusting. VHF, Radar, radio repairs. All ships' provisions are available by arrangements with the shipping Agencies.

SHORE LEAVE: Leave is permitted.

AUTHORITY: British Transport Docks Board.

MANCHESTER: 53.29 N. 02.14 W. (See Plan Book)

GENERAL: The port of Manchester includes the whole of the Manchester Ship Canal and Queen Elizabeth II Dock. The Canal is approximately 36 miles long from its entrance at Eastham on River Mersey to the Manchester Docks.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-Line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bill of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Non-compulsory. Orders for Pilots may be lodged with the Pilotage Office at Eastham (Tel. 051-327 1233) or at Dock Office at Manchester (Tel. 061-872 2411, ext. 2174). As much notice as possible should be given, particularly in the case of inward-bound vessels due to arrive at Eastham. Helmsmen can be obtained in same manner.

RESTRICTIONS: Eastham Locks. The main entrance to the Canal is at Eastham where there are two locks side by side, one 600 ft. by 80 ft., and the other 350 ft. by 50 ft. The outer or lower sill of each lock is 11.36 ft. below Chart Datum (1975). The levels of upper sills of the 80 ft. and 50 ft. locks are 32 ft. and 29 ft. respectively below statutory water level in Canal.

Both locks are operated for incoming and outgoing vessels of suitable draft during a period of 8 hours on each tide, i.e. from 4 hours before high water to 4 hours after high water.

The Canal is constructed to give an available depth of water of 30 ft. from Eastham to Ince Oil Berth (5.375 miles) and of 28 ft. from Ince to Manchester Docks.

The size of vessel which can navigate the Canal is governed by the dimensions of locks, the height of fixed bridges and limitations for the draft of vessel.

Maximum length: The greatest length measured between perpendiculars drawn at the foreside of the foremost extremity and at the afterside of the aftermost extremity of the hull or any attachments to the hull shall not exceed 560 ft. The acceptance of ships proceeding above Ince with overall length greater than 530 ft. is subject to approval of the Harbour Master.

The length measured between perpendiculars drawn at the foreside of the stern and at the afterside of the rudder post, or through centre of the rudder stock if there is no rudder post, on the Summer load water-line shall not exceed 535 ft.

The length measured between perpendiculars drawn at the afterside of the rudder plate and at the foreside of the foremost extremity of any part of the hull which is below a horizontal line drawn through the top of the rudder plate shall not exceed 544 ft.

Maximum beam: Vessels not proceeding beyond Ince Oil Berth: 72 ft. overall. Vessels proceeding beyond Ince Oil Berth: 63 ft. 6 in. overall.

Provided the height of masts and/or funnels or other structures is not more than 70 ft. 9 in. from water-line, vessels can pass under all fixed bridges under normal conditions. As, however, the headroom is less during periods of high-water levels, a vessel, in order to avoid possible detention, should reduce masts and funnels or other structures to 70 ft. above the water-line. The restriction as regards height does not apply to vessels proceeding only as far as Runcorn Bridge.

Facilities are available at Eastham for removing and replacing tops of masts and funnels.

MAX. SIZE: When vessels are Loading inwards for the canal Masters should take these facts into their calculations and have regard to the following limitations, all of which are expressed as maximum draft in fresh water:

Vessels inward bound to a berth	*Arrival draft at Eastham not to be such as would exceed:*	
Between Eastham Locks and Ince Oil Berth	28 ft. 10 in.	in fresh water
Between Ince Oil Berth and Manchester Docks (other than Pomona Docks and Runcorn Docks)	26 ft. 06 in.	
To or from Pomona Docks (for coastwise shipping)	14 ft. 00 in.	

Vessels loading outwards at any point between Eastham Locks and Ince Oil Berth should not have a draft exceeding 28 ft. 6 in. upon completion of their loading in this section.

Vessels loading outwards at any point between Ince Oil Berth and Manchester Docks (other than Pomona Docks and Runcorn Docks) should not have a draft exceeding 26 ft. 6 in. upon completion of their loading in this section.

Large vessels can swing in the basins at Stanlow and Manchester Docks. Small vessels can swing at certain other points on the Canal.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first U.K. port.

TUGS: The Canal Company maintains a fleet of high-powered tugs which may be hired to assist vessels, 12 hours notice required.

BERTHING:

CARGO HANDLING FACILITIES: Heavy duty floating cranes with capacity up to 120 tonnes. Roll-on/Roll-off berth with strengthening to take loads of 300 tonnes.

Two floating grain elevators, capacity 250 t.p.h. each and additional elevators at private wharves. Transporter cranes for containers with capacity of 35 tonnes and 25 tonnes.

RADIO: FM VHF R/T equipment is installed at Eastham, Stanlow, Latchford and Manchester Docks as an aid to navigation on the Canal.

Ships which are equipped with the appropriate R/T channels are requested to establish contact with the nearest shore station before leaving a berth or lock within the harbour and thereafter to maintain a continuous listening watch on Channel 14.

Station	*Call sign*	*Channel*	
Eastham Locks	Eastham Locks	7	Docking instructions when approaching Eastham Locks from seaward.
Eastham Locks	Eastham	14	Port operations
Stanlow Oil Docks	Stanlow	14 20	Vessels moving within the harbour should maintain a listening watch on channel 14. After contact has been established the shore station will request the ship to switch to the appropriate speech channel.
Latchford Locks	Latchford	14 20	
Manchester Dock Office	Dock Office	14 18	
Ship/tug Communications	Name of ship/tug	8 10	Inward bound Outward bound

STEVEDORES: The stevedores require to sight a certificate covering inspection and S.W.L. of slings used in pre-slung cargoes.

TANKERS: *Queen Elizabeth II Dock.* This dock is adjacent to the locks at Eastham which give access to the Canal, and is approached from River Mersey through its own entrance lock. This lock is 807 ft. long by 100 ft. wide. The level of outer sill is 18.36 ft. below Chart Datum (1975). The dock covers an area of 19 acres in the form of a square and has four berths designed to accommodate large tankers, the dimensions of berths being as follows:

Berth No. 1 800 ft. Berth No. 3 900 ft.
Berth No. 2 725 ft. Berth No. 4 730 ft.

The dock is directly connected to oil installations by pipe-lines.

Stanlow Oil Docks. No. 1 & 2 (5 berths) 4.5 miles above Eastham Lock. Length 560 ft., draft 28 ft., beam 72 ft.

Ince Oil Berth. 5.5 miles above Eastham Lock. Length 560 ft., draft 28 ft., beam 72 ft.

Barton. 32 miles above Eastham Lock. Length 508 ft., draft 26 ft., beam 63 ft. 6 in. Max. height above water-line 70 ft.

DENSITY: The water in lower section of the Canal between Eastham Locks and Latchford Locks is brackish. In all sections above Latchford Locks the water is fresh.

MEDICAL: Doctors and hospital facilities available. Agent should be advised in advance of any medical attention required.

FUEL: At Partington, coal tips are available for the loading of cargo coal, etc., and bunkers to vessels. Oil bunkers may be taken by arrangement with oil companies either from craft alongside or at various oil berths along the Canal.

DRY DOCKS: The Manchester Marine Limited operates three graving docks at Manchester Docks:

No. 1 Dock – length 535 ft., width 65 ft., depth of water on blocks 20 ft. 3 in.

No. 2 Dock – length 500 ft., width 65 ft., depth of water on blocks 18 ft.

No. 3 Dock – length 450 ft., width 65 ft., depth of water on blocks 19 ft.

CUSTOMS ALLOWANCE: At discretion of local Customs Inspector. Normal allowances are equivalent to 0.5 lb. tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than three or four days may receive extra allowances.

(A) MEDWAY (See Plan Book)

PILOTAGE: *Folkestone.* Vessels for River Medway that are approaching from the South obtain Inward Sea Pilot at Folkestone Pilot Station. Telex: 96381. Tel. Folkestone 56766. Telegraphic Address: "Pilots, Folkestone". Notice required: preferably 24 hours notice ETA, then confirmation 12 hours prior arrival with ETA, draft, gross tonnage and destination.

Pilot boards from launch 1 mile South of Folkestone Pier. Contact Pilots by VHF Channel 16, then 9, two hours before arrival (call sign "Folkestone Pilots Radio").

Deep drafted vessels can be provided with Pilots in deeper water by arranging to be met by the Sunk Pilot Vessel in a suitable position about 3 miles East of the Sunk Light Vessel.

North East Spit: Vessels approaching within the range Dieppe/Amsterdam obtain inward ISP between the "Elbow Buoy" and "East Margate Buoy". Telegraphic address: "Pilots, Folkestone". Telex: 96381. Tel. Folkestone 56766. Advance notice essential as Pilots not always on station. Notice required: preferably 6 hours giving ETA, draft, gross tonnage and destination, confirming 2 hours prior to arrival. Contact Pilots on VHF Channel 16, changing to Channel 9 for working (call sign "North East Spit Pilot Radio"). Light or sound signals as per international code. Pilot boards between the "Elbow Buoy" and the "East Margate Buoy", depending on weather, by fast launch which is stationed in Ramsgate Harbour. Contact Pilots on Channel 16, changing to Channel 9 for working.

Medway: Medway Pilots join ships at Little Nore Sheerness for all Medway ports, i.e. Isle of Grain, Sheerness, Beeness, Oakham Ness. Otterham, Rochester, Queenborough and Ridham. Telegraphic Address: "Pilot Sheerness". Tel. Sheerness 2276. Notice required, minimum 2 hours. Pilots may be contacted through Medway Radio on VHF Channel 14 or Pilot launch keeps watch on Channel 14 when in service. Lights and sound signals as per international code.

VHF/RADAR: Medway Port Operations and Information Service (Medway Ports Authority) is situated at Garrison Point, Sheerness. Tel. Sheerness 3025. Telex: 96435 (call sign "Medway Radio"). Fitted with VHF, Channels 16, 14, 9 and 22. The station has radar service surveillance of Inner Estuary, Sea Reach, Medway Approach Channel and Lower Reaches of River Medway. Patrol launch maintains watch on VHF Channel 11 (call sign "Medway Patrol") and is also fitted with radar.

REGULATIONS: All vessels required to proceed in accordance with instructions of Port Authority. Vessels are requested to advise Medway Ports Authority – Medway Port Operations Service (call sign "Medway Radio") VHF Channels 16, 14, 9 and 22 of ETA, shifting of sailing movements.

GENERAL:

Tidal Information:

Tidal streams in the River Medway vary between about 2.5 knots at Springs and 1.5 knots at Neap Tides, although velocities vary considerably from Reach to Reach, the areas of maximum encountered velocities are: off Garrison Point Sheerness and through Rochester Bridge.

Average Tidal Heights are as follows: (metres)

Sheerness	5.7 MHWS	4.8 MHWN
Chatham	6.0 MHWS	4.9 MHWN
Rochester	6.0 MHWS	4.9 MHWN

High Waters occur approximately:

Margate	45 minutes	before Sheerness
Herne Bay	20 minutes	before Sheerness
Whitstable	10 minutes	before Sheerness
Rochester	9 minutes	after Chatham
Wouldham	28 minutes	after Chatham
New Hythe	33 minutes	after Chatham
Allington Lock	41 minutes	after Chatham

Tide Tables may be obtained at the offices of the Medway Ports Authority.

(B) SHEERNESS: 51.27 N. 00.44 E. (See Plan Book)

Situated on Isle of Sheppey at junctions of Thames and Medway Rivers.

DOCUMENTS: See "London".

PILOTAGE: See "Medway".

ANCHORAGES: For vessels entering River Medway up to 107 m. length, Little Nore Anchorage, Sheerness. Over 107 m. length – as directed by Medway Port Authority (Medway Radio) or Thames Navigation to Great Nore, Sea Reach or Warps.

RESTRICTIONS: Subject to tidal conditions and under keel clearance appropriate size of vessel. Minimum depth of Medway Approach Channel 8.4 m. at MLWS (Chart Datum).

Entry as directed by Medway Port Operations (Medway Radio). Station keeps watch on VHF Channels 16, 14, 9 and 22.

Occasional restriction for entering approach channel when H.M. naval vessels claim priority.

Traffic Warning Lights are exhibited from Garrison Point.

MAX. SIZE: Five deep water terminals for vessels up to 230 m. in length and 11.5 m. in draft.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Portishead. Local Stations: From South – Lands End, Niton, Northforeland. From North, Cullercoats, Humber, Northforeland.

VHF/RADAR: See "Medway".

TUGS: River Medway – For Sheerness, Ridham Dock, Isle of Grain, Bee Ness, Oakham Ness – Tugs usually meet vessels at Garrison Point Sheerness – 6 tugs available with BHP range from 900 to 3,000 BHP. Tug's lines used, no extra charge.

BERTHING: Sheerness, deep water berths and Ferry Terminal – no restriction.

Berths equipped for handling containers, forest products, motor vehicles and wine in bulk and for general cargo of all kinds, including fresh fruit and vegetables.

Storage facilities available for bulk wine and the warehousing of general cargo.

Sheerness Deep Water Berths – No. 1 – suitable for vessels up to 230 m. length and 8.5 m. draft.

No. 2. Suitable for vessels up to 200 m. length and 11.5 m. draft.

No. 3. Suitable for vessels up to 230 m. length and 11.5 m. draft.

No. 4. Suitable for vessels up to 230 m. length and 8.5 m. draft.

Ferry Terminal – Berth 11. Suitable for either bow or stern door vessels of up to 140 m. in length and 6 m. in draft. Present service twice daily Sheerness/Flushing and vice versa, also fortnightly service to Nigeria.

STEVEDORES: All stevedoring at Sheerness is provided by the Port Authority.

CRANES:

Berth No.	*Remarks*
1	4 – 3 & 5 tonne Electric
	1 – 40 tonne Container Gantry
2	5 – 3 & 5 tonne Electric
3	6 – 3 & 5 tonne Electric
4	None (Car Terminal)
5	Ro-Ro berth
11	Ro-Ro/Ferry Terminal
12	10 tonne static (Launches)
12A	Mobiles (Marine Services)
14	Mobiles (Launches)
15	Mobiles (Ship Repairs)
16	Mobiles (Ship Repairs)
30 – 33	Marine Services and Dock Use.

MEDICAL: 24 hours notice to Agents so that Port Medical Officer can be advised. Normal boarding point – Garrison Point Sheerness – smallpox vaccination certificate required for sighting. All usual hospital facilities available within 15 mile range of Sheerness.

DENSITY: Average density 1021/22.

FRESH WATER: Available alongside all berths at Sheerness.

FUEL: All grades available at BP Refinery Isle of Grain – or available by barge or lorry given 48 hours notice.

GANGWAY/DECK WATCHMEN: Gangway watchmen – services recommended as all berths at Sheerness are tidal with average rise and fall of 5 m.

OPENING/CLOSING HATCHES: Within Sheerness Docks rigging gangs are employed by the Authority for this purpose.

REPAIRS: All types of deck and engine repairs can be carried out either in berth, in dry dock or at river buoys.

DRY DOCKS: Sheerness: 2 dry docks available. Largest for vessels up to 86 m., otherwise only small slipways available.

REPATRIATION: Usual facilities available for crew changes – repatriation can be arranged by various air/sea routes.

TELEPHONES: Police: Sheerness 61451; Fire: Sheerness 2382 or dial 999 and ask for Fire Service; Ambulance: Sheerness 4079. At Sheerness coin boxes are available for placing on board.

GENERAL: All shipping movements co-ordinated by Medway Port Control Authority, tel. Sheerness 3025, all arrangements being made after notification of arrival or departure by vessel's Agent.

REGULATIONS: See "Medway".

AUTHORITY: Medway Ports Authority.

(C) ISLE OF GRAIN: 51.26 N. 00.43 E. (See Plan Book)

OPERATOR: B.P. Oil Kent Refinery Limited.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ships Report by Master.
1 Home Office Form 1.B.6.
1 Stores List.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Load-line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
De-rat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
Safety Construction Certificate.

PILOTAGE: See "Medway".

VLCC vessels enter and leave by North Channel. Special pilotage and entry arrangements apply.

ANCHORAGES: *Estuary Passage and anchorages:* Vessels proceeding to Isle of Grain will initially contact the Thames Navigation Service (Gravesend Radio Channels 16-12) and comply with the 'General Directions for Navigation in the Port of London 1975' until entering the Medway Area. Prior contact should be made with the Medway Ports Operations Centre (Medway Radio, Channels 16-14-9-22). Anchorages are allocated according to size and draft of vessel and if outside the Medway area are nominated by the T.N.S.

RESTRICTIONS: Tidal port. 24 hour movements, subject to tidal conditions and under-keel clearance appropriate to size of vessel. The declared depth in the Medway Approach Channel is 8.5 m. (27.9 ft.) at datum.

MAX. SIZE: Largest size of vessel accepted to date, 280,420 d.w.t. part loaded.

HEALTH: Under new procedures which apply from April 1st, 1978 a Health clearance is only required if the vessel is "Suspect". In this case the Port Health Authority should be advised by radio message addressed to "Portelth London" not more than 12 hours and where practicable not less than 4 hours before arrival.

See "Health – All Ports" before first U.K. port.

RADIO:

Notice of 72 hours and over	– Portishead Radio.
Notice of 12-72 hours	– Landsend Radio.
Notice up to 12 hours	– from South, Northforeland Radio. from North, Humber Radio.

RADAR/VHF: See "Medway".

TUGS: 5 tugs available. 2 of them equipped for fire-fighting. Tugs join and leave vessels at Garrison Point, Sheerness. Normally use tug lines, cost included in tug hire.

BERTHING: There are 8 main jetties suitable for ocean-going vessels (Nos. 1 to 8 main) and 3 coaster berths viz.; No. 1 coaster, incorporating No. 1 barge and No. 9 jetty. All the main jetties are of "T" headed design. Jetties 1-7 can accommodate vessels of various sizes up to a max. of 70,000 tons s.d.w. Max. safe drafts for the Medway Approach channel and in the berths for particular periods can be advised on request. No. 8 jetty can accommodate part laden VLCCs up to about 1,130 ft. in length and 179,000 tons arrival displacement. Such vessels are programmed to have not less than 1.22m. (4 ft.) under-keel clearance on arrival at the Medway buoy 40 minutes before H.W. Sheerness. They then berth starboard side to on the first of the ebb tide. The jetty is equipped with the IDASAT visual berthing aid.

Ballast water containing Petroleum may normally be discharged into the Company's oily ballast system by arrangement.

DENSITY: Approx. 1020.

FRESH WATER: Available all jetties by pipe-line.

FUEL: Most grades available on all jetties. Advance notice advisable.

MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilities available in surrounding areas.

FIRE PRECAUTIONS: *Safety Regulations:* A copy of the BP Oil Kent Refinery Jetty Safety Regulations is put on board each vessel on arrival. The booklet additionally contains various tear-out check lists, forms for confirmation of bunker requirements and requests for immobilisation and permitted repairs. These must be completed by ship and shore representatives before operations commence.

GANGWAY/DECK WATCHMEN: *Gangways:* A tower-mounted gangway suitable for VLCCs is provided on No. 8 jetty. Vessels provide their own gangway at other jetties and are responsible for maintaining it as a safe means of access.

REPAIRS: Local marine repair company can undertake repairs of general nature. No drilling or hot-work permitted alongside jetties.

REPATRIATION: All facilities for repatriation by land, sea and air, through London and Dover. Attendance of British Ministry and Foreign Consulate officials arranged through Agent.

POLICE/AMBULANCE/FIRE: The Refinery Fire Service (which also operates an ambulance) can be summoned by dialling 222 on the Refinery telephone system. This procedure should be followed in any emergency – e.g., a major accident or hose failure, etc.

Refinery Security can be contacted by dialling 221. Any request for attendance by the County Police should be made through Refinery Security Dept.

TELEPHONES: There are public telephone kiosks on the foreshore road.

GENERAL: Agents have difficulty in providing most services at week-ends, therefore, requests for Bond, cash, consular officials, etc., should be radioed as soon as possible.

CUSTOMS ALLOWANCES: At the discretion of the local Customs Officer. Normal allowances are 0.25 lb. tobacco or equivalent and 1 bottle of spirits per man. Additionally 1.5 litres of wine per man per day. Separate arrangements apply when crew members are leaving a ship. Vessels in port more than 3 or 4 days may receive an additional allowance.

TIME: British Standard Time is GMT plus 1 hour. GMT in Winter months.

(D) ROCHESTER: 51.23 N. 00.30 E. (including Chatham, Strood, Upnor, Gillingham, Snodland, Halling & New Hythe (See Plan Book)

DOCUMENTS: See "London".

PILOTAGE: See "Medway".

ANCHORAGES: See "Sheerness".

RESTRICTIONS: No entry restrictions only as to state of tide and draft and as directed by Medway Radio (Medway Port Operations and Information Service, Garrison Point). Station keeps watch on Channel 16, 14, 22 and 9. Channel 14 is allocated for port operations generally. For vessels exceeding 350 ft. in length, daylight navigation.

MAX. SIZE: For Rochester ship berths maximum length 400 ft. and 25 ft. draft. River berths available 160/500 ft. in length, with depths of water HWST 14/25 ft. and HWNT 9/20 ft.

HEALTH: Pratique obtained on arrival at Sheerness where Port Medical Officer is available if required.

Also see "Health – All Ports" before first UK port.

RADIO: From South: Lands End, Niton, Northforeland. From North: Cullercoats, Humber, Northforeland.

TUGS: J. P. Knight (Rochester) Ltd., 348 High Street, Rochester (Tel. Medway STD 0634 – 42408 and Sheerness STD 07956 – 2821), cover the whole of the Medway Ports Area.

The following companies operate within the Medway Ports Area on a smaller scale with towing and recovery services:

Medway Towing & Light Recovery – Medway STD 0634 – 54300
N.E. Murray (Marine Contractors) – Sheerness STD 07956 – 3701
P. E. Woodger (Craft Hire) Ltd. – Sittingbourne 23874
Mr. J. Oliver – Medway STD 0634 – 406525

BERTHING:

Rochester: There are 10 dredged ship berths operated by the Medway Ports Authority, 2 standby or lay-by berths and mooring buoy facilities to accommodate 118 lighters and 14 lash barges situated between Chatham Reach and Rochester Bridge.

Size restrictions vary from 46 m. to 140 m., the latest minimum depths can be obtained from the Medway Ports Operations and Information Service situated at Sheerness (Garrison Point).

The facilities or riverside berths are operated by commercial interests:

Medway Wharfinger Ltd. at Phoenix Wharf	Medway 79881
Transit Freights Ltd. at Crown Wharf	Medway 75686
Honigs (Rochester) Ltd. at Limehouse Wharf	Medway 46261
Wm. Cory & Sons Ltd. at Cory's Wharf	Medway 41022
Anglosped Ltd. at Stanley's Wharf	Medway 409365
Lynch and Sons Ltd. at Lynch's Wharves	Medway 77831
Crescent Shipping Ltd. at Barnetts Wharf	Medway 79541/8
John Howards Ltd. at Crown & Quarry Wharf and Howards Wharf	Medway 402040 (20 lines)
Flamecap Ltd. at Acorn and Blue Boar Wharf	Medway 44358/9

Details of alongside berths handling equipment, latest depths and relevant information can be obtained from the appropriate wharf concerned.

Current depths can be ascertained from Medway Port Operations Service.

Patmans Wharf: (Lat. 51° 25′ North; Long. 0° 32′ East)

Situated in Upnor Reach, owned and operated by the Medway Brick and Stone Works Ltd. (Telephone: STD 0634 – 78082). Length of wharf 61 m. with a depth of 4.7 m. at MHWS. 3 – 3 to 4 tonnes travelling cranes, mobiles and forklift trucks available.

Pier Wharf: (Lat. 51° 24′ North; Long. 0° 33′ East)

Situated at the Western Arm of Gillingham Dock and operated under a contortium of companies. Length of wharf 183 m. with varying depths from 3 m. to 5 m. at MHWS. Mobile crane of 4 tonnes and forklift of 4,000 lbs. Storage warehouses and storage capacity available.

Ship repair and boat builder – Medway Marine Structures – STD 0634 – 576600.

Tylers Wharf: (Lat. 51° 24.6′ North; Long. 0° 34′ East)

Situated at West Hoo Creek owned and operated by the Tyler Boat Company Ltd. (Telephone: Tonbridge 365111–9). Length of wharf 73 m. with a depth of 3 m. at MHWS. Large sheerlegs of 30 tons and mobiles available. Boat builders and outfitters.

Mooring Facilities: Buoys are provided at points within the River Medway and Swale. Arrangements to use these buoys and current charges can be made through the Medway Ports Authority.

MEDICAL: Port Medical Officer available if necessary on arrival at Sheerness with 24 hours notice to Agents. Doctor and hospital facilities available at Rochester.

DENSITY: 1020 unless excessive land water coming down river.

FRESH WATER: Quantities up to 200 tons available for delivery by water barge.

FUEL: Oil bunkers may be obtained at the main installation at the Isle of Grain Oil Refinery, or by barge or by road tanker. The last 2 methods require minimum 48 hours notice, similarly with supplying lubricating oil which is not available at the Isle of Grain.

OPENING/CLOSING HATCHES: To be carried out by crew.

CARGO GEAR: Discharge by ship's gear at ship berth and by mobile cranes up to 10 tons at all river berths.

CONSULS:

Vice-Consul Netherlands, Tel. Medway 43256.
Consul Sweden, Tel. Medway 44632.
Vice-Consul Finland, Tel Medway 44632.

REPAIRS: The Medway Dry Dock Co. Ltd. (Tel: Sheerness STD 07956 – 2241/2461) provide 2 Dry Docks of 87.84 m. and 65.58 m. respectively. A smaller slipway is available and alongside berths also.

The Medway Slipway Yard at Rochester High Street of Doust and Company Limited (Tel: Medway STD 0634 – 43087) provide ship repair facilities and operate 2 slipways. The larger can accommodate up to 600 tonnes and 55 m. in length. Afloat repair facilities and riverside berths also available.

Acorn Shipyard (ex New Medway) Gas House Road, Rochester, Kent ME1 1PJ (Tel: Medway STD 0634 – 41355/6/7), provide ship repair facilities at the Isle of Grain; Sheerness and River Medway, and operate 1 patent slipway of 85.0 m. working length and 1 grid situated at Rochester.

DRY DOCKS: All repair facilities available on river berths for vessels up to 200 ft. in length; on a grid for up to 250 ft., and a slipway for up to 140 ft.

AIRPORT: London Airport (Heathrow), Southend Airport.

POLICE/AMBULANCE/FIRE: Dial 999 and state service required and where vessel berthed, also contact Medway Radio in cases of emergency.

SERVICES: Compass adjustors available.

REGULATIONS: See "Medway".

DEVELOPMENTS: Continued expansion and reclamation at Sheerness: Blue Boar Wharf (Rochester) under development. Development of Frindsbury Marshes (Rochester).

AUTHORITY: Medway Ports Authority.

(E) OTHER FACILITIES:

(1) BEE NESS JETTY: 51° 25′ 18″ N. 00° 39′ 00″ E.

Owned and operated by Berry Wiggins and Company Limited situated in Kethole Reach, a distance of 4.1 nautical miles from Sheerness (Garrison Point).

The jetty is of timber construction and is 2,496 m. long (1.35 nautical miles). The jetty runs parallel to East Hoo Creek where an inner spur is situated 1,097 m. from the jetty head.

The jetty head is 14.1 m. long with dolphins upstream and downstream, also mooring buoys upstream and downstream of the dolphins for mooring. The maximum size of vessels permitted is 11,000 d.w.t. with a size restriction of 168 m.

The depth at MLWS is 7.3 m.
at MHWS is 13.0 m.

The inner spur has a size restriction for vessels of 61.0 m. and;
The depth at MLWS is 3.9 m.
at MHWS is 9.6 m.

The company has a storage capacity of 80,000 cu.m. and the jetty is unsuitable for vehicular traffic.

Address: Berry Wiggins (Kingsnorth) Ltd.,
Hoo, Rochester,
Kent ME3 9ND

Telephone: STD 0634-250722 (Medway) Telex: 965236

May 1978

Company renamed K.C.A. International (Kingsnorth). Address and telephone as before.

(2) BLOORS WHARF – RAINHAM CREEK 51° 22′ 48″ N. 00° 36′ 42″ E.

Situated at the head of Rainham Creek a distance of 10.3 nautical miles from Rochester. Main wharf 183 m. long with 3.1 m. at MHWS. The Western arm is 61 m. long with a depth of 2.1 m. at MHWS.

The Wharf is owned and operated by Medway Secondary Metals Ltd. (A British Anzani Company). Telephone: STD 0634-34411. Mobile cranes, forklifts and crushing equipment available. Large storage capacity and warehouses also available. Shipbreaking and re-cycling of metals.

(3) FAVERSHAM: 51° 19′ N. 00° 54′ E.

DOCUMENTS: See "London".

PILOTAGE: Not compulsory. Advisable to engage local person by arrangement with Agent or contact Medway Port Operations and Information Service.

ANCHORAGE: The Swale (East) 1 mile (approx.) upstream of the Sand End buoy.

RESTRICTIONS: No night restrictions. Tidal creek – vessels enter from 1.5 hours before High Water according to draft.

MAX. SIZE: 140 ft. LOA, 25 ft. beam, 9 ft. draft, on Spring tides only.

RADIO: North Foreland.

VHF/RADAR: See "Medway".

TUGS: None available.

BRIDGES: Maximum size of vessels proceeding to basin above Faversham Swing Bridge – 140 ft. length, 23 ft. beam. Draft – the minimum clearance for vessels up to 110 ft. in length is 1.5 ft. over the sill, and for longer vessels 2 ft. over the sill.

MEDICAL: Notify Agent of any medical treatment required.

FRESH WATER: Available on some berths.
FUEL: No local installation. Bunkers may be obtained by road tanker – contact Agent.
REPAIRS: Minor repairs can be carried out locally. For nearest grid, slipway and dry dock facilities see "Rochester" and "Sheerness".

(4) KINGSNORTH: 51° 25′ N. 00° 36′ E.
DOCUMENTS: See "London".
PILOTAGE: See "Medway."
ANCHORAGES: Vessels proceeding to Kingsnorth must contact Medway Ports Operations Centre (VHF Channels 16 and 14) when a designated anchorage will be allocated appropriate to the size of the vessel.
RESTRICTIONS: Tidal port. 24 hour movements, subject to tidal conditions and under keel clearance appropriate to size of vessel. Minimum depth of approach channel 28 ft. LW at present.
MAX. SIZE: Max. lengths: 750 ft. No breadth restriction. Draft: 38 ft. alongside jetty.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Notice of 72 hours and over, Portishead Radio. Notice of 12-72 hours. Landsend Radio. Notice of up to 12 hours, from South, Northforeland Radio, and from North, Humber Radio.
RADAR/VHF: See "Medway".
TUGS: 6 tugs available. 3 of them equipped for fire fighting. Tugs join and leave vessels at Garrison Point, Sheerness. Normally use tug lines, cost included in tug hire.
BERTHING: *Kingsnorth Jetty:*
51° 24′ 36″ Lat. North
0° 36′ 18″ Long. East

The jetty is owned and operated by C.E.G.B. (Kingsnorth) and is situated at the Western end of Long Reach a distance of 6.3 nautical miles from Sheerness and 5.85 nautical miles from Rochester.

The jetty is of concrete construction and is 580 m. long and "L" shaped with a 306.3 m. face, there is a single upstream connected dolphin making an overall face of 330.7 m.

The size of vessels using the jetty are governed by draft.
Depth at MLWS is 7.3 m.
MHWS is 13.2 m.

There is an inner spur situated on the approach arm 396 m. from the jetty face. It is primarily intended for stern Ro-Ro craft, and has 2 starboard berthing dolphins situated at 30.5 m. and 61.0 m. respectively.
Depth at MLWS is 0.6 m. above PLWD
MHWS is 5.3 m.

The jetty is used for the import of coal for Kingsnorth Power Station.

Address: Kingsnorth Power Station
(South Eastern Region)
Hoo, Rochester,
Kent ME3 9NQ
Telephone: STD 0634 – 250088 Telex 965015

MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilities available in surrounding areas.
TANKERS: Advisable radio Agents connection sizes required. No slop tank available. 1 large tanker berth only.
DENSITY: Approx. 1018.
FRESH WATER: Available by pipe-line on jetty.
FUEL: Bunkers not usually available on jetty, but may be delivered by barge. Advance notice essential.
FIRE PRECAUTIONS: No immobilisation or repairs allowed without prior authorisation. No hot-work allowed alongside jetty.
GANGWAY/DECK WATCHMEN: Services of shore watchmen not necessary. Shore gangway may be used.
REPAIRS: Local marine repair company can undertake repairs of general nature. No drilling or hot-work permitted alongside jetty.
REPATRIATION: All facilities for repatriation by land, sea and air, through London and Dover. Attendance of British Ministry and Foreign Consulate officials arranged through Agent.
POLICE/AMBULANCE/FIRE: Dial 999 from public call box. Medway Ports Operations Centre can be alerted on Channel 16 and 14 to call these services.
TELEPHONES: No facilities exist for placing telephones onboard.
GENERAL: Agents have difficulty in providing most services at week-ends, therefore, requests for bond, cash, consular officials, etc., should be radioed as soon as possible.

(5) OAKHAM NESS JETTY 51° 24′ 55″ N. 00° 38′ 45″ E.

The jetty is jointly owned and operated by C.E.G.B. and K.C.A. International Ltd. and is situated in Kethole Reach a distance of 4.5 nautical miles from Sheerness (Garrison Point). The jetty is of concrete construction and is 1,960 m. long. The jetty head is 27.5 m. long with upstream and downstream attached dolphins making a 85.0 m. face. There are 2 further berthing dolphins unattached, both upstream and downstream. The max. size of vessel permitted on the jetty is restricted to 55,000 d.w.t. with a max. length of 229 m. The depth at MLWS is 11.0 m.
at MHWS is 16.7 m.

C.E.G.B. have a separate storage capacity of 300,000 tons for crude oil primarily for Kingsnorth Power Station.

(6) OTTERHAM QUAY – RAINHAM 51° 22′ 30″ N. 00° 37′ 42″ E.

Situated at the head of Otterham Creek a distance of 2.75 nautical miles from the junction of Long Reach and Kethole Reach and 10.25 nautical miles from Rochester.

There is 192 m. of quay space with a max. length restriction imposed on loaded vessels of 73 m. There is 3.3 m. at HWNT and 4.6 m. at HWST.

Dockside and mobile cranes up to 9 tonnes are available, fleet of fork lift trucks with 3 tonne capacity.

There is 8,984 sq.m. of wharf stacking area together with 15,217 sq.m. of warehousing available. Cold storage facilities of 1,003 sq.m. are also available.

The Quay is owned and operated by Crescent Shipping (sole proprietors London and Rochester Trading Co.). Telephone STD 0634 – 35121 Telex: 96312.

(7) QUEENBOROUGH 51° 26′ N., 00° 44′ E.

Area of harbour extends from Queenborough Spit to Long Point and is known as the West Swale. Queenborough Creek is landlocked and small commercial interests operate within the creek which is buoyed, all berths dry out but are safe berths.
MHWS 5.8 m. Weather – prev. S.W.

The ex-Coal Wharf known as the Washer Wharf, situated at Loden Hope is operated by Shipbreaking (Queenboro') Ltd. (Tel: Sheerness 3065) and is primarily used for loading scrap metals.

(8) RIDHAM DOCK 51° 23′ N., 00° 46′ E.

Situated 900 m. (0.5 nautical mile) S.E. of Kingsferry Bridge in the Swale. Restrictions on vessels governed by London Pilotage Committee in the light of water available in the Swale, Kingsferry Bridge and restricted bends in the navigational channel. Max. LOA 102 m. Beam 16.8 m. and draft 6.7 m.

Ridham dock is owned and operated by Independent Sea Terminals (Tel: STD 0795 – 70881). The terminal has 4 berths, 2 of 244 m. and 2 of 213 m. approximately. These are serviced by 8 electric cranes 2 – 6 tonnes and 6 – 5 tonnes. A large 25 tonne lift crane is planned.

Vessels dock only on or near HW and take the ground at LW, the bottom being soft mud.

The terminal covers approximately 26.7 hectares and 13,000 sq.m. of warehousing are available.

MILFORD HAVEN: 51.42 N. 05.10 W. (See Plan Book)

DOCUMENTS:
Port Health Form.
Immigration Form.
Customs Forms (Crew Declaration, List of Stores.)
3 Crew Lists.

PILOTAGE: Pilots normally board incoming ships from a green-hulled pilot vessel, in a position S.W. of Mid-Channel Rock Light-tower, as close thereto, as weather, size of ship and circumstances permit. When the Western Channel is being used by very large ships other ships may be requested by the signal station, or by the pilot vessel to use the Eastern channel, if draft, and length of ship permit, in which case the Pilot will board close to Sheep Buoy. Deep-draft ships should not approach too close whilst awaiting the pilot vessel. They should remain at least two miles S.W. of Mid-Channel Rock Light-tower. It is important, when manoeuvring at slow speeds to embark a Pilot to make proper allowance for the set of the tidal stream, which sets across the entrance.

Accurate times of arrival are requested so that the pilot vessel may be on station at the correct time. ETAs should be given at least 12 hours before arrival and amendments should be made 2 hours before the latest ETA.

ETAs and subsequent amendments should be passed by radio telegram or radio telephone through any United Kingdom Coast Station (preferably Ilfracombe Radio) to Milford Haven Signal Station (Milford Haven 2343) or to the local Agent of the ship. Alternatively when within 20 to 30 miles of St. Ann's Head ETAs may be passed direct to Milford Haven Conservancy Board signal station calling on VHF Channel 16 then transferring to Channel 12 (the Port working frequency). In addition ships may call the pilot vessel on MF radio calling on 2,182 kHz and transfer to the working frequencies 2,241, 2,246 or 2,301 kHz.

RADAR: Harbour surveillance radar in operation.
VHF: It is important to maintain continuous radio telephone contact with Signal Station when within one hour's steaming of St. Ann's Head, and at all times when in Haven and not safely moored to and alongside berth, including times spent at anchor or at buoys.

All vessels equipped with F/M, VHF, R/T should adopt following procedures:

Entering the Harbour: Contact Signal Station on Channel 16 (156.8 mc/s) when within one hour's steaming of St. Ann's Head. After making contact ship will be requested to maintain watch on Channel 12 (156.6 mc/s) until vessel safely moored alongside or at anchor.

Going to anchor or to a buoy mooring: report to Signal Station when secured and then maintain a continuous listening watch on Channel 16.

Berthing alongside: report to Signal Station when safely moored and may then shut down.

Leaving the Haven: Maintain continuous listening watch on Channel 12 (156.6 mc/s) until Pilot has disembarked, when Signal Station should be informed and vessel should maintain a continuous watch on Channel 16 (156.8 mc/s) until one hour after passing St. Ann's Head.

Navigating within the Haven: Maintaining a continuous watch on Channel 12. When radio telephone is used between vessel and tugs during berthing operation Channel 6 or 8 will be used and Signal Station will be informed before vessel comes off Channel 12.

Signal Station will answer calls on Channel 16 for any ship in the port which has been instructed to move off international calling frequency.

ANCHORAGES: Anchorage normally available for vessels up to 40 ft. draft in Dale Roads. Anchorage for smaller vessels normally available in Dale Shelf. Signal Station will advise mariners on the availability of these anchorages.

RESTRICTIONS: The "West Channel" with min. depth of 55 ft. at the entrance and 54 ft. inside is the channel used by the largest tankers. The "East Channel" with min. depth of 32 ft. is available to all vessels of suitable size and vessels able to do so are requested to use it when the largest tankers are entering or leaving in the "West Channel".

MAX. SIZE: Vessels of 65 ft. draft can be handled on virtually all high waters, but draft restriction always dependent on tide, e.g. 63 ft. at worst HW neaps, or up to 67 ft. in favourable conditions. Contact Milford Haven Signal Station on VHF Channel 12 for latest information.

HEALTH: All vessels from endemic areas are boarded by Port Health Officials on arrival. Any suspected disease or fever on board radio Port Health, Milford Haven not more than 18 hours before arrival and not less than 4 hours before arrival.

Also See "Health – All Ports" before first U.K. port.

RADIO: Lands End Radio, Ilfracombe Radio.

TUGS: Tugs normally join vessels to Westward of Esso Jetty, but Master will be advised by Pilot. Tug's lines used, cost of lines inclusive of towage charge.

BERTHING: VLCCs enter at HW and berth heading East. Vessel will be required to swing after unloading and prior to departure.

The Milford Docks includes a wet dock with a water area of 23 acres over 30 ft. deep, 4,000 ft. of quay frontage including a 600 ft. cargo jetty, and berths in the tidal harbour with a depth of 12 ft. of water at all states of the tide. Preparations are being made to deepen the tidal berths.

STEVEDORES: Ordered prior to arrival with at least 3 days notice.

MEDICAL: Advance notice to Agent not necessary. Local hospital facilities available. Smallpox and yellow fever certificates required.

TANKER TERMINALS:

Esso

No. 1 Berth: depth 57 ft. five 12-in. cargo lines
No. 2 Berth: depth 65 ft. four 16-in. and one 10-in. cargo lines
No. 5 Berth: depth 20 ft. for small coastal vessels
Esso swinging ground dredged to 37 ft.

New Esso Berths

No. 3 Berth: Max. size 30,000 d.w.t. depth 38 ft. cargo lines; five 10-in. (one Black oil, four clean oil.) Three 12-in. (Black oil).
No. 4 Berth: Max. size 20,000 d.w.t. depth 37 ft.; cargo lines are the same as No. 3 berth.

B.P. Angle Bay

No. 1 Berth: depth 54 ft. five 10-in. cargo lines; one 8-in. fuel line
No. 2 Berth: depth 54 ft. five 10-in. cargo lines; one 8-in. fuel line
No. 3 Berth: depth 66 ft. five 16-in. cargo lines; one 10-in. fuel line
B.P. swinging ground dredged to 32 ft.

Texaco, Pembroke

No. 1 Berth: depth 68 ft. 16-in. crude lines
No. 2 Berth: depth 52 ft. 8-in. crude lines
No. 3 Berth: depth 36 ft. 8-in. product lines
No. 4 Berth: depth 18 ft. 6-in. product lines
No. 5 Berth: depth 21 ft. 6-in. product lines
Texaco swinging ground dredged to 32 ft.

Gulf Oil

No. 1 Berth: depth 42 ft. three 10-in. and two 12-in. cargo lines
No. 2 Berth: depth 55 ft. six 12-in. cargo lines
No. 3 Berth: depth 34 ft. six 8-in. and one 4-in. cargo lines
Gulf swinging ground dredged to 42 ft.

Amoco

No. 1 Berth: depth 68 ft. four 16-in. crude lines; two 12-in. and three 8-in. product lines.
No. 2 Berth: depth 38 ft. one 12-in., two 10-in., three 8-in. and one 6-in. product lines.
No. 3 Berth: depth 22 ft. two 8-in. and three 6-in. product lines.
Amoco swinging ground dredged to 32 ft.

DENSITY: 1025.

FUEL: All terminals, Amoco, Gulf, Texaco, B.P. and Esso supply all grades of bunkers.

FIRE PRECAUTIONS: Fire wires to be rigged fore and aft.

GANGWAY/DECK WATCHMEN: Supplied if necessary – very rarely.

CERTIFICATES:

Register.
Load Line.
Safety Radio.
Safety Equipment.
Light Dues, etc.

CUSTOMS ALLOWANCE: Tobacco, 0.5. oz. per man per day. Wine/Spirit, 0.25 pint per man per day.

IDENTIFICATION CARDS: Not necessary.

CONSULS:

Norway	tel.	Milford Haven 2313
Belgium	,,	Milford Haven 2313
Spain	,,	Pembroke Dock 2603
Italy	,,	Milford Haven 4371

REPAIRS: All types of deck and engine voyage repairs carried out.

DRY DOCKS: One dry dock at Milford, 600 ft. × 63 ft. × 18 ft.

REPATRIATION: Crew changes frequently carried out and repatriation arranged.

AIRPORT: Nearest airport at Rhoose (near Cardiff) distance approximately 100 miles. Flights to London, etc., for onward connections.

TIME: Local Time is BST (GMT plus 1 hour). GMT during Winter months.

HOLIDAYS: Standard U.K. Holidays. Cargo work can be arranged on these days.

POLICE/AMBULANCE/FIRE: Police Milford Haven 2351, Pembroke Dock 2121; Ambulance Haverfordwest 3347; Fire Haverfordwest 2131.

TELEPHONES: No telephones on board. Public call boxes exist on all jetties.

GENERAL: Anti-oil Pollution plan in force with facilities for dealing with any oil pollution.

SERVICES: Compass adjusting. D.F. calibration. A "Scamp" underwater hull cleaning service is available.

N.B. Crew and stores directed by rail to vessels at Angle Bay (B.P.) or Pembroke (Texaco) should be directed to Pembroke Station. For vessels at Esso, Amoco and Gulf Terminals, stores should be directed to Milford Haven.

SHORE LEAVE: Shore leave allowed.

AUTHORITY: Milford Haven Conservancy Board.

AGENT: G. S. Kelway Ltd., Murray Crescent House, The Rath, Milford Haven SA73 3JR, Dyfed. Tel: Milford Haven 2313/4. After hours: Milford Haven (06462) 5587, 2615, 2364. Telex: 48213. Cables: "Kelway Milford Haven."

MONTROSE: 56.42 N. 02.17 W. (See Plan Book)

PORT LIMITS: The port is bounded by a line drawn in a NW'ly direction from Scurdie Ness lighthouse to the Annat Bank and thence by both banks of the river to the road bridge which completes the inner boundary.

DOCUMENTS:

1 Crew List,
1 Passenger List,
1 Store List,
1 Personal Effects List for baggage coming ashore,
1 Manifest or Bill of Lading.
Ships Register, Load Line Certificate, Radio Certificate and LSA and Safety Certificates to be sighted.

PILOTAGE: Pilotage is compulsory. Pilots are available throughout the 24 hours. International Code Flag "G" to be exhibited.

Vessels should approach the port to a position with Scurdie Ness lighthouse bearing 250° distance 0.5 mile where Pilot will normally board.

Pilot cutter *"Celurca"* has a dark blue hull with white upper works and "Pilots" painted in black on each side of the wheelhouse. The normal red and white pilot flag is flown during daylight and regulation lights exhibited at night. VHF Channel 16 for calling with a working frequency on Channel 12.

In bad weather it may be necessary for a ship to proceed inwards at the radioed directions of a Pilot to a position on the outer leading marks and inside the lighthouse where the Pilot may board safely. This will only apply during periods of strong Easterly gales and very heavy seas and may be applicable for only a few times in a year. Similarly the port may be closed under severe weather conditions on average 2.5 days per year.

ETA messages: Masters should cable Agent with 24 hours notice of arrival giving overall length and deepest draft and also call Montrose Harbour Radio within 2 hours of arrival at the pilot station.

ANCHORAGE: In position mentioned above with Scurdie Ness bearing 250° distance 0.5 mile, in about 13 m.

MAX. SIZE: Since the harbour was reconstructed and deepened ships of 385 ft. LOA and 5,500 tons have been handled on a draft of 18 ft. Proportionately smaller ships are handled in the wet dock, berthing about 2 hours before HW and unberthing on HW.

HEALTH: "Q" flag to be flown when coming from a foreign country until cleared inwards. In event of disease or fever warn Agents by radio. Strict attention paid to quarantine regulations regarding dogs which are not allowed ashore.

Also see "Health – all ports" before first UK port.

RADIO: Messages to Agents may be sent through Stonehaven Radio. Harbour service is on Channel 12. Call Montrose Harbour Radio on Channel 16.

RADAR/VHF: No port radar service. Harbour service and pilot vessel work on VHF Channels 16 and 12.

TUGS: Pilot vessel is equipped with towing hook and pusher bow to assist in berthing and unberthing if necessary. Vessels lines used. Small charge made for such work.

BERTHING: Dockside Quays No. 1 and 2, 127 m., No. 3, 88 m., No. 4 and 5, 137 m., No. 6, 63 m.

Wet dock berths retained at approximately 14 ft. of water.

North River Side Quays No. 7, 50 m., No. 8, 40 m., (Unused at present), No. 9, 75 m., No. 10/11, 140 m.

Depths vary from 10 ft. at No. 7 to 16 ft. at Nos. 10 and 11 at chart datum.

South River Side Quays. Berth Nos. 12, 13, 14, 15, 16, 17 and 18. These are extensively used by oil related vessels and this area of the harbour has been leased to Sea Oil Services Ltd.

Total wharf length available is 1,600 ft. with depth alongside 20 ft. at MLWS.

STEVEDORES: Provided by Agents J. M. Piggins & Co. Ltd., phone Montrose 2827 Telex 76251.

CARGO HANDLING FACILITIES: The stevedores are well equipped with mobile cranes, fork lifts, etc., and only rarely is ship's gear used unless it is of rapid, modern type. Grab discharge is used for bulk cargoes and conveyor belt systems for loading same.

Rates of loading or discharge:— Bagged cargoes 250 tons per gang per day; Bulk 400 tons; Bulk grain loading 700 tons; Unitised pulp 500 tons; Paper 500 ton; Timber 500 tons all per gang per day.

There is always available a large motor transport fleet at the port and the Agents also have their own road haulage company.

TANKERS: There is no oil berth in the harbour except the facilities offered by Sea Oil Services for the receipt into their 3,000 ton storage depot of gas oil.

MEDICAL: Small hospital in Montrose. Several major units within easy reach by road.

DENSITY: At high water average 1024 but can be as low as 1005 at low water during heavy river outflow.

FRESH WATER: Supplied from Quayside hydrants at all berths.

FUEL: Obtainable from road tanker, gas oil and H.S.D. only from more prominent oil companies.

FIRE PRECAUTIONS: Normal rules to be observed.

CONSULS: None in Montrose.

GANGWAY/DECK WATCHMEN: Can be arranged. Owing to range of tide on riverside berths mooring watch strongly recommended.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CERTIFICATES: On arrival ship's register may be asked for.

CUSTOMS ALLOWANCE: As arranged between Customs Officer and Master.

CARGO GEAR: The port is equipped with mobile cranes which can be used at any berth. These are of various capacities and the maximum lift is 25 tons for which prior notice is required.

IDENTIFICATION CARDS: Not required.

REPAIRS: Minor deck and engine repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: Classification Society Surveyors can be called in at reasonable notice.

REPATRIATION: Facilities available with excellent railway connections. Air connections from Aberdeen.

AIRPORT: Aberdeen 36 miles. Montrose has facilities for light aircraft and helicopter landing.

TIME: GMT with 1 hour advance for British Summer Time, approximately March to October.

HOLIDAYS: *Port Holidays:* Christmas Day; Boxing Day; 1st and 2nd January; One day Spring, Mid-Summer and Autumn Trades Holidays.

POLICE/AMBULANCE/FIRE: Report to Dock Office immediately. Dial 999 and ask for whichever emergency service required.

TELEPHONES: Not possible to place phones aboard. Kiosk on Wharf near Agents office. Comprehensive connections to Continent and Telex services from Agents office.

SERVICES: Laundry, Ship Chandlers and Lloyds Agent immediate.

Compass Adjuster, Radio/Radar Mechanics can be called in from Aberdeen at short notice.

SHORE LEAVE: No restrictions on crew members after inward clearance.

AUTHORITY: Harbour Master, and General Manager, Montrose Harbour Board.

AGENT: J. M. Piggins & Co. Ltd., Meridian Street, Montrose. Tel. Montrose 2827. Telex: Montrose 76251. Cables: Shipping Montrose, Night Service telephone Montrose 3211 and Montrose 3472.

NEWHAVEN: 50.47 N. 00.04 E. (See Plan Book)

PORT LIMITS: A line drawn from a position 300 ft. South of breakwater in a 075° direction to Seaford Bay.

DOCUMENTS: See "London".

PILOTAGE: Trinity House Pilots, Newhaven District: VHF "Newhaven Radio" Channels 16 and 12. Pilot boats are small fast launches painted red and white. Light and sound signals for a Pilot is "G". Notice of ETA 12 hours before arrival, if possible. Anchorage for a vessel awaiting a Pilot is 0.5 to 1 mile S.W. of the breakwater, depending on weather conditions. Pilots normally board S. to S.W. of the breakwater, but in severe gale conditions they keep station 100 m. from breakwater end, and guide vessels in with VHF or lamp. Notice should also be given to the red and green signal lights at the West Pier end lighthouse, and on no account should vessels pass breakwater end if signal is at red. In normal weather, pilot ladder should be on lee side about 1 m. above water. In Southerly gales Pilots prefer a ladder on each side, if available.

RESTRICTIONS: 3 fathoms through entrance to port LWOST. Inner harbour then dredged depth of 13 ft. in accordance with chart datum 11.40 ft. above OD Newlyn.

MAX. SIZE: 450 ft. length, 25 ft. draft taking bottom on soft mud at low water. Vessels greater than 350 ft. LOA length must either be towed into or out of port. Vessels for North Quay must not exceed 250 ft. length, draft 17 ft.

HEALTH: See "Health-all ports" before first UK port.

RADIO: Radio Station Newhaven Radio, call sign Newhaven Radio.

RADAR/VHF: No radar service. Ship's may contact West Pier control point on Channel 16, working on Channel 12.

TUGS: Available upon request.

BERTHING: Vessels may be berthed at any time, with prior notice given.

BRIDGES: Vessels requiring to berth at North Quay must arrive within 2 hours either side of high water in order to pass through swing bridge which governs access to this quay.

STEVEDORES: ETA should be given as far in advance as possible and not less than 24 hours before ETA.

DENSITY: Salt water.

FRESH WATER: Available on request. Supplied by shore hosepipe.

FUEL: Available by previous arrangement.

FIRE PRECAUTIONS: Usual no-smoking precautions on quayside in port area.

GANGWAY/DECK WATCHMEN: Not provided by Port Authorities but recommended at discretion of Ship's Master.

CONSULS: Norwegian Vice-Consul and French Consular Agency.

REPAIRS: Repairs of a temporary nature only may be carried out by B.R. workshops, Ship & Industrial Repairs Ltd., Unit A3, Beach Road, Newhaven and C. R. Irving Ltd., Chapel Street, Newhaven.

AIRPORT: Nearest airport Gatwick, distance 30 miles. Served by regular airlines.

POLICE/AMBULANCE/FIRE: Police: Civil, Newhaven 5219; Port, Newhaven 4131 (extension: 229). Ambulance: 0830–1700 hours, Lewes 5400; 1700–0830 hours, Lewes 2819; Fire: 999.

SHORE LEAVE: Allowed.

AUTHORITY: Shipping and Port Manager, British Railway Board.

NEWPORT: 51.35 N. 02.59 W. (See Plan Book)

DOCUMENTS:

- Crew List.
- List of stores for individual crew members.
- Cargo Manifest.
- Cargo Plan.
- Ship's Register.
- Loading Certificate.
- Safety Equipment Certificate.
- Safety Construction Certificate.
- United Kingdom Light Bills.

PILOTAGE: Telegraphic address – "Newpilots Barry". Advance notice required – 24 hours. VHF Channel – Channel 16 for contact, thence Channel 6 for conversation. Description of pilot boat – diesel launch, black hull, white superstructure, buff funnel and painted in white on bulwarks. Particular light or sound signals to be made by vessels requiring a Pilot – Code Signal 8, i.e. 3 longs 2 shorts. Pilot boat is located in vicinity of Breaksea Lightvessel, or in vicinity of Mercur Buoy, for small vessels. Maintain VHF contact (if possible) with pilot cutter and obey instructions with reference to positioning of vessel to facilitate boarding of Pilots.

ANCHORAGES: Large vessel should anchor in deep water to North of one Fathom banks. Deeper water anchorage (10–14 fathoms) in area between Breaksea Lightvessel and East 1 Fathom Bank Buoys to the South, and shallow water off Barry Roads to the North. Small vessels will find safe anchorage in Barry Roads in varying depth, depending on weather conditions and draft.

RESTRICTIONS: Entrance to Newport Docks is by means of a sea lock 1,000 ft. long, 100 ft. wide.

MAX. SIZE: Max. size of vessels accepted at Newport is 800 ft. long, 96 ft. beam, 33.5 ft. draft.

HEALTH: Port Health Authority board vessel at entrance lock and pratique is automatic.

See "Health – All Ports" before first U.K. port.

RADIO: At sea – Land's End radio station, call sign GIL. Within Bristol Channel radio station Portishead, call sign GK– (last letter according to frequency).

VHF: Vessels requiring entry can contact port on VHF radio Channels 16 and 11.

TUGS: Normally join at Newport Deeps. Ship's line used.

BERTHING: South Dock, normal depth of water 35 ft. North Dock, normal depth of water 27 ft. Junction passage connecting South and North Dock restricts vessels to a max. size of 56 ft. 6 in. beam and 25 ft. draft.

BULK HANDLING FACILITIES: Container terminal on site of former East Lock equipped with derrick crane of 32 tons capacity.

STEVEDORES: Labour is allocated to vessels on arrival.

MEDICAL: No advance notice of medical attention for crew members is required and hospital facilities are available.

DENSITY: Average density of water in docks is 1016.

FRESH WATER: Available at all berths.

FUEL: All classes of fuel available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCE: Tobacco, 0.5 lb. per Crew member, reduced by 50% on coastal trade. 1 pint of spirit and 1 pint wine per Crew member, reduced by 50% on coastal trade.

IDENTIFICATION CARDS: Not required.

REPAIRS: All wet dock and engine repairs possible.

DRY DOCK: 454 ft. × 64 ft.

REPATRIATION: All facilities for the changing of crew and repatriation are available.

AIRPORT: Glamorgan Rhoose Airport terminal 28 miles from Newport. Regular connection planes to London Airport.

TIME: BST, GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Work not undertaken on Christmas, Easter, Spring and Summer Bank holidays. With the exception of Christmas holiday (25th and 26th December) dates on other holidays vary.

POLICE/AMBULANCE/FIRE: Telephone number 999 stating which service is required.
TELEPHONES: Telephone facilities are available aboard vessels.
SERVICES: Tank cleaning equipment. Facilities for tank washing, compass adjusting are available.
SHORE LEAVE: No restrictions to crew members.
AUTHORITY: British Transport Docks Board.

AGENT: Lambert Brothers Ship Agencies Ltd., 34/38 Stow Hill, Newport, Gwent NPT 1JE. Telex: 49213. Cables: Lambert Newport. Telephone: 0633 62221.

PLYMOUTH: 50.22 N. 04.90 W. (See Plan Book)

DOCUMENTS: Importer to supply Agent with Customs documentation, e.g. original B/L with cheque to cover various details; plus copies of Invoice and Forms C.105 with packing lists. Derating or Exemption Certificate required.
PILOTAGE: Compulsory for merchant vessels. Call sign FSG, or 4 short blasts on whistle. Vessels not subject to compulsory pilotage may obtain docking Pilot in Plymouth Sound otherwise pilot station off Penlee Point.

Pilot boat is motor boat with white upperworks, black hull. "Pilot" in black on wheelhouse.
ANCHORAGES: In Plymouth Sound.
MAX. SIZE: Maximum depth of water 9.0 m. Vessel drawing 8.0 m. would leave anchorage 2 hours before High Water. Also see "Berthing".
HEALTH: Pratique. Apply to Customs Waterguard. Pratique issued when requirements satisfied.

See "Health – All Ports" before first U.K. port.
RADIO: *Pilots:* The calling and listening frequency is 2,182 kHz and the working frequencies are 2,246 or 2,301 kHz. A listening watch is kept on 2,182 kHz at every even hour to 15 minutes past, local time and for longer periods when a ship is expected. The pilot vessel is also equipped with VHF and should be called on Channel 16; the working Channels 6, 8 or 12 should be used for passing messages. Alternatively the shore-based Trinity House pilot station, Plymouth, call sign "Cattewater Harbour Radio", maintains a continuous watch on Channel 16 (calling Channel) and is fitted with Channel 12 (first choice Port Operations Channel).
TUGS: Available in Sound.
BERTHING: The Outer Basin is tidal and enters directly from Plymouth Sound. West wharf, 230 m. length, depth 9.0 m. LWOST.
Trinity Pier, 150 m. length
Mill Bay Pier, 140 m. length.

The Inner Basin, general depth of water 6.0 m., with 8.0 m. depth alongside a 185 m. length of wharf quay.
CARGO HANDLING FACILITIES: Silo for grain imports owned by Spillers Ltd. Calor Gas plant on North Quay for imports of butane and propane gas.

A roll-on/roll-off terminal is in operation.

Victoria Bulk Wharves: Pier No. 1. Length 475 ft. Depth 20 ft. LWOST. Pier No. 2. Length 350 ft. Depth 20 ft. LWOST. Max. beam 38 ft. (Larger with prior notice.) Max. d.w.t. 3,000 tons. Bulk products loaded by conveyor ex-railway trucks and lorry.

Cattedown Wharves: Length 712 ft. Depth 24 ft.–26 ft. LWOST. Max. LOA 560 ft. Max. draft 26 ft. Max. size 12,000 GRT. 1×5-ton and 2×3-ton cranes.

Cattedown Wharves Radio on Channel 12, 16 and 18.
STEVEDORES: British Transport Docks Board: Commodities regularly handled include fresh fruit and vegetables, timber, scrap metal and general cargoes.
MEDICAL: No advance notice required; hospital facilities in Plymouth.
TANKERS: Vessels of the Shell "H" class can be handled at Cattedown Wharves. Max. draft 26 ft. Five hose connections, diameter 10 in. Two for black oil and three for white oil.
FRESH WATER: Available from shore at all berths.
FUEL: All normal grades available at short notice.
OPENING/CLOSING HATCHES: Performed by ship's crew or by stevedores at request of ship.
CERTIFICATES: Tonnage registration.
CONSULS:

Norwegian	65154	Greece	60604
Swedish	65154	Italy	63445
Spanish	65154	Netherlands	64846
French	65154	German	66444
Belgian	65154	Dominican Rep.	63175

REPAIRS: Ship repairing facilities available.
HOLIDAYS: Cargo work can often be arranged on Public Holidays subject to prior notice.
POLICE/AMBULANCE/FIRE: Telephone 999.
TELEPHONES: By special arrangement with the GPO, can be placed on board.
AUTHORITY: British Transport Docks Board.

POOLE: 50.43 N. 01.59 W. (See Plan Book)

DOCUMENTS: As for other British ports.
PILOTAGE: Pilots board 0.5 mile South of Poole Bar Buoy from cutter. Prefer ladder 0.50 m. from water and a good lee. VHF watch kept on Channel 16 working Channel 9. As much notice as possible. Address: Pilots, Poole.
ANCHORAGE: Vessels can anchor anywhere in Poole Bay and Studland Bay. Good holding ground and protected in all but Easterly gale.
RESTRICTIONS: Vessels drawing up to 4.0 m. can enter at any state of tide. Drafts of 5.0 m. must wait to within 2 hours of high water.
MAX. SIZE: Max. length 350 ft., beam – no limit, draft 5.0 m.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Vessels using the Port may call the Harbour Master direct on VHF Channel 16 – working frequency Channel 14 call-sign "Poole Harbour Radio".
TUGS: Join at Stakes Buoy, by special application arrangements can be made to join at North Haven Point. Ship's lines. No difference in charges.
BERTHING: Berthing time depends on draft at some private quays. No restriction at New Quay, Ro/Ro berths in operation.

New Quay: 25 ton heavy lift crane, Transit Warehouse facilities.

Town Quay: Pneumatic Bulk Grain discharging equipment in operation – capacity 550 tonnes per 8 hour working (loading facility and bulk fertiliser handling discontinued).

Yard Quay: Suitable for vessels up to 160 ft. Max. 14 ft. draft. Transit Warehouse facilities available.
BRIDGES: Poole Bridge at West end of Poole Quay. Will open at any time on request by commercial vessel.
STEVEDORES: Normal notice for gangs. No Sunday work.
MEDICAL: Advance notice required for ambulance services. Normal medical and hospital services available.
TANKERS: 3 oil berths. Diameter of load/discharge lines 6 in.
DENSITY: 1021.
FRESH WATER: Delivery 25 t.p.h. by 2 in. hose.
FUEL: Gas oil only.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Work carried out by crew.
IDENTITY CARDS: Not required.
CONSULS: None.
REPAIRS: All types deck and engine repairs can be carried out. Slipways (2) available for vessels up to 220 ft. LOA by 40 ft. beam and 120 ft. LOA by 30 ft. beam.
AIRPORT: Charter flights for crew changes can be carried out from Poole/Bournemouth Airport 7 miles away from port.
POLICE/AMBULANCE/FIRE: Call 999 and ask for service required.
AUTHORITY: Poole Harbour Commissioners.

AGENT: John Carter (Poole) Ltd., The Quay, Poole, Dorset. Tel. Poole 4102. Telex 41176. Cables: Maritime Poole.

PORTSMOUTH: 50.48 N. 01.07 W. (See Plan Book)

DOCUMENTS: (Those marked* to be produced to H.M. Customs Boarding Officer.)
*1 Maritime Declaration of Health.
*1 Crew's Effects List C142
2 Ship's Reports by Master.
*1 Home Office Form 1B6.
*1 Stores List.
*1 Certificate of Deck Cargo Tonnage.
*1 Grain Certificate.
1 Light Dues Certificate.
1 Port Dues Certificate.
*1 Passenger List.
*1 Landing Card for each non-British passenger.
*Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).
*Load Line Certificate.
*Safety Equipment Certificate.
Lloyds Certificate.
*Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
*List C143 for packages not cargo or crew/passenger effects.
*Danish Tollpass for ships arriving from Denmark.
Form of Authority for Agent to make Report and clear vessel outwards for Master.

Note: Where cargo is to remain on board for unloading at another port after Portsmouth, 3 copies of Ship's Report are required by the Customs House.
PILOTAGE: Portsmouth is within the Southampton and Isle of Wight Trinity House Pilotage District (see Southampton entry for limits of District) and a vessel liable to compulsory pilotage must employ a Pilot from and to the limits of the District. Non-compulsory vessels may obtain a Pilot in the vicinity of the 'Outer Spit' buoy. (Note: All vessels carrying explosives or petroleum products ar !rRY from the 'Outer Spit' buoy and within the Harbour area, but Order in Council. This also applies to regular Home Trade vessels.) Ministry of Defence Pilots must be employed in addition for vessels using Admiralty berths or being assisted by Admiralty-owned tugs.

In addition to 48 hours notice to local Agent, advise Nab, Needles or Portsmouth Pilot, as appropriate, ETA 48 hours and again 2 to 3 hours immediately prior to arrival. The Nab, Needles and Portsmouth pilot stations are maintained by fast launches under the control of the Duty Pilot at the Pilot Station, 37 Berth, Southampton Docks. The Duty Pilot keeps a continuous watch on VHF Channel 16; call sign 'Nabpilot', 'Needlespilot' or 'Portsmouthpilot' as appropriate. Working frequency, Channel 9 only, but can listen on Channels 14, 12 and 6. No medium frequency: M/F and R/T messages via NITONRADIO. Duty Pilot's GPO telephone numbers: Southampton 32345 and 32346.

The launches only put to sea when required. Failure to send an accurate ETA 2 to 3 hours before arrival could cause delay to the offending vessel.

Strict compliance with the requirements of the Merchant Shipping (Pilot Ladders) Safety Rules is requested by the Pilots, who may refuse to board vessels with unsatisfactory and dangerous ladders. Manropes are not required. Ladders should reach to about 3 ft. from the water, each rung resting firmly against the ship's side; a good lee should be provided whilst making approximately 3 to 7 knots headway.

In most cases, vessels bound to and from the Westward will find it more convenient to use the Nab or Eastern approach to Portsmouth. For details of entrances and pilot launches, see Southampton entry.

ANCHORAGES: Small vessels may anchor close Westward of the 'Outer Spit' buoy, unless prohibition signal flying – see "Restrictions". Larger vessels will be allocated a numbered anchor berth in the Spithead Man-of-War anchorage.

Historic Wreck: The wreck of the Tudor warship "Mary Rose" lies in Spithead, in the position of Anchor Berth 3. It is marked by a light-buoy, and anchorage within the area designated on the chart is prohibited.

If anchorage is prohibited in Spithead, St. Helen's Roads, Ryde Roads or Cowes Roads are the nearest safe anchorages. Mooring buoys 1, 2 and 3 off North Corner in the Harbour are sometimes used. Pilots will be fully informed before the vessel's arrival.

MAX. SIZE: Commercial berths: Camber – length 270 ft., draft 16 ft. Flathouse – length 310 ft., draft 18 ft. Albert Johnson Quay – length 350 ft. depth at MLWS, 12.5 ft. Continental Ferry Port Ro/Ro Link span, length of quay 240 ft. Depth 17 ft. LWS max. LOA, 330 ft.

Vessels at the Camber, Flathouse and Rudmore wharves must expect to take the bottom in soft mud at low water Springs.

RESTRICTIONS: The following traffic signals are exhibited and must be complied with by all vessels. Shown by Central Signal Station (C), Blockhouse (B), Gilkicker (G), Dolphin Pier (D) and H.M. ships concerned (S).

Day	*Night*	*Meaning*	*Shown by*
Red flag with white diagonal.	Red Green Green	No vessel to enter or leave harbour or enter approach channel North of Outer Spit Buoy.	C B G
Red flag with white diagonal over black ball.		No vessel to enter harbour or approach channel. Outward shipping may proceed.	C B G
Black ball over red flag with white diagonal.		No vessel to leave harbour. Inward-bound shipping may proceed.	C B G
Black pendant.	White Red Red	No merchant or private vessel to anchor in man-of-war anchorage in Spithead.	G
Answg. Pendant over Pt 0.		All vessels North of Outer Spit keep clear of warship flying this signal	S
Answg. Pendant over Pt. 9.	Green Green Green	All vessels and boats keep Clear of H.M. ships under way.	C B G
Answg. Pendant over flags N E.	Green Red	Proceed with great caution, ships leaving Camber (Not ferries).	B
Answg. Pendant over flag A.	Red Red	Divers down, keep clear.	Diving boat.
Flag E	Orange	Submarine entering or leaving Haslar Lake. At night, light flashes when sub. under way. All vessels keep clear of submarines.	B D

Speed limit of 7 knots in harbour and when within 1,000 yards of shore; 12 knots within 1,000 yards of any H.M. ships and anywhere within the Dockyard Port not covered by the 7 knots limit. Dockyard Port boundaries are shown on Admiralty charts.

Time of entry is restricted by the vessel's draft and state of tide. Enter Camber only at 4 hours before high water or at high water slack. Vessels do not berth at South Railway Jetty from 2 hours before high water until high water.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a Port Doctor or an officer of H.M. Customs, depending on where ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (North European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board, Port Health Authority must be informed, preferably not more than 12 nor less than 3 hours before arrival.

See "Health – All Ports" before first U.K. port.

RADIO: See "Southampton" entry for pilotage communications. Harbour Control is exercised through "Portsmouth Harbour Radio" for commercial traffic on Channels 16 and 11 VHF. Continuous watch is kept during office hours and from 00 minutes until +15 minutes of every hour when office is closed. Gilkicker Radio on Channels 16 and 14 is also available for commercial vessels, and all vessels entering the area bounded by the "Warner" buoy in the East and the "Sturbridge" buoy in the West should contact Gilkicker, even if only passing through the District. Channel 13 is the working channel for H.M. ships and the Q.H.M.'s office; call sign "Central". H.M. ships are required to keep a listening watch on Channel 16 when in the Portsmouth and Southampton control areas, and will 'shift' to working frequencies selected by mutual agreement. Gilkicker is also equipped for visual signalling. Medium frequency calls to Pilots and Port Authorities only available by link call through Nitonradio.

TUGS: 200 ton tug with bollard pull of 2 tons (must be ordered well in advance of arrival) and several tow-boat launches are available for commercial vessels at commercial berths. Two 1,600 h.p. diesel paddle tugs, 5 screw tugs and 3 Voith-Schneider water tractors are available for larger vessels at Admiralty berths.

STEVEDORES: Registered dock workers and cranes must be ordered by 1500 hrs. on the day previous to commencement of discharge or loading, depending upon receipt of exact ETA from Master.

MEDICAL: All medical facilities available. Agent should be advised in advance. (See "Southampton" entry if arrival is solely to land sick personnel.)

CUSTOMS ALLOWANCE: As for "Southampton".

DENSITY: 1025 salt water.

FRESH WATER: Available.

FUEL AND DIESEL OILS: Available by road tanker or bunker barge from Fawley.

FIRE PRECAUTIONS: Notices will be delivered to Master if berthing at any jetty where special precautions apply.

OPENING/CLOSING HATCHES: By ship's crew.

CRANES: 3 mobile cranes of 15 tons, 4 mobile cranes of 5 tons and 3 mobile cranes of 2 tons capacity are provided by the Port Authority.

CONSULS:

Belgium	Finland	Netherlands	Sweden
Denmark	France	Norway	

REPAIRS: Minor deck and engine repairs can be carried out locally. Larger repairs and dry dock facilities at Southampton.

AIRPORT: Fast train service from Portsmouth to London Airport. Eastleigh airport local, but mainly short flights to Channel Islands and feeder services.

SERVICES: All marine, radio and radar services can be obtained from Southampton.

REPATRIATION: All facilities exist.

TELEPHONES: None on board.

DEVELOPMENTS: With the opening of the Portsmouth section of the M27 and M275, there is immediate access to the Flathouse and Albert Johnson quays at the Rudmore Roundabout. At present, Thoresen operate daily services to Cherbourg and Le Havre, Brittany Ferries twice daily to St. Malo and Sealink daily to the Channel Islands.

AUTHORITY: Port Manager and Harbour Master, City of Portsmouth for Commercial berths.

PORT TALBOT: 51.35 N. 03.49 W. (See Plan Book)

DOCUMENTS:

Ship's Register.
Test Certificate for ship's gear.
Manifest.
Master's Report to be completed on arrival.
Customs and Health documents as required by H.M. Customs and Port Health Authorities, to be completed on arrival.

PILOTAGE: Station – Swansea Bay. Usual International signals. VHF Channels 16 and 12.

ANCHORAGES: Swansea Bay.

RESTRICTIONS: *Ore terminal* in New Harbour, entrance channel 1.5 miles long, 550 ft. wide. Depth 60 ft. MHWS, 53 ft. MHWN.

MAX. SIZE: *Ore terminal* – 100,000 tons d.w.t. ore carriers – draft 49 ft.

HEALTH: See "Health – All Ports" before first U.K. port.

TUGS: Off Breakwater.

BERTHING:

New Harbour. British Steel Corporation provide 3 unloading appliances on the jetty and also a conveyor-belt system to carry the iron ore to the stocking ground close to harbour and steel works. Grabs on the unloading appliances weigh 22 tons each, and each have a pay-load of 22 tons. The 3 discharging appliances together have an unloading rate of 5,400 t.p.h. Average rate throughout discharge from start to finish of the 3 discharging appliances together is 2,700 t.p.h.

STEVEDORES: ETA advices sent by vessels to local Agent and then advised to British Steel Corp. as stevedores. Labour ordered by Agent from B.S.C.

DENSITY: Ore Terminal 1025.

FRESH WATER: By gravity 10 t.p.h. Harbour pumping 100 t.p.h.

FUEL: By barge or road tanker. Any grade available.

GANGWAY/DECK WATCHMEN: None, but bye-laws state that vessel must be manned.

OPENING/CLOSING HATCHES: Performed by crew.

CUSTOMS ALLOWANCE: Tobacco, 1 oz. per day per man, max. 8 days. Wine/Spirits, 0.25 pint per day per man, every 4 days.

IDENTIFICATION CARDS: Docks Police would require identification to be available.

CONSULS: None at Port Talbot; contact Swansea.

REPAIRS: Facilities exist.

REPATRIATION: All facilities exist.

AIRPORT: Rhoose Airport 25 miles away. Mainly short trips connecting with main airports.

TIME: GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: It is the custom, at the Tidal Harbour, to work on Bank Holidays.
POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.
TELEPHONES: Can be connected on board.
AUTHORITY: Docks Manager, British Transport Docks Board.

SCALLOWAY: 60.08 N. 01.16 W. (See Plan Book)

Scalloway is a small port on the Atlantic side of the Mainland of Shetland. It is only 7 miles by road from Lerwick and many of the services are provided by officials and Agents in Lerwick.
PILOTAGE: Application for Pilot through Scalloway Harbour Radio, Channel 16 VHF. 1 hour advance notice. No particular light or sound signals required. Usual station off Fugla Ness lighthouse on the island of Burra. Alternative station at entrance to North Channel. Vessels awaiting Pilot lie or anchor off Figla Ness lighthouse.
ANCHORAGES: Good holding bottom in Scalloway Bay.
RESTRICTIONS: No night time or tidal restrictions. Detailed and up to date charts essential.
MAX. SIZE: Only restriction, draft limit of 23 ft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Wick radio.
VHF: Vessels should switch to Channel 16 VHF when in vicinity of harbour.
CRANES: Mobile cranes available. Ships usually employ their own cranes.
BULK CARGO FACILITIES: Deep water berth 200 ft. long able to accommodate vessels up to 300 ft. long. Minimum depth varies from 30 ft. at point of pier to 19 ft. at inner end.
STEVEDORES: Should be arranged through Agents.
MEDICAL: Doctor based at Scalloway. Hospital at Lerwick.
FRESH WATER: Available from standpipe. 7 t.p.h. 16p. per ton.
FUEL: Marine gas oil by pipe or from road tanker. 1 hour advance notice.
REPAIRS: Most types deck and engine repairs.
SLIPWAYS: Slip accommodation for vessels up to 180 tons.
SURVEYORS: Lloyds represented at Lerwick.
CUSTOMS ALLOWANCE: See "Lerwick".
REPATRIATION: Facilities for effecting crew changes.
AIRPORT: Sumburgh Airport 25 miles. British Airways several times daily. Tingwall Airstrip 3 miles.
HOLIDAYS: Cargo or shipping operations not affected by holidays.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: No arrangement for placing telephones on board.
SERVICES: Compass adjusting.
SHORE LEAVE: Crew members allowed ashore.
GENERAL: Local shipping Agent Mr. A. S. Fraser, Blacksness Pier. Tel. Scy 636. Pier Master: Magnus Tulloch. Roselea, New Rd. Scalloway. Tel. Scy 324.
AUTHORITY: Shetland Islands Council, Lerwick.

SCAPA FLOW, Orkney Isles (Flotta Terminal): 58.53 N. 03.05 W. (See Plan Book)

OPERATOR: Occidental of Britain Inc.
DOCUMENTS:
Maritime Declaration of Health (Form supplied by Pilot or Agent).
Vaccination List.
Immigration Form H.O. Form IS6.
Crew Lists — 2 required.
Ship's Stores List.
Crew Personal Effects Declaration, Customs Form C.142.
Last Port Clearance.
Ship's Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Radio and Safety Equipment Certificates.
Deratisation Certificate.
Previous British Light Dues Receipts.

Customs and Health: Weather permitting, Customs, Immigration, Health and Agent will embark with the Pilot.

Customs House: Customs clearance inward and outward will be the responsibility of ship's Agents.

Light dues will be paid by the vessel.

Bills of Lading: Bills of Lading; Cargo Manifest, Quantity and Quality Report; Tanker Time and Loading Report; Certificate of Origin; Ship's Cargo and Ullage Reports; Master's Receipt for Shipping Documents and Documentation Transmittal Reports will be prepared by Company Representative.

It is hoped that early departure procedure will be applied in many cases in order to minimise time spent awaiting documentation. Under this the vessel will sail with the Manifest and Bills of Lading with the tonnage omitted, and the figures for insertion will be radioed to the vessel as soon as they are available in order that the Master may insert them.

Ship's Agent: All ship's business other than Cargo and Customs documentation and the shipping documents under section above will be conducted by the ship's Agent.

PILOTAGE: Pilot vessels *Scapa Pilot* and *Scapa Patrol* watch VHF Channel 16.

Inside pilot station (58° 46′ N., 03° 07′ W.) located 2.0 miles 180° from Cantick Head Lighthouse.

Unfamiliar vessels, VLCCs, also any vessel without full information about the unusually strong currents in Pentland Firth is recommended to embark the Pilot at the appropriate outside position (Refer to Tidal Stream Atlas, Admiralty Publication H.O. Number NP 209).

Port restrictions which may cause delays: Weather preventing embarkation of Pilot at either inside or outside positions.

Local wind conditions in Scapa Flow preventing a safe approach to the berth.

Remarks: In Scapa Flow the weather conditions, in particular the wind, can change suddenly and quickly deteriorate, not only in Winter but at any time of the year.

Mooring Masters: A Company Mooring Master will board vessels to the Northward of the Calf of Flotta or at her designated anchorage within Scapa Flow prior to berthing at any Terminal Facility. A Company Mooring Master will be on board during the time that a vessel is moored and he will liaise between the Terminal and ship personnel throughout any deballasting, loading or discharging operation.

The Company Mooring Master may ensure that Masters of vessels are familiar with, and strictly observe, all local regulations concerning the safety of operations and pollution of the sea by oil whilst laid at the Company's facilities.

Vessels using the Company's facilities are required to provide the Mooring Master with accommodation and messing of a standard equivalent to that enjoyed by the vessel's officers.

ANCHORAGE: Inside Scapa Flow several anchorages are available depending upon prevailing winds. Sea anchorage outside, in the approaches to the Pentland Firth, is not possible.
APPROACHES: The approach to the Terminal is through the Pentland Firth from East or West, and then Northward through Hoxa Sound, the main entrance to Scapa Flow. Consult Admiralty Sailing Directions Vol. 1, and Admiralty Tidal Stream Atlas for Orkney and Shetland, Publication No. 209. Principal charts are as follows and Decca coverage is available: Admiralty Chart Nos. 2162, 2581, 35.
MAX. SIZE: See "Berthing".
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Arrival Notices.

Pilots: By coastal radio station 24 and 12 hours prior to arrival. VHF contact at least 3 hours prior to arrival at the pilot station.

Terminal: By coastal radio station 7 days, 72, 48 and 12 hours prior to arrival at the pilot station.

VHF contact should be established at least 3 hours prior to arrival at the pilot station.

The Terminal must be advised by VHF via the "Harbour Control", when the Pilot has boarded or when 6 miles from Stanger Head at the entrance to Hoxa Sound.

INFORMATION REQUIRED PRIOR TO ARRIVAL:

Radio advice prior to arrival: Terminal operated by Occidental of Britain, Flotta Terminal, telex 75212 (OXYOPS G), via Portishead Radio, of ETA with following details. Also advise Agent of ETA, drafts fore and aft for arrival, and any immediate requirements on arrival.

aaa – Arrival and sailing drafts.
bbb – Gross, net and Summer d.w.t.
ccc – Last port and destination.
ddd – Cargo requirements in metric tonnes.
eee – Maximum loading rate.
fff – Grade of previous cargo.
ggg – Quantity of slops, water content, where stowed, if detergents used during tank cleaning.
hhh – Quantity of clean cargo tank ballast and geographical position uplifted.
jjj – Quantity of permanent ballast and geographical position uplifted.
kkk – Total time for deballasting.
lll – Possibility to load and deballast simultaneously maintaining a 2 valve separation?
mmm – Number and size of cargo manifolds.
nnn – Availability of reducers to adapt manifolds to suit 16 in. (150 ASA) flanges (3 required)?
ooo – If bow mooring device fitted, diameter of pin and width jaw end link of mooring 80 mm. in diameter (2 mooring lines required forward).
ppp – Maximum 10 tons SWL derrick required on portside.
qqq – Accommodation ladder rigged to starboard.

Update ETA 48 hours and 24 hours prior arrival.

VHF: *Harbour Pilots and Harbour Control:*
VHF Listening: 16 Telex: 75412
Working: 9, 11 and 20

Mooring Masters/Terminal:

Mooring Masters	161.15	Private Frequencies Only
Terminal	161.30	
Loading Operations	161.15	Private Frequencies Only
,, ,,	161.30	

N.B. Launches are fitted with VHF Listening Channel 16
Working Channel 14, 12, 8, 6

TUGS: 2 tugs (each 2,500 h.p.,of 37 tons bollard pull) are available, and compulsory, for berthing. They are both fire fighting tugs and equipped with Warren Springs pollution dispersent equipment.

Whenever a tanker is on a berth, 1 stand-by tug is anchored in the close vicinity for safety and pollution purposes. Fire wires must be rigged off-side forward and aft.

READINESS: *Notice of Readiness to load/discharge:*

Notice of Readiness will be accepted subject to the following conditions;—

a. The Terminal is open (this decision shall be communicated to the Master of the vessel by the Company).

b. i) The vessel has been boarded by the Company Mooring Master prior to her proceeding towards the berth or

ii) The vessel has anchored within the anchorage area awaiting a berth.

N.B. Although vessels will be loaded in order of Acceptance of Notice of Readiness, it should be borne in mind that Acceptance of Notice of Readiness is contingent upon complete compliance with all the requirements of Port Conditions.

c. Acceptance of Notice of Readiness may be withdrawn by the Company upon the occurrence of any of the following events:—

The decision by the Mooring Master that the vessel's drafts, equipment and/or appurtenances are not suitable for berthing at the Terminal. If this decision has not been taken, for reasons within the Mooring Master's control, within 24 hours from Acceptance of Notice of Readiness, the Company shall be deemed to have waived its right to withdraw acceptance under this sub-paragraph.

Any supervening decision of the Harbour Authority which prevents the vessel from berthing.

N.B. A derrick or crane with a safe working load of not less than 7.5 tons is required for handling hoses at the SPM berths.

BERTHING:

Position:

SPM 1: Lat. 58° 52′ 11.86″ N. Long. 3° 07′ 20.68″ W.

SPM 2: Lat. 58° 52′ 17.72″ N. Long. 3° 05′ 47.79″ W.

Main Control Building (Radio Mast): Lat. 58° 50′ 31.05″ N. Long. 3° 07′ 08.01″ W.

SPM Particulars:

Pillar Type Single Buoy Mooring – 2.
Tanker Size – 35,000 – 200,000 d.w.t.
Minimum Water Depth – 75 ft.
Max. Draft – 72 ft.
Mooring System Chain: 2.625 in.×200 ft. with floatation.
Crude Manifolds – 2×16 in.
Ballast Manifolds – 1×16 in.
Maximum Loading Rate – 80,000 bbls.p.h.
Hose Weight – Minimum 7.5 tons

Ballast connection is positioned aft of the 2 crude connections.

A load monitoring system is fitted to each SPM giving constant strain readings to the Terminal Control Room and the Mooring Master on board the tanker. In adverse weather conditions strain gauge readings will indicate when vessel should prepare to vacate the berth.

LPG/Crude Oil Jetty:

Finger type jetty with breasting dolphins.
Tanker Size – 4,000 – 150,000 d.w.t.
Minimum Water Depth – 63 ft.
Maximum Draft – 62 ft.
LPG Manifolds – 1×10 in. loading plus 1×10 in. vapour return.
LPG Loading Rate – 10,000 bbls.p.h.
Crude Manifolds – 4×16 in.
Crude Loading Rate – 80,000 bbls.p.h. maximum.
Ballast Manifold – 1×16 in. (crude gantry only).
Maximum Deballasting Rate – 40,000 bbls.p.h.

Terminal Capacity:

1. Crude Oil:

There are 5 tanks, each of 500,000 bbls. nominal capacity for storage of stabilized crude oil, plus a further 2 of 1,000,000 bbls. each.

2. Liquid Petroleum Gas:

There are 2 tanks, each of 100,000 bbls. nominal capacity for storage of propane.

Remarks: In certain current and wind conditions on the SPMs, it may be desirable to keep the propeller turning very slowly astern to prevent overriding, or, possibly some revolutions ahead in an attempt to reduce the tension in the mooring chain during strong winds.

When ship's piping does not permit the pumping of permanent ballast through the manifold, the possibility to load some cargo prior to deballasting the cargo tanks' clean ballast may be granted by prior arrangement with the terminal. In all cases where ships intend to deballast and load simultaneously there must be at least a 2 valve separation.

DENSITY: 1025.

MOORING AND HOSE HANDLING:

On SPMs: Ship's derrick and manifold connections will require to be prepared on the port side. An accommodation ladder will be rigged to starboard with a pilot ladder ready to port.

Securing equipment for single chain mooring forward and hose connecting gear will be hoisted on board from Company work launch by ship's derrick. A good mooring line will be required from forecastle head as a messenger for the buoy mooring.

Tanker Loading Pier: The loading pier is equipped with rigid articulated pipe arms mounted on gantries for loading liquid petroleum gas and also for loading crude oil. The crude oil gantry is also fitted with a ballast discharge arm.

There is an access roadway between the Pier head and the shore. Mooring lines are run to dolphins by terminal mooring boats. Vessels with tension winches when moored at the pier must have winches on 'Manual brake'.

Arrival Draft: Vessels must arrive at the Company's facility in an adequate ballast condition compatible with safe manoeuvring during handling. Excessive trim or insufficient ballast could incur delay until such time as an acceptable condition is reached.

BALLAST: All berths are equipped with water ballast discharge lines. There is a water ballast tank of 500,000 bbls. capacity and a ballast treating facility capable of handling 40,000 bbls.p.h It is prohibited to discharge water ballast into Scapa Flow.

Bilge Ballast Discharge: Vessels should arrive in Scapa Flow with clean ballast only.

The discharge of bilges and/or ballast by vessels into Scapa Flow is strictly prohibited.

N.B. All ballast water including permanent ballast must be discharged through the Terminal ballast reception and cleaning facility.

Discharge of ballast and simultaneously lifting of cargo is not permitted unless approval has been given by the Mooring Master.

The salvage in ballast shall become the property of the Company, in consideration of the Company's operation of the Terminal ballast reception and cleaning facility.

MEDICAL: Medical and dental services are available by arrangement. Hospital facilities are available at Balfour Hospital, Kirkwall.

FRESH WATER: Only available from 1 water barge of 200 tons capacity, rate 30 to 40 t.p.h. Cabled advice or requirements helpful.

FUEL: Bunkers not available at present, but lubricants in small quantity available. Ships should cable requirements to Agent as soon as possible.

REPAIRS: There are no dry-docking facilities available, but local engineering firms undertake minor repairs to machinery and equipment.

Immobilisation of engines: Not allowed on any of the berths, and not recommended when at anchor. When at the anchorage, however, in special circumstances, and provided the Harbour Master's permission is first obtained, it may be possible.

TRAVEL: There are daily air services, during the week, to Aberdeen, Inverness, Glasgow and Edinburgh from Kirkwall Airport. There is no service on Sunday, There is a daily ferry service from Stromness to Scrabster to connect with British Rail. During the Winter months there is no service on Sunday.

CONSULS: Denmark, Netherlands, Norway and West Germany.

LAUNCH SERVICES: Launch services from Flotta and SPM berths are available by arrangement with local Agents to Kirkwall/Stromness.

SHORE LEAVE: There are no restrictions on shore leave for ships' personnel. For vessels moored at SPMs arrangements can be made with the Agent for a launch service to be operated to the shore. For safety reasons, the boat selected for this service must have good stability, to prevent accidents in cases of hazardous boarding due to weather conditions.

SAFETY: Should communications fail, the Mooring Master will authorise continuous soundings of the Ship's whistle or siren as a signal to stop loading (ships in the vicinity capable of so doing should inform the Terminal Control by VHF that this signal is being sounded in case it is inaudible ashore). Ships hearing the signal and unable to contact the Terminal should inform "Harbour Control"

SERVICES: Stores are of good quality, and the laundry facilities are good, but limited. Tank cleaning and dirty ballast facilities are not available.

GENERAL:

Accidental Spills and Leakage: All oil spills and leakages must be immediately reported to the Mooring Master, who will inform the Harbour Authority forthwith. All deballasting/loading/discharging operations will be immediately suspended until the cause of the spill/leakage has been determined, and rectified to the satisfaction of the Mooring Master, and the Harbour Authority.

Galley and Other Refuse: Dumping of all refuse into Scapa Flow and approaches is prohibited. Refuse must be retained on board in sealed containers. (Vessels in port over a long period may make arrangements with their local Agent for collection).

Lighting: Sufficient lighting must be provided in the way of all overboard discharge points to facilitate detection of leaks or spillage. Adequate lighting must also be provided at the loading manifold.

Lifting of Stores; When tankships are at SPM's, loading or off-loading of stores, provisions, drums or any other goods or articles on, to or from the main tank deck is prohibited while cargo is being lifted.

Under certain circumstances and with the approval of the Company's Mooring Master, stores may be worked on the poop during the cargo lifting.

When tankships are moored at the pier, vessels and boats are prohibited from coming alongside during cargo lifting, unless all cargo operations are shut down, all tank openings are closed and secured, and permission from the Mooring Master has been obtained.

Working of stores over the pier will not normally be allowed.

During Loading/Deballasting Operations at SPM's: Mooring Masters will carry Company communication equipment. Ship's VHF must also be available to the Mooring Master at all times. Ship's whistle must be available throughout the time a Mooring Master is on board.

Emergency signals in the event of complete communication failure will be as follows:—

By day: Continuous blasting of ship's whistle accompanied by the hoisting of 2 black balls in a position conspicuous to the Terminal Control Room.

By night: Continuous blasting of ship's whistle accompanied by continuous flashing on an Aldis type signal lamp aimed towards the Terminal Control Room.

In the event of such a communication failure all loading operations shall cease until an effective means of communications has been established.

AUTHORITY: Orkney Islands Council, Kirkwall, Orkney.

AGENT: John Jolly, 21 Bridge Street, Kirkwall, Orkney Isles. Telegraphic Address: "Jolly Kirkwall Telex", Telex 75253. Tel. Kirkwall 2268 (24 hrs. answering service) and 3462. VHF call sign (Private frequency 161.25 mHz): Jolly.

SHARPNESS and GLOUCESTER: 51.43 N. 02.29 W. (See Plan Book)

The Port of Gloucester comprises the wet docks at Sharpness and Gloucester which are connected by a ship canal named "The Gloucester and Berkeley Canal".

PORT LIMITS: Sharpness Dock entrance.

DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B.6.
1 Stores Lists.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).

In addition Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory. Masters of vessels bound for the Ports of Gloucester, Sharpness, Chepstow and Lydney requiring the services of a Pilot at the Barry Roads Station must give at least 24 hours of their intended arrival at the Pilot Station. Failure to give this notice could lead to a vessel being delayed. Draft and G.R.T. are also required. Masters who expect their passage time to be less than 24 hours should send advice from their sailing port with gross tonnage, draft, speed and ETA. Masters of vessels bound for Chepstow should also state mast height above the appropriate water line and whether masts can be lowered. (Vertical clearance limited by Bridge to 52 ft. (15.8 m) above M.H.W.S.)

Vessels are boarded at Barry Roads by the Cardiff Pilot Cutter which is equipped with VHF. Radio contact with the Cardiff Pilot Cutter should be made not later than 1 hour before arrival at Breaksea L.V. In fog ships sound "9" (4 longs, 1 short). Pilot replies the same. Masters can send ETA's direct to the Pilotage Agent, Sharpness. Telephone Sharpness 323.

Dock Pilots: Dock Pilots are available, not compulsory but advisable for berthing in Sharpness Dock, transit of the Sharpness Canal and in Gloucester Dock.

ANCHORAGES: Barry Roads afford good anchorage in moderate weather for vessels awaiting a Pilot.

RESTRICTIONS: Three feet water clearance over outer sill for vessels of maximum draft 21 ft. 6 in. Neap tides impose certain restrictions.

Note: The River Severn at Sharpness dries out at low water.

MAX. SIZE: Maximum Length — no restriction. Maximum beam — 55 ft. Maximum draft — 21 ft. 6 in.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Niton Radio, Lands End Radio, Ilfracombe Radio.

VHF: Sharpness Radio Channels 16 and 14. Range normally within pilotage waters only.

TUGS: *(River):* Larger vessels normally pick up tugs off Avonmouth if required by Pilot. *(Dock Tugs):* Not suitable for river work. Two tugs available in Sharpness Dock and for use between Sharpness and Gloucester if required. All tugs take ships lines.

BERTHING: Max. draft 21 ft. 6 ins. Fresh Water. Range of dock level 9 in.

Available Berths: 10 to 14 berths depending on ship length. This includes a Container berth and a scrap berth. Available length of Quay — 12,000 ft.

Cargo Equipment and Methods: Cranes 8 × 3-tons, 2 × 6-tons (3 × 6-tons) all Portal and 1 Scotch Derrick of 32 tons. Grabs, Slings and Pallets, etc. Load/discharge by shore gear.

BULK CARGO FACILITIES: 2 grain silos, 1 fixed suction plant.

STEVEDORES: British Waterways Board.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible if any medical attention is required. All facilities available.

DENSITY: 1000/1003.

FRESH WATER: Available by stand pipe, 20 t.p.h.

FUEL: Through Agents, 12 hours notice, most grades available.

FIRE PRECAUTIONS: According to local laws available on request.

CONSULS: See "Bristol".

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCK: 360 ft. by 47 ft. by 14 ft. over blocks.

SURVEYORS: Most Societies are available.

GANGWAY/DECK WATCHMEN: Ships personnel, but watchmen can be arranged if necessary.

HATCHES: Opened by ship's crew.

CUSTOMS ALLOWANCE: Tobacco — Home Trade, equivalent to 0.25 lb. tobacco. Foreign Trade, equivalent to 0.5 lb. tobacco. Wine and/or Spirits — Officer, equivalent of 1 quart of wine per day. Crew, equivalent of 1 bottle of wine in 4 days.

REPATRIATION: All arrangements through Agents.

AIRPORT: London or Birmingham within 2 hours. Local taxi service available.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Easter (varies). May Day. Spring Bank Holiday (last Monday in May). August Bank Holiday (varies, usually last Monday in August). Christmas Day (25th December), Boxing Day (26th December). Work can usually be arranged on these holidays although unusual to work 25th/26th December.

POLICE/AMBULANCE/FIRE: Telephone 999 ask for service required.

TELEPHONE: No ship to shore connection. Public telephone kiosks available.

SERVICES: Taxi. Laundry. Ship chandlery.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Not necessary unless being repatriated.

REGULATIONS: British Waterways Board Byelaws 1962.

GENERAL:

Gloucester and Berkeley Canal and Gloucester Dock:

Maximum size of Vessel: Length 190 ft. Beam 29 ft. 6 in. draft 11 ft. 6 ins.

BRIDGES: 16 swing bridges between Sharpness and Gloucester. No mast height restrictions.

AUTHORITY: British Waterways Board, Dock Office, Sharpness.

SHOREHAM: 50.50 N. 00.15 W. (See Plan Book)

DOCUMENTS and all general information, refer to "London". Distance from London, 50 miles.

PILOTAGE: Trinity House Pilotage Service. Pilot Cutter equipped with VHF.

ANCHORAGE: Off Harbour. Depths as per English Channel Charts.

RESTRICTIONS: No night restrictions. Port normally accessible 4 hours before and 2 hours 40 minutes after high water. According to size and draft these times can be extended.

Main entrance channel, 400 ft. wide, leads into a 300 ft. channel to the Eastern arm, and a 135 ft. channel for the Western arm.

Dimensions of Prince Philip Lock: 374 ft. length, 57 ft. width.

MAX. SIZE: Length 347 ft. 06 in. Draft 21 ft. subject tide.

HEALTH: See "Health – all ports" before first UK port.

RADIO: Niton Radio/Northforeland Radio.

Port operation and information service manned continuously, contact by VHF calling Channel 16, working Channel 14. Station is situated on the middle pier.

TUGS: One tug, subject to availability. Tug lines used for which no extra charge.

BERTHING: Vessels passing lock gates have locking period of 4.5 hours before high water to 2 hours 40 minutes after – both according draft. Heavy lift crane, 35 tons capacity for container handling.

A bulk wine terminal capable of handling 1,250,000 gallons of wine is available.

A Ro-Ro berth has been constructed at the East end of Aldrington Basin.

STEVEDORES: Reasonable ETA is sufficient for gangs to be called.

MEDICAL: All facilities available.

DENSITY: Approx. 1025.

FRESH WATER: Available at most berths.

CONSULS: Danish.

DEVELOPMENTS: The gasworks of 32 acres have been purchased and developed.

AUTHORITY: Shoreham Port Authority.

SOUTHAMPTON 50.54 N. 01.24 W. (See Plan Book)

DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment and Safety Construction Certificate.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Compulsory, with usual regular Home Trade and other small exemptions. In addition to 48 hours notice to local Agent, advise Nab or Needles Pilot as appropriate, ETA 48 hours and again 2 to 3 hours immediately prior to arrival. The Nab and Needles stations are maintained by fast launches under the control of the Duty Pilot at The Pilot Station, 37 berth, Southampton Docks. Duty Pilot keeps a continuous watch on VHF Channel 16; call sign NABPILOT or NEEDLESPILOT as appropriate. Working frequency; Channel 9 only, but can listen on Channels 6, 12 and 14. No medium frequency: M/F and R/T messages via NITONRADIO. Duty Pilot's GPO telephone numbers: Southampton 32345 and 32346.

The launches only put to sea when required. *Failure to send an accurate ETA 2 to 3 hours before arrival could cause delay to the offending vessel.*

The Nab and Needles stations also provide Pilots for vessels bound for Portsmouth, Cowes or other small ports within the Trinity House Southampton and Isle of Wight Pilotage District. The limits of the District are defined by a line drawn from a point 180° – 1 mile from Selsey Bill to a position in 50° 40' N., 0° 57' W. (Nab Tower), thence to a point 180° – 1 mile from Culver Cliff, thence to a position 180° – 1 mile from St. Catherine's Lighthouse and thence direct to Peveril Point, but excluding the Poole Pilotage District (q.v.).

Strict compliance with the requirements of the Merchant Shipping (Pilot Ladders) Safety Rules is requested by the Pilots, who may refuse to board vessels with unsatisfactory and dangerous ladders. Manropes are not required. Ladders should reach to approximately 3 ft. from the water, each rung resting firmly against the ship's side; and a good lee provided whilst making approximately 5 to 7 knots headway.

Eastern Approaches or Nab Tower. The station is maintained by 40-ft. fast launches, black hulls, white wheelhouses, showing international signals. VHF Channels 6, 9, 12 and 16. Vessels under 40 ft. draft are normally boarded between the "New Grounds" and "Dean Tail" light buoys, approximately 2 miles NNW of Nab Tower, although in bad weather, boarding at the "Warner" buoy or St. Helen's Roads might be advised by the Duty Pilot. Launches operate from Ryde pier or from Portsmouth Harbour.

Vessels over 35 ft. draft are restricted by tide for time of entry, and will be advised by the Duty Pilot. Vessels of 40 ft. draft and over use the Nab Channel and a message advising Tanker Master of transit times will be sent by Essoship Fawley and confirmed prior to arrival by Duty Pilot by VHF.

The Nab Channel has a limiting depth of 39.7 ft. (although 43 ft can be carried to West of centre line (1976)) below Chart Datum (April 1976). Pilot will board all vessels of 40 ft. draft and over in a position 2 to 3 miles South of the Nab Tower. Masters of such vessels are strongly recommended not to approach closer than 2 miles to the Nab Tower without a Pilot, owing to strong tidal streams. It is advisable for a deep-drafted ship to anchor 3 miles South of the Nab Tower if waiting for the tide. Advice will always be given on request to the Duty Pilot by VHF.

Pilot *will not* board vessels under 40 ft. draft outside the defined pilotage district unless specifically requested by the Master to do so. The additional "Out of District" charge for boarding beyond the normal limits will be debited to Owners.

Western Approach – Needles: Vessels drawing more than 31 ft. are advised to enter via the Nab. Masters are strongly urged not to proceed beyond the Fairway Buoy without a Pilot, especially on the flood tide. Safe anchorage in vicinity of "Fairway" Buoy.

Station maintained by 40 ft. fast launch, black hull and white wheelhouse, showing international signals. Launch operates from Yarmouth Harbour or Lymington. Needles pilot launch is fitted with VHF Channel 6, 9, 12 and 16. No medium frequency.

When it is considered that the weather is deteriorating to the extent that the boarding and landing of Pilots could in the near future become dangerous, a message will be sent to all ships through Nitonradio, as follows:

"Needles Pilot operating bad weather routine. Vessels should ascertain at least 3 hours before their ETA Needles whether a Pilot will be available. This information can be obtained either through Niton Radio or direct from Needles Pilot on VHF."

If it is not safe to ship or land the Pilot at the Needles, Masters will be advised to proceed to the Nab.

In poor visibility a vessel requiring Pilot at either Nab or Needles uses a distinguishing signal of "G" to which the pilot launch will reply with "H".

GENERAL NAVIGATION: A Duty Operations Officer, responsible to the Dock and Harbour Master Southampton maintains a continuous watch in the Port Signal and Radar Station (37 Berth): call sign "Southampton Port Radio". He is to be informed prior to any movement to, from or within the port area and will give information on the movement of other vessels.

Harbour Radar Information and guidance will be given on request. The Radar reference line shown on the Admiralty Charts is superimposed on the Harbour Radar displays.

Particular attention should be paid by Masters to the designated "Reporting Points" marked on the Admiralty Charts. Reports should be made on VHF to Southampton Port Radio, to enable the proper identification and co-ordination of the ship movement, to be made to the benefit of all mariners navigating within the Solent area. This applies equally to naval and to non-compulsory vessels.

The following VHF Channels are operated within the port.

Southampton Port Radio: Channels 16, 14, 12, 18, 20 and 22.

Harbour Patrol Launch (Call sign Southampton Patrol) Channels 16, 14, 12, 10, 8 and 6.

Nab and Needles Pilot Launches: Channels 16, 14, 12, 9, 6 and 0.

Nab and Needles Pilot Stations: Channels 16 and 9. (Duty Pilot).

Southampton Pilot Launch (call sign Southampton Pilot) Channels 16, 14, 12, 9, 6 and 19.

Southampton Pilot Station (call sign Southampton Pilot) Channels 16 and 9 (Duty Pilot).

Tugs: When berthing vessels: Channels 8 or 10.

Esso Petroleum Terminal, Fawley: Channels 16, 14 and 19.

B.P. Oil Ltd., Hamble. Channels 16 and 14.

A patrol launch (Harbour Master flag by day, all-round blue light by night) is controlled by the Duty Operations Officer Southampton for pollution detection and keeping channels clear of pleasure craft for the passage of large vessels.

Vessels *(a)* drawing more than 10.5 m. *(b)* more than 288 m. in length or *(c)* of more than 100,000 d.w.t. exhibit a large black cylinder by day and 3 vertical red lights by night. Vessels showing these signals are not to be passed or overtaken within channel limits between the "West Bramble" and "Hook" light buoys, these vessels are considered to be constrained by their draft or restricted in their ability to manoeuvre and may not be able to comply with the Collision Regulations at other times. Will indicate inability by 5 short blasts on the whistle. "Clear channel" control is exercised by the Duty Operations Officer at Port Signal and Radar Station, 37 berth, Southampton Docks. The Thorn Channel has a limiting depth of 12.6 m. (April 1976) at low water datum.

Up to 7 vessels of under 91.4 m. in length are permitted to anchor out of the channel to the East of the "Hook" Buoy in the designated Small Ships Anchorage, the limits of which must be strictly observed. Three numbered anchor berths are available in an emergency for vessels not exceeding 168 m. in length in Fawley Reach, where vessels must moor to 2 anchors. Permission to use the Small Ships and numbered Anchorages must be obtained from the Duty Operations Officer, Southampton Port Radio.

MAX. SIZE: The largest passenger and container vessels call regularly at Southampton. Tankers: Fawley can accept partly loaded VLCC's up to 14.9 m. draft.

HEALTH: See "Health-all ports" before first UK Port.

TUGS: 2 tugs are permanently stationed at Fawley; if more than 2 tugs are required it should be noted that week-end requirements have to be advised to the tug operators not later than 1800 hrs. on Friday of each week.

If a vessel required more than 2 tugs and is due to arrive at Fawley between 0001 hrs. Saturday and 0900 hrs. Monday, ETAs must be submitted well in advance of 1600 hrs. on the Friday prior to arrival. It is usual to use the wires provided by the tugs for towing.

BERTHING: The Pilot boarding the ship at the Sea Station or anchorage will also berth the ship. Non-compulsory vessels can obtain or disembark a Pilot in the vicinity of the "N.W. Netley" or "Hook" buoys by contacting "Southampton Pilot" on VHF.

Dock or Quay	*Berths Nos.*	*Nominal Dredged Depth * below Chart Datum †*		*Length of Quays*

	67	5.0	16.5	103	340
	68-69	5.3	17.5	213	700

Other berths are available. Lesser draft berths not shown. The depths of water are maintained as far as practicable, but are subject to variation and are not guaranteed.

* To find the depth of water in the berths add the tidal rise to the depths shown in the above table.

† Chart datum is approximately the lowest low water level.

TANKERS: Esso Marine Terminal, Fawley. There are 9 berths at Fawley, all running parallel to the main channel. The 5 berths on the outside of the jetty facing the main channel are for ocean-going vessels, No. 1 berth being the most Northerly. The 4 berths on inside of jetty are for small coastal craft. No. 6 berth being the most Northerly.

The following LWD depths are dredged and subject to alteration:

	Alongside	*Approaches*	*Distance between Centres*
Berth No. 1	33.5 ft.	33.5 ft.	800 ft.
,, No. 2	37.5 ft.	35.5 ft.	800 ft.
,, No. 3	41.5 ft.	45.0 ft.	800 ft.
,, No. 4	49.0 ft.	45.0 ft.	800 ft.
,, No. 5	49.0 ft.	45.0 ft.	1,000 ft.
,, Nos. 6-9	18.5 ft.	18.5 ft.	400 ft.

Emergency quick-release swivel mooring hooks are used on the outside berths, where vessels moor with 2 head-and-stern-ropes, 3 breast-ropes at each end and 2 springs at each end.
Dredged channel for Berths No. 6-9 is 375 ft. wide.

Shore gangways are available on Berths 4 and 5 for vessels of 47,000 d.w.t. and over.

Dirty Ballast Facilities: Dirty ballast facilities on all berths with maximum storage of 14,000 tons.

Crew members are not allowed to walk through the Refinery. Transport is provided to Fawley Village and to Southampton at intervals during the day. There are no shopping facilities at the Terminal, although cigarettes are available from slot machines at the Marine Terminal Building. GPO call boxes (coin telephones) are placed on the jetty.

B.P. Terminal, Hamble. Situated immediately opposite Fawley; has two main berths on the outside faces and a small coastal berth (No. 3) on the inner face of No. 2 berth. Berth No. 1 is the Northerly berth, and is used for larger vessels, having a depth of 31 ft. 6 in. below PLWD alongside and in the approaches. The berth face is 250 ft. long, so head or stern moorings are taken to 2 mooring buoys at the N.W. end of No. 1 berth. They are hook buoys; no lashings or mooring shackles are needed. No. 2 berth is similar in dimensions to No. 1 berth, the distance between centres being 530 ft. No. 3 berth is 250 ft. long, with 16 ft. 6 in. alongside at PLWD and 13 ft. in the approaches.

Facilities and services as for Fawley with the exception of transport no transport being available within the depot. Ship's personnel are allowed to walk through the installation to Hamble Village where public transport to Southampton is frequent.

All grades of fuel and diesel bunkers and fresh water available on all berths.

BUNKERS AND WATER: All grades of fuel oil and diesel oil are available and water is piped on all berths. Bunkers and stores can also be obtained by barge in Cowes Roads anchorage, but water is not readily obtainable there.

CONSULS:

REPAIRS: All ship repairs can be effected. Largest dry-dock is 1,200 ft. long overall, 135 ft. wide and has 34 ft. over the blocks. Three smaller dry docks are maintained within the Port.

OIL POLLUTION: Southampton Water is an international yachting centre and has many holiday beaches on its shores. Consequently, oil pollution is treated very severely and heavy fines are imposed on offenders.

The Esso Refinery operates a clean-up service, the full economic cost of which is billed to the offending ship.

MEDICAL: Doctors and hospital facilities available. Agent should be advised in advance of any medical attention required.

An organisation exists for hospitalisation of sick seamen from vessels off Cowes, Isle of Wight. Arrange through Nitronradio, Nab, Needles or Southampton pilot or through vessel's Agent. Minimum delay to vessel.

CUSTOMS ALLOWANCE: By statute, crews of vessels in port are allowed 25 cigarettes per day per man. 0.3 litres (0.5 pint) of spirits and 1 bottle of table wine per day per man.

DEVELOPMENTS: A new container berth, 206 berth, is under construction and an additional link-span for Ro/Ro traffic is almost completed at berth 30/1. Transit sheds on the Itchen Quays are being demolished to provide parking spaces for this traffic. A new high-level road bridge is well advanced; it will replace the old Itchen chain ferry.

TIME: British Standard Time is GMT plus 1 hour, reverting to GMT in Winter months.

HOLIDAYS: Good Friday (variable date); Easter Monday (variable date); Spring Bank Holiday (variable date); Autumn Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December); New Year's Day (1st January).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

AUTHORITY: British Transport Docks Board.

AGENT: Keller Bryant & Co., Ltd., Havelock Chambers, 21/22 Queen's Terrace, Southampton. Telephone: (0703) 28566/7/8/9. Telex: 47568, Cables: Keller Southampton. After hours: Telephones: (0703) 734055, (0703) 733270, (0703) 25585.

STORNOWAY: 58.12 N. 06.22 W. (See Plan Book)

PORT LIMITS: Now extended to a line from Southern end of Holm Island on the East to Rugh A'Bhaigh Vaine on the West – approximately 7.5 cables to seaward of Arnish Point Light.

PILOTAGE: Pilotage not compulsory. Vessels requesting Pilot request same with ETA. Boarding off Arnish Point lighthouse.

ANCHORAGES: Anchorage in harbour between Goat Island and mouth of Creed River, 8 fathoms.

RESTRICTIONS: Entry night or day and at any state of tide. No bar on entrance.

MAX. SIZE: 400 ft. by 60 ft. by 22 ft. draft to berth alongside, 600 ft. length by 35 ft. draft for anchorage in bay.

HEALTH: The customary flying of "Q" flag.

Also see "Health – All Ports" before first U.K. port.

RADIO: Wick Radio or alternatively Oban Radio.

RADAR/VHF: R/T-VHF established in harbour, Channels 16 and 12. Emergency messages may be passed through Stornoway Coastguard on 81.8 m.

TUGS: No tugs available at port. Fishing vessels have been used, when necessary, for this purpose.

BERTHING: Vessels can be berthed at any time, provided berth is free.

Roll-on/roll-off ferry terminal for Stornoway/Ullapool service in operation.

Depth of water at low water spring tides: West side No. 1 pier: 24.5 ft. shallowing to 12 ft. at junction of North Beach Quay. East side No.1 pier: 24.5 ft. shallowing to zero at inward end. West side No. 2 pier: 17.5 shallowing to zero at inward end. East side No. 2 pier: 16.5 ft. shallowing to zero at inward end. Inner Harbour decreases from 12 ft. at junction of Esplanade Quay to 8 ft. at upper end of Cromwell Street Quay.

STEVEDORES: Arranged by Agents on receipt of ETA.

MEDICAL: Advance notice desirable, Hospital facilities available in the town.

TANKERS: Normal safety requirements. One tanker berth only 15 ft. mean draft, max. length 220 ft.

DENSITY: Pratically always dead salt; 1025 density.

FRESH WATER: Fresh water available by hose at 15 t.p.h.

FUEL: 24 hours notice required.

GANGWAY/DECK WATCHMEN: Service of watchmen not necessary. Watchmen from shore may be employed if required.

OPENING/CLOSING HATCHES: Normally crew.

IDENTIFICATION CARDS: Not required.

CONSULS: French, Swedish, Norwegian; tel. Stornoway 2012, 2054, 3173 respectively.

REPAIRS: Minor deck and engine repairs can be carried out locally.

DRY DOCKS: No dry dock but one slipway of 750 tons displacement.

REPATRIATION: Facilities exist for this service.

AIRPORT: 3 miles from port, served regularly by BEA from Glasgow, Aberdeen and Inverness.

HOLIDAYS: New Year's Day, Christmas Day and all other local Bank Holidays. Cargo work can be arranged except New Year's Day. (No Sunday work.)

POLICE/AMBULANCE/FIRE: Police, Stornoway 2222 (can deal with all three).

TELEPHONES: Can be arranged by prior application through Aberdeen office.

GENERAL: ETA to be sent 24 hours beforehand so that necessary arrangements can be made.

AUTHORITY: Stornoway Pier and Harbour Commission.

STRANRAER: 54.55 N. 05.02 W. (See Plan Book)

DOCUMENTS: As for other British ports.

PILOTAGE: Not compulsory – no Pilot available.

MAX. SIZE: Largest vessel handled 375 ft. long. Working draft 12 ft. 6 in.

HEALTH: See "Health – all ports" before first UK port.

BERTHING: 3 berths dredged to 14 ft. One with vehicular ramp. Deep water anchorage at Lady Bay.

CARGO GEAR: Portable crane of 10 tons capacity.

TUGS: Not available.

RADIO: VHF watch kept on Channel 16 at Ferry Terminal.
MEDICAL: Hospital in town.
FRESH WATER: Available at Railway Pier.
FUEL OIL: Limited quantities of fuel can be supplied from road tankers.
REPAIRS: Small repairs can be carried out by local engineering firm.
GENERAL: Inshore lifeboat at Stranraer.
DEVELOPMENTS: *New developments at Stranraer:* (Under control of British Rail Shipping and Port Manager) B.R.B. are carrying out the following developments at Stranraer:

1. Area of approx. 5/6 acres to be reclaimed and infilled for use as heavy commercial vehicle marshalling area.
2. Construction of a jetty of approx. 500 ft. in length.
3. Construction of double decked vehicular ramps and linkspans at this new berth.
4. Area at new berth and swinging area off new berth and East Pier being dredged to minimum 5.0 m. at L.A.T.
5. Channel between Spit Buoy (Scaur Buoy) and new berth being dredged to minimum 5.0 m. at L.A.T.

New developments to be completed by January 1979.
AUTHORITY: Stranraer East Pier is controlled by the British Rail Shipping and Port Manager.

Stranraer West Pier is controlled by the Regional Council Harbour Master.

SULLOM VOE: 60.27 N., 01.17 W. (See Plan Book)

GENERAL: The Sullom Voe Terminal is a loading terminal designed to process and export crude oil from the North Sea.

The Terminal, one of the largest in Europe, is initially designed to accept tankers up to 366 m. long with a draft up to 23.8 m. A loading facility for liquefied petroleum gas (LPG) carriers is scheduled to open in 1980.

The Terminal is situated on Calback Ness (60° 27.5′ N., 01° 17′ W.), within Sullom Voe at the S.E. extremity of Yell Sound. Here the processing and storage facilities are located adjacent to the loading berths. The Port Administration and Pilotage Offices are situated on the Eastern shore of the Voe at Sella Ness. From this administration centre, constant monitoring and surveillance of all Port operations will be undertaken.

There are 2 entrances to Yell Sound. The primary route, suitable for large and/or deep drafted vessels lies on the Western side of the Sound, extending from the Northern entrance South between the island of Lamba and the Ness of Queyfirth. Ships which require the use of this channel should approach from the North and rendezvous with the pilot boat at the Northern boarding area.

The S.E. approach is considered suitable for smaller vessels including coastal traffic. Prior to arrival, vessels should advise which approach they intend to use.

Both routes join at the entrance to Sullom Voe, the lead into the Voe is indicated by leading markers located on Fugla Ness. In the case of vessels other than coastal traffic, all manoeuvres South of Lamba Isle will be assisted by tugs.

Ships will generally be berthed starboard side alongside the oil loading berths. This will involve a 180° swing within the Voe in an area indicated by turning lights located on Sella Ness and Scatsta Ness. Vessels may berth port side alongside during adverse wind directions and when departure draft permits.

The turning area has a diameter of 800 m., and allows a LAT depth of 15 m. For the purpose of manoeuvring within the pilotage district, a minimum keel clearance of 2.1 m. is required.

Although current rates of up to 6 knots may be experienced in areas of Yell Sound, records indicate that the maximum current likely to be experienced within Sullom Voe and on the deep draft route is unlikely to exceed 1 knot. The tidal range within the Harbour Area is 2.3 m. at springs and 0.6 m. at neaps, the main tidal current flows to the South on flood tides and to the North on ebb tides.

Strong winds are frequently experienced at Sullom Voe and may be accompanied by sudden strong gusts from any direction. The prevailing wind direction is S.W.

It is essential that whilst alongside the jetty, moorings are tended carefully and regularly and conform with the recommended mooring patterns.

MINIMUM REQUIREMENTS: In the interest of avoiding delays, all vessels programmed for Sullom Voe should comply with the following minima and be fitted with:—

(i) Fully operational radar.
(ii) Fully operational VHF radio with Channels 16, 14, 20 12, 10, and 9.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessel's safety.
(vi) Efficient signalling equipment.
(vii) Fully operational tachometer, rudder and helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.

If any of the above requirements cannot be complied with, Sullom Voe Port Control should be advised prior to arrival.
DOCUMENTS:

General Declaration (C13). In duplicate.
Ship Stores Declaration (C14). In triplicate.
Crew Declaration (C142). In duplicate.
Small Parcels List (C143). Single copy (if appropriate).
Self-Declaration Deck Cargo (DC1). In duplicate (if appropriate).

When the vessel is not boarded on arrival the Master must arrange for 1 copy of each form to be lodged within 3 hours of arrival at the Custom Office, located in the Port Administration Building at Sella Ness.

PILOTAGE: Pilotage is compulsory within the Sullom Voe Shetland Pilotage District. Masters of British registered vessels of less than 1,600 g.r.t. will be eligible to sit an examination to gain a Pilotage Exemption Certificate.

Vessels of less than 300 g.r.t. are exempt from compulsory pilotage under the conditions laid down in Section 12 of the Sullom Voe Pilotage Byelaws.

The district is considered to include all waters contained within an area bounded in the North by a line drawn from the Point of Fethaland to Fogla Lee, and in the S.E. by a line drawn from the Northern extremity of the Ness of Sound to the Northern extremity of Uynaray Island and thence to Mio Ness.

Pilots are available on a 24-hour basis. A continuous VHF watch is maintained on Channel 9, 10, 12, 14, 16 and 20. Call sign "Sullom Voe Harbour Radio".

Pilot Boarding Areas: There are 2 pilot boarding areas located in Yell Sound. Vessels which require to use the main access route should rendezvous with the Pilot at the Northern entrance in a position 080°×1.6′ from the Point of Fethaland light and for vessels intending to use the S.E. Channel off the entrance to Tofts Voe.

Pilot Boats: The Authority will have 2 boats stationed for use at the Port of Sullom Voe.

(i) "Sullom Mareel" LOA 53 ft., service speed 16 knots. (In service.)
(ii) "Sullom Spindrift" LOA 65 ft., service speed 22 knots. (To enter service February, 1979).

The main construction of both boats is of G.R.P. They are fully equipped with modern navigational aids.

The freeboard of each boat is approximately 5 ft.

Pilot Boarding Arrangements: Pilots will normally meet and embark incoming vessels at the pilot boarding areas.

Masters are reminded that high sea conditions are frequently encountered in these areas and they should make every reasonable effort to provide a safe lee.

Pilot Ladder Requirements: All vessels calling at the Port of Sullom Voe must comply with "The Merchant Shipping (Pilot Ladders) Rules 1965" (S.I. 1046).

The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a position where the Pilot can gain convenient access to the ship after climbing not less than 5 ft. and not more than 30 ft.
(iv) Whenever the distance from the water to the point of access to the ship exceeds 30 ft., access from the pilot ladder to the ship shall be by means of an accommodation ladder or equally safe and convenient means.
(v) A light shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be adequately lit.

Pilot Hoists: When a pilot hoist is provided as the method of access, it must be of an "approved" type.

An approved pilot hoist is considered to be one which complies with the recommendations of the "European Maritime Pilots Association".

A copy of these recommendations is available for inspection at the Port Administration Building.

ANCHORAGE: There are no suitable anchorages available to vessels arriving off the port of Sullom Voe. Where Masters are advised that a berth will not be available on arrival it is recommended that after arriving at a position within a radius of 6 miles from Gruney Island (60° 39′ 00″ N., 01° 18′ 00″ W.) from which their notice of readiness should be tendered, they should then stand off the coastline at a distance compatible with prevailing weather conditions, maintaining continuous listening watch on Channel 16 for further instructions from the port control.

Where a berth is available Pilots will as far as possible board ships on arrival.

When proceeding within the pilotage district, all vessels should have both anchors cleared and ready for letting go.

MAX. SIZE: See "Berthing" and "Loading/Discharging Facilities". Berth No. 2 is in operation. Berth No. 1 will be in operation March 1979.

HEALTH: With effect from April 1978, the new procedure for health clearance of ships applies at the Sullom Voe Terminal.

The Master has no need to obtain health clearance unless:

(i) An authorised officer otherwise directs.
(ii) The occurrence on board of death or illness as laid down in the Public Health (Ships) (Scotland) Regulations.
(iii) Any occurrence of abnormal mortality among rats or mice on board.

A proportion of ships will be boarded and checked.

Where it is necessary to obtain "Free Pratique" for health purposes, the Master should complete the following documents:

(i) Maritime Declaration of Health.
(ii) A list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

Deratting Exemption Certificates: The Sullom Voe Terminal is an "approved" Port and Deratting Exemption Certificates will be issued by the local health authority.

Also see "Health – All Ports" before first UK port.

RADIO:

ETA Requirements: Vessels arriving at Sullom Voe are required to provide the Pilotage Authority with the following estimated times of arrival:

(i) At least 24 hours prior to arrival or on leaving the last port, whichever is later.
(ii) Confirm the vessel's ETA at least 6 hours before arrival at the seaward limit of the Harbour Area and thereafter notify of any significant change in excess of 1 hour.
(iii) On coming within VHF range of "Sullom Voe Port Control" establish VHF contact for the purpose of updating the ETA.

Pre-Arrival Information: Prior to arrival, all vessels calling at Sullom Voe should provide "Sullom Voe Harbour Radio" with the following information:

(i) Name of vessel.
(ii) Port of Registry.
(iii) Name of Master.
(iv) Gross Tonnage.
(v) LOA.
(vi) Draft.
(vii) Whether to berth or transit.
(viii) Whether laden or ballasted.
(ix) Whether vessel is carrying segregated ballast.
(x) Location where segregated ballast was loaded.
(xi) Segregated ballast quantity.
(xii) Dirty ballast quantity.
(xiii) Which pilot station on arrival.
(xiv) Pilot boarding arrangements.
(xv) Number of crew.

VHF: All shipping movements within the district are monitored from a Port Control Room located in the Port Administration Building at Sella Ness.

The Port Control Room is manned on a 24-hour basis by Marine Officers who are licensed Pilots.

These Marine Officers, in their capacity as Control Room Officers, maintain a continuous VHF and radar watch. They provide advice to Masters and Pilots on all navigational aspects including weather forecasts within the area, direct shipping movements within the port and liaise with the Terminal facilities and emergency services.

The following VHF Channels are constantly monitored at the Port Control Room.

Channel 16	Calling and distress.
Channel 9	Pilotage berthing and unberthing.
Channel 10	Pilotage (port emergency, fire or oil pollution).
Channel 12	Pilotage (port control general).
Channel 14	Pilotage (radar assisted pilotage).
Channel 20	Pilotage (alternative port control general).

The call-sign for Sullom Voe Pilots is "Sullom Voe Port Control".

In addition to the foregoing *Sullom Voe Terminal* will constantly monitor Channels 19 and 46 over which pre-arrival information concerning loading procedures will be communicated.

Since the Terminal has no direct access to Channel 16, initial contact should be made on Channel 19 using call sign "Sullom Voe Terminal" or in the event of difficulties through "Sullom Voe Port Control" initially on Channel 16.

It is emphasised that Masters should try to contact the Terminal as soon as possible prior to arrival at the pilot boarding area so that loading information may be exchanged before commencing the inward passage through Yell Sound.

Control of Traffic: The Port Control Room directs the movements of all vessels within the pilotage district. Overtaking and passing is prohibited within an area bounded by a line joining Queyfirth Light and the Northern extremity of Lamba Island and a line joining Skaw Taing Light and the front leading light on Gluss Isle.

Reporting Positions: During the transit of Yell Sound, all vessels are required to report to the Port Control Room when passing the following positions:

"A"	122.5°×1.5′ from Gruney Island Lt	(60° 38.6′ N., 1° 15.3′ W.)
"B"	274°×0.5′ from Muckle Holm Lt	(60° 34.9′ N., 1° 16.9′ W.)
"C"	094°×0.4′ from Queyfirth Lt	(60° 31.5′ N., 1° 18.7′ W.)
"D"	270°×0.5′ from Skaw Taing	(60° 29.3′ N., 1° 16.7′ W.)
"X"	355°×1.25′ from Mossbank Lt	(60° 28.5′ N., 1° 10.7′ W.)

RADAR: Full radar coverage exists for Yell Sound and Sullom Voe.

The main scanner, located on the hill of Vats Houllands (60° 27′ 57″ N., 1° 17′ 28″ W.) is connected by microwave link to displays in the Port Control Room.

Port Control Officers maintain a continuous radar watch, the transit of each vessel is monitored and recorded and advice is available to vessels on request.

TUGS: At present a fleet of 4 harbour tugs provide a towing service for vessels at the Sullom Voe Terminal. These are stationed at the Sella Ness Tug Jetty adjacent to the Port Administration Building.

The fleet is operated by Shetland Towage Ltd.

Three tugs have been purpose-built for the Terminal:

"Stanechakker", "Swaabie", "Lyrie"

These twin-screw 3,800 h.p. vessels, named after Shetland seabirds, each having a bollard pull of 55 tons. They are also fully equipped as fire-fighting tugs and pollution control vessels.

Also seconded to this permanent fleet is a fourth tug:

"Flying Childers"

A single-screw tug of 2,904 h.p. with a bollard pull of 38 tons, but without fire-fighting capability. The use of tugs and their numbers will be at the discretion of the Pilot and Master. It should be noted that from the power of these tugs and the service for which they have been designed their towing equipment has been sized accordingly. Prior to arrival, vessels should therefore ensure that heaving lines to assist in securing the tugs are of adequate length and breaking strain, and are readily available.

Tugs will normally meet incoming vessels at a position North of Lamba Island. Officers and crew should be standing by to receive lines and all necessary tugs will be secured before the vessel's ability to manoeuvre becomes restricted.

Tugs may be positioned for use with towing lines or alongside with bow lines, their mode of operation and disposition will be fully explained by the Pilot on arrival. Tugs lines will normally be used throughout, either from towing hook or towing winch.

It is requested that wherever possible tug orders for movements before 0900 hrs. be placed before 1700 hrs. on the night before.

BERTHING:

Limiting Vessel Sizes:

No. 1	Crude Carriers	Length 140m. to 280 m.
	LPG Carriers	10,000 cu.m. to 75,000 cu.m.
No. 2	Crude Carriers	Length 210 m. to 355 m.
No. 3	Crude Carriers	Length 170 m. to 355 m.
No. 4	Crude Carriers	Length 170 m. to 355 m.

Loading Systems:

No. 1	Crude 4×12 in.	Loading arms var. hydraulic connections.
	LPG 3×12 in.	Loading arms var. hydraulic connections.
No. 2	Crude 4×16 in.	Loading arms var. hydraulic connections.
No. 3	Crude 4×16 in.	Loading arms var. hydraulic connections.
	+1×12 in.	Loading arm.
No. 4	Crude 4×16 in.	Loading arms var. hydraulic connections.

Manifold Heights:

	Heights above chart datum	
	Max.	*Min.*
No. 1 Crude	22.70 m.	1.80 m.
LPG	16.90 m.	3.50 m.
No. 2 Crude	31.30 m.	2.60 m.
No. 3 Crude (16 in. arms)	31.30 m.	4.23 m.
(12 in. arm)	19.90 m.	2.70 m.
No. 4 Crude	31.30 m.	4.23 m.

Maximum allowable pressure on lines and connections: 150 lbs/sq.in.

Jetty Orientation:

No. 1	280°/100°
No. 2	135°/315°
No. 3	135°/315°
No. 4	135°/315°

Design Depths Alongside Berths at Chart Datum:

No. 1	16.8 m.
No. 2	23.1 m.
No. 3	23.8 m.
No. 4	To be advised.

Gangway: Shore tower type gangways are provided at all berths.

Reducers: When required, reducers will be provided by the Terminal.

Maximum Loading Rate per Arm:

Crude: 12 in. loading arm..2,500 long t.p.h.
16 in. loading arm..5,200 long t.p.h.

LOADING/DISCHARGING FACILITIES:

Oil Loading Berths: One loading berth (berth No. 2) has been completed, a second berth (berth No. 1) is due to be completed in March 1979. A further 2 berths are under construction and are scheduled for commissioning in 1979.

The loading berths are located in deep water on the Northern shores of Sullom Voe, adjacent to the Terminal complex at Calback Ness.

The berths are numbered 1 to 4 in sequence from East to West. Number 1 jetty has facilities for crude and LPG carriers and can accommodate vessels up to 120,000 d.w.t. Numbers 2, 3 and 4 jetties have crude loading facilities only, catering for vessels up to 300,000 d.w.t.

Each jetty is of conventional "T" shaped construction with 4 breasting dolphins in line with the jetty head. The mooring dolphins are offset from the line of breasting dolphins to provide an optimum lead for mooring lines and to allow a vessel to land at a limited angle to the jetty face. Quick release mooring hooks are fitted on all dolphins. For use with large vessels, quick release mooring pulleys have been fitted on No. 2, 3 and 4 berths. These pulleys, one at each end of the berth are designed to accept a ship's mooring wire in the form of a bight.

Large flexible rubber fenders are fitted to the outer faces of each breasting dolphin. Due to their construction, the breasting dolphins have a limited ability for deflection and landing speeds will be controlled so that all energy will be absorbed by the rubber fendering.

As an aid to berthing each jetty is fitted with an "IDASAT" doppler system. This system provides the ship with advice on the lateral velocity of the vessel and the distance off from each outer breasting dolphin. This information is presented in the form of red, amber and green lights. Various permutations of these "traffic lights" indicate a vessel's safe approach speed. The landing of a vessel alongside the berth should be at a speed which is indicated by a single green light on the display for each end of the vessel.

The 2 lateral distance off indicators each comprise of 20 fibre optic bars. Each bar element is switched separately at specified distances, all bars being illuminated at 99 m. In addition to indicating distance off, this system provides an accurate indication of the vessel's angle of approach to the jetty face.

Each mooring operation will be assisted by two purpose-built mooring boats.

General Mooring Requirements:

(i) Masters should ensure that mooring lines are in good condition, winch brakes or securing devices should be in efficient operating order and should have a holding power of at least 60% of the breaking load of the vessel's mooring lines. (On vessels constructed before 1978 these conditions may be met by placing the winch in gear and applying power in addition to applying the brake).

(ii) Any known defects in the vessel's mooring system or limitation of mooring winch brakes should be reported to the Terminal on arrival in order that if necessary additional precautions may be agreed.

(iii) In order to avoid damage to loading arms and the serious consequences of oil pollution, the vessel should be kept close alongside at all times.

(iv) If the vessel is equipped with mixed moorings of wire and fibre ropes it is important that these should not be used together in the same direction and service. It is recommended that wires (or wires fitted with synthetic fibre rope tails of at least 25% greater breaking load to the wire), should be used for all spring mooring lines.

(v) Particular care should be taken to ensure sufficient transverse restraint from breast line moorings. When synthetic fibre mooring lines are used, pre-tensioning of these lines on making fast will help prevent drift of the vessel away from the berth in "off the berth" wind conditions.

(vi) As soon as the vessel is secured, brakes on all mooring winches should be firmly applied. Winches must not be left on automatic tensioning. Full steam pressure or power to all mooring winches should be maintained available at all times when alongside. On split drum mooring winches only one layer of rope shall be permitted on the working half of the drum.

(vii) An efficient watch must be maintained on the vessel's moorings at all times to ensure that all lines are properly tensioned and tended when required. The deck watch should include regular checks that mooring winch brakes are applied at the correct setting.

(viii) Masters should endeavour to ensure compliance with the mooring layout as advised by the Pilot and Mooring Master. Large vessels should also use the "pulley" mooring hooks in the manner advised.

Connection of Loading Arms: The connection of oil loading arms will be undertaken by shore personnel.

Masters should ensure that fire extinguishers are stationed ready for use at the ship's manifold, in accordance with jetty regulations.

Crude Oil Storage: 15 conventional floating roof storage tanks are being constructed, each with a capacity of 600,000 barrels. These provide storage facilities in the event of port closures and ensure sufficient stocks to enable tankers to load without delay.

The storage tanks have been constructed with bases as much as 30 m. above sea level, initially, loading will be undertaken by gravity. Six oil loading pumps have been installed and will be operated as throughput increases.

Loading Rates: A maximum loading rate of 30,000 t.p.h. can be provided by the Terminal with a maximum of 20,000 t.p.h. to any one berth.

The LPG loading system will deliver up to 3,000 cu.m. per hour.

Cargo Measurement: Meters will be installed for cargo measurement.

Early Departure Procedure: An early departure procedure will be operated at the Sullom Voe Terminal.

DRY CARGO FACILITIES:

Construction jetty: A concrete pier suitable for coastal traffic is located in Garths Voe, East of No. 1 jetty.

This pier, orientated on a 108°/288° axis is 100 m. long and can accept ships on both the inside and outside faces.

The inner berth is equipped with a fixed Ro/Ro ramp. This ramp has a width of 10.7 m., a total length of 23.7 m. and a fixed gradient of 1:22. The height of the sill is 1.67 m. above MHWS.

The pier is well fendered with patent fenders and tyres. The depths off the pier range from 9.9 m. at the Eastern extremity, rising to 3.9 m. at the Ro/Ro ramp.

The dock labour force is operated by Wimpey Marine Ltd., who have offices adjacent to the pier. Normal working hours for the dock labour force are from 0800 hrs. to 2200 hrs. The stevedoring offices are manned on a 24-hour basis.

Graven Pier: A small concrete fishing pier is situated on the Southern shore of Garths Voe. This pier requires considerable repair and is unsafe for berthing any vessels. Craft using this pier do so entirely at their own risk. The approximate depth of water at the jetty is 2 m.

Tug jetty: Harbour tugs and pilot boats are stationed at an "L" shaped jetty located on the Southern shore of Garths Voe adjacent to Sella Ness. This jetty, of cellular design is constructed of concrete and steel.

Fendering arrangements consist of pneumatic fenders positioned at intervals along the jetty face. This pier is suitable for coastal traffic but is not used as such on a regular basis, except for discharge of fuel oils to the Graven storage facilities.

The present minimum depth off the N.E. arm of the jetty is approximately 6.9 m.

BALLAST:

Ballast Requirements: For the purpose of safe manouevring, the Pilots require all vessels to maintain a reasonable ballasted condition.

Vessels should carry sufficient ballast so that the propellor remains immersed whilst maintaining a reasonable stern trim.

Ballast Reception Facilities: It is prohibited to discharge any ballast other than segregated clean ballast into the waters of Sullom Voe.

All dirty ballast or non-segregated ballast will be discharged ashore for treatment.

The Terminal can accept ballast whilst providing the vessel with cargo. Ballast will initially be pumped into settling tanks where excess oil will be skimmed off into recovered oil tanks. The remaining ballast will undergo further treatment before being discharged into Yell Sound. The ballast water will be monitored throughout the cleaning process.

In the initial stages of the Terminal operations ballast reception facilities will not be available and ships will therefore be required to retain their ballast contained in cargo tanks on board.

Discharge of Ballast Water: The discharge of ballast water from oil cargo tanks or any ballast water containing quantities of oil into the waters of the harbour is prohibited.

The discharge of ballast water from segregated or permanent ballast tanks into the waters of the harbour will be permitted provided that:–

1. The Master of the vessel advises the Harbour Authority prior to arrival:
   (a) The place at which the ballast was taken.
   (b) The quantity and disposition of the ballast.
   (c) That to his knowledge the ballast is free from oil contamination.
2. The Master of the vessel advises the Harbour Authority:
   (a) On each occasion he intends to discharge the ballast and at least 30 minutes before
      (i) The time at which he intends to commence deballasting, and
      (ii) The time at which he expects to complete deballasting.

The Oil Pollution Control/Safety Officer of the Harbour Authority will on occasions board vessels carrying segregated ballast to obtain samples of such ballast. Analysis will be made of these samples to ascertain the quantity of hydrocarbon, colliforms and heavy metal pollutants within the ballast. The Harbour Authority may, as a result of information so gleaned, refuse permission for the discharge of segregated ballast water taken on board in certain locations.

MEDICAL: Medical attention for ship's crews if required will normally be provided by the Port Medical Officer and arranged by the ship's Agent.

However, in the event of an emergency and the Port Medical Officer being detained elsewhere, medical attention will be available from the Terminal medical centre.

FUEL: At present there are no bunkering facilities available for vessels calling at the Sullom Voe Terminal.

FRESH WATER: Potable water is only available to vessels on an emergency basis.

CUSTOMS: A selective system of boarding commercial vessels arriving from a non-U.K. port, will apply at the Sullom Voe Terminal.

CONSULS: In Lerwick.

Denmark	(C. W. L. Aitken)	106a Commercial St.	Lerwick 3057
Finland	(F. Garriock)	106a Commercial St.	Lerwick 3057
France	(F. Garriock)	106a Commercial St.	Lerwick 3057

Netherlands	(A. G. Beattie)	106a Commercial St.	Lerwick 3057
Norway	(F. Garriock)	106a Commercial St.	Lerwick 3057
Sweden	(M. M. Shearer)	Garthspool	Lerwick 2556

REPAIRS: Limited engineering repair facilities are available from Lerwick.

Electronic Navigational Aids and Radio: All major companies have agencies in Shetland. Repair facilities exist for all types of electronic equipment.

Engine Readiness: Main engines must be maintained in a state of readiness for vacating the Terminal at short notice at all times except in the cases of approved repair work as detailed in Regulation 14 of "Jetty Safety Regulations".

REPATRIATION: Crew changes will be arranged by Agents.

AIRPORT: Shetland's main airport "Sumburgh" is located at the Southern extremity of the mainland.

Scheduled flights are available to major Scottish airports.

GENERAL:

The following services can be provided for vessels by the Shipping Agencies. Masters are requested to provide notice of requirements prior to arrival.

Divers: Well equipped, deep sea divers are available on request.

Compass Adjustments: There is no facility for adjusting compasses at the Sullom Voe Terminal. A service is available for smaller vessels at Lerwick.

Storing: A wide range of dry provisions is available locally; however, major storings from mainland suppliers is not recommended because of possible disruption to transportation during periods of adverse weather conditions.

Bonded Stores: Bonded goods are available from Lerwick. Advance notice is requested.

Lubricating Oils: BP, Shell, Esso and Castrol have authorised dealers in Shetland. Lubricating oils are available in drums.

Sea Travel: P&O Ferries maintain a regular Ro-Ro and Passenger ferry service from Lerwick to Aberdeen.

Provisioning: Vehicles are prohibited access to the oil jetties. Trolleys are provided at each berth to assist with the transportation of ship's stores.

CHARTS AND PUBLICATIONS:

Charts:

British

BA. 3297	Sullom Voe
BA. 3298	Yell Sound
BA. 1118a	Shetland Isles (Sheet 1)
BA. 3059	Moul of Eswick to Fetlar

Pilot Books: North Coast of Scotland Pilot N.P. 52.

Tidal Stream Atlas: Orkney and Shetland Islands N.P. 209.

Lights: Admiralty List of Lights, Volume A.

Additional Charts and Publications relevant to Sullom Voe may be published in the near future.

DEVELOPMENTS: Extensive developments continue at Sullom Voe.

SAFETY: *Smoking:* Smoking is prohibited on vessels during loading operations. Except in 2 or at most 3 smoking rooms allocated by the Master and approved by the Terminal Representative.

Matches and lighters shall not be carried by personnel outside the approved smoking areas, or on the jetties.

Fire Precautions: Vessel's fire-fighting appliances, including main and emergency fire pumps shall be kept ready for immediate use.

Before deballasting and loading/discharging operations commence and during periods when permitted repair work is being carried out, fire hoses shall be uncoiled and connected to the fire main with at least one fire pump maintaining pressure on the main.

Jetty Fire-Fighting Facilities: The oil loading jetties are each equipped with 2 independent hose supply systems, one for fire water alone and the second for either fire water or foam mixture.

These systems supply hydrants which are spaced out along the jetty access road and jetty head.

Monitors are installed to provide a water curtain in the area of the jetty head and between the access tower and manifold area. Elevated monitors are also positioned at the top of the access and monitor towers. A sprinkler system protects the access tower.

Hose couplings are 2.5 in. standard instantaneous female type and the fire main to the access tower has provision to accept international connections.

The working pressure of the fire system is 250-260 p.s.i. A pump-in point is situated on the construction jetty to allow fire-fighting tugs to link into the system.

POLLUTION: It will be appreciated that oil spillages are seriously viewed by Government, Local Authorites, Port Authorities and Terminal Operators. Spillages will be investigated by the appropriate authorities and the Master and/or Owner may be liable to prosecution. Delay to the vessel could well arise.

Masters are therefore requested to ensure that every precaution is taken to prevent oil spillages at the Sullom Voe Terminal.

EMERGENCY SERVICES AND PROCEDURES:

Fire	Phone Sullom Voe 2797 VHF Channel 10
Oil Pollution	Phone Sullom Voe 2797 VHF Channel 10
Ambulance	Phone Sullom Voe 2797 VHF Channel 10
Security	Phone Sullom Voe 2797 VHF Channel 10

All emergency services within the port are co-ordinated by the "Emergency Services Control" situated at the Terminal fire station.

On vessels arrival at the Terminal, the responsible ship's officer and the Loading Supervisor will discuss action to be taken in an emergency situation. The vessel will receive a copy of the "Jetty Safety Regulations", these should be studied and adhered to.

Safety inspections will be undertaken by the Loading Supervisor, throughout the vessel's period alongside. Spot checks will also be made by the Terminal emergency services department. The Harbour Authority will undertake safety and pollution inspections including launch patrols.

Load Line certificate.

Safety Radio Certificate.

Safety Equipment Certificate.

Safety Construction Certificate.

De-ratisation Certificate.

Customs Light Bills.

PILOTAGE: Call Sunderland Harbour Radio, Channel 16, working Channel for port is 14. Pilotage not compulsory, but advisable for all but small vessels. Pilots maintaining continuous watch on VHF Sound signals for vessel requiring Pilot is Morse Code No. 6. Pilot boards 0.5 to 0.75 mile off piers. In bad weather pilot cutter leads vessel into inner harbour, and Pilot boards there.

ANCHORAGES: 0.5 to 0.75 miles N.E. of Roker Pier Lighthouse.

RESTRICTIONS: Vessels enter 2 hours before high-water for entry into South Dock. For Corporation Quay only restriction draft 8.38 m.

MAX. SIZE: South Dock – length 142 m. beam 18.9 m., draft 8.08 m. with Spring tides, 7.16 m. with neap tides.

River – length 183 m., beam – no restriction, draft 8.38 m. subject to siltage.

HEALTH: Pratique procedure: pratique granted by Port Health Authority on arrival.

Suspected disease or fever: all ships from suspected areas must radio Port Health Authority 24 hours in advance of arrival, stating general condition of crew members. Pratique is automatic when ships arrive from other U.K. ports.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats.

TUGS: Join vessel at or outside harbour entrance. Ship's ropes normally used.

BERTHING: In South Dock vessel must arrive from 2 hours before up to a 0.5 hr. after high water. At Corporation Quay small vessels berth at any time. Large vessels usually berth at same time as mentioned for South Dock.

BRIDGES: In South Dock bridges operated at tide time 2 hours before to a 0.5 hr. after high water. Railway Bridge clearance, 25.1 m. MHWS.

STEVEDORES: The Port of Sunderland Authority carry out all stevedoring. Agents should advise as early as possible in order to arrange berthing and gangs, 5 to 6 days notice if possible. ETA from ship 2-3 days in advance. Working rates of principal commodities are;

Bagged cargoes	15	t.p.h.	
Sisal	20/25	,,	
Scrap – heavy	25	,,	
Chrome and heavy ores	40	,,	
Wood Pulp	30	,,	(loose bale)
Wood Pulp	80/90	,,	(unitised)
Limestone	325	,,	

MEDICAL: Well served with General practitioners and hospital facilities, and attention can be arranged at very short notice. However, unless urgent, 24 hours notice desirable.

TANKERS: 4 installations (lines either 0.16 or 0.2 m.) 3 installations in South Dock and 2 berths, the S.E oil berth 98 m., the S.W. oil berth 89 m. 1 vessel of maximum length 142 m. can use this berth, draft 8.08 m. Spring tides; 7.16 m. Neap tides. At Corporation Quay vessel 183 m. long, draft 8.58 m.

DENSITY: Salt water density 1025.

FRESH WATER: Available. Arrangements can be made to supply water at any time.

FUEL: Bunkers supplied at Corporation Quay pipe-line from Petrofina Ltd. All grades available – Corporation Quay and Hendon Dock. Viscosities range from 32 secs. to 3,500 secs., and can be blended to any requirement in this range. 12 hours notice necessary. Rate 250 t.p.h.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended.

OPENING/CLOSING/HATCHES: This work is normally carried out by ship's crew, otherwise shore riggers.

CERTIFICATES:

Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Deratisation Certificate.

CUSTOMS ALLOWANCE: As per H.M. Customs and Excise Regulations.

IDENTIFICATION CARDS: Not required. Must possess vaild Seaman's Book and/or Passport.

CONSULS:

REPAIRS: All repairs possible.

DRY DOCKS: One dry dock in use, length 109 m., breadth 14.6 m.

REPATRIATION: Facilities available for effecting repatriations, with good rail, road and air communications.

AIRPORT: Approximately 20 miles. Newcastle Airport served by regular airlines, all the year round, to all parts of the world. Also chartered flights by Britannia.

HOLIDAYS: Official Holidays for General Cargo ships: New Year's Day (no work except by special agreement); Good Friday; Easter Monday; May Day; Spring Bank Holiday; Summer Bank Holiday; Christmas Day (no work except by special agreement); Boxing Day (no work except by special agreement).

POLICE/AMBULANCE/FIRE: Police Station Tel. Sunderland 76155; Ambulance Control Tel. Sunderland 72875; Fire Station Tel. Sunderland 56456. Or call 999 from any telephone and ask for service required.

TELEPHONES: Permanent arrangements do not exist, but a temporary arrangement can be made at any time.

AUTHORITY: Port of Sunderland Authority.

SWANSEA: 51.37 N. 03.56 W. (See Plan Book)

DOCUMENTS:

Light Bill receipt.
Crew List.
Manifests.
Bill of Lading copies.
Customs and Health.

PILOTAGE: Request for Swansea Pilots by International Signal Code for Sea Pilots, by telephone call for Dock Pilots. Telegraphic address for Swansea Pilots is "Pilority, Swansea".

Advance notice of ETA required at least 12 hours. VHF Channels 16 and 6. Pilot boat has bright yellow hull with red boot-topping; superstructure painted white. Pilot cutter's sound signal is SM, three shorts and two long blasts. The area of boarding is usually one mile S.E. of Mumbles Lighthouse in all weathers. Usual requirements for ladders are in force, and Pilots require ladder to be about four to five feet above water.

ANCHORAGE: About 1 mile S.E. of the Mumbles Lighthouse.

RESTRICTIONS: Berthing is in accordance with tide. King's Dock Lock operates for a min. of 8 hours each tide. River-side berths and Swansea Ferryport Terminal operate over a greater period.

No night-time restriction of entry.

MAX. SIZE: Max. size for entry is 655 ft. long, 86 ft. beam, 32 ft. 6 in. draft.

These vessels are docked over high water period. Any vessel whose dimensions are approaching max. for port should advise Docks Manager well in advance.

HEALTH: Usual international health regulations are to be observed. Any vessel which is suspect should inform Port Medical Officer of Health.

RADIO: All communications for ship movements through "Swansea Dock Radio" Channels 16 and 14 VHF. Agents, receivers, etc., can be called through usual coastal radio stations – this includes Ilfracombe Radio.

TUGS: Towage undertaken by private operators. The Alexandra Towing Co. Ltd., at present use a modern fleet of tugs at Swansea and Port Talbot. It is optional whose lines are used, but if tugs line is taken, an extra charge will be made.

BRIDGES: Two In dock bridges are under direction of duty Assistant Dock Master. A vessel which has to pass them will be informed by the Assistant Dock Master as to their availablity.

BERTHING: Normal depths of water:

Queen's Dock 35 ft.
King's Dock 33 ft.
Prince of Wales' Dock 24 ft. 6 in.

BULK HANDLING FACILITIES: *Petro Chemicals.* One jetty in Queen's Dock operated by BP Chemicals International Ltd.

Coal. Four coal hoists in the King's Dock, operated by the British Transport Docks Board.

Bulk Cargoes. (Sulphur, ores, etc.). Two berths in King's Dock equipped with five 7.5 ton and five 10-ton grabbing cranes. Operated by British Transport Docks Board.

Ferryport: On East bank of River Tawe, used by the B & I Line for its fast service between Swansea and Cork for passengers, cars and wheeled freight.

CRANES: Two 25 ton and nine 11.5 ton electric cranes. Five 7.5 ton, seventeen 6 ton and seventeen 3 ton.

STEVEDORES: Stevedoring services are provided wholly by British Transport Docks Board. Advice of labour requirements must be received by the following times:

General Cargo: By 0700 hrs. to start work at 0700 hrs. By 1030 hrs. to start work at 1130, 1400 or 2200 hrs. same day.

Coal Shipping: By 1530 hrs. for work at 0600 hrs. next day. By 1030 hrs. for work at 1400 hrs. same day.

MEDICAL: Port Medical Officer of Health has an office on King's Dock Lock. Medical attention can be obtained at short notice. In emergencies, the duty Assistant Dock Master can be communicated with, to obtain medical help. Hospital facilities available, and there is a first-class medical centre on the Prince of Wales Dock. Vaccination and fever certificates will be examined when receiving pratique.

TANKERS: All tankers arriving, working cargo, and departing are required to observe port's Petroleum By-laws and Oil in Navigable Waters Act. British Petroleum Company has further private directives for oil tankers. Five main tanker berths, one petrochemical berth, two coastal tanker berths and two layby berths in Queen's Dock. One tanker/general cargo berth in King's Dock. Deepest draft permitted is 32 ft. 6 in. A special fire-float to deal with tanker casualties is maintained in the Queen's Dock by the B.P. Company Ltd.

DENSITY: King's Dock Lock density is 1025.

FRESH WATER: Fresh water supplied from hydrants on quays by watermen. Rate of delivery is 2,000 g.p.h., approx., depending on the demand.

FUEL: Various grades of gas oil and diesel can be supplied by barge or road vehicles, or it can be delivered ex-pipeline at Queen's Dock.

FIRE PRECAUTIONS: All matches and lighters must be declared at entrance to oil installation. There are arrangements at the Queen's Dock depot for shore cooking and eating. There is an oil boom between the King's Dock and Queen's Dock to serve as an oil fire break between two docks. A 24 hours observation is kept at Scherzer Bridge for oil pollution and fires.

GANGWAY/DECK WATCHMEN: Under Port Regulations, there shall always be on board sufficient men to move or take care of the vessel. Some vessels employ watchmen. Cost is a tariff charge.

OPENING/CLOSING HATCHES: Normally done by the ship's crew, but if riggers are employed by vessel for general duties they open up hatches.

CERTIFICATES:

Certificate of Freeboard.
Certificate of Registry.
Certificate of Pratique.
Light Bill.
Manifest.
Bill of Health.
Bills of Lading.
AA (1) Certificate.

CUSTOMS ALLOWANCE: At discretion of local H.M. Customs inspectors.

IDENTIFICATION CARDS: Not compulsory, but they are helpful if a crew member has to identify himself to Authorities.

CONSULS:

France	tel. Swansea 55274	Norway	tel. Swansea 50564
Vice-Consuls:			
Belgium	tel. Swansea 50021	Netherlands	tel. Swansea 53921

REPAIRS: All types of deck and engine-room repairs are possible.

DRY DOCK: Two dry docks in port are entered from King's Dock. Dry docks: "Duke of Edinburgh" 670 ft. × 92 ft.; "Palmers" 560 ft. × 75 ft.

REPATRIATION: Mercantile Marine Office in Swansea where ship's crews are paid-off before Superintendent of Shipping. Necessary arrangements can be made for repatriation through the Consular Channels.

AIRPORT: Nearest airport at Swansea, 8 miles from Docks. Next are Rhoose (Cardiff) and Bristol airports where regular scheduled flights are handled.

TIME: Local time is British Standard Time which is plus 1 hour to Greenwich Time. Reverting to GMT during Winter months.

HOLIDAYS: Christmas (25th December); Boxing Day (26th December); New Year's Day; Easter, Good Friday and Monday (movable dates); Spring Holiday, Summer Bank Holiday (both movable dates). No cargo is worked on these days.

POLICE/AMBULANCE/FIRE: Call 999 from any telephone, and ask for service required.

TELEPHONES: Arrangements at most berths for placing telephones on board ships in port.

GENERAL: Entrance lock is 875 ft. in length, 90 ft. across at cope level. The inner sill is 7 ft. higher than the outer sill. The outer sill is 11.4 ft. below Admiralty Chart datum.

Tugs are available at the port for in-dock as well as sea towage.

A diver can usually be obtained by enquiry to the British Transport Docks Engineer, Swansea.

Docks Manager: Tel. 50855/200. Dock Engineer: Tel. 50855/275. Dock Master and Fire Officer: Tel. 50855/260.

AUTHORITY: The British Transport Docks Board.

TEES RIVER: 54.39 N. 01.08 W. (See Plan Book)

AUTHORITY: Tees and Hartlepool Port Authority.

PORT LIMITS: The Port facilities extend from the river entrance to the I.C.I. Billingham Oil Jetty 16 km. up river.

Arrival in the port is accepted as time of passing South Gare lighthouse inward, or time of anchoring in the Tees Bay.

DOCUMENTS: Ship's official papers including:
- Register.
- Load-line Certificate.
- Deratisation Certificate.
- Safety Equipment Certificate.
- Radio Safety Certificate.
- Construction Safety Certificate.
- U.K. Light Dues.
- Oil Pollution Certificate. (Tankers).
- Crew List.
- C14 Ship's Stores List.
- C13 Arrival General Declaration.
- C142 Crew Declaration.

PILOTAGE: The Tees pilotage district extends from a radius of 5.6 km. seawards of the South Gare lighthouse, as far up river as Victoria Bridge, Stockton, including Seaton Channel and is under the control of the Tees Pilotage Authority.

Official Address: Tees Pilotage Authority, 13-14 Bridge Street East, Middlesbrough, Cleveland TS2 1NS. Telephone: Middlesbrough 242924/5 (during office hours), Middlesbrough 590747 (after hours). Telegraphic Address: "Tees Pilots, Middlesbrough".

Pilot station is situated at South Gare and pilot cutter on duty is moored there. Cutters are painted blue with white upper structure and fly the pilot flag by day when on duty and International Regulation lights by night. The duty cutter is equipped with VHF Radio, call sign "Tees Pilots" on Channel 16. Radar is also fitted.

As much advance notice of a vessel's arrival as possible should be given to Pilots: minimum requirement for vessel arriving is 1 hour and for vessel sailing 1 hour 15 minutes.

Pilot boards in vicinity of Tees Fairway Buoy although smaller vessels are occasionally boarded off the South Gare lighthouse. During severe weather the duty cutter may move to Tees Dock and the Pilot will board as far seaward as the conditions permit.

Pilotage is not compulsory.

APPROACHES: Vessels are prohibited from anchoring:—
- (i) inside the dredged channel.
- (ii) within a radius of 1,113 m. of the Tees Fairway Buoy.
- (iii) within the limits of 2 divergent lines starting and extending from the dredged channel limits 244 m. apart at the South Gare light station, to 550 m. apart between their respective points of intersection with the circumference of the circle defined in (ii).

Small vessels can anchor close N.E. of No. 4 Light Buoy: larger vessels at Fairway Buoy and in all cases outside the 20 m. contour. Vessels waiting Pilots anchor in these areas.

Anchoring in the vicinity of the Ekofisk Pipe-line is to be avoided. See Notice to Mariners (Trinity House) No. 2724 of 1977.

RESTRICTIONS: *Traffic Control:* This is operated by the Harbour Master when vessels over 200 m. in length are moving within the river limits.The primary purpose is to allow the subject vessel to negotiate the channel without embarrassment from other traffic. Overtaking/passing is decided by the Harbour Master when circumstances favour such actions.

Restricted Transit Control: This is imposed by the Harbour Master upon vessels carrying certain hazardous cargoes. The subject vessel is intended to proceed from sea to berth or from berth to sea without meeting other traffic. As a consequence such vessel must be restrained from entering the main channel until an 'all clear' route is available. Some regulated passing.

Port Safety Control: Masters of ALL vessels before committing their ships to the River Tees Channel are required to satisfy the Harbour Master in respect of shipboard equipment by affirming to the following questionnaire:—

Question No. 1: Your vessel is in all respects seaworthy.

Question No. 2: All secondary power or mechanical systems are in operation and *immediately* available in the event of failure of any primary system.

Question No. 3: Steering is under direct manual control.

Question No. 4: Anchors are ready for use.

In view of the controls it is essential for contact to be made with the Harbour Master before considering entering the river, leaving the berth.

VHF Radio use Channels 22, 16 or 14 to contact. Telephone Eston Grange 2541.

Middlesbrough Dock: Middlesbrough Dock is an impounded area which normally operates between 2.5 hours before HW to 1.5 hours after. Shipping for this dock restricted in size to 176 m. overall length × 23 m. beam. Draft restrictions at the various dock quays supplied upon request.

MAX. SIZE: This matter is constantly under review. At present the largest dimensions acceptable are quoted as: Length 305 m. (1,000 ft.); Beam 46 m. (150 ft.); Draft 17 m. (55 ft.). this depends on the berth nominated, tidal influence and prevailing weather.

A vessel with unusual dimensions e.g. oil rig, or any vessel with dimensions approaching the port maxima must be the subject of consultation with the Harbour Master.

HEALTH: New Regulations. The Public Health (Ships') Regulations in force from 1.4.78.

See "Health - All Ports" before first U.K. port.

RADIO: Ships approaching from the North or at anchor in Tees Bay use Cullercoats Radio. Ships approaching from Southward use Humber Radio.

TUGS: Official Address: Tees Towing & Co. Ltd., Cleveland Buildings, Queen's Square, Middlesbrough, Cleveland TS2 1NX. Tel. Middlesbrough 47277 day and night.

Fleet of 8 tugs between 1,550 and 3,650 h.p. Tugs join vessel in Redcar Reach between No. 9 and No. 17 buoys depending on size, draft and destination. Tug's lines may be used at Master's discretion.

Tugs are on duty daily and only available on 6 hours notice for sailing and arriving after normal office hours.

BERTHING: Small vessels can usually berth at any stage of the tide. Middlesbrough Dock, which as stated, operates for up to 4 hours at each HW. Deep drafted vessels enter in accordance with the tide.

T.H.P.A. General Cargo Facilities:

Tees Dock: No. 1 Quay. Four conventional general cargo berths each of 183 m. length and 1 of 190 m. length with flush faced quay. Road and rail access to all vessels. Ample cranage and spacious sheds/open ground. Nominal dredged depth 9.4 m. below LAT.

No. 2 quay: Two new berths each 183 m. in length have been built and equipped with electric luffing cranes up to 25 tonnes capacity. This quay is presently serving as the United Kingdom West African Lines terminal.

Middlesbrough Dock: 2,085 m. of quayage available on 6 different berths fully equipped with electric cranes, transit sheds and warehouse accommodation. Docking and undocking in the enclosed dock normally takes place between 2.5 hours before and 1.5 hours after high water. Entry/departure is controlled by light signals.

STEVEDORES: In order to prepare for loading/discharging, i.e. ordering of gangs, transport, etc., it is necessary to give ETA through their Agents not less than 24 hours before arrival.

In Tees berths, the port works 2 shifts daily, i.e. 0600–1400 hrs. and 1400–2200 hrs. Mondays to Fridays, with voluntary overtime at weekends.

BULK HANDLING FACILITIES: *Redcar Ore Terminal;* Handles iron ore imports for British Steel. Berth dredged to nominal 17.25 m. and able to accommodate vessels up to 335 m. in length, approx. 150,000 d.w.t. Two ore dischargers capable of handling 2,000 t.p.h.

Potash Terminal; Built on the East side of Tees Dock, this terminal is for the export of Potash mined in North Yorkshire. Dredged to a nominal depth of 10.88 m., the quay is intended to accommodate vessels simultaneously. The main loader is capable of 2,000 t.p.h.: a silo on the site has a storage for 56,900 capacity storage.

No. 2 Jetty	201	10.89	
No. 1 Jetty	92	6.32	
Under Construction			
"A" Jetty	107	7.24	
Middlesbrough Dock			
South Wharf	82	4.8	
No. 2 Quay	176		Impounded dock. Max. draft dependant on tide.
Billingham Oil Wharf	80	4.5	

Billingham/Clarence/Deep Water Wharves handle tankers also.

ROLL-ON/ROLL-OFF FACILITIES: A link span Ro/Ro berth in Tees Dock can accommodate ships of up to 160 m. in length and 23.7 m. beam. Nominal dredged depth of 7.2 m.

Designed for loads up to 182 tonnes (when carried on 4 axles).

CONTAINER FACILITIES: A privately owned (Bell) purpose-built Container Berth utilising a 32 tonne gantry crane is established downstream of Tees Dock.

DENSITY: The density of the river water fluctuates with the seasons and rain amount, being between 1015 and 1025 mainly. Below Smith's Docks the fresh water influence is minimal.

FRESH WATER: Plentiful from wharf and small quantities available from tug in emergency, approx. 20 t.p.h.

FUEL: All grades available by road or river delivery. 48 hours notice of requirements is requested for barge delivery.

CRANES: Floating crane operators are established on the River Tees and have crane lifting in excess of 400 tons available.

MEDICAL: All medical facilities available. Vessels requiring doctor to board are advised to give maximum notice. Emergency medical attention can be arranged through VHF radio contact to Tees Harbour Radio on Channels 22, 16 or 14.

GANGWAY/DECK WATCHMEN: Recommended. Majority of berths are tidal with 5 m. range at Springs.

OPENING/CLOSING HATCHES: Always by crew. Riggers available.

CUSTOMS ALLOWANCE: 0.5 lb. tobacco or 200 cigarettes. (0.25 lb. tobacco for coasters). 1 spirit and 1 wine bottle (0.5 bottle spirit and 0.5 bottle wine for coasters).

IDENTIFICATION CARDS: Not used in Tees.

CONSULS: Sweden, Norway, Denmark, Netherlands, Portugal, Belgium, West Germany, Finland. Also French Consular Agency.

REPAIRS: Facilities available for all deck or engine repairs.

DRY DOCKS: 4 dry docks at South Bank (Smiths Dock), up to 175 m.× 22 m.

AIRPORT: Teesside Airport with regular flights to London, etc. is 12 miles from Middlesbrough Centre.

REPATRIATION: All facilities exist.

TIME: GMT in Winter months. BST (GMT +1) operates between late March and mid-October as decided by government.

HOLIDAYS: Normal English Bank Holidays. On certain holidays work can be arranged if suitable notice is given.

POLICE/AMBULANCE/FIRE: Telephone 999 in emergency. If no phone available contact the Harbour Master on VHF Radio Channel 16 or 14.

TELEPHONES: Many berths can be connected to telephone system using coin boxes; a connection charge is made.

TETNEY MARINE TERMINAL: 53.32 N. 00.07 E.

DOCUMENTS: The following documents should be completed for arrival:

Crew Manifest, C142.
Health Declaration, PS1.
Crew List, IB6.
Stores on Board List.

These documents will be handed to the Master of the Conoco work boat who will take them to Immingham for perusal by HM Customs and Immigration. On the return trip of the work boat the Agent and Customs will board to clear the vessel and attend to ships business. Pratique is granted by HM Customs when they visit the vessel.

Stores can be taken at the berth provided the Agents are given the order at least 72 hours before arrival.

LOCATION: *Tetney Marine Terminal* is the deep water crude oil terminal of Crude Oil Terminals (Humber) Limited, operated by Conoco Limited.

The position of the mono-buoy is Lat. 53° 32′ 18″ N., Long. 00° 06′ 48″ E., lying in approx. 60 ft. of water at low water and about 2.5 miles offshore.

Tetney is an open roadstead in the entrance of the River Humber on the East coast of England. The tidal rates in the vicinity of the mono-buoy reach 3.5 knots during Spring tides and the direction of the ebb and flood tides is generally East and West respectively. The tidal range varies between 7 ft. and 22.5 ft.

PILOTAGE: Vessels are requested to send ETA and draft to Spurn Pilot 12 hours before arrival and any adjustment to that time at least 2 hours before arrival. Spurn Pilots listen continuously on VHF Channel 16 and use Channel 14 as a working frequency.

Additionally, Agents should be advised of ETA 72 hours before arrival and the following information should be included in the cable, arrival draft, size of forecastle centre mooring fairlead, bow to manifold distance and cargo manifold size.

Pilotage is by Humber Pilots who board in the vicinity of the Humber Light Vessel from a fast launch. Additional berthing information can be obtained from Tetney Base.

The Berthing Controller and his Assistant will board as the vessel approaches the mono-buoy and will assist the Pilot in the mooring operation. He will advise the ships Officers during the mooring operation, hose connection and disconnection, and will act as Company representative throughout the vessel's stay in the berth.

Vessels must provide a pilot ladder with spreaders and grab lines for the Pilot and Berthing Controllers to board and whilst in the berth a suitable gangway with a pilot ladder near the end in order to board from a small boat.

HEALTH: See "Health – All Ports" before first U.K. port.

VHF: There is a VHF station at Tetney which is manned 24 hours a day and has the call sign, 'Tetney Base'. A continuous watch is kept on VHF Channels 16, 19 (161.55/156.95), and 48 (163.00/158.40). Channel allocation is as follows, 16 calling, 19 ship to shore, and 48 port operations. UHF (467.725 mc/s.) is allocated for use by the Conoco Berthing Controller, Tetney Terminal and the Conoco owned work boats.

The Pilot and Berthing Controllers carry portable VHF hand sets for use during berthing for inter-ship and ship to tug communications, Channel 9 (156.45 mc/s.).

Portable radios can be provided for vessels not having a VHF set and the Agents should be so informed in order to allow time to dispatch a set to the ship on arrival. A vessel arriving without suitable means of communication and not having informed the Agent of the fact could incur delays.

BERTHING: The following equipment is required to moor and is placed aboard the vessel when the Berthing Controller boards from the Conoco service craft, Spurn Haven:—

2 each 50 ton S.W.L. alloy steel shackles.

2 each 44 mm. diameter wire securing strops with a 2 m. soft eye at each end, overall length 37 m.

In addition to this mooring gear hose hang-off chains and securing equipment is placed aboard at the same time.

The vessel approaches the mono-buoy on a Westerly heading. A messenger (min. 40 mm. diameter) should be lowered to the water and this will be picked up by the Conoco mooring launch "Monogirl" when approx. 150 m. from the mono-buoy. This messenger will be made fast to a 80 mm. × 92 m. polypropylene pick up rope which should be heaved up as the vessel makes the final approach to the buoy. When the chafing chain is in the fairlead the open links are shackled to the wire strops which are turned up on a suitably sited set of bitts.

HOSES: Hoses are taken on the port side and the port derrick (min. S.W.L. 10 tons) should be rigged and ready for use on arrival.

Two 16 in. hoses are taken aboard, manifolds should be 16 in. 150 A.S.A. and 10 in. and 12 in. 150 A.S.A. can be accommodated by the provision of reducers. Should a vessel have any other size of manifold or be unable to provide adaptors to suit one of the sizes, Tetney Terminal will need to be notified at least 72 hours before arrival.

Hose connection and disconnection is carried out by the ships crew under the supervision of the Berthing Controller. Upon completion of discharge the hoses will be filled with sea water by the ship after which disconnection can commence. When the hoses are blanked off they will be hung off until just before sailing when they will be lowered to the Spurn Haven for towing clear.

POLLUTION: It is the Master's responsiblity to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oil water from the bilges, crude residues from previous voyages or any other matter that may result in the pollution of the sea. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea, especially in regard to the river Humber.

SHORE LEAVE: None of the officers or crew shall be allowed shore leave and no boats of any kind, except in an emergency, shall be lowered during the vessel's stay in the berth.

TYNE DISTRICT: 55.01 N. 01.24 W. (See Plan Book)

(Including Newcastle, North and South Shields, Jarrow, Tynemouth, Wallsend and Gateshead).

AUTHORITY: Port of Tyne Authority.

DOCUMENTS:

1 Crew List for H.M. Immigration Office.
1 Form C.142 (Tobacco List) supplied by H.M. Customs.
1 List of Private Addressed Packages not manifested (C.143) supplied by H.M. Customs.

Details of Oil in DBT, also measurement in cu. ft. of cargo in non-registered spaces.

PILOTAGE: Pilots normally stationed outside Harbour entrance within 1 mile radius. In bad weather Pilots will advise concerning entering. 12 hours advance notice via Agent requested. Frequency medium wave 2182 kHz. Call "Tyne Pilots". VHF – Call on Channel 16, working Channel 6. Cutter – 55 ft. in length painted black with white lettering "Pilots" – displaying pilot's flag. Efficient pilot ladder required as per Board of Trade regulations.

ANCHORAGE: Off entrance River Tyne, recommended 1.5 mile N.E. of North Pier. Minimum 12 fathoms.

RESTRICTIONS: Depths below Chart Datum (L.A.T.) from piers to West end of Jarrow Oil Wharf: 8.61 m. thence to Newcastle Bridges (except in main channels of Swing Bridge and High Level Bridge): 6.0 m. thence to West end of Dunston Staith: 4.8 m.

MAX. SIZE: Harbour entrance, length and breadth: no limit. Draft 8.0 m. any state of tide: up to 11.0 m. at high water.

Riverside Quay, draft up to 10.00 m.
Esso Oil Terminal, draft up to 9.00 m.
Newcastle Quay, 25–26 berths – 8.0 m.
RHM Mill, Gateshead – draft up to 7.0 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio W/T "GCC." Cullercoats Radio On R/T.

PORT OPERATIONS AND INFORMATION SERVICE: VHF: Call sign "Tyne Harbour Radio" on Channel 16, frequency 156.80 mHz and on Channel 12, frequency 156.60 mHz. The control station is situated at the Harbour Master's Office, North Shields, and is manned on a 24 hour basis. Vessels must obtain permission by VHF from the control station before entering the port, similar permisson must be obtained before movement within, or before sailing from the port. A service is provided for the passing of information to shipowners and Agents.

TUGS: Normally join inside piers, tow ropes optional except manufactured of man-made fibres. Orders for week-end arrivals must be given before 1030 hrs. Saturday. Rates on application to Tyne Tugs Ltd. Tel: South Shields 553361.

BERTHING:

Albert Edward Dock:

Warehouse Quay: 356 m. long, depth of water 7.9 m.

East Dock Wall: 161 m. long, depth of water 7.9 m.

Ro-Ro Berth No. 1, East Dock Wall: depth of water 7.5 m.

Heavy Load Berth (Ro-Ro No. 2) for heavy unit loads on transporters up to 510 tonnes; depth of water 7.5 m.

Tyne Commission Quay: 335 m. long, depth of water 7.11 m.

Tyne Commission Quay Extension: 118 m. long, depth of water 6.21 m.

Car Ferry Terminal:

Ro-Ro No. 3: 180 m. long, depth of water 7.11 m.

Ro-Ro No. 4: 140 m. long, depth of water 7.5 m.

Tyne Dock:

North West Quay: 243 m. long, depth of water 8.2 m.

Factory Quay: 196 m. long, depth of water 7.0 m.

Riverside Quay: 264 m. long, depth of water 10.5 m.

Sutherland Quay (Waiting Berth): 137 m. long, depth of water 6.51 m.

Newcastle Quay:

930 m. long, depth of water up to 8.61 m.

Spillers Tyne Mill: 173 m. long, depth of water 8.01 m., discharge rate 150 tonnes per hour.

RHM Mill: 198 m. long, depth of water 8.01 m., discharge rate 150 tonnes per hour.

Jarrow Staith: 2 berths, depth of water 7.11 m. Loading rates 1,000 tonnes per hour East berth, 500 tonnes per hour West berth.

Harton Staith: 1 berth, depth of water 6.4 m.

Dunston Staith: 3 berths, depth of water 5.5 m.

TANKERS:

Shell (UK) Limited, Jarrow. 189 m. long, depth of water 8.0 m.

Esso Petroleum Company Limited, Howdon:–

Ocean Jetty: 274 m. long, depth of water 9.51 m.

Coaster Jetty: 167 m. long, depth of water 6.0 m.

Velva Liquids Limited, South Shields: 170 m. long, depth of water 8.0 m.

Velva Liquids Limited, North Shields: 248 m. long, depth of water 7.11 m.

Tanker Cleaning Berth Howdon: 248 m. long, depth of water 7.11 m.

SERVICES: The tanker-cleaning berth at North Shields provides accommodation for vessels about 248 m. length, depth alongside 7.11 m. below Chart Datum. The shore installation, which is owned and operated by the Tyne Tanker Cleaning Co. Ltd., includes large reception capacity for tank washing and oily sludge, separators of the latest type which can deal with oily water at the rate of 1,000 t.p.h. and various treatment and storage tanks; together with boilers and steam pumping plant. Expert staff and modern equipment for carrying out tank washing, cleaning and gas-freeing of vessels at the berth, and for other essential duties are also available, making it possible for tanker crews to be paid off immediately on arrival. The whole installation is protected by a most complete system of fire precautions and fire-fighting equipment.

BRIDGES: At Newcastle 10 miles from entrance for proceeding to Dunston Staiths, Swing Bridge negotiated against tide; other bridges, max. mast height 24.7 m. above MHWS.

STEVEDORES: Principal Stevedores Port of Tyne Authority. All arrangements through Agent. Stowage plan required prior to arrival.

Plant pool as follows:–

Albert Edward Dock:

Warehouse Quay – 4 cranes, 5–6 tonnes.

East Dock Wall – 3 cranes, 5 tonnes.

Tyne Commission Quay – 7 cranes, 3–40 tonnes.

Tyne Commission Quay Extension – 2 cranes, 6 tonnes.

Ro-Ro Berths – 3 terminal tractors.

Tyne Dock:

Riverside Quay – 5 cranes, 10 tonnes.

North West Quay – 9 cranes, 3–10 tonnes.

Factory Quay – 2 cranes, 3 tonnes.

Newcastle Quay: – 13 cranes, 3–30 tonnes.

There is a pool of 55 fork lift trucks of 5,000–22,000 lbs. capacity available for any location. These trucks can be fitted with attachments for handling paper, pulp, etc.

MEDICAL: Hospitals available, Advise Agent in advance if medical attention required on arrival.

DENSITY: Entrance/Tyne Dock – 1025; Tyne Dock/Jarrow 1020; Newcastle Quay 1005/1010.

FRESH WATER: Available ex Water Boat, rate of delivery up to 150 t.p.h.

FUEL: All grades ex installation, or by barge, 24 hours notice required.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Crew allowed open and close.

CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 0.5 lb. tobacco per man and equivalent to 1 bottle wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.

CERTIFICATES:

Register.

Load-line.

Safety Construction.

Safety Equipment.

Safety Radio.

Trinity Light Bills.

IDENTIFICATION CARDS: Not required.

SHORE LEAVE: Allowed.

AGENT: Lambert Brothers Ship Agencies Ltd., 'B' Floor, Milburn House, Dean Street, Newcastle-upon-Tyne, NE1 1LY. Tel. Newcastle (0632) 27314. Telex: 53405. Cable address: "Lambros."

WARRENPOINT: 54.06 N. 06.16 W. (See Plan Book)

PORT LIMITS: Seaward to a line from Ryland River (South Coast) to Ross Memorial (North Coast) approximately 3,000 m. from Warrenpoint.

DOCUMENTS:

2 Crew Lists.

2 Passenger Lists.

1 Store List.

Vessel's Papers and Certificates.

1 Manifest or Bill of Lading.

PILOTAGE: Not compulsory. Pilot station at Greencastle Pier at entrance (North side) to Carlingford Lough. VHF (Warrenpoint Pilot) radio, Channels 16 and 12. Notice to Agents of ETA at 48 hours and 24 hours.
ANCHORAGES: Safe anchorage at Fairmont Roads S.E. Greenore and also inside Carlingford Lough N.W. of No. 13 Buoy.
RESTRICTIONS: None except draft of vessel. Advise Agents.
HEALTH: No certificate necessary. In event of disease or fever contact Agent in advance. Hospitals available.
Also see "Health-all ports" before first UK port.
RADIO: All messages to Agents through Portpatrick Radio or Anglesea Radio.
VHF: Pilot station (Warrenpoint Pilot) and Port Radio (Warrenpoint Harbour) on Channels 16 and 12.
TUGS: None.
BERTHING: All berths except Town Dock have 17 ft. at LWOST.
STEVEDORES: Warrenpoint Harbour Authority. Telephone: Warrenpoint 3381. Telex: 74660
CARGO HANDLING FACILITIES:
2 35 tonne Liebherr Transporter Container Cranes;
1 Poclain HC300 Hydraulic Crane;
1 Jones 971 HLB Dockside Crane;
2 Babcock Wilcox Luffing Grabbing Cranes;
BULK CARGO FACILITIES: Coal – 2 Luffing Grabbing Cranes at 150 t.p.h.
Grain discharged at up to 250 t.p.h. to Grain Silo of 8 bins, total capacity about 4,800 tonnes.
SPECIALISED CARGO HANDLING FACILITIES: Roll-on/Roll-off berth with 15 ft. at LWOST. Bridge has HA loading. Ramp 6 m. wide Marshalling area about 8 acres.
FUEL: Available by road tankers. 48 hours notice usually required.
FRESH WATER: Available from pipes on quay.
CONSULS: None.
REPAIRS: Small repairs can be undertaken.
DRY DOCKS: None.
SURVEYORS: Lloyds – Jos. Fisher & Sons, Ltd. Warrenpoint 3500.
GANGWAY/DECK WATCHMEN: Neither compulsory nor necessary.
HATCHES: Opening and closing by crew.
CUSTOMS ALLOWANCE: As permitted by UK Customs and Excise.
CARGO GEAR: Ship's gear only used if shore cranes not available.
REPATRIATION: Airports (Belfast and Dublin) 2 hours away. Transport available. By sea – Belfast 1 hour.
AIRPORTS: Belfast (Aldergrove) 60 miles. Dublin 75 miles. Schedule flights daily to London.
TIME: GMT.
HOLIDAYS: New Year's Day; St. Patrick's Day (17th March); Easter Monday and Easter Tuesday; 1st Monday in May; 12th July; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.
TELEPHONES: Not possible to place telephones on board.
SERVICES: Check with Agents. Most services can be supplied given 24 hours notice.
SHORE LEAVE: After clearance inwards, crew members allowed ashore without restriction. No passes issued.
DELAYS: Delays in loading or discharging are minimal and infrequent.
AUTHORITY: Warrenpoint Harbour Authority.

WATCHET: 51.11 N. 03.20 W. (See Plan Book)

DOCUMENTS: Crew List, Store List, Ships Register, Manifest or Bills of Lading.
PILOTAGE: Trinity House Outport District, Compulsory, ETA 24 hrs. before arrival to Harbour Masters Office, Watchet 31264, after hours Minehead 3430.
ANCHORAGE: Safe anchorage Blue Anchor Road.
RESTRICTIONS: Accordance with state of tide and draft. Vessels enter 2 hours before H.W.
MAX. SIZE: Max. permissible length 97 m., breadth 16 m., draft restrictions according the height of tides, max. draft Neap tides 12 ft. and Spring tides 14–16 ft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: It is best for vessels to give ETA by RT to Lands End or Ilfracombe Radio.
VHF: Watchet Radio Channels 16, 12 and 14.
TUGS: None.
BERTHING: 2 quays, 1 of 150 m., 1 of 120 m.
CRANES: 3 cranes, 2 of 5 tons, 1 of 10 tons.
BULK CARGO: Cranes with grabs.
STEVEDORES: Watchet Marine Ltd.
MEDICAL: Port Doctor in Watchet.
DENSITY: Salt 90%.
FRESH WATER: Available on the quay.
FUEL: All grades, advance notice required.
FIRE PRECAUTIONS: Normal port precautions.
CONSULS: Bristol.
REPAIRS: Normal repairs to ships possible notice required.
SURVEYORS: Available from nearby ports.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCE: Decided by the Customs officer in charge.
CARGO GEAR: Shore gear, cranes and forklifts.
REPATRIATION: Facilities exist for crew changes.
AIRPORT: Nearest airport at Bristol.
TIME: GMT and British Summertime.
HOLIDAYS: Cargo work can be arranged.
POLICE/AMBULANCE/FIRE: Phone 999 for all three services.
TELEPHONES: None on quay.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: None required.
DEVELOPMENTS: New warehouse and lorry park.
AUTHORITY: West Somerset District Council.

WHITEHAVEN: 54.33 N. 03.36 W. (See Plan Book)

DOCUMENTS: Usual required for clearing a vessel from foreign port, i.e. Crew list, Passenger list, Customs Documents, Ships Register, Manifest and Bills of Lading.
PILOTAGE: Request for Pilot is made by International Code signal G, sound and visual. ETA should be sent 12 hours in advance either to ship's Agent or Harbour Master or both. Area for taking Pilot on board 4 to 5 cables West of Harbour. Pilot boat is a 36 ft. varnished boat, name "J. T. Pears". VHF is installed.
ANCHORAGE: Same area as for boarding Pilot according to draft.
RESTRICTIONS: Vessels may dock from 1.5 hours before high water till 1 hour after high water according to draft.
MAX. SIZE: 270 ft. length, 40 ft. beam and 17 ft. draft (deepest) on spring tides, 14 ft. draft (deepest) on neap tides.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Port Patrick and Anglesey Radio Stations.
TUGS: No tugs.
CRANES:
1×35 tonnes lifting capacity.
2×10 tonnes lifting capacity.
1×15 tonnes lifting capacity.
2×5 tonnes lifting capacity.
MEDICAL: Agent should receive notice in advance of any medical treatment required. Hospital services are readily available.
DENSITY: Any state of tide density is 1025.
FRESH WATER: Fresh water is available on all berths, any quantity on request to ship's Agent.
FUEL: Most grades and types available.
FIRE PRECAUTIONS: Usual precautions are taken when inflammable cargo is being loaded or discharged.
GANGWAY/DECK WATCHMEN: Advisable to have a watchman but not absolutely necessary.
OPENING/CLOSING HATCHES: Always opened and closed by crew members.
CERTIFICATES: Derat certificate, Load Line certificate, Radio R/T certificate, etc.
CUSTOMS ALLOWANCE: 200 cigarettes, 1 bottle spirits.
IDENTIFICATION CARDS: None required.
CONSULS: Norway, Sweden, Denmark and the Netherlands.
REPAIRS: All types of deck and engine repairs carried out.
REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.
AIRPORTS: Nearest airports are at Manchester, Newcastle and Prestwick, all approx. 130 miles away.
HOLIDAYS: Cargo may be worked on following days: New Year's Day, Good Friday, Easter Monday, Whit Monday, August Monday, Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Telephone numbers of these services in order are: Whitehaven 2616, 3181 and 2151.
TELEPHONES: No special arrangements exist for placing telephones on board vessels.
SHORE LEAVE: Crew members may come and go at all times.
DELAYS: There are very seldom any delays in berthing and none in loading, discharging or bunkering.
AUTHORITY: The Whitehaven Harbour Commissioners.

United States of America

GENERAL

AGRICULTURE: All ports

Arrival Notification: The vessels' Master or port agent should notify the U.S. Department of Agriculture (USDA) inspector at each port of arrival of expected time and location of arrival.

Documents: The cargo, stores, and crews' effects lists or manifests must be available for review by the boarding USDA inspector.

Inspection: The USDA inspector will examine the galleys, storerooms, lockers, mess areas, and crew quarters in some instances for prohibited plant materials (fruits, vegetables, and plants) and meat products. Some categories of food materials may require being placed under seal. Also, inspections may be made of onboard cargo and cargo holds.

Garbage: All food wastes aboard vessels arriving from foreign or offshore areas (except Canada) must be handled in accordance with USDA regulations. Garbage may be held aboard vessels in leakproof, covered containers for disposal at sea or, it may be removed with permission of a USDA inspector for disposition in approved facilities.

Treatments: If quarantine-significant pests are found aboard a vessel, an Emergency Action Order may be issued to the Master. It will prescribe what treatments are required to the affected articles or area of the vessel and when this treatment must be accomplished.

Animals/birds: All live animals or birds aboard vessels must be reported to the USDA inspector.

For additional information: Write to "Quarantines," U.S. Department of Agriculture, Federal Building, Hyattsville, MD 20782.

HEALTH: All ports.

The U.S. Public Health Service does not maintain Quarantine Stations at each port of entry. The smaller ports are under the jurisdiction of Quarantine Stations located at strategic ports of entry. Matters of public health significance occurring on vessels destined to ports not manned by Public Health Service personnel should be reported to the Quarantine Station having jurisdiction over that port.

Masters of Vessels arriving at United States ports

Effective July 1, 1973, radio pratique as a method of quarantine clearance will be discontinued at all ports under control of the United States. Changes in regulations, policies, and procedures concerning maritime public health clearance have been promulgated.

Vessels subject to routine inspection

Only vessels in the following categories will be subject to onboard public health inspection upon arrival at ports under control of the United States.

A. Crew or passengers having:

1. Temperature of 100° F (38° C) or greater (a) which persisted for 2 days or more; or (b) which was accompanied or

followed by any one or all of the following: rash, jaundice, glandular swelling; or
2. Diarrhoea severe enough to interfere with work or normal activity; or
3. On board occurrence of death, regardless of the signs and symptoms above.

B. Vessels which have been in a smallpox infected country during the 15 days prior to arrival in the United States.

C. Vessels which have been in a plague infected country in the 60 days prior to arrival in the United States.

Procedures. Vessels in any of the categories, A, B, or C above will be granted provisional pratique and boarded upon arrival for inspection. In addition, vessels boarded for quality control may be boarded upon or subsequent to arrival. In accordance with regulations you must inform the quarantine station, through your vessel Agent, at or nearest the intended port of your vessel's first arrival in the United States of the occurrence of illness as specified in A above. Based on information you provide your Agent, or information your Agent already possesses regarding your vessel's itinerary, your Agent will notify the quarantine station if your itinerary included a smallpox or plague infected country. Arriving vessels no longer need to complete a maritime public health declaration unless boarded for inspections as described above. The boarding inspector will provide the declaration.

These changes reflect our confidence that you will continue to report, in advance of arrival in the United States, the on-board occurrence of illness compatible with the signs and symptoms specified above.

PILOTAGE: North West Coast of U.S.A.
Columbia River Bar Pilots are "Sea Pilots" for all ports in Columbia and Willamette Rivers. Namely, Astoria and Portland (Oregon), Longview, Kalama and Vancouver (Washington) – when entering from sea and if providing above Astoria, Columbia River Pilots relieve Bar Pilots for balance of transit.

COLUMBIA RIVER BAR PILOTS
P.O. Box 81, Astoria, Oregon 97103
TWX 910-466-8014
Telephones (503) 325-2641 or 325-2642

RADIO FACILITIES

Pilot Boat Peacock	WS 7217
Pilot Boat Columbia	WYE 7344
Bar Pilots Office, Astoria (Ch. 16) (156.80)	KOK 360
Astoria Marinephone "KFX"	
Ships Call on	2206 kc/s
KFX Answers on	2598 kc/s

Or call on and receive KFX on Channel 26.

Pilot boat now equipped with single sideband radios.

Pilot boat guards 2182 kHz and will switch to working frequency after contact.

In order there be no delays, vessels due to arrive at the Columbia River and desiring a Bar Pilot, must cable or telephone the Columbia River Bar Pilots. (Pilot normally not on station unless cable or telephone message received.) USE RADIO STATION KLB, EVERETT, WASHINGTON at least 12 hours before arrival at the lightship. Code address, "BAR PILOTS, STATING THE TIME OF ARRIVAL". If transmitted by any other radio station, delay may occur. If vessel is equipped with VHF, use Channel 16 (156.80 mc/s.) to call the pilot boat or BAR PILOTS office, Astoria (KOK 360) and shift to Channel 13 (156.65 mc/s.)

PILOT LADDER INSTRUCTIONS

1. Please contact the pilot boat via voice radio (Channel 16 or frequency 2182) approximately 30 minutes prior to arrival for desired lee and boarding instructions.

2. The Columbia River Bar Pilots have 2 pilot vessels; the "Peacock" and the "Columbia". When the "Peacock" is on station, Masters will be instructed to rig their pilot ladder 4 ft. above the water's edge. When the Columbia is on station, the Master will be instructed to rig the ladder 10-12 ft. above the water's edge. The above-mentioned distances above the water are of the utmost importance, particularly in the case of the "Columbia", as the pilot boat can and has pulled the ladder down when it becomes pinched between the pilot boat and the side of the vessel. Pilot ladders and boat ropes shall not be permitted to drag in the water. No tag lines, pull ropes or trailing lines shall be attached to the bottom of the ladder.

3. Pilot ladders shall be rigged amidships, over "draft marks" clear of all obstructions, such as accommodation ladders, and clear of overside discharges from the engine room and deck scuppers.

4. The pilot ladder should be kept clean and used for embarking and disembarking Pilots only. The ladder shall be made in one continuous length, not 2 sections shackled or lashed together. The ladder shall be equipped with spreaders approximately 10 ft. apart in accordance with SOLAS regulations. The ladder must be in good condition, the treads horizontal and the upper surface of rough non-skid quality.

5. The ladder must be adequately lit at night by means of a light shining well over the ship's side in the vicinity of the ladder. The area of the deck where the Pilot boards and leaves should be free of debris and well lighted. Where portable stanchions and bulwark steps are used, they shall be rigidly attached to the ship's structure. A life ring with water light and lifeline attached should be ready at hand. Rigging of the ladder and embarking and disembarking of the Pilot must be under the supervision of a licensed officer.

6. Boat ropes are not to be used, all pilot boats are power propelled.

7. Manropes shall be of manila 3 in. circumference. The man ropes shall be free of any knots including the lower end. The man ropes should be rigged 1-2 ft. longer than the pilot ladder. Man ropes are not to be rigged for boarding unless otherwise advised.

8. Should vessel be fitted with a mechanical ladder, the ladder should have a double fall. Also, a conventional ladder must be kept ready at hand, should it be required.

9. If vessel is to take a deck load of logs, please discuss with your agent the building of a catwalk to provide safe passage to and from the pilot ladder.

SHIP'S OFFICER'S REPORT: The information given for the port of New Orleans (U.S.A.) applies to all the ports in the U.S.A. in the event of the vessel arriving from abroad or from a previous U.S. port. All the documents such as Crew List, Passenger List (Form I-418), Deck, Engine, Stewards & Bonded Stores Lists (Form 1303), Crew's Effects Declaration (Form 1304), are required in duplicate at each port for entry inward.

ALBANY, New York: 42.40 N. 73.45 W.

(See Plan Book)

DOCUMENTS: If first port of call in U.S., 2 complete Custom's Manifests describing all cargo on board and ports of discharge. Also 1 Cargo List for Albany cargo; 3 Crew Lists; 3 Store Lists, 3 Curio Lists, the Ship's Register, Load Line Certificate and Tonnage Tax Certificate.

PILOTAGE: Hudson River Pilot boards vessel off Yonkers, N.Y. Cable address: "Hudpilots, Yonkers, N.Y."

ANCHORAGES: Several anchorage areas in Hudson River en route to Albany if required due to weather. Vessels cannot anchor at Port of Albany.

RESTRICTION: Hudson River Channel to Albany has controlling depth of 32 ft. MLW. Vessels with draft in excess of 28 ft. will be required to transit river on favourable tide as directed by Pilot.

MAX. SIZE: Max. permissible length 750 ft.; breadth 110 ft., draft 30 ft. Turning basin at Albany 1,100 ft. in width.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: One 2,500-h.p. tug stationed at port at all times; additional tugs available upon advance request. Normally 1 tug is sufficient for turning and docking. Tug's lines are used.

BERTHING: 4,000 linear ft. of marginal wharf available at APDC terminal for general cargo, grain, lumber, etc., 32 ft. alongside wharf. Various privately operated deep-water petroleum terminals in port area.

Facilities: 13.5 million bushel grain elevator. 17 million gallon molasses storage – 3 terminals. Scrap Iron Terminal, Banana Terminal.

Equipment: Available at the Port of Albany:
2 Diesel-operated wharf cranes, 5 ton capacity each
1 Gasoline crawler crane, 15 ton capacity
3 Fork-type telescopic lift trucks, 15,000 lb. each (height of lift 17 ft.)
12 Fork-type telescopic lift trucks, 5000 lb. to 7000 lb. each
2 Clamp equipped telescopic lift trucks, 7000 lb. capacity each
9 Gasoline operated lumber carriers
2 Front-end loaders, 1.25 cu. yd. capacity each
1 180 ton capacity bulk car unloader
21 5/8 cu. yd. clamshell buckets
Hoppers for shipside bulk materials handling
Complete bagging equipment for all bulk materials

BRIDGES: Minimum vertical clearance of bridges on Hudson River en route to Albany is 135 ft.

STEVEDORES: Rates and information can be obtained from John W. McGrath Corporation; 7 gangs available.

FRESH WATER: Supplied during regular working hours daily except Saturdays, Sundays, and holidays at $1.50 per 100 cubic ft. plus $10.00 service charge per daily delivery on straight time. Additional charge if supplied during other periods.

GANGWAY/DECK WATCHMEN: Available via ship chandler not required but recommended.

CONSULS: Italian Vice-Consulate located at Albany, other consulates available at New York City.

REPAIRS: Minor deck and engine repairs can be handled.

AIRPORT: 7 miles distant from port: served by Allegheny, America, Altair and Executive Airlines.

TIME: Eastern Standard and Eastern Daylight Saving, 5 hours minus GMT.

HOLIDAYS: Standard U.S. holidays; cargo work can be arranged on all holidays at overtime rates, except July 4th, Labour Day and Christmas Day.

SHORE LEAVE: Crew members allowed ashore unless restricted by Customs or Immigration requirements.

AUTHORITY: Albany Port District Commission.

ALEXANDRIA, Virginia: 38.48 N. 77.03 W.

(See Plan Book)

DOCUMENTS/PILOTAGE: Refer to "Hampton Roads".
RESTRICTIONS: Anchoring necessary between 2200 to 0600 hrs. Berthing daylight only.
MAX. SIZE: Governed by draft only – max. 22 ft. 6 in. all times.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Baltimore Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMH Baltimore, Md.
TUGS: None required.
BERTHING: Berthing 0600 to 2200 hrs.
BRIDGES: 1 bridge, closed Monday through Friday 1600–1830 hrs. and 0630–0900 hrs.
STEVEDORES: Informally arranged through Receivers or Shipper's Agents.
MEDICAL: Hospital available.
FRESH WATER: Available at berth – 10 t.p.h.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Shore watchman provided.
OPENING/CLOSING HATCHES: Stevedores. Vessel – depending on understanding.
IDENTIFICATION CARDS: Required by Immigration.
REPAIRS: Minimal facilities.
REPATRIATION: Facilities exist.
AIRPORT: 3 miles. Washington National – multiple flights.
TIME: GMT minus 6 hours.
POLICE/AMBULANCE/FIRE: Agents arrange. Watchmen on duty.
SHORE LEAVE: Allowed.
DELAYS: No unusual delays.
AUTHORITY: Virginia Port Authority, Norfolk, Va.

ANACORTES, Washington: 48.31 N. 122.36 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc: Refer to "Tacoma".
ANCHORAGES: East End Guemes Channel, 54 ft. min. depth.
MAX. SIZE: Length, open. Draft, 54 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Join vessel in Guemes Channel at Anacortes – lines optional.
BERTHING: Pier no. 1, depth 31 ft.; Pier no. 2, depth 38 ft.
STEVEDORES: Request 24 hours notice.
FRESH WATER: Available from city water system.
FUEL: Available from Shell and Texaco.
GANGWAY/DECK WATCHMEN: Not required by port.
OPENING/CLOSING HATCHES: Stevedores.
CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
CARGO GEAR: ILWU requirements.
IDENTIFICATION CARDS: Required.
REPAIRS: Minor repairs only.
AIRPORT: 75 miles Seattle International.
TIME: GMT minus 8 hours. From end April to end October, Pacific Daylight Saving Time, GMT minus 7 hours.
HOLIDAYS: See "Tacoma".
POLICE/AMBULANCE/FIRE: Police 293–3157; Ambulance 293–3183; Fire 293–3155.
TELEPHONES: Available at Pier 2 and at Pier 1 by Phone Co.
SHORE LEAVE: Allowed.
AUTHORITY: Port of Anacortes.
AGENT: See "Seattle".

ANCHORAGE, Alaska: 61.12 N. 150.00 W.

(See Plan Book)

DOCUMENTS:
- 3 copies Cargo Manifest (Forms 7527.A or 7527.B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 2 copies Crew Manifest (curio list).
- 2 copies Stores List.
- 2 copies Passenger List (Form I.418).
- 2 copies Crew List (Form I.418).

Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
- Master's Oath (Customs Form 3255).
- All foreign clearances.
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.

PILOTAGE: The pilot station for Anchorage is at Homer, Alaska. Vessels may contact Pilot by radio telephone. Telegraphic address "Almarrpilot", ETA notice requested 24 hours. Guards VHF Channel 10. Pilot boat green and white. Pilot flag by day, pilot light at night. Pilot boat 1 mile South of Homer Spit (Coal Point) Homer Alaska. In bad weather, wait inside Homer Spit and advise via radio-telephone.

Also see "Homer".

ANCHORAGES: The best anchorage for deep-draft vessels is West of Anchorage in depth of 10 to 12 fathoms, silt bottom. Holding ground is good.
TIDE AND CURRENTS: The diurnal range of tide is 29.6 ft., currents from 1.7 to 6 knots or more in mid-channel.
RESTRICTIONS: Flow and pan ice is encountered in the Cook Inlet from approximately the end of November until the end of February. This ice does not freeze solid due to the tidal action. The port is in year-round use and expert information on Winter conditions may be obtained from any of the highly qualified licensed ship pilots available in the area.
MAX. SIZE: All berths 35 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Port of Anchorage "KBT-42" on HF-AM and SSB. "WHJ-82" on VHF-FM.
TUGS: Join vessel 1.5 miles S.W. of docks.
BERTHING: 600 ft. general cargo Terminal No. 1, apron width 47 ft., live road limit 600 lb. per sq. ft. General cargo Terminals No. 2 and 3, 610 ft. and 893 ft. respectively, apron width 69 ft. Depth alongside face at MLLW 35 ft.

Shore Cranes: Level luffing gantry and Paceco container cranes. Capacity: Level luffing gantry 7.5 tons and 40 tons (5 ton high-speed whip lines). Container cranes 27.5 tons.

Outreach from fender face is 70 ft. for the gantries and 81 ft. on the Paceco. Clear height above MLLW is 132 ft.

TANKERS: The Petroleum Terminal at the port of Anchorage is contiguous to the general cargo docks. The POL Dock is 612 ft., long and contains multiple petroleum manifolds in addition to those on Terminal No. 1. Depth 35 ft. alongside.
STEVEDORES: Working Hours: Stevedores do not work on January 1st, September 6th, November 25th and December 25th. The first 6 hours of any shift between 8.00 a.m. and 3.00 p.m. is at the straight time rate. Work performed on Saturdays, Sundays, holidays and between 5.00 p.m. and midnight is at overtime rate. Meal breaks are 11.45 a.m. to 1.00 p.m. and 4.45 p.m. to 6.00 p.m. Stevedores do not normally work between midnight and 7.00 a.m.
SPECIALISED CARGO HANDLING FACILITIES: Two 27.5 ton Paceco container cranes servicing general cargo Terminal 2 and 3; private bulk cement pipe-lines to shore silos. Ro/Ro service available.
DENSITY: From 1.0098 to 1.0102.
MEDICAL: All facilities available. 3 local hospitals.
FUEL: All grades available.
FRESH WATER: Public Health Service certified water station.
GANGWAY/DECK WATCHMEN: Required shipside.
OPENING/CLOSING HATCHES: By stevedores.
AIRPORT: 5 miles; served by regular foreign and domestic airlines.
CUSTOMS ALLOWANCES: At the discretion of customs officer. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.–95 to be made up for each crew member on arrival. Not necessary for crew men already holding Form I.–95, issued for the same vessel.
HOLIDAYS: New Year's Day (January 1st); Lincoln's Birthday Washington's Birthday; Seward's Day (March 30th); Memorial Day; Independence Day (July 4th); Labour Day; Columbus Day; Alaska Day (October 19th); Veterans' Day; Thanksgiving Day; Christmas Day (December 25th).
POLICE/FIRE/AMBULANCE: Police 272–1414; Ambulance/Fire 272–1515.
TELEPHONES: Telephones available shipside.
AUTHORITY: Port Director, Port of Anchorage.

ASHTABULA, Ohio: 41.53 N. 80.48 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Nearest pilot station is the Welland Canal, Canada.
ANCHORAGES: No anchorage inside boundaries. Good anchorage outside to East of the entrance, depth approx. 20 fathoms.
MAX. SIZE: The Pinney Dock and Transport Company stevedoring dock handling overseas cargoes located just East of entrance to the port. Channel depth of 28 ft. 4 berths, 27 ft. alongside; length of facilities up to 700 ft. by 75 ft. beam. No facilities for oil carriers.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Contact Lorain, Ohio ship-to-shore station for local connections.
TUGS: Tugs normally join vessels just inside harbour entrance. Use ship's or tug's lines optional; tug lines used at additional charge of 10% of the tons will be added. For tug service call ship-to-shore tug Idaho, FM Channel 51.
STEVEDORES: Work gangs for loading and unloading provided by the Pinney Dock and Transport Company.
MEDICAL: Vessels requiring medical attention call U.S. Coast Guard station located in the main river by calling AM Channel 20. Ambulance and hospital service available. No inoculation, vaccinations, or fever certificates required.
DENSITY: Fresh water.
FRESH WATER: Available at stevedoring dock.
FUEL: Available on 24-hour notice.

FIRE PRECAUTIONS: City fire department. Also water line on face of the dock available.
GANGWAY/DECK WATCHMEN: Overseas stevedoring dock enclosed wire fence, watchmen on dock at all times, guard at main gate.
OPENING/CLOSING HATCHES: Optional by crew or stevedores.
CUSTOMS ALLOWANCES: Only allotments per person consumed aboard allowed.
IDENTIFICATION CARDS: Required.
CONSULS: Nearest at Cleveland.
REPAIRS: All types of deck and engine repairs available; also topside shell repairs.
REPATRIATION: Can be arranged.
AIRPORT: Nearest airport approx. 10 miles South with commuter services to Cleveland Hopkins Airport. Cleveland Hopkins Airport approx. 70 miles West.
TIME: Local Eastern Standard Time except from May to October – Daylight Saving Time.
HOLIDAYS: Stevedoring docks double time on holidays and time plus one-half on Saturdays and Sundays.
POLICE/AMBULANCE/FIRE: Police, 993-8281; Ambulance, 964-3121; Fire, 964-7123.
TELEPHONES: No provisions for placing telephones aboard vessels.
SHORE LEAVE: Crew allowed ashore.
DEVELOPMENTS: Pinney Dock and Transport Co. are dredging a second slip (length 2,000 ft.) and constructing a third pier (length 2,000 ft., depth 28 ft.).
AUTHORITY: Ashtabula Port Authority.

ASTORIA, Oregon: 46.11 N. 123.50 W.

(See Plan Book)

PILOTAGE: Columbia River Bar Pilots, PO Box 81, Astoria, Oregon, 97103. TWX. 910-466-8014. Tel 503-325-2641. Also see "General – Pilotage" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: The port of Astoria has 3 finger piers with 9 berths.
Pier 1: 2 berths – 167,000 sq.ft. covered shed, gallery for elevator – rail trackage.
Grain loading facilities: At Pier No. 1 Max. draft 37 ft. Loading rate 750 t.p.h.
Pier 2: 5 berths – 600,000 sq.ft. open area, bunkering facilities at berths 3-5-6, rail trackage.
Pier 3: 2 berths – 248,000 sq.ft. covered shed, barge ramp, rail trackage.
Water Depth: 35 ft. at inside berths, 40 ft. at outside berths.
STEVEDORES: Brady-Hamilton and Jones-Oregon.
FRESH WATER: Available delivery to vessel through portable hose.
AUTHORITY: Port of Astoria.
AGENT: See "Portland", Oregon.

ATRECO, Texas: 29.59 N. 93.53 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

BALTIMORE, Maryland: 39.17 N. 76.35 W.

(See Plan Book)

DOCUMENTS:
3 Copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (curio list).
3 copies Stores Lists.
3 copies Passenger List (Form 1.–418).
3 copies Crew List (Form 1.–418).
Customs boarding officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port.
Master's Oath (Customs Form 1300) 3 copies.
General Declaration (Customs Form 1301) 3 copies.
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certificate Crew List.

PILOTAGE: Each vessel entering the Chesapeake Capes under foreign flag or carrying foreign cargo is required to employ a Pilot of the Association of Maryland Pilots. The Association maintains a pilot boat which is anchored at the entrance of the Chesapeake Capes. Pilots will be furnished with a small transistorised portable radio unit, which provide ships bridge to bridge communication system to ensure navigational safety while traversing the waters of Chesapeake Bay. It is a positive means of communication to ensure ship's position reporting, the safety and movement of vessels, as well as messages related to the operational needs of vessels proceeding to the port, and provide the Pilots communications instructions expediting operations of vessels when they are aboard.

The pilot boat has a black hull and is located 2 miles North of Cape Henry Lighthouse.

The pilot ladder should be 2 ft. above the water – manropes not required.

Send ETA pilot station via WMH 24 hours before arrival. Also advise if change in ETA is over 2 hours.

The ETA message should state whether arriving via Chesapeake and Delaware Ship Canal or Cape Henry, and deepest draft and speed of vessel.

Cable address of Pilot: "Marpilot, Baltimore", pilot vessel on VHF Channel 16, 13A and 18A.

ANCHORAGE: Numerous anchorages located within harbour limits for ocean-going vessels. 7 such areas are available for vessels of light and heavy draft. 4 of these anchorages are located on the East side of the main ship channel between the entrance channel to the Central Soya Company Grain Elevator and Fort Carroll. 2 are on the West side of the main ship channel, and 1 on the North side of Curtis Bay channel.

At Bloody Point, approximately 22 miles South of Baltimore, there is an emergency anchorage in natural deep water with depth of 50 ft. or more.

RESTRICTIONS: There are two different approaches and exits to the sea lanes. The principal route is by way of the Southerly course through the Chesapeake Bay and Cape Henry to the ocean. The distance by this route is approximately 150 nautical miles. There is a main ship channel 20 miles long from Baltimore to the Chesapeake Bay; this channel is 800 ft. wide and 42 ft. deep.

The other route to the sea lanes is via the Chesapeake and Delaware Ship Canal. This offers a short protected route between Baltimore and other leading North Atlantic ports by way of Delaware Bay and allows ships serving North Atlantic European ports to save about 115 miles sailing distance.

Entrance to the Chesapeake and Delaware Ship Canal is located about 50 miles North of Baltimore. The width of the channel is 450 ft. Max. draft 32 ft. The canal itself is 15 miles in length, and from the Delaware Bay side the distance to sea lanes is about 60 miles. Navigation lights are maintained so the canal is open to navigation day and night.

MAX. SIZE: Length 1,250 ft., draft 42 ft. at Canton Ore Pier.
HEALTH: See "Health; All Ports" before first U.S.A. port (Albany). Illness reports made to local Agent.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: The port has an efficient fleet of tug-boats in operation. The tugs usually take vessel in tow at Francis Scott Key Bridge.
BERTHING:
There are approximately 45 important piers and terminals, some of which are listed below:

Marine Terminals

Name	*Berths*	*Max. draft*	*Cranes*	*Special features*

BRIDGES: The Chesapeake Bay Bridge-Tunnel is located across the entrance to the Bay, between Cape Henry and Cape Charles. This vehicular crossing consists of fixed causeways and bridges, and 2 tunnels – one under the Chesapeake Channel and one under the Thimble Shoal Channel.

The Francis Scott Key Memorial Bridge crosses the main ship channel in Baltimore Harbour and is 8,640 ft. long, with main channel horizontal clearance of 800 ft. and vertical clearance of 187 ft. Vessels en route to the harbour from the ocean via the Chesapeake Bay pass under the Chesapeake Bay Bridge, about 151 statute miles above the ocean entrance to the bay. This bridge is 3.7 miles long from shore to shore; its Western end is 0.5 miles S.W. of Sandy Point and its Eastern end is on Kent Island, 4 miles S.W. of Love Point. The Curtis Creek and Middle Branch sections of harbour are each crossed by highway and railroad bridge.

DENSITY: The salinity of Baltimore harbour waters requires full fresh water draft allowance.

TANKERS:

Pier	*Operator*	*Berth*	*Length*	*Draft*

Slop disposal facilities at Humble Oil Terminal.

MEDICAL: All facilities available.

FRESH WATER: Can be supplied at all berths. Water barges available.

FUEL: All grades supplied by numerous oil companies by barge or ex-wharf at the oil berths.

REPAIRS: *Bethlehem Steel Corporation.* At the Sparrows Point Shipyard vessels up to 300,000 d.w.t. are constructed, and the facilities include all the necessary equipment for the construction of large and small vessels.

2 other marine yards, 1 of which is located at Key Highway, while the second is located on the Eastern end of Locust Point adjacent to Fort McHenry. The facilities of these plants include 3 dry docks, 2 graving docks and 9 outfitting piers. These facilities handle all types of dry docking and ship repairs.

Maryland Shipbuilding and Dry-dock Company. This large marine shipyard is located on the water front at Fairfield. Plant facilities include 4 dry docks, 5 outfitting piers and 1 side launch way. All types of ship repairs are handled in this yard.

In addition to the above mentioned facilities there are numerous companies specialising in minor ship's repairs.

CUSTOMS ALLOWANCES: At the discretion of customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I–95 to be made up for each Crew member on arrival. Not necessary for crew man already holding Form I–95, issued for the same vessel.

CONSULS:

Argentina
Belgium
Bolivia
Colombia
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Guatemala
Honduras
Italy
Netherlands
Nicaragua
Norway
Panama
Senegal
Sweden
Tunisia
Turkey

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours from April to October.

AUTHORITY: Maryland Port Administration.

BANGOR (Including Brewer and Orrington)
Maine: 44.49 N. 68.47 W. (See Plan Book)

LOCATION: Bangor is located on the West bank of the Penobscot River at the head of navigation. Brewer is on the East bank of the river opposite Bangor and Orrington is on the East bank of the river 2 miles below Brewer.

DOCUMENTS:

1 copy of Crew List.
1 copy of Passenger List.
2 copies of Stores Lists.
2 copies of Foreign Purchase Lists.
2 copies of Inward Foreign Manifest.
1 form 3251 (Master's Oath on entry of vessel).
2 forms 1374 outward foreign Manifest.

PILOTAGE: Pilotage is compulsory for all foreign vessels and U.S. vessels under register in the foreign trade, with a draft of 9 ft. or more, entering or departing from any port or harbour within the waters of Penobscot Bay and Penobscot River North of a line drawn from Marshall Point Light at Port Clyde, thence to Matinicus Rock Light, and thence to Western Head, Isle Au Haut. Pilotage is optional for vessels powered by sail.

Cable PENBAY via Chatham Radio. Ship's Agent usually notifies Pilot 48 hours and 24 hours before arrival at the Pilot station. Pilot boat usually stands by on their radio 1 hour before ETA on RT 2182 and the VHF Channel 16 (156.8). Pilot boards at Monhegan Is., Lat. 43° 45′ N., Long. 69° 22′ 5″ W. Pilot uses a white boat 36 ft. long and displays "H" by day and the Pilot signals at night. Vessels awaiting Pilot in bad weather must heave-to outside.

ANCHORAGES: The usual anchorage for vessels waiting at the river entrance for a towboat or favourable wind and tide is Northward of Fort Point on the West side of the channel.

Vessels bound up the river anchor anywhere in the channel where soft bottom is found. Vessels towing to Bangor, if the tide does not serve, often anchor off Winterport. On account of the strong ebb current, it is better for vessels going to Bangor, particularly large vessels, to anchor off Fort Point and start up the river about 3 hours after LW.

RESTRICTIONS: CHANNEL:– The controlling depth in the marked channel in Penobscot River from Bucksport to Bangor is 19 ft. to Winterport, thence 13 ft. to Bangor. The channel is marked by buoys to a point about 1.5 miles below South Brewer.

Caution: Deep-draft vessels should exercise caution above Fort Point as depths of 31 to 32 ft. are in mid-channel, about 0.5 mile Eastward of Sandy Point, and rocky ledge, covered 34 ft., also in mid-channel, is reported about 0.2 miles S.W. of Odom Ledge Daybeacon.

The most difficult sections for vessels are off Lawrence and Luce Coves just North of Bucksport where it is difficult to mark the best water and off Frankfurt Flats where large vessels experience difficulty with the sharp turns.

The channel in Penobscot River is crooked and narrow in places, and frequent changes occur. Vessels should not attempt to carry drafts greater than 10 ft. to Bangor at LW. With a deeper draft a Pilot or towboat should be used; 14 or 15 ft. is carried to Bangor and Brewer at HW, and deeper drafts occasionally to the oil berth at South Brewer. The safest time is on a rising tide. Navigation of the river at night is extremely dangerous due to lack of lighted navigation aids. After unusually high tides many logs, dangerous to small craft, are in the river. At times of maximum ebb currents, buoys are occasionally pulled under.

Tides: The mean range of tide varies from 10.3 ft. at Fort Point to 13.1 ft. at Bangor. Currents of 3 knots are not unusual from Odom Ledge to Orrington, and during Spring runoff currents approaching 5 knots may be encountered. Because of these currents, larger vessels should use caution navigating the river. Passage up the river is more advisable during flood current.

Ice impedes but usually does not prevent navigation above Winterport for nearly 5 months each year, beginning about December. During extreme Winters the river is closed to the mouth. The most difficult place below Winterport is abreast Fort Knox, where ice jams occur. If vessels can pass this point, they usually can go to Winterport. The river is kept open by an icebreaker, which prevents much of the damage that might otherwise be caused by ice and freshets. However, in recent years, according to local information, there has been very little ice and the river has seldom frozen over below Bangor. The brackish water formed by tidal action and the river current no doubt have contributed to this.

Freshets occur in the river during March and April; at times they are dangerous to vessels.

MAX. SIZE: At present ships of 560 ft. are taken up the river 2 hours before HW during daylight. Size and draft of ship depend on the berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving Bangor use radio station at Chatham Mass., or call on the R/T through station WOU at Boston, Mass.

TUGS: 4 tugs available up to 1,200 h.p. Tugs join at Belfast to assist in turning and berthing.

BERTHING:

Texaco Oil Co. Terminal: A timber pile, timber-decked pier, approximately 5,250 sq.ft., used for landing oil tankers. There are 8 storage tanks and 1 warehouse/office building with 1,920 sq.ft. of floor space.

Mobil Oil Co.: A timber crib pier approximately 8,500 sq.ft., used for landing tankers. There are 10 storage tanks and a garage at this facility.

Webber Terminal Inc.: A timber crib pier, approximately 2,340 sq.ft. used for landing tankers. Adjacent to this pier, there is another timber crib pier, approximately 5,280 sq.ft., also used for landing tankers. There are 2 storage tanks and a storage building with 480 sq.ft. of floor space.

Astroline Petroleum Corp. of Maine: There is a log filled bulkhead used for landing tankers. This facility includes 5 storage tanks and 1 tool shed.

Bangor Municipal Dock: 2 wooden floats with 2 ramps, approximately 600 sq.ft., used as a small boat landing. There is also a launch ramp that can only be used at high tide.

Gulf Oil Corp. – Brewer: A timber pile, timber-decked wharf; approximately 4,650 sq.ft., used for landing tankers.

Cities Service Oil Co. – Brewer: A log filled bulkhead used for landing tankers. There are 6 storage tanks and one combination storage/office building with 2,000 sq.ft. of floor space.

Webber Tanks Inc. – Brewer: A rock and timber crib, timber decked pier, approximately 7,200 sq.ft., used for landing tankers. There are 5 storage tanks and a warehouse with approximately 3,850 sq.ft. of floor area.

C. H. Sprague – Brewer-Orrington: A timber pile wharf, approximately 1,600 sq.ft., used for landing tankers. The wharf is in Orrington and fuel is pumped to 3 storage tanks located in Brewer. There is one building, a pump house, approximately 600 sq.ft.

Town Launch Ramp: Orrington. This is a paved launch ramp; no docking facilities. There is a 40-space (30 car – 10 trailer) gravel parking area.

BRIDGES: 1 suspension bridge below Bucksport with a height of 135 ft. at high water. Horizontal clearance is 750 ft.

The overhead power cable that crosses the river just above Bucksport has a clearance of 145 ft.

MEDICAL: No advance notice required. There are 3 large hospitals. Seamen required to have certificate for smallpox vaccination during past 3 years.

TANKERS: 1 berth for ocean-going vessels. 1 × 8 in. hose with a 10 in. line. 22 ft. at low water. Also see "Berthing".

DENSITY: Nearly fresh water.

FRESH WATER: Supplied at ocean-going berth at the rate of 50 t.p.h.

FUEL: Only available at oil berth.

CERTIFICATES:
Load-line.
Foreign Clearance.
Safety Certificate.
Radio Operator's Licence.

CUSTOMS ALLOWANCES: 200 cigarettes per man, 1 bottle wine/spirits per man.

IDENTIFICATION CARDS: Form 1–95 must be filled out upon arriving unless seaman has made one out before on a previous trip.

CONSULS: None.

REPAIRS: Only machinery repairs.

REPATRIATION: Arrangements must be made ahead of time by telegram.

TIME: GMT minus 5 hours in the Winter and minus 4 hours in the Summer.

AIRPORT: Bangor International is 2 miles from the city.

POLICE/AMBULANCE/FIRE: Police 9427377; Ambulance 9893311; Fire 9422293.

TELEPHONES: None put aboard. 1 pay phone on ocean-going berth.

SHORE LEAVE: Allowed subject to Immigration approval.

AUTHORITY: City of Bangor, Dept. of Harbour and Wharves, Harbour Master.

BATON ROUGE, Louisiana: 30.28 N. 91.12 W.

DOCUMENTS:
Original and 3 Crew Lists.
Original and 3 Passenger Lists.
Clearance from last foreign port.
Original and 3 copies Inward Manifest.
Certified Derat Certificate.
Load-line Certificate.
Safety Certificate.
Ship's Register.
3 copies Curio List.

PILOTAGE: Advise Agents ETA sea-buoy 48 hours in advance. Agent then makes arrangements for Pilots. Seven 46 ft. Pilot boats – red hulls white cabins, flying white and blue Pilot flags. Suggest Pilot ladder 6 ft. above water level, no life-line. Call Channel 2738 or VHF Channel 9, 30 to 40 miles out. Safe anchorage within 2 miles Southpass or S.W. pass entrance.

ANCHORAGES: General anchorage Baton Rouge as directed by Pilots.

RESTRICTIONS: No night-time restriction for entry or clearance, docking or undocking.

MAX. SIZE: Humble Oil Docks can accommodate 1,000 ft. vessels – unlimited breadth; draft governed by S.W. pass – project depth 40 ft. usually restricted from 37 ft. to 30 ft. draft May through August, due to low water and silting.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: ETA cables can be routed through Tropical Radio WNU New Orleans.

TUGS: Available at Baton Rouge for docking and undocking. Ship's lines used.

BERTHING: No time restrictions on berthing. 2 general cargo docks with total 280,000 sq. ft. transit shed and 2,265 ft. long, 40 ft. wide apron with double marginal tracks; grain elevator and bulk terminal at Burnside, for handling ores, concentrates, etc.; container marshalling yard adjacent cargo docks; also 20-acre paved staging area for import automobiles. Dock equipped for roll-on/roll-off. 1 dock equipped to handle liquid chemicals.

BULK HANDLING FACILITIES:

Grain: Cargill Grain Elevator: Max. draft 38 ft. Loading rate 1,000 t.p.h. Silo storage 160,000 tons.

Aluminium: Conalco-Burnside Terminal: 2 unloading gantries for bauxite. Rate 2,000 t.p.h. Max. draft 39 ft. Kaiser-Burnside Terminal: Same specifications as Conalco.

BRIDGES: Sufficient clearance for all stages of river at all times; 2 bridges cross at New Orleans, 1 at Baton Rouge and 1 at Donaldsonville.

STEVEDORES: May be obtained by Agent with 4 hours notice.

MEDICAL: Agents should receive 24 hours notice when medical attention is required. 2 excellent hospitals at Baton Rouge, U.S. Public Health Hospital at New Orleans.

TANKERS: Oil tankers load various petroleum and chemical products at Humble Oil Docks with sufficient hose, reducers, etc., available. Oil residue slop facilities available.

DENSITY: No tide – fresh water at all times.

FRESH WATER: At public docks, At Humble Oil Terminal simultaneous with loading or discharging at no cost. Ship's crew to make water connections.

FUEL: All grades subject inquiry. Barging essential.

FIRE PRECAUTIONS: Usual fire lines and sprinkler systems.

GANGWAY/DECK WATCHMEN: Only if Master requires.

OPENING/CLOSING HATCHES: Depending on terms of charter, usually by ship's crew.

CUSTOMS ALLOWANCES: Tobacco, each crew member allowed 300 cigarettes. Master allowed reasonable quantity. Wine and/or Spirit, each crew member allowed 1 bottle each of wine and spirits. Master allowed reasonable quantity.

CARGO GEAR: Safety certificate required for ship's gear in handling. Pkg. cargo, etc.

IDENTIFICATION CARDS: Usual passports.

CONSULS: Norwegian only, all other consuls at New Orleans – 80 miles distant.

REPAIRS: All types of deck and engine repairs may be carried out.

REPATRIATION: Crew repatriation and crew changes may be made.

AIRPORT: 6 miles to Ryan Airport, served by regular airlines.

TIME: Local time is Central Standard Time – 6 hours later than GMT; from April through October local time is CS daylight saving time, 5 hours later than GMT.

POLICE/AMBULANCE/FIRE: Tel. Nos. Public Dock: Police 343–5525; Ambulance 344–0566; Fire 343–4140.

TELEPHONES: No arrangements for placing telephones aboard.

GENERAL: Tankers in ballast advised of drift wood conditions in river and ballast their vessels accordingly so as to avoid propeller damage.

SERVICES: Because of restricted river inadvisable adjust compasses. This is usually accomplished below New Orleans where river of sufficient width to permit large vessels to swing. 2 firms engaged in tank cleaning, namely, Two Twenty Eight Terminals Inc. and Port Allen Marine Cleaning Plant. Slop facilities available at the Humble Oil & Refining Co. dock.

SHORE LEAVE: Shore leave permitted except when detained aboard by U.S. immigration.

DELAYS: Normally no delays at Humble Oil docks in berthing except when vessel's tanks unsuitable for loading. Normal delay at city wharf is 1 day awaiting berth.

AUTHORITY: Greater Baton Rouge Port Commission.

BAYTOWN: Texas: 29.44 N. 95.01 W.

DOCUMENTS, PILOTAGE, etc.: Refer to "Houston".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required.

BERTHING: Humble Oil & Refinery Co. Terminal, depth alongside 35 ft.
MEDICAL: All medical assistance available.
DENSITY: Brackish.
FRESH WATER: Available ex wharf.
FUEL: All grades available ex wharf.
GANGWAY/DECK WATCHMEN: Required only if crew detained by Immigration.
CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars of 1 lb. tobacco; 1 quart wine/spirits.
AUTHORITY: Port of Houston Authority.

BEAUMONT, Texas: 30.05 N. 94.05 W.

DOCUMENTS, PILOTAGE, RADIO, etc., Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING: Beaumont Elevator, distance from sea 50 m., loading rate 1,500 t.p.h. depth alongside 38 ft. Texas Gulf Sulphur Co., distance from sea 47 m., depth alongside 34 ft.
CARGO HANDLING FACILITIES: 6 general cargo berths, with total of 520,000 sq.ft. transit shed space. 3 open berths with double marginal tracks; 700 ft. of gantry tracks with 60 ton travelling gantry crane. There is also a heavy duty 220 ton mobile crane and one derrick barge with lifting capacity of 500 tons, rental basis.
STEVEDORES: Normal working hours 0800/1200 and 1300/1700. Monday to Friday.
TANKERS: Mobil Oil Co., distance from sea 49 m., depth alongside 36 ft. Pan American Pet. Co., distance from sea 45 m., depth alongside 38 ft.

Sun Oil Terminal:
Report received 1975.
Operators: Sun Oil Co., Nederland, Texas.
Type of Terminal: Refinery. Handling Crude Oil & Lubs.
Density: Fresh water.
Distance from sea: 37.4 miles.
Controlling Depth: From channel to berth – 39–40 ft. Actual depth alongside – 40 ft.
Vertical clearance at High Water: 136 ft.
Max. length of berth facility: 150 ft.
Max. length of vessel to be moored safely: 900 ft. but that is absolute max. and normally prefer not more than 850 ft.
Hoses: 4 × 12 in. (Crude). 6 × 6 in. (Lubs).
Usual Loading Pumping Capacity: 60,000 bbls per hour (Crude). 2,000 bbls per hour (Lubs).
Usual Discharge Pumping Capacity: To vessel's capacity.
Fresh Water: Available on 24 hour basis.
Fuel: None.
Tugs: Per Pilot's requirements.
Anchorage: Max. draft 29 ft. (i.e. no anchorage facility for loaded ships).

MEDICAL: All facilities available.
DENSITY: Fresh water.
FRESH WATER: Available at berths, or by barge.
FUEL: Available ex-wharf at Mobil terminal. All grades available by barge to other locations.
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine/spirits for each man.
IDENTIFICATION CARDS: Foreign crew require only Immigration landing permit.
CONSULS: Nearest at Houston.
REPAIRS, DRY DOCKS: Beaumont's Bethlehem Shipyard offers all types ship repair or reconditioning – plus vessel conversion and jumboizing 2 side-launching ways over 800 ft. each. Floating dry dock with extreme length of 648 ft.; length on bottom 576 ft.; breadth at entrance, 87 ft.; and lifting capacity, 17,500 tons. Active in design and construction of mobile drilling platforms and oil and gas production and storage facilities for service off shore.
HOLIDAYS: Longshore holidays are: New Years Day: Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday; Texas Independence Day (March 2nd); Good Friday; Memorial Day (last Monday in May); Emancipation Day (June 19th); Fourth of July; Labour Day; Columbus Day; Veteran's Day (November 11th); Thanksgiving Day; Christmas Day.
DEVELOPMENTS: 2 new 600 ft. berths; 1 shedded with 120,000 ft. transit warehouse space, 1 open with 17 acres back from shipside area now complete and in operation. 8 acres hard surfaced area, adjacent to ships side for containers, rolling stock or project cargo. The ports new 220 ton mobile crane will complement the new facilities.
AUTHORITY: Port Director, Port of Beaumont.

BELLINGHAM, Washington: 48.45 N. 122.31 W. (See Plan Book)

DOCUMENTS, PILOTAGE, etc.: Refer to "Tacoma".
HEALTH: See "Health; All Ports" before first U.S.A. Port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, join vessel in Bellingham Bay.
ANCHORAGE: Deep water available, but not good holding ground.
BERTHING: North Terminal, Berths Nos. 1 & 2 length 1,500 ft., depth alongside 32 ft. MLLW. Berth No. 3 length 400 ft., depth alongside 30 ft. MLLW. Georgia Pacific Dock, Berthing length 600 ft., depth alongside 28 ft. MLLW.
CRANES: 2 × 50-ton capacity rail-mounted gantry cranes and 1 barge mounted 60-ton crane.
STEVEDORES: 8 local gangs. Additional gangs imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
FUEL: Available. Barge delivery only.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
AIRPORT: 3 miles from the city.
AUTHORITY: Port Manager, Port of Bellingham.
AGENT: See "Seattle".

BENICIA, California: 38.03 N. 122.10 W. (See Plan Book)

DOCUMENTS: Health and all General Information: refer to "San Francisco".
PILOTAGE: Port located about 25 miles above Golden Gate Bridge. River Pilot joins at San Francisco, using VHF for traffic information. Passage includes passing under 2 bridges, Carquinez Strait Bridge having the least clearance, with 146 ft. (HW) and 151 ft. (LW) (using North Channel). River passage is timed to arrive at Benicia at the first of ebb tide; this is approximately 2.5 hours after HW at Fort Point (Golden Gate).
ANCHORAGE: At San Francisco.
RESTRICTIONS: Tankers must lighten to 36 ft. fresh-water draft. This is done at No. 7 anchorage, 1.5 miles East of Alcatraz Island. This cargo will later be pumped back to the tanker as barges cannot overcome shore back pressure. Turning basin off the berths, radius 1,800 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: 1 small tug assists berthing. Only 1 normally required for unberthing.
BERTHING: Continuous wharf 2,404 ft. long with berth for 3 vessels. The West berth is used for the loading of petroleum products (Exxon), and the Centre and East berths are equipped for handling general and bulk cargoes. East of this facility is another berth that will accommodate one tanker for discharge of crude oil (Exxon) depth alongside – 38 ft.
MOORINGS: 2 head wires, 4 breasts and 2 springs forward. This is necessary because of current off the bank during ebb tide. 2 stern lines, 2 breast lines and 2 springs aft.
BULK HANDLING FACILITIES: Waterside silos capacity 26,000 tons. With loading conveyor belt capacity 1,000 t.p.h.
TANKERS: Crude oil discharge through 2 × 12-in. Chiksan arms and 36-in. shoreline, 2.5 miles long. Shore tanks are situated 164 ft. above sea level, initial back pressure 65/70 p.s.i.
FRESH WATER: Available from shore lines.
FUEL: Can only be delivered by barge. Averate rate 300 t.p.h.
DEVELOPMENTS: Current plans call for: (1) enlargement to 9 berths; (2) deepening of water alongside, including channels to 45 ft.; (3) installation of bulk handling equipment for wood chips; (4) for bulk iron ore and (5) development of a complete container terminal.
AUTHORITY: Benicia Port Terminal Company.
AGENT: See "San Francisco".

BOCA GRANDE, Florida: 26.43 N. 82.15 W.

SHIPMASTER'S REPORT: 1978

LOCATION: On the Eastern side of the Southern end of Gasparilla island, about 60 miles South of Tampa Bay.
DOCUMENTS: See "Tampa".

Government officials must travel from Tampa to Boca Grande at vessel's expense.

PILOTAGE: Compulsory for all foreign-going merchant vessels. The Pilot boards vessel near the sea buoy. Pilotage available 24 hours a day.

Request should be made to ship's Agents via Tampa Marine Operator. VHF Channels 16, 12 and 13.

ANCHORAGE: Good holding ground near the sea buoy (26° 39.8' N. 82° 19.6' W.)
RESTRICTIONS: The channel is less than 300 ft. wide in some places. The traffic is one way and vessels enter only when the stream is half strength or less. Strong Westerly winds may cause a swell which prevents vessels using the channel.
MAX. SIZE: Beam: 80 ft. with 24 ft. maximum distance from outside ship's hull to inside hatch coaming.

Draft: 31 ft. 6 in. (9.60 m.) recommended by Pilots. The channel is 32 ft. deep at MLW.

Length: 550 ft. should be a maximum because distance between end bollards is 475 ft.

HEALTH: Same procedure as for any other U.S. port.

A U.S. Public Health physician is located on the island.

RADIO: Tampa Radio – WPD.

TUGS: A small tug for light towing operations is available.

BERTHING: A "T"-headed pier 325 ft. long; distance between end bollards: 475 ft. This pier is for loading phosphates in bulk. Max. draft: 32 ft. (SW). An oil handling berth with 33 ft. depth is located close Southward of the phosphate pier.

BULK CARGO: Material loaded: Phosphate Rock, Diammonium Phosphate, Triple Super Phosphate (granulated or run of pile) and Defluorinated Phosphate.

The shiploader travel is only 270 ft. so large vessels must shift alongside.

Maximum height of vessel: 34 ft. (10.36 m.) from the water line (MLW) to the rail or the hatch-coaming.

Trimming: Spout trimming is done free of charge. Mechanical trimming (levelling and/or filling) will be performed by the railroad at additional charge.

Loading Rates: Phosphate Rock: about 800 t.p.h spout trimmed.
Diammonium phos.: about 400 t.p.h. spout trimmed.
Triple S. Phos.: about 550 t.p.h. spout trimmed (granulated).
Triple S. Phos.: about 300–500 t.p.h. spout trimmed (run of pile).
Defluor. Phos.: about 400 t.p.h. spout trimmed.
when levelling and/or filling is required, loading rates are much lower and extremely variable depending on the construction of the ship.

Work Schedule: Only one work crew is available; therefore, only about 16 hours working time per day and about 8 hours rest period for crew.

Work performed without overtime charge to the shipper 7 days a week except following, no work holidays: Jan. 1st, July 4th, Labour Day, Christmas Day.

TIDES: Approximately 2 ft. variation.

DENSITY: Salt water.

FRESH WATER: Available at phosphate loading berth.

FUEL: No local facilities. Prior arrangements with ample notice must be made via the ship's Agent at Tampa.

CONSULS: See "Tampa".

REPAIRS: No local facilities. To be arranged via Agents with ample notice.

SURVEYORS: The nearest Lloyds' office is at Jacksonville. American Bureau available from Tampa.

STORES AND PROVISIONS: No facilities available for normal ship chandlering. Prior arrangements should be made via Tampa.

GENERAL: Boca Grande is the older of "Seaboard Coast Line's" (SCL) two existing loading facilities, the new one being at Tampa. All Agents are based at Tampa, about 110 miles by road.

BOSTON, Massachusetts: 42.21 N. 21.05 W. (See Plan Book)

DOCUMENTS:
- 3 copies Cargo Manifest (Forms 7527–A or 7527–B), 2 copies showing all cargo on board, and 1 copy showing only cargo for this port.
- 3 copies Crew Manifest (Form 1304).
- 3 copies Stores List (Form 1303).
- 3 copies Passenger List (Form I.–418).
- 3 copies Crew List (Form I.–418).

Customs boarding officer will also examine Ship's Register, Safety Equipment Certificate and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:
- General Declaration (Form 1301).
- Health Pratique.
- Master's Oath (Customs Form 1300).
- All foreign clearances.
- Certificate of Financial Responsibility (Oil Pollution).
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.

PILOTAGE: Is compulsory. Pilots cruise in boats which are designated by numbers painted in black figures 4 ft. high on deckhouse. The outer boat cruises outside the Graves.

ANCHORAGES: ANCHORAGE No. 1.

Upper Harbour Anchorage: Steam and motor vessels permitted to anchor in this basin anchor within the following area: S.E. of a line bearing 205° true from N.E. corner of Boston and Albany Pier No. 5, East Boston; N.E. of a line bearing 122° true from S.E. corner of Lewis Wharf, North Pier; S.W. of a line bearing 292° true from N.E. corner of Southernmost Airport Approach Pier; N.W. of a line bearing 025° true from Buoy No. 12, Fl.R.6 sec.

ANCHORAGE No. 2. *President Roads Anchorage* (40 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 237°, 522 yards from Deer Island Light; thence to a point bearing 254°, 2,280 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; thence to a point bearing 279°, 2,438 yards from Deer Island Light; thence to a point bearing 319°, 933 yards from Deer Island Light; thence to a point bearing 319°, 666 yards from Deer Island Light; and thence to point of beginning.

President Roads Anchorage: (35 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 256°, 2,603 yards from Deer Island Light; thence to a point bearing 258°, 3,315 yards from Deer Island Light; thence to a point bearing 264°, 3,967 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; and thence to point of beginning.

ANCHORAGE No. 3. *Nantasket Roads Anchorage:* Vessels anchoring in this anchorage basin anchor within following area: Westerly of a line bearing 143° from wharf at Gallups Island to Bell Buoy No. 2, S.W. of Georges Island; Northerly of a line bearing 260° from Bell Buoy No. 2, Georges Island, to the Northerly end of Rainsford Island; Northerly of a line bearing 273° from the Northerly end of Rainsford Island to Bass Point, Long Island; Southerly of a line bearing 270° from the wharf at Gallups Island to Long Island.

ANCHORAGE No. 5. *Peddocks Island and Explosive Anchorage:* Vessels anchoring in this anchorage basin anchor within following area; S.W. of a line bearing 122° true from the Easterly end of Rainsford Island to the N.E. end of Rainsford Island to the N.E. end of Peddocks Island, N.E. of a line bearing 165° true from the Westerly end of Rainsford Island to the S.E. end of Peddocks Island.

RESTRICTIONS: There are 3 main channels of entrance from sea to President Roads.

Broad Sound North Channel from Broad Sound to President Roads from N.E. Dredged 35 ft.. deep and 1,500 ft. wide and is deepened to 40 ft. in a width of 900 to 1,100 ft. This channel well marked by lighted buoys.

Broad Sound South Channel from Broad Sound S.W. and Westerly to President Roads. Dredged 30 ft. deep and 1,200 ft. wide. This channel is well marked by buoys and ranges but most aids to navigation are not lighted.

The Narrows is channel leading into Boston Harbour from S.E. between Boston Lighthouse and Lovells Island on the N.E. and Point Allerton, Georges Island and Gallups Island on S.W. Depth is 27 ft. Width is generally 1,000 ft. except in a section between Narrows Light and Georges Island where shoaling on N.E side limits it to 700 ft. Channel is well marked.

The Main Ship Channel of Boston Harbour extends from President Roads to the mouths of the Chelsea and Mystic Rivers and to Charlestown Bridge on the Charles River. Channel has been dredged 35 ft. deep and 1,200 ft. wide to the inner end where widths decrease near the river mouths. It has been deepened to 40 ft. for 600 ft. width from President Roads to the mouth of the Mystic River, with a widening to 1,200 ft. at the bend just Northerly of Commonwealth Pier No. 5, South Boston.

Charles River is the approach by water to Cambridge and Watertown. About 0.5 mile above the lower bridge there is a dam with a lock 45 ft. by 350 ft. with depth of 17 ft. over the lower sill. Depths above dam decrease gradually to 9 ft., basin level, at head of navigation. *Mystic River* is approach by water to Everett, Malden and Medford. Controlling depths are 35 ft., from Mystic River bridge to approximately 1 mile above, thence 20 ft. from the 35 ft. channel to 800 ft. above the Malden Bridge to a point abreast Monsanto Chemical Company plant. *Chelsea River* is approach to city of Revere. Channel from entrance to a point opposite the Tenneco Oil Co. terminal has a controlling depth of 35 ft. *Weymouth Fore River* is approach by water to Quincy and Weymouth. Controlling depth is 30 ft. to Fore River Bridge. Controlling depth for a distance of 2,800 ft. above Fore River Bridge is 30 ft. *Town River* extends N.W. from Weymouth Fore River at Quincy Point. River has a controlling depth of 27 ft. from deep water in Weymouth Fore River to a point opposite the Quincy Oil Co.. terminal. Opposite Quincy Oil Co terminal there is a turning basin 18 ft. deep, 400 ft. wide and 1,000 ft. long.

MAX. SIZE: The primary entrance to Boston Harbour is via the North Channel and President Roads. Controlling depth is 35 ft. MLW. Average rise of the tide in Boston is 9.5. ft.

Generally speaking, vessels drawing 40 ft. are taken at the top of the tide to White Fuel and Exxon only. Vessels going to berths in the Mystic River above the Mystic River Bridge are limited by the bridge's vertical clearance of 135 ft. MHW.

Vessels consigned to berths in the Chelsea Creek are limited to a length of 669 ft., beam of 90 ft. and draft of 36 ft. high water docking. Furthermore, vessels which exceed 630 ft. going above the Chelsea Street Bridge are restricted to daylight docking. Daylight sailing is required from the berths above the McArdle Bridge if the vessel is over 585 ft. long.

As a rule, vessels are docked bow in at the Chelsea Creek berths. If docked between the bridges, departure is stern first through the McArdle Bridge. If docked above the Chelsea Street Bridge, then on sailing, the vessel is turned in the basin West of the Gibbs and Union terminals.

The controlling depth in the channel leading to Weymouth Fore River is 28 ft. MLW. Vessels with a max. draft of 33 ft. 6 in. will be taken at high water, but it should be noted that docking and undocking in Fore River are daylight operations – between sunrise and sunset – and no vessel longer than 628 ft. will be handled.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

RADIO: *Advance Notice of Arrival:* 24 hours advance notice of arrival be given. This notice is made to the office of the Captain of the Port – 223-6979.

The information to be provided consists of: Vessel's Agent's name; Vessel's name, type, flag, and call sign; the ETA; Berth; Last port and next port; Dangerous cargo on board. In return the

Captain of the Port will assign a consecutive log number to the vessel.

In event the vessel's ETA is changed by more than 24 hours from first notice, the Captain of the Port should be so notified, identifying the vessel by its assigned log number.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Steamers can proceed from the sea to Boston Upper Harbour under own power. They are usually met by tow-boats, for docking while in the stream. Barges usually left by the outside tow-boats at the anchorage grounds, to be docked later by harbour tugs.

BERTHING: There are 259 piers or wharves in the port of Boston providing 158,646 lineal ft. or 30 miles of berthing space measured along the sides and ends of piers and along bulkheads or shore wharves. Many of them have railroad connections. The depths of water available alongside these terminals range up to a maximum of 40 ft. at mean low water. Practically all terminals fronting on main ship channel are in close proximity to storage warehouses, both cold and dry which greatly facilitates transfer of cargo between vessel and warehouse.

Main Terminals:

Hoosac Pier, 3 berths	depth alongside 35 ft.
Mystic Pier, 4 berths	depth alongside 40 ft.
Commonwealth Pier, 5 berths	depth alongside 40 ft.
South Boston, 10 berths	depth alongside 35 ft.
Castle Island, 7 berths	depth alongside 35 ft.
East Boston, 3 berths	depth alongside 32 to 35 ft.
Public Container Terminal, 2 berths	depth alongside 40 ft.

Sea-land Container Terminal, South Boston (Berth 17, Castle Island):

Operator – Sea-Land Service, Inc. Tel. 268-9720.

Type of Pier – Single face, 500 ft. long 1×27.5 ton container crane. 10 acre container storage area.

Depth Alongside at MLW – 35 ft.

Normal ship side to dock – Starboard.

Line handling boat – not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Containers.

Castle Island Terminal, South Boston:

Operator – Massachusetts Port Authority. Tel. 482-2930

Type of Pier – Single face. 6 berths No. 16 (610 ft.) adjacent to and extending N.W. of No. 17 (see above); No. 15 to No. 11 (2,995 ft.) adjacent to and extending Westward of No. 16. 294,000 sq.ft. covered storage, 4 million sq.ft. open storage (including 32 acres fenced in automobile storage and 20 acres lumber storage), 50 ton crane, rail service.

Depth Alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. Min. 40 ft. apron.

Products handled – General cargo, containers, lumber, bulk salt and cement, automobiles, petroleum products (at berth No. 11 for White Fuel).

White Fuel Company, South Boston:

Operator – Texaco, Inc. Tel. 269-2111.

Type of Pier – Single face.

Depth Alongside at MLW – 40 ft.

Normal ship side to dock – Port (bow in).

Line handling boat – required.

Access to vessel (for stores and repairs) – limited, trucks can approach only to within 150 ft. of gangway or ship's side.

Products handled – Avjet, Heating Oil, No. 6 Oil, Molasses.

Size and number of pipe-lines – Numerous – 24 in., 20 in., 16 in., 12 in.

Bbls per hour discharge capacity –12,000 to 18,000.

Average distance to storage tanks – 1,000 ft.

Pollution control equipment – 1,600 ft. boom, 16 ft. boat, 300 absorbent pillows, 2,000 gal. pumpout truck.

Eastern Minerals, South Boston:

Operator – Eastern Minerals, Inc. Tel. 269-5857

Type of Pier – Single face.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Starboard (bow out).

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – bulk salt, pumice. Discharge rate 5,000 tons per day with fixed grab requiring vessel to be shifted in berth.

Boston Army Base, South Boston:

Operator – Port Terminals, Inc. Tel. 542-7100.

Type of Pier – Single face, three sides: South 3,705 ft., East 351 ft. North 964 ft., 950,000 sq.ft. covered storage, rail service, 2×27.5 ton rail mounted cranes.

Depth Alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. 50 ft. apron incorporates rail lines.

Products handled – General cargo, containers.

Commonwealth Pier, South Boston:

Operator – Massachusetts Port Authority. Tel. 482-2930.

Type of Pier – Single face, three sides: North and South 1,200 ft. East 400 ft. 500,000 sq.ft. covered storage, 1 million cu.ft. freezer, rail service, passenger lounge, upper level exhibition hall.

Depth Alongside at MLW – 40 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side. 20 ft. apron incorporates rail lines.

Products handled – Passengers, general cargo, refrigerated cargo, bulk tallow.

Pier 1, East Boston:

Operator – Massachusetts Port Authority Tel. 482-2930.

Type of Pier – Single face, three sides: East and West 605 ft. South 390 ft. 196,0000 sq.ft. covered storage.

Depth Alongside at MLW – 35 ft.

Normal ship side to dock – Varies.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – General cargo, containers.

Metropolitan Petroleum Company, Chelsea:

Operator – Metropolitan Petroleum Company. Tel. 288-1111

Type of Pier – Timber pile, offshore.

Depth Alongside at MLW – 35 ft.

Normal ship side to dock – Starboard (bow in).

Line handling boat not required.

Access to vessel (for stores and repairs) – by hand cart only.

Products handled – Heating Oil, No. 6 Oil.

Size and number of pipe-lines – 2 × 8 in.

Bbls per hour discharge capacity – 6,000 to 8,000.

Storage tanks adjacent to berth.

Pollution control equipment – 1,000 ft. boom, 18 ft. boat, 50 absorbent pillows, 150 gals. Aqua-clene.

Note:– Bow to manifold 370 ft. No wire ropes used to moor vessel.

Exxon Company U.S.A., Everett:

Operator – Exxon Company U.S.A. Tel. Marine Department 387-1733, Marketing Terminal 389-7400.

Type of Pier – Timber pile wharf with caissons.

Depth alongside at MLW – 40 ft.

Normal ship side to dock – Starboard.

Line handling boat not required.

Access to vessel (for stores and repairs) – by rail-mounted hand cart.

Products handled – Asphalt, Chemicals, Diesel Oil, Jet Fuel, L.P.G., Kerosene, Gasoline, No. 2 and No. 6 Oil.

Size and number of pipe-lines – numerous.

Bbls per hour discharge capacity – Up to 35,000.

Average distance to storage tanks – 5,000 ft.

Pollution control equipment – 1,500 ft. boom, skiff.

Prolerized New England, Everett:

Operator – Prolerized New England Company. Tel. 389-8300.

Type of Pier – Straight face.

Depth alongside at MLW – 37 ft.

Normal ship side to dock – Port (bow out).

Access to vessel (for stores and repairs) – trucks to ship's side, but access may be limited due to vessel's position at conveyor.

Products handled – Ferrous scrap (including Prolerized shredded-scrap).

General notes: Pier is equipped with 2×40-ton cranes. Shredded scrap is loaded from fixed conveyor requiring vessel to be shifted as each hatch is served.

This berth is also used by Distrigas Corp. and Union Carbide Corp.

American (Domino) Sugar Refinery, Charlestown:

Operator – Amstar Corporation. Tel. 242-3670.

Type of Pier – Single face.

Depth Alongside at MLW – 33ft.

Normal ship side to dock – Port (bow in).

Line handling boat required.

Access to vessel (for stores and repairs) – trucks to ship's side, but may be limited depending on vessel's position at conveyor.

Products handled – raw sugar. Discharge facility consists of single grab with capacity of 200-250 t.p.h. Vessels limited to approximately 650 ft. overall length.

Revere Sugar Refinery, Charlestown:

Operator – Sucrest Corporation. Tel. 242-2750.

Type of Pier – Straight face.

Depth Alongside at MLW – 33 ft.

Normal ship side to dock – Port (bow in).

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – raw sugar. Discharge facility consists of 23.5 ton grabs with total capacity of 350-400 t.p.h. Vessels limited to approximately 600 ft. overall length.

Mystic Scrap Terminal, Charlestown:

Operator – Schiavone Terminal, Inc. Tel. 242-5210.

Type of Pier – Single face.

Depth Alongside at MLW – 35 ft.

Normal ship side to dock – Owner's preference.

Line handling boat not required.

Access to vessel (for stores and repairs) – trucks to ship's side.

Products handled – Ferrous scrap.

General notes: Pier is equipped with 3×14-ton Clyde gantry cranes. Loading rate 2,500 tons per day. Rail service to pier.

J. F. Moran Container Terminal, Charlestown:
Operator – Massachusetts Port Authority. Tel. 482-2930.
Type of pier – Single face, 1,100 ft. long. 1×45-ton container crane, 1×70-ton container crane, 38,000 sq.ft. container stuffing shed, 30 acre container storage area, rail service.
Depth alongside at MLW – 40 ft. MLW.
Normal ship side to dock – Varies.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Containers.

U.S. Gypsum, Charlestown:
Operator – U.S. Gypsum Co. Tel. 241-9100.
Type of Pier – Single face.
Depth alongside at MLW – 23 ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – No access to berth.
Products handled – Gypsum rock from Nova Scotia, carried in company's own vessels, specially fitted and adapted for discharge at this berth.

Mobil Oil, East Boston:
Operator – Mobil Oil Corporation. Tel. 567-9080.
Type of Pier – Straight face, with centre relieving platform.
Depth Alongside at MLW – 30 ft.
Normal ship side to dock – Starboard.
Line handling boat required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Gasoline, Heating Oil.
Size and number of pipe-line – Various.
Bbls per hour discharge capacity – 8,000.
Average distance to storage tanks – tank farm adjacent to berth.
Pollution control equipment – 950 ft. boom.

Gibbs Oil Company, Revere:
Operator – Gibbs Oil Company. Tel. 289-7700.
Type of Pier – Timber pile, wooden deck.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – only by handcart.
Products handled – Heating Oil, Gasoline.
Size and number of pipe-lines – 3×10 in., 2×12 in.
Bbls per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (shared with Union, Gulf, Northeast.)

Union Oil Company, Revere:
Operator – Union Oil Company. Tel. 284-4490.
Type of Pier – Timber pile, wooden deck.
Depth Alongside at MLW 33 ft.
Normal ship side to dock – Port.
Line handling boat required.
Access to vessel (for stores and repairs) – only by handcart.
Products handled – Heating Oil, Mogas, No. 5 Oil, No. 6 Oil,
Size and number of pipe-lines – 5×12 in.
Bbls per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution Control equipment – 1,750 ft. boom, 16 ft. boat. (shared with Gibbs, Gulf, Northeast).

Gulf Oil Company, Chelsea:
Operator – Gulf Oil Company. Tel. 884-5980.
Type of Pier – Single face.
Depth Alongside at MLW – 26 ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – Trucks to ship's side.
Products handled – Heating Oil, Gasoline.
Size and number of pipe-lines – 5×12 in.
Bbls per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 1,000 ft.
Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Gibbs, Northeast, Union.)

American Oil, Chelsea:
Operator – Northeast Petroleum Corp. Tel: Office – 884-7570; Terminal – 884-7577.
Type of Pier – Timber pile dolphins, wooden decked parallel to single face abutment.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Port (bow upstream).
Line handling boat required.
Access to vessel (for stores and repairs) – Trucks to ship's side.
Products handled – Gasoline, Kerosene, Heating Oil, No. 6 Oil.
Size and number of pipe-lines – 8 in., 10 in., 14 in., depending on product.
Bbls per hour discharge capacity – Up to 13,000 depending on product.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Union, Gibbs, Gulf.)

Texaco, Chelsea:
Operator – Texaco, Inc. Tel. Terminal 884-7000, Offices 269-2111.
Type of Pier – Single face.
Depth Alongside at MLW – For 575 ft. vessels: 31 ft. fwd., 34 ft. aft.
For 624 ft. vessels: 21 ft. fwd., 34 ft. aft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Avjet, Diesel Oil, Gasoline.
Size and number of pipe-lines – 7×12 in.
Bbls per hour discharge capacity 5,000 to 10,000.
Average distance to storage tanks – Tank Farm adjacent to berth.
Pollution control equipment – Automatic boom being installed.

Quincy Oil, Quincy:
Operator – Quincy Oil Company. Tel. 773-2500.
Type of Pier – Timber pile, timber deck, offshore wharf.
Depth Alongside at MLW – 29ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – by hand cart only.
Products handled – Gasoline, Heating Oil.
Size and number of pipe-lines – 2×8 in.
Bbls per hour discharge capacity – 6,000.
Average distance to storage tanks – Tank Farm adjacent to berth.
Pollution control equipment – 800 ft. boom, workboat.

Mobil Oil, Quincy:
Operator – Mobil Oil Corporation. Tel. 773-7080.
Type of Pier – T-head with dolphins.
Depth Alongside at MLW – 30 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Gasoline, Heating Oil.
Size and number of pipe-lines – Various.
Bbls per hour discharge capacity – 8,000.
Average distance to storage tanks – Tank Farm adjacent to berth.
Pollution control equipment – shared with Sprague.

C.H. Sprague & Son Co., North Weymouth:
Operator – C.H. Sprague & Son Co. Tel. Terminal 337-2040, Offices 542-7807.
Type of Pier – Timber pile, concrete deck.
Depth Alongside at MLW – 35 ft. 6 in.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – No. 6 Oil.
Size and number of pipe-lines – 2×12 in.
Bbls per hour discharge capacity – 10,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 500 ft. boom, 16 ft. boat (shared with Mobil).

Cities Service Oil Company, Braintree:
Operator – Cities Service Oil Company. Tel. 848-1100.
Type of Pier – 4 cylindrical caissons.
Depth Alongside at MLW – 34 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Heating Oil, Gasoline.
Size and number of pipe-lines – 1×10 in., 4×12 in.
Bbls per hour discharging capacity – 10,000.
Average distance to storage tanks – 2,500 ft.
Pollution Control Equipment – 1,500 ft. boom, work boat.

Bulk Cement Piers:
There are 2 berths in Boston used exclusively for the discharge of bulk cement from barges. Both are in the Mystic River.

No. 28: Allied Concrete Corp. Telephone. 389-2800. This berth is leased to: Marquette Cement Manufacturing Co. Telephone. 235-8006.

No. 33: Atlantic Cement Company, Inc. Telephone. 241-9090.

Meat Inspection Station: The Massachusetts Port Authority operates a meat inspection station on Mystic Pier (No. 38) adjacent to the Moran Container Terminal.

Random incoming meat samples are cut, defrosted, weighed, inspected, and re-frozen at this new facility, enabling inspectors to use one central location instead of the 5 other waterfront stations previously utilized.

The chief component of the building is the large, well-lighted, well-ventilated, and sanitary inspection room. Walls are ceramic tile, the floor has quarry tile, and the ceiling is of acoustical tile.

Up to 50 containers of meat a day will be inspected at this modern facility.

SPECIALISED CARGO HANDLING FACILITIES: Also see "Berthing".

LNG/LPG: Presently there are 2 facilities in Boston Harbour which handle LNG (Liquid Natural Gas – methane). Boston Gas at Commercial Point, Dorchester, Mass., and Distrigas on the Mystic River, Everett, Mass., have storage capabilities for LNG.

The Exxon Everett facility receives and stores LPG (Liquefied Propane Gas).

The Captain of the Port (COPT) has issued very specific requirements for vessels transitting the harbour and transferring cryogenic cargoes. The Coast Guard team consisting of Port Safety Station, representing the Captain of the Port, and Marine Inspection Office boarding officers and the men assigned to the escort and monitoring details are charged with the responsibility for insuring compliance with these regulations which are detailed in the 60-page LNG/LPG Contingency Plan issued by the Captain of the Port. Included in the plan are the following General Regulations:

The vessel must:

(1) Hold a current Letter of Compliance for the carriage of methane/propane issued by the Commandant and a Certificate of Financial Responsibility for Oil Pollution.

(2) Enter the harbour only during daylight hours. Additionally, vessels transitting Dorchester may only do so within 2 hours of high water. Weather permitting, the COTP may authorize night departures providing the vessel does not have a full or partial cargo.

(3) Enter the harbour only during periods of good visibility. If the visibility is less than 2 miles the vessel must:

(i) If at sea, not enter the port without the COTP's permission.

(ii) If in port, notify COTP of position and then proceed to berth or anchorage, whichever nearer.

(4) Maintain a radio watch on Channel 13 (156.65 mHz) while underway in the port area. Additionally, a watch should be maintained on Channel 16 (156.8 mHz).

(5) Not commence offloading cargo prior to the satisfactory completion of the arrival safety inspection by Coast Guard Marine Inspectors and the issuance of the Permit to Handle Explosives or Other Dangerous Cargo (CG Form 4260).

Additionally:

(1) The vessel must moor either bow to seaward and be prepared to get underway on short notice, should an emergency so require, or have a tug standing by during all cargo operations. A tug standby will be required on a vessel's first visit to this port.

(2) The vessel will normally be boarded while anchored in President Roads by COTP/OCMI Inspectors unless, prior to the vessel's arrival, the Master sends a message to COTP stating that: "To the best of my knowledge and belief there are no known casualties to this vessel or its machinery which might affect the seaworthiness. I further state that all cryogenic handling and detection equipment is in proper operating condition."

If this message has been received, the inspection will be made at the dock unless it is the vessel's first visit to Boston. On a vessel's first visit to Boston the boarding will always be made in President Roads. If the vessel does not hold a Letter of Compliance the boarding will be made in Broadsound and the vessel will not be allowed to enter the port until a temporary Letter of Compliance is issued.

(3) Venting gas to the atmosphere is not permitted in port.

(4) All cargo operations must cease if electrical storms are present.

(5) If interpreters are not available, all ship's personnel directly involved in the transfer operation shall readily speak the English language.

(6) If the vessel is at anchorage a live bridge watch shall be maintained. A round of bearings fixing the vessel's position shall be taken hourly followed by a report, every 4 hours, to USCG Group Boston on Channel 16 FM reporting anchor holding and operations normal or any significant change in position or deviation from the norm.

Also, whenever an LNG/LPG vessel is transitting Boston Inner or Outer Harbour (to the seaward entrance of the Boston North Channel) no other vessel will be allowed to be underway in an area 2 nautical miles ahead and 1 nautical mile astern of the LNG/LPG vessel in transit. This concept can be thought of as a "moving restricted area" centred on the LNG/LPG vessel. For vessel movement in an area of the Port other than that described above, express permission from COTP Boston must be obtained.

Furthermore, the maximum allowable speed for any vessel movement during an LNG/LPG vessel transit, will be 6 knots. A Coast Guard escort craft will always be present during an LNG/LPG vessel transit and will vigorously enforce these vessel movement restrictions. The maximum penalty for violation of any of the rules established under the above authority is imprisonment for not more than 10 years and a fine of not more than $10,000.

It should be noted that these rules establishing a restricted envelope around the LNG/LPG vessel and the 6 knot speed limit apply not only to other vessels but to the LNG/LPG vessel itself. Therefore, the LNG/LPG vessel may not approach any closer than 2 nautical miles to another vessel underway, thus eliminating a possible collision should another vessel lose steerage or suffer a casualty. These rules prohibit crossing, meeting or overtaking situations from occuring in Boston Harbour out to the seaward entrance to the North Channel. However, other vessel movements during an LNG/LPG vessel transit may be allowed with permission of the Captain of the Port.

LNG/LPG Vessel Inspections: Before an LNG/LPG vessel is allowed to conduct cargo operations in the Port of Boston, the vessel must undergo a joint COTP/MIO Boston inspection to determine if all cargo handling and detection systems are in proper working order. One of the tests involves the introduction of a properly certificated amount of test gas (span gas) into the vessel's gas detection system. This allows the Inspector to determine if the gas detection system is functioning properly and is able to detect the presence of LNG or LPG should an actual leak occur somewhere on the vessel. Until recently, if a vessel did not have on board a cylinder of the properly certificated span gas, the Coast Guard Inspectors would provide this service. However, due to the increasing costs of the gas (LNG over $40.00 and LPG over $63.00), the vessel will be required to provide the span gas with a valid certificate attesting to its composition before the inspection can begin. Also, for the inspection to continue, shipboard or civilian technicians must be available to rectify any problem that may develop.

STEVEDORES: Available at various rates.

FRESH WATER: Plentiful supply of excellent water in Boston. It is supplied by terminal at prevailing rates.

FUEL: All grades available in various viscosities. Normally supplied by barge subject to advance notices.

CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.–95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.–95, issued for the same vessel.

GANGWAY/DECK WATCHMEN: Available at prevailing prices.
OPENING/CLOSING HATCHES: Performed by stevedores.

REPAIRS: Any type of repair undertaken.
DRY DOCKS:
Bethlehem Steel Co., Shipbuilding

Division, East Boston, Massachusetts	*Length*	*Capacity*
Floating Dry Dock No. 1	622 ft.	18,000 tons
Floating Dry Dock No. 2	479 ft.	20,000 tons
Graving Dry Dock No. 4	256 ft.	

Modern facilities for repair, overhaul, and conversion of vessels of all sizes:

(*a*) a 10,000 ton capacity floating dry dock serviced by 2×150 ton overhead cranes with a yoked capacity of 350 tons. The 5-section dock is 415 ft. long, 120 ft. wide, and has an inside dimension of 85 ft. 7 in.

(*b*) 3 building basins (actually a 3-positioned graving dock). 2 are 132 ft. wide, 867 ft. long; 1 is 150 ft. wide, 938 ft. long. Each basin serviced by 2 whirley type cranes of 75 and 50 ton capacity.

(*c*) 4 outfitting piers capable of handling up to 10 ships simultaneously provide adequate space for dockside work and for mooring personnel or service barges.

(*d*) 3 conventional "sliding" ways capable of handling ships up to 1,000 ft. in length.

Major Shops: 2-bay fabricating shop served by 17 bridge cranes. Machine shop equipped with large vertical and horizontal mills planers, lathes and a complete small machine complement. Fully equipped sheet metal, joiner, boiler, blacksmith, pattern foundry, galvanizing, pipe and copper, and electrical shops. Complete facilities for inspection of all types including nondestructive testing such as radiography, magnetic particle, liquid penetrant and ultrasonic.
REPATRIATION: Good facilities exist.
HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Patriots' Day (19th April); Memorial Day (30th May); Bunker Hill Day (17th June); Independence Day (4th July); Labour Day (first Monday in September); Colombus Day (8th October); Veteran's Day (22nd November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December). *Note:* "Or any day celebrated in lieu thereof".
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours from April to October.
AUTHORITY: Massachusetts Port Authority.

BRIDGEPORT, Connecticut: 41.07 N. 73.11 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".
PILOTAGE: Vessel usually notifies Agent 48 hours before arrival, who will arrange pilot boarding. Pilot boards either at Brenton Reef pos. 41° 25′ W., 71° 23′ W. or Point Judith pos. 41° 17′ N., 71° 29′ W.
ANCHORAGE: 2 miles South of the entrance with depths in excess of 50 ft.
RESTRICTIONS: Entrance channel has a project depth of 35 ft. at MLW, is 400 ft. wide and 3 miles in length.

Normal time allowed for transit from outside to off the dock is 30–45 mins. Docking time varies from 0.5 hr. to 1 hr., dependent on which terminal is the destination, and weather conditions.

The New Haven – Bridgeport Pilots Association believe 4 ft. of water in excess of the ship's draft is needed. As a rule of thumb, 31 ft. at low to 37 ft. at high. Any variations from this, a Pilot should be directly consulted. The range of tide is 6.7 ft. Wind strongly effects the tide in the main entrance channel. Flood and ebb cross the channel at a right angle, and velocities depend on the rise of tide for the day.

Vessels up to 70,000 d.w.t. and LOA 825 ft. call at the port.
MAX. SIZE: See "Berthing and Restrictions".
HEALTH: Vessel to cable Agent 24 hours prior to arrival of any illness on board, otherwise radio pratique not necessary.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.
TUGS: Tugs available from Red Star. The Despatcher monitors VHF and is available 24 hours a day through Channel 24 at Bridgeport.
BERTHING: *Cilco Terminal:* Cilco is a bulkhead dock, length approximately 1,100 ft. Vessels dock port or starboard side to. Two ships can moor at the same time. This is a dry cargo facility. Ships load or discharge all kinds of products. Several mobile cranes are available. Depth 33 ft. at mean low water. Bunkers are only available by truck. Fresh water is available.
TANKERS: *Bridgeport Shell – Buckley Bros.:* The Shell berth is located on the East side at right angles to the main entrance, and ships must be turned 90° to approach the dock. The dock is approximately 200 ft. long with 2 main resting dolphins and catwalks to shore. Head lines and stern lines are run ashore by a messenger. The size of vessels is governed by manifold distance. Light oil products 300 ft. and heavy oil 350 ft. Vessel of length 700 ft. have been moored, 38 ft. at MLW in ship berth. Ships dock port side to.

Bunkers and fresh water are available.

United Illuminating: Berth is 0.6 miles inside the breakwater on the West side of the channel. A turn to port of 120° must be made into a dredged cut 140 ft. wide. The dock is concrete caissons on pilings with catwalks and centre platform. Depth 32 ft. to 37 ft. at MLW. Vessels of 70,000 d.w.t. call, but bow to manifold distance governs size of vessel. (350 ft. – 375 ft.). Vessels dock starboard side to.

Fresh water is available, but bunkers are not. Every tanker, when moored here, has a slick boom placed around it.
FRESH WATER: Available at all berths.
FUEL: No fuel barge service available. In emergency tank truck delivery can be arranged.
MEDICAL: All facilities available.
AIRPORT: Bridgeport Airport about 3 miles away. New York airports about 50 miles distance.
CONSULS: All countries represented in New York.
HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (18th February); Good Friday–Memorial Day–Independence Day (4th July); Labour Day–Columbus Day (14th October); Veterans' Day–Election Day (5th November); Thanksgiving Day (28th November); Christmas Day (25th December).
TIME: Daylight Saving Time, GMT minus 4 hours from April to October.
SERVICES: Ships stores and launch service available from New Haven. Vessels must provide their own gangway at all docks.
AUTHORITY: Office of the Harbour Master.

BROWNSVILLE, Texas: 25.54 N. 97.28 W.

(See Plan Book)

DOCUMENTS: See "Houston".
PILOTAGE: When a vessel is scheduled to arrive at the port of Brownsville the vessel's Agent notifies the Harbour Master's office of the approximate ETA. Later, when a firm ETA is received, the Harbour Master's office notifies the pilot office that the vessel is expected on the bar at a certain time and also gives the time which she would like to enter.

The telegraphic address of the pilot office is: Brazos-Santiago Pilots, 411 First National Bank Bldg., Brownsville, Texas.

If possible, it is desired that the Harbour Master's Office be notified 2 hours in advance of the ETA of any vessel.

The VHF Channel to be used when contacting the pilot boat and Harbour Master is 16. When contact is made, this will be switched to Channel 13.

The pilot boat is a steel hull length 43 ft. beam 16 ft. and draft 8 ft. 250 h.p. diesel. Gross tonnage 36 tons.

No light or sound signals are necessary from vessels requiring a Pilot, although light signals may sometimes be used at night – ordinarily a vessel is picked up by visual sighting.

The pilot boat is located on the South tip of Padre Island – the Pilot station is adjacent to the entrance to ship channel with a clear view of the approach to the jetties.

The Pilot is taken on board an incoming vessel at the sea buoy which is located 2 miles off shore.

The anchorage for a vessel awaiting Pilot is 1.5 miles North of sea buoy.
ANCHORAGES: Anchorages are marked on charts.
RESTRICTIONS: *Brazos Island Harbour:*

	Dredged Dimensions			*Minimum depths in channel entering from seaward*		
Name of Channel	*Feet Width*	*Miles Length*	*Feet Depth*	*Left Outside Quarter Feet*	*Middle Half of Channel Feet*	*Right Outside Quarter Feet*
Brazos Santiago Pass:						
Entrance Channel	300	1.9	38	40.0	39.0	37.0
Channel across Laguna Madre	200	2.9	36	38.0	38.0	38.0
Brownsville Channel:						
Junction Basin to Boca Chica Passing Basin	200	4.0	36	38.0	38.0	38.0
Boca Chica Passing Basin to Goose Island Passing Basin	200	5.4	36	38.0	38.0	38.0
Goose Island Passing Basin to Brownsville Turning Basin	200	2.8	36	37	38	37
Brownsville Turning Basin (extension)	500	1.4	36	37	38	37.5
Brownsville Turning Basin	500-1000	0.5	36	36	37	35

MAX. SIZE: The max. permissible: Length 800 ft., beam 160 ft., draft 34.5 ft.
RADIO: ETA cables to Agent, etc., should be addressed to the Agent via Mackay Radio at Galveston or RCA in Port Arthur. When within a 60 miles range of the port, calls may be made through the Harbour Master's office on VHF Channel 16 and the calls will then be transferred to land lines to any point. Also Brownsville Marine Operator, VHF Channel 26.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Brownsville Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
VHF: A vessel approaching the port of Brownsville may contact the Harbour Master's office on VHF Channel 16.
TUGS: Tugs normally join an incoming vessel 1.25 miles before she enters the turning basin. The tug's lines are used for which there is no charge.
BERTHING: Cargo facilities include over 7,500 ft. of modern, marginal dry cargo wharves, 14 deepsea docks and 10 barge berths, together with over 583,000 sq.ft. of transit shed space. In addition there is 242,000 sq.ft. of open storage space at the deep-draft docks and 271,000 sq.ft. of open storage at the shallow draft docks.
BULK HANDLING FACILITIES:

Public Grain Elevator: Located at the approach to the Turning Basin, the port-owned and operated elevator has a capacity of over 3,800,000 bushels. An adjacent bulk plant provides flat storage for all types of dry bulk commodities.

Two large gantry cranes handle the loading of vessels. The maximum spout clearance for loading vessels is 45 ft. above the water.

Equipped with two truck dumps and two hopper car dumps, the elevator has the rated loading capacity of 1,200 short tons per hour (1,000 L/T per hour on bulk carriers without wing tanks and 600 L/T per hour on tween deckers.)

The 400 ft. wharf is 12 ft. above water and has an unlimited berth length. The draft at dockside is 34 ft. and the channel control depth is 36 ft.

The grain elevator also has the flexibility of unloading vessels (barge unloading capacity is 300 t.p.h.).

Liquid Bulk Handling: Liquid Terminals, Inc., is a new facility that was built to handle and store all types of liquid commodities in bulk. The large storage tanks vary from 5,000 to 20,000 barrels each, providing a total of more than 125,000 barrels capacity for the entire installation. The modern liquid dock adjacent to the facility accommodates vessels with a deep draft of up to 34 ft. Loading racks provide for the efficient transfer of liquids to either truck or rail.

Four oil and chemical docks are located on the North side of the ship channel and are utilised by companies such as Exxon, Texaco, Union Carbide, Petroleos Mexicanos, Line Service, Continental and Permian Oil to handle bulk petroleum and chemical products. Also see "Tankers".
CRANES: Two large floating cranes, rated at 150 metric tons each, are available for heavy lifts at any dockside location in the port area.
STEVEDORES: To arrange for gangs the vessel needs to notify the ship's Agent of ETA; the Agent will in turn notify the stevedores. It is necessary that the Agent be advised of an ETA before 1900 hrs. for an 0800 hrs. start.

Main commodities and average load discharge rates:

Grain	Bulk carrier 1,200 t.p.h.
Grain	between deck 600 t.p.h.
Cotton	100 bales per hour per gang
Lead and zinc pigs	30 tons per hour per gang
Citrus in boxes	18 tons per hour per gang
Onions and carrots in bags	18 tons per hour per gang
General cargo	25 tons per hour per gang

MEDICAL: When medical attention is required, advance notice should be given the Agent by ship's radio.
TANKERS: Ballast facilities are available up to 6,000 barrels per hour. The port loads residual crude only – about 13.2 API. The port has 4 tanker berths, with 34 ft. 7 in. max. draft.
DENSITY: The average density is 32 parts per 1,000.
FRESH WATER: Fresh water is available and can be delivered to a vessel through hose or pipe-line at 150 gallons per minute.
FUEL: No fuel is available locally. It must be barged in from Corpus Christi – advance arrangements are necessary.
FIRE PRECAUTIONS: Tankers are required to berth head out.
DEVELOPMENTS: The Federal Government has made an appropriation to initiate a study on deepening ship channel from 36 ft. to 42 ft. and to widen the channel from 200 ft. to 300 ft., bottom width. Plans are being made to build another grain elevator/bulk materials dock, and another chemicals dock within 3 years.

GANGWAY/DECK WATCHMEN: Such services are necessary only when detainees are held on board.
OPENING/CLOSING HATCHES: This work is done by the stevedores.
IDENTIFICATION CARDS: Immigration requires form No. 1-95 Landing permit.

CONSULS: Mexico: tel. 542-4431; Guatemala, Costa Rica and Honduras, tel. 542-3506; Nicaragua, tel. 546-6861.

REPAIRS: Marathon, located at the port, is equipped to handle all normal temporary ship repairs.
DRY DOCKS: None available.
REPATRIATION: There are facilities for this service.
AIRPORT: The local airport is located 2 miles from the port. Braniff Airways operates 4 flights daily.
TIME: Local Time is 6 hours behind GMT.

HOLIDAYS: The following holidays are observed here: Veterans Day (4th Monday of October); Thanksgiving; Christmas; New Year; Washington's Birthday (Feb. 22nd); Texas Independence Day (March 2nd); Emancipation Day (June 19th); July 4th; Labour Day (1st Monday in September); Decoration Day (last Monday in May).

No work shall be performed on Labour Day or Christmas Day except in case of fire or where property is in danger. When holidays come on Sunday, the following day will be recognised as the holiday. Also, no work will be performed between 1600 and 1900 hrs. on election days.
POLICE/AMBULANCE/FIRE: Sherriff 546-2451; Brownsville Fire Dept. 542-4375; Ambulance Service 542-2121.
TELEPHONES: Telephones are not available for placing on ships.
SERVICES: Tank cleaning service is available at the port. Ballast facilities are available at oil docks 1, 2 and 3. P.I.B. can take care of compass adjusting, etc.
DELAYS: There are no delays unless an incoming ship has been assigned to a berth now occupied. Bunkers must be barged in; arrangements may be made ahead of time to avoid delay.
AUTHORITY: Port Director.

BRUNSWICK, Georgia: 31.09 N. 81.30 W.

DOCUMENTS:

Crew Lists: 1 certified copy for Immigration; 2 copies uncertified for Customs.
1 copy Pratique.
3 copies Inward Customs Manifests.
3 copies each Stores, Curio & Narcotics List.

PILOTAGE: Compulsory. 24-hour Pilot service arranged by Agent with 48-24 hour prior notice from ship. Pilot station at Buoy "St. S." Pilot reached through UHF Channels 12, 14, 16 on voice radio (R/T). Pilot boat is 25 ft. white hull. Marking is "Pilot" on hull.
ANCHORAGES: 3 miles S.E. of buoy "St. S." sand and mud bottom. In event deep draft (30 ft.) and high winds, anchorage near Ocean Buoy 2B and inform Pilot as in "Pilotage". Vessels in need or for other good reason, may anchor in St. Simon's Sound, depth 10 fathoms.
APPROACHES: The harbour is located about midway between Savannah and Jacksonville. the harbour is reached by a channel from the Atlantic Ocean, running between St. Simons and Jekyll Island. The channel has a minimum width of 500 ft. and a depth of 32 ft. to St. Simons Sound, thence a width of 400 ft. and a depth of 30 ft. to Sidney Lanier Bridge, where the channel divides, 13 miles from sea. The Northern branch leads to Lanier Dock, State Dock and the city, 400 ft. wide and 30 ft. deep. The other branch leads N.W. to the pulp plant dock, chemical docks and electrical generating plant, 300 ft. wide and 30 ft. deep.
RESTRICTIONS: No restrictions unless vessel drawing 30 ft. or more, then must await high tide to cross bar.
MAX. SIZE: Max. permissible length 650 ft. Max. d.w.t. over 33,000 tons.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Prior arrival, use commercial Lantana, Chatham Radio for advices to Agent, 48-24 hours in advance.
TUGS: 3 Tugs, 500 h.p. each. Join vessel in St. Simon's Sound after passing lighthouse. Tug lines used.
BERTHING: 1,600 ft. continuous marginal wharf; steel and concrete construction, 57 ft. wide apron. Vessels normally turned to moor port side alongside unless deck cargo or other vessel obstruction means cargo may not be worked over port side. Gantry crane of 27 tons capacity available.

The Brunswick Port Authority operates a bulk commodity terminal at Lanier Dock. The facility is 500 ft. long and constructed of steel and concrete, with a project depth of 30 ft. MLW, equipped with a grab bucket, conveyors and marginal tracks for handling bulk cargoes at rates up to 600 t.p.h. It operates covered warehouses with a capacity of approx. 32,000 tons. A limited amount of open storage space is available equipped with a conveyor system and reclaim facilities. Lanier Dock lies directly adjacent to the Brunswick State Docks and warehouses. Both wharves have a turning basin of 1,000 ft. in length and 600 ft. wide with a project depth of 30 ft. MLW (mean low water) also Barge Dock facility 250 ft. long.
BRIDGES: 1: Lanier Bridge draw bridge; 250 ft. horizontal clearance, 139 ft. vertical clearance, up position, high water. Vessels under Pilot and tugs when passing through.
STEVEDORES: Wireless to Agent 48-24 hours prior arrival with number of gangs, working hatches and space in hatch, and special factors, e.g., pilferable cargo, autos, heavy-lifts, etc.
MEDICAL: Advance notice to Agent, or notify on arrival.
TANKERS: Liquid bulk cargo is pine oil distillates loading. Petroleum storage 310,000 barrels, Number 6.
DENSITY: Average 1.0166 (high) to 1.0141 (low). Water inside considered brackish.
FRESH WATER: From shore connections at 20 t.p.h.
FUEL: Bunker "C" available at piers. Distillate and blends by barge, if required. 72 hour advance notice to Agent, giving type and quantity.
GANGWAY/DECK WATCHMEN: Not required but available.
OPENING/CLOSING HATCHES: "MacGregor" hatches must be opened by vessel prior working. All others may open at discretion to save turn-around time.
CERTIFICATES: Registry, U.S. tonnage tax. CFR Pollution, Load line, SOLAS, De-ratting.
CUSTOMS ALLOWANCES: Tobacco, 2 cartons. Customs will open bonded stores on request. Spirits, reasonable amount.
IDENTIFICATION CARDS: U.S. Immigration Landing Permits.
CONSULS: None, Consulates at Savannah, Ga., and Jacksonville, Fla., may be used as required by vessel.

REPAIRS: Limited to minor replacement parts to engine, radio, radar of standard makes. Major repairs may be arranged with shipyards of Savannah or Jacksonville.
DRY DOCKS: None.
REPATRIATION: Through Agent.
AIRPORT: 20 minutes drive from quays; 4 flights daily.
TIME: GMT minus 5. Daylight Saving Time, 15 April through last Sunday October. April: advance; October: retard.
HOLIDAYS: 1st Jan., 15th Jan., 12th Feb., 22nd Feb., 30th May., 4th July, 1st Monday in September, 12th October, 11th November, 4th Thursday in November, 25th December.
POLICE/FIRE/AMBULANCE: Numbers given in Boarding Brochure.
TELEPHONES: None placed aboard. Public pay (coin) telephones on quay clearly marked.
GENERAL: Brunswick, Georgia, is a small port specialising in export of woodpulp in bales, pine-tree products in drums. Imports bulk salt, salt-cake, fertilizer materials and gypsum, some break-bulk general cargo. Vessel requirements handled by Agent in residence, communication by wireless or R/T essential in advance.
AUTHORITY: The Brunswick Port Authority and Georgia Port Authority.

BUFFALO, New York: 42.55 N. 78.55 W.

(See Plan Book)

DOCUMENTS: For vessels arriving from foreign ports:
3 Unfreighted copies of Complete Manifest covering all cargo to be discharged in the Great Lakes.
4 Personal Effects Lists.
4 Crew Lists.
4 Narcotics Lists.
Vessel's Registery and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
PILOTAGE: Not compulsory. Seaway Pilots will assist if required.
ANCHORAGE: Inside south breakwater, depth 23 ft – 27 ft.
MAX. SIZE: Limited by Seaway Locks. 730 ft. length and Seaway draft.
RESTRICTIONS: St. Lawrence Seaway navigation season approximately from 15th April to 15th December. Controlling depth 27 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, but not normally required.
RADIO: WBL – Buffalo.
BERTHING: Outer harbour: Total berth space 2,400 ft.; depth alongside 27 ft. LWD. 2 transit sheds – total of 184,000 ft. dry dock space; sprinkler system equipped, seaway piers for bulk cargoes. South and North Piers 3,506 ft. of berth space, 200 acres open storage area. Depth alongside 27 ft.
SPECIALISED CARGO HANDLING FACILITIES: Niagara Frontier Transportation Authority has a mobile gantry crane capable of handling lift of 50 tons at 40 ft. with a boom. Additional heavy lift equipment available from commercial sources.
STEVEDORES: Gangs to be ordered by 1700 hrs. for 0800 hrs. start following day, ample gangs available.
DENSITY: Fresh water.
MEDICAL: U.S. Public Health Outpatient Clinic as well as numerous hospital facilities.
FRESH WATER: Available at most berths.
FUEL: All grades available by tank truck delivery or by harbour tank barge.
CONSULS: Canada, Costa Rica, Ecuador, France, Germany, Italy, Mexico, Netherlands and Sweden.
REPAIRS: Machinery and above-water repairs available.
AIRPORT: 5 miles, served by four regular airlines.
SHORE LEAVE: No restrictions when cleared by US Immigration Officials.
GENERAL: Refer to "Great Lakes Pilot".
AUTHORITY: Niagara Frontier Transportation Authority.

BURNS HARBOUR: Indiana: 41.38 N. 87.11 W.

(See Plan Book)

The entrance to Burns Waterway Harbour is at 41° 38′ N. and 87° 11′ W. and is located on the South shore of Lake Michigan at Portage, Indiana, some 30 miles East of Chicago in an area known as the Indiana Dunes.
PILOTAGE: Available.
RESTRICTIONS: Average Navigation Season: Domestic cargo by lake freighters – March 15th to February 1st. Ocean going vessels via Seaway – April 1st to December 15th. Lake river barges – twelve months.

Approach to Harbour: Controlling depth of water at harbour entrance 30 ft., entry is from deeper water. Length and Beam Limitations – none. Approach open 24 hours per day.

Harbour: Controlling depth of water for outer harbour 28 ft.; East and West harbour arms 27 ft. Turning basin – 1,600 ft. radius with water depth of 28 ft. Accessible 24 hours a day. Length and beam limitations – none.
TUGS: Available if required.
BERTHING: The port provides 30 ft. depth at the entrance channel, 28 ft. at the inner harbour, and 27 ft. at berths. The harbour is protected by an all weather breakwater.

The port has 7 modern berths plus a mooring facilitiy specifically designed for self-unloader ships. Ultimately the Port will have 15 ship berths. Recently completed are 2 modern, heated, sprinkler-equipped transit sheds providing 146,000 sq. ft. of space for general cargo, which are being operated by competent stevedores.

A refrigerated storage building is being constructed.
CRANES: 3 × 150 ton crawler cranes; 3 × 75 ton crawler cranes; 3 × 60 ton crawler cranes.
FRESH WATER: Available.
AUTHORITY: Indiana Port Commission, Port of Indiana – Burns Waterway Harbour, Portage, Indiana.

BURNSIDE, (Including St. James), Louisiana: 30.08 N. 90.55 W.

East bank of Mississippi River, about 200 miles from sea.
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made out to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not normally required.
BERTHING: Bulk Marine Terminal: berth 800 ft. long, 40 ft. depth; Ormet Corporation berth 825 ft. long, 50 ft. depth.
TANKERS: *St. James:* The facility is located on the West bank of the Mississippi River at Mile 180 above Head of Passes.

The operators are Shell Pipeline Corporation, Donaldsonville, Louisiana.

There are 2 berths, one of which is 800 ft. long and the other 1,100 ft. long. At the newer dock there are two 16 in. arms and the berth is capable of unloading 28,000 barrels per hour.

The depth alongside these berths is 55 to 60 ft. However, the draft of the vessel is limited to that available at Southwest Pass.

It is important to note that due to the design of this terminal it is impractical for vessels to receive stores at this location. Additionally there are no bunkers provided at this terminal nor is there any fresh water available from the terminal and there is no authorized anchorage in the immediate area of this facility. Vessels expecting less than 24 hours delay awaiting berth are generally anchored at New Orleans and then proceed to the terminal (which is a different port of entry for Customs) otherwise vessels would have to anchor at Burnside which is about 10 miles up river from St. James.

Because of an underwater pipe-line near the dock, the terminal management requires all vessels using their facility to have at least 1 tug of 1,800 h.p. to assist in docking and undocking. Note that the tugs emanate from New Orleans which means approximately 7 hours transit to St. James.

As a point of reference it generally takes approximately 15 or 16 hours transit from Southwest Pass to St. James Terminal for most vessels.
FRESH WATER: Available ex-berth.
FUEL: Not available.
DENSITY: Fresh water, 1000.

CAPE COD CANAL, Massachusetts **(See Plan Book)**

The Cape Cod Canal is a sea-level canal, extending from a point on Cape Cod Bay about 50 miles S.E. of Boston Harbour, Mass., to the head of Buzzards Bay, Mass. In general direction the canal trends from Cape Cod Bay Westerly to Buzzards Bay.
PILOTAGE: The Corps of Engineers, Department of the Army, does not maintain pilot service but independent Pilots, licensed by the U.S. Coast Guard, are usually available at the canal. Messages will be transmitted to Pilots with the understanding that the Government will assume no responsibility in connection therewith.
RESTRICTIONS:

	Width bottom Feet	*Length Miles*
Easterly Entrance to Station 430	480*	8.4
Station 430 to Wings Neck (Hog Island Channel)	500	4.3
Wings Neck to Cleveland Ledge (Cleveland Ledge Channel)	700	4.7

*Except narrows to 450 ft. opposite State Pier.

The canal and approach channels have been dredged to the project depth of 32 ft. below mean low water.
RADIO: Direct communication with the Cape Cod Canal sub-office, New England Division, Corps of Engineers, is available at all hours by means of telegraph, telephone, or radio. The telephone number is 759-4431 or 789-4432.

The nearest ship to shore telephone stations are at Scituate call letters (WOU) and Chatham call letters (WCC). Bridge to bridge radio-telephone facilities are available on 156.65 mHz, 156.6 mHz, 156.7 mHz and 156.8 mHz. Vessels equipped for communications with the Cape Cod Canal are requested to keep their radio-telephone tuned to the above frequencies.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not available.

BERTHING: Mooring basins are located at the East and West ends of the canal. The East Mooring Basin, located on the North side of the canal is 2,500 ft. in length, 350 ft. in width and is maintained at a depth of 25 ft. at mean low water. The West Mooring Basin, located on the S.E. side of the Hog Island Channel is 3,300 ft. in length, 350 ft. in width and is maintained at a depth of 32 ft. at mean low water. Mooring dolphins are provided in both mooring basins.

BRIDGES: 2 fixed span high-level highway bridges and 1 vertical lift railroad bridge cross the canal.

The minimum bridge clearance for the available width of channels are as follows:

	Horizontal Clearance	*Vertical Clearance (mean high water)*
Highway Bridges	480 ft.	135 ft.
Railroad Bridge	466 ft.	135 ft. (open)
(vertical Lift)		7 ft. (closed)

COAST GUARD STATION AND WEATHER SIGNALS: A U.S. Coast Guard Station is located near the Eastern entrance.

TRAFFIC LIGHTS: Red, green and amber electric lights, visible for a distance of about 2 miles in clear weather, day or night, are located at the following points:

(a) Eastern or Cape Cod Bay entrance, on South side of entrance at an elevation of about 55 ft. above high water.

(b) Western or Buzzards Bay entrance, (1) Wings Neck, near Wings Neck Light at an elevation of about 48 ft. above high water.

AUTHORITY: Corps of Engineers, Dept. of the Army, Waltham, Massachusetts.

CASTLE ISLAND, Alaska

Located in Duncan Canal off Kupreanof Island between Wrangell and Petersburg. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.

MAX. SIZE: Harbour depth 45 ft.

TIDES: Diurnal range 16 ft. Also see "Berthing".

ANCHORAGE: Fair weather anchorage only.

CUSTOMS: Quarantine and Immigration available from Guard Island. Customs available from Petersburg or Guard Island.

BERTHING: Alaska Barite facility: dolphins and 2 floats. Present facilities limited to about 22,000-ton ships. Loading equipment consists of 1 loading spout for bulk cargo. Production average of 1,000 t.p.h.

TUGS: From Wrangell 3 available 500 h.p. each.

STEVEDORES: Sufficient to work ore loading facility 24 hours a day when necessary.

REPAIRS/WATER/FUEL: None.

MEDICAL: Facilities available in Petersburg or Wrangell.

AIRPORT: Charter airplane only.

CHARLESTON, South Carolina: 32.47 N. 79.56 W. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Curio Lists.
3 Stores Lists.
3 Manifests.
At least 1 copy of Bill of Lading, if provided by shipper, and 1 copy of Parting Crew List.

PILOTAGE: Shipmasters to notify Agent 48, 24 and 12 hours prior arrival at C-2 Buoy. Pilot may be contacted by VHF Channels 16 and 18. Pilot boards on lee side from black-painted launch with "PILOT" painted in white letters on the side. Normally vessel is berthed by Docking Master from tug company.

ANCHORAGES: Rarely required.

RESTRICTIONS: Only restriction affecting operation relates to channel depth of 35 ft. at low tide.

MAX. SIZE: Can handle vessels 950 ft. long. Present facilities measure 475 ft. from centre of discharge pipe-line to end of dock.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Fort Monroe Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Normal procedure. No special or unusual procedures required.

TUGS: Tugs usually join tankers between Cooper River Bridge and Coal Pier, approximately 0.5 mile from dock. Tug lines used. No charge made for this service.

BERTHING: *Union Pier:* State Pier No. 2: 3 berths. Break-bulk terminal, length 2,083 ft. Depth 35 ft. One 90 ton track crane and one 75 ton gantry crane.

Colombus Street Terminal: State Pier No. 8. 5 berths. Length 3,875 ft. Depth 35 ft. Terminal handles break-bulk and containers. One 440 ft. fruit berth. One 75 ton container gantry crane, 50 ton and 30 ton gantry cranes serve 1,940 ft. of berthing space along the South end of the pier. One 400 ton capacity sheer-leg and one 90 ton truck crane.

North Charleston Terminal: State Pier 15: Total length 2,500 ft. One general cargo berth length 600 ft., one grain berth, length 675 ft. 2 container berths each 930 ft.length. 2×50 ton container cranes, one grain elevator, capacity 1.5 million bushels. Also one gantry crane of 50 tons capacity.

STEVEDORES: *Working Hours:* Labour may be ordered for work to start at the following times: 0800, 1000, 1200 and 1900 hrs. Labour will usually work as long as necessary; shift system not used in this port.

RADAR/VHF: Services required are handled through Agent.

MEDICAL: Advance notice when possible.

TANKERS: Discharge lines all 8 in. dia. and 1 solvent line 8 in. Adapter to conform to ship's discharge lines supplied. Draft not to exceed 35 ft. low tide. Tanker berths operated by Humble Oil, Shell Oil, Hess Oil, BPT, and Phillips Petroleum, all suitable for 35 ft. draft. Gulf Oil berth, max. draft 30 ft. Texaco berth, max. draft 32 ft.

FRESH WATER: Available via 2.5 in. hose at a rate of 500 bbls.p.h.

FUEL: Bunker "C" at API of 14.4 to 16.6 (approx.) and blended Bonded Intermediate grades from 1 to 30.

FIRE PRECAUTIONS: Normal precautions.

DEVELOPMENTS: No changes planned in present facilities until channel depth is increased.

GANGWAY/DECK WATCHMEN: Supplied by Agent upon request from Shipmaster only.

CERTIFICATES: Normal International certificates.

CUSTOMS ALLOWANCE: Tobacco, Wine and/or Spirits, governed by length of time in port and existing Customs regulations.

CONSULS:

Denmark: Ashmead F. Pringle, Jr., 607 Peoples Building, 18 Broad Street, Charleston, S.C. 29401. Tel.: 722-7016.

France: Jack C. Muller, 6 King Street, Charleston, S.C. 29401. Tel.: 722-8045.

Norway: James D. Lucas, Jr., 10 N. Adgers Wharf, Post Office Box 536, Charleston, S.C. 29401. Tel.: 577-5782.

Switzerland: Dr. Hans Kuhn, 176 West Park Drive, Spartanburg, S.C. 29301. Tel.: 585-3922.

REPAIRS: Available.

DRY DOCKS: 1×10,000-ton floating dock, 1×1,500-ton, and 2×1,000-ton floating docks.

REPATRIATION: Facilities available.

AIRPORT: 10 miles from Terminal, served by regular airlines.

HOLIDAYS: Work continues on holidays.

POLICE/AMBULANCE/FIRE: Contact dockmaster at any time.

TELEPHONES: No arrangements exist for placing phones aboard vessels. Phone facilities are situated within 100 ft. of vessel at dock.

SERVICES: No tank cleaning/washing facilities available at dock. Can be arranged and handled at local shipyard. Practically any other service available at dockside.

SHORE LEAVE: Subject Shipmaster's permission and existing Immigration regulations.

DELAYS: Normally, no delays beyond normal time required to connect/disconnect hoses.

AUTHORITY: South Carolina State Ports Authority.

CHICAGO: Illinois: 41.50 N. 87.45 W. (See Plan Book)

DOCUMENTS:

For Agent in Montreal:

3 unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.

In first U.S. port: a "Traveller" is made up by the Customs Inspector with the following documents:

2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form I418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:

5 sets Manifest of Cargo for that port.
The "Traveller" and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 sets Bills of Lading.
3 copies Stowage Plan.

PILOTAGE: Compulsory unless Master holds exemption "B" license. 24 hours notice of arrival required by Agents who arrange Pilot.

ANCHORAGE: In Chicago Harbour, anchorages A, B and F designated for merchant ships and marked on charts. In Calumet Harbour vessels should not anchor within 1,000 ft. of the breakwaters.

RESTRICTIONS: St. Lawrence Seaway navigation season approximately from April 15th to November 15th. Controlling depth 27 ft.

MAX. SIZE: Limited at Seaway Locks. 730 ft. length, 26 ft. draft. Depth alongside terminals 27 ft.

RADIO: Port can be contacted by Illinois telephone station WAY.

Notice of arrival; Master must give at least 24 hours notice to

Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours notice of ETA at first U.S.A. discharge port is required.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, not compulsory but recommended.
BERTHING: *Navy Pier Terminal:* Ceres Marine Terminal has 1,235 ft. of berthing space and more than 250,000 sq. ft. of dock space, with 185,000 sq. ft. under cover. North Pier also features adjacent warehousing available in its downtown distribution centre. Lift truck capacity at North Pier ranges up to 62,000 lb.

Terminal features dockside rail and truck service and mobile cranes for heavy lifts.

Calumut River Terminals: Iroquois Landing Lakefront Terminals. Operators: Ceres Marine Terminals and International Great Lakes Shipping. Facilities at the mouth of the Calumut River. Handles general cargoes, steel products, bulk liquids and containers. The terminal has 3,000 ft. of berthing space, 130,000 sq. ft. of transit shed storage, and 850,000 sq. ft. of open storage. Heavy lift cranes run from 75 to 110 tons in capacity. Also numerous lift trucks, with capacities to 56,000 lb.

Federal Marine Terminals Inc. handles general cargo, steel products and containers. This facility has 730 ft. of berthing space, 34,000 sq. ft. of covered storage space and 11 acres of open storage space. Heavy lift cranes at Federal Marine range from 20 to 150 tons. Lift truck capacities range up to 52,000 lb.

The Rail to Water Transfer Corp. (RTW) on the Calumet River specialises in handling, storing and distributing raw materials or dry bulk commodities. RTW's twin bulk loading facilities offer 2 deep-water berths, each more than 700 ft. long. The facility has railroad yards that accommodate 2,200 rail cars adjacent to the dock. The twin loading towers provide fast handling at up to 2,500 t.p.h.

Lake Calumet Terminals: Bulk Terminals Co. in Lake Calumet transfers liquid bulk cargoes – animal fats, vegetable oils and chemicals. Bulk Terminals has 400 ft. of berthing space, with storage capacity of more than 550,000 barrels and 16,000 sq. ft. of drumming warehouse space. This facility has a transfer capacity of approximately 200 t.p.h. Bulk also has 5 miles of internal railroad trackage and a switch engine.

The International-Great Lakes Shipping Company (INGLA) terminal at Lake Calumet handles steel, ores, pig iron, scrap and containers. The terminal was designed for easy interchange of cargoes to and from deep sea vessels. Mississippi River barges, Great Lakes vessels, railroads and trucks – both local and interstate. Truck and railcar weighing services are available also. INGLA has 1,500 ft. of berthing space; 45,000 sq. ft. of covered storage and 27 acres of open storage. Heavy lift equipment includes 5 cranes ranging from 125 to 150 tons. Lift truck capacities range up to 50,000 lb. per unit.

Ceres Marine Terminals facilities on Lake Calumet have 176,000 sq. ft. of transit shed (60,000 heated); 100,000 sq. ft. of general storage, warehouse and distribution area (50,000 heated), and 50,000 sq. ft. of open storage. Refrigerated space is available in the transit warehouse. Equipment includes lift trucks with capacities up to 62,000 lb. North Pier services barge traffic to and from locations along the entire inland waterway system, and as far South as the Gulf, in addition to serving deep draft vessels.

EmEsCo warehousing and marine terminal facilities on Lake Calumet are designed for efficient handling of steel, machinery, containers, scrap, pig iron, ferro-alloys and other metallic bulk commodities. EmEsCo's 800 ft. of heavy duty bulkhead and 2×75-ton gantry mounted cranes operating over 3,700 ft. of tracks provide more than 1,000,000 sq. ft. of open storage under cranes. EmEsCo has 100,000 sq. ft. of heated warehouse, with plans to expand that to 425,000 sq. ft. Other features are 25 acres of open storage, miscellaneous auxiliary cranes, an electronic truck and rail scale, 25,000 ft. of railroad track, ship to barge transfer, 100 intra-plant flat and gondola cars.

Trade Zone Distribution, Inc.: Operates Free Trade Zone No. 22 for warehousing, storage and distribution.

Buffington Harbour: Private harbour owned by Universal Atlas Cement. Located about 9.5 miles S.E. of Calumet Harbour. A concrete dock 1,755 ft. long, enclosed by a breakwater with entrance 880 ft. wide. Exposed to heavy N.E. swell. Depth alongside from 25 to 31 ft.

BULK HANDLING FACILITIES: Continental Grain Company's Elevator "B" on the Calumet River has a storage capacity of 6,800,000 bushels. Elevator "B" has 5 loading spouts with a shipping capacity of 40,000 bushels per hour. Unloading capacity from barges is 15,000 bushels per hour. Receiving capacity from rail cars is 10,000 bushels per hour and from trucks 15,000 bushels per hour. The berthing space at elevator "B" is 1,025 ft.

The Cargill Inc. grain elevator on the Calumet River has a capacity of 23 million bushels. In addition to grain, this facility handles salt, molasses, and grain by-products. Cargill has 3,600 ft. of berthing space – 1,200 of this for elevator use, and 20 acres of open storage. Loading capacity is 60,000 bushels per hour, while unloading is 12,500 bushels per hour. Cargill has 3 marine legs, and 5 loading spouts.

The Gateway Elevator of the Indiana Grain Co-Operative at Lake Calumet offers storage capacity of 6,500,000 bushels for bulk grains. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading speed is 10,000 bushels per hour. Berthing space is 1,000 ft.

Continental Grain's Elevator "C" at Lake Calumet has a capacity of 6,500,000 bushels of bulk grain and grain products. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading capacity is 10,000 bushels per hour. This facility has 1,000 ft. of berthing space.
DENSITY: Fresh water.
MEDICAL: Doctors, hospital and all facilities available.
FRESH WATER: Available at most berths.
FUEL: All grades available, ex-wharf, or delivered by barge.

2 set Bills of Lading.
3 copies Stowage Plan.

It is especially important that vessels try to have their visaed Crew List on board which is required by U.S. Immigration at first U.S. port. Failure to have this visaed Crew List can result in all personnel being detained on board. Visa waivers are applied for and granted fairly regularly but Immigration has the discretion to refuse these at will.
PILOTAGE: Compulsory, unless Master has a "B" Certificate on board. Vessels are not permitted to transit the lakes from Port Colborne to Cleveland without either a "B" Certificate on board or a special Waiver from the U.S. Coastguard.
ANCHORAGE: In the outer harbour, 28 ft. depth, mud and sand bottom.
RESTRICTIONS: St. Lawrence Seaway navigation season approximately from April 15th to December 15th. Controlling depth 25 to 27 ft. Access to berths in the River is limited by height restriction of 97 ft. above waterline.
MAX. SIZE: Limited at Seaway Locks, 730 ft. length, 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" first U.S.A. port (Albany).
TUGS: Available and use is compulsory in Cuyahoga River and Old River channel.
RADIO: U.S. Coast Guard can be contacted by R/T on 2182 kc/s.

Notice of arrival: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours notice of ETA at first U.S. discharge port is required.

DENSITY: Fresh water.
MEDICAL: Doctors, hospital and all facilities available.
TANKERS: See Table.
FRESH WATER: Available at most berths.
FUEL: Marine gas oil and diesel oil readily available, ex-wharf or delivered by barge.
CONSULS:

Austria
Belgium
Canada
Colombia
Denmark
Finland
France
Germany (Federal Republic)
Italy
Japan
Korea
Norway
Sweden
Switzerland
United Kingdom
Yugoslavia

REPAIRS: All marine repairs can be effected. Dry dock 730 ft. length at Lorain, Ohio.
GENERAL: Refer to "St. Lawrence Seaway" for important general information.
AUTHORITY: Cleveland-Cuyahoga County Port Authority.

COOS BAY, Oregon: 43.22 N. 124.13 W.

DOCUMENTS: Local Port Authority does not require any documents from merchant vessels entering this harbour. This does not preclude United States Customs requirements for documents.
PILOTAGE: No specified amount of advanced notice of ETA required. Radio contact may be made on frequency 8182, also on frequency 2182. Most used frequency is VHF Channel 16. Pilot will be taken on board at entrance of Coos Bay channel. No designated anchorages for vessels awaiting a Pilot.
ANCHORAGES: Only anchorage in Coos Bay is South of buoy 23. Limiting draft 35 ft.
RESTRICTIONS: In November 1978 the inner channel will be 35 ft. depth.
MAX. SIZE: Max. permissible length is 725 ft. Breadth 110 ft. A 2 ft. clearance under keel is considered necessary for safe navigation. Vessels entering Coos Bay from sea draw down about 0.166 in. per foot of draft because of difference of density.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Pilots, Agents and stevedores monitor VHF Channel 16.
TUGS: Pilot vessel acts as Tug. Emergency small harbour tugs available and ship's lines generally used.
BRIDGES: 2 bridges cross the main ship channel. The Southern Pacific railway drawbridge 9 miles from the entrance and the Coast highway bridge 9.6 miles from the entrance. Clearance height of the highway bridge is 149 ft. in the centre of the span at MLW. Clearance width of swinging railway bridge 194 ft.
BERTHING: *Note:* All berths with the exception of oil berths will be dredged to 35 ft. by January 1st, 1979.

Cape Arago Dock: Length 504 ft. Depth alongside at MLW 22 ft. 6 in. (West end) and 25 ft. (East end). No dock cranes available. Fresh water available. Distance from entrance 5 miles.

Roseburg Lumber Co. Dock: Length, 635 ft. Depth alongside at MLW 35 ft. No fresh water available. Distance from entrance 8 miles.

Ocean Terminals Dock: Length, 400 ft. Depth alongside at MLW 33 ft. No dock cranes available. Fresh water available. Distance from entrance 11 miles.

Weyerhaeuser Dock: Length: (Lumber Dock) 1,433 ft. (Wood Chip Dock) 694 ft. Depth alongside at MLW 30 ft. No dock cranes available. Fresh water available. Distance from entrance 12 miles.

Fibrex and Shipping Co. Dock: Length of floating walkway 700 ft. Depth alongside at MLW 32 ft. Wood chip loaded by pneumatic pipe. Fresh water available. Distance from entrance 12.5 miles.

Bayshore Dock; Length 504 ft. Depth alongside at MLW 30 ft. No dock cranes available. Fresh water available. Distance from entrance 13 miles.

Dolphin Terminals: Vessels moor to dolphins adjacent to apron 60 ft. long and 26 ft. wide which is joined to the shore by a causeway length 190 ft. and width 12 ft. Depth alongside at MLW 30 ft. Fresh water available. Distance from entrance 13 miles.

Central Dock: Length 1,348 ft. Depth alongside at MLW 30 ft. No dock cranes available. Fresh water available. Distance from entrance 13.5 miles.

Portland Dock: Length 576 ft. Depth alongside at MLW 33 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

Coos Bay Dock: Length 1,326 ft. Depth alongside at MLW 30 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

STEVEDORES: Should have minimum of 48 hours to arrange gangs. Also see "Radio".
MEDICAL: Advance notice of required medical attention is desirable, in order to expedite use of ambulance, if necessary.
TANKERS: 2 tanker berths, Standard Oil and Union Oil Co., draft 30 ft. Tankers discharge into tank farms. Union Oil Co. is the bunkering Agent.
FRESH WATER: Available. Cost per ton is negotiable.
FUEL: 24 hours advance notice desirable, both bunker and diesel fuel available.
DEVELOPMENTS: Depth of channel at entrance 40 ft. Inner channel, to head of channel 30 ft. It is expected entrance channel to be dredged to 45 ft., inner channel to depth of 35 ft. (35 ft. channel will be completed in November 1978). An additional anchoraged will be installed, directly East of beacon 17.
GANGWAY/DECK WATCHMEN: Service of watchman at discretion of ship's master.
OPENING/CLOSING HATCHES: Normally by stevedores.
IDENTIFICATION CARDS: Not required by local authorities.
CONSULS: None.
REPAIRS: Only minor deck and engine repairs possible.
DRY DOCKS: Largest dry dock handles vessels not exceeding 125 ft.
REPATRIATION: Repatriation through local Customs and Immigration office.
AIRPORT: All docks within 5 miles of airport. Airport served by regular airlines.
TIME: GMT minus 8 hours, clocks advanced 1 hour on 1st May, clocks retarded 1 hour, 1st November.
HOLIDAYS: All legal holidays observed, plus state-wide elections. Cargo work through negotiations with stevedore contractors.
POLICE/AMBULANCE/FIRE: Police: Coos Bay 269-1181, North Bend 756-3161; Ambulance 756-3234; Fire Coos Bay 267-4123, North Bend 756-6111.
SHORE LEAVE: Crew members allowed ashore except when Federal directives may be applied to a specific vessel.
DELAYS: No delays in berthing, loading or discharging, or bunkering can normally be expected.
AUTHORITY: Administrator and Harbour Master, Port of Coos Bay.
AGENT: See "Portland", Oregon.

CORDOVA, Alaska: 60.33 N. 145.46 W.

Located at S.E. side of Prince William Sound. Open harbour year round.
APPROACHES: Via Prince William Sound.
DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pick-up point is Sheep's Point. Prior arrangements required.
MAX. SIZE: Recommend max. draft 25 ft. Tides: diurnal range 12.4 ft. Tide runs parallel to dock. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Good holding ground. Mud bottom between Spike Island and Municipal dock.
TUGS: Limited availability. Prior arrangements need to be made.
BERTHING: Berthing Permit required. Advance notice of 48 hours requested.

Municipal Dock: 18 ft. deep, 400 ft. long, 72 ft. wide. Open storage – 300 ft. × 45 ft. One 140 ton P & H mobile crane.
STEVEDORES: ILWU No. 66, Box 416, Cordova, Alaska, 99574. Telephone 907-424-7224.
REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.
WATER: Available.
FUEL: No bunker "C" available.
MEDICAL: 22-bed hospital and a medical clinic, with 2 doctors, 1 dentist.
CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage, Alaska.
TRANSPORTATION: Regular air service, Charter air Service, Ferry to Valdez.
TIME: Alaska Standard.
POLICE/FIRE/AMBULANCE: Police telephone 907-424-3673; Ambulance/Fire telephone 907-424-3232.
AUTHORITY: Port Director.

CORPUS CHRISTI, Texas: 27.48 N. 97.23 W.

(See Plan Book)

PORT LIMITS: Corpus Christi's port limits include all of Nueces County, which has been officially designated as Nueces County Navigation District No. 1. The Corpus Christi turning basin, Avery Point turning basin, Chemical turning basin, Tule Lake turning basin and the Viola turning basin are interconnected by the Industrial Canal, the Tule Lake Channel and the Viola Channel and constitute the Corpus Christi Main Harbour. Other Bay points included in the port of Corpus Christi area are: Harbour Island, the North end of Mustang Island, near the inner end of the Aransas Pass entrance, and Port Ingleside and La Quinta along the route of dredged deep-water channels on North side of Corpus Christi Bay; and the Rincon Barge Canal System.

DOCUMENTS:
3 copies Cargo Manifest (Forms 7527–A or 7527–B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Form 1304).
2 copies Stores List (Form 1373).
2 copies Passenger List (Form I.–418).
2 copies Crew List (Form I.–418).

Customs boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Customs, 2 copies Form 1300).
General Declaration (2 copies Form 1301).
All Foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Pilot boards off Port Aransas.
RESTRICTIONS: No restrictions, 24 hour service. The port of Corpus Christi is situated on the West side of Corpus Christi Bay, in South-western Texas. Port facilities at Corpus Christi lie along a 9.5 miles stretch of dredged channels and basins about 18 miles from Aransas Pass entrance at the Gulf of Mexico, Channel depth 40 ft., width 400 ft.

Turning Basins: 3 turning basins in Main Harbour are each minimum 1,000 ft. wide and more than 1,000 ft. in length.
MAX. SIZE: Cargo vessels: 39 ft. draft. Tankers 39 ft. draft. (A tanker with a draft of 45 ft. 9 in. has docked). Harbour Island has tanker docks with 45 ft. draft. Also see "Berthing".

Maximum size tanker to date:

"Overseas Natalie"	L. 860 ft., B. 104.5 ft. L.D. 45 ft. 9 in. d.w.t. 72,254.
"Scandia Team"	L. 840 ft. B. 128 ft. L.D. 39 ft. 8 in. d.w.t. 108,000.
"Manhattan"	L. 1,005 ft. 6 in. B. 132 ft. 6 in. M.D. 52 ft. 9.75 in. d.w.t. 114,668.
"Intisar"	L. 886 ft. B. 142 ft. L.D. 56 ft. d.w.t. 140,999.
"Resolute"	L. 994 ft. B. 140 ft. L.D. 55 ft. 7 in. d.w.t. 150,900.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Brownsville Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: KLC ITT-Radio-Arcadia, Texas. KLC RCA-Radio-Galveston, Texas.
VHF: KKQ 769 – Harbour Master – Channel 12 and 16. WR 8879 – Aransas-Corpus-Christi Pilots Channel 12 and 16. KVP 384 – Harbour Tugs – Channel 12. U.S. Coast Guard – Channel 16.
TUGS: Tug assistance available. Tugs join vessels berthing at Harbour Island in jetty channel. Tugs accompany vessels entering Inner Harbour outside Corpus Christi Harbour Bridge.
BERTHING: The Corpus Christi Turning basin is over a mile long and 1,000 ft. wide. There are 4 additional basins in main harbour, which extends Westward from Corpus Christi Harbour Bridge for 9.5 miles. The water in all basins, channels and canals is 40 ft. deep, enabling port to handle largest merchant ships operating in Gulf trade.

Depth alongside docks:

Southside Docks 1–8	32 ft.	Northside Dock 9, 10 & 11	32 ft.
Southside Docks 14 & 15	36 ft.	Bulk Materials Dock	38 ft.

Note: Staging area back of cargo docks 14–15 for storing containers, vehicles, etc.
Inner Harbour – Public Docks; The length limit indicator is not of necessity the max. length for a vessel as larger vessels can berth if adjacent berth is not occupied.

Cargo Docks No.	*Length Limit ft.*	*Max. Draft ft.*
1 – 2	700	28
3 – 6	1,300	29
8	600	28
9	750	30
10 – 11	700	28
12	700	19.5
14 – 15	1,000	29
Bulk Materials Dock		Max. Length 835 ft.
Public Grain Elevator Dock		Depth 34 ft.

Inner Harbour – Private Docks:
PPG Industries Inc., Cargo Dock: Length of pier 450 ft. Length of Head 100 ft. Depth, East-side 30 ft. West-side 27 ft. and Head 34 ft. Producers Grain Port Terminal Dock: Depth 41 ft. Lone Star Cement Corp. Dock: Slip dredged to 14 ft.
Outside of Inner Harbour – Private Docks:
Dupont Barge Wharf No. 1: Dredged to 14 ft.
Dupont Barge Wharf No. 2: Dredged to 20 ft.
Reynolds Metals Co. Docks: Bauxite Unloading Pier dredged to 40 ft. Alumina Loading Dock dredged to 38 ft.
TANKERS: Between Corpus Christi Turning Basin and Viola Basin are 12 public and 6 private Oil Docks, some capable of berthing tankers of 150,000 d.w.t. capacity.
Inner Harbour – Public Docks:

Oil Dock	No. 1	Length Limit	800 ft.	Max. Draft	33 ft.
	No. 2*	Length Limit	350 ft.	Max. Draft	28 ft.
	No. 3**	Length Limit	430 ft.	Mid Depth	25 ft.

	No. 12*	—	—	Min. Depth	9 ft.

*Limited to barge operations. **Exclusively for barges. †Larger vessels may be berthed when adjacent berth not occupied.
Inner Harbour – Private Docks:
Mobil Oil Dock: Limitations not known.
Southwestern Refining Co., Oil Dock No. 3: Depth at MLT 41 ft.
Southwestern Refining Co., Oil Dock No. 2: Depth at MLT 41 ft.
Southwestern Refining Co. Oil Dock No. 1: For barges, depth 10 ft.
Champlin Petroleum Co.: Oil Dock No. 1: Depth at MLW 40 ft.
Champlin Petroleum Co.: Oil Dock No. 2: For barges, depth 16 ft.
Champlin Petroleum Co.: Oil Dock No. 3: Depth at MLT 40 ft.
CPC International, Inc., Liquid Cargo Dock: Depth at MLT 40 ft.
Outside of Inner Harbour – Private Docks:
American Petrofina: Length Limit 750 ft. Slip depth 53 ft. below MLT (Reported 1974).
Exxon, Oil Dock No. 1: Depth 40 ft at MLT.
Exxon, Oil Dock No. 2: Depth 14 ft. – 22 ft. at MLT.
Sun Pipe Line Co.: Depth 40 ft. at MLT.
Dupont Ship Wharf: Dredged to 39 ft.
CARGO GEAR: *Heavy Lift facilities:* Derrick at Cargo Dock 14 has 100 tons capacity at 53 ft. radius, can handle containers, 40 ft. or larger. Locomotive cranes (5) 30 tons capacity.

Facilities are available for all types of liquid cargo, dry bulk and general cargo, except cannot handle restricted cargo such as ammunition and explosives.
BRIDGES: Corpus Christi Harbour Bridge; vertical clearance at MHW is 138 ft.

Upper Harbour Lift Bridge: Vertical clearance at MHW when raised is 138 ft.
FRESH WATER: Available.
FUEL: 1,500 Redwood, 1,000 Redwood – 24 hour notice.

Bunker C, Marine diesel, Light diesel – Pipe-line or Barge, Truck.
FIRE PRECAUTIONS: No working barges alongside (except bunkering barges) and normal precautions as shut down cargo operations during lightening storm, etc.
SURVEYORS: American Bureau of Shipping and J. E. Orrell, Lloyds Sub-Agency.
GANGWAY/DECK WATCHMEN: Not necessary. If recommended $4.00 per hour.
HATCHES: Hatches may be opened by crew before entering harbour, after the ship has entered harbour it is carried out by stevedores.
CUSTOMS ALLOWANCE: 300 cigarettes per man. 1 quart liquor per man.

Mooring facilities: Berth No. 1 is a 6-point mooring and is used for transfer of refined stock, primarily lube oils and chemical. The unlighted spare buoys mark the offshore end of the pipe-lines, which carry the telephone line, and is located approximately 1 mile East of the sea buoy. There are also 3 hose marker buoys, one for the end of the chemical hose string and one for the end of each lube oil strings. The chemical hose string consists of seven 8 in. diameter × 25 ft. lengths. The lube oil strings are a parallel set of seven 8 in. diameter × 25 ft. lengths which are connected at the ship-end by a piping manifold which the ship provides.

Berth No. 2 is a 5-point mooring and is used for transfer, of light oils (primarily gasoline and jet fuel). It is located approximately 700 yards N.W. of Berth No. 1.

Berth No. 3 is a 7-point mooring used for the transfer of fuel and crude products. It is located approximately 750 yards West of Berth No. 2, and 2,400 yards offshore.

Berths Nos. 2 and 3 are each equipped with 2 unlighted spar buoys and a can buoy. The spar buoy closer to land is the pipe-line spar to which is fixed a land-line telephone cable providing communication between the vessel's deck to the land. The seaward spar buoy marks the location of the offshore end of the submarine hose when the hose is on the bottom. A can buoy, or hose marker buoy, is connected to the end of the submarine hose by a chain. The submarine hose string in Berth No. 2 consists of nine 12 in. diameter×25 ft. lengths of which one is over-the-rail, connected to the seaward end of a 16 in. submarine pipe-line leading to the shore facility. The submarine hose string in Berth No. 3 is connected to the seaward end of a 26 in. submarine pipe-line and a 12 in. line for circulation, by seven 16 in. diameter × 25 ft. lengths of hose followed by one 12 in.×25 ft. length hose and one 12 in. diameter × 30 ft. long over-the-rail hose.

Berth No. 4 is equipped with 2 unlighted spar buoys and 2 unlighted can buoys. The inshore spar buoy marks the end of the 36 in. submarine line and 14 in. circulation line. Two hose strings come off the main 36 in. submarine line, the Northern string of which is 10 ft. North of the centre line of the 36 in. main and of the other hose. Each hose string consists of 5×35 ft. long lengths of 20 in. hose, followed by a reducer and then 2×25 ft. long lengths and 1×30 ft. long over-the-rail length of 16 in. hose. The end of each hose string is connected to a can buoy by a chain. Berth No. 4 is not equipped with cable phone service but relies instead on radio-telephone.

Hose Handling: The vessel will be expected to have suitable equipment on deck and ready for making the connection to the submarine hose.

Berths No. 1 and 2 require lifting capacity of at least 5 long tons.

Berth No. 3 requires a lifting capacity of at least 7 long tons for vessels up to 30,000 d.w.t. and at least 8 long tons for vessels over 30,000 d.w.t.

Berth No. 4 requires a lifting capacity (calculated load) of 10 long tons.

Procedure for discharging; At the completion of most cargo discharges the vessel will be required to receive a 150 bbl. hose wash displacement of cutter stock or gas oil. This is to prevent the hose from plugging while not in use.

Product transfer rates, Pressure and temperature: Lubricants and chemicals are transferred at Berth No. 1 at varying rates depending on the particular product, the maximum rate being approximately 2,100 bbls.p.h. Hoses are rated to 275 p.s.i.

Gasoline and jet fuel loaded at Berth No. 2 are usually transferred at 7,000–12,000 bbls.p.h. with a pressure at the ship's rail not to exceed 50 p.s.i. Gasoline and jet fuel are discharged at Berth No. 2 with a pressure not to exceed 125 p.s.i. at the ship's rail. Hoses are rated to 150 p.s.i.

Fuels and crude are loaded at Berth No. 3 at rates to 20,000 bbls.p.h. No. 3 Berth hoses are heavy duty 275 p.s.i. rated. Vessels are expected to maintain discharge pressure of at least 125 p.s.i. at the ship's rail and/or a flow rate of 20,000–25,000 bbls.p.h.

No. 4 Berth hoses are heavy duty 275 p.s.i. rated, and the system has a normal working pressure of 180 p.s.i. On this 2 hose system, vessels are expected to maintain flow rates of 50,000–60,000 bbls.p.h. Because of high velocity hose damage, the maximum flow through a single 16 in. hose will be limited to 32,000 bbls.p.h.

Sumatran crude cargo will not be accepted by the facility unless the ship's average tank temperature is at least 125° F. However, the average temperature for Sumatran crude should not exceed 130° F. in order to avoid excessive vaporization of the light fractions in the crude. Heavy viscous residue fuel cargo will not be accepted from a ship unless the ship's average tank temperature is at least 130° F.

MEDICAL: Several hospitals are available in the area. US Coast Guard or local ambulance service may be expected to know what hospital is best suited to handle a particular emergency.

FRESH WATER: Potable water is not available at this mooring. Water barge service is not available in the area. Closest supply is the harbour at San Pedro.

FUEL: Bunker fuel for ship's use is not available in the moorings of the El Segundo Marine Terminal, but may be arranged through Chevron Shipping, San Pedro.

BALLAST: No ballast can be accommodated at the Terminal.

CONSULS: Consulates of most of the maritime Nations are maintained in both the cities of Los Angeles and Long Beach.

AIRPORT: The Terminal is located approximately two miles South of Los Angeles International Airport.

TIME: Standard Time along the entire West Coast of the United States is GMT − 8 hours. Daylight Saving Time is used all along the coast. Clocks are advanced 1 hour in Summer.

WINDS/TIDES/CURRENTS: *Winds:* Westerly, onshore winds usually prevail. Gales are very rare in Santa Monica Bay, but the local thermal winds blowing from a Northerly direction sometimes necessitate interruption of transfer operations and require moving a ship from the mooring to anchor.

Northerly winds occur during the period from October through May.

In the Autumn and Spring, duration averages 4 to 6 hours

In November, December and January, duration averages 10 hours.

Velocities up to 52 knots have been recorded.

Tides and currents: Normal tides of approximately 6 ft. pose no significant problems in this open roadstead.

Currents run unpredictably North or South along the coast in the vicinity of the Terminal. The current is most commonly from North to South and is stronger in Summer than in Winter.

TELEPHONE: Each berth is equipped with telephone service. For berths No's 1, 2, and 3 it is via cable which connects direct to the refinery system and then terminates at the inshore spar buoy at each of the respective moorings. In the case of berth No. 4 it is via radio-telephone which goes directly into the refinery PBX system. The telephone instrument is delivered to the ship by the mooring launch at the same time as the hose connecting equipment is delivered.

To call El Segundo Terminal, dial 2233.

To call local outside numbers within the Los Angeles area, dial 9 followed by the 7-digit number.

To call long distance, dial 0 between 0700 and 1800 or dial 2505 between 1800 hrs. and 0700 hrs.

The vessel may be reached from outside by calling the El Segundo Refinery at (213) 322–3450 and requesting extension 2831, 2832, 2833, or 2955 for Berths 1, 2, 3 or 4 respectively.

GENERAL: *Supplies:* Modest quantities of supplies may be taken aboard while at the moorings if absolutely necessary, provided the Mooring Master gives prior approval. This practice is discouraged in view of the sea swell and wind conditions that can develop in the open roadstead of the moorings, as well as the long distances to normal marine supply facilities.

Launch service: A company operated launch may be chartered for vessel's use through the vessel's Agent at the option of the owner's representative. This launch operates between the moorings and the Port-O-Fino Dock in King Harbour, Redondo Beach, on a published 4 hours schedule which may be obtained from the Mooring Master. A one-way trip takes approximately 40 minutes. There is a waiting room for use by all tanker personnel awaiting the launch. The waiting room is in the second building facing the yacht moorings. Blue arrows are painted on the side walk between this waiting room and the launch ramp, to assist in identifying the waiting room.

Pilot Ladder: The vessel shall rig a safe and secure Pilot ladder for the Mooring Master and Government officials to use in boarding and leaving the vessel.

Air Pollution: Any vessel showing visible smoke in excess of 3 minutes is in violation and may expect to be cited and required to pay substantial fines.

Dumping of garbage: Dumping of rubbish or garbage overboard within 50 miles of the coastline is prohibited.

ERIE, Pennsylvania: 42.10 N. 80.05 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: Not compulsory. Seaway Pilots will assist if required.

RESTRICTIONS: Navigation season from 14th April to 26th December approx. The port is connected to Lake Erie by an entrance channel, depth 28 ft. Vessels size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Quarantine Station.Quarantine procedure undertaken at Quebec City for incoming vessels from foreign ports.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING:

City of Erie Grain Elevator: Owned by the City of Erie, leased by the Port Authority, berthing length 980 ft., depth of water alongside 24 ft., 2.5 million bushel capacity.

Erie Marine Inc. (subsidiary of Litton): New ship assembly yard with graving dock (largest on Great Lakes), available for dry dock repairs.

Ore Dock: 1,000 ft. long, 26–27 ft. of water alongside. The ore dock has 2 clam shell buckets, unloaders and 1 ore bridge. 400,000 ton storage pad available for lease.

Port Authority East Bay Industrial Site: 75 acres available for sale or lease.

Erie International Marine Terminal: Leased to Codan Corporation, stevedores for the Port of Erie; 1,400 ft. long, with 28 ft. of water. Terminal used for bulk and general cargo; 23 acres; 750,000 sq. ft. of warehousing and transit sheds with truck and rail loading facilities; 140 and 125 ton mobile cranes equipped with

magnets, buckets and gear for heavy lifts, also 300 ton stiff leg crane. Terminal served by ConRail with reciprocal switching for N&W and B&LE railroads. A total of more than 100 acres of waterfront property is available where an industrial complex may be constructed.
DENSITY: Fresh water.
MEDICAL: All facilities available.
FRESH WATER: Obtainable by pipe-line at all docks.
FUEL: All grades available by pipe-line at all docks.
REPAIRS: Local shipbuilding company can handle most repairs. Dry dock available.
AUTHORITY: Erie-Western Pennsylvania Port Authority.

EUREKA, California: 40.48 N. 124.10 W.

(See Plan Book)

DOCUMENTS: In addition to the documents detailed below, Agent will present to Master normal Customs forms to be signed, such as Master's Oath, Permit to Lade, Inward & Outward Manifest, etc. These forms will be filled out by local Agent and Customs Broker and presented to local Customs house when entering and clearing vessel:

Foreign Flag Vessels: I. Entering from another U.S. port:
3 Crew Lists.
3 Passenger Lists (only if passengers on board).
3 Curio Lists.
3 Store Lists.
Permit to Proceed (issued at last U.S. port).
Travelling Manifest (only if there is foreign cargo on board).
Ship's Register.

II. Entering from a foreign port:
3 Crew Lists.
3 Passenger Lists (only if passengers are on board).
3 Curio Lists.
3 Store Lists.
Travelling Manifest.
Permit to Proceed.
Ship's Register.
Ship's tonnage tax Certificate.
Clearance from a foreign port.

PILOTAGE: Telegraphic address of Pilot station "Humbar". 24 hours advance notice of ETA; in case of change in ETA give minimum 4 hour notice. Contact pilot boat on VHF 156.8 (Channel 16) or radio watch on 2182. Radio watch is maintained 2 hours prior to arrival at sea buoy on Channel 16. Working Channels are 6, 13 and 18A.

No Pilot boat on station. Local Pilots use tug "Thor" length 65 ft. 800 h.p. Tug colours: black funnel, red and white superstructure and black hull. As no Pilot boat on station, sound signals not required. Visual international flag and light signals observed. Pilot will board vessel within 1 mile radius North, South and West of sea buoy. Sea-buoy located 1.4 miles from end of North jetty lined up with range lights bearing 105 degrees true.

Specific requirements: *(a)* Pilot ladder with spreaders in accordance with Solas regulations, and 9 ft. above water. *(b)* At night – brilliant light to illuminate ladder. *(c)* Recommended anchorage outside Humboldt Bay located 1 mile South of sea-buoy in 15 fathoms of water.

ANCHORAGES: Inside harbour, weather permitting. Light draft vessel (22 ft. or less) South of Fairhaven Dock (Crown Simpson) and West of Standard Oil Dock. Deep draft vessels (22 ft. to 32 ft.) will anchor North of Union Oil Terminal and South of Samoa Channel entrance buoys.
RESTRICTIONS: Humboldt Bay is a 24 hour port; restrictions if any would depend upon manoeuvrability and horsepower of vessel during peak tide. Range of tide normally 8 ft. extreme cases 10 ft.
MAX. SIZE: Max. LOA 740 ft. max. beam 115 ft. Max. draft 35 ft.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Send cables through one of the following stations:

ITT World Communications, Inc. – San Francisco Marine Radio Station KFS.

RCA Global Communications – San Francisco Marine Radio Station KPH.

TUGS: 3×800 h.p. tugs available, 1 tug acts as pilot boat, other tug joins vessel when in harbour. Tug lines are normally used, occasionally a ship's line is used. No extra charge assessed for use of tug's line. Depending upon size of vessel and weather conditions, Pilots will use 1 or 2 tugs.
BERTHING: No specific requirements relating to berthing; normal procedures prevail. Vessel normally docks stemming the tide.

Presently available berths at Eureka as follows:
Crown-Simpson Pulp Co.
Eureka Forest Products
Louisiana-Pacific Corporation.
Humboldt Dock & Shipping Co.
Kramer Lumber Sales
Olson Terminal
Standard Oil of California
Union Oil of California
North Coast Exporting Co.

Harbour channels maintained to 35 ft. zero tide. Most of berths at above-mentioned docks also maintained at 35 ft. zero tide; however, some occasionally fill in and recommended check with Agent as to depth available at specific dock which vessel intends moor and load.
STEVEDORES: 10 local gangs available. Groups ordered at 0630 hrs. in the morning for both day and night gangs. Therefore essential that local Agent or stevedore company receives accurate ETA by 0600 hrs. in the morning. Normally, vessel will advise arrival sea-buoy with a 24-hour ETA and correct ETA at a later time if necessary. The basic commodities exported from Eureka are woodpulp, logs and lumber.

Westfall Stevedore Co. Cable Address: Westfall, Eureka. Tel. (707) 443-5688.

MEDICAL: Not necessary for Agent to receive advance notice of required medical attention unless ambulance and doctor are required on arrival. 3 hospitals in immediate area. Inoculation and vaccination certificates should be up-dated.
TANKERS: 2 tanker berths available: Standard Oil of California – deepest draft 35 ft. at zero tide. Union Oil – deepest draft 35 ft. at zero tide. Normally only Company tankers use own facilities. Facilities privately owned and are not available for bunkering other vessels.
DENSITY: Pure salt water. No fresh water allowance on any tide.
FRESH WATER: Available all berths. Delivery by hose. Rate of delivery: 10 t.p.h.
FUEL: If bunkers required, Agent must go through major contractors, who in turn will inform their local supplier of requirements. Generally speaking bunkers are only supplied to vessels on an emergency basis in limited quantities. The bunkers usually diesel grade and delivered by truck on a prearranged schedule.
DEVELOPMENTS: Deepen North bay channel to 35 ft. and widen bends in channel at channel miles 0.74 and 2.6. Deepen Samoa channel and outer reach of the Eureka channel to 35 ft. Provide an anchorage area in North bay, at a suitable location between jettied entrance channel and Gunther Island, 35 ft. deep, 1,200 ft. wide and 1,200 ft. long. (The developments were completed on July 1st, 1978).
GANGWAY/DECK WATCHMEN: Services of gangway guards available if required by ship.
OPENING/CLOSING HATCHES: Normally stevedores' work unless done prior to docking. Vessel's crew may assist in opening and closing hatches, if hatches require special attention.
CERTIFICATES:
Ship's register.
Load-line Certificate.
valid Derat Certificate.
Cargo Gear Certificate.
Tonnage Tax Certificate and all other usual certificates required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes and 1 lb. of tobacco. Wine and/or Spirit, 1 bottle (approx. 1 quart).
CARGO GEAR: Must be in good order and safe operating condition and all cargo gear certificates must be valid.
IDENTIFICATION CARDS: Alien seamen require Crewman Landing Pass (U.S. Form I-95).
CONSULS: None. Nearest consuls at San Francisco.
REPAIRS: Small welding jobs, and minor machine work only. Major repairs normally carried out in San Francisco.
DRY DOCKS: None.
REPATRIATION: Normally done in conjunction with San Francisco, Portland, Los Angeles or Seattle Agent.
AIRPORT: Airport located approximately 20 miles North of Eureka. Limousine service available. Major airline, Air West. At present 3 flights per day to San Francisco and 1 flight per day to Portland.
TIME: Eureka local time is Pacific Standard Time and is GMT minus 8 hours. However, from the last Sunday in April to the last Sunday in October, Eureka is on Daylight Saving Time.
HOLIDAYS: No work performed on following holidays: New Year's Day (January 1st); Labour Day (1st Monday in September); Thanksgiving Day: Christmas Day (December 25th).
POLICE/AMBULANCE/FIRE: Eureka City Police 442-4545; Eureka City Ambulance 442-4551; Eureka Fire Department 443-5656; Humboldt County Sheriff Department 443-5671; Arcata Fire District 822-2424; Humboldt Fire District No. 1 442-1212.
TELEPHONES: No arrangements for placing telephones on board; however, there are pay phones nearby at each dock as well as phones in nearby offices.
SERVICES: Specific services such as tank cleaning, compass adjusting, tank washing,etc., are not normally performed in the port of Eureka and are usually performed in one of the close major ports such as San Francisco; however, there are facilities available for minor repair.
SHORE LEAVE: Crew members allowed ashore unless restricted for Customs or Immigration reasons.
DELAYS: Berthing delays seldom incurred primarily due to the fact that the prime Agents are always in contact with the local Agent at Eureka informing them of vessel's ETA and prime Agent is always advised with regard to all arrivals and possible berth conflicts at this port.
AUTHORITY: State of California, Board of Harbor Commissioners for Humboldt Bay.
AGENT: See "San Francisco".

EVERETT, Washington: 47.59 N. 122.13 W.
(See Plan Book)

DOCUMENTS, PILOTAGE, etc.: Refer to "Tacoma".
PILOT: Boards off Port Angeles pilot station.
ANCHORAGE: Unlimited deep water anchorage in Possession Sound.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, join vessel off berth. 17 tugs, 150 to 900 h.p.
BERTHING:

Pier No. 1 South: Useable berth length 600 ft.; Approach water depth 90 ft.; Water depth at pier 35 ft. MLLW; Plank and piling; 20 ft. Apron; Transit shed with 57,960 sq. ft. on pier; Access by road, barge and rail.

Pier No. 1 North: Useable berth length 520 ft.; Approach water depth 90 ft.; Water depth at pier 40 ft. MLLW; Multi-purpose 35-ton bridge crane (Containers, bulk ores); Rail spur on dock; Plank and piling; 40 ft. Apron; Transit shed with 57,960 sq. ft. on pier; Access by road, barge and rail.

Pier No. 3 South: Useable berth length 750 ft.; Approach water depth 90 ft.; Water depth at pier 40 ft. MLLW; Cement piling and blacktop surface; 120 ft. Apron; Access by road and barge.

Pier No. 3 North: Useable berth length 450 ft.; Approach water depth 90 ft.(+); Water depth at pier 40 ft.; Plank and piling; 15 ft. Apron; Access by road, rail and barge; Rail spur on dock.

Pier "B": Useable length 450 ft.; Approach water depth 30 ft.(+); Water depth at pier 40 ft.; Plank and piling; 50 ft. Apron; Access by road and barge.

Pier "D": Useable length 500 ft.; Approach Water depth 30 ft.; Water depth at pier 50 ft.; Two 35-ton Whirley cranes; Plank and piling construction; 45 ft. Apron; Access by road and barge.

Pier "E": Useable length 450 ft.; Approach water depth 30 ft.; Water depth at pier 40 ft.; Plank and piling construction; 45 ft. Apron; Access by road and barge.

STEVEDORES: 11 local gangs, additional gangs may be imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: Doctors and local hospital available.
DENSITY: Changes daily as port is at the mouth of a fresh water river.
FRESH WATER: Available at wharves.
FUEL: Available by barge from Seattle.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
AIRPORT: Seattle–Tacoma International Airport is 45 miles South of city of Everett on excellent highway. Driving time is approx. 45 minutes.
POLICE/AMBULANCE/FIRE: Port of Everett Security: 259–3164; Everett City Police: 259–8711; Everett City Fire Dept.: 252–1111; Ambulance Service: 252–1234.
TELEPHONES: Will be placed on board vessel on request. Charges are made only for calls made. Arrangements should be made through ships Agent.
SHORE LEAVE: Crew members are able to visit Everett at all times.
AUTHORITY: Port of Everett.
AGENT: See "Seattle".

FALL RIVER, Mass.: 71.10 W. 41.42 N.

DOCUMENTS: If first port of call in U.S., 2 complete Custom's Manifests describing all cargo on board and ports of discharge. Also 1 Cargo List for Fall River cargo; 3 Crew's Lists; 3 Stores Lists; 3 Curios Lists; the Ship's Register, Load-line Certificate and Tonnage Tax Certificate.
PILOTAGE: Vessel first contact ship's Agent for Pilot and tug arrangements. R.I. State Pilots Association radio call letters KDF-375 on frequency 156.9 kc/s., Channel 18. Usual Pilot pick-up is at Brenton Reef Light Tower off Newport, R.I.
RADIO: Chatham Radio or Amagansett Radio.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Tugs for N.E. Power Station met at Buoy 6; all other berths North, meet tugs at Buoy 10. Tugs provide own lines at no extra charge.
BERTHING: Vessels berth at State Pier. Depth alongside 35 ft.
BRIDGES: All bridges have 135-ft. clearance with exception of Brightman Steel Bridge at approach to Montaup Electric Co. and Shell Oil docks. This bridge has a draw clearance of 97.5 ft. and passage allowed for vessels with less than 75 ft. beam. No unusual requirements. Practice is to depart on flood tide. (See "Developments".)
TANKERS: Berth at Shell Oil Docks, Depth alongside 32 ft.
FRESH WATER: Available at most berths. State Pier delivery is at 125-pounds pressure.
OPENING/CLOSING HATCHES: Usually performed by stevedores.
CERTIFICATES: All certification of vessel, safety conditions and radio facilities should be available for U.S. Coast Guard.
CARGO GEAR: No additional safety requirements.
TELEPHONES: Available at most berths. Contact Agents.
DEVELOPMENTS: Plans for construction of a new 300-ft. wide draw bridge to replace the existing Brightman Street Bridge. This will mean unobstructed use of the entire port area.
SHORE LEAVE: Permitted, but consult Agents.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.95. issued for the same vessel.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.
HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriots' Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th); or any day celebrated in lieu thereof.
AUTHORITY: Fall River Port Authority.

FERNDALE, Washington: 48.49 N. 122.43 W.

Mobil Oil Tanker Terminal

DOCUMENTS/HEALTH/etc.: Refer to "Seattle".
PILOTAGE: Compulsory. Pilot boards at Port Angeles.
TUGS: Tug escort required if vessel is loaded and is larger than 40,000 d.w.t. Tug horsepower must be 5% of d.w.t. Available up to 3,000 h.p. Additional tugs ordered from Seattle if required.
RESTRICTIONS: Vessels enter any hour day or night.
MAX. SIZE: Length 1,000 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: Terminal used for crude and product discharging. Vessels berth alongside finger pier, lines to quick release hooks. Inner berth for barges only. Outer berth 900 ft. long, depth alongside 40 ft. at MLW. Dirty ballast water 3,000 long tons with prior notification.
AGENT: See "Seattle".

FORT PIERCE, Florida 27.27 N., 80.19 W.

SHIPMASTER'S REPORT: January 1979.

PILOTAGE: Compulsory. Pilot boards at sea buoy. Send vessel's ETA to Agents 72 hours, 48 hours and 24 hours prior to arrival. (The Master undertook berthing operations).
ANCHORAGE: Vessel anchors and awaits Pilot 0.5 mile seaward of sea buoy.
RESTRICTIONS: Vessel is able to berth and unberth during hours of darkness if the weather is clear. The leading lights are good but the channel is narrow and marked by unlit buoys. This vessel being the largest vessel to berth waited for daylight to turn and sail. Diameter of turning basin 1,000 ft. Least depth of water in the channel from sea to berth 26 ft. (dredging in progress).
MAX. SIZE: Max. draft 25 ft. (1 ft. keel clearance in the turning basin required). Range of tide 1 ft. 3 in.
TUGS: One 500 h.p. tug available. Not advisable to manoeuvre without use of tug.
RADIO: Lantana Radio.
VHF: Channels 16 and 13. Watch only maintained when vessel expected.
BERTHING: The berth is located in Fort Pierce inlet. Length of jetty 411 ft. At present only 1 berth available on the North side of the jetty. Dredging is under way on the South side. Distance from entrance to berth 3 miles.

This vessel overhung the jetty by 100 ft., all moorings were placed on the jetty and vessel lay quietly alongside. However, with a S.E'ly wind it may be difficult to keep the after end of the vessel alongside. Vessels are able to dock and undock at any stage of the tide, however, if vessels draft is over 24 ft. suggest vessels wait for high water.

CARGO HANDLING FACILITIES: There are no facilities for bulk cargoes. No quay cranes and no Ro/Ro facilities. There is sufficient mechanical equipment for handling palletised cargoes. There is no equipment or storage space for containers. An insulated storage shed is presently being built at the jetty.
FRESH WATER: Available.
FUEL: Not available in the port but could be supplied by barge from Fort Lauderdale.
MEDICAL: Doctor and hospital available.
AIRPORT: Local airport 15 miles from port, nearest international airport is at Miami.
SERVICES: Fresh provisions, laundry services, groceries and meats available.
REPAIRS: No facilities available.
GENERAL: Fort Pierce harbour is at present in the early stage of development. For many years the port has been used only for barge traffic and small craft and the inlet allowed to silt up. Over the last year a company, DNE Sales International, headed by Mr. Eagan has bought the jetty and the adjacent land for the initial purpose of exporting Florida citrus, many local plantations of which are owned by Mr. Eagan.

The jetty has been completely rebuilt, and is 411 ft. long, of solid construction with good fendering. An insulated holding shed is in the process of being built which should be completed shortly. Only the North side of the jetty has been dredged, the South side being dredged at the present.

The Stevedoring company packing sheds are all owned by DNE Sales International who also plan entrance into ship chandlery.

At present depths in the turning basin which is approximately 1,000 ft. are no more than 26 ft. and the basin is not marked at its extremities so care should be taken to swing as near as possible on the leading lights. Alongside the wharf depths are 27 ft. with soft sand bottom and in the channel the least depth is 26 ft. but there are no official surveys yet in print. The latest information on U.S. chart 11475 gives depths of 25.7 ft. in entrance range and 20.5 ft. to 22.3 ft. for Inner range, latest information in British Notices to Mariners gives 20 ft. depth, however prior to arrival I received by telex from the Agents advice that least depth was 26 ft. which was confirmed by Pilot and our echo sounder.

The buoys marking the edge of channel are unlit, although U.S. chart shows lighted buoys. When I enquired via Agents from U.S. Coastguards they *stated* they would report same and agreed with me that on a dark night they were a hazard for a large vessel, but would not commit themselves.

The tug is very low-powered but is necessary to swing the vessel, we also used the pilot launch to assist. With little water under the ship the vessel was very sluggish when turning, in strong winds this manoeuvre could be difficult.

One is aware that it is early days for this port, dredging is in progress and if all the projected improvements are carried through, including the deepening of the channel Fort Pierce will be a safe and efficient port. The controlling factor for "fruit vessels" is the length of the jetty, however if exports increase as anticipated there is a proposal to lengthen the jetty by 100 ft.

The vessel entered Fort Pierce at 0615 hrs., transitting the channel in semi-daylight. For departure the Master considered the same daylight conditions essential for safety reasons having assessed the weather and all other factors as stated.

Stevedores are good but at present lack expertise of citrus loading.

All agency and stevedoring personnel are keen, helpful and anxious to co-operate fully to promote good relations.

FREEPORT, Texas: 28.57 N. 95.21 W. (See Plan Book)

DOCUMENTS: Handled at Freeport.
PILOTAGE: VHF Channels 6, 8, 12, 13, 14, 16 – at sea buoy – Pilot Office (tel. 233-1120) – 200 West 2nd, Freeport, Texas; – Pilot boards 0.25 mile North of sea buoy. Anchor 1 mile from end of sea buoy if awaiting Pilot.
ANCHORAGES: 1 to 2 miles from end of sea buoy.
RESTRICTIONS: Depth 36 ft. at bar.
MAX. SIZE: Length 670 ft., draft 36 ft. for ships from bar to within upper turning basin, 30 ft. from upper turning basin to Public Facilities. Tide governing these dimensions – plus or minus 3 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Galveston Marine Operator.
TUGS: Join vessel at shore line. Tug's lines to be used, and no charge for use.
BERTHING: 1 hour to reach berth. Deep water terminals at Public Facilities consist of 1,250 linear ft. of deep water bulkhead wharf with 2 modern transit sheds each 400 ft. long, 150 ft. wide, and 1 berth of 250 linear ft. of deep water bulkhead wharf with transit shed of 204 ft. long and 180 ft. wide. In addition a back-up warehouse is available consisting of 60,000 sq. ft. The 2 large transit sheds and back-up warehouse have railroad tracks under cover, permitting all-weather work and preventing cargo damage.

The Navigation District owns a total of 1,106 acres of land for future Port and industrial development, 2,400 ft. of this land is situated on the Brazos River.

CRANES: Vessel is required to use own gear, shore-cranes are available in area for hire.
STEVEDORES: Obtained through Agent.
MEDICAL: Obtained through Agent and advance notice required. Doctors, hospital available.
DENSITY: 1020.
FRESH WATER: Available ex wharf at Brazos Harbor.
FUEL: All grades available by barge from Houston.
GANGWAY/DECK WATCHMEN: None required but available through Agent.
OPENING/CLOSING HATCHES: Stevedore contract.
CUSTOMS ALLOWANCE: Local Customs Agent control.
IDENTIFICATION CARDS: None needed.
CONSULS: None. Nearest at Port Arthur or Houston.
REPAIRS: Available.
DRY DOCKS: None.
REPATRIATION: Possible, through Agent.
AIRPORT: Houston Intercontinental Airport – Houston, Texas (80 road miles to Brazos Harbor; Metro Airlines – Shuttle to Lake Jackson, Texas (8 miles from Brazos Harbor).
TIME: GMT minus 6 hours. Daylight saving time starts last Sunday in April and ends the last Sunday in October – GMT minus 5 hours.
HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (Third Monday in February); Good Friday; Texas Independence Day (March 2nd); St. Patrick's Day (March 17th); Decoration Day (Last Monday in May); Emancipation Day (June 19th); Independence Day (July 4th); Labour Day (First Monday in September); Columbus Day (Second Monday in October); Veteran's Day (Fourth Monday in October); Thanksgiving Day (Fourth Thursday in November); Christmas Day (December 25th). No work on Christmas Day or Labour Day.

If any of the above holidays fall on Saturday or Sunday the following Monday will be recognized as the holiday.

POLICE/AMBULANCE/FIRE: Police 233-5434; Fire 233-2651; Ambulance Service 233-4700.
TELEPHONES: No arrangements exist for placing telephones on board.
SERVICES: Tank-cleaning facilities available locally. Compass adjusting available from Houston, Texas.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Brazos River Harbor Navigation District.

GALENA PARK, Texas: 29.44 N. 95.14 W.
Refer to "Houston".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

GALVESTON, Texas: 29.17 N. 94.50 W.
(See Plan Book)

DOCUMENTS:
1 visaed Crew List.
3 Passenger Lists.
3 or more copies of complete Manifests of Cargo for discharge at all United States ports.
2 or more copies of Manifest of Cargo for each United States port.
1 Souvenir List.
1 Stores List.
Ship's Register.
Tonnage Tax.
Load Line Certificate.
Nationality Certificate.
No health document required.

PILOTAGE: Radio to local Agent who arranges Pilot and specifies boarding time. United States Coast Guard require 24 hours notice of arrival at Galveston Bar. Contact pilot boats and pilot station on VHF Channel 12. Pilot boats marked HP No. 1, 53 ft. long; HP No. 2, 61 ft. long; HP No. 3, 106 ft. long. Pilot boats can be signalled by light in international code. Pilot taken on board at sea buoy No. 1 located 6.7 miles from Galveston.
ANCHORAGE: In Bolivar Roads, 6.7 miles inwards from sea buoy No. 1. Depths 32-34 ft.
RESTRICTIONS: Prolonged North winds can reduce water level as much as 4 ft. in Winter. Channel depth 40 ft.
MAX. SIZE: No length restrictions. Draft according to berth depth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: International Telephone and Telegraph station Galveston, call sign KLC.
TUGS: Available if required.
BERTHING:

Grain elevators	Port Richmond El. Co.	Depth alongside 40 ft.
Bulk loading	Pier 14 East	,, ,, 36 ft.
	Duval Sulphur Terminal	,, ,, 40 ft.
	Imperial Sugar Dock	,, ,, 36 ft.

Container terminal, wharf 1,000 ft. length, equipped with container crane handling 40 tons under the spreader or 60 tons with cargo hooks at 100 ft. outreach – depth alongside 40 ft.

Note: Water depths are based on MLW. Depths may be less due to siltation.

STEVEDORES: Order before 1700 for 0700 or 0800 hrs. following day. During day can be ordered at 2 hours notice. Gangs must be ordered before 1900 hrs. on Saturday for Sunday or holiday.
MEDICAL: All medical assistance available.
FRESH WATER: At all wharves.
FUEL: All grades available. Delivery only by barge from Houston.
GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.
OPENING/CLOSING HATCHES: By stevedores only.
CUSTOMS ALLOWANCE: Each man 300 cigarettes, or 100 cigars or 1 lb. tobacco; 1 quart wine/spirits.
IDENTIFICATION CARDS: Immigration form 1-95 required.
CONSULS:
Chile
Dominican Rep.
Finland
Guatemala
Haiti
Iceland
Italy
Mexico
Netherlands
Norway
Sweden
Venezuela

TIME: Central Standard Time. Daylight Saving Time effective from April to October.
HOLIDAYS: January 1st; February 22nd; March 2nd; May 30th; June 19th; July 4th; First Monday in September; November 11th; December 25th; No work on Labour Day or Christmas Day.
POLICE/AMBULANCE/FIRE: All services provided.
SHORE LEAVE: No restrictions unless detained by Immigration.
AUTHORITY: Galveston Wharves (The Port of Galveston).

GEISMAR, Louisiana: 30.13 N. 91.01 W.

East bank of Mississippi River, about 187 miles from sea.
DOCUMENTS/PILOTAGE: For all general information, refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available if required; normally not used.
BERTHING: Wyandotte Chemical Co: berth 620 ft. long, 32 ft. depth.
FRESH WATER: Available ex-wharf.
FUEL: Not available.
DENSITY: Fresh water (1000).

GOOD HOPE, Louisiana: 29.59 N. 90.24 W.

East bank of Mississippi River, about 140 miles from sea.
DOCUMENTS: For all general information, refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: South of berth in river for unlimited number of ships.
TUGS: 1 tug used for mooring/unmooring.
BERTHING: General American tank storage terminal; tanker berth, 40 ft. depth alongside. 2 × 8-in. hoses. Loading 17,000 bbls.p.h. No ballast facilities.

Norco: Shell Oil Co. 2 tanker berths 45 ft. alongside. 2 × 8-in. hoses, loading 10,000 bbls.p.h. Ballast line 12-in., max. capacity 20,000 barrels.
FRESH WATER: Available ex-wharf.
FUEL: Bunker "C" available ex-wharf.
DENSITY: Fresh water, 1000.
SHIPMASTER'S REPORT: February 1979.

Restrictions: Not allowed to take bunkers, luboils or stores from barge while alongside. Large tankers often require 2 tugs pushing all the time to keep them alongside, especially when river is in flood. This at GATX No. 4.

VHF: Standby on Channel 13 during pilotage and when anchored. Agents normally place walkie-talkie aboard for their direct communication.

Berthing: Always starboard side to. Forward will have 2 backsprings to jetty, 4 headropes, 2 breasts to buoys, lashings not required, same aft. Only one boat used and secures the bow first.

Telephones: Not available at GATX No. 4 but there is one on next jetty upriver.

GRAMERCY, Louisiana: 30.03 N. 90.41 W.

East bank of Mississippi, about 144 miles from sea.
DOCUMENTS/PILOTAGE: For all general information, refer to "New Orleans."
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available if required; normally not used.
BERTHING: Colonial Sugar Refinery: berth 600 ft. long, 40 ft. depth. Kaiser Aluminium and Chemical Corp: berth, 40 ft. depth.
FRESH WATER: Available ex-wharf.
FUEL: Not available.
DENSITY: Fresh water, 1000.

GRAYS HARBOR, Washington: 46.55 N. 124.08 W.

(See Plan Book)

DOCUMENTS, etc.: Refer to "Tacoma".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
PILOTAGE: A vessel approaching requested to give 24 hours advance notice of arrival to Grays and Willapa Pilots through Everett Radio, KLB which runs on a calling frequency of 500 kc/s. and VHF Channels 6, 8, 12 and 16. Pilot boat, "Mercury", 65 ft. long, with an 18 ft. beam, powered by a 330 h.p. GM diesel engine. "Mercury" moored at Westport Fishing Basin, and delivers Pilots to vessels outside Grays Harbor bar.
ARRIVED VESSEL: Vessels must be inside Grays Harbor bar to be considered an "arrived vessel".
ANCHORAGE: No specific areas in Grays Harbor have been designated as anchorage grounds. The best area is Southward of Sand Island Shoal in depths of 35 to 40 ft.; the holding ground is good.
RESTRICTIONS: Bar Channel and Approach Channel, depth 30 ft. MLLW. Mean tidal range, about 10 ft.
BERTHING: 7 wharves in port dock. Depths alongside from 15-35 ft.
BULK CARGO FACILITIES: 1 berth in port dock for petroleum discharge and/or bunkering. No other bulk cargo berths. No liquid chemical or LPG berths. No roll-on/roll-off berths. One berth with container capability.
STEVEDORES: 18 local gangs. Additional gangs imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
AUTHORITY: Port of Grays Harbor.

AGENT: See "Seattle".

GREEN BAY, Wisconsin 44.32 N. 88.02 W.

(See Plan Book)

For important general information refer to St. Lawrence Seaway.
DOCUMENTS: No special documents required. All necessary Customs and St. Lawrence Seaway documentation should be accomplished prior arrival.
PILOTAGE: Pilot not compulsory although some Masters prefer Pilot aboard. Pilot boards prior to arrival.
CHANNEL: From Grassy Island, outside mouth of Fox River, to C&NW Railway bridge, channel is maintained 24 ft. below low-water-datum (576.8 ft. above Father Point, Quebec) and 300 ft. width except through bridges. Above C&NW Railway bridge channel and turning basin is maintained at 20 ft. below low-water-datum. From Grassy Island lakeward channel maintained at 26 ft. below low-water-datum varying in width from 300 to 500 ft. for approximately 8 miles. 24 ft. deep turning basin maintained at confluence of Fox River and East River opposite Leicht's North Dock. Currents will flow up and down river and will influence channel depths at times. Present high-water will add 2-4 ft. to channel depths.
RESTRICTIONS: Entry may be made at any time of day or night subject to Master's discretion.
MAX. SIZE: Subject water depths and width of bridge openings.
HEALTH: See "Health: all Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
Pratique may be obtained prior to entry of St. Lawrence Seaway. Suspected disease should be reported locally. Rat guards required on all lines.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Ships' Agents located at Milwaukee and Chicago, ETA should be directed accordingly.
TUGS: Join vessel at any designated point. Charges should be obtained from tug operators. Use ship's lines.
BERTHING: General cargo at Leicht's North Dock, 1,500 ft. length, full channel depth. Discharge by ship's gear and shore based equipment. Bulk cargo handled at several docks.
CRANES: Shore based lifting devices to 20 tons. 100 ton stiff-legged derrick available for heavy cargo.
BULK CARGO FACILITIES: Available at several places for coal, salt, fertilizer, chemicals, liquid cargo, stone, pig-iron, etc.
BRIDGES: No bridge opening restrictions for railroad bridges. Highway bridges permit vessels of 300 tons or over to transit at any time. However, heavy land traffic occurs about 0730–0830 hrs., 1145–1315 hrs. and 1630–1730 hrs., and co-operation of Masters is urged during these times so that city bridges may remain closed.
STEVEDORES: Services performed by Leicht Transfer and Storage Co. and arrangements should be handled by ship's Agent or directly with Leicht's.
MEDICAL: Subject to regulations of U.S. Customs and Immigration and St. Lawrence Seaway authorities. 3 excellent hospitals.
TANKERS: Limited only by harbour dimensions.
DENSITY: Fresh water harbour.
FRESH WATER: Available through ship's Agent and water company.
FUEL: Fuel oil available in any quantity. Normal fire precautions.
SURVEYORS: Available through ship's Agent.
GANGWAY/DECK WATCHMEN: Available at ship's option.
OPENING/CLOSING HATCHES: By stevedores.
REPATRIATION: Available through local immigration officials.
CONSULS: No consuls. Nearest are at Milwaukee, Chicago, Minneapolis.
REPAIRS: Topside and engine repairs available. Complete repair service available at Sturgeon Bay, 45 miles North.
DRY DOCKS: No local facilities. Available at Sturgeon Bay, Wisconsin.
AIRPORT: 8 miles from port. Served by regular airlines with over 30 flights daily.
TIME: Central standard time. Central daylight saving time in effect from the last Sunday in April to the last Sunday in October.
HOLIDAYS: January 1st (New Year's Day), May 31st (Memorial Day), July 4th (Independence Day), 1st Monday in September (Labor Day), Last Thursday in November (Thanksgiving Day). December 25th (Christmas).
POLICE/AMBULANCE/FIRE: Police: Green Bay – Administrative calls 497-3800 Emergency 497-3811 Sheriff: 497-3300 Ambulance: 432-8621 Fire Dept. Rescue – 497-3222 Fire: 497-3222
TELEPHONES: On board service. Contact Wisconsin Telephone Co.
SERVICES: Tank cleaning, fumigation, waste disposal, chandler.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Proper identification should be carried.
DELAYS: Expect no delays for berthing or harbour movement.
AUTHORITY: Brown County Board of Harbor Commissioners, Office of the Port Director.

GULFPORT, Mississippi: 30.21 N. 89.05 W.

(See Plan Book)

DOCUMENTS: See "New Orleans".
PILOTAGE: Compulsory from outer sea buoy to docks, provided by Gulfport Pilots Association, arranged through Agent. Pilot boards at Sea buoy.

Pilot boat has red hull, white superstructure with "PILOT" in black lettering. When pilot boat is underway, contact can be made by VHF Channel 16.
RESTRICTIONS: The Gulfport Channel is 12 miles long running between Ship Island and Cat Island. Channel is 225 ft. wide and has a minimum depth throughout of 30 ft. at MLW. Harbour is dredged rectangular basin about a 0.25 mile wide and 0.5 mile long, this area being protected by piers. Depth in harbour and along wharves is 30 ft. with a 2.5 ft. tide variation. No entry restrictions as to time.
MAX. SIZE: Length of vessel is restricted to approximately 900 ft. by turning basin, no breadth restrictions.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Gulfport Radio KKM 650 – VHF Channel 16 (26 safety only). Continuous service.
TUGS: 2 tugs available but not required unless requested to assist in berthing.
CARGO HANDLING: 4 gantry banana terminal capable of unloading 16,000 boxes per hour. 50,000 sq. ft. transit shed refrigerated facility.
STEVEDORES: Must have 12 hours' notice to arrange stevedore gangs. Normal work day 0800–1200 hrs., and then 1300–1700 hrs. Monday through Friday.
MEDICAL: No advance notice required for medical attention, doctor and hospital care readily available.
FRESH WATER: Fresh water is available.
FUEL: Some fuel available, others upon advance notice.
DENSITY: Brackish.
GANGWAY/DECK WATCHMEN: Port guards or Dubuisson Detective Agency.
CONSULS: Many countries have consuls within a 100 mile radius of Gulfport.
REPAIRS: Most deck and engine repairs could be arranged within port facilities.
AIRPORT: Gulfport Municipal Airport is approximately 4 miles from the port and served by regularly scheduled airlines.
REPATRIATION: Can be arranged.
TIME: The Port of Gulfport is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months.
HOLIDAYS: United States national holidays are observed, cargo work can be arranged on these days at a penalty time.
POLICE/FIRE/AMBULANCE: Telephone numbers for emergency services are; Fire 863-1212; Police 863-4211; Ambulance 863-1441.
TELEPHONE: Can be placed aboard only by special arrangement; not normally available.
DEVELOPMENTS: Container crane to be installed.
AUTHORITY: Mississippi State Port Authority at Gulfport.

HAINES, Alaska

(See Plan Book)

(Lutak Inlet) Located 5 miles N.W. of Haines. Open all year.
APPROACHES: Lynn Canal to Lutak Inlet.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilot pick-up point located in vicinity of Point Retreat.
MAX. SIZE: Harbour depth 36 ft. at zerotide. Tides: diurnal range 16 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Lutak Inlet.
CUSTOMS: Quarantine, immigration and Customs, local.
TUGS: 3 available.
BERTHING:

1. Haines dry cargo dock can be secured by request through City of Haines (Telephone: Area code 907 number 766-2231). Berthing length – 967 ft. and a clear surface of over 300 ft. in depth. Depth at face of dock – 36 ft. MLLW. No covered sheds. 6 acre open staging area. Crane may be available. Continuous to 300 ft. Alaska State Ferry facility which is equipped to handle roll on/roll-off cargo.
2. Schnabel Lumber Co. Dock: Berthing length – 520 ft. long and 80 ft. wide. Depth at face of dock – 45 ft. No covered storage. Open storage. 30,000-ton capacity for bulk cargo storage. No crane. Chip loader with 350 t.p.h. capacity. Crane available.

STEVEDORES: 4 gangs.
REPAIRS: None.
WATER: Available in small quantities in temperate seasons only.
FUEL: None.
MEDICAL: Doctor/dentist available.
TRANSPORTATION: Air, ferry. Haines Highway principal route connecting Southeast Alaska with the Alcan Highway leading to the interior of Alaska and Canada.

HAMPTON ROADS DISTRICT, Virginia:

(See Plan Book)

NORFOLK, 36.51 N. 76.19 W.
NEWPORT NEWS, 36.59 N. 76.26 W.
PORTSMOUTH, 36.50 N. 76.17 W.

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527–A or 7527–B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I–418).
2 copies Crew List.

Customs boarding officer will also examine ship's register and load line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from a United States port:

Health Pratique.
Master's Oath (Customs Form 3255).
All foreign clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.
F.M.C. Certificate of Financial Responsibility.

PILOTAGE: Compulsory; is generally arranged through port Agent. Vessels approaching port may use VHF telephone, Channel No. 16, radio telephone 2738 kHz. Advance notice of 24 hours is required of ETA. Pilot boat is 165 ft. long, black steel hull, with "VA Pilot" painted on hull, white superstructure, and buff funnel. Long and short light or sound signals are used by vessels requiring a Pilot. Location of pilot boat is 1 mile North of Cape Henry Lighthouse. Pilot boat will issue instructions in event of bad weather or when pilot boat is off station and information on anchorage for vessel awaiting a Pilot.
ANCHORAGE: In Hampton Roads, depth 45 ft.
RESTRICTIONS: Channels to Norfolk and Newport News – 45 ft. depth. Elizabeth River Channel – 40 ft. depth to Norfolk and Western Railway Bridge, then 35 ft. to Chesapeake.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Fort Monroe Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Radio-telephone communications in the Hampton Roads area are furnished by the Chesapeake and Potomac Telephone Company of Virginia. A regular ship-to-shore channel transmits to ship on 2538 kHz and the ship returns the call on 2142 kHz. A "daytime" ship-to-shore channel transmits to ship on 2450 kHz and the ship returns the call on 2366 kHz. In the very high frequency band, "XY" ship-to-shore is available which transmits to the ship on 161.9 mHz and the ship returns the call on 157.3 mHz.

Portsmouth River: B.P. Oil Corp., 2 berths, 30 ft. depth.

TUGS: Compulsory, normally join the vessel in Elizabeth River.

BRIDGES: Sufficient clearance at all times.

STEVEDORES: Labour arranged through International Longshoremen's Association.

1. Straight Time – work between the hours of 0800 and 1200 and between the hours of 1300 and 1700 daily except Saturdays, Sundays and holidays.
2. Double Time – hours daily between 0600 to 0700 and 1200 to 1300, 1800 to 1900, 2400 to 0100 hrs. and all Sundays.
3. Time and one-half – shall be all those hours not included above, except holidays.

DENSITY: Average 40% fresh.

FRESH WATER: Available at all berths, Barge service available if required.

FUEL: All grades available at oil company berths. Delivery by barge to all other locations.

GANGWAY/DECK WATCHMEN: Not required unless crew members detained by Immigration.

CERTIFICATES: Cargo Gear Certificate, Derat, Radio, Safety Equipment, and Ship's Register.

CUSTOMS ALLOWANCE: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1qt. wine/spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Identification required by Immigration for shore passes.

CONSULS: The following countries are represented at Norfolk:

Belgium
Brazil
Denmark
Finland
France
Germany
Great Britain
Greece
Iceland
Italy
Mexico
Netherlands
Norway
Panama
Sweden

REPAIRS: Newport News Ship Building and Dry Dock Company in James River; 8 outfitting piers up to 1,050 ft. length. Floating cranes up to 67 tons capacity.

Norfolk Ship Building and Dry Dock Corporation, situated on East Branch of Elizabeth River. Channel depth 25 ft.; 7 piers equipped for ship's repairs. Floating crane 25 tons capacity. Other repair companies in addition.

DRY DOCKS: Norfolk: 1 dry dock 450 ft. long, 57 ft. beam; floating dock 360 ft. long, 64 ft. beam.

Newport News: Dry docks:

	Length inside gate	*Width of entrance*	*Depth of water over sill MHW*
No. 1	649 ft.	92 ft.	33 ft.
No. 2	862 ft.	118 ft.	32 ft. 3 in.
No. 3	536 ft.	78 ft.	24 ft.

Slipways: The shipyard has 3 inclining slipways with lengths up to 715 ft. and capacities up to 15,000 tons.

AIRPORT: Norfolk Airport, and Patrick Henry Airport at Newport News, over 100 flights daily.

TIME: Eastern standard time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from April to October.

HOLIDAYS: New Year's Day; Lee's Birthday (January 19th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Jefferson Davis Day (June 3rd); Independence Day (July 4th); Labour Day; Election Day (1st Tuesday after 1st Monday in November); Armistice Day (November 11th); Thanksgiving Day; Christmas Day. No work can be arranged on New Year's Day, Labour Day or Christmas Day.

TELEPHONES: On-board telephones only available at shipyards.

DEVELOPMENTS: *Norfolk International Terminals:* Container Pier (Marginal Wharf) will be extended by an additional 770 ft. Project will be completed in mid-1981.

Portsmouth Marine Terminal: Container Pier (Marginal Wharf) will be extended by an additional 806 ft. Project will be completed in mid-1981.

Newport News Marine Terminal: A new gantry crane with capacity in excess of 110 tons with container capability will be erected on Berth No. 1 of "C" Pier. Project will be completed by mid-1980.

AUTHORITY: Virginia Port Authority, Norfolk.

HILO: Hawaii 19.46 N. 155.06 W.
(Including Kawaihae 20.02 N. 155.50 W.)

(See Plan Book)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Store Lists.

PILOTAGE: Pilots boats have VHF. Contact is made on VHF Channel 16, then switch to Channel 12. Pilot service is provided on a 24-hour basis upon suitable advance notice.

At Hilo, Pilot boards on starboard side in position 0.75 mile due East of Paukaa light. In picking up Pilot, vessels should be on Southerly course with enough speed for steerageway. Special instructions will be given by radio telephone.

At Kawaihae Pilot station in position 1 mile 287° true from No. 2 buoy. Pilot usually boards on port side with vessel on course for the entrance at dead slow speed.

ANCHORAGE: No safe anchorages either Hilo or Kawaihae for vessels awaiting Pilot. In this situation, a vessel should heave to or steam. Under good weather conditions, safe anchorage can be had in Hilo Bay. Anchorage is inside pilotage waters and requires local knowledge for safety; vessels should not anchor without Pilot.

RESTRICTIONS: At Hilo, under good weather conditions, vessels with draft up to 32 ft. 6 in. can be handled at any time.

At Kawaihae, vessels with draft up to 33 ft. handled anytime.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu.

TUGS: Tugs join vessels at entrance at Kawaihae and at Coconut Island at Hilo. Tugs lines are usually used at no extra charge.

BERTHING: There are many factors which affect berthing at Hawaii Island ports, the most important of which are surge and wind. Vessels should be well equipped with long mooring lines and sufficient additional line to make up 2 × 900 ft. buoy lines. In all instances, berthing instructions will be given after details concerning vessel and her cargo are received.

Pier No. 1 in Hilo handles bulk sugar vessels and container vessels, 1,220 ft. of berthing space.

Pier No. 3 in Hilo handles tankers, 575 ft. of berthing space.

Kawaihae has one overseas berth which handles both bulk sugar vessels and tankers, 605 ft. of berthing space.

CRANES: Shore cranes available, max. capacity 90 tons.

STEVEDORES: Hilo Transportation and Terminals Co. (Hilo) and Kawaihae Terminals Inc. (Kawaihae).

MEDICAL: All facilities available.

DENSITY: Variable in Hawaii area due to fresh water run-off.

FRESH WATER: Available from county of Hawaii by pipe-line.

FUEL: Can be supplied subject advance notice.

GANGWAY/DECK WATCHMEN: Required for tankers. Other ships as may be necessary due to special circumstances.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCE: 200 cigarettes, 50 cigars per man, and one bottle U.S. quart, wine or spirit.

IDENTIFICATION CARDS: Seamen's passports only required.

REPAIRS: Limited repair service available; almost any type of machine work, welding and ordinary electrical repairs can be handled.

REPATRIATION: Direct air service to Continental United States and to Honolulu International Airport.

AIRPORT: About 1 mile from Port of Hilo and is served by regular airlines.

POLICE/AMBULANCE/FIRE: *Hilo:* Police 9353311; Ambulance and Fire 961-6022.

Kawaihae: Police 8857334; Ambulance 885-7334; Fire 961-6022.

TIME: GMT minus 10 hours all year round.
TELEPHONES: Special arrangements may be made with Hawaiian Telephone Co.
SHORE LEAVE: Allowed.
AUTHORITY: State of Hawaii, Department of Transportation, Harbours Division, Port of Hilo.

HOMER, Alaska: 59.36 N. 151.25 W.

APPROACHES: Via Cook Inlet. Port located at mouth of Kachemak Bay on Kenai Peninsula.
DOCUMENTS: See "Anchorage – Alaska".
PILOTAGE:
(1) Homer Pilots Association, Radio KTE 21, tel. 235-8526. Pilot boards 1 mile South of Homer Spit Light on Coal Point.
(2) The Southwest Alaska Pilots Association serves all ports in Cook Inlet, Prince William Sound, Resurrection Bay, Kodiak Island, the Aleutian Islands, Bristol Bay and Bering Sea. The pilot station for vessels entering Cook Inlet waters is Lat. 59° 36.2′N. Long. 151° 24.5′ W., approximately 1 mile South of Homer Spit Light on Coal Point. The pilot station cable address is "Homerpilot". The pilot station stands by on VHF Channels 10 and 16, 24 hours a day; call sign "WAB-917 Southwest Pilots". The pilot station also stands by on single side band radio as follows:
8284.4 mHz between 0800 and 1200 hrs. Alaska time, weekdays.
4136.3 mHz between 1300 and 1700 hrs. Alaska time, weekdays.
Call sign "WAB-917 Southwest Pilots".
MAX. SIZE: Harbour depth 40 ft. MLLW. Tidal range 28 ft. (−6ft. to +22 ft.) Max. draft for berthing 30 ft. at MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Kachemak Bay is excellent anchorage for vessels of any size. Foreign vessels may enter bay to anchor, but must have a Pilot aboard to come to dock.
RADIO: Homer Port Radio monitor C.B. Channel 17. Callsign "KCN 7188 Port of Homer".
VHF: Homer Port Radio monitor Channel 16. Callsign "WAB 935".
TUGS: 1 tug available.
BERTHING: Homer City Dock, 410 ft. long and 50 ft. wide. Limited to draft of 30 ft. 3 privately owned mobile cranes available. Capacity 15, 35 and 70 tons.
410 ft. face sloping bottom suitable for vessels with 20 ft. draft or less at chine. Inside and outside storage is available for holding and staging. Water, gasoline and diesel are available on dock.
FRESH WATER: Available from the berth.
FUEL: Available for small craft only.
REPAIRS: No facilities for repairs.
MEDICAL: Homer Hospital is a 17-bed hospital with 5 full-time doctors.
EMERGENCIES: Police department and a volunteer fire department are available plus a rescue truck.
AIRPORT: Daily air service.
AUTHORITY: City of Homer Harbour Master.

HONOLULU, Hawaii (including Barbers Point and Pearl Harbour): 21.19 N. 157.52 W. (See Plan Book)

PILOTAGE: Pilot requested by Agent. Pilot station telegraphic address on VHF (only) Channel 16, call KFQ 907. Pilot boat, 36 ft. cabin cruiser, white house, black hull. Only "G" flag necessary for vessel requiring Pilot. Pilot station, Lat. 21° 16′ 12″ N., Long. 157° 53′ 24″ W., no alternative.
DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registry.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Radio Certificate and Licence.
4 Stores Lists.

Vessels scheduled to call at Pearl Harbour are required to furnish 6 copies of crew lists and passenger lists, if applicable, at least 1 working day prior to arrival, for Naval security requirement.

The United States Immigration Service requires that the Master of vessels manned by alien crew members arriving from a foreign port present the United States Immigration and Naturalisation Service's Officer with a current crew list (Form I. 418) properly visaed in their possession. An I. 94 should be prepared for each passenger prior to vessel's arrival.

U.S. Immigration Department representatives are not stationed at any Hawaiian outports. Customs officials, however, are stationed at all entry ports and accomplish both Customs examination and Immigration.

The United States Agriculture Service examines and seals ship's stores from restricted ports. Special arrangements for garbage disposal may also be required by this agency, if for example meat aboard has been purchased in a port where there is a high incidence of "hoof and mouth" disease. All garbage should be disposed of prior to arrival in port.

All regulatory bodies assess overtime charges for services of their personnel if rendered on Saturdays, Sundays, holidays or after hours on week-days.
RESTRICTIONS: Entry at any time subject to harbour control signals. 24 hours notice of arrival is obligatory.
MAX. SIZE: Controlling depth 34 ft. MLLW. Length depends on availability of berths.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Call KHK, HF—8 mc/s., 12 mc/s., 16 mc/s.; LF-500. VHF Channel 16, call KFQ907, Aloha Tower Harbour Control Station.
TUGS: Tugs normally join vessel within harbour limits. Both ship's lines and tug's lines used depending on conditions.
BERTHING: Berthing given on a first-come-first-served basis according to type of vessel and particular requirements as to cargo bunkering, etc. Must be arranged through a local shipping Agent.
STEVEDORES: Gangs must be ordered 24 hours in advance. General cargo, average load per hour: 15 L/tons; average discharge per hour: 15 L/tons.
MEDICAL: Agents would like as much advance notice as possible. Complete medical facilities available. Vaccinations in accordance with U.S. Public Health requirements.
TANKERS: 4 tankers berths, max. draft 35 ft. No slop discharge facilities.

Barber's Point: Tanker berths, tugs not normally required. Mooring Master attends berthing procedure. Fresh water not available. Fuel available ex pipe-line. See "Shipmaster's Reports."

Pearl Harbour: U.S. Navy Terminal. Max. LOA 800 ft. Max. draft 38 ft. 6 in.
DENSITY: Pure salt water, no fresh water allowance.
FRESH WATER: Delivered via 2.5 in. fire hose with meter on pier. Rate of delivery between 30 and 60 t.p.h., depending on the berth.
FUEL: All U.S. grades available, no advance notice other than establishment of credit.
FIRE PRECAUTIONS: Fire wires required by tankers berthed alongside.
DEVELOPMENTS: Additional container facilities being developed at Sand Island.
GANGWAY/DECK WATCHMEN: Services of watchman recommended, usually arranged by Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes, 50 cigars per man, and one bottle, U.S. quart, wine or spirits.
IDENTIFICATION CARDS: Seamen's passports needed.
CONSULS: The following countries are represented in Honolulu:
Belgium
China
Great Britain
Japan
Denmark
Finland
India
Norway
Panama
France
Germany
Korea
Netherlands
Philippines
Portugal
Sweden
Thailand
REPAIRS: All types of deck and engine repairs possible. Hull repairs below water-line in accordance with dry dock capacities.
DRY DOCKS: Commercial within Honolulu Harbour. Dry dock: 2,800 L/Ton lifting capacity, 385 ft. long, 56 ft. wide. Marine railway: 1,400 L/Ton lifting capacity, 223 ft. long, 65 ft. wide.
REPATRIATION: All facilities, crews generally leave State within 24-hour period.
AIRPORT: International airport, served by all major airlines, 5 miles from harbour.
HOLIDAYS:

New Year's Day	First or following Monday
President's Day	Third Monday in February
Kuhio Day	Third Monday in March
Good Friday	Friday before Easter
Memorial Day	May 30th or nearest Monday or Friday
Kamehameha Day	June 11th or nearest Monday or Friday
Admission Day	Third Friday in August
Labour Day	First Monday in September
Discoverer's Day	Second Monday in October
General Election Day	First Tuesday after First Monday in November (election year)
Veteran's Day	November 11th
Thanksgiving Day	Last Thursday in November
Christmas Day	December 25th

POLICE/FIRE AMBULANCE: Police, Ambulance, Fire dial 911.
TIME: G.M.T. minus 10 hours all year round.
TELEPHONES: Telephones can be placed on board at any dock.
SERVICES: All services found in major U.S. ports are available.
SHORE LEAVE: No restrictions if papers are in order.

SHIPMASTER'S REPORT No. 1: August 1978 **(See Plan Book)**
Hiri Seaberth, Barber's Point: Position 21° 16′ 22″ N. 158° 05′ 27″ W.
Operators: Pacific Resources Inc., Honolulu.
Documents:
3 Crew lists
3 Store Declarations
3 Cargo Declarations
3 General Declarations
3 Crew's Effects Declarations
3 Master's Oath of Entry

Pilotage: In case vessel has received order to berth on arrival, H.I.R.I. Mooring Master boards vessel in a position 3 miles due South of Barber's Point Lighthouse. In case vessel will not be berthed on arrival vessel is to proceed towards Honolulu. This will be advised by Agent in due time. When approaching Honolulu, vessel must remain South of a line Barber's Point Light/Diamond Head Light and await Pilot from Hawaii Port Pilots Association. Pilot will then bring vessel to outside anchorage.

Restrictions: Vessels will be berthed during daytime only and at slack water only. Unberthing day and night and at any stage of tide. Vessels up to 100,000 d.w.t. and 830 ft. LOA have been handled at H.I.R.I. Seaberth.

Radio Pratique: Not required.

Advance Notice: Refer to Charterer's/Owner's instructions. ETA cables to be sent via San Francisco Radio KFS or KPH since Honolulu Radio Station has closed down.

Communication: H.I.R.I. controller is listening VHF Channel 16, working Channel is 9. Call sign is "KTD 466".

Aloha Tower, call sign "KFQ 907" is listening Channel 16, working Channel is 12.

Tugs: Tugs of various sizes up to 2,250 h.p. and work boats available from Honolulu. While vessel in berth a workboat is continuously standing by.

Hiri Seaberth/Mooring: Seaberth consists of 8 mooring buoys equipped with quick releasing hooks. Mean depth in the berth is about 40 m. The mooring is approached from the West. A tug from Honolulu is made fast with ship's line through centre lead. Two mooring boats are on hand, a second, smaller tug is used for pushing on the port quarter. Anchors are not used for mooring. The first line to be made fast is line No. 5, thereafter lines No. 2, 6, 1, 4, 3, 7, 8 in that order. Lines 1 and 2, 5 and 6 will be doubled, finally vessel is moored with 12 lines.

Nylon lines are preferred, but wires may be used. Lines and wires must be long enough to reach buoys 600 ft. from vessel.

It is important that all nylon lines go through roller fairleads in order to avoid chafing and eventually breaking. Refer to mooring layout.

Hose Connection: A 30 in. crude line combined with a 16 in. line for black oil is used for receiving crude or loading black products. A 20 in. line is used for loading clean products.

The crude/black oil system is connected by a 12 in. hose with ASA 150 flange. Clean products system is connected by a 10 in. hose.

Vessel's port derrick to be rigged before arrival with *single* whip able to reach hose 120 ft. down on sea bottom. A travelling block is not acceptable as diver connects hook directly to hose on sea bottom. Lift required is 8 tons. Hoses are connected/disconnected by ship's personnel. Shore personnel can be arranged, charges being billed to vessel. Normal discharge rate for crude oil is about 30,000 b.p.h. with maximum 125 lbs. pressure at rail.

Repairs: Minor repairs are possible through workshops in Honolulu.

Supplies/Services: Provisions, stores, laundry available. Stores, etc. cannot be loaded on the ship while in the berth, vessels usually receive same off Honolulu.

Fuel and Marine Diesel oil available and can be loaded in mooring berth after discharge operations are completed.

In this vessel's case, however, vessel was berthed in Honolulu at Piers 30/31 for the purpose of bunkering and storing. Fresh water is available alongside piers. Crew changes are possible, shore leave is possible. The launch from Barber's Point to Honolulu Pier 10 takes about 2.5 hours.

Weather/Wind: The Hawaiian Islands are dominated in all seasons by the N.E. Trade Winds, which are present about 75% of the time. The average velocity is 12.5 m.p.h. They rarely exceed 20 m.p.h., however, gusts of 100 m.p.h. are possible. October to April is the "Kona" season which refers to occasional storms from the South. During these storms heavy rainfall and cloudiness can be expected. The average temperature is between 24 - 28° Celsius.

Tides/Current: The predicted times and heights of high and low water are published for Honolulu. The rise of tide is only 1 - 2 ft. Strong winds may effect the tides. Velocity of current is 1 - 2 knots, mostly setting in Westerly direction, however, counter-currents have been observed.

References: B.A. Charts No. 1308, 1378. List of Lights Vol. G; Coast Pilot No. 62 Vol. 3.

SHIPMASTER'S REPORT No. 2: August 1977 **(See Plan Book)**

Barber's Point Sea Berths: There are 2 buoyed berths situated near the above, of which the larger is that owned by Hawaiian Independent Refinery Inc. (H.I.R.I.), 1.9 miles × 148° from the Barber's Point Lighthouse. The other, some 2 miles N.E. of H.I.R.I. moorings, is owned by Standard Oil of California (S.O.C.A.L.) and is used for the importation of crude fuel stock to their own refinery. H.I.R.I. Berth, however, is used for both crude imports (via 1×12 in. submarine manifold) and export/bunkering of products (via 1×10 in. submarine manifold).

The H.I.R.I. Berth is based on a spread of mooring buoys to the hooks of which a ship's rope(s) are attached. It should be noted that these are NOT quick release hooks so that the weather conditions during operations are of paramount concern to all. Failure to leave the berth in sufficient time will preclude any help in unmooring by the tug boat in attendance, for letting go lines and will result in broken lines and/or buoy moorings. The 4 mooring tugs leave as soon as vessel is made fast.

The operation of mooring is governed by the wind and tidal stream. Most of the time the former is the N.E. Trade, while the tide *has* to be setting to the West for the vessel enters the berth on a course of 095° with Diamond Head Light House ahead. The fact that there are some 17 to 18 fathoms in this berth, does not rule out the action of counter currents upon a deep draft vessel such as to make a mooring operation more difficult, if not impossible. Again, a Southerly wind will force the vessel down onto the lee buoys, and over the manifold hence a *minimum* working length of 100 fathoms per rope is necessary. The action of the Southerly wind is also to build up a considerable swell, making it necessary to begin ballast as soon as practical and *no later* than when *65%* of the cargo has been discharged and so arranged to allow sufficient empty and dry tanks to maintain the vessel's safe mooring at 25 ft. draft.

The berth was laid out for vessels up to some 65,000 tons, hence the position of the single 12 in. crude oil manifold is difficult for larger vessels, while the 10 in. bunker/product hose is even further aft from the cargo discharge point. With an overall length of 885 ft., and the manifold 425 ft. from the bow, it will be seen from the plan that the stern of the vessel will make Nos. 5 and 6 buoys into breast lines, so that stern lines as such, have to be run from the after deck and any additional ropes to Nos. 4 and 7 buoys will be breast lines.

These facts limited the vessel to 100,000 metric tonnes of cargo, as the Marine Adviser to the Receivers, Pacific Resources Ltd., (operators of H.I.R.I.) was convinced that a 140,000 tonne vessel at her draft of some 54 ft., would be too difficult to manage, whereas at 44 ft. the rudder would be of maximum value, the propeller fully immersed, but the slab-sided stern at its minimum resistance value. This was justified in that the scheduled berthing was delayed for 3 hours, due to a leaking fuel valve, resulting in a minimal West-going tidal stream, and a fresh Southerly wind with swell. Full use had to be made of all tugs, and double moorings run to windward buoys, before vessel could be placed in the correct position. It is not envisaged by Receivers that similar sized vessels will be regularly accepted in future.

The instructions call for an initial discharge rate of some 12,000 b.p.h., until pumphouse radios (VHF Channel 9) advise that the system is full, after which the rate can be increased to 125 lbs. per square inch on *their* gauge at ship's manifold, about 28,000 b.p.h. maximum. Connecting of hose is achieved by ship's staff, but the hose is surveyed by diver before vessel enters berth, a small buoy being attached as an aid for the Pilot. The vessels runner and hook are lowered *to the bottom* where the diver attaches same to the hose sling, the operators having found that this method ensures a longer life for their hoses, and connections on the hard bottom of coral, overlaid with sand. The same procedure in reverse is carried out after discharge, using a tug to clear hose.

Entering Inwards: Hawaii being a full State, the entering documentation and procedures are as for any mainland USA port. It is important to note however, that under normal circumstances the vessel proceeds to a point 3 miles South of Barber's Point Lighthouse, where the Mooring Master and his Assistants join and tugs attend. The official boarding party will not, therefore, board until *AFTER* vessel is securely moored. This does not apply to a Coastguard Officer who comes with Mooring Master (or Pilot, off Honolulu) and who *MUST* be satisfied that his requirements have been met, before vessel is allowed to anchor, berth, enter port etc. (see Coastguard Regulations).

In the event that the vessel is unable to berth for a few hours due to the tidal stream, wind, etc., an anchorage can be obtained to the Eastward of the H.I.R.I. Berth and Southwest of S.O.C.A.L. Berth. If, however, there is to be a delay of some 24/48 hours, the vessel has to be anchored in the appropriate *recognised explosives anchorage* off Pearl Harbour. This will require the services of a Honolulu Pilot and possession of US Charts (B.A. Charts are small scale and do not show the anchorage areas with sufficient detail). This berth is but 7 cables from the surf line, though the new airport runway embankment acts as a perfect Radar distance guide at all times. It is preferred for inward clearance, being but 3.5 miles from the Customs Pier, whereas H.I.R.I. Berth is 13.5 miles along the coast and takes 1 hour in a normal launch. In view of the problem of Southerly winds (a 16,000 ton T.2 tanker grounded recently, while trying to enter Honolulu Harbour), it is important that any vessel at anchor is kept ready to weigh anchor and sail to seaward, to avoid any danger of dragging ashore.

Note: Vessels must *not* cross the limits of Honolulu Harbour while awaiting the Pilot and are further delayed when the Coastguard boards to inspect vessel's emergency steering and power systems, log book entries and other items as required.

Communications: Honolulu has an excellent network of public and private radio communication stations. The US Coastguard (Channel 16, 14 and 12) have an excellent range, while the various Agent offices have their own units for direct contact, in normal hours. On Channel 27 there is the Marine Operator which is a local private organisation that can connect a vessel via satellite telephone to any part of the world, as well as to Agents out of hours. However, they will require the Agent's "BAKER NUMBER" i.e. the coded number that will settle accounts locally, hence it is best to obtain this first from Agent.

N.B. The misuse of Channel 16 will bring Coastguard Authority down on any vessel breaking the code of conduct.

Bunkers and Fresh Water: No fresh water is available at Barber's Point nor are there any barges for either water or bunkers at Honolulu. A tug boat can be chartered at $5,000 per day to bring 50 tons of diesel/gas oil to the Honolulu anchorage, but it is not allowed to deliver while vessel is in H.I.R.I. moorings. The question of using the H.I.R.I. 10 in. product line for bunkers is dependant on the position of the vessel's connection and the type of product already in the line when the request is made, as any different grade is cleared and requires re-refining.

The alternative to the above is to request permission to bunker at one of the several deep water berths inside Honolulu Harbour, but apart from high cost, the attitude of the Harbour Master is negative to any entry by large tankers, inerted or not, hence delays can be anticipated even in an emergency.

Stores: A full range of provisions and dry stock is available and most deck or engineer's stores can be obtained from either the ship chandler or Dillingham Dockyard (which owns the tugs and is part of Oahu Railway & Land Co., Dillingham Corporation were Agents for the vessel).

When launches have to be used stevedores are employed to load the wire baskets at the pier and at least 2 to hook same to vessel's runner.

Repairs and Reconditioning: There would appear to be very little that cannot be handled or promoted in the mechanical, electrical and electronic fields and agencies exist for most major manufacturers, both U.S. and foreign.

Consuls: There is no longer a British Consul in Honolulu.

Launch service: This can be arranged through the Agents, the usual vessel being licensed for 28 persons only, while a substitute tug was allowed only 12 persons per trip. The cost is $130 per round trip, straight time to the Honolulu Anchorage (+$9.50 Port Fee) and $263 per 2.5 hour round trip straight time to H.I.R.I. Berth at Barber's Point. If there are vessels at both S.O.C.A.L. & H.I.R.I. Berths, the schedule and costs are supposed to be shared and thus the number who can be ashore at any one time is even more limited. All costs are increased on overtime. While on mooring run, time in excess of 2.5 hours is charged out at $120 per hour in increments of 0.5 hour.

Medical Service: In common with most US ports no doctor will attend aboard unless under special circumstances, hence the medical list has to be divided to ensure sufficient fit men are at all times aboard the vessel in case of weather problems, which would cause the launch service to be suspended, or prevent men re-boarding the ship in swell.

Coastguard Regulations: Since the 17 tanker disasters of 1976 in US waters, the Coastguard have been empowered to conduct an off-limits inspection of all laden tankers requiring to enter a US anchorage or port area. This initial survey is to ensure that all the vessels' emergency gear has been tested within 12 hours of arrival and a log entry made of same. This includes steering, lighting, inert gas plant and any safety gear of electrical nature while radar, gyro compass and any such navigational gear must be working and in use together with up to date large scale charts and both International and US Inland Rules 1977 Edition.

He will also require to see the ships manoeuvring data, squat and trim table and all information regarding draft together with engine movements in answer to telegraph plus internal communication systems. (A proposal is before Congress that all vessels be fitted with US made LORAN C equipment). Until he is satisfied the Pilot is not allowed to take the vessel inside official Port Limits.

After agreeing to allow vessel to enter, the Coastguard Officer remains on bridge to monitor all movements, responses etc., and will thereafter conduct the anti-pollution survey as laid down in Federal Register Vol. 37 Number 246 Part II of December 21st, 1972. If, however, he is of the opinion that the standard of navigation in response to the Pilot's instructions are such as to constitute a potential hazard to navigation and therefore, to become a pollution risk, he has the authority to prevent the vessel from proceeding inwards and can cause the Pilot to take the vessel to sea or to an anchorage until the defects or bridge organisation plan or engine room responses are satisfactory to again proceed.

(*N.B.* The IYCS Bridge Procedures Guide is an invaluable help with the above in conjunction with the Trials Data).

AUTHORITY: State of Hawaii, Department of Transportation, Water Transportation Facilities Division.

HOUSTON, Texas: 29.45 N. 95.20 W. (See Plan Book)

DOCUMENTS:

1 Visaed Crew List.
3 Passenger Lists.
3 or more copies of complete Manifests of Cargo for discharge at all U.S. ports.
2 or more copies of Manifest of Cargo for each individual U.S. port.
1 Souvenir List.
1 Stores List.
Ship's Register.
Tonnage Tax.
Load-line Certificate.
Nationality Certificate.
No health document required.

PILOTAGE: Compulsory. Radio to local Agent who arranges Pilot and specifies boarding time. U.S. Coast Guard requires 24 hours notice in advance of arrival Galveston Bar. Pilot boats and station on VHF Channel 12, Bridge to Bridge is Channel 13 and tugs for docking and off-docking on Channel 14. 3 Pilot boats marked HP No. 1 – 53 ft., HP No. 2 – 61 ft. and HP No. 3 – 106 ft. in length. Pilot boats contacted by light in International Morse code; no sound signal. Pilot taken on board at Sea Buoy No. 1, located 6.7 miles from Galveston. Seldom, if ever, is water too rough for boarding at above location. Anchorage located in Bolivar Roads, 6.7 miles inward from Sea Buoy No. 1.

ANCHORAGES: Anchorage for Houston is only in Bolivar Roads in Galveston, Texas, which has ample space and depth for all Houston bound vessels.

RESTRICTIONS: None with respect to time of day or night, or with state of tide.

Houston Ship Channel Dimensions:

Section of Channel	*Miles*	*Width (ft.)*	*Depth (ft.)*
Bolivar Roads to Morgan Point	25.6	400	40
Morgan Point to Exxon Co. Slip	4.8	400	40
Exxon Co. Slip to Shell Oil Co. Slip	8.8	400	40
Shell Oil Slip to Hunting Bayou	4.6	300	40
Turning Point at Hunting Bayou	0.2	600	40
Hunting Bayou to Clinton Island Turning Basin	2.8	300	40
Clinton Island Turning Basin	0.2	1,000	40
Clinton Island Turning Basin to Wharf No. 15	3.6	300	36
Turning Basin	0.8	250 to 970	36
Total miles	51.4		

MAX. SIZE: Max. 850 ft. long, 115 ft. breadth and 39 ft. draft. Tide minimal, effected primarily by wind only. Should a vessel's draft exceed 39 ft., permission to enter must be obtained from the U.S. Coast Guard.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph – ITT – Galveston call letters KLC.

TUGS: Tugs come alongside just off dock or immediately prior to entering turning basin if vessel is to turn, or at Pilot's discretion.

BERTHING: No special requirements other than authority from terminal operator local Agent.

Petty Terminal Corporation (PETCO) Dock:

Deepwater shipside terminal located on South side of channel. One ship berth 720 ft. long with water depth of 40 ft. One covered warehouse 100,000 sq. ft. with rail track inside warehouse and on outside concrete apron. Complete services available for discharging and shipping general cargo. Owned by Intercontinental Terminals Company and operated by Petty Terminal Corporation.

Manchester Terminal Company:

3 ship berths – 1,650 ft. in length (including 1 piling cluster).

Served by 1 marginal track and 2 outside tracks behind docks plus loading tracks to all other facilities. Special loading-unloading docks for motor trucks available.

Equipment: 62 Lift Machines; 7 Tractors; 1 Towmotor, 30,000 lbs. capacity; 4 Sweepers, 3 Scrubbing Machines.

Manchester Terminal Company also has 18,000 cargo pallets.

New Terminal Warehouse Corporation:

Capacity 3 ship berths. Wharf 1,400 ft. long. Open storage areas of 50,000 sq. ft. Covered storage areas of 200,000 sq. ft.

Other Wharf Facilities:

In addition to the for-hire terminals. Port of Houston has some 43 ship berths plus various barge facilities on the Ship Channel maintained and used exclusively by industries. Most of these facilities are tanker ship berths at the refineries. There are also 4 liquid-bulk terminals for hire: Amerada Hess Terminal and General American Tank Storage Terminals, the latter having 2 separate locations; South Coast Terminals; Robertson Terminals, Inc.

Barbours Cut: A new facility owned by the Port Authority has been opened at Barbours Cut, 25 miles across Galveston Bay from Bolivar Roads, where the ship channel moves inland at Morgans Point. This is a 500 ft. pier with mooring dolphins for handling the new, large barge-carrying vessels (LASH).

BULK HANDLING FACILITIES:

Public Grain Elevators: Back of Wharves 14 and 15. Capacity 6,000,000 bushels.

Equipped to unload from 110 to 120 cars in 10 hours, or deliver a combined total of 80,000 bushels per hour to 2 ships. 12 mechanical grain trimmers are in use at the Elevator as well as other major equipment including 2 car dumpers and 7 hopper scales of 150,000 lbs capacity. 2 modern grain truck dumpers can unload up to 30 trucks per hour.

Public Bulk Materials Handling Plant: At Greens Bayou.

Loading/unloading capacity is 1,000 long. t.p.h. free digging rate. Fully automatic plant handles dry bulk commodities rapidly to and from ships and barges through the loading and unloading towers, conveyor systems, hoppers, pits, surge bins and scales; with rail and truck facilities and ample ground storage. Rail cars are rapidly moved with large rubber-tyre tractors. These tractors are equipped with two-way radios for instant communication with unloaders. Boom of unloading tower reaches 76 ft. from face of dock, bucket capacity is 10 tons; loading tower boom reaches out 61 ft. from dock face and is equipped with automatic trimmer. Both towers can travel the full length of the dock. Mooring facilities for a waiting vessel have been installed next to existing dock. Also available: a boxcar unloading system (Augermobile), 2 heavy-duty front-end loaders and 4 heavy-duty car shakers.

Elco Shipside Elevator Company:

Two million bushel capacity elevator which loads up to 25,000 bushels per hour to vessels berthing at Dock 2 of the Port Authority's Manchester Wharves.

Goodpasture, Inc. and Continental Grain Company:

Grain elevator with 12 million bushel capacity – 4 ship berths. Also general cargo handling. Max. draft 38 ft. Loading rate 1,000 t.p.h.

Union Equity Co-Operative Exchange:

Grain elevator with 6 million bushel capacity, 1 grain berth, 1 lay berth, each 980 ft. long, water depth of 40 ft. for all berths. Loading rate 1,200 t.p.h.

Adams Terminal: Phillips Terminal Company.

2,700 linear ft. capacity 5 vessels. Bulk cargo loading conveyor system rated at 400 t.p.h.; horizontal boom, hammerhead-type clamshell unloader equipped with five-yard ore bucket, rated at 150 to 250 t.p.h.; 2 gantry cranes, capacity 40 tons at 30 ft. radius; Robbins heavy-duty car shakeout; 20-ton truck mounted crane. One D & H gantry crane modified to handle five-yard bucket for bulk ore discharge. 100 t.p.h. Specialists in import and export bulk cargo. Covered storage – 73,000 sq. ft.

Jacintoport Terminal:

Deepwater shipside terminal located on the North side of the Ship channel some 15 miles downstream from the Turning Basin.

Three ship berths with water depth alongside the wharf at 32 ft. 24,000 sq. ft. of transit sheds; 60,000 sq. ft. of back covered storage warehouse space, and 300 acres available for open storage. Rail service by the PTRA and Missouri Pacific. 200 igloos provide storage with less than 4° change in temperature year around. 500 cargo pallets. Slip is 4,200 ft. long and 400 ft. wide. 3,600 ft. marginal trackage. Owned and operated by Bethlehem Steel Corporation.

Cargill, Inc.

Grain elevator with a capacity of 3.5 million bushels. Two ship berths. Max. draft 38 ft. Loading rate 1,500 t.p.h.

CRANES: (Capacities 1 ton=2,000 lbs.)

Locomotive Cranes: Crane No. 15 – American, Diesel Electric: Capacity at 45 ft. radius – 17 tons.

Other Cranes:

Mobile No. 1 Crane – Diesel: Capacity 7.5 tons
Mobile No. 2 Crane – Diesel: Capacity 20 tons
Mobile No. 3 Crane – Diesel: Capacity 20 tons
Mobile No. 4 Crane – Diesel: Capacity 50 tons
Mobile No. 5 Crane – Diesel: Capacity 50 tons
Mobile No. 6 Crane – Diesel: Capacity 80 tons
Mobile No. 7 Crane – Diesel: Capacity 80 tons
Mobile No. 8 Crane – Diesel: Capacity 150 tons
Mobile No. 9 Crane – Diesel: Capacity 80 tons
Mobile No. 10 Crane – Diesel: Capacity 80 tons
Gantry, American Revolver R-25 Electric: Capacity at 65 ft. radius – 50 tons
Gantry, Clyde Whirley, Diesel Electric: Capacity at 45 ft. radius – 30 tons
Gantry, Portainer, Electric: Capacity at 81 ft. reach – 27.5 tons
Gantry, Portainer, Diesel Electric: Capacity at 113 ft. reach – 44 tons
Gantry, Portainer, Electric: Capacity at 140 ft. reach – 30 tons
Stiff Leg Derrick, Electric: Capacity at 50 ft. reach – 75 tons

BRIDGES: One bridge crosses channel immediately East of Public Wharf 31, clearance of 135 ft.

STEVEDORES: Stevedore, on advice from representative of local Agent, must order labour prior to 1700 for 0700 or 0800 hrs. start the following day. Can order at 0800 for 1000, 1100 for 1300 and 1700 for 1900 hrs. start. Gangs must be ordered prior to 1700 hrs. on Saturday for Sunday or holiday.

MEDICAL: Give sufficient notice to order doctor or ambulance. Numerous hospitals available. Seaman's health certificate required.

TANKERS: No specific requirements for oil carriers with respect to load/discharge lines. Tankers must be gas free to enter turning basin area. Approximately 12 tanker berths, excluding Humble Oil & Refining Co. in Baytown, Texas.

DENSITY: Classed as full fresh but varies with rainfall and tide, usually 4 to 5 in. allowance on full draft.

FRESH WATER: Available at all terminals through pipe and hose.

FUEL: All grades and viscosities available.

FIRE PRECAUTIONS: All standard precautions per code of Federal Regulations plus local ordinances. Tankers, unless gas free, not permitted at wharves in the immediate turning basin area.

GANGWAY/DECK WATCHMEN: Not required, but are available and can be arranged by local Agent at Master's request.

OPENING/CLOSING HATCHES: By stevedores only – vessel will be charged for this work if done by crew.

CUSTOMS ALLOWANCE: Tobacco, 300 cigarettes, 100 cigars, 1 lb. of tobacco or combination for each man. Wine and/or Spirit, 1 quart bottle for each crew member.

CARGO GEAR: Cargo gear safety certificate required.

IDENTIFICATION CARDS: Immigration Form I-95 card required.

REPAIRS: All types available.

DRY DOCKS: Todd Shipyard, 12,000 ton drydock at Greens Bayou.

REPATRIATION: Danner Guard Service can handle all phases.

AIRPORT: Approximately 0.5 hour by car; served by regular airlines.

TIME: Central Standard with daylight saving time effective from April to October.

HOLIDAYS: January 1st; February 22nd; March 2nd; May 30th; June 19th; July 4th; First Monday in September; November 11th; December 25th. No work performed on first Monday in September and December 25th except in emergency.

POLICE/FIRE/AMBULANCE: All services provided or available.

TELEPHONES: Currently no arrangements for placing telephones aboard but easily accessible on wharves.

SERVICES: All services available.

SHORE LEAVE: Shore leave granted except when individual not qualified.

DEVELOPMENTS: Channel depths to be maintained at 40 ft. Bayport development East and South of Morgans Point to have deep draft berths for liquid bulk and general cargo.

SHIPMASTER'S REPORT: 1975.

Customs:

Bond remained sealed.
2 Copies of Curio Lists.
2 Copies Store Lists.
1 Crew List.

Immigration:

No visit. 1 Crew List.

Agents:

Given Travelling copies of Clearance last port, Tax Tonnage receipt last port plus cargo manifests.

Agricultral Dept. Re-sealed Meat and vegetable rooms. Inspected Galley Messrooms, etc. Garbage cans to be covered.

Provisions and Stores. Satisfactory. Select own ship chandler.

Laundry. Facilities available but not used.

Coast Guard. No visit.

National Cargo Bureau: Same as New Orleans.

Watchmen: None placed on board. Security at gate fairly strict.

Telephone: None placed on board. Use dock office.

Fresh Water: Available.

Fuel: Available by barge if required. Do not over stem.

Engineering and Repairs: Efficient and satisfactory. Price high compared to N.Z.

Radio Messages: Send ETA after departure New Orleans to Agents and Houston Pilots with draft. Notify Agents of any explosives.

Stevedores: Hours of work. 0800 to 1200 hrs., 1300 to 1800 hrs., 1900 to 2300 hrs. Weekday gangs will work through meal hours to finish. At weekend, day labour works right through to midnight if necessary on time and a half then double time for meal hours.

Crew must not clean hatches. Labour has claim on cleaning and has to be paid in addition to crew. Crew open and close hatches, but not until hatch foreman present. Not before labour working hours.

Working heavy lifts with ship's gear loading rate very slow, especially at end of shift. Due to nature of deck cargo; 11 ton lifts 52 ft. long.

Constant supervision needed for deck cargo.

Head stevedore checks Factory Act Book before starting.

No plan makers. Details sent back to New Orleans for redistribution to discharge ports.

General: Pilot boards from large grey metal cutter off fairway buoy. Flash every 2.5 seconds. Give good lee and have ladder 8/10 ft. above water with usual manropes, heaving line, etc.

If you have to anchor most vessels use the Eastern anchorage about 1.5 miles East of fairway buoy and clear of fairway marked channel. Soft mud bottom. Use plenty of cable.

Berth; Ships spaced very close to each other. Rise and fall of tide about 1 ft.

Moorings: at least 4 head lines and stern lines plus 2 springs each end. Ships frequently passing and channel narrow consequently a good deal of surge. Lines to be frequently looked at and kept tight. Parted 3 springs in as many days!!! Gangway also to be watched. General rule is to use ship's gangway. Wide apron in front of sheds with rail lines but fork-lifts used most.

Agents have office on wharf with direct line to city office and outside lines.

Wooden piling which acts as fenders. Bollards of the large cleat type. Sufficient but not plentiful. Two linesmen each end when arriving and departing. No permanent cranes but mobile ones can be hired. Quay about 25 ft. above water.

Recommended not to walk about or up to bus especially at night. Better for 2 or more to get a taxi. Fairly good 3–4 dollars to Houston.

Seamans Mission near by. Very good, new and modern.

Tugs: Used for berthing and unberthing. Had 2 on arrival due to strong wind and close proximity of mast top to bridge.

Sailing had 1 tug lashed up alongside forward shoulder.

Tugs use own lines.

Bridge: There is a bridge above Upper Clinton Bend from Manchester on the South to Clinton Park on the North. This is a relatively new bridge to be passed under with a clearance of only 135 ft. Check the rise of tide on way up.

AUTHORITY: Port of Houston Authority.

HUENEME, California: 34.09 N. 119.12 W.

(See Plan Book)

DOCUMENTS: See "San Francisco".

PILOTAGE: It is requested that ships entering port stand by 1 mile off harbour entrance and await port Pilot who will board from a tug. The U.S. Coast Guard Station at the harbour entrance maintains a radio beacon.

All vessels 300 gross registered tons and over entering, leaving and shifting within the Port of Hueneme, including area of the Oxnard Harbour District, must be piloted by a port Pilot duly licensed to perform the services of piloting vessels within the Port of Hueneme. The Oxnard Harbour District does not maintain Pilots; licensed Pilots are available on a 24-hour-a-day basis from the Commanding Officer, Naval Construction Battalion Center. As a service to all vessels, requests for Pilots may be made by Agent or ship to General Manager of Oxnard Harbour District, who will act for ship in obtaining necessary Pilots. They can also be obtained by an electronic message request addressed to "CO, CBCEN, PORHUE" or by direct request to the Port Services Officer, U.S. Naval Construction Battalion Center. It is not necessary to change Pilots at this port.

ANCHORAGE: If there is a wait for Pilot caused by weather, visibility, congestion in harbour, or any other reason, the best anchorage area is W.S.W. of the harbour entrance where there are no hazards and there is some protection afforded by the natural curve of the coastline.

RESTRICTIONS: The length of entrance channel is 2,300 ft. The narrowest width of harbour entrance channel is 330 ft. However, because of prevailing fresh winds, this is a one-way channel; thus, deep-draft ships not able to manoeuvre easily in a restricted channel have precedence over smaller craft.

RADIO: The U.S. Coast Guard Station, Channel Islands Marine, located at the entrance to harbour, guards the following frequencies: 2182 kc/s., 156.8 mc/s., and VHF Channels 12, 16, 21, 22, 23 and 83. After initial call up the Coast Guard can shift to 2670 kc/s., 2694 kc/s., 5080 kc/s. The Naval Construction Battalion Center (Port Hueneme Control) guards Channel 16. The harbour tugs guard Channel 16 continuously. The harbour Pilots, when expecting a commercial merchant vessel guard Channel 16 voice circuit and voice call "Port Hueneme Pilot".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

Ships required to pass quarantine may enter port and moor. "Q" Flag is to be flown. Upon mooring, ship must post gangway watch until ship has passed quarantine. When Port of Hueneme is its port of first arrival in the United States from foreign ports or from States other than California, a ship must be inspected by the Department of Agriculture. There is a local representative in Oxnard. The Oxnard Harbour District will order officials if requested by ship or Agent.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Tug services for port of Hueneme are furnished by the Commanding Officer, Naval Construction Battalion Center, Port Hueneme, California. Requests for tug services may be made to the General Manager of the Oxnard Harbour District, who will act as Agent for ship in forwarding them. 2 tugs are available on a 24 hour basis. They are Class YTB, with 2,000 shaft horsepower. The number of tugs to be used on any movement is determined by port Pilot in charge of the movement. Tugs are not available for deep-sea towing, except in case of emergency to save life or property. As a service to all vessels, the Oxnard Harbour District, acting as Agent for vessel, will pay all necessary tug fees to United States Government, subject to reimbursement conditions as arranged between the vessel, her owners, or Agents, and the General Manager, Oxnard Harbour District. Seldom are tug charges more than the minimum due to the short transit time to berths.

BERTHING: Berthing arrangements should be made with the General Manager by Agent as far in advance of arrival date as possible, specifying dates of arrival and sailing, and nature and quantity of cargo to be handled. The Oxnard Harbour District also has a licence agreement with the U.S. Naval Construction Battalion Center, Port Hueneme, for the use of additional berths and terminal facilities on an "as available" basis. Prior arrangements must be made, should use of these additional facilities be desired or necessary. The Port of Hueneme has three 600 ft. berths with depth 35 ft. MLW and appropriate terminal facilities. At the present time there are 10 deep-draft berths within the entire port area.

Bottom is sand and mud. Mean low water is + 1.5 ft. Height of wharf above the MLLW is 13 ft.

STEVEDORES: All stevedore work is presently performed by resident stevedores, the Marine Terminals Corporation, who also have offices in San Francisco, Long Beach, etc. They maintain an office at 111 Ponoma Street, Port Hueneme. They provide modern handling equipment to suit cargo's need. There is no special fixed bulk handling equipment available as yet. Longshoremen are members of the International Longshoremen's and Warehousemen's Union and conform to the Pacific Coast Longshore Agreement. Hours of work are as outlined in this agreement. Longshoremen at this port do all covering and uncovering of hatches and rig the gear. There are 8 gangs available in the port. Day and night gangs for Tuesday through Saturday (except Monday through Saturday, 1900 hrs. initial start) must be ordered by 1530 hrs. the previous day. Night gangs required Monday for a 1900 hrs. initial start, and Sunday and Monday gangs must be ordered by 1100 hrs. Saturday. Cancellation time is same as ordering time, if gangs which have been ordered are cancelled after the aforementioned deadlines, the agreement's 4 hour minimum applies. Normal day shifts begin at 0800 hrs. and normal night shifts at 1800 hrs. Each shift consists of 8 hours and on sailing day 10 hours may be worked by the final shift. There are no obstructions on the wharf to keep all hatches from being worked concurrently.

MEDICAL: Patients are provided with medical attention at the Medical Center, Port Hueneme, or St. John's Hospital, Oxnard California. Temporary visa must be obtained from Department of Immigration and Transportation if a crew man or passenger must remain after the ship sails.

FRESH WATER: Fresh water is available. There are hydrants along the wharf and delivery to ship is effected by hose. Water is good to taste but is hard. It is suitable for boilers. Contact wharfinger on duty for delivery of water.

FUEL: Diesel oil is obtainable from a local port-based tenant. Quantities beyond the capability of that tenant's ability can be delivered by tank truck direct to ship's tanks. In an emergency, the Navy will make Navy special black oil available.

REPAIRS: Minor repairs may be made in port. Machine shops in Ventura and Oxnard are qualified for normal voyage repair work.

GANGWAY/DECK WATCHMEN: Gangway or special wharf watchmen are available upon request.

TELEPHONES: 2 pay-telephone booths are located at the East end of Wharf 1 adjacent to the wharfingers office and one at the West end of warehouse No. 2 and maintained for the convenience of ships berthed at Wharf 1. The wharfinger's office has a telephone which may be used by people calling in to contact the ship. This phone is manned 24 hours a day for convenience. Its number is (805) 488-4615. The Port of Hueneme office telephones are available to ship's officers and Agents for local calls or collect long distance calls. Wharf lines permit a telephone to be installed at a nominal charge if desired by Agent.

HOLIDAYS: U.S. Federal and State holidays are observed by the Port and Terminal management. If stevedoring is required on holiday it is performed in accordance with the International Longshoremen's and Warehousemen's Union-Pacific Coast Longshore Agreement.

AUTHORITY: The U.S. Navy (Commanding Officer, U.S. Naval Construction Battalion Center) exercises overall Port Control Authority; the Oxnard Harbour District is solely responsible for its commercial operations.

Oxnard Harbour District Board of Harbour Commissioners, Port Hueneme.

AGENT: See "Los Angeles".

HURON, Ohio: 41.24 N. 82.35 W.

Refer to "St Lawrence Seaway" for important general information.

PILOTAGE: None required other than what is required for Great Lakes.

ANCHORAGE: Depth 3 to 10 fathoms.

MAX. SIZE: Length 716 ft., breadth 75 ft., draft 26 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMI Lorain.
TUGS: Meet vessel at the Pier Head. Use ship's lines.
BERTHING: Norfolk and Western Ore Dock, operated by the Lake Erie Dock Co., can handle 15,000 tons of ore in 8 hours. Ore slip is 1,400 ft. long with 26 ft. of water.

Limestone Dock, 700 ft. length with 26 ft. of water.

Grain loading facilities operated by the Pillsbury Company. Load speed, 20,000 bushels; unload speed, 15,000 bushels; berthing space, 832 ft.; max. length, 610 ft.
STEVEDORES: None available.
FRESH WATER: Available.
FUEL: None available.
IDENTIFICATION CARDS: Required by Immigration.
CONSULS: Nearest at Cleveland.
REPAIRS: No facilities.
REPATRIATION: No facilities.
AIRPORT: 50 miles from port (Cleveland International Airport).
POLICE/AMBULANCE/FIRE: 433-4114.
SHORE LEAVE: Allowed.
AUTHORITY: The Huron Joint Port Authority.

JACKSONVILLE, Florida: 30.20 N. 81.40 W.

(See Plan Book)

DOCUMENTS:
Public Health:
Maritime Quarantine Declaration Form HSM 13.19.
Customs:
3 U.S. Customs Manifests for cargo to be discharged at first port of entry.
2 U.S. Customs Manifests covering all other cargo on board vessel for discharge at other than first port of entry.
3 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
3 Curio and Crew Personal Items Lists.
Vessel's Clearance from last port.
Vessel's Register and Load Line Certificate.
Vessel Utilization and Performance Report.
Form MA.578 for dry cargo vessels.
Immigration:
1 Certified Crew List and Landing Permit form I-95A for each crew member.
Valid passport for each crew member.
PILOTAGE: Vessels approach Pilot Entrance Buoy STJ No. 2 (Red) approximately 6 miles at sea off jetty entrance to St. John's River. Pilot station located just inside jetty on river channel at Mayport Naval Station. Pilot station operates both VHF and UHF frequencies, VHF Channels 16 and 18 A. UHF Frequencies 2738 and 2182. Pilot cable address "Jaxpilot". Pilot boards from Pilot boat "Jaxpilot" just East of sea buoy STJ No. 2. Pilot boat does not maintain station at sea but answers call or is dispatched on information by vessels' agents. Vessels anchoring awaiting Pilot should achor as near entrance buoy as safely possible.
ANCHORAGES: 2 anchorages located inside harbour near dock sites with depth of about 31 ft.
RESTRICTIONS: For vessel drawing not more than 30 ft. water no restrictions and vessel can enter and clear harbour on 24 hour basis. Pilots and tug assistance available all hours day or night. Vessels drawing more than 30 ft. required to await tide.
MAX. SIZE: Draft should not exceed 36 ft. for dry cargo vessels and tankers.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tropical Radio, Miami, Fla. Call letters WAX. Lantana Radio, Boynton Beach, Fla. Call letters WOE.
TUGS: Under normal conditions with vessels able to proceed under own power, tugs approach vessel in vicinity of pier at which vessel is to dock. Tugs use own lines but no charge made.
BERTHING: Vessels can dock day or night. Transit time from pilot station to berths about 2 hours.
Blount Island Terminal: Operator: Jacksonville Port Authority. Length of berth, 3,300 ft. Depth alongside at MLW 38 ft. (11.5 m.). Containers and general cargo are handled. One 45 gross ton Alliance container crane, 1×45 gross ton IHI container crane, 1×100-ton Clyde revolving gantry crane and 1×50-ton Clyde revolving gantry crane are available. 1 bridge crane with a span of 450 ft. and lifting capacity of 900 m. tons is now under construction over the graving dock of Offshore Power Systems at Blount Island.

2 Roll-on/Roll-off ramps are available. 1 measures 234 ft.×18 ft. and the other 212 ft.×18 ft. These ramps are designed for use with vessels having side ports.

Also see "Developments".

Tallyrand Docks and Terminals: Operator: Jacksonville Port Authority. Length of berth 2,400 ft. Depth alongside at MLW 34 ft. (soon to be 38 ft.). Cargo handled – General, Cars, Lumber and Petroleum.

Also see "Developments".

Sealand Terminal: Operator: Sea-Land Service, Inc. Adjacent to Tallyrand Docks and Terminals (See Plan). Length 1,200 ft. Depth alongside at MLW 34 ft. 2 container cranes, capacity 27.5 tons and 30 tons.

8th Street Terminal: Operator Joyserv Ltd. Adjacent to Sealand Terminal (See Plan). Length of berth 707 ft. Depth alongside at MLW 34 ft. Cars are handled.

McGiffin & Co. Terminal: Operator: McGiffin & Co. Inc. Finger Pier: Length 440 ft. depth alongside at MLW 30 ft.

Marginal Wharf: Length 1,120 ft. depth alongside at MLW 30 ft. Cargo handled: General cargo, containers, lumber and cars.

Commodores Point Terminal: Operator: Eller and Company. Length of wharf 2,750 ft. Depth alongside 34 ft. Cargo handled: Oil, cement, general cargo and chemicals. Storage facilities: Charter Oil; 340,000 barrels. Glidden – Durkee: 60,171 barrels for chemical storage. Atlantic Cement; 6 silos capacity 40,000 tons. Universal Atlas Cement; 6 silos capacity 32,000 tons.

Jacksonville Bulk Terminals: A subsidiary of Occidental Petroleum. Length of loading berth 1,000 ft. Depth at MLW maintained at 36 – 38 ft. 2 fixed loading towers capable of loading vessel at a rate of 2,850 long tons of phosphate per hour. Maximum outreach 81 ft., clearance above MLW of 40 ft. Terminal also capable of loading phosphate rock, zircon sand (of sufficiently low moisture), granular fertilizers, tackonite, ilmenitite and multite. Storage facilities: 6 concrete silos, each with a designed capacity of 5,000 tons of phosphate rock.

Dunns Terminal: Length of wharf 1,000 ft. Depth 38 ft.

Kaiser Gypsum Company†: Tel. (904) 764-0504. Berth: 635 ft. (205 m.) with dolphins. Depth: 32 ft. (9.8 m.). Terminal for receipt of gypsum rock by self-unloading vessels.

† Negotiations with Celotex Division for purchase, name may be changed.

Kerr-McGee Terminal: Tel. (904) 353-8411. Berth: 620 ft. (190 m.) with dolphins. Depth: 30 ft. (9.2 m.). Receipt and shipment of fertilizer materials.
BRIDGES: Only 1 bridge that vessel would have to negotiate and that only if docking at Commodore Point terminal.
STEVEDORES: Master should keep Agents closely advised by radio of ETA and any amendments to first ETA given. Recommended that Master give ETA 72–48–24 hours in advance to arrival. Enables ordering gangs or cancelling gangs ordered in event of delayed ETA.
MEDICAL: Hospital facilities available. International Vaccination Certificates required by all crew members.
TANKERS: All petroleum terminals provide own hose ranging from 8 in. to 12 in. Prior to arrival, Master should request information from Terminal Company size of connection required.
Private Terminals:

Amerada Hess: Tel. (904) 765-4427. Berth: 200 ft. (60.1 m.) with dolphins. Depth: 30 ft. (9.2 m.). Tank storage capacity: 460,000 barrels. Receipt of petroleum products.

Alton Box Board Company: Tel. (904) 353-3611. Berth: 750 ft. (230 m.) with dolphins. Depth: 24 ft. (7.2 m.). Receipt of residual fuel oil.

American Petrofina: Tel. (904) 355-3151. Berth: 262 ft. (80 m.). Depth: 35 ft. (10.1 m.). Tank storage capacity: 350,000 barrels. Receipt of petroleum products.

Eastern Seaboard Petroleum Company: Tel. (904) 355-9676. Berths 250 ft. (80 m.) with dolphins (1); 160 ft. (48 m.) with dolphins (2). Depth: 18 ft. (5.5 m.). Tank storage capacity: 1,266,000 barrels.

Shipping of petroleum products by barge; loading of barges for bunkering vessels at berth in the harbour; fueling of tugs and small vessels.

Gulf Oil & American Oil: Berth: 200 ft. (60.1 m.) with dolphins. Depth: 33 ft. (11.5 m.). Tank storage capacity: 900,000 barrels.
Gulf: Tel. (904) 765-5541.
American: Tel. (904) 768-2583.
Receipt of petroleum products and loading of barges.

Phillips Petroleum Company: Tel. (904) 353-6740. Berth: 205 ft. (60.2 m.) with breasting dolphins. Depth: 34 ft. (10.5 m.). Tank storage capacity: 243,000 barrels. Receipt of petroleum products.

Shell Oil Company Wharf: Tel. (904) 355-5521. Berth: 230 ft. (98 m.) with dolphins. Depth: 33 ft. (10 m.). Tank storage capacity: 448,500 barrels. Receipt of petroleum products; occasionally fuels towboats and loads barges for bunkering vessels at berth in the harbour. Light marine diesel fuel only.

Standard Oil Company Terminal: Tel. (904) 353-1094. Berths: Barge–300 ft. (92 m.) with dolphins; Tanker–760 ft. (230 m.) with dolphins. Depth: Barge–10 ft. (3.1 m.); Tanker– 32 ft. (9.8 m.). Tank storage capacity: 595,000 barrels. Receipt and shipment of petroleum products. No bunkering of vessels.

Texaco Pier: Tel. (904) 356-6344. Berth: 550 ft. (167 m.) with dolphins. Depth: 32 ft. (9.8 m.). Tank storage capacity: 320,000 barrels. Receipt and shipment of petroleum products; fuels towboats.
DENSITY: Varies from fresh water 1.000 density to mixed salt water 1.0075 density. St. Johns River is fed from fresh water sources and for most practical purposes may be considered fresh.
FRESH WATER: Potable water is available through hose connections at all berths operated by the Port Authority. No water barges.
FUEL: Most grades marine fuels available ranging from bunker "C" to light marine diesels with intermediate blends in between. Most major oil companies have bunkering facilities.
FIRE PRECAUTIONS: No smoking except in officers' lounge and crew's lounge. No open flames. No sparking from funnel.
DEVELOPMENTS: The entire river channel from the jetties on the Atlantic Ocean to the Chaseville Turn has been dredged to a minimum depth of 38 ft. MLW. Dredging is now in progress to Mile 20 which is at the Southernmost boundary of Tallyrand Docks and Terminals.

At Blount Island Terminal an additional 300 ft. of berthing space under construction and a further 900 ft. is planned.

A 50 ton revolving gantry crane is under construction at Tallyrand Docks and Terminals.

GANGWAY/DECK WATCHMEN: Watchmen services available but not necessary.

OPENING/CLOSING HATCHES: Crew may open hatches prior to vessel's arrival at dock. After arrival at dockside this work reserved for longshoremen. Vessels equipped with McGregor type or other automatic opening devices, crew may open hatches at any time. Longshoremen do not open and close these type hatches.

CERTIFICATES: Vessel Register, Load Line, Gear Certificate, Derat.

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes per man. If vessel remains in port over extended period of time, sea stores can be opened under Customs supervision and additional allowances made. Wine/Spirits: No specific limits as to quantity allowed per man; Customs accept Masters' recommendations for allowances so long as they are reasonable. This applies to beers, wines and spirits.

IDENTIFICATION CARDS: Form I–95A only.

CONSULS: Norway, Denmark, Sweden, Finland, Italy, France, Guatemala, Uruguay, Dominican Republic, Germany.

REPAIRS: All types engine and deck repairs possible. 2 well-equipped shipyards.

DRY DOCKS: 3 large dry docks of 18,000 to 33,000 tons capacity and 6 smaller with capacity of 1,000 to 12,000 tons.

REPATRIATION: Facilities available to effect crew changes and repatriation.

AIRPORT: Airport 20 miles. Daily flights to all major U.S. cities.

TIME: Eastern Standard Time and Daylight Saving Time during Summer months late April through October.

HOLIDAYS: Holidays observed by Stevedores: New Year's Day (Jan. 1st); Martin Luther King's Birthday (Jan. 15th); Lincoln's Birthday (Feb. 12th); Geo. Washington's Birthday (Feb. 22nd); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (First Monday September); Columbus Day (October 12th); Armistice Day (Nov. 11th); Thanksgiving (Fourth Thursday November); Christmas (December 25th).

When holidays fall on Sunday, the following Monday observed to the extent of paying overtime and 8 hour minimum pay period shall apply. No work performed on the following holidays: New Year's Day, Independence Day, Labor Day, Christmas Day.

POLICE/AMBULANCE/FIRE: Police 633–4111; Ambulance 633–2211; Fire 633–2211.

TELEPHONES: No facilities available for placing phones on board vessels except in shipyards.

SERVICES: Compass-Adjusting, radar, navigational equipment. No tank-washing or tank-cleaning services available.

SHORE LEAVE: No restriction on shore leave if not detained by Immigration.

REGULATIONS: No garbage to be disposed overside, no pumping of dirty ballast into river. Smoke emissions must be controlled to minimum.

AUTHORITY: Jacksonville Port Authority.

JUNEAU, Alaska: 58.18 N. 134.24 W.

Located at N.E. side of Gastineau Channel, 8 miles from Stephens Passage. Juneau is the capital of Alaska. Open all year.

APPROACHES: Via Chatham Straits, Lynn Canal and Stephens Passage.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pick-up point is Guard Island.

ANCHORAGE: 16 fathoms in centre of Juneau Harbour.

MAX. SIZE: Harbour depth 15/19 fathoms. Tides: diurnal range 16.4 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs, local.

BERTHING: 1. Foss Alaska Line Dock: berthing length 550 ft. 36 ft. LW. No cranes.

2. Juneau Cold storage (capacity 8,000,000 lb.): berthing length 250 ft., 36 ft. LW. Cranes, 2 electric hoists, 3 lift trucks, 40,000 sq. ft. covered shed space. Fresh water.

3. Juneau Ferry Terminal: berthing length 350 ft. 32 ft. LW. No cranes. This is a roll-on, roll-off facility for wheeled vehicles and self-propelled or towed. 35 tons capacity. No covered shed space. Fresh water.

4. Coast Guard Dock: 750 ft. long, 31 ft. deep at face. No storage.

STEVEDORES: 1 gang.

REPAIRS: Minor engine repairs only.

WATER: Available.

FUEL: Not available.

MEDICAL: Hospital available.

TRANSPORTATION: Air and ferry.

DEVELOPMENTS: Berner's Bay under construction 40 miles North, will produce pulp and lumber for export.

KAHULUI, Hawaii: 20.53 N. 156.28 W. (See Plan Book)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Certificate of Registry.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Radio Certificate and Licence.
4 Store Lists.

PILOTAGE: Request for Pilot normally made through Agent or through Harbour Master's office. Contact Pilot on VHF Channel 16. 36 ft. pilot boat, black hull, white cabin. Pilot boards 0.25 mile East of Waihee Reef lighted buoy No. 2. Anchorage 0.5 mile East of buoy.

ANCHORAGE: No anchorage inside breakwaters. Only anchorage 0.5 mile East of Waihee Reef lighted buoy No. 2 in 9 to 12 fathoms.

RESTRICTIONS: 24 hours notice of arrival is obligatory. No tide restrictions.

MAX. SIZE: Max. length 700 ft. Max. draft 32 ft. 6 in.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu.

TUGS: 1 × 1,500 h.p. tug stationed at Kahului. Additional tugs dispatched from Honolulu if necessary. Tug joins vessel between breakwater and Waihee Reef lighted buoy No. 2 Tug's lines normally used. No extra charge.

CARGO HANDLING: Kahului has 1 berth specially equipped to load bulk sugar. Matson Navigation Company operates a straddler to move Matson containers. Ramps are in place at Pier No. 1 for Matson roll-on/roll-off vessels.

STEVEDORES: To be ordered by 1500 hrs. of day prior to operations.

MEDICAL: Hospital facilities available.

TANKERS: Discharge only. 8 in. line for heavy fuel oil, 6 in. lines for light fuel oils. No slop discharge facilities. 2 berths available for tankers, max. draft 32 ft. 6 in.

FRESH WATER: Available from water line at each berth. Rate of delivery about 150 gallons per minute.

FUEL: Small amount of diesel fuel and heavy fuel available in an emergency only.

GANGWAY/DECK WATCHMEN: Services of watchman recommended, usually arranged by Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCE: 20 cigarettes, 50 cigars per man, and 1 bottle wine or spirits.

REPAIRS: Minor deck and engine repairs only.

AIRPORT: Distance to airport 1 mile. Served by regular airlines.

TELEPHONES: Arrangements made with Hawaiian Telephone Co., to install on board.

DELAYS: Occasional delays due to limited berthing space and shortage of stevedore gangs.

POLICE/FIRE/AMBULANCE: Police 244-7811; Ambulance 244-9056; Fire 244-4860.

TIME: GMT minus 10 hours all year round.

AUTHORITY: State of Hawaii, Dept. of Transportation, Water Transportation Facilities Division, Kahului.

KETCHIKAN, Alaska: 55.20 N. 131.38 W.

DOCUMENTS: See "Anchorage, Alaska."

APPROACHES: Port located on Revillagigedo Island. Open all year round. Ships coming from Hecate Straits or outside Graham Island proceed into Dixon Entrance to vicinity of Guard Island where the Pilot will meet them.

Vessels coming up the inside passage from Vancouver BC, are met at Lucy Island pilot station.

PILOTAGE: South Eastern Alaska Pilots Association, Box 1539, Ketchikan Alaska 99901. Telegraphic address; Alaska Pilots Ketchikan.

The Alaska Pilot Service required 5 days, 48 hours, and 12 hours advance notice of ETA and can be contacted on Channel 16 VHF or 2182 kHz.

The pilot boat "Magdalene" (WA 7513) normally rendezvous with the vessel 0.75 miles from Guard Islands.

ANCHORAGE: Safe anchorage can be obtained in the area for deep-draft vessels; however there are no specified anchorage areas.

MAX. SIZE: The largest vessel to be berthed to date is a 26,000 ton freighter; however larger vessels could be accommodated.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Cables to Agent, Receivers, and Pilots can best be routed through AKM Juneau.

TUGS: Tugs can be arranged through the ship's Agent. Lines from tug are normally used with no additional charge.

BERTHING: Alaska Line Dock: berthing length 400 ft., depth 26 ft. at North end, 39 ft. at South end at low water, no cranes.

Talbots' Inc: private berth length 300 ft., depth 35 ft. low water.

Ketchikan Spruce Mill: berthing length 450 ft., depth 33 ft. low water. Height of pier at low water 22 ft.

Ketchikan Pulp Company (at Wards cove, 6 miles North of Ketchikan): private dock, berthing length 800 ft., depth 33 ft. at low water.

STEVEDORES: Stevedores obtained through shipping Agent. 24 hours notice normally required.

4 or possibly 5 gangs available dependent on obtaining casual labour.

MEDICAL: Medical matters may be referred to shipping Agent. Excellent hospital and out-patient treatment facilities are available.

FRESH WATER: Ample fresh water available at no cost.

FUEL: Fuel available for deep-draft vessels: No. 2 Diesel and gasoline.

TANKERS: Tow-away lines required fore and aft.

GANGWAY/DECK WATCHMEN: Recommend security watch for passenger vessels. Watchmen can be arranged through the shipping Agent.

OPENING/CLOSING HATCHES: Done by longshoremen.

IDENTIFICATION CARDS: Crew identification cards are required by Immigration officials.

CONSULS: The nearest Consul is in Anchorage, Alaska.

REPAIRS: Repair facilities are limited. Excellent welding and machine-shop services are available, however.

REPATRIATION: Repatriation matters can be handled through the shipping Agent and Immigration officials.

AIRPORT: Daily flights to and from Seattle as well as points North may be obtained.

TIME: Ketchikan is on GMT minus 8 hours during the Winter and GMT minus 7 during the Summer. Time changes the third Sunday in April through the third Sunday in October.

AUTHORITY: Captain of the Port, c/o U.S. Coast Guard Base, Ketchikan, Alaska.

KINGS BAY, Georgia: 30.49 N. 81.31 W.

DOCUMENTS:

Crew List, from foreign movements, 1 Crew List visaed by American Consul in or near foreign port of departure; Coastwise, U.S.A., 3 copies, 1 for Customs, 1 for Immigration and 1 for the Agents' office.

Curio List, 3 copies, both from foreign and coastwise movements.

Stores List, 3 copies, both from foreign and coastwise movements.

5 copies of Foreign Manifest.

Permit to sail from foreign.

International Vaccination Certificates and/or other health certifcates.

PILOTAGE: Channel entrance is between Cumberland and Amelia Islands, and is approximately 11 miles in length, 200 ft. wide and 32 ft. deep at MLW. Kings Bay Pilot usually boards vessels at the St. Mary's Entrance Sea Buoy No. 1 or 1 mile East of St. Mary's Entrance Buoy No. 2. Pilot may be reached by marine phone (ship-to-shore), Fernandina Beach, Florida, tel. 261-3824 or 261-3495. There are 2 turning basins, one 2,400 ft. long by 800 ft. wide with project depth of 32 ft. at MLW, and the other is 1,996 ft. long by 800 ft. wide with project depth of 32 ft. at MLW.

ANCHORAGE: 2, capable of handling deep draft vessels. Pilot handles this phase.

MAX. SIZE: 650 ft. in length, project depth 32 ft. at MLW

HEALTH: See "Health: All Ports" before first U.S. port Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Kings Bay has only marine ship-to-shore telephone facilities. Cables arrive through R.C.A. Communications via Lantana, Fla., Radio, and Chatham, Mass., Radio via Western Union.

TUGS: Available from Brunswick.

BERTHING: Daylight berthing and sailing only.

STEVEDORES: All stevedoring performed by St. Mary's Stevedoring Company, St. Mary's, Ga., on high explosives. General cargo outside stevedores permitted.

FRESH WATER: Plenty of fresh water available, pumped into ship's tanks via hose.

FIRE PRECAUTIONS: Smoking in the warehouses, on wharf or on any vessel while unloading or discharging any inflammable or explosive cargo is strictly prohibited. In the event of a fire occurring on board any vessel berthed at the Kings Bay Marine Terminal, except vessels under way, such vessel may sound 5 prolonged blasts of the whistle or siren as an alarm indicating fire on board or at the dock to which the vessel is moored. Fire hose on dock and water running therefrom when loading plus fire extinguishers placed at various intervals.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Crew open, stevedores close.

CUSTOMS ALLOWANCES: Tobacco and wine/spirits – reasonable quantities for personal use.

IDENTIFICATION CARDS: Immigration issues landing permit.

REPATRIATION: Via airlines at Jacksonville, Florida, 41 miles away.

TIME: Eastern Standard Time.

HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); National Memorial Day (30th May); Independence Day (4th July); Labor Day (1st Monday in September); Colombus Day (12th October); Thanksgiving Day (4th Thursday in November); Armistice Day (11th November); Christmas Day (25th December). In the event of one of the above holidays falling on a Sunday, the following Monday will be observed.

POLICE/AMBULANCE/FIRE: Police Departments St. Mary's and Kingsland, Ga., plus County Sheriffs. Ambulance, Kingsland. Fire, both Kings Bay and St. Mary's Ga.

TELEPHONES: Only 3 lines and all in office of Blue Star Shipping Co. No telephone service to be placed on board vessel.

SHORE LEAVE: Only via Immigration landing permit. No taxi service, no bus lines operate from Kings Bay, Ga. Since nearest town is 11 miles away, crew as a rule remain aboard vessel.

AUTHORITY: None. Blue Star Shipping Corporation, St. Mary's, Ga., operates the port.

KODIAK, Alaska: 57.47 N. 152.24 W.

Located near the N.E. tip of Kodiak Island in the Gulf of Alaska, South of Anchorage and East of the Alaska Peninsula.

APPROACHES: South of Trinity Islands then N.W. to Cape Chiniak and meet Pilot.

DOCUMENTS: Also see "Anchorage, Alaska".

PILOTAGE: Pick-up point in the vicinity of Cape Chiniak.

MAX. SIZE: Harbour depth in excess of 30 ft. Tides; diurnal range approximately 10 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. ports (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

ANCHORAGE: Fair weather anchorage only.

CUSTOMS: Quarantine, Immigration and Customs, local.

TUGS: From Anchorage.

BERTHING: 1. Kodiak City Dock: made of timber, pile and steel deck. 1 berth only. 350 ft. by 50 ft. Covered warehouse on half of pier 200 ft. by 150 ft. 35 ft. MLLW. Heated space available.

2. Woman's Bay Naval Base: Finger Pier 600 ft. operated by U.S. Navy. Depth of water in excess 40 ft. U.S. Navy permission required for commercial use.

STEVEDORES: 2 gangs.

REPAIRS: Limited. Divers available.

WATER: Available.

FUEL: Light fuels only.

MEDICAL: 26-bed hospital, 3 doctors, 2 dentists, 1 optometrist.

TRANSPORTATION: Air and ferry.

LAKE CHARLES, Louisiana: 30.13 N. 93.15 W.

(See Plan Book)

PORT LIMITS: Buoy No. 26, In Calcasieu Ship Channel, 3 miles off Cameron, Louisiana.

DOCUMENTS:

U.S. Customs: If foreign cargo on board for discharge at any port:

3 copies of Cargo Manifest of all Cargo.

3 copies of Crew List.

3 copies of Store List.

3 copies of Curio List (crew personal effects).

3 copies of Passenger List if carrying passengers.

If vessel in ballast, only 2 copies of above documents required.

If vessel in ballast and carrying passengers, 3 copies of above documents required.

1 copy of Clearance from last port.

2 copies of Customs Form 1300 (Master's Oath).

2 copies of Customs Form 1301 (General Declaration).

U.S. Customs Boarding Officer must examine Load Line Certificate. Safety Equipment Certificate, Tonnage Tax Receipt, Certificate of Financial Responsibility (Oil Pollution), Ship's Register, and Ship's Certificate of Nationality (if any).

2 copies of Customs Form 721 (Inbound Utilization Report).

1 copy of Certified Crew List (If American Ship).

Bonded lockers will be sealed by Customs.

U.S. Immigration:

1 copy of Visaed Crew List from American Consul at foreign port of clearance (if any).

1 I-95 (Identification Card) for each crew member on board.

All passports must be validated for each crew member.

U.S. Bureau of Etomolgy:

All meat lockers and freezers with restricted meat will be sealed. All fruit from prohibited countries will be confiscated. All animals or birds from foreign countries must remain on board.

PILOTAGE: Radio Agent ETA, who will arrange Pilot board at Calcasieu Bar.

ANCHORAGE: At Calcasieu Bar only.

RESTRICTIONS: Entrance channel 40 ft. depth. Distance 40 miles.

MAX. SIZE: 1,000 ft. length, 38 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first USA port (Albany).

RADIO: Tropical – New Orleans, WNU.

VHF: Pilots may be contacted on Channel 12, 13, 65 and 66.

TUGS: Meet vessel 30 minutes away from berth. Use tugs' own lines. 2 for berthing, 2 for unberthing.

BERTHING: General Cargo Berths: 10 with total length: 5,675 ft. All have draft of 36 ft. (fresh water).

CRANES: Mobile pneumatic and track cranes available with lifts up to 50 tons.

BULK HANDLING FACILITIES: 3 bulk-loading berths: No. 1, West bank of Calcasieu River, 8 miles below main port facilities, 960 ft. length, 35 ft. depth, loading rate 1,250 t.p.h.

No. 2, Contraband Bayou Section, main port, 920 ft. length, 35 ft. depth, loading 480 t.p.h. 1,600 tons storage facilities.

No. 3, Contraband Bayou Section, main port, 320 ft. length, 35 ft. depth, loading rate (bulk rice) 180 t.p.h. from stationary tower. Twin 1,250 tons storage tanks adjacent.

SPECIALIZED CARGO HANDLING FACILITIES: 1 berth suitable for Roll-on/Roll-off traffic. 1 berth at main port for liquid chemicals. Private berth to be constructed for private firm for receiving LNG.

BRIDGES: 1 with vertical clearance of 135 ft.

STEVEDORES: Notice of firm ETA and request for gangs must be received prior to 1600 hrs. CST for work following day.

TANKERS: Cities Service Oil Co. B-Dock, 673 ft. length, 36 ft. depth; C-Dock, 660 ft. length, 34 ft. depth; D-Dock 665 ft. length, 36 ft. depth.

Continental Oil Co. Berth 1, 1,000 ft. length, 40 ft. depth; Berth 3, 1,000 ft. length, 40 ft. depth.

Columbia Southern Dock, 700 ft. length, 40 ft. depth.

Olin Mathieson Dock, 400 ft. length, 28 ft. depth.

SHIPMASTERS REPORT: 1977.

Cities Services Oil Co., Clifton Ridge:

Location: 30° 09′ 32″ N., 93° 19′ 30″ W.

Max. Size: Length 805 ft., beam 115 ft., draft 39 ft. (FW).

Density: 1005.

Restrictions: Vessels may berth and unberth at any stage of the tide day or night.

Anchorage: At Bar: 2 miles East of seabuoy in depth of 42 ft. For Bunkering: South of Clooney Island in Old Calsasieu River Channel in midstream.

Distance to Berth: Seabuoy to berth 45 miles.

Terminal Information: 2 × 10 in. Chiksan arms. Max. discharge pressure 150 p.s.i. Derricks not required. Accommodation ladder not required.

Services: Fresh water, provisions, fuel oil, diesel and lube, doctor, hospital, airport and laundry.

The following services are not available: Repairs, drydocks, Lloyd's Surveyor and slop tanks.

Telephone Numbers: Dock 318-583-2432. Terminal Supervisor 318-491-6121, 491-6437.

MEDICAL: Hospital facilities available.

DENSITY: Saltwater in Summer, fresh water in Winter. Allow density 1000 for drafts.

FRESH WATER: Available at all berths.

FUEL: Bunker "C" and diesel available at Cities Service berths; other berths served with bunkers by barge.

FIRE PRECAUTIONS: Usual.

DRY DOCKS: None.

SURVEYORS: National Cargo Bureau.

GANGWAY/DECK WATCHMEN: Not required.

HATCHES: Rigging performed by stevedores. McGregor-type hatches opened by crew, others by stevedores.

CARGO GEAR: Shore cranes available at ship's request.

CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

REPAIRS: Small repairs carried out only; very limited facilities.

REPATRIATION: Facilities exist. Arrange through Agent.

AIRPORT: 7 miles from port. 2 lines (TI, OQ) 15 flights per day.

TIME: CST, that is GMT minus 6 hours.

HOLIDAYS: Only 2 days affected on which no work carried out – Labor Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police, 439-4511; Ambulance, 477-5530; Fire, 433-4633.

TELEPHONES: None on board ship.

SHORE LEAVE: Allowed if not detained by Immigration.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

DELAYS: Very few delays encountered at any berth.

DEVELOPMENTS: Under construction – high speed facility for loading wood chips. In operation: Grain elevator.

AUTHORITY: Lake Charles Harbour and Terminal District, Director of Port.

LONG BEACH, California: 33.45 N. 118.13 W.

(See Plan Book)

DOCUMENTS:

Certificate of Registry.

International Load Line Certificate – Tonnage Certificate (Admeasurement).

Inspection Certificate.

Derat certificate.

Radio Safety Certificate.

Inbound cargo for discharge – United States must have a Travellers' Manifest (Form 7527), original manifest, and dock inspection copy covering cargo to be discharged at first U.S. port of entry, Custom's Utilization Form 7801 (Inbound), Form 7802 (Outbound) must be filed within 10 working days after vessel's entry at first U.S. port. Landing permits must be made out prior to arrival (Form I-95-A) for each crewman of alien origin for the U.S. Department of Immigration (and Form I-94 for each passenger of alien origin). 3 sets of crew lists (Form I-418) must be presented to U.S. Customs, plus 2 sets to the Immigration Inspector, and 1 for the U.S. Public Health Service (Quarantine), and 3 sets stores lists plus 3 sets curio purchases list for U.S. Customs.

American Ships from Foreign:

Safety Equipment Certificate.

Cargo Ship Safety Construction Certificate.

Customs Form 3415 Affidavit of Repairs Abroad.

Certified Crew List.

Foreign Ships:

1 copy of Visaed Crew List for Immigration (Form I-418 & 5 copies). Other forms may be necessary under certain circumstances, but normally can be taken care of after the vessel's arrival.

If a foreign vessel from a foreign port departs for a foreign port, 2 copies of (Form I-418) covering crew changes in the United States must be submitted to the Department of Immigration upon sailing of the vessel.

(*a*) Number of copies required: all single except as noted.

(*b*) The reports mentioned above are all government laws, requested by U.S. Customs, U.S. Immigration, Department of Agriculture, Public Health Service, and B.I.A.

(*c*) Purpose of documents: to record all vessel movements such as cargo, crew changes, health standards, etc.

(*d*) Procedure of presenting documents: documents must be presented to Quarantine Boarding Officer and Customs Broker and/or Agent, during or immediately after Quarantine.

PILOTAGE: Pilots ordered by local Agents. Order placed by telephone to 435-6354. Local tariff requires 1 to 2 hours notice prior to arrival. Pilot station contacted on VHF radio Channel 12 (156.6 mHz) or Channel 16 (156.8 mHz). Call sign KMA-372 Long Beach Pilots. Pilot boats motor cruisers, light grey, fly International Flag "H". Local whistle signal for a Pilot on ship's whistle, 1 short and 1 long blast. Pilot boat normally meets vessels in vicinity Long Beach Sea Buoy or approximately 1 mile South of breakwater entrance. Vessels should have a Pilot ladder on starboard side, weather permitting. In bad weather vessels may be required to proceed inside breakwater entrance prior to Pilot boardg.

ANCHORAGE: Preferably outside anchorage approximately 0.5 mile S.E. of Long Beach Sea Buoy in 66 ft. of water. Inside anchorage available N.E of channel in outer harbour at approximately 8 fathoms of water depth. Special explosive anchorages available by request, on both sides of entrance channel in 48 ft. of water.

RESTRICTIONS: Vessels with dangerous cargoes aboard or loading or discharging such cargo within port district shall obtain permit from U.S. Coast Guard, countersigned by Long Beach Fire Prevention Bureau and Long Beach Port Authority, subject to safety inspection prior entry to assigned anchorage or berth. (Application for entry or handling dangerous cargoes must be requested by Steamship Company or authorised Agent and approved prior entry.)

Also see "Tankers" last paragraph.

MAX. SIZE: (1) Designed depth of water at general cargo berths is 30–36 ft. at MLLW.

The Entrance Channel is maintained at 60 ft. MLLW.

(2) No restriction as to length or breadth of vessel at general cargo berths.

(3) Dry bulk facility berths designed depth at MLLW is 42 ft. No restriction on length. However, ships with over 130 ft. beam might experience some difficulty in loading without turning ship.

There are 5 bulk oil facilities, 2 with 55 ft. of water at MLLW and 3 with 49 to 37 ft. of water at MLLW alongside berths. It is feasible that vessels over 1,000 ft. in length could use the deep-water oil facilities. There are no restrictions as to beam. A sixth bulk oil terminal is planned which will accommodate vessels in the 200,000 d.w.t. class, drawing up to 62 ft.

HEALTH: See "Health; All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (albany).

RADIO: Station KOU Marine Operator, San Pedro.

Channel 1—ship transmit on 2009 kHz
ship receive on 2566 kHz

Channel 4—ship transmit on 2126 kHz
ship receive on 2522 kHz

Station KOU also monitors Channel 16 (156.8 mHz) and Channel 26 (157.3 mHz) for distress, safety and calling.

RADAR/VHF: Radar service provided to vessels only if Pilot aboard, in which case radar advisory information will be fed from shore-based radar at Pilot station.

Station	*Channel*	*Frequency (mHz)*
Distress, Safety and Calling	16	156.8
Marine Exchange	12	156.6
	14	156.7
Long Beach Pilots	12	156.6
Los Angeles Pilots	14	156.7
Harbour Tugs	65	156.275

Station	*Channel*	*Frequency (mHz)*
San Pedro Tugboat Co. "Red Stack Tugs" Company Office	10	156.5
Universal Marine	18A	156.9
Wilmington Transportation Co. Company Office	7A	156.35
H-10 Water Taxi	7A	156.35
San Pedro Telephone Marine Operator Station KOU	26	157.3
Mandatory Bridge to Bridge	13	156.65

TUGS: Tugs will meet vessel inside breakwater prior reaching inner harbour area. Pilot and tugs are in communication.

BRIDGES: No restrictions into port of Long Beach. The Gerald Desmond Bridge over Back Channel has vertical clearance of 155 ft. Cerritos Channel which connects Long Beach through back channel to Port of Los Angeles has 2 bridges which must be opened for passage of vessels.

Signal for Opening: 3 long blasts on horn or whistle. During inclement weather, call through a megaphone or loud and distinct stroke of bell.

BERTHING: No requirements as to time of entry providing berthing arrangements have been made with Port Authority. Assignments classified as follows:

Preferential Assignments. Secondary Assignments, Subordinate Right granted for use of Preferential Assigned Berth. Temporary Assignment – temporary permission granted to use certain berth.

Note: All berth assignments shall be held by Assignee subject provisions of Port of Long Beach Tariff as to charges, rates, rules and regulations applicable thereto, and to all of terms, conditions and provisions contained in such assignment.

General Cargo:

	No of berths	*Total length (ft.)*	*Depth (ft.)*
Pier A	10	6,312	30–36
Piers B, C, D	12	7,686	31–36
Pier F	4	2,467	32–36
Piers 1 and 2	6	3,000	36

BULK HANDLING FACILITIES: *Berth 28–29:* Length 993 ft., depth alongside 43 ft. 1 fixed bulk loading tower with hinged cantilevered boom with 31 ft. 6 in. outreach. Max. loading rate 800 t.p.h. Cargo handled: Borax, coal, coke, iron ore, pitch, potash, soda ash and zinc ash.

Berths 30–31: Length 992 ft., depth alongside 43 ft. 3 electric, travelling, revolving, high-tower, full-portal gantry cranes, each with lifting capacity of 30 tons. Cranes can be equipped with buckets and hooks, or electric magnets. Loading rate 200 t.p.h. each crane. Types of carggo handled: steel and iron scrap, pig iron, steel slabs, ore, urea, bauxite, rutile sand.

Berths 210–211 (Grain Terminal); Length 1,100 ft., depth alongside 40 ft. Travelling Gantry ship loader having a loading capacity of 65,000 b.p.h. connected to an overhead shipping gallery and belt conveyor system. This belt conveyor system connects to another transfer gallery extending from the grain elevator and silos (2,225,000 bushel storage capacity).

The grain terminal is equipped with the latest state-of-the-art dust collection system. There is an aerveyor system for ship discharging.

Berths 212–215 (Bulkloader); Length 2,110 ft., depth alongside 34 ft. Depth 9 ft. off the berth is 40 ft. Breasting camels 20 ft. wide available. Stockpile area 85,682 sq. ft. (7,960 sq. m.). 1 electric, travelling, bulk shiploader with retractable, straight-line bridge boom having 58-ft. outboard reach-height of 60 ft. above MLLW. Boom equipped with 48-in. electric belt conveyor and a telescopic loading spout with mechanical trimming head. Loading rate 4,000 long tons per hour. Shiploader travels along rear of face for distance of 1,485 ft. Bulk materials are handled by 48-in. and 54-in., electric belt conveyor system extending to shiploader through tunnel reclaim from car unloading sheds and storage areas. Types of cargo handled: iron ore, coke, coal.

Open storage: 225,000 tons.

Covered storage: 270,000 tons.

CONTAINER HANDLING FACILITIES: *Berths 227–228–229:* Length 1,950 ft., depth alongside 42 ft. Pier G expansion: New land has been created on the East side of Pier G to provide for a 65-acre (26.3 hectares) container terminal which is leased to Sea-Land Service Inc. This terminal is complemented by an adjacent 16.3 acre, (6.6 hectares) container freight station, also leased to Sea-Land. The project includes a reinforced concrete wharf, 4 travelling 30 long ton container cranes with 100 ft. span and 115 ft. outreach, surfaced storage area. There is space for storing 6,541 TEU containers, including 242 spaces for refrigerated containers.

Berth 230: Length 650 ft., depth alongside 42 ft. 2×30 long ton, travelling container cranes with 100 ft. span and 115 ft. outreach. Has space for storing 1,784 TEU containers, including 50 spaces for refrigerated containers.

Berths 232–233–234: Length 2,300 ft., depth alongside 36, 36, 42 ft. respectively. 4×30 long ton electric, travelling Paceco container cranes, each with hinged cantilevered boom with 113 ft. outboard reach. 6 Paceco 40 ton capacity transtainers. Has space for storing 7,323 TEU containers on chassis, plus 200 empty chassis and 140 spaces for refrigerated containers.

Berths 245–246–247: Length 2,100 ft., depth alongside 36 ft. 3 travelling shore container cranes of 45-ton and 40-ton capacity and one 40-ton transtainer. The only public container terminal in Southern California. Expansion of container freight station provides 88,600 sq.ft. inside storage area. Has space for storing 7,435 containers TEU.

SPECIALISED CARGO HANDLING FACILITIES: *Berths 32–33 (Tallow, Coconut Oil, Bulk Copra):* Length 824 ft., depth alongside 36 ft. 2×6-in. pipe-lines extend from Berth 32 to 9 coconut oil storage tanks, total capacity 7,750,000 lb.; 12 tallow storage tanks, total capacity 48,211,300 lbs. (24,105 short tons).

Berth 83 (Gypsum, Lumber, Oil, Gasoline): Length 600 ft., depth alongside 38 ft. Vessels unload gypsum rock into an adjustable, elevated, receiving hopper at pier face, served by an elevated 36-in., electric belt-conveyor system extending to a 60,000-ton capacity dome-roof storage building in rear. Open storage: 335,075 sq.ft.

Berth 122 (Auto or Multi-purpose); Length 765 ft., depth alongside 40 ft. Multi-purpose open berth capable of handling vessels with self-contained or mobile cranes, lumber, steel and other general and special cargoes. Also ideally suited for automobiles. An adjacent 12.4 acre storage area is available for autos and other commodities. Dolphin and cat walk design to accommodate large vessels.

Berths 243–244: Length 1,200 ft., depth alongside 42 ft. These berths are shared by Port Auto Terminal No. 1, operated by Toyota Motor Sales and covering 35 acres, and Port Auto Terminal No. 2, operated by the Pasha Group and covering 40 acres. Toyota's facility provides for offices, warehousing, dewaxing, painting, repairing and accessory installation, with 28,000 sq.ft. under roof and storage for 6,000 automobiles. Pasha's facility furnishes an automobile preparation centre, offices and dewaxing operation, with 41,000 sq.ft. under roof, plus storage area for up to 21,250 automobiles.

Berth 208 (Bananas); Length 550 ft., depth alongside 40 ft. 4 electric, travelling banana unloaders, total capacity 3,000 banana boxes per hour. Electric, belt-conveyor system transfers banana boxes from unloaders to 2 rail car and truck loading platforms and to interior of harbour banana warehouse. Banana warehouse is divided into cold storage and ripening areas. Truck loading platform along West side.

Berth 209 (Salt): Length 550 ft., depth alongside 40 ft. Vessels unload bulk salt into a receiving hopper at outer end of a moveable, inclined, 48-in., electric belt conveyor. This conveyor serves an adjustable elevated receiving hopper at outer end of an elevated, 48-in., electric belt-conveyor system extending to a large open storage area in rear. Unloading rate: 800 t.p.h.

Berth 242 (Liquid Bulk): Length 700 ft., depth alongside 36 ft. Storage capacity: 12,920,800 gallons in tanks ranging in size from 6,000 to 3,000,000 gallons. Product handling equipment: the pumping and pipe-line system is designed to load and unload products to and from barges, ships, rail cars and trucks. Large, heavy-duty pumps efficiently handle a variety of bulk liquids. Molasses is the principal cargo handled.

CRANES: Barge cranes available capacity 45-175 tons. A U.S. Navy floating crane capacity 385 tons available for hire. There is also a derrick barge in the area capacity 500 tons that can handle 750 tons over the stern.

MEDICAL: Advance notice preferable. Adequate hospital and medical facilities available for providing necessary or emergency care. From information available, Public Health Department may, if required, request certain information prior to granting free pratique for inoculations, Vaccination/Fever Certificates.

TANKERS: There are 4 tanker berths available, operated by private companies, in addition to the 7 municipal tanker berths now in operation and 1 in planning stage. Berths have 55 to 37 ft. of water alongside at MLLW. The range between MLLW and MHW is about 3.7 ft. Extreme range of about 9 ft. may occur at times of maximum tide. Chiksan loading and discharge arms are used and adapters available for various size fittings. Tanks available for discharge of ship's residue and SG and API local type oil (loading or discharging).

Petroleum Handling Facilities; Berths 84–87. Length 1,970 ft. Depth alongside 52 ft. Mechanical equipment discharge capacity 32,000 bbls/hour. 24 in. pipe-line to storage and tank farm.

Berths 118–119: Length 1,210 ft. Depth alongside 55 ft. Discharge capacity 50,000 bbls/hour. 14 in.–24 in. pipe-line to storage and tank farm.

The following is part of a letter sent by the Captain of the Port to a tanker operator:

The safety of the port and the VLCC tankers using the harbour for bunkering and provisioning is of paramount concern to the Coastguard. Consequently the following guidelines have been established for all such vessels 200,000 d.w.t. and larger when utilising the Outer Harbour (inside of the breakwater) of the ports of Los Angeles/Long Beach:

a. Vessels may enter or depart the harbour areas inside of the breakwater only during daylight.
b. Minimum visibility of 1 mile is established for vessel movement.
c. Adequate tugboat assistance shall be provided when passing through the breakwater entrances upon entering or departure, and when navigating inside of the breakwater to and from anchorages.
d. A qualified Pilot must be onboard when entering or departing the harbour. One way traffic is to be maintained during the VLCC's transit through the breakwater entrance.
e. Vessel must have a 10% draft clearance under the keel when crossing either the Los Angeles or Long Beach entrance.

f. No "dead ship" status will be permitted without prior approval of the Captain of the Port.

g. No vessel with a beam in excess of 200 ft. shall enter either harbour without the permission of the Captain of the Port.

DENSITY: Local water density 1.025 grams per millilitre or pure sea water at all stages of tide.

FRESH WATER: Potable fresh water available all Municipals berths through 2 in. lines . Rental charge for use of each 50 ft. length water hose when furnished.

FUEL: All grades (viscosities) of bunker fuels available in any amount through pipe-lines at most Municipal berths, and by barge at anchor or at berths if desired. Notify quantity and type desired to local Steamship Company or Agent.

FIRE PRECAUTIONS: 2 fire boats and 1 fire station; in addition City fire service available.

Special fire precautions required at all berths handling petroleum products or dangerous cargoes. In addition to all applicable provisions of Long Beach Municipal Code, flammable and combustible liquids and flammable gases shall be handled and stored at Marine Petroleum Terminals in accordance with minimum fire safety requirements promulgated by Chief, Department of Fire, City of Long Beach.

DEVELOPMENTS:

(1) The complete containerisation complex consists of 13 cranes, 10 berths and nearly 300 acres.

(2) A new bulk oil terminal is planned to accommodate vessels up to 200,000 d.w.t. drawing 62 ft.

GANGWAY/DECK WATCHMEN: Normally used, but only compulsory when detainees aboard.

OPENING/CLOSING HATCHES: Crew can open or close hatches at sea or at anchor. If closed or opened at dockside, the use of longshoremen compulsory.

CUSTOMS ALLOWANCE: Tobacco, each crew member entitled to 300 cigarettes, 50 cigars and 3 lb. of tobacco or combination of above. If the stay in port is such that additional tobacco is required, Customs will so issue. Wine and/or Spirit, not to exceed 1 quart of alcoholic beverage each adult non-resident. This exemption for alcoholic beverages may be applied to more than one kind but not to an aggregate volume of more than 1 quart for each adult crew member.

Note: Upon arrival of vessel from foreign port, or vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use or consumption on board while vessel in port, and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action.

CARGO GEAR: Employer shall not use ship's cargo handling gear until he has ascertained that vessel has a current and valid Cargo Gear Register and Certificate indicating that cargo gear has been tested, examined and annealed in accordance with requirements of International Labor Organization Convention No. 32.

IDENTIFICATION CARDS: U.S. Department of Justice Immigration and Naturalization Service Form I-95-A (Form I-94 for passengers) must be completed.

CONSULS: In Los Angeles. (Area code 213)

REPAIRS: Within greater port area facilities to accomplish all types of deck and engine repairs.

DRY DOCKS: Within greater port area 3 large private commercial dock yards, Bethlehem Shipbuilding and Repair, and Todd Shipyard Corporation, and California Shipbuilding and Drydock Co. with large floating dry docks and repair facilities. Also, 3 large capacity graving docks located at Naval Shipyard available for emergency use by merchant vessels when not occupied by naval vessels.

REPATRIATION: Through U.S. Department of Justice Immigration and Naturalization Service, and clearance of personal effects by U.S. Customs.

AIRPORT: Los Angeles International Airport approximately 18 miles from port, and provides regular scheduled and international airline service.

TIME: GMT minus 8 hours. United States observes Daylight Saving Time, begins at 0200 hrs. on last Sunday of April each year and ends at 0200 hrs. on last Sunday of October of each year.

HOLIDAYS: The subject Legal holidays are defined as follows: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (3rd Monday February); Memorial Day (Last Monday May); Independence Day (4th July); Labor Day (1st Monday September); Admission Day (9th September); Columbus Day (2nd Monday October); Veterans' Day (11th November); Thanksgiving Day (4th Thursday November); Christmas Day (25th December).

Notes: (1) Also, every Statewide Election is a holiday.

(2) Also, any other legal holiday that may be proclaimed by State or National authority is a holiday.

(3) When one of the above days falls on Sunday, the following Monday shall be observed as a holiday.

POLICE/AMBULANCE/FIRE: Port of Long Beach – Police 436-9811; Ambulance 436-9811 or 436-8211. Fire 436-8211; Harbour Security Officer 437-0041; U.S. Customs 436-3916.

In an emergency and unable to dial direct – dial operator giving telephone number and exact location where emergency exists.

TELEPHONE: Installation of telephone aboard ship at Municipal berths.

GENERAL: For information regarding various social organisations, call 436-9041. Long Beach Recreation Department, for information.

SERVICES: All services from tank cleaning to compass and instrument repair available at various locations within greater port area.

SHORE LEAVE: Crewmen allowed shore-leave providing necessary application presented to U.S. Immigration Officer is approved and crewmen's Landing Permit issued (Form I-95A). Customs declaration required for articles to be landed by crew members (1 quart of alcoholic beverage with seal broken is allowed).

DELAYS: Arrival at berths are normally on time as scheduled. However, there are times of inclement weather or lack of cargo at a berth which create a short delay. Shortage of longshoremen can also cause a delay in discharging or loading cargo. No delay experienced in bunkering.

AUTHORITY: Board of Harbor Commissioners, Port of Long Beach.

AGENT: See "Los Angeles".

LONGVIEW, Washington: 46.10 N. 122.55 W.

(See Plan Book)

DOCUMENTS:

3 Complete Cargo Manifests.
3 Store Lists.
3 Possession Lists.
3 Crew Lists on Immigration forms.
Vessel Documents.
Tonnage Tax Statement.
Quarantine Form completed.

At first port of arrival, ship is boarded and inspected by Customs, Immigration, Public Health and Agriculture officials. At each subsequent port only Customs Agent will board prior to docking.

PILOTAGE: See "Portland, Oregon".

ANCHORAGE: Safe anchorages indicated by Columbia River Pilots.

RESTRICTIONS: None in regard to arrival time or state of tide. Channel depth 40 ft. at mean low water and tidal range varies between 2.5 and 4 ft.

MAX. SIZE: No limitation on length or breadth. Draft limited to 40 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Columbia River Pilots have knowledge of tug positions and other knowledge pertaining to tugs aiding a vessel.

BRIDGES: One bridge crossing Columbia River at Longview has sufficient clearance so as not to present a problem. Clearance 169–185 ft. depending on season.

BERTHING: 7 berthing facilities are operated by the Port of Longview starting immediately adjacent to the Longview Bridge and running upstream for a distance of 0.91 miles.

Berths 1 through 4 form one continuous wharf 2,155 ft. long. Berths 1, 2 and 3 are equipped to handle general cargo, logs, tallow, petroleum products and a limited number of containers. 2 multi-purpose travelling gantry cranes serve Berths 1 and 2 and a 600-ton capacity twin-boom derrick for heavy equipment lifts is located at Berth 3. The 3 berths are served by a system of pipe-lines through which petroleum can either be received from tankers and barges or pumped to vessels for bunkering purposes. A bulk liquid plant used for the storage and transferring of tallow serves Berth 2. 5 transit sheds with a total capacity of 144,876 sq. ft. are located along the 3 berths, and railway trackage consists of 1,500 ft. of surface track on the wharf apron plus 2 spur tracks under the gantry cranes.

Berth 4 is used primarily for the receiving and shipping of grain and serves a 5,165,000 bushel capacity grain elevator leased to the Continental Grain Company. The 655 ft. berth is equipped with an overhead grain gallery extending along the wharf with 5 loading spouts. A marine leg at the rear of the wharf is used for unloading grain from barges.

Berth 5, located upstream from Berth 4, is a 515 ft. wharf which extends to 691 ft. with mooring dolphins fore and aft. It was constructed primarily for receiving alumina by self-unloading vessels, but can be adapted to handle most types of bulk ores, minerals or chemicals with modifications. The berth is also used for loading logs from the river with ship's gear and for handling barge traffic. 2 storage tanks are located near the berth with a total capacity of 25,000 tons of alumina.

Berths 6 and 7 form a continuous wharf 1,500 ft. long, with the last 96 ft. upstream portion at an 8 ft. lower level. The berths are equipped to handle general cargo, logs, lash barges, containerized cargo and, at the lower portion, Roll-on/roll-off vessels. Adjacent to the cargo handling area is an open storage site of approximately 14 acres and 2 transit sheds with a total capacity of 120,604 sq. ft. A gantry crane serves both berths and 3 rail tracks are located along the length of the wharf apron.

The Port operates its own facilities and performs all terminal services between ship's tackle and consignees or inland carriers. The only exception is the operation of the grain elevator facility, which is leased to the Continental Grain Company.

In addition to these facilities operated by the Port, there are 9 other berths operated privately in the Longview Port District. Weyerhaeuser Company owns 6 berths and Reynolds Metals Company, International Paper Company and Longview Fibre Company each operate 1 berth apiece. 6 of the 9 berths are used primarily for export while the other 3 are used mainly for receiving raw materials used by the mills.

BULK HANDLING FACILITIES:

Containers: The Berth 6–7 area serves as a multiple use facility, handling both break-bulk and containerized cargo. This complex includes a berthing facility 1,500 ft. long, incorporating a ro-ro dock at the extreme upstream end, an open storage and marshalling site capable of accommodating all sizes of containers, and 2 storage sheds with 120,000 sq. ft. of covered space. The dock and cargo handling area is a 120 ft. wide concrete surfaced area equipped with 3 rail tracks and a crane track.

In addition to the Berth 6–7 area, containers are being handled at Berths 1–2 where there is also considerable back-up storage area available for the storage of containers.

Grain: The Continental Grain Company operates the 5,165,000 bushel capacity grain elevator at the Port of Longview Terminal.

An overhead gallery equipped with 2 × 36 in. electric belt conveyors extends from the elevator to the grain berth and then for 255 ft. along the length of the wharf where it serves 5 vessel-loading spouts. Vessels can be loaded with grain through any 2 spouts at a combined rate of 29,000 bushels per hour.

Incoming waterborne grain is unloaded from barges moored alongside the rear of the wharf by a bucket-type marine leg at a rate of 12,500 bushels per hour. The marine leg feeds grain onto a conveyor system located beneath the dock which then carries back into the elevator.

The elevator has a rail car tipper for unloading grain from box cars at a rate of 9 cars per hour; facilities for emptying hopper-type rail cars; a hydraulic truck dumper; a portable-type marine leg for unloading grain from vessels to trucks at a rate of 5,000 bushels per hour; and a spout for loading rail cars.

Other equipment includes a fumigation system, washer, separators, scourer, dryer and scales.

Ore: A facility for unloading aluminium ore is located at Berth 5. The discharge equipment consists of 2 travelling hoppers with boom conveyors which extend over the face of the wharf to the side of self-unloading vessels. The hoppers feed ore onto a 60 in. electric belt conveyor located along the rear of the wharf. This conveyor feeds onto another conveyor which travels from the berth to 2 storage tanks which have a total capacity of 25,000 tons. A metering system located at the storage tanks fills hopper-type rail cars for outbound movement of the ore.

Roll-on/Roll-off: A 240 ft. extension to the upstream end of Berth 7 to accommodate Roll-on/roll-off vessels is now available at the Port of Longview. 96 ft. of the extension are constructed at a level 8 ft. lower than the remainder of the dock and will serve as the loading/unloading area to accommodate a ro/ro vessel's stern ramp. This section will have a width of 50 ft. from the wharf face to the access ramp leading to the upper level of the dock. The entire extension is constructed of concrete and steel on timber piling.

CRANES: 2 electric-powered gantry cranes serve Berths 1 and 2 on 550 ft. of track. They are readily adaptable for handling various types of bulk cargoes, containers, logs, machinery and large equipment. 1 crane is equipped with a 130 ft. boom and has a capacity of 60 tons at a 45 ft. radius. The other crane has a 120 ft. boom with a 50 ton capacity at a 45 ft. radius. Both cranes are served by two 400 ft. railroad tracks permitting direct handling between rail cars and vessels.

A third gantry crane serves Berths 6–7 on 1,050 ft. of track. This crane has a 165 ft. boom with a capacity of 50 tons at a 45 ft. radius. 2 × 1,000 ft. rail tracks are located between the crane tracks for handling rail cars at shipside.

The 600 ton capacity 'Columbia Giant', a fixed twin-boom derrick is located at Berth 3.

STEVEDORES: At least 24 hours notice necessary to arrange gangs before ETA. Arrange through port Office via Ship's Agent.

MEDICAL: Hospital facilities available.

TANKERS: Petroleum discharge lines consist of 1 × 12-in. and 3 × 8-in. pipelines. 1 tanker berth available.

DENSITY: Columbia River is fresh water at Longview.

FRESH WATER: Available through 8-in. line with 2.5 in. connections. Rate of delivery approx. 14.5 t.p.h.

FUEL: Bunker C fuel available through 12-in. line at 850 b.p.h., and light diesel fuel through 8-in. line at 1,200 b.p.h.

GANGWAY/DECK WATCHMEN: Not needed, but arrangements can be made if necessary.

OPENING/CLOSING HATCHES: Work carried out normally by stevedores.

CUSTOMS ALLOWANCE: See "Portland Oregon".

IDENTIFICATION CARDS: Advisable but not necessary.

CONSULS: At Portland, Oregon.

REPAIRS: Some deck and minor engine repairs are possible at Longview.

REPATRIATION: No facilities for effecting crew changes or repatriations.

AIRPORT: Nearest airport served by regular airlines is in Portland. Charter flights may be arranged from a small local airport.

TIME: GMT minus 8 hours. In addition, clocks are moved ahead 1 hour on the last Sunday in April and returned back 1 hour on the last Sunday in October, at 0200 hrs. local time on those 2 days.

HOLIDAYS: New Year's Day (Jan. 1st); Washington's Birthday (Feb. 22nd); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (first Monday in September); Veteran's Day (Nov. 11th); Thanksgiving Day (fourth Thursday in November); Christmas Day (Dec. 25th). Cargo work can be arranged on most of these holidays.

POLICE/FIRE/AMBULANCE: Police 911; Fire 911; Ambulance 636-3120.

TELEPHONES: Available at dockside.

SHORE LEAVE: Crews allowed ashore if papers are in order.

AUTHORITY: Port of Longview.

AGENT: See "Portland, Oregon".

LOS ANGELES, California: 33.43 N. 118.17 W.

(See Plan Book)

PORT LIMITS: The seaward boundary of the port of Los Angeles is, for most purposes, the breakwater through which arriving vessels pass at Angeles Gate Light.

DOCUMENTS: First Port of Arrival.

1 Complete Manifest deposited with customs, original and traveller.
1 Complete Manifest returned to vessel.
1 Manifest of first port cargo deposited with customs broker.
2 Quarantine Declarations (Form PHS 43).
2 Agriculture Declarations (Form AIQ 43).
1 Visaed Crew List (Form I-418) 5 additional copies.
1 Crewman's Landing Permit (Form 1-95A) for each crew member and (Form I-94) for each passenger.
1 Dangerous Cargo Manifest deposited with Captain of the port. 1 copy in hands of Chief Officer for review by the Fire Department.

The Coast Guard Captain of the Port must be informed of vessel's ETA 24 hours prior to vessel's arrival.

Second and each subsequent Port of call in U.S.

2 Manifests of Cargo for second U.S. port left with customs.
1 Travelling Manifest returned to Master.

(*Note:* Travelling Manifest is carried and deposited with customs at final port of discharge in U.S. – in addition to above required documents 4 additional copies should be available.)

PILOTAGE: Request made through Agent. Contact can be made through VHF Channels 14 (156.7 mHz) or 16 (156.8 mHz). Not less than 1 hour notice of arrival or departure. 1 long and 1 short blast on ship's whistle or siren, or international signal. Pilot will board in vicinity of sea-buoy (LA entrance buoy, lighted bell buoy "L.A." black and white vertical stripes. Radar reflector).

ANCHORAGES: Anchorages defined on charts. No permit required to anchor less than 10 days. Permit for over 10 days obtained from Captain of the Port, USCG and Harbour Department Port Warden. Permit is required for Explosive anchorage.

MAX. SIZE: Restrictions on draft only. Main channel and inner harbour 35 ft. Super tanker terminal in outer harbour has fairway of 51 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph, call letters "KOK" Los Angeles radio.

RADAR/VHF: The Los Angeles Harbour Pilot's station equipped with radar for use of Pilot. The Pilots also monitor VHF Channels 14 (156.7 mHz) and 16 (156.8 mHz).

TUGS: On stand-by 24 hours a day. However, should be ordered prior arrival. Tugs join vessel in main channel, tug lines used, except when towing astern.

BERTHING: Generally arranged through Agent. Berthing under control of Port of Los Angeles' Chief Wharfinger. There are 32 general cargo berths with depth alongside 35 ft.

BRIDGES: Highway suspension bridge (Vincent Thomas) crosses main channel between berth 95 and berth 225; overhead clearance of 185 ft. in centre. 2 bridges on Cerritos channel separating Los

Angeles and Long Beach harbours, 1 a double leaf-bascule (Badger Avenue Bridge) the other is a lift bridge (Schuyler F. Heim), as these bridges are less than 50 ft. apart they will be treated as one, overhead clearance 155 ft. at centre of Heim bridge.

SPECIALISED CARGO-HANDLING: There are at least 7 terminals capable of handling the port's roll-on/roll-off traffic.

The bulk loading facility,especially designed to handle iron ore and iron ore pellets, also handles other commodities such as coal and other dry bulk materials. Wharf length 800 ft. Depth alongside 51 ft. Loading rates up to 3,000 t.p.h., and unloading 500 t.p.h. The grain and tallow terminals at berth 174 have 13 silos that hold 410,000 bushels. Vessels can be loaded at a rate of up to 400 t.p.h. Accommodating vessels up to 35 ft. draft, any length.

Other specialised facilities include the GATX Petro Chemical Terminal, designed especially to receive petro chemicals; the Hugo Neu Corporation installation, where old automobiles are reduced to scrap metal for export; Coos Head and Sun Lumber Terminals; Cargill and National Molasses Terminals; United Fruit Company's Banana Terminals; and the processing and shipping plant of the U.S. Boron Company.

STEVEDORES: Agents make necessary arrangements.

MEDICAL: Necessary to notify Agents of required medical attention: this can be done when final ETA is determined. Hospital facilities available (private).

Vaccinations/fever certificates, etc., shall conform with rules and models prescribed by the International Sanitary Regulations.

TANKERS: Load and discharge lines have 6-and 8-in. standard flanges (super-tanker terminal has 12-in. lines with standard flanges). If not so equipped ship must furnish its own "C" clamps. Recommend ship have reducers on board to handle 6-and 8-in. flanges. Residue discharge facilities available for limited quantities. All types and grades of petroleum available. 20 tanker berths available in inner harbour, 35-ft. draft at MLLW, 2 are available outer harbour 51 ft. draft at MLLW. Also see Long Beach "Tankers".

DENSITY: Average density 1026 (exception during or after heavy rain).

FRESH WATER: Availability unlimited, delivery universal, rate of delivery 100 t.p.h.

FUEL: Unlimited fuel, all grades at attractive rates. 48 hours advance notice generally required.

FIRE PRECAUTIONS: Whenever vessel bunkering, sufficient serviceable fire hose with suitable nozzles attached to reach all parts of vessel shall be connected to fire main on vessel and made ready for instant use at all times during bunkering operations. If no adequate water pressure available on board, connections shall be made to shore lines to obtain adequate pressure. All Tank Ships shall be moored bow seaward and have wire towing pendants rigged fore and aft readily available for emergency use, fire hoses shall be connected as above at all times while vessel in port.

International fire signals will be used in case of fire (5 prolonged blasts of ship's whistle or siren of 4 to 6 seconds duration).

DEVELOPMENTS: Depths at Los Angeles will be increased in the Inner Harbour from 35 ft. to 45 ft. by 1979, and from 50 ft. to 80 ft. in the Outer Harbour by 1980.

A new container wharf is to be constructed in the main Channel of the port on the site of berths No. 233–235. The new facility will serve conventional containerised cargo.

GANGWAY/DECK WATCHMEN: Gangway watch recommended. Tankships and vessels handling dangerous cargo required to have gangway and deck watch.

OPENING/CLOSING HATCHES: Automatic hatches may be opened and closed by crew, manual hatches opened and closed by stevedores.

CERTIFICATES: *Passenger Vessels:*

Safety Certificate, with 50 or more passengers must comply with 1966 amendment (fire safety amendment) to Solas 60.
Load-line Certificate.
Radio Certificate.
Radio Telephone Certificate, if aboard.

Cargo Vessels:

Safety Equipment Certificate.
Load-line Certificate.
Certificate of Inspection/home Certificate.
Trading Certificate.
Cargo Gear Certificate.
Radio Certificate, Radio Telephone Certificate, if aboard.

If carrying passengers from U.S. ports, vessels must have PAC (Persons in Addition to Crew) Certificate issued by USCG.

Tanker Vessels:

Same as cargo. Exception: if carrying exotic cargo, required to have cargo facilities plan, reviewed and approved by USCG, Washington, D.C. On vessel's first visit it will be inspected and receive a letter of compliance.

CUSTOMS ALLOWANCES: Tobacco, either 300 cigarettes, 50 cigars, or 3 lb. of smoking tobacco, for the personal use of crew member. Wine and/or Spirit, 1 quart for personal use of crew member.

CARGO GEAR: Gangway net attached between ship and dock; extending 5 ft. beyond turntable in one direction and 5 ft. beyond point of intersection of gangway and stringpiece in the other direction. Preventer guy must be rigged separately to head of boom from working guy. Exception if cast head of boom is capable of withstanding the stress of all the lines attached thereto. (This is a West-Coast requirement.)

IDENTIFICATION CARDS: 1 crewmans landing permit (Form I-95A) or immigration card (Form D-1).

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: Largest dry dock 659 ft. by 97 ft., 22,000 displacement tons. 3 smaller dry docks (17,500, 15,000, 10,000 tons).

REPATRIATION: Arrangements can be made through immigration on request of Agent to have crewman change ship or return to home port.

AIRPORT: Approximately 20 miles to International Airport which serves all major airlines.

TIME: Standard Time, GMT minus 8 hours. Daylight saving time GMT minus 7 hours (April through October).

HOLIDAYS: Cargo may be worked on holidays with holiday pay scale. Exception: the first Thursday in July, at which time it is almost impossible to find working crews, although there are now exceptions to this practice.

POLICE/AMBULANCE/FIRE: The telephone numbers are all the same (area code 213) 831-9211, simply ask for Police, Ambulance or Fire. Fire Alarm boxes adjacent to all cargo sheds.

TELEPHONES: Connections for passenger vessels at passenger terminals only.

SERVICES: A ship-reporting service "The Marine Exchange" located at entrance to main channel, Los Angeles harbour. They monitor Channels 14 (156.7 mHz) and 16 (156.8 mHz) VHF and have Channel 9 (156.45 mHz) VHF as their own. Primary duties are reporting arrivals, departures and locations of vessels.

SHORE LEAVE: Crew members are allowed ashore.

REGULATIONS: Permits required for hot work (welding, cutting etc.). Permit required for any dangerous cargo. Permit to discharge ballast (clean water) required. Restrictions on bunkering operations (scuppers plugged, valves closed).

DELAYS: No delays in berthing, load or discharge or bunkering can be expected.

AUTHORITY: Port of Los Angeles.

AGENT: Cascade Shipping Co., Berth 219 Indies Terminal, P.O. Box 3404, Terminal Island, California 90731. Tel: 213-547-2445. Telex: TWX 910-345-6623. Cables: 'Caship'.

MAGPETCO, Texas: 30.02 N. 93.59 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur". Also see "Port Neches".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

METLAKATLA, Alaska: 55.08 N. 131.35 W.

Located on Annette Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Ships coming up from the Hecate Straits or outside of Graham Island proceed into Dixon Entrance to the vicinity of Point McCartey where the Pilot will meet them. Vessels coming up the inside passage from Vancouver, B.C. are met at Lucy Island Pilot Station.

ANCHORAGE: Good anchorage in gravel and mud.

MAX. SIZE: Depths in harbour 120 ft. Tides: diurnal range – 14.7 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs, from Ketchikan.

BERTHING: 2 berths: 1. City Dock: 400 ft. long and 60 ft. wide. More than 35 ft. deep. Due to shallow water at East end, a starboard landing is usually made. No covered storage, temporary open storage. 4 fork-lifts, 2 of 20,000 lb capacity.

2. Annette Island Canning Co.; 200 ft. long and 23 ft. deep. 15 ton crane and 2 fork-lifts. 1 25-ton fork lift.

TUGS: Available in Ketchikan.

STEVEDORES: 4 gangs available.

REPAIRS: Facilities at Ketchikan.

SUPPLIES: Bonded and unbonded stores from Ketchikan.

WATER: Available.

FUEL: Not available.

MEDICAL: Hospital available in Ketchikan; small clinic in Metlakatla.

AIRPORT: Small charter plane only. Jet to Juneau and Seattle from nearby Annette. (Water transportation to Ketchikan.)

MIAMI, Florida: 25.46 N. 80.10 W. (See Plan Book)

DOCUMENTS:

Customs: All foreign and "in bond" goods entering the Port/Country are subject to customs examination and duty. Manifest of foreign cargo inbound must be presented to the customs boarding officer prior to commencing discharge.

Ship's Agent must notify customs at least 1 hour prior to the ship's arrival. Regular working hours, Monday through Friday 0800–1700, telephone 350-5261. Outside normal working hours, telephone contact 526–2821; overtime is charged.

Forms required:

2 Master's Oath on Entry of Vessel in Foreign Trade	Form 1300
2 General Declaration	Form 1301
2 Ship's Store Declaration	Form 1303
2 Crews' Effects Declaration	Form 1304
Crew Members' Declaration (1 Declaration for each Crew member)	Form 5129
1 Application–Permit–Special License (Unloading, loading, overtime services)	Form 3171
2 Passenger Lists	I–418
2 Crew Lists	I–48
Customs Declaration (Passengers) (1 Declaration for each family)	6059–B
2 Declarations of foreign repair to vessels (U.S. flag vessels only)	3415

Immigration: An immigration inspector will meet all ships entering port. Valid travel documents/passport/visa/entry permit are required in some cases.

Ship's Agent must notify Immigration at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800–1630, telephone 350–5739. Outside normal working hours, telephone contact 526–2626; overtime is charged.

Forms required:

Crewmen's Landing Permit	Form I–95
Alien Passengers' Landing Permit	Form I–94
Passenger List	I–418
Crew List	I–418

PILOTAGE: All foreign vessels are required to take a Pilot who boards near the outer sea buoy, 2.5 miles offshore.

Request Pilot through Biscayne Bay Pilots Association, 24 hours in advance, call sign KGW 303, VHF Channel 16, direct from ship or through vessel's steamship Agent accompanied by particulars of draft and berthing assignment. Ship to confirm on VHF Channel 16 one hour prior to arrival. Channel 16 is monitored 24 hours and station can monitor VHF Channels 10, 12 and 14. Ship may cable Pilot station direct through RCA radio Lantana, Florida, call sign, MIAMI PILOTS. Estimated time of departure should be made when ship docks and must be confirmed by phone (672–7643 or 672–7644) 1 hour prior to the Pilot boarding.

ANCHORAGE: The prescribed anchorage area for vessels anchoring outside the harbour is located Eastward of a line about 1.5 nautical miles offshore and Northward of a line about 0.2 miles nautical miles North of the sea buoy at the entrance to the ship channel. The entire anchorage area lies North of the entrance channel to Miami. The Northern and Southern extremities of this area are marked by spar buoys. Vessels desiring to anchor off the entrance to the Harbour of Miami are required to do so within this area, to avoid possible damage to cables laid on the ocean bottom in the vicinity. Refer to anchorage area 202.188 on United States Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), National Ocean Survey, Chart No. 11468.

RESTRICTIONS: The entrance to the main channel is directly East of the City of Miami, approximately 4.5 miles. The sea buoy marking the channel entrance through the reef is about 2 miles offshore. The entrance is an artificial cut 305 m. wide, known as Government Cut, dredged across the Southern end of Miami Beach. It is protected by jetties and is well marked. A channel has been dredged to a control depth of 11.3 m., and 135 m. wide on the sea end and 135 m. wide through the Cut to Biscayne Bay. The channel, 122 m. wide with an 11-m. control depth continues Westward across Biscayne Bay to the Miami Harbour Turning Basin. For the full length of the Port of Miami on the North (channel) side of the Dodge Island site, there is additional channel improvement 135 m. wide and 11 m. deep, forming a berthsite turning basin immediately North of the Port and extending to the MacArthur Causeway 2,040 m. in length and 274 m. in width.

MAX. SIZE: Recommended draft restriction of 33 ft. at MLW. Size restricted by size of turning basin which has 36 ft. at MLW, is 1,700 ft. North and South; 1,650 ft. East and West. No limit to length at new port which has 6,700 ft. at 36 ft. MLW and 4,000 ft. at 25 ft. at MLW. A 1,000 ft. ship can be handled in turning basin if draft under 33 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

Ship's agent must request quick clearance, "pratique", from United States Public Health Department.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

An Agriculture inspector will board all foreign, coastwise and domestic ships on arrival.

Ship's Agent must notify Agriculture at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800–1630, telephone contact 350–4758. Outside normal working hours, telephone contact 526–2821; overtime is charged.

Forms required:
1 Copy of Cargo Manifest.
1 Report of Ship's Stores and Port of Origin.

Forms provided by and filled out by the inspector:
Cargo Form 210
Boarding Report 288

RADIO: The Coastguard and Pilot station can be raised on VHF Channel 16. Telephone contact to Agents, receivers, etc., can be made via Miami Marine Operator.

TUGS: Large tugs up to 2,000 h.p. available 24 hours per day. Request tug service via Pilot station. Big tugs privately owned by Belcher Towing Company who work closely with Pilots. Smaller tugs available on Miami River and operated by Backus Towing Inc.

BERTHING: Berths are all marginal berths, no piers, 2,040 lineal m. of berthing at 11 m. depth, also 1,200 lineal m. at 7.6 m. depth. Dock aprons are 21 m. wide. Large ships can turn at berthsite in the 270-m. wide approach channel or may continue into the turning basin, 500 m. by 518 m. There are 10 berths for bow-load and stern-load trailer ships.

Gear and Heavy Lift Equipment: 20 shipside cranes all truck-mounted, rubber-tyred with outriggers, capacity 40 to 90 tons; 4 to 140 tons; 1 on-call, to 300 tons. 5 container movers "port packer" to 40 tons. 100 forklifts, some 5 to 8 tons capacity; some at 9 and 10 tons capacity; some 30 and 40 tons capacity.

Cruise Ship Piers: Marginal berthing for 8 cruise ships each with modern air-conditioned passenger lounge and custom inspection areas.

Container Handling: On and off ship by 20 mobile cranes. Lateral movement on Port by "port packers".

Cold Storage Cargo: Not on port but ample on the mainland by commercial companies.

Commercial Warehouses: Ample on the mainland. On Port, 82,000 square m. in 7 modern transit cargo buildings.

STEVEDORES: All receiving, recording, moving, loading and discharge of cargo is performed by the stevedoring companies. They employ longshoremen members of the International Longshoremen's Association (I.L.A.). Normal working hours 0800–1700. Overtime is charged for Saturdays, Sundays, and holidays. Port open 24 hours per day.

BRIDGES: There are no bridges between the open sea and the port. To enter Miami River requires passage through a highway and railroad bridge. This bridge manned 24 hours per day. Only smaller ships enter Miami River which is dredged to 15 ft. at high water and is 150 ft. wide for a distance of 3 miles above entrance. A bridge about half a mile from entrance is closed from 0700 to 0900 hrs. and 1600 to 1800 hrs.

MEDICAL: Clinic available.

TANKERS: No slop (residue) discharge facilities. One tanker berth (1,000 ft.) available. Max. draft 30 ft. at MLW. No special fittings required.

FRESH WATER: Available every 220 ft. at new port on Dodge Island. Delivered via hose.

FUEL: All grades; bunker, intermediate and marine gas oil, Diesel, bunker C. Ships fuelled at dockside from Belcher Oil Co. barges.

FIRE PRECAUTIONS: Usual safety precautions on smoking, flying baker, mooring pendant available, ample persons aboard to fight fires, fire hose led out, etc.

GANGWAY/DECK WATCHMEN: Usual shipboard watches to tend lines. Special guards (security) through Wackenhut, Burns Security, etc.

OPENING/CLOSING HATCHES: Work normally done by longshoremen.

CUSTOMS ALLOWANCES: See "Jacksonville".

IDENTIFICATION CARDS: Definitely needed in order to return to ship at night. A security guard at new port will check.

REPAIRS: All deck and engine dockside repairs available.

DRY DOCKS: 2 small drydocks, max. size 600 tons.

SURVEYORS: Several, including Lloyds.

AIRPORT: 8 miles or 15 minutes from airport by expressway. Serviced by 24 foreign and 10 United States scheduled air carriers.

TIME: Eastern Standard Time, GMT minus 4 hours. Daylight Saving Time in effect from last Sunday in April to last Sunday in October and adds 1 hour to Eastern Standard Time.

HOLIDAYS: Official holidays are New Year's Day (January 1st); Washington's Birthday (3rd Monday in February); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (first Monday in September); Columbus Day (October 12th); Veterans Day (4th Monday in October); Thanksgiving Day (last Thursday in November); Christmas (December 25th). Cargo can be worked on holidays by advance arrangement and payment of double time.

POLICE/AMBULANCE/FIRE: Police Department, tel. 377-7011; Fire Department 377-6231 (Rescue Squad 377-6231).

TELEPHONES: Telephone available by order to telephone company.

SERVICES: All types of special services such as tank cleaning, compass adjusting, admeasurement, radar/radio repairs, rathometer repairs, etc., available.

SHORE LEAVE: Crew members are allowed ashore after clearance by customs, immigration and quarantine.

AUTHORITY: Port of Miami.

MILWAUKEE, Wisconsin: 43.01 N. 87.53 W.

(See Plan Book)

PORT LIMITS: The Port of Milwaukee limits are generally considered to be the harbour breakwall housing the harbour entrance lighthouse. However, unless specifically declared to the contrary in the covering charter party, a vessel will be considered an "arrived ship" upon anchoring outside the harbour breakwall, in the event that a proper berth and/or anchoring space inside the harbour breakwall is not available.

DOCUMENTS:

Vessels from Canadian ports
Dominion clearance and Public Health Pratique (both issued at Montreal).

Vessels from all other nations
Inward Foreign Manifest(s)
Stores Lists, over Master's oath.
Curio Lists, over Master's oath.
Permit to Lade and Unlade.
Discharge Manifest.
Inspection by U.S. Dept. of Immigration (Crew List).

Inspection by U.S. Dept of Agriculture.
Receipt of Entrance fee.
Receipt of Tonnage Tax.

Additional documents may be required, dependent on commodity involved in the carriage, point of origin, flag or any unusual circumstances existing.

PILOTAGE: Pilot boards at Montreal and at several other stations along St. Lawrence Seaway route.

ANCHORAGES: The chart does delineate anchorage area for large vessels and shows the 28 ft. depth just East of South Piers 1,2, and Liquid Cargo Pier. This deep area, about 2,400 ft. × 5,400 ft., used by large vessels for anchorage.

MAX. SIZE: 739 ft. × 75 ft. with 26 ft. draft. No tidal effect, although lake levels vary seasonally. Minimum depth above low water level 27 ft.

HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station at City Heavy Lift Dock. Harbour Master and Dock Superintendent can be reached at this facility Monday through Friday between 0800 and 1630 hrs; 156.8, 156.6 and 156.5 megacycles.

TUGS: Normally pick up vessel inside breakwater. Tugs optional at discretion of ship's Master. Fee for use of tug's lines.

BERTHING: The time of passing harbour entrance lighthouse establishes order of berthing, provided vessel is ready to work.

BRIDGES: Bridges closed between 0730 and 0830 hrs.and 1630 and 1730 hrs. except on Sundays and 8 legal holidays. In addition, 2 hours' notice required for opening bridges across Milwaukee River North of and including Buffalo Street.

SPECIALISED CARGO HANDLING FACILITIES: In addition to the 3 general cargo terminals of approx. 340,000 sq. ft. covered area (9 berths), and dry bulk terminal of 60,000 sq. ft. covered area (2 berths), the port is served by a refrigerated warehouse of 10,000 sq. ft.; 1 open dock area (2 berths) for handling bulk commodities such as pig iron; 1 open dock (3 berths) for heavy lifts and equipped with a 200-ton stiff leg crane and 2 gantry cranes of 70 and 50 tons; 1 liquid cargo pier for edible and inedible fats, greases and tallow; 2 grain elevators of 3.5 million and 2.5 million bushel capacity and 2 scrap iron loading facilities. The port is also equipped with a mobile heavy crane lift/container crane capable of serving all berths.

STEVEDORES: Vessel should provide a stowage plan, manifest of inbound cargo and exceptions list (unusual vessel or cargo characteristics affecting facilitation of cargoes). Vessel should comply with the U.S. Dept. of Labor's safety regulations.

MEDICAL: Advance notice desirable. Hospitalisation available.

TANKERS: Diameter of load lines and discharge lines 8 in. and 10 in. No slop residue facilities. 4 berths available, with draft to seaway depth.

FRESH WATER: Potable water available at most berthing areas.

FUEL: All grades of fuel oil available by truck delivery at shipside.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: At the option of ship, if terminal stevedores perform operation, it is based on cost plus 20%.

CERTIFICATES:
Registry of Ship.
Master's Licence.
1st, 2nd and 3rd Officer's Licences.
Radio Licence.
Wireless Operator's Licence.
Ratification Certificate (done each year).

(Additional certificates may be required, dependent upon Registry, cargo, trade route engaged in, nationality of crew, etc.).

CUSTOMS ALLOWANCES: Tobacco, 10 packages or 200 cigarettes in possession at any time. Wine and/or Spirits, 1 bottle per officer.

IDENTIFICATION CARDS: U.S. Immigration rules.

CONSULS: The following countries are represented:
Costa Rica
Ecuador
Nicaragua
Norway
Sweden

REPAIRS: Limited to above water line, and boiler repairs.

REPATRIATION: Local Agents effect repatriation.

AIRPORT: 5 miles distant.

TIME: U.S.A. Central Time. Central Daylight Time from late April to late October—5 hours behind GMT. Central Standard Time from late October to late April—6 hours behind GMT.

HOLIDAYS: Easter Sunday; May 30th (if on a Saturday, previous day is a holiday); July 4th (if on a Sunday, Monday is a holiday); First Monday in September; Fourth Thursday in November and following day; Christmas Day; New Year's Day. Cargo can be worked on these days at holiday pay.

POLICE/AMBULANCE/FIRE: Police — non-emergencies 273-8660; Emergency, including emergency ambulance service 765-2323; Fire, including rescue squad service 347-2323.

TELEPHONES: Can be arranged, but unnecessary because sufficient phones available in dockside offices.

GENERAL: Chandlery services for foodstuffs, ship complements and laundry services available. Garbage and waste disposal are available through private operators, chandler usually making the arrangements.

The Liquid Cargo Pier is also available for non-petroleum liquid cargoes.

SHORE LEAVE: Crew allowed ashore.

DELAYS: Little or no delay.

DEVELOPMENTS: A container terminal is contemplated for the future.

AUTHORITY: Board of Harbor Commissioners, City of Milwaukee.

MOBILE, Alabama: 30.40 N. 88.02 W. (See Plan Book)

DOCUMENTS:
3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I.418).
2 copies Crew List (Form I.418).

Customs boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Customs Form 3255).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Pilotage is compulsory.

ANCHORAGE: If berth is congested, vessel may anchor at the bar (35 miles from harbour).

RESTRICTIONS: Controlling depth: 40 ft. for entrance, channel and anchorages. Mean tidal range 1.5 ft. Nature of bottom: soft mud. Vessel can dock and sail at any hour at any stage of the tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: There are 7 tugs available 24 hours with max. horsepower of 1,800.

BERTHING: There are 34 berths at most of which, direct loading or unloading can be effected from quayside tracks.

Public Grain Elevator: Depth alongside 42 ft. 2 berths, each with 5 loading spouts. Unloading rate for grain 40,000 bushels/hour at each berth. Loading rate 115,00 bushels/hour for grain and 1,000 t.p.h. for meal.

McDuffie Terminals: Bulk coal handling plant, depth alongside the berth is 40 ft. Shiploader can load over 4,000 t.p.h. The stacker/reclaimer can handle 4,000 t.p.h., a rail car tipple rated at 4,000 t.p.h. and a barge unloader that works 3,500 t.p.h. A conveyor belt system connects the entire complex.

Bulk Handling Plant: 3 berths, depth alongside 40 ft. Total quay length 1,600 ft. 4 unloading towers which can unload 2,200 t.p.h. and 2 loading conveyors, rate 2,000 t.p.h.

Depth alongside other public berths as follows:

Pier 2	38 ft. MLW	Pier River End B	38 ft. MLW
Pier 3	38 ft. MLW	North Pier B 1	40 ft. MLW
Pier 4	38 ft. MLW	Pier North B 2	40 ft. MLW
Pier 5	38 ft. MLW	Pier North B 3	40 ft. MLW
Pier 6	38 ft. MLW	Pier South C1	41 ft. MLW
Pier 7	38 ft. MLW	Pier South C 2	41 ft. MLW
Pier 8	38 ft. MLW	Pier South C 3	41 ft. MLW
Pier South A	37 ft. MLW	Pier River End C	38 ft. MLW
Pier River End A	30 ft. MLW	Pier North C 1	39 ft. MLW
Pier North A 1	38 ft. MLW	Pier North C 2	37 ft. MLW
Pier North A 2	38 ft. MLW	Pier D Cold Storage	37 ft. MLW
Pier North A 33	38 ft. MLW	Berth 1 tipple	Under repairs
Pier South B 1	41 ft. MLW		
Pier South B 2	41 ft. MLW	Berth 2 tipple	44 ft. MLW
Pier South B 3	41 ft. MLW	Berth 3 tipple	40 ft. MLW

CRANES: 75 ton stationary crane, 50 ton mobile crane, 80 ton floating crane and 45 ton container crane available.

TANKERS: Max. length 950 ft. restricted by turning basin. American Bituminals & Asphalt Co. – Jetty berth dredged to 38 ft.

Magazine Point: Hess Terminal: Jetty berth dredged to 43 ft.

FRESH WATER: Available ex wharf at all berths.

FUEL: Most grades fuel/diesel available via pipe-line, barge or truck.

STEVEDORES: Normal working hours for the port are 0800/1700 hrs. Monday through Friday.

REPAIRS: *Alabama Dry Dock & Shipbuilding Company* – Dry Docks ranging from 5,000 to 18,000 tons displacement all serviced by 51-ton gantries. Dock length range from 380 ft. to 620 ft. Also available is a 70-ton floating crane. Any type of repair can be effected.

Bender Ship Repair. 1 dry dock of 2,500 tons displacement. Majority of repair work is top-side. 100-ton floating crane available.

DENSITY: 1,000 (Fresh Water).

DEVELOPMENTS: A 15 million dollar expansion programme, improving the present bulk materials handling plant, construction of the container facility, widening the turning basin and various updating projects.

CUSTOMS ALLOWANCES: At the discretion of customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.95, issued for the same vessel.

HOLIDAYS: Absolutely no work is performed on New Year's Day, Easter, July 4th, Labour Day and Christmas Day. Working holidays are Mardi Gras Day, Veteran's Day and Thanksgiving Day.

AUTHORITY: Port of Mobile, Alabama State Docks Dept.

MOREHEAD CITY, N. Carolina: 34.43 N. 76.42 W. (See Plan Book)

DOCUMENTS:

3 copies Cargo Manifest (Form 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Passenger List (Form 1418).
2 copies Crew List (Form 1418).

Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Customs Form 3255).
All Foreign Clearances.
U.S. Certificates of Payment of Tonnage Tax (Customs Form 1022).
Certified Crew List.

PILOTAGE: Pilots obtained from Morehead City Pilots' Association, Morehead City, North Carolina 28557. Tel. 726-6134.

The Port Terminal at Morehead City is 3.5 miles from the sea buoy. The port is located on the Intracoastal Waterway and is situated 75 miles S.W. of Cape Hatteras and 14 miles W. of Cape Lookout.

Pilots should be given 24 hours notice and then contacted by VHF Channel 16 about 2 hours before arrival at sea buoy R "2BI".

Pilot boat is about 40 ft. long, with white hull and superstructure; the hull is marked with "PILOT" in black letters on both sides.

RESTRICTIONS: The channel and basin at Morehead City are maintained at a controlled depth of 40 ft. – mean low water.

The wharf is constructed of concrete and steel and has marginal tracks and crossovers for full length. Truck ramps are located at various points for easy roll-on/roll-off access.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Fort Monroe Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available. Service provided by Carteret Towing Co. Inc., Radio Island, Morehead City, North Carolina 28557. Tel. 919-726-5440.

BERTHING: The wharf is 5,300 ft. long. This length enables the port to provide berths for 10 × 500 ft. general cargo ships and 1 petroleum tanker at any given time.

Adjacent to the general cargo dock area is a 1,000 ft. deep water berth for out-loading through the bulk handling facility.

Morehead City also provides a barge terminal with 1,200 ft. of modern berths. This terminal was developed as a part of the bulk handling facilities, but is also used for the loading or off-loading of a variety of cargoes.

The bulk handling facilities of the port terminal at Morehead City are designed to out-load bulk and aggregate cargoes at a rate of 3,000 t.p.h.

The out-loader is served by a 1,200 ft. gallery which feeds from a 106,000 ton storage warehouse, and in turn is fed by a portable conveyor system from the barge terminal. The entire system is automated.

Wharf: 5,300 ft. of continuous concrete wharf. 1,000 ft. deep-water berth for bulk-handling facility. Additional 2,000 ft. projected.

Barge Terminal: 1,200 ft. of dock space providing 4 × 300 ft. berths.

Bulk Handling Facilities: 3,000,000 ton annual capacity bulk facility for receipt, conveyance, storage and shipment of bulk cargoes. Loading capacity 3,000 t.p.h., storage capacity 106,000 tons.

CRANES: 2×115-ton capacity gantry cranes one 40-ton full bridge container crane.

FUEL: Available from Blue Ridge Fuel Company, Esso Oil Company, and Texaco Inc.

CONSULS: Finnish Vice-Consul, Wilmington, N. Carolina 28401. Tel, 763-5451.

Royal Norwegian Consulate, Wilmington, North Carolina 28401. Tel. 763-8271

IDENTIFICATION CARDS: Standard U.S. Immigration Forms 195 to be made up for each crew member on arrival. Not necessary for crew man already holding Form 195, issued for the same vessel.

SERVICES: There are no shipyards in the port. Service on any kind of electronic equipment is not available.

REPATRIATION: This is possible but should be avoided as there is no Immigration Office. Closest airport is about 1 hour's drive from the town.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

AUTHORITY: North Carolina State Ports Authority.

MYRTLE GROVE, Louisiana: 29.38 N. 89.57 W.

West Bank of Mississippi River, about 62 miles from sea.

DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 2 tugs required for vessels under 25,000 d.w.t. 3 tugs for vessels over 25,000 d.w.t.

BERTHING: Mississippi River Grain Elevator Co. berths: distance between buoys 900 ft., alongside 400 ft. dock, depth 40 ft. Loading rates, 80,000 to 120,000 bushels per hour.

FRESH WATER: Not available.

FUEL: Not available.

DENSITY: Fresh Water (1000).

NAWILIWILI, Hawaii (including Port Allen): 21.57 N. 159.21 W. (See Plan Book)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Store Lists.

PILOTAGE: Vessel's Agent orders Pilot 48 hours in advance by telephone, correcting ETA as necessary with 4 hours final notice if a last-minute change occurs. Tug-boat *"Lihue III"* serves as Pilot boat for Nawiliwili and Port Allen, 64 ft. long, hull black, house white, topsides orange. Radio telephone and VHF communication within 1 hour of arrival and while tug is working. 2638 and 2738 kc/s. and Channels 6, 12 and 16 on VHF. Pilot boards 1 mile East of Nawiliwili and 0.5 miles South of Port Allen. Signals in accordance with International Code.

ANCHORAGES: Nawiliwili: between Nawiliwili Light and Carters Point in 5–9 fathoms. Not good in strong trade-wind weather. Fair holding ground. Not recommended.

Port Allen: 0.5 mile South of Port Allen breakwater light in 5–10 fathoms. Fair holding ground. Untenable in Kona or S.W. storms which occur from November to March.

RESTRICTIONS: 24 hours notice of arrival is obligatory. Nawiliwili; no entry at night. From October 21 to March 21 Pilot boards at 0630 hrs. Balance of year 0600 hrs. Port Allen: no time restrictions.

MAX. SIZE: Nawiliwili: Length 650 ft., beam 90 ft., draft 32 ft. 6 in.

Port Allen: Length 650 ft., beam 90 ft., draft 32 ft. on North side and 28 ft. on South side. Pier is 600 ft. long, so larger vessels overhang.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu. Also KQM marine operator for radio telephone and telephone to Kauai.

TUGS: One 1,100 horsepower tug meets vessels off port and in outer harbour. Both ship's lines and/or tug's line may be used. No charge for tug's line. Tug has bow fender and is used for pushing. Has radio telephone, WP 4371 and VHF with Channel 12 usually used. Extra tugs available from Honolulu.

BERTHING: Limited to 2 large vessels at Nawiliwili and 2 at Port Allen. Considerable barge traffic. Prior reservations by Agent necessary with District Manager. Berth conflicts usually solved in Honolulu by rerouting of Island ports.

New Ro/Ro barge facility at Pier 1.

CARGO HANDLING FACILITIES: Nawiliwili has 2 sugar loading gantries on Pier 2; no equipment or storage to handle grain, ore, coal, sulphur. Fertiliser is discharged by self-unloading barge, and the bulk hauled away via truck. There is a container yard but no facilities to off-load containers. Weekly service is by a self-unloader. Roll-on/roll-off cargo is moved on ramps furnished by barges. LPG and petroleum product lines are privately owned.

STEVEDORES: All stevedoring by McCabe Hamilton and Renny Co. Ltd., with headquarters in Honolulu and branches in outports. 48 hours notice by Agent for labour and equipment. Inward cargo is containers, general, bulk fertiliser, petroleum products, and building and construction materials. Outward is raw sugar, canned pineapple, general and molasses. Foreign vessels are subject to heavy fines for carrying stevedore gear inter-island without Customs clearance.

MEDICAL: 2 hospitals on Kauai with 2 doctors under contract to United States Public Health Service. Standard international inoculations and vaccination required. Advance notice by Agent desirable but not necessary.

TANKERS: All piers have pipe-line connections for incoming cargo and outgoing molasses. Fuel oil 10 in., molasses 10 in., water line 6 in., gasoline, kerosene and diesel 8 in. These are the main lines under the wharves. Hose connections to ships vary with the type of riser and hose so size of fittings should be checked with Agent. No slop discharge facilities available. 4 tanker berths available.

DENSITY: Varies from full salt to brackish in periods of heavy rainfall with freshets in the streams. No specifics available.

FRESH WATER: Available from 2 in. dock hydrants via ship's hose. About 100 gallons per minute.

FUEL: Bunker C not available for large vessels. Diesel fuel available via tank truck with 6 hours notice. Weekend and holidays order previous day.

DEVELOPMENTS: Turning basin may be enlarged to handle liners and large bulkers. Project depth 35 ft.

GANGWAY/DECK WATCHMEN: Tankers discharging gasoline required to have uniformed dock watchman. Usually off duty policeman. All ships provide own gangway and deck watch.

OPENING/CLOSING HATCHES: Normally done by stevedores. A few foreign ships prefer doing it with own crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one bottle, U.S. quart, wine or spirits.

IDENTIFICATION CARDS: Desirable but not required by law.

CONSULS: All in Honolulu.

REPAIRS: Light machine shop, welding and burning and pipe work available. Plantations may do some heavy repairs if part can be sent to their shop. Their engineers are helpful in emergencies. Heavy or technical repairs must be done in Honolulu.

REPATRIATION: Agent can arrange by air via Honolulu. Immigration clearance necessary.

AIRPORT: Lihue is 3 miles from Nawiliwili and 20 miles from Port Allen; served by inter-island regular carriers. Numerous lines, and charter flights available.

TIME: GMT minus 10 hours, all year round.

HOLIDAYS: National: New Year's Day (Jan. 1st); President's Day (Feb. 22nd); Memorial Day (May 30th); July 4th; Labour Day (first Monday in September); Election Day (first Tuesday in November); Veteran's Day (Nov. 11th); Thanksgiving Day and Christmas Day (Dec. 25th). Cargo can be worked but at penalty rates.

POLICE/AMBULANCE/FIRE: Nawiliwili: Police 245–6721; Ambulance 2721; Fire 245–2222. Port Allen: Police 382–311; Ambulance 338–8311; Fire 335–5444, or call "O" for operator.

TELEPHONES: Arrangements by Agent.

SHORE LEAVE: Permitted after immigration check. Iron Curtain or Communist visitors may be restricted.

AUTHORITY: Department of Transportation, Harbors Division, administered by the District Manager.

NEW BEDFORD, Massachusetts: 41.38 N. 70.55 W.

DOCUMENTS: See "Boston".

PILOTAGE: 3 Massachusetts State pilots available, ordered through Agent. VHF monitored Channel 16. Pilot on station only after 12 hours notice. Small pilot vessel with basic communication equipment. Pilots board all vessels at Buzzards Bay Buoy at the entrance to New Bedford outer harbour situated at Long. 70° 50′ 07″ W. and Lat. 41° 30′ 42″ N.

ANCHORAGE: It is recommended that vessels delayed due to weather, etc., anchor 0.5 mile South of Buzzard's Bay Bell Buoy.

RESTRICTIONS: A modern harbour approach begins at Buzzard's Bay Buoy and runs a straight course of 7.5 miles direct to the pier facilities. The channel is 350 ft. wide and has a depth of 30 ft. MLW. The channel leads into a moderate size (1,000 yd.) turning basin.

MAX. SIZE: 700 ft. length. Vessels over 30 ft. draft restricted by tides.

HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: RCA Chatham Radio, New Bedford Marine Operator for VHF, and Boston Marine Operator for ship to shore frequencies.

TUGS: Tugs join vessel in inner harbour. Tug lines used. 2 tugs available. Tugs are not normally used at the State Pier in docking and undocking of deep-water vessels. The large turning harbour basin, the wind-sheltered position of the pier and lack of tidal current minimise use of tugs. In extreme weather conditions tugs are used.

BERTHING: At State Pier, berthing space for 3 ships:
North side 600 ft. length, South side 775 ft. length, East side 450 ft. length.
Depth of water at all berths is 30 ft. MLW.
Maritime Terminal, depth 27 ft.

BRIDGES: Passage to upper reaches of harbour to Maritime Terminal requires navigation through the New Bedford and Fairhaven bridge only in daylight for larger vessels over 250 ft. length.

STEVEDORES: 24 hour notice required for New Bedford Stevedoring Corporation to prepare gear. 25 tons discharged or loaded per hour as average production per gang. Nearly all cargoes handled.

MEDICAL: 24 hours notice required. Excellent hospital facilities available.

TANKERS: Hurricane dike barrier gate 150 ft. wide with depth of 30 ft. MLW.

DENSITY: Static, since tidal variations light. Density same as ocean water.

FRESH WATER: Fresh water available.

FUEL: All types available, to be ordered in advance.

GANGWAY/DECK WATCHMEN: Watchmen available. Non police or police.

OPENING/CLOSING HATCHES: Depends on negotiated contract and cargo handled.

CUSTOMS ALLOWANCES: Designated by U.S. Customs with regard to particular circumstances.

CONSULS: Most Consuls available in Boston, 50 miles or 1 hour away.

REPAIRS: All types of minor ship repairs available.

REPATRIATION: Agent can handle formalities.

AIRPORT: 3 airports within 1 hour drive. All international services.

TIME: Shift ftom Standard to Eastern Daylight Saving Time. Local time GMT minus 6 hours.

HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriot's Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (first Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th).

TELEPHONES: No telephones on board, but exist adjacent to pier.

SERVICES: All services can be obtained if required.

SHORE LEAVE: If U.S. Immigration has cleared crew member, he is allowed ashore.

AUTHORITY: Harbor Development Commission.

NEW HAVEN, Connecticut: 41.14 N. 72.55 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".

PILOTAGE: Compulsory. State Pilots are available on a 24-hour basis and are usually arranged through the ship's Agent or directly by shipping companies. Pilot will board vessel in vicinity of New Haven Sea Buoy, marked "N.H." – short and long flash; black and white vertical stripes. Boarding will be from a 34-ft. steel launch named *New Haven Pilot* – black hull with "Pilot" marked on both sides in white letters, or from a tug-boat. Contact can be made via VHF telephone, Channel 13 (156.65 mHz), Channel 16 (156.80 mHz), or Channel 24 (157.20 mHz).

Pilotage Association Report: The New Haven – Bridgeport Pilots maintain a tide gauge at the T.A.D. Jones Dock, from where they depart to meet vessels. The normal tidal range is 6 ft. They believe that 4ft. of water in excess of the ship's deep draft is necessary for a safe transit. A rule of thumb, used by them, is 31 ft. on low water, and 37 ft. on high. (For any variation of this, a Pilot should be consulted.) A normal transit time from the entrance buoy to any of the berths in the inner harbour is 45 minutes to one hour. Docking time of 30 minutes to 1 hour should be added to this average, dependent on where the ship is berthing, as well as possible weather conditions.

There was a maintenance dredging of New Haven Harbour, completed in the Spring of 1974. The after-dredging survey submitted to them by the US Army Corps of Engineers shows a controlling depth, with rock bottom of 35 ft. at MLW. This rock is located at South West Ledge Light at a point where a 35° turn is executed by the ship.

Prevailing winds are Westerly, and have a decided effect on the rise of tide. The tide gauge is the determining factor as to the time of entry when wind conditions do exist.

ANCHORAGE: Vessels awaiting berth, and or tides, will find good anchorage up to 40 ft. draft within 1 mile South-Southeast of the "N.H." buoy.

RESTRICTIONS: Vessels can proceed to and from berths in New Haven Harbour at any hour during the day or night, weather and tide permitting. Entrance channel dredged to 34 ft. MLW. and width 400 ft.

MAX. SIZE: Draft up to 35 ft. subject weather and tides. Vessels of 50,000 d.w.t. with part cargo, do call occasionally, but should consult with the Pilot and terminal concerned.

HEALTH: See "Health: All Ports; before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.

TUGS: Red Star Towing Company operates three tugs in New Haven. Two are single screw of 1,800 s.h.p. and 1,600 s.h.p., and one twin screw tug of 1,800 s.h.p. Weekdays from 0900 to 1700 hrs. the office is on Channel 19A. Tugs, when manned, monitor 19A-16 and 13. Dispatchers can be reached 24 hours a day through the Bridgeport Marine Operator. The number for Red Star is area code 203 – 865-1104.

BERTHING:

Wyatt Inc: Ships are not docked on the West side at ebb tide, though ships in ballast can sail whenever ready, regardless of flood or ebb tide. The East berth docking is done on flood or ebb, with draft to be considered. In the Spring of 1974, this terminal was dredged to 37 ft. on the West side, and 32 ft. on the East side. Fresh water and bunkers are available, with steam on the East side available through a 2 in. line, with 125 lb. pressure.

Ships of 715 ft. are regularly docked here. Vessels are docked port side to on the West side, and would be delayed if the East berth is occupied by a ship.

Gulf Terminal: The Gulf Dock is located parallel to the channel on the East side of the inner harbour, and ships of 35,000 d.w.t. with draft of 33 ft. 6 in. and LOA of 675 ft. are considered to be maximum size. (350 ft. from bow to manifold.)

The dock parallels the channel and consists of two main caissons, a centre platform and dolphins connected by a catwalk. Fresh water and bunkers are available. Ships consigned for T.A.D. Jones Terminal use this facility.

T.A.D. Jones: This dock is on the East side of the harbour, a 500 ft. finger pier at a 90° angle to the channel. The North side has 27 ft. of water and the South side is used for barges. Tankers, or dry cargo ships no longer call at this pier.

Red Star Towing Company have their office, and moor tugs on the North side of this dock.

Arco Terminal: Arco Dock parallels the main channel, and is 750 ft. long, with two main caissons, dolphins, and platform, connected by catwalks. Ships up to 50,000 d.w.t., and 35 ft. draft use this berth arriving on the rising tide, and 32 ft. on low water in berth. Ships are docked starboard side to.

Bunkers are not available, though fresh water is, but only in mild weather.

New Haven Terminal, Inc.: This facility has three ship berths on a 90° heading from the channel, dredged in 1974. The Scrap Dock, as it is called, is a continuous pier, with a wearing strip cushioned by a rubber backing. The pier is 650 ft. long, with 35 ft. at MLW. Scrap is loaded from here and all types of dry cargo handled. Two gantry cranes are on the dock and additional mobile cranes are available. Railroad cars can be brought on to the dock. Ships berth port side to.

The Finger Pier on the North side is a continuous pier, 650 ft. long, and is mainly used as a tanker berth. Bow to manifold is 350 ft. (additional hoses can be added to increase this distance.) The slip is 196 ft. in width, and two ships may be accommodated at the same time, as long as 25 ft. is allowed for a tug boat between the ships. Depth 35 ft. at MLW.

The South side is a tanker or general cargo berth, with 40 ft. at MLW. Bow to manifold is 350 ft. and additional hoses may be used. Ships of 700 ft. may be secured at all three of these berths.

Bunkers can be trucked in, and fresh water is available at all berths.

Exxon Terminal: Exxon Dock parallels the main channel. The dock is 750 ft. long with two main caissons, dolphins, and platform connected by a catwalk.

Ships of 50,000 d.w.t. call at this dock, with a draft of 34 ft., docking on the rising tide. Ships are docked starboard side to. Bunkers are not available, though fresh water is.

BALLAST: There are no slop lines available.

FUEL: Available from oil terminals or delivered by barge.

FRESH WATER: Available at all terminals.

MEDICAL: All facilities available.

CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine/spirits per man. Additional allowances may be given if considered necessary, due length of vessel's stay in port.

AIRPORT: New Haven Airport 1 mile distant. New York International Airport 70 miles distant.

CONSULS: All countries represented in New York.

HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Memorial Day (30th May); Independence Day (4th July); Labor Day (first Monday in September); Colombus Day (12th October); Veteran's Day (11th November); Thanksgiving (fourth Thursday in November)' Christmas Day (25th December).

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

SERVICES: Total Marine Services of New Haven offers launch service to ships at anchor, movement of stores, and skin divers.

GENERAL: Through a co-operative agreement, all the terminals have a slick boom, skimmers and absorbent available at all times. A fireboat, owned by the city of New Haven, is located within one half mile of any terminal, and is equipped to handle any type of fire.

There are no slop tanks available in this port for pumping ballast.

None of the terminals supply gangways; ships must use their own.

AUTHORITY: State of Connecticut, Department of Transportation, Bureau of Waterways, State Pier, New London.

NEW LONDON: Connecticut: 41.21 N. 72.06 W. (See Plan Book)

DOCUMENTS: Refer to "New York".

PILOTAGE: Vessel usually notifies Agent 48 hours before arrival, who will arrange Pilot boarding. Pilot boards at Sarah's Ledge, which is close to anchorage at harbour entrance.

ANCHORAGE: In Thames River, and in Long Island Sound, approx. 2 miles W.S.W. of New London Ledge Light bounded by lines connecting points which are following bearings and distances from New London Ledge Light: 246°, 2.6 miles; 247°, 2.1 miles; 233°, 2.1 miles; and 235°, 2.6 miles.

RESTRICTIONS: Pilots recommend daylight docking but can dock at night if necessary. Entrance channel 33 ft. deep.

MAX. SIZE: Dry cargo vessels and tankers 700 ft. long are using the harbour. Facilities for larger vessels will be available when proposed dredging to 36 ft. is completed.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving from North use Chatham Radio on Cape Cod. Vessels from South use Amagansett Radio on Long Island. However, either one may serve the purpose.

TUGS: Usually join vessel at Ledge Light if a dry cargo vessel, and off Sarah's Ledge if a tanker. Tugs use ship's lines; if tug's lines are used this is part of charge.

BERTHING: Advance ETA must be made for berthing, and it is suggested to dock during daylight hours when possible.

State Pier No. 1: depth, 28 to 36 ft. MLW.
Dow Chemical Co. Wharf: depth, 22 ft. MLW.
City Wharf Ferry Terminal: depth, 22 ft. MLW.

BRIDGES: There are no bridges across Main Ship Channel. However, at New London, at the head of the Main Harbour, the Thames River is crossed by 1 drawbridge and a twin fixed bridge: the New York, New Haven and Hartford Railroad bascule bridge with a horizontal clearance of 151.5 ft. and a vertical clearance of 30.9 ft. at high water and a fixed highway bridge with a horizontal clearance of 200 ft. and a vertical clearance of 135 ft. at high water.

STEVEDORES: ETA of 72, 48 and 24 hours is required, as gangs must be requested by 1500 hrs. on weekdays. Average discharge, about 20 tons per gang per hour.

TANKERS: Discharge at Hess Oil Co. berth, 12 in. and 10 in. lines.

Hess Oil Dock: depth alongside 36 ft.
Texaco Wharf: depth alongside 18 ft.
Pfizer Wharf: depth alongside 18 ft.

MEDICAL: All facilities available.

FRESH WATER: Available at pier side through 2.5-in. and 1.5-in. hoses.

FUEL: Available at tanker berths or by barge.

GANGWAY/DECK WATCHMEN: Not required and not recommended.

OPENING/CLOSING HATCHES: Performed by stevedores.

IDENTIFICATION CARDS: Not required.

CONSULS: Nearest at New York.

REPAIRS: 3 waterfront marine repair plants are equipped to repair vessels at the port. The Nelseco Navigation Co. and Thames Shipyard Inc. each owns and operates a plant at New London on the right bank of the Thames River; the General Dynamics Corp., Electric Boat Division owns and operates a shipyard and marine repair plant at Groton on the left bank of the river.

DRY DOCKS: 1 floating dry dock, 1 graving dock and 3 marine railways are available to the public at 2 of the marine repair plants.

1 floating dry dock, steel construction, with a lifting capacity of 6,500 tons, located on the West side of the pier E, has an overall length of 448 ft. length of 435 ft. 6in. on the keel blocks, overall width of 97 ft. inside clear width of 70 ft. and depth of 26 ft. of water over the keel block when submerged.

1 graving dock, located South of Piers A, B, C, and E, has length of 515 ft., width of 70 ft., and 35.5 ft. depth of water over the sill and 34.5 ft. over the keel blocks at MHW.

REPATRIATION: Facilities exist.

AIRPORT: Nearest airport is Trumbull Airport, situated about 3 miles East of Groton, Connecticut. There are scheduled commercial airlines serving this field. Allegheny Airlines and Pilgrim Airlines run frequent connecting flights to Bradley and Kennedy International Airports.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours, from April to October.

HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Good Friday; Memorial Day (30th May); Independence Day (4th July); Labour Day; Columbus Day (12th October); Veteran's Day; Thanksgiving Day; Christmas Day (25th December). Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police, 443–4315; Ambulance, 443–4388; Fire, 443–4381.

TELEPHONES: Available if required.

SHORE LEAVE: Allowed.

DELAYS: Availability of berthing might cause some delay.

AUTHORITY: State of Connecticut, Dept. of Transportation, Bureau of Waterways, Office of the Deputy Commissioner, State Pier, New London.

NEW ORLEANS, Louisiana: 29.56 N. 90.04 W. (See Plan Book)

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I–418).
2 copies Crew List (Form I–418).

Customs boarding officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:

Health Pratique.
Master's Oath (Customs Form 3255).
All foreign clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1022).
Certified Crew List.

The Bureau of Customs at New Orleans, Louisiana, will not, regardless of the circumstances, accept Customs Entry Papers from vessels unless they are on the proper U.S. Custom Forms and properly prepared.

Specially referred to are Customs Forms 1303 (Ship's Stores Declaration), 1304 (Crew Effects Declaration) and 7527 (Inward Foreign Manifest).

U.S. Customs at New Orleans require that the 1303 be completed, that is all stores (deck, engine, etc.) be listed on the form; it must also include fire-arms and medicines. They will not accept "as per attached list".

Form 1304, Crew Effects List, must likewise be properly completed. All effects and curios will have to be listed on the form. The term "souvenirs" is not sufficient and may not be used. All values have to be listed. Attachments to the 1304 are not permitted. (This does not apply to American Flag vessels using the Form I-418 Crew List with Crew Declaration numbers listed for their souvenir list.)

The Inward Foreign Manifest must be Customs Forms 7527-A, 7527-B, or a manifest form approved by the Bureau of Customs, Washington D.C. Should the latter be used it must have the Bureau's approval number printed on the form.

PILOTAGE: Advise Agents ETA at sea buoy 48 hours in advance. Agent will arrange for Pilot. Pilot boat 46 ft. long, red hull, white cabin, flying blue and white Pilot flag. Pilot boards at sea buoy, requires Pilot ladder 6 ft. above water level. Pilot boats can be contacted by VHF, Channel 9 when 30 to 40 miles off, or ship-to-ship Channel 2738. Bar Pilot is exchanged for river Pilot at Pilot town, Head of Passes.

Following advice received from Crescent River Port Pilots Association

Cable: Crespilots, New Orleans.

Vessels bound to any destination on the Mississippi River and Mississippi River Gulf Outlet are requested to supply the following information via Coastal Radio Telegraph addressed to Crespilots, New Orleans:

(1) ETA – twenty four (24) hours before expected arrival at Pilot station (Sea Buoys), and any change of ETA in excess of two (2) hours.

(2) Indicate if vessel is arriving Mississippi River or Mississippi River Gulf Outlet.

(3) Deepest fresh water draft and speed of vessel.

(4) Please contact Pilot station at entrances via VHF Radio Phone on Channel 16 (156.80 mHz), Channel 9 (156.45 mHz), or, Channel 13 (156.65 mHz) at least two (2) hours prior to arrival for boarding instructions.

Your co-operation will greatly assist in expediting the dispatching of Pilots and avoid costly delays to your vessels.

ANCHORAGE: Safe anchorage within 2 miles South pass or S.W. pass entrance. At the Point, below New Orleans, vessels may anchor without tug assistance.

RESTRICTIONS: Draft governed by S.W. pass, project depth 40 ft. Entrance day and night. New Orleans is 115 miles upriver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, and join vessel off berth if required. One tug normally used for berthing/unberthing at New Orleans.

BRIDGES: 2 bridges cross river at New Orleans, 1 at Baton Rouge and 1 at Donaldsonville. Sufficient clearance at all times.

BERTHING: *Public Grain Elevator.* No. 2 berth, 670 ft. long, 40 ft. depth; No. 3 berth, 650 ft. long, 40 ft. depth; No. 4 berth, 635 ft. long, 40 ft. depth.

Loading Rates 20,000 bushels per hour per belt, in berths 2 and 3; up to 40,000 bushels per hour per belt, in berth 4. Each berth has 2 loading belts.

Southern Scrap Material Co: Berth 550 ft. long, 32 ft. depth. Loading 200 t.p.h. with cranes.

Chalmette: Humble Oil Terminal: tanker berth 30 ft. depth; Tenneco Oil Terminal: tanker berth 35 ft. depth.

Kaiser: Chalmette Wharf: Aluminium discharge facilities, max. draft 38 ft.

Terminals on West Bank of Mississippi:

Amesville: Texaco tanker loading berth, 34 ft. alongside. 2×8-in. hoses loading up to 12,000 b.p.h. No ballast facilities.

Avondale: American Liberty Tank Terminals berth, 60 ft. alongside. 4 × 6-in. hoses loading up to 18,000 b.p.h. No ballast facilities. International Tank Terminals berth, 45 ft. alongside. 12-in. hoses loading 150 t.p.h.

Gretna: Publicker Chemical Corp.: berth 30 ft. alongside. Southern Pacific Company: berth 600 ft. long, 35 ft. depth; dry cargo discharging only. Industrial Molasses Corp: berth 27 ft. depth; 2 × 10-in. pipe-lines, loading 200 t.p.h.

Marrero: Hess Terminal Corp: tanker berth 38 ft. depth; 6 × 12-in. hoses loading 500 t.p.h. Texaco: tanker berth 35 ft. depth; 6 × 16-in. lines loading 250 t.p.h. No ballast facilities.

St. Rose: Cities Service: tanker berth 35 ft. depth; International Tank Terminals: berth 35 ft. depth; no fresh water available.

Westwego: Continental Grain Elevator: berth 600 ft. long, 40 ft. depth; loading 1,000 t.p.h., 2 loading belts. Louisiana Dock: 28 ft. alongside, bulk oil products loaded 200 t.p.h. Pacific Molasses Co: berth 35 ft. alongside.

CONTAINER HANDLING FACILITIES: Handled at most docks. Full container facilities at Morrison Yard wharf, length 430 ft. France Road berth No. 1 with 830 ft. leased to Sea-Land. Napoleon Avenue wharf 1,520 ft. Nashville/Henry Clay wharf 2,820 ft.

France Road berth No. 4, wharf 700 ft. France Road berth No. 5, wharf 900 ft. Berth No. 4 leased to Navieras de Puerto Rico and berth No. 5 leased to J. Young Stevedores.

STEVEDORES: Working hours 0800–1200 and 1300–1700 hrs. Monday to Friday.

MEDICAL: All facilities available.

DENSITY: Fresh water (1000).

FRESH WATER: Available ex-wharf.

FUEL: Only available by barge. Oil companies can supply Bunker "C" ex-terminals at Amesville and Marrero.

GANGWAY/DECK WATCHMEN: Recommended if any crew detained by Immigration.

CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each Crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

AIRPORT: New Orleans International Airport, served by most airlines.

TIME: Central Standard Time. Daylight Saving Time from May to October.

HOLIDAYS: New Year's Day (1st January); Martin L. King's Birthday (15th January); Good Friday; Memorial Day (30th May); Independence Day (4th July); First Monday in September (Labor Day); Veteran's Day (Last Monday in October); Fourth Thursday in November (Thanksgiving); Christmas Day (25th December). No work on New Year's Day, Independence Day, Labour Day and Christmas Day.

SHORE LEAVE: Allowed for any Crew member not detained by Immigration.

DEVELOPMENTS: A fourth full-container berth with double Ro/Ro pad, class A & B, and marshalling area under construction at the France Road Container Terminal on the Industrial Canal, length of berth 800 ft., equipped with 40 ton crane. Also available will be 8 acres of back-up marshalling and refrigerated warehouse and stuffing area.

A new roll-on/roll-off cargo-handling facility on the Industrial Canal adjacent to the Florida Avenue wharf, and new ship-repair facilities at the Alabo Street wharf on the Mississippi below the Industrial Canal.

SHIPMASTER'S REPORT: 1975.

Documents:

1 Crew List on Form I-418 to be visaed by US Consul at last port prior to arrival at a US port.
4 Crew Lists on Form I-418 (Another 2 copies if coastwise).
4 Store Lists on Form 1303 (Another 2 copies if coastwise).
4 Crew Effects Declaration 1304 (Another 2 copies if coastwise).
4 Ship Stores Declaration. 1303 (Shop List).
1 Crew Landing Permit Form I-95A is required by every Crew member not having a plastic Permit Form I-184. also seamans Red I.D. Card or Passport (Discharge Book does Not repeat Not qualify as a travelling document).
Masters Oath and General Declaration are normally completed by Agent.
Radio Pratique. No Form required.
Clearance from last port.
Ships Register with all certificates up to date.
2 Copies of Manifests covering cargo in transit.

Customs: Stores List. Curio List. 1 Crew List. Sealed High Duty Bond, Unchecked.

Immigration: Visaed Crew List. Seamans Red I.D. Card or Passport along with American Crew Pass. Typed. Question asked by Officials "How long at sea?" I.D. Card handed back to seaman with American Pass stamped. Department very thorough and efficient.

No mail or money to be distributed until Immigration completed, also no persons permitted ashore or onboard until formalities completed except for Agents and Officials.

If no visaed crew list Master signs official form. Cost US$10.0 for whole ship's company.

Port Health: Radio pratique not granted as seamens' cards not completed. No representative visited vessel. Report any death through Agents.

Agriculture Dept.: Inspected vessel. Galley, Messrooms, Storerooms, etc. Meat and Vegetable rooms sealed.

Garbage bins to be covered (Collection expensive, retain on board until sail if possible).

Rat guards to be used.

Provisions and Stores: Select own supplier. Agent reticent to suggest anyone. Prices comparable UK with good quality expensive. Stores and Medicines ordered through providor.

Laundry: Satisfactory. Billed by weight. 24 hour service.

Watchmen: None placed on board but security police at section openings.

Telephone: None placed on board. Use office on quay side.

Water: Plenty available. Shore connections used. Cost, 23 cents per 1,000 gallons.

Bunkers: Delivered by barge. Charged for what is ordered. Do not over stem. Barge hired from private firm. Any bunkers not taken paid for and revert to barge owners.

Walport Films: Exchanged.

Coast Guard: Require number of Oil Pollution Certificate (Certificate of Financial Responsibility). Whether AMVER participant. Require ship's particulars including horsepower. Displacement tonnage on sailing. Name of Master and Chief Officer. Dangerous cargo particulars and stowage.

National Cargo Bureau: Representative from National Cargo Bureau comes onboard and requests ship's particulars also ports of call to and from. Inspector looked at hatches where cargo to be loaded. He then issues a Certificate of Readiness. Loading can then commence.

Code of Federal Regulations: Each ship should have a copy. Difficult to come by. Acquired 1970 copy from Agents. Equivalent to our 'Blue Book'.

Repairs: Select own firm. Anxious to please. Unable to judge as little work contracted out.
Money: Delivered by separate security firm. Satisfactory.
Radio Messages: Send ETA at least 48 hours before arrival to Agents and Branch Pilots with draft. Notify Captain of Port of any explosives for discharge or in transit. If all healthy and documentation correct ask for Radio Pratique. Confirm ETA at 24 and 10 hours. Inwards send ETA to Agents after passing Pilot Town. Agent will notify if radio pratique granted. Not necessary to fly "Q" flag going up river.
Stevedores: Hours of work 0800 to 1200 hrs., 1300 to 1700 hrs. Straight time. Weekday gangs will work until 1800 or 1900 hrs. to finish. Night: 1800 hrs. to midnight, 0100 to 0600 hrs. Head Stevedore checks Factory Act Book. Gangs will work continuously except for 3 hours in any 24 hours. 4 different Union Contracts. Plan maker makes own plan then airmails same to ports of discharge. Crew open hatches also close same. Crew not to do any cleaning.
General: Use S.W. Pass at all times. South Pass has only 18 ft. of water and shoaling all the time.

Pilot boards on lee side at Sea Buoy – Flash "A" (· –) from fast launch painted black. Ladder about 6 ft. from water level. Branch Pilot takes vessel to Pilot Town where River Pilot takes over. Ladder usually starboard side inward and port side outward 8 ft. above water. First come first served at sea buoy. About 1.5 to 2 hours from Sea Buoy to Pilot Town and about another 6 hours to berth. Proceed up river at harbour full speed. Reduce speed occasionally for long tows, dredgers and ships on loading berths.

River Pilot docks vessel.

Signals by day "H" flag. By night nothing.

Inland waterways rule of road applies.

We had clear daylight run up river and down at night. Mid December. Start of fog. Low fog experienced on water also some patches, fairly thick. If fog does develop it is worth remembering that once past Pilot Town Southbound, few if any places to anchor and one has to continue on.

Racon at entrance useful. Anchorages as per charts. When arriving contact Pilot on VHF Channels 9, 12, 13.
Berth: Satisfactory. 24/29 Market Street. Just past bridge. Quite a long walk to open section to get out of docks. Recommend at night get taxi back and if walking into town by day at least 2 persons.

Sufficient bollards. No cranes. Berth head up. Usually starboard side to.

Moorings. 4 headlines, 4 stern lines plus 2 springs each end. Passing traffic fairly heavy with considerable wash. Rat guards a requirement.

Ship's gangway. Quay about 25 ft. above water level. Wooden pile fenders very effective.
Tugs: Used for berthing and unberthing. 1 only alongside port forward shoulder. 2 tugs lines. When making fast tug passes portable Walkie Talkie on board to send up to Pilot on bridge. Pilot left by tug which used own ladder.
Radar: Satisfactory repairs carried out.
AUTHORITY: Port of New Orleans, Board of Commissioners.

NEW YORK, New York and New Jersey: 40.43 N. 74.00 W. **(See Plan Book)**

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).

Customs boarding officer will also examine Ship's Register and Load Line Certificate.

In addition the following documents will be required for formal entry, to be made within 48 hours of arrival from abroad:
Health Pratique.
Master's Oath (Customs Form 3255).
All Foreign Clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Compulsory for foreign flag ships, and U.S. ships bound to and from foreign ports.

24 hours notice of ETA required. Pilot boat should be contacted on VHF Channel 16, or ship-to-ship Channel 2638 or 2738. Vessels requiring Pilot should hoist signal letter "G" in daytime. In foggy weather the letter "X" should be sounded on whistle.

Pilot boat is generally found about 1.5 miles West of Ambrose Light Tower. In bad weather Pilot tries to stay windward of normal Pilot station.

In poor visibility an inbound ship should make Ambrose Tower and then proceed at slow speed to the Ambrose Channel sea buoy while blowing the letter "X" on her whistle. If no Pilot is obtained by the time she is in the vicinity of the sea buoy she should then anchor about 0.5 mile to 1 mile North of the line from Ambrose Tower to the sea buoy and await Pilot.
ANCHORAGES: For ships entering from Sandy Hook there are anchorages in lower New York Bay, Gravesend Bay, Raritan Bay, and Arthur Kill off Perth Amboy. In the Upper Bay, anchorages available off Bay Ridge for 30 days, off Jersey City for 72 hours, and off Stapleton for 48 hours. For vessels entering via Long Island Sound there are anchorages in the Western end of the Sound and in the East River.

Vessels entering New York harbour are required to have 2 working anchors, by U.S.C.G. regulations.
RESTRICTIONS: Ambrose Channel, 10 miles long, maintained to a width of 2,000 ft. and a depth of 45 ft. MLW. The Northern approach to the harbour is through Long Island Sound into the East River. Main channels in the port are maintained to a depth of 45 ft. MLW.
MAX. SIZE: Restricted only by berth depth and location.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
VHF: All vessels over 100 tons gross are required to keep continuous watch on VHF Channel 13 when in areas where U.S. Inland Water Regulations apply.
TUGS: Over 50 private towing and transportation companies registered in the port.
BERTHING:
Staten Island: Howland Hook Container Terminal, 3 berths (32 ft. alongside).

Brooklyn: 57 general cargo berths, including 2 container berths at Northeast Terminals, and 27 Modern breakbulk berths at the Brooklyn Port Authority Piers (depth alongside range 30-34 ft.).

East River: 3 berths general cargo piers on Manhattan shore.

Hudson River: New Passenger Ship Terminal on Manhattan Shore between 48th and 52nd Streets provide 6 ship berths. 3 berth passenger ship faciliity at Houston St.

Hoboken Port Authority Marine Terminal: 3 piers, 6 general cargo berths.

Weehawken: 2 berth container facility at Port Seatrain.

Jersey City: 2 berth container facility at Port Jersey (Global Terminal).

Newark, N.J.: Port Newark (22 general cargo, 5 specialized, and 4 container berths). Depth range alongside 30-34 ft.

Elizabeth, N.J.: Elizabeth Port Authority Marine Terminal, 22 full container berths, channel depth 35 ft.
CONTAINER FACILITIES: *Newark and Elizabeth, N.J.:* Port Newark and Elizabeth Marine Terminal on the Western shore of Newark Bay, most intensively developed container terminal area in the world with almost 4 miles of berthing space, over 1,265 acres of container marshalling area, 23 container gantry cranes with capacity range of 30-70 tons. An international railroad container transfer yard serves both terminals.

Jersey City: A 2 berth, 84 acre container facility (Global Marine Terminal, Port Jersey) with 1,800 ft. of berthing space and 3 container cranes of 40 ton capacity.

Staten Island: A 3 berth container terminal at Howland Hook at the Northwest corner of Staten Island of 187 acres with 2,500 ft. of berthing space, 4×30-ton and 1×40-ton gantry cranes.

Weehawken: A 2 berth container facility at Port Seatrain of 87 acres and 1,885 ft. of berthing space equipped with 3 × 45-ton gantry cranes.

Brooklyn: 2 container berths of 87 acres with 2 gantry cranes of 50 and 70 tons capacity located between 29th and 39th Streets.
CRANES: Mobile floating cranes with capacity up to 500 tons available.
STEVEDORES: 13 stevedoring firms are active in the port, many of whom are also terminal operators. Normal working hours 0800-1700. Bulk Cargo work usually continues through 24 hours.
TANKERS: *Brooklyn:* Paragon Oil Terminal, 2 berths, depth 37 ft.; Patchoque Oil Terminal, 2 berths, depth 29 ft. and 35 ft.; Whale Oil Terminal, 1 berth, depth 36 ft.

Hudson River: Tappan Oil Co., 1 berth, 35 ft.

Bayonne, N.J.: Public Oil Terminal, 3 berths, 32 ft. depth; Humble Oil Terminal, Constable Hook, up to 38 ft. depth; Ross Oil Co., 3 tanker berths up to 38 ft. depth; Texas Oil Co., 4 tankers berths, up to 32 ft. depth; Texaco, 4 berths up to 32 ft. depth.

Kill Van Kull: Lehigh Tanker Terminal, chemicals, 35 ft. depth; Humble Oil Co., 3 tanker berths, up to 38 ft. depth; Texas Oil Co., 4 tanker berths up to 32 ft. depth; Ross Oil Co., 1 berth up to 32 ft. depth.

Newark, N.J.: 4 berths, 31 and 32 ft. depth.

Elizabeth N.J.: Chevron Oil Company, 1 tanker berth, 26 ft. depth; Crown Central, 1 tanker berth, 30 ft. depth.

Arthur Kill: **Perth Amboy:** Chevron Oil Co. (tanker berth, 26 ft. depth); Hess Oil Co. (tanker berth 30 ft. depth); Cities Service (tanker berth, 34 ft. depth); **Sewaren,** Royal Petroleum Co. (tanker berth, 32 ft. depth); Public Service Co. (tanker berth, 35 ft. depth); Shell Oil Co. (tanker berth, 35 ft. depth). **Port Socony,** Mobil Oil Co. (2 tanker berths, 27 and 30 ft. depths). **Carteret,** American Oil Co. (tanker berth M, 25 ft. depth); General American (2 tanker berths, 25 and 35 ft. depth). **Linden,** Cities Service (tanker berth, 32 ft. depth); Humble Oil Co. (tanker berth, 35 ft. depth); Sinclair Oil Co. (tanker berth 31 ft. depth). **Gulfport,** Gulf Oil Co. (tanker berth, 32 ft. depth).

Shipmaster's Report: 1976.
Greater New York Terminal, Astoria, Long Island:
Location of Berth: 40° 47′ N., 73° 53.7′ W.
Distance from Entrance to Berth: 28 miles.
Max. Size at Berth: LOA, 900 ft. Draft, Pilot stated 34 ft.
Restrictions: Vessel should be ballasted sufficiently to pass under Brooklyn Bridge, clearance 127 ft.

Vessels may berth and unberth day and night but only at certain stages of the tide.
Anchorage: At Stapleton as designated by USCG.
Terminal Information: Starboard side manifold to barge at Stapleton Anchorage, use 6 in. hoses. Port side manifold use at the

berth, ships hoses not required. The connection is 12 in. running into 18 in. Nearest shore tank 1,000 ft. from berth. Line fitted with steam jacket but not efficient. Max. pressure allowed 125 p.s.i. Shore gantry used at berth. Derrick used at anchorage for discharging into barge. Product handled: Fuel Oil (Heating Oil). No slop tanks available.

General: Pilotage compulsory. Ambrose Pilot requires 24 hours notice of arrival. Radio station handling traffic is Chatham. Most services are available at the berth, however it is advisable to take stores and send laundry from Stapleton Anchorage as there is no means of delivery at the berth other than carrying by hand. Stapleton Launch Service, tel. 981-8333/8384. Fresh water may have to be taken by barge in very severe weather as shore lines become frozen.

Approaching: From a Line from Rockaway Inlet to Ambrose thence Highlands Light, vessel must remain on VHF Channel 13 for ship-to-ship communication. When Pilot on board he maintains this Channel and ship can use own VHF other Channels. Marine operator on VHF 26 (call). For the passage of East River (Remember Brooklyn Bridge Clearance 127 ft.). One tug each bow alongside. After Hell's Gate and passing Port Morris to port, vessel cants to starboard to pass between North and South Brothers to starboard and Rikers Island to port through 500 ft. wide buoyed channel (some unlit) South to berth (inwards). It is preferable to come through Hell's Gate at HW or LW slack, thus avoiding cross currents between Brothers at other times.

FRESH WATER: Available at most piers in the port district at a nominal rate. Water barge available to serve vessels at anchor in emergency but this is expensive.

FUEL: All grades of fuel readily available. Except for tankers loading or discharging, bunkers are normally delivered by barge. It may be economical to shift vessel to refuelling berth.

GANGWAY/DECK WATCHMEN: Available and recommended if any crew detained by Immigration.

CUSTOMS ALLOWANCE: 200 cigarettes or 2 lb. tobacco, 1 quart wine/spirits per man.

IDENTIFICATION CARDS: Standard U.S. Immigration forms I-95 to be made up for each crew member on arrival.

BERTHING: *Outer Harbour Terminal:* Operator: Crescent Wharf and Warehouse,1401 Terminal Street, Oakland, Ca. 94607. Tel. (415) 465-8681.

1 combination Break-Bulk/Container/Oil transfer facility. 191 m. (256 m. at Berth 10). 10.7 m. at MLLW. 250 ton mobile crane equipped to handle 20 and 40 ft. containers.

Berth 10 operated by Crescent Warehouse Co., 1625 Maritime Street, Oakland, Ca. 94607. Tel. (415) 763-1550.

New 2 berth Container Terminal under construction served by 2 container cranes.

Sea-land Container Terminal: Operator: Sea-land services, Inc., 1425 Maritime Street, Oakland, Ca. 94607. Tel. (415) 271-1000.

Berths: 2, Length 1,355 ft., water depth 40 ft. MLLW.

Container handling facilities: 4 Paceco, 30-ton cranes; 2 truck scales; 250 refrigerated container outlets. Chassis operation.

Matson Container Terminal: Operator: Matson Terminals, Inc., 3050 7th Street, Oakland, Ca. 94607. Tel. (415) 893-2456.

Berths: 3, including 1 for roll-on/roll-off operations. Length 2,220 ft., depth 35 ft. MLLW.

Container-handling facilities: 3 container cranes – 27.5 ton Star; 30-ton Paceco; 33-ton Star. 1 truck scale; 200 refrigerated container outlets. Container yard is straddle carrier-type operation (containers stored 2 or more high).

Oakland Container Terminal: Operator: Oakland Container Terminal Co., 707 Ferry Street, Oakland, Ca. 94607. Tel. (415) 834-5822.

Berths: 2, length 309 m. depth 10.7 m. MLLW.

Container handling facilities: 1 Modified "A" frame Paceco 40-ton container crane; 1 truck scale; 150 refrigerated container outlets. Container yard utilises wheeled Paceco transtainers. Containers are stored 5 abreast and 2 or more high.

7th Street Public Container Terminal: Operator: Marine Terminals Corporation, 5190 7th Street, Oakland, Ca. 94607. Tel. (415) 839-6490.

Berths: Five. 3 container, 2 roll-on/roll-off and/or Combination break-bulk/container. Length 2,325 ft., water depth 35 ft. MLLW.

Container handling facilities: 3 Paceco low-profile, 40-ton container cranes; 1×140-ton Manitowac crawler crane; 3 truck scales; 96 refrigerated container outlets.

United States Lines Container Terminal: Operator: United States Lines, 1579 Middle Harbor Road, Oakland, Ca. 94607. Tel. (415) 465-4010.

Berths: 2, Length 1,443 ft., water depth 35 ft. MLLW.

Container-handling facilities: 2 Alliance low-profile, 51-ton container cranes, 1 crane modified for 125ft. outreach at 39 tons; 5 truck scales and outlets for 100 refrigerated containers. Container yard is chassis-type operation.

Outer Harbour Public Container Terminal: Berth 4 Operator: Marine Terminals Corporation, 909 Ferry Street, Oakland, Ca. 94607. Tel. (415) 839-6490.

Berths: 1. Length 750 ft., water depth 35 ft. MLLW. 50 Refrigerated container outlets, cranes available from adjoining container terminals.

American President Lines/Seatrain Container Terminal: Operator: American President Lines, Inc., 1395 Middle Harbor Road, Oakland, Ca. 94607. tel. (415) 271-8000.

Berths: 2. Length 1,300 ft., water depth 35 ft. MLLW.

Container handling facilities: 2 Alliance low-profile, 55 ton container cranes, 1 crane modified for 125 ft. outreach at 47 tons.; 3 truck scales; 108 refrigerated container outlets. Container yard is chassis-type operation.

Grove Street Terminal: Operator: Unassigned: Contact Port of Oakland for information. 3 berths, length 1,742 ft., depth 35 ft, at MLLW. Facilities: Break-bulk cargo operation utilising fork-lifts and tractors. Rail tracks alongside berths. Scheduled for modernisation by end of 1981. Combination Container/Break-bulk facilities.

9th Avenue Terminal: Operator; Marine Terminals Corporation, foot of 9th Avenue, Oakland, Ca. 94606. Tel. (415) 452-3742.

Berths: 3. Length 2,052 ft., depth 35 ft. at MLLW.

Facilities: Import steel and bulk cargo-handling centre. 2 Manitowac crawler cranes (capacity 150 and 100 tons). 2 Manitowac truck cranes (capacity 100 and 80 tons). Bulk-loading facilites with 10 steel storage silos capable of holding 9,750 cu.ft. each. Rail track alongside berth.

TANKERS: *Outer Harbour Terminal, Oil Pier:* Operators: Mobil Oil Co. and Ashland Oil Co. Length, 623 ft. (Lower Side) 683 ft. (Upper Side). 50 ft. (Face). Depth at MLLW. 33 ft. (Lower Side). 35 ft. (Upper Side). 36 ft. (Face).

Mobil Oil: Pipe-lines 4×10-in., 2×8-in., 3×6-in. and 1×4-in. 14 storage tanks, total capacity 522,100 barrels.

Ashland Oil: Pipe-lines 2×8-in., 3×6-in. 9 storage tanks, total capacity 142,300 barrels.

AUTHORITY: Port of Oakland.

AGENT: See "San Francisco".

OGDENSBURG, New York: 44.42 N. 75.30 W. (See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: Seaway Pilot boards at Cape Vincent or Snell Lock and acts as docking Pilot.

ANCHORAGE: Anchorage area West of city at open roadstead area.

RESTRICTIONS: No tide. No restrictions other than Pilots' discretion as to wind and visibility.

MAX. SIZE: Largest vessel to enter 600 ft. long. Draft 27 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany), Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Western Union to OCN Corp. VHF Seaway Channel via Maria Radio Cardinal.

TUGS: No tugs necessary.

BRIDGES: Ogdensburg/Prescott International Bridge – 126 ft. clearance MWD.

BERTHING: By prior notice only. Port Authority Terminal, length 600 ft., depth 27 ft. One Grain Elevator capacity 500,000 bushels.

CRANES: Available, up to 82 tons capacity.

STEVEDORES: Order by 1800 hrs. day preceding arrival. Advise any change of ETA.

MEDICAL: Excellent medical service and availability of doctors. No vaccination necessary.

DENSITY: Fresh water.

FRESH WATER: Available by pipeline at Port Authority Terminal.

FUEL: One day's notice, all grades. Diesel, bunker "C", Kerosene.

GANGWAY/DECK WATCHMEN: Normally not used.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine/spirits, normal Customs allowance U.S. Ports.

CARGO GEAR: 25-ton mobile crane, fork trucks to 13 tons capacity. Ship's gear to be in good working order.

IDENTIFICATION CARDS: Needed as per Immigration department requirements.

REPAIRS: Limited dockside repairs available.

REPATRIATION: Can be arranged.

AIRPORT: (0.5 mile from city). Allegheny Airline – 3 flights daily to Syracuse, New York, etc.

TIME: 5 hours difference Eastern Standard Time. Daylight Saving time in Summer.

HOLIDAYS: New Year; Washington and Lincoln's Birthdays; Memorial Day; 4th July. Labour Day, Veteran's Day.

POLICE/AMBULANCE/FIRE: Police, 393–1551; Ambulance, 393–1221; fire, 393–1010.

TELEPHONES: Available at Pierside (315) 393–7580.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Ogdensburg Bridge and Port Authority.

OLYMPIA, Washington: 47.00 N. 122.53 W. (See Plan Book)

DOCUMENTS, PILOTAGE, etc.: Refer to "Tacoma".

ANCHORAGE: Good with muddy bottom found anywhere North of the channel entrance and the Olympia shoal.

MAX. SIZE: Olympia's turning basin is 800 ft. width; the pier, 2,000 ft. in length; depths in channel, 30 ft., and alongside pier, 35 ft.; both at MLLW. Depth at Berths No. 1 and 4, 35 ft. and at Nos. 2 and 3, 40 ft. MLLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Tugs normally join vessels in outer channel, use ships lines and are primarily engaged for turning vessel in turning basin on entry.

STEVEDORES: Available.

FRESH WATER: Available.

FUEL: Available.

CARGO GEAR: Usual requirements only as good facilities are available.

REPAIRS: Most types of repairs undertaken.

AIRPORT: Located 4 miles South of Olympia, fronts on Interstate Highway 5. Operates twice daily service to and from Seattle and Portland.

TELEPHONES: Shipboard telephone service is provided.

SERVICES: Most services are available upon request.

SHORE LEAVE: Allowed.

AUTHORITY: Port of Olympia.

AGENT: See "Seattle".

ORANGE, Texas: 30.06 N. 93.44 W. (See Plan Book)

DOCUMENTS: Crew Lists, Passenger List and Customs Documents.

PILOTAGE: Radio to Agent, 12 hours and Pilots 2.5 hours in advance of ETA. Pilots contacted by VHF Channel 12 and 13. Pilots board at Sabine Pass, Sea buoy position 29° 36′ N., 93° 48′ W. or upon request board at 29° 25′ N., 93° 40′ W. Pilot boats FM (VHF) Channel 65 – 156.275 mc/s.

ANCHORAGE: Off Sabine bar – 40 ft.

RESTRICTIONS: Sabine River Channel: project depth 30 ft.; bottom width 200 ft., including slip at port; marked and lighted for 24-hour navigation. Turning basin, 1,000 ft.×3,000 ft.

MAX. SIZE: Length – no limit, breadth – no limit, draft – 30 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: RCA – Global Communications.

TUGS: Join vessel in port turning basin. Tug's line used, no charge.

BERTHING: 2,308 ft. mooring space to accommodate 4 deep-sea vessels; all concrete docks; additional berthing space in slip for laying-up 4 vessels.

STEVEDORES: 5 stevedore companies – handled through Agent.

MEDICAL: Local facilities – complete.

TANKERS: Limited to 30 ft. draft.

DENSITY: Brackish.

FRESH WATER: Ample fresh water, through 2.5 in. connection, rate of delivery about 500 gallons per minute.

FUEL: All grades available; 8 hours advance notice required.

FIRE PRECAUTIONS: No welding or burning without U.S. Coast Guard welding permit; also special authority required for ships loading explosives.

DEVELOPMENTS: Additional 37 acre tract on Sabine River for future development.

CONSULS: None available locally.

REPAIRS: Facilities available.

DRY DOCKS:

Levingston Shipyard – Orange.
400 ft.×126 ft. 11,000 tons, 17 ft. draft over blocks.
350 ft.×60 ft. 3,000 tons, 15 ft. draft over blocks.
250 ft.×72 ft. 3,000 tons, 11 ft. draft over blocks.

REPATRIATION: Can be arranged through area immigration.

AIRPORT: Local, no scheduled airlines. Mid County Airport with scheduled airline service – 30 miles.

HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Lincoln's Birthday; Washington's Birthday; Texas Independence Day; St. Patrick's Day; Good Friday; Memorial Day; Emancipation Day; Independence Day; Labour Day; Columbus Day; Veterans Day; Thanksgiving Day; Christmas Day; Any holiday which falls on Saturday or Sunday will be recognized on the following Monday. No work performed on Labour Day or Christmas Day.

POLICE/AMBULANCE/FIRE: Police 883–5654; Ambulance 883–4333; Fire 886–7431.

TELEPHONE: Can be connected on board.

GENERAL: No strong tidal currents at the berths, excellent shelter during tropical storms.

AUTHORITY: Orange County Navigation and Port District.

OSTRICA, Louisiana: 29.22 N. 89.32 W.

East Bank of Mississippi river about 42 miles above S.W. Pass entrance.

DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".

ANCHORAGE: Available in river downstream of docks.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Not normally required.

BERTHING: Gulf Refining Co. Terminal, tanker berth 45 ft. depth. 2×8-in. hoses loading 34,000 bbls. per hour. Ballast line 18 in. for slop discharge.

FRESH WATER: Not available.

FUEL: Bunker "C" available ex-wharf.

DENSITY: Fresh water (1000).

OSWEGO, New York: 43.28 N. 76.30 W.

(See Plan Book)

Oswego harbour is located on the South shore of Lake Ontario about 15 miles from its East end at the outlet to the Oswego River. It is the first major port on the Great Lakes off the seaway. It is also the Great Lakes entrance to the Great Lakes – Hudson River Waterway which connects with the Hudson River at Troy.

PILOTAGE: No requirements.

RESTRICTIONS: Average navigation season – April 1st to December 15th.

Approaches: Through entrance between the Arrowhead Breakwater pier heads and detached breakwater.

Entrance is 750 ft. wide with a depth of 25 ft. at LW datum.

Controlling depth of water 25 ft. at datum.

No Vessel length and beam limitations.

Approach open 24 hours a day.

Navigation lights available

Harbour: Controlling depth – front of each terminal open for public use. 21 ft. on West side. 28 ft. on East side.

Turning Basin – 115 acres.

Accessible 24 hours per day.

No Vessel length and beam limitations.

HEALTH/AGRICULTURE: See "Health" and "Agriculture" before first U.S.A. port (Albany).

TUGS: Towage facilities available on request.

BERTHING: The general cargo facilities are operated by the Port of Oswego Authority. The West Side Facility is a finger pier 1,000 ft. long providing 4 berths and has 21 ft. of water alongside at LW datum. 28,000 sq. ft. of covered storage is available with limited open storage. A million bushel grain elevator is situated on this pier. The East Side Facility is a marginal wharf 1,900 ft. long, providing 3 berths and has 27 ft. of water alongside at LW datum. 134,000 sq.ft. of covered storage is available with unlimited open storage.

Oswego exports general cargo. It imports grain cement, wood pulp, petroleum and general cargo.

New Marginal Wharf: Length of berth 1,750 ft. Depth 25 ft at LW datum.

BRIDGES: None.

CRANES: Mobile heavy lift equipment available.

BULK HANDLING FACILITIES: One 1,000,000 bushel capacity elevator equipped with 3 loading spouts, 2 Marine legs and 2 car pits.

FRESH WATER: Available at all general cargo docks.

FUEL: Seaway Terminal of Metropolitan Petroleum Corporation, 4 tanks – Capacity 327,000 barrels of No. 2 and No. 6 oil. Coal bunkerage available by truck delivery.

CONSULS: None.

REPAIRS: Above waterline repairs available.

AUTHORITY: Port of Oswego Authority.

PALM BEACH, Florida: 26.46 N. 80.03 W.

(See Plan Book)

LOCATION: Port is located on a salt water sound known as Lake Worth and lies 1.3 miles from the 37 ft. contour of the Atlantic Ocean to which it is connected by an artificial cut at the North end of Lake Worth known as Lake Worth Inlet. The Inlet is located within the boundaries of the City of Riviera Beach, Florida.

PORT LIMITS: Sea buoy at channel entrance. Dockage charges commence when vessel is made fast to wharf, and are on a 24 hour basis or fraction thereof.

DOCUMENTS: See "Jacksonville". All vessels shall, upon arrival, report to Port Director all cargo to be discharged. Such report shall be in form of copies of Ship's Manifest, or certified statements, and shall show number of units, commodity, weight, destination, consignee, and all other information which port of Palm Beach deems necessary for compilation of commercial statistics, for reserving of necessary warehouse or wharf space, or other purposes.

All vessels shall, before sailing, report to the Port Director all cargo loaded into such vessels. Such reports shall be in the form of copies of the ship's manifest, or certified statements, and shall show numbers of units, commodities, and all other information which the port of Palm Beach deems necessary for compilation of commercial statistics, or other purposes.

PILOTAGE: Compulsory. Provided by Pilots' Association of the port of Palm Beach, 130 East Port Road, Riviera Beach, Florida, 33404.

CHANNEL: Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning South-westerly to the terminals. The channel is 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin, 1,400 ft. by 1,310 ft. adjacent to the port terminals on the West shore, with an extension of 672 ft. at 25 ft. depth to the New North Wharf and Loading Ramps. Present depth of entrance channel is 35 ft. at MLW.

ANCHORAGE: Anchorage is designated by the Bar Pilots, which in most instances is at sea. Port has no established anchorage.

MAX. SIZE: Vessels up to 620 ft. in length with draft of 34 ft. have used facilities.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Port has no communication equipment. U.S. Coast Guard Station, Peanut Island, Riviera Beach, Florida, can be reached on 2182 kHz – 2678 kHz – 156.8 mHz. Pilots VHF Channel 16.

TUGS: Available to assist berthing. Service is provided by the Port Towing Corporation, PO Box 12425, Lake Park, Florida 33403. Office Tel. 622-6422 and 622-8688, nights and holidays 844-4244.

BERTHING: 2 slips and 4 marginal wharves with 6 ramps including a 14 acre container facility.

Berth		Length (ft.)	Depth (ft.)
No. 1	South Marginal	190	25
No. 2	East Half, South Side of Slip 2	325	35
No. 3	West Half, South Side of Slip 2	325	35
No. 4	West End of Slip 2	225	35
No. 5	West Half, North Side of Slip 2	325	35
No. 6	East Half, North Side of Slip 2	325	35

No. 21	Middle Ramp	67	25
No. 22	North Ramp	67	25
No. 23	North Side Container Wharf	82	25
No. 24	South Half Container Wharf	236	25
No. 25	North Half Container Wharf	236	25

Supplementing the berths are 157,400 sq.ft. of warehousing space. Open storage area is within easy reach of all berths.

All vessels, their Owners or Agents, desiring a berth at wharves, shall, as far in advance of date of docking as possible, make application to port specifying date of docking, sailing, nature and quantity of cargo to be handled, and name of the vessel.

SPECIALISED CARGO HANDLING FACILITIES: Ramps for roll-on/roll-off cargo and wharfside accommodation for equipment to handle containerised cargo only.

STEVEDORES: The recognised working hours of port shall be from 0800 until 1200 hrs. and from 1300 until 1700 hrs., Monday through Friday, holidays excepted. During the recognised working hours services will be charged for on a straight time basis.

When vessels are loading or discharging cargo the port may furnish checker-foremen to supervise release of cargo being loaded and/or check cargo being discharged. The charge for each man furnished will be based on labour-furnished rates for foremen, with the Port reserving right to furnish as many men as they deem necessary to protect their interests. Charges for this service will be rendered against the vessels, their Owners, or Agents.

TANKERS: The port receives tankers each month in the 15 to 18 thousand gross ton limit.

FRESH WATER: Fresh water delivered to vessels at wharves or docks.

FIRE PRECAUTIONS: Smoking is strictly prohibited in transit sheds, warehouses, or on apron of wharves and on vessels, handling dangerous, hazardous, or inflammable cargo. Smoking is also strictly prohibited in any areas where gasoline or like materials are being handled or serviced to equipment.

Explosives and hazardous or highly inflammable commodities or materials may be handled over, or received on, the wharves or other facilities of port of Palm Beach by special arrangements with and at the option of the Port Director, and the receiving, handling, or storage of such commodities shall be subject to Federal and State laws, rules and regulations.

In all cases where explosives and hazardous or highly inflammable commodities or materials are to be handled, prior consent by the U.S. Coast Guard must be received and a copy of the consent filed with the Port Director. Responsibility for safeguarding of life and property will be the duty of the shipper. Proof of sufficient liability insurance must be presented to Port Director prior to arrival of such materials.

CONSULS: Barbados and Monaco.

DEVELOPMENTS: New 14 acre container marshalling area has been recently completed. New raw sugar storage facility at Slip 2 is under construction for completion in late 1978.

CARGO GEAR: Crane capacity can accommodate single lifts up to 300 tons. Also available are 2×150-ton cranes, 1×200-ton crane, 1×65-ton crane and 1×40-ton crane also 1×23-ton fork lift.

HOLIDAYS: New Year's Day; Washington's Birthday; Columbus Day; Decoration (Memorial) Day; Independence Day; Labour Day; Veteran's (Armistice) Day; Thanksgiving Day; Christmas Day. When any one of these falls on Sunday, the following Monday is observed as a holiday. When any one of these falls on Saturday, the preceding Friday is observed.

GENERAL: Marine terminal 1.3 miles from the open sea, served by U.S. Highway 1 and is directly connected by port-owned belt-line railroad to the Florida Coast Railway.

Broad aprons (80 ft.) with ship-side rail, and warehouses backed by open storage areas. The slips and wharves are located on a salt water sound, fully protected from the sea by barrier islands; departures from the slips average only 15 minutes through inlet to open sea.

AUTHORITY: Port of Palm Beach.

PANAMA CITY, Florida: 30.10 N. 85.40 W.
(See Plan Book)

DOCUMENTS:

2 Passenger Lists.
2 Crew Lists.
2 Curio Lists.
2 Stores Lists.
Register.
Load-line Certificate.
Tonnage Tax Certificate.

PILOTAGE: Compulsory. Pilots board at sea-buoy. Guard Channel 16 VHF. Safe anchorage at sea-buoy if waiting for Pilot. Pilot boat black hull with white lettering.

ANCHORAGE: Several safe anchorages inside bay with 32 or more ft. depth.

RESTRICTIONS: Maximum safe draft over bar is 32 ft. No other restrictions except in case of bad weather.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Preferably WLO Radio, Mobile, Alabama, U.S.A. Also good service from RCA. Vessel should radio ETA and cash requirements.

TUGS: 3 tugs available. Tug is used only to assist in berthing. Always uses ship's lines.

BERTHING: Any time, except for unusual weather. Good safe port. Berths are about 1 hour from Pilot station.

STEVEDORES: Must have ETA by 1500 hrs. local time in order commence loading 0800 hrs. next day. Normal work day 0800–1200 hrs., then from 1300–1700 hrs., Monday through Friday.

MEDICAL: Medical and hospital service available.

TANKERS: No slop discharge facilities. 1 tanker berth – 29 ft. max. draft.

DENSITY: Salt water. 1.5 ft. tide range.

FRESH WATER: Available all berths but ships must supply hose.

FUEL: Only on advance notice – limited supplies.

GANGWAY/DECK WATCHMEN: Only if required by ship's Owners or Master.

OPENING/CLOSING HATCHES: Normally done by stevedores. In some cases, is done by ship's crew.

CUSTOMS ALLOWANCES: Tobacco, 1 carton 200 cigarettes. Wine/Spirits, reasonable quantity – 1 or 2 bottles.

CARGO GEAR: Must show safety inspection if requested.

IDENTIFICATION CARDS: All crew must have U.S. Immigration Landing Permit.

CONSULS: None.

REPAIRS: Limited deck and engine repairs can be effected.

REPATRIATION: Available.

AIRPORT: Approximately 4 miles from port. Served by 2 scheduled air lines.

TIME: Central Standard Time (GMT minus 6 hours or 90° Meridian). Central Daylight time in Summer (minus five or 75° Meridian time).

HOLIDAYS: No work holidays: New Year's Day; Easter; 4th July; Labour Day; Christmas Day; Working holidays; Lincoln's Birthday (February 12); George Washington's Birthday (Third Monday in February); Memorial Day (Last Monday in May); Veterans Day (Fourth Monday in October); Fall Festival Day, Thanksgiving Day (Fourth Thursday in November).

POLICE/AMBULANCE/FIRE: Dial operator, or 785-6161.

TELEPHONES: Placed aboard only by very special arrangement – not normally available.

SERVICES: Most repairs to radio, radar and other such equipment. Advance notice required.

SHORE LEAVE: Any time – any berth.

DELAYS: Normally, delays infrequent and for short durations.

AUTHORITY: Panama City Ports Authority.

PASADENA, Texas: 29.43 N. 95.13 W.
Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PASCAGOULA, Mississippi: 30.21 N. 88.34 W.
(See Plan Book)

PORT LIMITS: Subject to Charter-Party Terms, an "arrived ship", subject to jurisdiction of the Port Authority, occurs when a ship arrives at Horn Island Sea Buoy.

DOCUMENTS: See "New Orleans".

PILOTAGE: Compulsory. Pascagoula Bar Pilots' Association ((601)–762–1151). Pilot boat to be contacted on VHF Channel 16, pilot boat has black hull with white house, International light and sound signals to be made by vessel requiring a Pilot. Pilot to be taken aboard vessel in vicinity of Horn Island sea buoy. Usual safety measures are required, with respect to boarding. Vessels may anchor in this area while awaiting Pilot, there is a 35 to 50 ft. depth with good holding bottom.

ANCHORAGES: Only anchorages permitted are in vicinity of Horn Island Sea Buoy or seaward.

RESTRICTIONS: Under normal conditions there are no entry restrictions as to time or state of tide.

From Horn Island Sea Buoy to Horn Island Pass the channel is 350 ft. wide by 40 ft. deep; from Horn Island Pass to Pascagoula River Turning Basin the channel is 350 ft. wide and 38 ft. deep; the Pascagoula River Turning Basin is 950 ft. wide and 38 ft. deep.

Channel into Bayou Casotte (East Harbour) from Junction Buoy to mouth of Bayou Casotte Harbour is 225 ft. by 38 ft. deep; thence at inner harbour channel is 300 ft. wide and 38 ft. deep into the Bayou Casotte Turning Basin; the Bayou Casotte Turning Basin is 940 ft. wide and 39 ft. deep. All dimensions listed are project dimensions; depths refer to MLW datum.

No vessel or tow shall enter Bayou Casotte Channel outbound after a seagoing vessel or tow has passed Buoy 30 inbound, and; no vessel or tow shall enter Bayou Casotte Channel inbound after a seagoing vessel or tow has passed Buoy 11 outbound. Vessels or tows which are at a dock should remain at the dock until the inbound seagoing vessel or tow has passed, or until it has reached its berth, whichever occurs first.

MAX. SIZE: Length of vessel is restricted to approx. 900 ft. by turning basin, no breadth restriction, draft 38 ft. at MLW. Normal tidal range 1.6 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Mobile Marine operator, Station WLO best for vessels to route ETA cables to Agent. Also, TRT Telecommunications, New Orleans (WNU) as WLO is closed from approximately 2230 to 0630 hrs.

RADAR/VHF: Radar and VHF radio on pilot boat, Channel 16.

Every vessel shall, when entering the Horn Island Pass Channel, and the Bayou Casotte Channel, or when getting underway from a berth, or when approaching the Pascagoula Channel while transitting the Intracoastal Waterway:

(a) Maintain a radio watch on VHF–FM Channels 13 and 16 in accordance with Vessel Bridge to Bridge Telephone Regulations of January 1st, 1973.

(b) Check on other traffic operating in the area by transmitting on Channel 16:

"SECURITY, SECURITY, SECURITY
THIS IS.......................................(Vessel Calling)
ENTERING...
CHANNEL PROCEEDING FROM
..................TO...
CHECKING FOR TRAFFIC, STANDING
BY ON CHANNELS 13 and 16,.....................
(Vessel Calling) .... OUT"

If other traffic replies, utilize Channel 13 for exchange of information relative to safe navigation.

TUGS: Tugs will join vessels in harbour or off docks. No escort required.

BRIDGES: None affecting 38 ft. channels.

2 bridges across the Pascagoula River above the turning basin, not passed through between channel and harbour.

BERTHING: Private and public berths are available, by prior arrangement, in both the Pascagoula River Harbour (West Harbour) and the Bayou Casotte Harbour (East Harbour).

West Harbour – Public: Grain Elevator, 3,100,000 bushel capacity, 900 ft. berth at 780 ft. wharf and 38 ft. deep.

Terminal 'A' with transit shed, 500 ft. wharf and 38 ft. deep.
Terminal 'B' with transit shed, 544 ft. wharf and 38 ft. deep.
South Clusters, 1 ship berth approximately 600 ft. by 24 ft. deep.

West Harbour – Private – Ingalls Shipbuilding: Note. These berths are normally occupied with ships being outfitted and are not normally available.

West Bank Shipyard, 4,410 ft. bulkhead, 5 berths by 38 ft. deep.
East Bank Shipyard, three 600 ft. piers, one 800 ft. pier, each 32 ft. deep.

East Harbour – Public:

Terminal 'E' with transit shed, 517 ft. wharf by 38 ft. deep;
Terminal 'F' with transit shed, 737 ft. wharf by 38 ft. deep;
Terminal 'G' with transit shed, 516 ft. wharf by 38 ft. deep;
Terminal 'H' with transit shed, 556 ft. wharf by 38 ft. deep.

East Harbour – Private: Corchem/Corhart, 550 ft. wharf by 24 ft. deep;

Chevron U.S.A. Inc., Wharf No. 1, 5 berths by 38 ft. deep;
Chevron U.S.A. Inc., Wharf No. 2, 1 berth by 38 ft. deep;
Mississippi Chemical Company, 2 loading docks each 475 ft. by 34 ft. depth;
Chicago Bridge & Iron Company, slip 900 ft. by 16 ft. deep.

SPECIALIZED CARGO HANDLING: Chevron U.S.A. Inc., Wharf No. 1 has facilities for handling acid, caustic, ammonia, and LPG, in addition to petroleum products.

Mississippi Chemical Company loading docks are equipped for handling phosphate rock and other bulk materials, liquid and dry.

Terminals E & F are equipped for exporting bulk ores.

CRANES: The Port has a heavy lift capability of 400 tons by an arrangement with Ingalls West Bank Facility. Truck cranes with capacity up to 110 tons, also available in the port area.

STEVEDORES: 12 hours notice requested to arrange stevedore gangs.
Straight Time: 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs. Mondays through Fridays except Holidays. All other hours and days are overtime.
MEDICAL: Agents to be advised if immediate medical attention is required. Free pratique granted except in case of communicable diseases aboard, inoculations required by Public Health Service, etc. Doctors and hospital services readily available.
TANKERS: Chevron U.S.A. Inc. owns and operates 3 wharves on East side of Bayou Cosotte harbour. Facilities have 6, 8 and 12 in. lines with adaptors, discharge tanks with a capacity of 60,000 tons, 3 tanker berths with a 38 ft. draft. Wharf No. 2 for receiving crude oil from large tankers. Wharf designed and built for 50 ft. draft, but presently limited to 38 ft. draft on account of channel and seaward.
DENSITY: Density varies with the state of tide and wind, from fresh to salt water.
FRESH WATER: Potable water is available at most berths. Water at public terminals can be delivered at flow rate of 50 g.p.m.
FUEL: Large vessels are bunkered at berth in the harbour by 2 tank barges, operated by Fuel Services, Inc. All grades fuel are available.
FIRE PRECAUTIONS: Usual safety precautions required. Verify unusual procedures for approval of U.S. Coast Guard.
GANGWAY/DECK WATCHMEN: Port guards are furnished for the general cargo terminals at the port's expense. At least 1 person must be on duty aboard vessel.
HATCHES: Opening/closing hatches by the crew is at the discretion of the ship.
CUSTOMS ALLOWANCE: Each Crew member is allowed either 300 cigarettes or 50 cigars or 3 lbs. of tobacco. In addition, each member is allowed 1 quart of alcoholic spirits as regulated by provisions of the Mississippi Alcoholic Beverage Commission rules.
CARGO GEAR: No requirements for cargo gear other than it be certified by a recognised International organisation.
CONSULS: Many countries have consuls within a 100-mile radius of Pascagoula. (Mobile and New Orleans).
REPAIRS: Most deck and engine repairs could be arranged within port facilities.
DRY DOCKS: Ingalls Shipbuilding Corporation, West Bank Shipyard, has 1 launch pontoon (dry dock) with 38,000 ton capacity.
Ingalls Shipbuilding Corporation, East Bank Shipyard, has 1 graving dock, 485 ft. inside length, 75 ft. wide gate, 34 ft. deep, with loading capacity of 1 ton per sq. ft.
Walker Shipyard has one 800 ton dry dock.
Flechas Shipyard has one 600 ton dry dock.
There are several marineways in vicinity, capacities 50–100 tons.
SURVEYORS: Licensed Marine Surveyors are available in Port.
REPATRIATION: The City of Pascagoula is served by regularly scheduled transporation. Vessel's Agent to arrange clearance with Customs and Immigration officials.
AIRPORT: An airport is available approx. 35 miles from the city and is served by regularly scheduled airlines.
TIME: The port of Pascagoula is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months. (Last Sunday in April to last Sunday in October).
HOLIDAYS: New Year's Day (January 1st); King's Birthday (January 15th); Washington's Birthday (3rd Monday in February); Mardi Gras (41 days before Easter – Tues.); *Easter Sunday/Easter Monday (1st Sunday after 1st full moon after March 21st); King's Memorial Day (April 4th); Memorial Day (Last Monday in May); *Independence Day (July 4th); *Labour Day (1st Monday in September); Veterans' Day (4th Monday in October); Thanksgiving Day (Last Thursday in November); *Christmas Eve (December 24th); *Christmas Day (December 25th); *New Year's Eve (December 31st).
(*Non-working). Non-working holidays are observed from midnight of the holiday through to 0700 hrs. of the following day with the exception of Christmas Eve and New Year's Eve when the non-working portion of the holiday commences at noon.
Should any of the above holidays except Easter, Christmas Eve, and New Year's Eve fall on a Sunday the following Monday will be observed.
Elevator employees observe Martin Luther King's Memorial Day instead of Birthday.
Saturday shall not be considered as a layday in determining time ships are in berth in this harbour.
POLICE/FIRE/AMBULANCE: Telephone numbers for emergency services are: Fire 762–1133; Police 762–2211; Ambulance 762–6332. Universal emergency No. 911.
TELEPHONES: Telephones can be installed aboard vessels at a nominal charge.
SERVICES: Facilities are available for compass adjusting. Tank cleaning and receipt of tank washings can be arranged by contract services available in the area.
SHORE LEAVE: Allowed for any Crew member not detained by Immigration Office.
IDENTIFICATION CARDS: Standard Immigration Form 1-95 to be made up for each Crew member on arrival. Not necessary for crewmen already holding Form 1-95 issued for the same vessel.
DEVELOPMENTS: A dry bulk handling facility with a 3,000–6,000 t.p.h. loading capacity, scheduled for operation during 1978, built South of the Corchem, Inc. plant.
DELAYS: Berths at Public Terminals and the South Clusters are assigned by the Traffic Manager of the Jackson County Port Authority. Berths at private docks are assigned by the respective owners. No exceptions to this are allowed. Berth at Grain elevator is assigned by the Lessee-Operator, the Louis Dreyfus Corporation. No delays are encountered by following this procedure, emergencies excepted.
GENERAL: Some difficulty encountered by unscheduled tows who use harbour for shelter in inclement weather. Pilot Association aware of current situations. Study of traffic control system is being undertaken by the Port Authority, particularly considering hazards of tankers in Bayou Casotte 225 ft. wide channel. Ample barge storage is available in Barge Fleeting Area South of Ingalls Westbank Shipyard – capacity is 96 barges, operated by Colle Towing Company.
AUTHORITY: Jackson County Port Authority.

PENSACOLA, Florida: 30.25 N. 87.13 W.

(See Plan Book)

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING:

Berth Number	*Length (ft.)*	*Depth at MLW (ft.)*	*Use*
No. 2	400	35	General Cargo
No. 3	425	35	General Cargo and Lumber
No. 5	425	35	General Cargo
No. 6	580	35	General Cargo

BULK HANDLING FACILITIES: No. 1 Berth. Length 600 ft. Depth at MLW 35 ft. Discharge of bulk materials by conveyor, rate 400 t.p.h.
No. 1 Berth is also used for the discharge of oil, creosote oil and liquid chemicals into private facilities.
FRESH WATER: Available.
AUTHORITY: Port of Pensacola, Department of Transportation.

PETERSBURG, Alaska: 56.49 N. 132.57 W.

Located on Mitkof Island, Northern end of Wrangell Narrows. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.
MAX. SIZE: Harbour depth 24 ft. MLLW. Tides: diurnal range 15.7 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Good anchorage in Scow Bay, mud bottom.
CUSTOMS: Immigration, Guard Island. Quarantine and Customs, local.
TUGS: One 320 h.p.
BERTHING: Pacific American Fisheries Inc.: 75 ft. long, 65 ft. wide. Should dock at slack water. Strong current.
STEVEDORES: 1 gang.
REPAIRS: Marine Ways to 35 tons.
WATER: State approved water available.
FUEL: Diesel and Gasoline available.
MEDICAL: 21 bed hospital.
TRANSPORTATION: Scheduled and charter airlines and ferry.
AUTHORITY: City of Petersburg.

PHILADELPHIA, Pa.: 39.57 N. 75.10 W.

(See Plan Book)

DOCUMENTS:
3 Crew Lists Form I.418 (suggest 6 be made).
3 Passenger Lists Form I.418 (suggest 6 be made).
3 Customs Stores Lists (suggest 6 be made).
3 Curio Lists (own ship Form) (suggest 6 be made).
3 Narcotics Lists (own ship Form) (suggest 6 be made).
Manifest (Ship Cargo List). If Philadelphia first port of call, require 1 copy for Customs and 1 copy to be used as "traveller" surrendered last port of call. If Philadelphia not first port of call, required 2 copies, all cargo to be discharged at Philadelphia.
For Immigration Service:
Visaed Crew List.
Valid passport or Seaman's Book for each person on board.
Crewman's landing card (Form I.95) for each crew member.
PILOTAGE: Pilotage is provided by members of the Pilots' Association for the Bay and River Delaware who maintain a shore station and operations tower at Cape Henlopen. The Pilot Station is in operation on a 24 hour basis and guards VHF Channels 16 and 14. Telegraphic address is: DELPILOTS, 214 S. Eleventh Street, Philadelphia, Pa. 19107. Arrangements for Pilot may be made by the local Agent although an ETA and draft either by cable or VHF radio will be greatly appreciated and will facilitate prompt boarding on arrival. The Pilot boarding area is inside a line between Entrance Buoys No. 5 and 6, or approximately 2 to 2.5 miles S.E. of Harbour of Refuge Lighthouse. Pilots may board further off-shore upon special request.

Large and deep draft vessels awaiting berth are encouraged to avail themselves of the deep water anchorage adjacent to the Breakwater near the Pilot Station. There are 13 anchorage areas available along the Delaware for moderate size vessels of lesser draft.

RESTRICTIONS: There are no restrictions imposed upon entry except those dictated by vessel draft. Throughout most of its length, the Delaware river is dredged to 40 ft. at MLW. In addition there is a mean tidal range of about 5.7 ft. Vessels of 38 ft. 06 in. salt water draft can safely transit the river on a rising tide.
MAX. SIZE: Deep-draft oil carriers are lightered in a special anchorage approximately 10 miles N.W. of the Pilot Station. Vessels are restricted to a max. draft of 55 ft. by Federal Law.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Philadelphia Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: RCA Global Communication. "WSC" Tuckerton, N.J.
TUGS: Tugs normally join vessels adjacent to berth. Ship's lines are used.
BERTHING:

Northern Metal Co. Terminal	9 berths depth 25 ft. to 32 ft.
Tioga Terminal	7 ,, 40 ft.
Delaware River Terminal	4 ,, ,, 29 ft. to 32 ft.
Port Richmond	10 piers depth alongside 26 ft. to 36 ft.
Delaware River	21 ,, ,, ,, 26 ft. ,, 35 ft.
Greenwich Point Tidewater Ore Terminal	2 berths 850 ft. length, depth 37 ft. to 42 ft.
Girard Point	3 piers depth alongside 28 ft. to 36 ft.
Camden	3 ,, ,, ,, 30 ft. ,, 40 ft.
Gloucester	Ore Pier, depth alongside 25 ft. and 31 ft.

Packer Avenue Terminal, 5 berths, depth alongside 35 ft.
Port of Wilmington, 5 berths, depth alongside 35 ft.

CONTAINER HANDLING FACILITIES: *Tioga Marine Terminal:* Handles containerised and roll-on/roll-off cargoes. The terminal is equipped with 2 container cranes and a 300-ton mobile crane. Length of the marginal wharf is 3,300 ft., upper slip berth 725 ft. and lower slip berth 625 ft.

Packer Avenue Marine Terminal: Handles containerised and roll-on/roll-off cargoes. The terminal is equipped with 2 container cranes. The marginal wharf is 3,200 ft. in length and the roll-on/roll-off slip berth is 825 ft. in length.
STEVEDORES: Ship's Agents make arrangements for stevedore gangs. Agents should be kept advised of any change in ETA.
MEDICAL: Advance notice of requirements desirable to the extent possible. Hospital facilities are available. Smallpox vaccination certificate required (see Quarantine Declaration Form).
TANKERS: There are 83 petroleum handling berths along the Delaware River. All terminals are equipped with reducers. There are slop (residue) facilities at most terminals. Some main terminals listed below:

Fort Mifflin	Atlantic-Richfield	40 ft. depth
Point Breeze	Atlantic Richfield	32 ,, ,,
	Ballast Wharf	32 ,, ,,
Hog Island	Gulf Oil Terminal	40 ,, ,,
Paulsboro	Mobil Oil Terminal	30 ft and 40 ft. depth
	Patterson Oil Terminal	36 ft. depth
Marcus Hook	Sinclair Refining Co.	35 ,, ,,
	Sun Oil co.	33 ,, ,,
Westville (Eagle Point)	Texas Oil Terminal	40 ,, ,,
Pennsauken	Greater Valley Oil Co.	34 ,, ,,
Girard Point	Gulf Oil Co.	33 ,, ,,
Delair	Hess Oil Co.	31 ,, ,,

DENSITY: Philadelphia ports are fresh-water ports.
FRESH WATER: Fresh water normally not available directly at berth. Fresh water available by tank truck or through fire Department. No water barges available.
FUEL: Bunker C and diesel fuel available most oil terminals. Vessel's Agent should confirm berthing space at least 24 hours in advance.
GANGWAY/DECK WATCHMEN: These services are left to the discretion of the Master. It is often recommended by ship's P & I club that watchmen be engaged when seamen are detained by U.S. Immigration. Ship is subject to have fines by U.S. Government if any detained seaman deserts vessel.
OPENING/CLOSING HATCHES: Normally opened/closed by stevedores.
CERTIFICATES: Ship's Register and Load-line Certificate are mandatory. If vessel is carrying passengers from the U.S. they will require a U.S. Coast Guard Certificate. This can easily be obtained in about 1 or 2 days subject to meeting the requirement for life-saving equipment.
CUSTOMS ALLOWANCES: No set rule. Reasonable amount allowed for personal use.
CARGO GEAR: For exceptionally heavy lifts, Philadelphia Naval Shipyard has a 350-ton crane. Special permission is required to use this machine when there are no commercial facilities available.
CONSULS: The following countries are represented in Philadelphia:

Belgium
Brazil
Canada
Chile
Colombia
Costa Rica
Denmark
Ecuador
Germany
Great Britain
Guatemala
Haiti
Honduras
Iceland
Israel
Italy
Japan
Liberia
Mexico
Netherlands
Norway
Panama
Paraguay
Peru
Portugal
Sweden
Switzerland
Thailand
Uruguay
Venezuela

REPAIRS: All types of ship repairs can be effected.
AIRPORT: Philadelphia International Airport is located approximately 6 miles from central harbour area.
TIME: Standard time GMT minus 5. Daylight Saving Time (minus 4) is usually implemented about the last week-end in April.
HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Good Friday; Decoration Day (May 30th); Flag Day (14th June); Independence Day (4th July); Labour Day (1st Monday in September); Colombus Day (12th October); November Election Day (1st Tuesday in November); Armistice or Veteran's Day (11th November); Thanksgiving Day; Christmas Day; and any other national holiday as may be provided by executive authority.
POLICE/FIRE/AMBULANCE: Fire LO 3–6700; Police 231–3131; Port Disaster 609–WO 3–6420, WA 5–8780.
GENERAL: If garbage removal is required while in port, it must be done under supervision of the plant quarantine service.
AUTHORITY: Delaware River Port Authority.

PINEY POINT, Maryland: 38.08 N. 76.32 W.

(See Plan Book)

Steuart Petroleum Company Terminal on East bank of Potomac River, 82 miles from sea.
DOCUMENTS/PILOTAGE: Refer to "Baltimore".
ANCHORAGE: Unlimited, available in Chesapeake Bay.
RESTRICTIONS: Berthing 24 hours a day with max. draft of 38 ft. Vessels exceeding 725 ft. or 37 ft. draft, 2 tugs required docking – 1 sailing. Vessels under, 1 tug docking, none sailing.
MAX. SIZE: Limited by depth at berth, 38 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Baltimore Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMH Baltimore Radio. VHF channel 26.
TUGS: 2 tugs available for berthing, join vessel off berth.
BERTHING: 1 tanker berth only. Long lines required for first ashore.
FRESH WATER: Available at berth.
FUEL: Bunker "C" only, available ex-berth.
GENERAL: Nearest city with full services is Washington, 65 miles distance.
AIRPORT: Washington National or Baltimore-Washington.
TIME: GMT minus 6 hours.
SHORE LEAVE: Allowed.
AUTHORITY: Maryland Ports Administration.

PORT ADAMS, Texas: 29.45 N. 95.11 W.

Refer to "Houston" for all general information.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PORT ANGELES, Washington: 48.08 N. 123.25 W.

DOCUMENTS, etc.: Refer to "Tacoma".
PILOTAGE: Compulsory for all vessels except those in coasting trade. Pilot station at Ediz Hook serves all vessels bound for Puget Sound ports. Pilot boards off Port Angeles.
ANCHORAGE: In harbour, depth at least 42 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: 4 principal wharves, depth alongside 28-38 ft. MLLW.
STEVEDORES: 8 local gangs, additional gangs may be imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
FUEL: Barge delivery only.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCE: No definite quantities specified; reasonable allowance at discretion of Custom's Inspector.
AGENT: See "Seattle".

PORT ARTHUR, Texas: 29.53 N. 93.57 W.

(See Plan Book)

DOCUMENTS:
Entrance Direct from a Foreign Port:
Master's Oath on entry on vessel in Foreign trade, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
Ship's Stores Declaration, Customs Form 1303 (2 copies).
Crew Effects Declaration, Customs Form 1304 (2 copies).
Clearance from last Port.
Inward Foreign Manifest, Customs Form 7527-B (2 copies)
Passenger/Crew List. Form 418 (3 copies).

In event import cargo is onboard, an additional copy of each of the above Forms is required for travelling Manifest. A copy of the Manifest for each port is also required.

Entrance from Domestic Port:

Clearance from Last Port.
Crew Effect Declaration, Customs Form 1304 (2 copies).
Stores List, Customs Form 1303 (2 copies).
Crew List, Customs Form 418 (2 copies).
Master's Oath, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).

PILOTAGE: Come up in vicinity of the sea buoy. 24 hours notice of ETA should be given and revised if ship is delayed 1 hour or more. Telegraphic address is "Sabine Pilots, Port Arthur, Texas". Pilot station keeps 24 hour continuous watch on VHF Channel 12 – 156.6 mc/s. and on 2738 kc/s. Pilot boat is motor vessel with black hull, white housing flying Pilot insignia by day and Pilot light by night. Location of Pilot boat is in general vicinity of Sabine Pass sea buoy. Pilot ladder only on lee side of vessel.

Pilot will, upon request and at extra cost, board incoming vessels at buoy marked "SB" in position 29° 25′ N. 93° 40′ W.

RESTRICTIONS: The Port Arthur ship channel is in operation 24 hours per day. The only restrictions that might hamper vessel traffic would be the draft of the vessel (Port will be able to handle vessels taking up to 40 ft. of water) or extremely bad weather conditions such as fog or high winds. Also, vessels of the 85,000 ton or more class can only be moved during daylight hours.

MAX. SIZE: Port Arthur ship channel will be authorised to 40 ft. in depth and will vary from 400 to 800 ft. in width. Turning basin, which is located at mile 19 (only about 0.5 miles upstream from existing port facility) is 900 ft. in width. Bulk carriers going to grain elevator at Port Arthur or to one of the oil refineries would only be restricted by draft which would vary from 30 ft. to 40 ft. depending on load/discharge berth the vessel is en route to. See "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: For a vessel in the Gulf of Mexico, and en route to Port Arthur, the best way to route an ETA message is to radio "Port Arthur Radio" (Radio Marine Corporation of America) whose call sign is WPA. Port Arthur Radio will then either send the message through Western Union via its telefax machine or via telex if the receiver of the message has a telex machine. There are also radio stations located in Galveston, Texas (Mackay Radio, call sign KLC) and in Mobile, Alabama (call sign WLO).

TUGS: The exact position that the tug meets the vessel varies with each vessel but usually they meet just below Texaco Island. In some cases they meet as far up as Great Lakes Carbon (usually when vessel is in ballast and going to Gulf Oil Docks). Whether or not the tug uses the vessel's lines or its own lines depends entirely on the circumstances involved but the tugs usually use the ships lines. Port Arthur is served by 2 towing companies, (1) Moran Towing of Texas and (2) Sabine Towing & Transportation Company, Inc.

BERTHING: The first procedure for obtaining a berth at Port Arthur is to submit a Berth Request Form. The Berth Request will contain the following information and will be submitted, in duplicate, to P.O. Box 1428, Port Arthur, Texas: Date of request; type and name of vessel; loading ports; registry or flag; where vessel is to arrive from; ETA; where vessel is to sail for; estimated date of departure; what inbound cargo, if any, consists of; what outbound cargo, if any, consists of; date you expect to begin receiving outbound cargo. The Form must be signed by the Agent or Owner of the vessel. (Berth Request Form will be made available by the Port.) Upon receipt of a Berth Request from the Agent or Owner, the Port will then, upon determining availability of berth, return 1 copy of the initial Berth Request to the Owner or Agent as an assignment of berth. Berths are assigned on a first come first served basis at all times. All changes in vessel's ETA must be given to the Terminal Office immediately. All mooring and unmooring will be done by the Port. Procedure may differ at the various private terminals which are not under the jurisdiction of the Port Arthur Navigation District.

Also see "Developments".

BRIDGES: There are no bridges that would require a vessel to arrive at any certain time at Port Arthur, however, the first bridge approached involves a vertical clearance of 136 ft. MHW.

STEVEDORES: Advance order for longshore gangs varies as to contract held by ILA (International Longshoremen's Association). In Port Arthur, gangs have to be ordered as follows: Order by 1900 hrs. for the next morning (either 0700 or 0800 hrs.); order by 1100 hrs. for 1300 hrs.; order by 1600 hrs. for 1900 hrs. Must order by 1900 hrs. day before for any starting time Sunday or Holiday.

MEDICAL: It is not usually required that the Agent be given advanced notice of required medical attention but in some instances it is helpful in arranging transportation to a hospital and in obtaining a bed in the event the hospitals are near full. Port Arthur is served by 2 hospitals; (1) St. Mary's Hospital and (2) Park Place Hospital, both of which are very well staffed and have adequate facilities for almost any emergency. Also, advance notice is helpful when vessel is scheduled to dock late in evening or during night, as doctors are not in their offices and have to be located.

Particular inoculations required by the Public Health Department vary as to the vessel's last foreign port of call. The only inoculation required of all vessels is smallpox. Any crew members who have not had the required inoculations can usually be given these inoculations on board either by the Public Health Officer or a Physician. This is usually arranged by the Agent or Owner.

TANKERS: There are 3 major Oil Companies: Gulf Oil Corporation; Texaco Oil Company, Inc.; and Petrofina Company. Gulf Oil Corporation and Texaco Oil Co., Inc. are 2 of the largest Oil refineries in the country. The diameter of load/discharge lines range anywhere from 4 in. to 12 in. depending on the grade of the petroleum product being loaded. As far as slop discharge facilities are concerned, ballast tanks at all major oil companies. Gulf Oil has 3,400 linear feet of berth accommodations and Texaco Oil Co. has 5,299 linear feet of berth accommodations together enough to accommodate 11 supertankers plus barges. Petrofina Co., being the smaller of the 3 oil companies, has berth accommodations for 3 vessels.

BULK HANDLING FACILITIES: Texas Oklahoma Port Company's Bulk Marine Terminal in the Port's deepwater industrial park is located at Mile 26, handles dry bulk commodities from rail cars to storage to vessels at rates up to 3,000 t.p.h. and has space available for shipper storage tanks on pads, with open storage for 300,000 tons. The terminal also includes a 750 ft. wharf and is located directly on the Sabine-Neches Waterway which presently offers an authorized channel depth of 40 ft. All terminals described above are served by subject waterway and limitations of depth will vary at the face of dock at individual terminals. The Texas-Oklahoma Bulk Terminal maintains 40 ft. depth at the face of their facility.

DENSITY: Varies from fresh water (1000) to pure salt water (1025) depending on amount of rainfall and tide variations. According to figures obtained from the National Cargo Bureau, average density is 50% salt water or (1012.5).

FRESH WATER: The Port has 4 ships service outlets for fresh water, each of which is served by a 4 in. water line. Watering barges are available in the area for facilities which are not equipped to provide watering services.

FUEL: Almost any grade of fuel or marine diesel is available. In some instances there are fuel lines running directly to docks, but if not, bunkering barge is available. An advance notice is usually required by bunkering barge depending on number of vessels awaiting bunkering.

FIRE PRECAUTIONS: The Port has, in each of 4 equally spaced indentations along the front of its transit shed, a fire hose outlet fed by an 8 in. water line and there are numerous fire hose boxes throughout the transit shed. In addition to this a 24 hour guard service is constantly on the watch and is in direct communication with the Port Arthur Fire Department which is only seconds away. Authorized on dock smoking areas are clearly defined for proper safety controls.

DEVELOPMENTS: Located only 19 miles from sea, the new Public Ocean Terminal of the Port is located on the Sabine-Neches Waterway, presently 40 ft. deep with a minimum bottom width of 400 ft. The initial facility encompasses 360,000 sq.ft. including 1 transit shed 180 ft. × 600 ft. or 108,000 sq.ft. Rail trackage totals 120 car-spots at dockside with a 150-car storage yard behind the wharves. The facility includes a Gantry Crane (handling dry bulk, magnet, container and heavy lift cargoes) which straddles 2 of the 3 marginal tracks, travelling the entire 1,200 ft. length of dock. Crane will lift 75 tons a distance of 75 ft. off the face of docks, with all areas brilliantly lighted for 24 hour cargo operations. In addition to the 25 acre facilities described above, the District owns a total of 73 acres or 1 mile of frontage for future development. The master plan calls for a total of 4 Transit Sheds, additional open-dock wharves and roll-on/roll-off facilities.

GANGWAY/DECK WATCHMEN: Under normal conditions a watchman is not necessary on most vessels. Under certain conditions such as a communicable disease or a malafide crewman a watchman would be feasible but the decision is left up to Master or owner of the vessel. There is a $1,000 fine if a malafide crewman disembarks from the vessel.

OPENING/CLOSING HATCHES: Paragraph 2, Rule No. 1 of the Deep Sea Longshore and Cotton Agreement for Texas ports and Port of Lake Charles, Louisiana, states as follows: "When vessel is in loading or unloading berth, loading and laying of dunnage and the opening and closing of hatches, when in connection with the handling of general cargo and/or cotton, is longshore work and will not be done by ship's crew." This agreement, however expires October 1st 1978.

CUSTOMS ALLOWANCE: Tobacco: Each crewman is allowed to keep 300 cigarettes out of bond while in port. Wine and/or Spirits: Each crewman is allowed to keep 1 quart of spirits out of bond while in port.

CARGO GEAR: A current certified Gear Certificate is required to be on board at all times and is to be kept up to date.

IDENTIFICATION CARDS: American crewman do not need any identification card. Foreign crewman need only the landing permit from Immigration Department in order to go ashore.

CONSULS: The nearest Consul-Generals are in Houston, Texas. Port Arthur has only 2 honorary Vice-Consuls, which are: Norwegian and Spanish. Houston is approximately 90 miles from Port Arthur.

REPAIRS: All types of deck and engine repairs can be accomplished. Main ship repairers are: Gulfport Shipbuilding Corp., Burton Ship Yards, Inc., Sabine Propeller Company and Sabine Neches Shipbuilding Corporation, Coastal Marine Service, all of which are located in Port Arthur.

SURVEYORS: American Bureau of Shipping, Goodhue Building, Beaumont, Texas; Captain Van & Co., 1341 Procter Street, Port Arthur, Texas; Robert K. Hansen, 295 Rosine, Beaumont, Texas; National Cargo Bureau, Inc., World Trade Building, Port Arthur, Texas.

DRY DOCKS: 2 dry docks, largest being Gulfport Shipbuilding Co., which occupies 50 acres with 3,300 ft. of frontage on The Port Authur Ship Channel. Yard designs, constructs and repairs barges, tugs and other vessels. It has fully equipped shops and 4 floating dry docks with lifting capacities of 500, 1,800, 4,000 and 4,200 tons. The smaller dry dock is Burton Shipyards, Inc., which occupies 60 acres with 3,200 linear ft. of frontage on Port Arthur Ship Channel. This yard also designs, constructs and repairs barges, tugs and other vessels. It has fully equipped shops, 2 marine railways with haulout capacities of 1,000 and 1,500 tons and 1 floating dry dock of 3,000 ton capacity.

REPATRIATION: There are facilities for effecting crew changes and repatriation.

AIRPORT: Port Arthur is served by Mid-Jefferson County Airport which is located approximately 10 miles North of Port Arthur on Highway 69. The Mid-Jefferson County Airport is served by TIA (Texas International Airlines) and Delta Airlines.

TIME: Central Standard Time during Winter. Beginning April 28th until October 27th Central Daylight Time (clocks are moved ahead 1 hour). Central Standard Time is GMT minus 6 hours.

HOLIDAYS: Longshore Holidays are: Columbus Day (Second Monday in Oct.), Veterans Day (Nov. 13th), Thanksgiving Day (Fourth Thursday in Nov.), Christmas Day (Dec. 25th), New Year's Day (Jan. 1st), Martin Luther King's Birthday (Jan. 15th), Lincoln's Birthday (Feb. 12th), Washington's Birthday (Third Monday in Feb.), Texas Independence Day (March 2nd), Good Friday, Memorial Day (Last Monday in May), June 19th, July 4th, Labour Day (First Monday in September). At Lake Charles, LA., Mardi Gras Day to be substituted for Texas Independence Day. No work shall be performed on Labour Day or Christmas Day, except in case of fire or where property is in danger.

When holidays come on Saturday or Sunday, the following Monday to be recognized as the holiday. No work to be performed between 1600 hrs. and 1900 hrs. on election days. When Christmas falls on Saturday or Sunday, Monday will be an overtime day and gangs will work as ordered.

POLICE/AMBULANCE/FIRE: Police Department 983–5101; Fire Department 985–5511; Ambulance Service 985–5504 or 983–5666.

TELEPHONES: Facilities for placing a telephone on a vessel by request. There is a coin-operated telephone on the dock for anyone's use.

GENERAL: On vessels arriving directly from a foreign port there are 3 Government Agency Representatives that must board. Already mentioned and explained are Customs and Immigrations. The remaining one, Animal and Plant Inspection Services. The Meat Quarantine representative boards the vessel to seal up all meat with the exception of what will be needed while in port. In the event a vessel is detained in port for some reason and more meat is needed the Meat Quarantine Rep. must return to the vessel and personally break the seal and then re-seal the remaining meats. This representative boards all vessels entering the port whether from foreign or coastwise.

The Plant Quarantine Rep. boards all vessels entering from a foreign port to check all fresh fruits and vegetables for any foreign insects such as the Khapra Beetle.

SERVICES: Tank cleaning done in port must be done by longshore labour. As stated before, all major oil companies have facilities for removing tank washings.

SHORE LEAVE: The question of whether shore leave is allowed is entirely up to the ship's Master. The only requirements being; each crewman on shore leave must have a landing permit issued by the Immigration Department and no malafide crewman may be granted shore leave. Port Arthur has no restrictions pertaining to shore leave.

DELAYS: Delays in berthing usually arise from vessels ETA being delayed and thereby causing a berth conflict. The port is on a first come, first serve basis.

AUTHORITY: Port of Port Arthur Navigation District of Jefferson County.

PORT CANAVERAL, Florida: 28.25 N. 80.35 W.

(See Plan Book)

DOCUMENTS: Vessels arriving in the Customs Territory of the United States, Bureau of Customs Documentary Requirements:

1. The vessel's Register, Load-line International Certificate, Tonnage Tax Certificates, Clearance from last Foreign Port, and Certificate of Financial Responsibility (Oil Pollution).

2. Additional Documents required:

(a) Original Manifest (lists) of:
All Cargo on Board.
All Passengers on Board.
Stores List.
Crew Purchase List.
Crew List.
Narcotic List.

(b) All items listed in Nos. 1 and 2 *(a)* must be presented to the boarding Customs Inspector and later at the Customhouse for entry. In addition a Customs Form 1300 (Master's Oath) and Customs Form 1301 (General Declaration) must be presented at the Customhouse.

(c) Duplicate Manifest (lists) of:
1. All Cargo for discharge at this port.
2. All Passengers for discharge at this port.
3. Stores List.
4. Crew Purchase List.
5. Crew List.
6. Narcotic List.
7. CF3171 – Permit to Lade or Unlade (this will usually be furnished by the vessels agent prior to the arrival of the vessel.

(d) If vessel is proceeding coastwise from Port Canaveral with residue foreign cargo on board, prepare a Traveling Manifest which is a true copy of everything listed in the Original Manifest (2*(a)*). This must be presented to the boarding Customs Inspector and later at the Customhouse.

3. Other Documentary requirements: The Immigration Officer will require the original certificate crew list on form I-418. The same for passengers. He will also require the presentation of all passports and documents of seamen and pax as to their immigration status for entry into the United States. A supply of Seaman's Landing Permit Form No. I-95A and passenger Permit No. I-94 should be maintained and they should be typed and ready for landing.

The Immigration Officer will want to inspect the entire crew. The Customs and Agriculture Officers will want to inspect the food storage areas and the quarters of the crew. The Agriculture Officer will also require a stores list. The Customs Officer will place a seal on the Bonded Stores Locker.

PILOTAGE: Pilotage is compulsory for all foreign vessels and for United States vessels under register in the foreign trade. Pilotage is optional for United States coastwise vessels who have on board a Pilot licensed by the Federal Government. Vessel applies for Pilot through Agent or Port Authority. May also call Pilot Office direct, 305–783–4645. Pilot will board at buoys 7 and 8 (28° 23.8′ N. 80° 33.4′ W.). Pilot boat is 30 ft. long with grey hull, white house and buff deck, has "Pilot" painted on sides. There is no particular signal for Pilot. Pilot boat stations itself 1 mile S.E. of buoys 7 and 8, 0.5 hour before ETA of vessel. Vessels may anchor anywhere in area. Pilot boat is equipped with VHF Channels 12 (156.60 mHz) and 16 (156.80 mHz), but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given.

ANCHORAGES: Within the harbour itself, none. Vessels may anchor anywhere in the area of the Pilot station, buoys 7 and 8.

RESTRICTIONS: Docking and undocking carried on day and night. Draft restrictions – if vessel draft exceeds 33.6 ft. must await rising tide to enter port.

MAX. SIZE: Length and draft at Tanker Berth No. 1 and No. 2, 600 ft., with 32 ft. draft. Cargo dock length unlimited – 30 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. ports (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Pilot boat is equipped with VHF Channels 12 (156.60 mHz) and 16 (156.80 mHz) but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given. Best to route ETA cables through Western Union Telegraph. Port Canaveral is equipped with VHF Port Operations frequency 156.6

TUGS: There are 2×1,800 h.p. tugs at Port Canaveral; most ships use the tugs for docking and undocking. Tugs normally join vessel inside jetties and tugs lines are used.

BERTHING: All vessels unless prevented by conditions will be turned around upon entering turning basin and will be berthed headed seaward. No berthing permitted without Port Pilot aboard.

STEVEDORES: Important vessel gives accurate ETA at least 24 hours in advance to enable Agent to order gangs.

MEDICAL: Advance notice for Agents not required, but if available is appreciated. No Public Health Clinic in area, but there are good hospital facilities available. A contract physician's office of the U.S. Public Health Service is in Cocoa Beach, just South of the port.

TANKERS: 2 Tanker Berths available, 32 ft. draft at these berths. No oil to be pumped overboard. Heavy fines imposed for oil pollution, however slight. The ship or ship's Agent will immediately report any spillage of oil on the wharf or on the water and the extent of the spill to the Port Manager and the Harbour Master. If spillage is considerable all cargo operations must stop and vessel prepare to undock.

FRESH WATER: All wharves have facilities for supplying fresh water, delivered by 4 in. water line.

FUEL: The general cargo wharf, and Tanker Berth No. 1 has facilities for supplying fuel. 24 hours notice requested.

FIRE: Ships discovering fire on board or close by on shore will sound repeated long whistle blast signals and use every other available means to report the fire. Gasoline Tankers: All deck scuppers must be plugged before starting to discharge cargo. Supply of sand or sawdust must be on hand near the discharge headers. Static cable must be connected to wharf. Min. 100 lb. pressure must be on water main and fire hose connected. Discharging must be stopped during severe lightning. Deck Officers must keep close check on hose connections for gasket leaks. Emergency Ship Movement Policy of Port Canaveral must be observed.

GANGWAY/DECK WATCHMEN: Not usually employed, this service left to discretion of Master.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CERTIFICATES:
Ship's Register.
Load Line Certificate.
Tonnage Tax certificate.
Derating Certificate or Derating Exemption Certificate.

CUSTOMS ALLOWANCE: 300 cigarettes per crew member. Wine and/or spirits: 1 quart per crew member.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: None – nearest port would be Jacksonville.
REPATRIATION: All facilities available for effecting crew changes and arranging any necessary repatriations.
AIRPORT: Two airports available, serviced by regular airlines, Orlando International Airport, Orlando, Florida approximately 50 miles from the Port, Melbourne Regional Airport at Melbourne, Florida approximately 35 miles from Port. Also Ti-Co Airport approximately 25 miles from the Port, but this airport has only limited service.
TIME: GMT minus 5 hours normal, GMT minus 4 hours Daylight Saving Time.
HOLIDAYS: Numerous holidays do not effect operation of port, which operates 24 hours a day, 7 days a week.
POLICE/AMBULANCE/FIRE: Police/Fire, Tel. 783–7800; Ambulance, Tel. 452–1444.
TELEPHONES: Arrangements are not available for placing on board.
GENERAL: All vessels, civilian and military, will provide wire ropes from the bow and stern with eyes that can be reached by tugs coming alongside. Pilots will make sure wires are in proper position before leaving vessel. All vessels will undock and proceed to outer anchorage when so ordered by Port Manager and/or Harbour Master in the event of: *(a)* a severe oil spillage; *(b)* fire is discovered on board a vessel laden with petroleum, explosives or a quantity of dangerous cargo; *(c)* vessel is in jeopardy due to conditions on shore. Emergency movement of ships will be made with an able sea watch without awaiting for return of other ships personnel.
SHORE LEAVE: Crew allowed ashore.
REGULATIONS: All radio frequency radiations from ships in Port Canaveral must be scheduled to prevent any possible interference to missile tests conducted on the Cape Canaveral Missile test Annex. The only exception is standard ship/shore HF harbour control frequencies. Vessels desiring to radiate will request permission from the Port Manager and/or Harbour Master.
AUTHORITY: Canaveral Port Authority.

PORT EVERGLADES (including Fort Lauderdale), Florida: 26.05 N. 80.05 W. (See Plan Book)

DOCUMENTS:
- 3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 2 copies Crew Manifest (curio list).
- 2 copies Stores List.
- 2 copies Passenger List (Form I.418).
- 2 copies Crew List (Form I.418).

Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
- Health Pratique.
- Master's Oath (Customs Form 3255).
- All foreign clearances.
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.

PILOTAGE: Pilot boards at Port Everglades sea buoy, located 26° 05′ 30″ N. Lat., 80° 04′ 45″ W. Long.
ANCHORAGE: The prescribed anchorage area at Port Everglades is outside the harbour and North of the channel. Vessels desiring to anchor off harbour of Port Everglades are required to do so in this area to avoid possible damage to cables laid on ocean floor South of the channel.

South of the channel, immediately offshore, there is a Government Restricted Area.

North of the channel, immediately offshore, there is a spoil bank visible at low water.
RESTRICTIONS: Entrance to Port Everglades is by a straight channel running in a due Westerly direction for a distance of 1.7 miles from the 50 ft. contour of the ocean to the turning basin. The channel is 500 ft. wide at its seaward end, narrowing to 300 ft. wide from jetty entrance to turning basin. The water depth is 39 ft. including the turning basin. All depths are at Mean Low Water.
MAX. SIZE: Max. draft 37 ft. MLWS.
BASIN: The main turning basin is 1,200 ft. East and West and 2,450 ft. North and South with a depth of 39 ft. The North extension of turning basin is 620 ft. wide East and West on the North limits and 900 ft. wide East and West on the South limits and 1,150 ft. North and South, with a depth of 33 ft. The South extension of turning basin is 1,300 ft. wide East and West by 1,300 ft. North and South, with a depth of 32 ft., except Berths 17 and 18, which have a depth of 37 ft. in the Westerly 400 ft. and 34 ft. in the Easterly 900 ft. All depths are at Mean Low Water.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: The following radio channels are available to communicate with facilities at Port Everglades:

Ship calling and safety: Channel 16, 156.8 mc/s.
Business and operation: Channel 14, 156.7 mc/s.; 7A, 156.35 mc/s.; 18A; 156.9 mc/s.
Port Everglades Bar Pilot: Channels 16, 13, 14, 18A, 19A.
Port Everglades Towing Co.: Channels 16, 13.

TUGS: 3 tugs available to assist berthing with up to 4,200 h.p. Available 24 hours a day.
BERTHING: Port Everglades has 16,200 linear ft. of berthing facilities, as follows:

Berth	*Length in feet*	*31 ft. depth*	*34 ft. depth*	*37 ft. depth*	*38 ft. depth*
1–2–3	1,601	1,300		301	
4	700			700	
5	700			700	
6	378			378	
7–8	1,200			1,200	
8A	300			300	
9–10	1,200			1,200	
11	500			500	
12–13	1,201			1,201	
14–15	1,201			1,201	
16*–17–18	1,648			1,648	
19–20	1,300		900	400	
21–22	1,325		1,325		
23	240				240
24–25	1,369				1,369
26–27	1,337				1,337
Total	16,200	1,300	2,225	9,729	2,946

*Berth 16 has a depth of 39 ft.

CRANES: Up to 300 ton mobile cranes available for hire.
STEVEDORES: These services are provided by licensed stevedoring firms. Arranged by Agent.
FRESH WATER: Available.
FUEL: Fuel oil available.
REPAIRS: Shipyard equipped with a 350 ft. Syncrolift dry dock with a capacity of 4,200 tons, 1×1,000-ton floating dry dock, complete machine-shop and all supporting facilities.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.95, issued for the same vessel.
CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Independence Day (July 4th); Labour Day; Columbus Day (October 12th); Veteran's Day (November 11th); Thanksgiving Day; Christmas Day (December 25th). When any of the above holidays fall on a Sunday, they will be observed on the Monday following. Work on these holidays is by special arrangement only.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from April to October.
AUTHORITY: Port Everglades Authority.

PORT HURON, Michigan: 42.59 N. 82.26 W.

Refer to St. Lawrence for important general information.
PILOTAGE: Compulsory, by Seaway Pilots.
ANCHORAGES: Near head of St. Clair River at Sarnia. Vessels should anchor as close to shore as safely possible to keep channel clear for passing vessels.
RESTRICTIONS: Navigation season from mid-March to end-December approx. Dock channel depth – 25 ft. Vessels size restricted by Seaway locks.
MAX. SIZE: 730 ft. length; 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required. Port can be contacted through Marine Operator, Sarnia.
TUGS: Available. Not compulsory, but sometimes necessary in bad weather.
BERTHING: Port Terminal Co. Dock: 700 ft. long 26–31 ft. depth.
DENSITY: Fresh water.
MEDICAL: All facilities available.
FRESH WATER: Obtainable by pipe-line at all docks.
FUEL: All grades available by pipe-line at all docks.
REPAIRS: Machine shops available for limited deck and machinery repairs.
AUTHORITY: Port Huron Maritime Commission.

PORTLAND, Maine: 43.39 N. 70.14 W.

DOCUMENTS:

1 Crew List.
1 Passenger List.
2 Stores Lists.
2 Foreign Purchases Lists.
2 Inward Foreign Manifests uniform cargo.
Original Bill of Lading.
1 Form 3251 Masters Oath on entry of vessel.
2 Form 1374 Outward Foreign Manifest.

PILOTAGE: Ship's Agents usually notify Pilot approximately 48 hours in advance of arrival then changes are made at 24 and 12 hours. Pilot boat usually called on Channel 16 and then switched to Channel 11 to continue conversation. Pilot goes aboard ship in vicinity of lightship using ladder on lee side. When weather bad suggest vessel anchor approximately 1 mile North of lightship.

ANCHORAGES:

Anchorage A (General)

Beginning at Eastern corner of Grand Trunk Railway Company Pier No. 3; thence approximately 90°, 1,700 yd. to Brooklyn Ledge Buoy 16; thence 330°, 350 yd.; thence 25°, 780 yd.; thence 303°, 750 yd.; thence 254°, 560 yd.; thence 186°, 750 yd.; and thence to the point of beginning.

Anchorage B (General and Quarantine)

Beginning at Brooklyn Ledge Buoy 16, thence 58° to Little Diamond Island thence along the S.W. shore to the pier on the Southern end of Little Diamond Island; thence 143°, 1,200 yd.; thence 270.25° to House Island Light; thence along the Western shore of House Island to Fort Scammel Point Light; and thence 329°, 1,620 yd. to the point of beginning. Anchorage B is intended for general purposes, but especially for use by oil tankers and other deep-draft ships entering the harbour at night and intending to proceed to the dock allotted at daylight the following morning, or as soon as practicable. This area also is to be used for quarantine anchorage. Any vessel anchored in this area shall be ready to move on short notice.

Anchorage C

Bounded on the N.W. by House Island; on the North by a line running 90° from House Island Light to Peaks Island; on the East by the Western shore of Peaks Island, by a line running 198° from the Westernmost point on Peaks Island to Cushing Island, and by the shore of Cushing Island to its Westernmost point; and on the Southwest by a line running from the Westernmost point on Cushing Island to Fort Scammel Point Light. Anchorage C is intended for use only by small vessels and for temporary anchorage.

Anchorage D

Southerly and Westerly of a line beginning at Lighthouse Channel Buoy 1; thence 35° to Anchorage Buoy E; and thence 145° to the mainland. Anchorage D is for use only by small yachts and pleasure craft, and small, light draft coastwise freighters.

RESTRICTIONS: No entry restrictions at night. Deep draft vessels brought in on high water only.

MAX. SIZE: Size of vessel restricted to 45 ft. draft in harbour area. No outside installations at port yet.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Portland Harbour use Channel 07. Vessels arriving Portland go through radio station in Chatham, Mass., RCA installations, or call station WOU via radio-telephone. VHF Harbour Control at Portland.

TUGS: Tugs join vessel at Spring Point in Portland Harbour. Tugs use own lines at no additional charge. Docking Pilots not supplied by Company but are available.

BERTHING: Tidal conditions govern arrivals and departures.

BRIDGES: No undocking on ebb tide through bridge.

STEVEDORES: 4 hours notice on ordering gangs.

MEDICAL: No advance notice required by Agent. 2 hospitals, Maine Medical Center and Mercy Hospital, who take bed patients. All seamen require certificate showing they have had a smallpox vaccination during last 3 years.

TANKERS: Tankers arriving at Portland Pipe Line, Pier 2, make preparations for 2×10 in. and 12 in. hoses.

Berth	*Depth Alongside*
American Oil Terminal	30 ft. MLW
Chevron Terminal	32 ft. MLW
Portland Pipe-line Pier No. 1	35 ft. MLW
Portland Pipe-line Pier No. 2	48 ft. MLW
Texaco Terminal	30 ft. MLW

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire. Drinking water available at piers.

FUEL: No. 6 diesel oil and blended interfuel oils. Delivery is via barge only and 24 hours notice required.

FIRE PRECAUTIONS: None – except at certain oil piers where information given to Shipmaster upon arrival at pier. Ample fire protection, salt water lines, sprinkler system on pier, local fire department.

DEVELOPMENTS: Plans under way for redevelopment of waterfront. Plans call for deepening Fore River from 35 ft. to 45 ft. and studies also under-way to provide offshore unloading of giant super-tankers. Plans to construct a $140 million oil transfer facility. In order to complete project, existing 40 ft. ledge will be removed to 90 ft. and dredging in the inner harbour of Hussey Sound will be done. No date set for final completion.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew open hatches.

CERTIFICATES:

Load-line certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. tonnage tax certificate of previous trip if available
Radio Operator Licence.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per man. Wine and/or Spirits, 1 bottle per person.

CARGO GEAR: No additional cargo gear necessary.

IDENTIFICATION CARDS: Form I-95 must be filled-out on arriving unless seaman has had a prior one made out for a previous arrival on same ship.

CONSULS:

Norwegian: Allan Kjos-Hanse, 30 Mayer Road, Portland, Maine, Vice-Consul.
French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.
Finnish: Frank W. Bjorklund, 163 Main Street, Norway, Maine.
Italian: Dr. Domenico A. Santoro, 43 Deering Street, Portland, Maine.
Panamanian: Mary Navarro de Cerrillo, Lafayette Town House, Portland.
Swedish: Martin Johnson, Vice Consul, 443 Congress Street, Portland.

REPAIRS: Repair facilities for all types of machinery available.

DRY DOCKS: 3 basins divided into 7 berths which can handle a vessel up to 455 ft. long and 62 ft. wide (not currently activated). Also 3 other smaller marine slipways.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Portland Municipal Airport 3.5 to 4 miles distant. Served by Northeast Airlines and Executive Airlines.

HOLIDAYS: New Year's Day; Washington's Birthday; Patriots Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas and Veterans' Day. Possible to get gangs to work all days except Labour Day and Christmas.

POLICE/AMBULANCE/FIRE: Police 773–5651; Ambulance 772–5463; Fire 772–6531.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

GENERAL: Discussions underway with Coast Guard and other officials to install fixed lighthouse stations to replace lightships at entrance.

AUTHORITY: Maine Dept. of Transportation Bureau of Waterways.

PORTLAND, Oregon: 45.30 N. 122.40 W.

PORT LIMITS: The seaward boundary of the Port of Portland is Astoria, 96 miles N.W. of Portland.

DOCUMENTS:

3 Cargo Manifests.
3 Store Lists.
3 Crew Curio Lists.
3 Crew Lists.
1 Clearance from Last Port.
1 Tonnage Tax Certificate.
1 Copy of Vessel's Register.
1 Itinerary of Vessel, port by port.

PILOTAGE: Bar and River – Compulsory. Vessels Masters or their Agents to give notice of arrival or departure between 0800 and 1600 hrs. ETA Bar Pilot Astoria at least 12 hours before arrival giving deepest draft. Pilot station Astoria keeps 24 hour VHF watch on Channel 16, also pilot cutters when on station watch VHF Channel 16 (156.8 mc/s) and MF 2182 and 2738 kc/s.

On approaching Bar Pilot station Masters to contact Pilot cutter for boarding instructions. Bar pilotage covers from sea to the Port of Astoria, river pilotage covers from Astoria to Portland. They change from launch while steaming in channel off Astoria buoy No. 37.

Warning: Due to heavy swells on bar during stormy Winter conditions, crossings may be temporarily suspended, therefore, Masters should attempt earliest VHF radio contact on Channel 16 with Pilots or coastguard station "Cape Disappointment" for latest bar conditions.

During Summer months Masters should use extreme caution in poor visibility as many small fishing craft will be encountered near mouth of Columbia River. Also see "General – Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Vessels may anchor to await berths at various locations on the Columbia River. Usual spots are at Tongue Point Astoria, Longview and at Vancouver, Washington.

RESTRICTIONS: All vessels Masters or their Agents to obtain Coast Guard clearance at least 24 hours before arrival. Captain of Port may impose movement restrictions if any hazardous cargo. Under 36 ft. draft no movement restrictions, 36 ft. and over up to maximum permissible draft of 38 ft. on Pilot's recommendations.

No size restrictions length and beam, however, Corps of Engineers maintain only 600 ft. wide channel, therefore, deep laden vessels over 600 ft. in length to use extreme caution when turning.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Portland/Vancouver maintained at 40 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Portland.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

Master to radio with ETA state of crew health noting any sickness. Agent will report sickness to Seattle Quarantine Station for clearance instructions.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Route ETA cables through KLBITT Seattle, Washington.

TUGS: Tugs normally join vessel at designated berth. Tugs' lines used at no charge.

BERTHING: The port operates 5 public ocean cargo terminals containing 28 deepwater berths, including 5 container berths with 6 high-speed container cranes. Present depths alongside berths is 40 ft. min. at MLLW.

There are general cargo berths and berths for commodities which require special handling. Port facilities include 21 transit sheds, and 5 warehouses with 2.2 million sq.ft. of sprinkler protected storage area.

BRIDGES: No arrival times designated if coming from sea and in excess of 750 tons gross. Departures regulated, with bridge closures during peak traffic flow (0700 to 0900 hrs. and 1615 to 1815 hrs.) unless permission granted by Harbour Master.

SPECIALISED CARGO HANDLING FACILITIES: As well as the 6 container cranes, there are 6 whirley cranes, a 150-ton shear leg crane and a 175-ton mobile crane, largest of its kind on the Pacific Coast.

At Terminal Two is a 1,341 ft. container/general cargo pier with a 40 ton and a 50 ton straight line crane and 2×65-ton gantry cranes. Terminal Two contains a Roll-on/Roll-off berth. Pier has a 25-acre open storage yard with rail and truck service. 4 straddle carriers, capable of stacking 20 ft. containers 3 high, or 40 ft. 2 high, serve the yard. Pierside warehouse and container freight station 90,000 sq.ft.

At Terminal Four there is an 8.1 million bushel capacity grain elevator, with box car tipper, truck dumper and barge unloading facility. Log dock is equipped with 2 whirley cranes. There is a Dravo bulk unloader with digging capacity of 900 t.p.h. Tanks are available for special cargoes such as petroleum, molassses, tallow and ore concentrates.

The Terminal 5 elevator is the most modern grain outloading facility in the lower Columbia River and is operated under sub-lease by Columbia Grain Inc.

The elevator has a storage capacity of 1.5 million bushels and is the fastest on the river, with an outloading capability of 2,100 metric t.p.h. The facility can receive grain by rail, truck and barge. The barge leg operates at 1,000 t.p.h., trucks are unloaded at 225 t.p.h. and about 65 railcars can be unloaded in an 8-hour shift.

Terminal Six has a container pier, length 1,800 ft., with 3×50-ton straight line cranes and a 60,000 sq.ft. container freight station. Also a dock for Columbia River container-on-chassis barge service.

STEVEDORES: Allocation for gangs Monday to Saturday must be confirmed at 1100 hrs. to longshore hiring hall. Allocation for gangs Sunday and Monday made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. in afternoon if night gangs are to work.

MEDICAL: Any type medical treatment provided and hospital facilities available. Only inoculation requirement for entry to U.S. is smallpox, except when vessels have called at an area infected by another disease.

TANKERS:

Berth	*Max. Size Vessel Length*	*Draft*
Shell Oil Company	575 ft.	32 ft.
Standard Oil	660 ft. – 700 ft.	35 ft.
Texaco Inc.	650 ft.	30 ft.
Phillips Petroleum Co.	No maximum	30 ft.
Time Oil Co.	600 ft.	38 ft.
Mobil Oil Corp.	550 ft.	31 ft.
Richfield	600 ft.	30 ft.
Union Oil Co.	550 ft.	30 ft.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential.

FIRE PRECAUTIONS: Fire precautions respecting tankers administered by U.S. Coast Guard, which enforces shipboard regulations under the Code of Federal Regulations, Part 46, Sub-Part D, Sections 20 to 40; the Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; Fire Marshal exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

All vessels to have towing cables rigged fore and aft on the offshore side. Cables to be made fast with the eye 1 m. above the water.

GANGWAY/DECK WATCHMEN: Option of vessel owner/agent and available through private firms.

OPENING/CLOSING HATCHES: While ship at dock, opening and closing is work of longshoremen. Ship may open or close own hatches while underway.

CERTIFICATES: Registered tonnage certificates. Certificate of Financial Responsibility (all details must agree with vessel's register).

CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.

IDENTIFICATION CARDS: Immigration Dept. requires form No. 1-95A and No. 31 (Repatriation). Changes can be effected at any U.S. Immigration Office.

CONSULS: The following countries are represented in Portland:

Austria
Belgium
Costa Rica
Denmark
El Salvador
Finland
France
Germany
Ghana
Great Britain
Iceland
Italy
Japan
Korea
Lebanon
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Senegal
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 4 floating docks, largest 982 ft.×188 ft. clear width, with lift capacity of 81,000 long tons.

REPATRIATION: Arrangements possible for crew changes or other repatriation.

AIRPORT: Airport 10 miles distant, served by 8 regularly scheduled airlines with direct service and/or connections domestically and world wide.

TIME: GMT minus eight hours. Daylight Saving Time becomes effective annually on the last Sunday in April through the last Saturday in October.

HOLIDAYS: *New Year's Day; President's Day (Feb. 21st); Memorial Day (May 30th); *Independence Day (July 4th); *Labour Day (first Monday in September); Veterans' Day (Nov. 11th); Thanksgiving Day, *Christmas Day (Dec. 25th), State-wide Election Days. Other legal holidays may be proclaimed by state or national authority. When holiday falls on Sunday, the following Monday is observed as holiday. Longshore work performed on any of above listed days is overtime, which is one and a half time rate. Days marked (*) are stop-work days, i.e. no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police 226–7551; Fire 232–2111; Ambulance: provided by several private firms, but can be obtained through police or fire number.

TELEPHONES: Available by order from terminal superintendents at $5.00 connection charge.

SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.

SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.

AUTHORITY: Port of Portland.

AGENT: Cascade Shipping Co., 421 S.W. 6th Avenue, Portland, Oregon 97204. Tel: 503-226-4018. Telex: TWX 910-464-1573. Cable: "Caship".

PORT LAVACA/POINT COMFORT, Texas:

28.40 N. 96.35 W.

DOCUMENTS:

2 Cargo Manifests.
2 Stores Lists CF1303.
2 Crew's Effects Declaration CF1304.
1 Clearance from last Port.
Vessel's Register, tonnage, tax receipts, etc.
2 Copies Crew List.
2 Copies Passenger List.

PILOTAGE: Ship's Agents usually notify Matagorda Bay Pilots as to vessel's ETA. Pilot boat can be contacted on VHF Channel 16, then switch to Channel 26 to continue conversation. Pilot boards at buoy 1-A at position 28° 23′ N. 96° 17′ W.

ANCHORAGES: Marked on chart of Matagorda Bay and approaches.

RESTRICTIONS: Vessels may enter any time day or night. Entrance channel depth 38 ft. Bay Channel depth 36 ft.

MAX. SIZE: Alcoa Dock – size restricted only by channel depth of 38 ft. Public Dock – max. length approximately 600 ft. Draft controlled by channel depth of 38 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Galveston Radio (ITT Mackay Marine) and Port Lavaca Marine operator can be contacted on VHF Channel 16, then switch to channel 26 for continued conversation.

TUGS: 1 tug available joining vessel shortly before arriving at berth.

BERTHING: Ore carriers berth at Alcoa private dock. All other vessels berth at Public Dock.

STEVEDORES: Richard Bugg & Co. Inc., PO Box 457, Corpus Christi, Texas. At Alcoa's Dock all plant labour is used.

MEDICAL: No advance notice required. Several clinics and 1 hospital available in Port Lavaca.

DENSITY: Average density is 1010/1012.

FRESH WATER: Fresh water available alongside berth.

FUEL: Not readily available, must be barged or trucked from either Houston or Corpus Christi. Very expensive.

DEVELOPMENTS: Plans for lengthening dock and another warehouse are now being considered.

OPENING/CLOSING HATCHES: At public Dock this is done by stevedores. At Alcoa Dock this is done by ship's crew.

CERTIFICATES: Load line, foreign clearance, safety equipment, financial responsibility (oil pollution), tonnage tax receipts, will be required.
IDENTIFICATION CARDS: Immigration Crew Landing Permit I-95 required for each man.
CONSULS: Only Norwegian Vice-Consul Tel. 512-987-2311.
REPAIRS: Only minor repairs possible. No dry docks.
REPATRIATION: Arrangements are possible but preferably should be accomplished in larger ports.
AIRPORT: Nearest airport 20 miles at Victoria, Texas, served by Texas International only, Corpus Christi Airport about 90 miles; Houston Airport about 150 miles.
TIME: Central Standard Time during Winter. Beginning last Sunday in April until last Sunday in October, Daylight Saving time (clocks are moved ahead 1 hour).
HOLIDAYS: All holidays observed by contract with ILA. See "Houston".
POLICE/AMBULANCE/FIRE: Police Department, 552-6767; Fire Department, 552-2222; Ambulance Service, 552-2988.
TELEPHONES: Telephones are available ashore only. Telephone booth on Public Dock.
AUTHORITY: The Calhoun County Navigation District, Port Lavaca.

Private Dock owned by Aluminium Company of America with its Agent being Alcoa Steamship Company Inc., Point Comfort.

PORT NECHES, Texas: 30.00 N. 93.57 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING: Jefferson Chemical Co.: distance from sea 30 m., depth at berth 36 ft. Texaco terminal: distance from sea 34 m., depth at berth 32 ft.
MEDICAL: All facilities available.
DENSITY: Fresh water.
FRESH WATER: Available by barge.
FUEL: Bunker C not available ex wharf at Texaco terminal, only by barge from Port Arthur or Beaumont.
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCE: 300 cigarettes and 1 quart wine or spirits for each man.
IDENTIFICATION CARDS: Foreign crew require only Immigration Landing Permit.
CONSULS: Nearest at Houston.
REPAIRS, DRY DOCKS: See "Port Arthur".

PORT ST. JOE, Florida: 29.49 N. 85.19 W.

DOCUMENTS:

All documentation must be on United States forms. At least:
3 Passenger Lists.
3 Crew Lists (1 for visa crew list).
3 Curio Lists.
3 Stores Lists.
2 Complete Manifests.
Clearance Papers from last port.

PILOTAGE: Apply for Pilot through ship's Agent – address is "Port St. Joe, Pilots" and advance ETA 18 hours. "VHF – Channel 16". Pilot boat station is at Sea Buoy, Port St. Joe only and location of anchorage for vessel awaiting a Pilot is 1 mile West of Sea Buoy.
ANCHORAGES: Local harbour charts indicate safe anchorage.
MAX. SIZE: Draft 28 ft. 6 in.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Call sign WLO, Mobile, Alabama.
TUGS: None presently available.
STEVEDORES: ETA must be received by 1800 hrs. in order to have gangs at 0800 hrs. following day.
MEDICAL: No notice required. Hospital facilities available. Inoculations required same as public health U.S. Government requirements.
TANKERS: Discharge lines 8 in. No residue discharge allowed. 2 tanker berths 32 ft. draft.
DENSITY: Salt water – heavy concentration.
FRESH WATER: Available in unlimited quantities by hose connection from dock to ship, 1.5 in. to 2.5 in. size at 60 p.s.i.
FUEL: Fuelling facilities limited. Tanker trucks only. 2 days advance notice advisable. 2 grades of fuel oil available: *(a)* grade 6 – Bunker C – 156SSF at 122 degrees Fahrenheit; *(b)* Diesel oil – 36.5 SSU at 100 degrees Fahrenheit; *(c)* Gasoline, kerosene and motor oils available.
GANGWAY/DECK WATCHMEN: Only when requested by ship.
OPENING/CLOSING HATCHES: Work can be performed by either stevedores or crew.
CUSTOMS ALLOWANCE: 1 carton of cigarettes per week per crew member permitted. Further allowances would depend on circumstances. Wine and/or Spirits 1 bottle per crew member as allocated by Customs.
CARGO GEAR: Must be in compliance with "U.S. Government Longshoremen Safety Codes".
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None.
REPATRIATION: Can be accomplished by Agent and Immigration but should be accomplished in larger ports if possible.
AIRPORT: Served by regular airlines. (Southern Airways, National Airways). 6 combined flights a day. Distance 40 miles.
TIME: Saving time from first Sunday in May to last Sunday in October. GMT minus 5 hours Standard Time. GMT minus 4 hours daylight saving time.
HOLIDAYS: No Work Holidays – No work performed New Year's Day, Fourth of July, Labour Day, Christmas Day, or December 24th & December 26th, and Easter Sunday, except handling of mail, baggage and perishables (except bananas) or unless a ship is in distress, such as fire or leaking bottom, or, other causes that would damage cargo or vessel. In event work done on New Year's Day, Fourth of July, Labour Day, Christmas Day, December 24th & December 26th, or Easter Sunday, rate of pay for such ship work shall be double the normal time rate. Should above holidays fall on Sunday, double time will be paid. Following Monday will be paid at time and one-half.

Working Holidays – Armistice Day, Thanksgiving Day and Memorial Day are to be paid for at overtime rate – one and one-half times straight-time rate. Should any of above holidays, except Sunday fall on Sunday, the following Monday will be observed.

POLICE/AMBULANCE/FIRE: Police 227-3181; 227-4526; Ambulance 227-3511 (Comforter), 277-2491 (Prevatt), 227-4011; Fire 227-4011.
TELEPHONES: None available for placing aboard.
GENERAL: In sending ETA when ship is going to arrive over weekends (Saturday and Sunday), a notice wire should be placed and notice ETA should arrive prior to 1700 hrs. Friday.
SHORE LEAVE: Shore leave allowed when cleared by Immigration.
REGULATIONS: Normal working hours of longshoremen from 0800 to 2230 hrs. only 7 days a week.
DELAYS: Only when due to port congestion.
AUTHORITY: Port St. Joe Port Authority.

PORT SAN LUIS, California: 35.10 N. 120.45 W.

TERMINAL OPERATORS: Union Oil Company, Avila Beach, California. Tel. 805 595 2069.
MAX. SIZE: Tankers up to 750 ft. length and 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels should contact Union Oil Company through Marine Operator. "Walkie-talkie" sets used for communication with terminal. VHF station KTD 411, Channels 10 and 16.
BERTHING: Tanker berths only at Union Oil Company Pier. Vessels tie off pier at berth No. 4. Depth alongside 32 ft. MLW.

1×12-in. and 1×16-in. load/discharge lines. No ballast discharge allowed.

DENSITY: Salt water, 1025.
FRESH WATER: Limited amounts only available from the pier.
FUEL: Not available.
CONSULS: Nearest consuls situated at Los Angeles and San Francisco.
AIRPORT: County Airport, San Luis Obispo, situated 12 miles distant. 6 flights daily to Los Angeles and to San Francisco.
AUTHORITY: Port San Luis Harbor District.

PORT SULPHUR, Louisiana: 29.28 N. 89.41 W.

(See Plan Book)

DOCUMENTS, etc.: Refer to "New Orleans".
PILOTAGE: A vessel coming into port from sea can arrange to pick up a Bar Pilot (Associated Branch Pilots) by furnishing ETA to the ship's Agents, radio contact by VHF Channel 9 and AM Channels 2738 and 2182. Bar Pilot is exchanged for river Pilot at head of Passes, Pilot town, Louisiana. River Pilot (Crescent River Port Pilot's Association) can be arranged through ship's Agent in New Orleans and radio contact as above. Vessel awaiting Pilot for departure may remain at dock until Pilot arrives. Advance notice of 3 hours is required for departing Pilots. This can be arranged by the ship's Master with the shipping foreman.
ANCHORAGES: Anchorage is available on East bank of river opposite to Freeport Sulphur Company dock. Depth of water at anchorage is 40 ft., the controlling depth in the river.
RESTRICTIONS: No restrictions for entry because of time of day, nor conditions of tide or draft except the controlling depth of Mississippi river to Port Sulphur (35–40 ft. as published in reports by U.S. Army Corps of Engineers).
MAX. SIZE: Max. permissible length – 560 ft., breadth not limited, draft equal to controlling depth of river.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tropical Radio WNU New Orleans.
TUGS: Tugs not normally required. Shore crews usually handle ship's lines. Tug may join the vessel opposite the dock. Charges for handling ship's lines.

STEVEDORES: Not normally required. When requested, stevedoring services can be obtained from port of New Orleans; contact ship's Agents for particulars.
MEDICAL: Advance notice for personnel requiring medical service is required through ship's Agents. Hospital facilities are available.
TANKERS: 1 tanker berth, permitted draft equal to or greater than controlling depth of Mississippi River. Diameter of loading/discharge lines is 12 in. and 16 in. respectively.
DENSITY: Density in port not affected by tide. Fresh water.
FRESH WATER: Fresh water is available, can be loaded with 1.5 in. fire line.
FUEL: Fuel may be loaded by barge with vessel at anchor. Fuel transfer is not permitted at dock.
FIRE PRECAUTIONS: No welding repair permitted at dockside. Fuel transfer is not permitted. No other specific precautions observed except for "no smoking" precautions, etc.
GANGWAY/DECK WATCHMEN: Services of watchmen desirable but not required. Port does not furnish this service.
CERTIFICATES: Certificate of condition of cargo handling gear required when use of gear is necessary.
IDENTIFICATION CARDS: Immigration form I-95.
CONSULS: Consuls offices are located in New Orleans, Louisiana.
REPAIRS: Engine and deck repairs are possible when the dock is not otherwise occupied.
AIRPORT: New Orleans International Airport, served by most major airlines. 55 miles from Port Sulphur.
TIME: Local time is Central Standard Time, except from May/October, Daylight Saving Time is in effect.
HOLIDAYS: Vessels are loaded on all holidays except Christmas Day.
POLICE/AMBULANCE/FIRE: Port Sulphur, Louisiana, 564–2525; 564–2525; 564–3231, respectively.
TELEPHONES: Jacks for telephones are provided at no additional cost to tankers loading at port.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Loading will not commence until all holds are clean of scale and other foreign matter.
AUTHORITY: Private port, Freeport Sulphur Company, Port Sulphur.

REDWOOD CITY, California: 37.50 N. 122.28 W.

(See Plan Book)

DOCUMENTS, PILOTAGE and all general information refer to "San Francisco".
RESTRICTIONS: Though a natural deep water channel extends down the bay to Redwood City there is controlled depth channel 500 ft. wide and 30 ft. deep across San Bruno Shoal. The entrance channel to the port is 2 miles long and 30 ft. deep (all depths are at MLLW) and 300 to 350 ft. wide. There are 2 large turning basins at either end of the port harbour channel.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BRIDGES: The San Mateo Hayward Highway Bridge with a vertical clearance of 138.5 ft. and horizontal of 500 ft. crosses the ship channel.
BERTHING: *Wharf No. 1*, 500 ft. of berth space, and *Wharf No. 2*, 355 ft. of berth space, are dredged to a depth of 32 ft. alongside. Wharf No. 1 has 32,000 sq. ft. There are pipe-line connections for petroleum products and bulk cement.

Wharf No. 3 is an open wharf, 450 ft. long, and is used primarily for handling lumber and gypsum rock. It also has petroleum pipelines.

Wharf No. 5 has 500 ft. of berthing space with a depth of 33 ft. alongside. It was designed to accommodate large oil tankers and freighters, and for handling heavy lifts.

Capabilities include complete facilities to handle LASH (Lighter Aboard Ship) system.
AUTHORITY: Port of Redwood City.
AGENT: See "San Francisco".

RICHMOND, California: 37.56 N. 122.25 W.

(See Plan Book)

(a) *STANDARD OIL COMPANY OF CALIFORNIA TERMINAL.*
(b) *OTHER TERMINALS AT RICHMOND.*

(a) STANDARD OIL COMPANY OF CALIFORNIA TERMINAL.
DOCUMENTS and all general information, refer to "San Francisco".
LOCATION: Richmond Long Wharf and Point Orient Wharf are situated on N.E. side of San Francisco Bay, a protected harbour. The refinery and storage tanks are near the wharves.

The exact position of the Long Wharf is Lat. 37° 55′ 20″ N. Long. 122° 24′ 35″ W. Wharf heading is 324° to 144°.

The exact position of the Point Orient Wharf is Lat. 37° 57′ 20″ N. Long. 122° 25′ 39″ W. Wharf heading is 356° to 176°.

There is adequate anchorage and room for manoeuvring in the bay.
MAX. SIZE: The main ship channel into San Francisco has a project depth of 50 ft. However, the 35 ft. depth of the Southampton Shoal channel restricts the size of ships to wharves.
LIGHTENING: When a lightening operation is necessary the terminal management will direct the ship to anchorage 9. The ship to be lightened will install fenders before the lighter ties alongside. The terminal will provide the fenders. The lightening supervisor and ship's officer will hold a meeting to discuss the cargo transfer. During transfer, follow the same precautions and safety regulations that apply to cargo transfer at the wharf. The transfer rate will be regulated by the lightening vessel. The lightening supervisor will observe all the lightening operations. The terminal wil provide oil spill recovery equipment during lightening.
HEALTH: See "Health: All Ports" before first U.S.A port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: San Francisco harbour advisory radar system, designated bridge-to-bridge frequency: VHF Channel 18a (156.9 mHz).

Federal communication regulations require that at any time VHF radio is in operation, Channel 16 must be monitored (156.8 mHz distress and calling frequency).

The 2-3 mc. radio telephone call letters for the San Francisco Bay area are KLH.

Richmond Long Wharf (radio call – Chevron Shipping) is equipped with VHF radio, manned 24 hours per day. Channel 10 (156.5 mHz) is the operating frequency. While at anchor, in San Francisco Bay, vessels should maintain normal listening watches on VHF Channel 10.

The Master of a vessel bound for San Francisco Bay is requested to advise Chevron Shipping (Cables address: Chevronship Richmond Sanfrancisco) of ETA, 7 days, 3 days and again 1 day (24 hours) before arrival at the wharf. First ETA message should include:

Estimated time of arrival at the wharf (local time).
Last port of call.
Estimated deep draft at arrival.
Quantity of ballast to be discharged.
Quantity and grade of cargo to be transferred.
Distance from bow to cargo and bunker manifolds.
Size and type of cargo and bunker connections.
Quantity and grade of bunkers and lubes required.
Quantity of fresh water required.
Number of crew replacements expected.
Amount of provisions and stores to be loaded.
Repair work anticipated.
Make 24-hour ETA as accurate as possible and whenever arrival time changes, by 1 hour or more, send a correcting message promptly.

BERTHING: At least 1 hour before docking contact Chevron Shipping, in Richmond, by VHF radio (Channel 10, 156.5 mHz) and request a berth assignment. They will try to berth as soon as you arrive. However, if no berth is available, anchor in the prescribed anchorage (as directed by the Captain of the port) and maintain radio contact with Chevron Shipping, Richmond.

There are 2 piers that accommodate oil transfers. They are referred to as Richmond Long Wharf and Point Orient Wharf.

Long Wharf: Richmond Long Wharf, a "T"-head pier, has an overall length of 2,464 ft. It consists of concrete and wooden piles and a concrete superstructure connected to the shore, 4,200 ft. away by a piled causeway. The fender-to-fender width is 114.5 ft.

There are 4 deep water berths on the West side, each approx. 600 ft. long. They are numbered 1 to 4 from South to North. Water depth is 38 ft. at MLLW. Carefully observe deep draft during periods of low water. There is an inner berth, No. 5 that may be used for bunkering small ships; water depth is 18 ft. at MLLW. The other inner berths, Nos. 6 to 12, are used primarily for barge loading.

Point Orient: The Point Orient Wharf, an "L"-head pier, is 2.25 miles North of the Long Wharf. It is 504 ft. long and 60 ft. wide. It is supported on wooden piles and has a causeway that extends 1,200 ft. to the shore.

There is one ship berth, No. 1 where the water depth is 36-40 ft. at MLLW. There is also one barge berth No.2.
LOADING AND UNLOADING: All berths are fitted with 4–, 6– and 8–in. hoses for cargo transfer. Berth No. 4 is fitted with 1×8–in. and 2×12–in. Chiksan loading arms. Berth 1, at the Long Wharf has a similar Chiksan system – 2×12–in. arms. All flange facings are ANSI 150–pound rating.

Several products can be loaded at each berth.
BALLAST: The terminal has facilities to receive some ballast (max. capacity 25,000 bbls. – normal capacity 15,000 bbls.). However, arrangements for this to be made through Agent before arriving at the wharf. All ballast to be discharged must be pumped to shore while berthed at wharves.
POLLUTION: The Federal Water Pollution Control Act prohibits the discharge of oil or oily waste in the waters of San Francisco Bay which causes a film or sheen on the water or discolours it or causes a sludge or emulsion beneath the surface of the water.

Regulations enforced by the Bay Area Pollution Control District also prohibit the emission of smoke and soot. Vessel can be fined if it emits visible smoke (Ringelmann 1) for more than 3 minutes in one hour, or blows its boiler tubes enough to create a soot nuisance on shore.

In addition, the terminal has certain regulations designed to eliminate obnoxious odours. Vessel may, therefore, be required to follow special procedures before tank cleaning, loading or ballasting. If, in spite of precautions, vessel does cause such odours, loading or unloading operations may be stopped.
MEDICAL: No facilities at wharves. Local ambulance may be reached at: Cadillac Ambulance Service (415) 234-3242; Alhambra

Air-ground Ambulance Service (air) (415) 228-1096; California Aviation Service Inc. (air) (415) 569-3855.

FUEL: Many grades of bunkers, diesel and lubricating oils are available in bulk or drum quantities. Agents order them from Traffic and Distribution or Chevron International at least 48 hours before vessel arrives, otherwise, vessel may be delayed.

To take on bunkers and diesel, vessels must be able to connect to terminal's 3-in., 4-in., or 6-in. 150-lb. ANSI flanges.

PROVISIONS: Provisions and stores will be loaded only at Richmond Long Wharf, and only when loading does not interfere with cargo or ballast transfer. If vessel is large and not equipped with booms, Agent need to supply a crane for the loading. Stores will not be handled by wharf personnel.

FRESH WATER: Potable water provided. Make arrangements through Agent.

REPAIRS: Terminal Management approval required for any repairs, hot work or maintenance work at the piers. No repairs will be allowed that delay cargo transfer or lengthen the time it takes.

SHORE LEAVE: Ship's personnel are not permitted ashore and shore personnel are not permitted aboard for any purpose whatsoever until pratique has been granted. Once it is granted, no one may walk to shore on the Long Wharf causeway.

AUTHORITY: Standard Oil Co. of California, Richmond, California.

(b) OTHER TERMINALS AT RICHMOND

BERTHING: *Parr-Richmond Bulk Commodity Wharf:*

Owners: Parr-Richmond Terminal Co.

Operated by: Parr-Richmond Terminal Co.

Use: Receipt and shipment of various dry-bulk commodities.

Water Depth: 35-36 ft.

Mechanical handling facilities: On wharf; 4×50-ton electric, travelling full portal gantry cranes, each with 100-ft. boom and 2×45-ton electric travelling full portal gantry cranes, each with 118-ft. boom, 36-in. belt conveyor for shiploading with 10,000-ton-capacity covered storage warehouse.

Santa Fe Sugar Dock:

Owned and operated by: Atchison, Topeka and Santa Fe Railway Co.

Use: Receipt of sacked sugar by inland waterway vessels for transfer to railroad cars.

Dimensions: Length of face 545 ft., lower end 51 ft.; depth alongside at MLLW 24 ft.

Levin Metals Corporation:

Owner: City of Richmond Port Commission.

Operated by: Levin Metals Corporation.

Use: Scrapping of ships, consideration of scrap and export loading of cargo.

Dimensions: Length of face 555 ft. each; Pier 1 depth 35-38 ft., Pier 2, 17 ft.

Richmond Container Terminal No. 3: (Under construction, ready June, 1979).

Owners: City of Richmond.

Operated by: Matson Terminals Inc.

Use: Receipt and shipment of containerized cargo in foreign and domestic trade.

Dimensions: Length of face 1,009 ft.; depth alongside at MLLW 40 ft.

Mechanical handling facilities: Two rail-mounted deck cranes, two transfer devices and two bridge cranes. Semi-automated operation.

Remarks: Face of wharf is in line with the face of adjacent wharf, providing 1,550 ft. of continuous berthing. Area of container terminal – 16 acres plus back-up area.

Richmond Terminal No. 4 Wharf:

Owners: City of Richmond.

Operated by: Richmond Terminal Agency, Pacific Molasses Co. Ltd., & Dorward & Sons Co.

Use: Bulk Liquids.

Dimensions: Length of face 1,047 ft.; South side 175 ft.; North side 100 ft.; depth alongside at MLLW 32-50 ft.

Canal Industrial Park and Willamette Iron & Steel Co.:

Owner: City of Richmond Port Commission.

Operated by: Canal Industrial Park (Pasha Truckway) & Willamette Iron & Steel Co.

Use: Import service and delivery of foreign automobiles; ship repairs.

Dimensions: Length of face 700 ft.; depth alongside at MLLW 35 ft.; usable berthing space with dolphin 900 ft.

Mechanical handling facilities: Mobile handling equipment available. Complete range of crane and ship facilities for major ship repair.

TANKERS: *Atlantic Richfield Tanker Dock;*

Owned and operated by: Atlantic Richfield Co.

Use: Receipt and occasional shipment of petroleum products; bunkering vessels.

Dimensions: Length of face approx. 250 ft.; lower and upper sides 40 ft. each.

Atlantic Richfield Barge Dock:

Owned and operated by: Atlantic Richfield Co.

Use: Receipt and shipment of petroleum products by barge; bunkering vessels.

Dimensions: Length of face 150 ft.; dept alongside at MLLW 34 ft.

Richmond Terminal No. 1 Wharf:

Owners: City of Richmond.

Operated by: Petromark Inc.

Use: Receipt and shipment of petroleum products, chemicals and petrochemicals.

Dimensions: Length of face 557 ft.; depth alongside at MLLW face 35 ft.

Richmond Terminal No. 2 Liquid Cargo Wharf:

Owners: City of Richmond.

Operated by: Canal Industrial Park.

Use: Receipt and shipment of vegetable oils, chemicals and petrochemicals.

Dimensions: Length of face 380 ft.; depth alongside at MLLW 35 ft.

Texaco Wharf:

Owners: Texaco Inc.

Operated by: Texaco Inc.

Use: Receipt and shipment of petroleum products.

Number of berths: 1.

Water depth: 35 ft.

Time Oil Company Wharf:

Owned and operated by: Time Oil Co.

Use: Receipt and shipment of petroleum products.

Number of berths: 1.

Water depth: 35 ft.

Special remarks: 3×10-in. pipe-lines extend to 25 steel storage tanks in rear; total capacity of 618,000 barrels.

Union Oil Co. Tanker Dock:

Owned and operated by: Union Oil Co. of California (also services GATX Terminal).

Use: Receipt and occasional shipment of petroleum products; bunkering vessels.

Dimensions: Length of face 225 ft.; lower end 45 ft.; upper end 45 ft.; depth alongside at MLLW 35 ft.

Mechanical handling facilities: Hose handling at wharf is by ship's gear and small tractor crane.

Union Oil Co. Barge Dock

Owned and operated by: Union Oil Company of California.

Use: Shipment and occasional receipt of petroleum products; bunkering vessels.

Dimensions: Length of face 150 ft. (approx.); lower end 45 ft.; depth alongside at MLLW 35 ft.

Mechanical handling facilities: Hose handling at wharf is by ship's gear and small tractor crane.

Remarks; Wharf and Tanker Docks are spaced about 230 ft. apart; together they provide 1 large tanker berth.

AGENT: See "San Francisco".

RICHMOND, Virginia: 37.32 N. 77.25 W.

(See Plan Book)

DOCUMENTS: See "Hampton Roads".

PILOTAGE: Entrance through Hampton Roads. Virginia Pilots Assn. original contact same as for Norfolk, Virginia. Pilots will arrange for change of Pilots to proceed up the James River.

ANCHORAGE: Hampton Roads anchorage, also river anchorage approximately 40 miles up river, shown as "Upper Brandon" on charts.

RESTRICTIONS: Navigation of river above Upper Brandon recommended in daylight hours, except vessels under 250 ft. length.

MAX. SIZE: Max. length recommended by Pilots 550 ft., draft 21 ft. 6 in. any tide, depth of channel 25 ft. MLW tide, change 3 ft. 5 in.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Fort Monroe Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: See "Hampton Roads".

TUGS: Not needed for berthing unless vessel is to be turned around on arrival. Tug available at Terminal on reasonable notice.

BERTHING: Vessels berth alongside wharf 1,250 ft. long. Depth 25 ft. at MLW.

BRIDGES: 2 bridges across river between Hampton Roads and Richmond. No specific time or notice required.

STEVEDORES: Arrangements to be made through Agents. 48 hours notice requested.

MEDICAL: Vessels cleared by U.S. Health officials at Hampton Roads before proceeding up river.

DENSITY: Water considered as 100% fresh.

FRESH WATER: Available at pier.

FUEL: Bunkers available only at Hampton Roads.

GANGWAY/DECK WATCHMEN: None required, unless crew detained by U.S. Immigration.

OPENING/CLOSING HATCHES: On bulk cargo usually opened and closed by ship's crew, also steel hatches handled by ship's crew, sometimes determined by terms of Charter.

CERTIFICATES:

Ship's register.
Load-line Certificate.
Safety Certificate.
Tonnage tax receipts.
Certificate of nationality.
Passenger Certificate.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes (1 carton for 2/3 days) if further allowance is needed Customs Officer will return on request of Master. Wine and Spirit, 1 bottle per officer, Customs Officer will return on request of Master.
IDENTIFICATION CARDS: Immigration landing permit required.
CONSULS: No consuls in Richmond, handled through Hampton Roads if needed.
REPAIRS: Only minor repairs, no shipyards.
REPATRIATION: Handled through Norfolk, Virginia.
AIRPORT: Approximately 10 miles from port, regular airline service.
TIME: Eastern time GMT minus 5 hours. Daylight saving time from first Sunday in May to last Sunday in October.
HOLIDAYS: January 1st, May 30th, July 4th, Labour Day (1st Monday in September), Thanksgiving Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Police 780-9461; Ambulance 780-9404; Fire 780-9191.
TELEPHONES: No arrangements for placing aboard vessels.
SHORE LEAVE: Allowed. Proper papers should be available.
AUTHORITY: Port of Richmond Advisory Commission.

RIVERHEAD, Long Is., New York. Petroleum storage terminal operated by Northville Industries Corp. 41.00 N. 72.39 W. (See Plan Book)

DOCUMENTS: See "New York".
LOCATION: The fixed Offshore Tanker Berth is situated 1.2 miles offshore from the North shore of Long Island in Long Island Sound, 4 miles 257° true from the beacon on Mattituck Inlet breakwater and 12.7 miles 178.5° true from Falkner Island Lighthouse. The geographic position of the centre point of the Operating Platform is in Latitude 41° 00′ 01″ North and Longitude 72° 38′ 50″ West. Jacobs Point Lighted Bell Buoy No. "1" is in 65 ft. of water 600 yds. 275° true from the platform. The platform has 4 navigation lights situated on each corner of the structure flashing every second. A similar navigation light is also situated on each of the East and West mooring dolphins.
PILOTAGE: Pilot is arranged for by ship's Agent. Vessels with a draft of 40 ft. or less will pick up Pilot 2 miles South of Point Judith Buoy No. "2" (location of buoy: Latitude 41° 19.3′ North, Longitude 71° 28.5′ West). Vessels with 40 ft. to 60 ft. draft will pick up Pilot N.E. of Block Island at Latitude 41° 15′ North, Longitude 71° 24′ West just South of Buoy "A". Distance to platform is approximately 65 miles. The Pilot will also perform the duties of Docking Master while vessel is at the Offshore Platform. It is required that the Pilot remain on board on standby while the vessel is moored at the Offshore Platform. Vessels with 50 ft. or deeper draft require a Pilot's assistant to assist regular Pilot in navigating the vessel into Long Island Sound and to the Offshore Platform.
ANCHORAGE: Vessels awaiting berth shall anchor 1 to 1.5 miles North of the platform facility. Holding ground is good and 90 fathoms (6 shackles) in the water is considered safe.

Platform crew under the supervision of the Marine Supervisor will board about 1 hour prior to scheduled mooring time. Generally launch does not arrive before this time, except for emergencies.
RESTRICTIONS: Generally, vessels are moored on any stage of the tide and at night when weather conditions permit.
MAX. SIZE: Length in North berth 1,150 ft. LOA and draft not to exceed 60 ft. Length in South berth 700 ft. LOA and draft not to exceed 42 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Tugs are arranged for by ship's Agent. Tug boats generally come from New Haven. When ordering tugs, sufficient time must be allowed for tug to cross Long Island Sound at distance of approximately 18 miles. All vessels require a minimum of 2 tugs. Vessels over 80,000 d.w.t. shall have 3 tugs equalling a total of 6,000 h.p.
COMMUNICATION: Telephone at Riverhead Park 7-5600 (Code for station to station: dial 516 Park 7-5600). Cable Address Northville Riverhead New York. Radio I.T.T. Amagansett.
VHF: Communication with shore and launch via portable VHF radiophone. This equipment on continuously during vessel's stay. The Platform crew maintains radio watch and constant communication with shore for general purposes and emergencies.
BALLAST: No ballast disposal facilities. Long Island Sound is inland water and United States Anti-Pollution Regulations rigidly enforced. No bilge water, oil-contaminated water, garbage or any waste matter which may pollute sea water is to be discharged overboard while vessel within Long Island Sound and approaches.
STORES/FRESH WATER/FUEL: No fresh water facilities. Small quantities provisions may be purchased at local stores in Riverhead, 4 miles inland. All services contingent upon Marine Supervisor's approval and on weather conditions.
QUARANTINE, CUSTOMS AND IMMIGRATION: New York City is port of entry for Northville. Entry and clearance must be arranged by ship's Agent. Boarding officers board in the anchorage or upon arrival. Pertinent Government officials should be advised in sufficient time, usually not less than 24 hours, Monday through Friday and 48 hours on Saturday and Sunday. Generally, entry and clearance can be arranged by Agent who should advise Customs well in advance of vessel's arrival, thus saving necessity of having Master go to Customs House in New York.
MEDICAL: Hospital in Riverhead. Medical attention must be arranged by ship's Agent. U.S. Public Health Service not available locally.
BERTHING: North Berth (1): Vessels berthed during flood tide will moor starboard side to and during the ebb tide current will moor port side to. Forward and stern spring lines are secured to the breasting dolphins and bow and stern lines are made fast to mooring dolphins located to the East and to the West of the platform structure.

South Berth (2): Vessels berthed during flood tide current will moor port side to and during the ebb tide current will moor starboard side to. Forward and stern spring lines are secured to the breasting dolphins in the South berth. Bow and stern lines are made fast to the North berth breasting dolphins, and if necessary, also to the mooring dolphins located to the East and West of the platform structure.

Four mooring buoys are situated South of the mooring facility and formally used for mooring vessels in the North berth. Mooring buoys will be used at the discretion of the Docking Master (Pilot) and/or Northville's Marine Supervisor.

Masters will note that platform is situated in an open roadstead and that all mooring equipment must be in proper working order and in good condition. If, in the opinion of the Pilot (Docking Master) or Northville's Marine Supervisor, the vessel's mooring equipment is inadequate, the vessel will not be permitted to remain in the berth.

Vessels must be equipped with manilla or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms length.

Vessels having wire moorings secured on warping winches with brake are acceptable. Warping winches must be adequate to handle mooring lines under heavy strain. Efficient stopper lines must be readily available to "stop off" mooring lines for transfer from winch to bitts without loss of tension.

The Docking Master (Pilot) will assist the Master in the berthing of the vessel and supervise the mooring and unmooring operations.
OIL TRANSFER CONNECTIONS: The Marine Supervisor and/or his crew will supervise the connecting and disconnecting of the hydraulically operated steel loading arms.

In the North berth there are 2×16 in. and 2×12 in. steel loading arms, and in the South berth there are 2×12 in. steel loading arms, all with appropriate reducers. The 12 in. L/U arms will connect to 8 in., 10 in., and 12 in. 150 lb. ASA flanges. When connecting 2×12 in. L/U arms the centre line of the ship's flanges must be a minimum of 6 ft. (72 in.) apart.

The 16 in. L/U arms will connect to 10 in., 12 in., 14 in., and 16 in. 150 lb. ASA flanges. When connecting 2×16 in. L/U arms the centre line of the ship's flanges must be a minimum of 15 ft. (180 in.) apart.

The L/U arms cannot be connected directly to valve flanges. Flanged spools or reducers must be provided. Provisions must be made available for quick draining of the L/U arms.
LOADING AND DISCHARGE OF CARGO: Oil transfer operations are entirely in accord with the Rules and Regulations of the United States Coast Guard. Declaration of Inspection by the Dock Person in Charge and the Vessel Person in Charge must be completed prior to commencement of any oil transfer operations.
WEATHER AND TIDE: Strong winds from North and N.W. experienced during Winter and Spring. Tide during maximum ebb and flood often reaches 3.5 to 4 knots velocity.
DENSITY: Flood tide density 1025. Ebb tide density 1020.
CUSTOMS ALLOWANCE: Tobacco, wine and/or spirit allowance: Same as permitted in New York Harbour.
IDENTIFICATION CARDS: Issued by Immigration Officer.
CONSULS: All Consuls Offices located in New York City.
REPAIRS: No repair facilities are available. *Vessel must remain* in sailing readiness at all times while moored at the platform facilities.
DRY DOCKS: At New York Harbour.
REPATRIATION: Agent arranges all crew repatriation via New York.
AIRPORT: New York Airports 80 miles distant.
TIME: Standard time GMT minus 5 hours. Daylight Saving Time first Sunday of May to last Sunday of October, GMT minus 4 hours.
POLICE/AMBULANCE/FIRE: Terminal attends Police/Ambulance and Fire services.
SHORE LEAVE: Shore leave permissible.
LAUNCH SERVICE: The terminal does not provide launch service for crew shore leave. There is a local contractor who has launch service available and arrangements must be made by the vessel's local Agent.
AUTHORITY: Northville Industries Corp.

ROCHESTER, New York: 43.17 N. 77.36 W. (See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Not necessary.
ANCHORAGE: No anchorage available within harbour limits.
MAX. SIZE: Channel depth 23 ft. (LW). All depths in channel or alongside wharves should be checked carefully against the latest recorded elevated or lake level. This may vary from month to month. Entrance width 300 ft., turning basin depth 23 ft., 600 ft. in width.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available. Arrange via ship's Agent.

BERTHING: Entrance piers are parallel to each other, and about 450 ft. apart. The West Pier is 3,036 ft. long and the East Pier 2,699 ft. long. Fog horn and beacon on West Pier, East pierhead lighted. Radio beacon. Port Authority Terminal located on West bank of Genesee River at end of Lake Pier. Has a quay wall of about 1,400 ft. in length. Depth of water alongside 23 ft. (LWD). Charlotte Docks located about 2 miles upstream from mouth of river on West bank.
CRANES: No floating cranes available. Stationary cranes available on order.
BRIDGES: New York Central Railroad swing bridge near mouth of the river and upstream from Port Authority Terminal. Traffic lift bridge about 0.25 mile upstream from railroad bridge.
STEVEDORES: Available by request. Charges to suit individual commodities.
DENSITY: Fresh water.
FRESH WATER: Available at both docks.
FUEL: Oil may be furnished direct from trucks at Port Authority Terminal.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: Minor only.
REPATRIATION: Can be arranged.
AIRPORT: Approximately 10 miles from port.
POLICE/AMBULANCE/FIRE: Police, 232-3311; Ambulance/Fire, 232-2121.
SHORE LEAVE: Allowed.
AUTHORITY: Rochester-Monroe County Port Authority.

SACRAMENTO, California: 38.32 N. 121.30 W.

(See Plan Book)

DOCUMENTS: See "San Francisco."
PILOTAGE: Pilots board vessel in San Francisco Bay.
RESTRICTIONS: *Ship Channel:* Distance, Fort Point to Sacramento, 79 nautical miles (146 km.). Bottom width in river reach 300 ft. (91.4 m.). Bottom width in channel reach 200 ft. (61.0 m.). Min. depth at MLLW tide 30 ft. (9.1 m.).

Harbour: Area 60 acres (24.3 hectare). Min. depth at MLLW tide 30 ft. (9.1 m.). Tidal variation average 5 ft. (1.5 m.).
MAX. SIZE: 750 ft. LOA and 103 ft. beam, 30 ft. deep at MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: KBA 386, 156.9 megacycles (24 hours).
TUGS: Join vessel at Light 76 (turning basin).
BERTHING: Anchor – ships will have at least 1 anchor ready to let go in case of emergency, when docking or undocking. Anchor will be raised immediately upon ship being made fast to wharf.

Insurance lines are required on off-shore side, fore and aft, immediately after ship is made fast to wharf.

A cargo net shall be securely placed under gangways. Save-all nets shall be rigged abreast of holds at which general cargo is being handled.

Rat guards, at least 3 ft. in diameter, shall be placed on all mooring lines immediately after docking, and shall be maintained in place until ship's departure.

Pier 1:
Owned and operated by: Port of Sacramento.
Use: Bulk-loading rice facility.
Construction: Concrete with timber fender piles, length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m.).
Storage capacity: 22,000 tons; 8 silos at 2,200 tons each; 6 silos at 470 tons each; silos at 270 tons each.
Mechanical handling facilities: 3 loading spouts dockside, conveyor system to storage facility.
Loading rate: 600 t.p.h.

Wharf 2:
Owned and operated by: Port of Sacramento.
Use: General cargo.
Construction: Concrete with timber fender piles; apron width 60 ft. (18.3 m.); length 600 ft. (182.9 m.).
Water depth: 30 ft. (9.1 m.).
Transit sheds: One, 86,400 sq. ft., one, Air Support Building, 40,000 sq. ft.

Pier 5:
Owned by: Port of Sacramento.
Operated by: Cargill of California, Inc., as a public utility.
Use: Bulk-grain facility.
Construction: Concrete and steel silos; concrete with timber fender piles; length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m.).
Storage capacity; 1,250,000 bushels (30,000 tons); 17 concrete silos; total capacity 500,000 bushels; 6 steel silos; total capacity 750,000 bushels.
Mechanical handling facilities: Conveyor system to storage facility.

Wharf 6:
Owned and operated by: Port of Sacramento.
Use: General cargo and containers.
Construction: Concrete with timber fender piles; length 600 ft. (182.9 m.)., apron 60 ft. (18.3 m.).
Water depth: 30 ft. (9.1 m.).
Mechanical handling facilities: 2 gantry cranes, 45 tons each.
Remarks: 6 acres of open wharf; 70,000 sq. ft. off dock warehouse.

Wharves 7-8:
Owned and operated by : Port of Sacramento.
Use: Bulk-material facility and general cargo.
Construction: Concrete with timber fender piles; apron 60 ft. (18.3 m.), length 600 ft. (182.9 m.).
Water depth: 30 ft. (9.1 m.).
Storage capacity: Covered 75,000 tons, open 850,000 tons.
Mechanical handling facilities: Conveyor-belt system from truck to storage, from ship to storage; from storage to ship, or from storage to truck; 2 gantry cranes.
Loading rate: 600 t.p.h.
Transit shed: 86,400 sq. ft. Bagging facilities for bulk cargoes.
STEVEDORES: Same as San Francisco.
MEDICAL: All normal medical facilities available.
DENSITY: Full fresh.
FRESH WATER: Available at all berths.
FUEL: All grades available with 24 hours notice. Delivered by barge.
GANGWAY/DECK WATCHMEN: Each ship shall have a security detail in readiness on board at all times it is in port. The security detail shall perform tasks of an emergency nature and shall have information concerning cargoes aboard in case of need for fire fighting purposes.
OPENING/CLOSING HATCHES: Opening/closing hatches is stevedore work while docked in port.
IDENTIFICATION CARDS: A pass signed by the Master or his designated officer will be required for crew members, passengers and their personal property to leave the port's fenced area. Property may be subject to physical inspection before leaving the fenced area.
CONSULS: Nearest at San Francisco.
REPAIRS: Limited repair facilities available.
REPATRIATION: Can be arranged through local Agent.
AIRPORT: 16 miles from port and served by regular airlines.
TIME: GMT minus 8 hours.
HOLIDAYS: Only days not worked are 4th and 5th July, Christmas Eve and Day, New Year's Eve and Day.
POLICE/AMBULANCE/FIRE: Tel. 371-8000. Extensions 252 and 228.
TELEPHONES: Telephones are available.
SHORE LEAVE: Crew members allowed ashore subject to Immigration clearance.
GENERAL REGULATIONS: Ships will not blow boiler tubes while in port. Bilge water or oil will not be discharged into harbour. Accidents will be reported immediately to the Terminal Superintendent. Splash boards will be placed over disposal vent-pipe openings on inboard side of vessel.

Garbage – United States and California State laws make it unlawful to dispose of ship's garbage except in approved ways. Port makes approved garbage disposal available – contact the Terminal Superintendent. Garbage retained on board must be kept in tightly closed containers.

Smoking – Smoking prohibited in and around cargo compartments, and on open decks except that it may be permitted in marked areas under sheltered portion of weather decks on offshore side. Smoking prohibited on wharfs and piers except in marked areas. Smoking prohibited on or near ship while it is bunkering.

Welding/Burning – Welding or burning will not be done until written approval is obtained from the Terminal Superintendent and the Fire Marshal. All requirements of both the Superintendent and Marshal will be strictly adhered to.

Fire Signal – Upon detection of a fire, regardless of location or size, the alarm of fire will be sounded. The alarm shall be sounded by telephone and/or whistle or siren blasts. 5 each, 5 second blasts repeated as necessary.
AUTHORITY: Sacramento-Yolo Port District.

AGENT: See "San Francisco".

SAN DIEGO, California: 32.41 N. 117.07 W.

(See Plan Book)

PORT LIMITS: The seaward boundaries of the port of San Diego at which a vessel is considered to be an "arrived vessel" is that time when the vessel is boarded by a Port Pilot at Seabuoy No. 1 and (subject to charter party terms) lay time commences when notification of readiness is tendered at berth.
DOCUMENTS:
Crew Lists.
Passenger Lists.
Customs Documents.
Manifests.
Stores Lists.
Crew Curio Declaration List.

If the vessel arrives from foreign direct, 3 copies each of the above documents are required.

If the vessel movements are between U.S. ports, 2 copies each of the above documents are required.

Health Documents. Arrival from foreign direct, 1 copy only. All crew members should be in possession of valid vaccination certificates.

Manifests. Arrival from foreign direct, 1 copy of travellers manifest which remains with vessel, and 3 copies each of U.S. Customs inward foreign manifest. Bills of lading, ship's papers carried aboard vessel varies with steamship companies.

PILOTAGE: The San Diego Pilots do not maintain Pilots on station. Service is rendered according to ETA received from vessel. If any vessel's arrival or departure is delayed over 1 hour, an additional charge will be made. Telegraphic address of pilot station – radio ETA to "Pilots", San Diego. Advance notice of ETA required – 24 hours prior to arrival of vessel. Pilot boat is 54 ft. in length, painted white. The exact area where Pilot boards the vessel is No. 1 sea buoy.

ANCHORAGE: 3 miles S.E. of Point Loma Light.

MAX. SIZE: Length, breadth – no restrictions. Max. draft alongside face of terminal, 36 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Diego Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: All radio messages go through the Los Angeles station for relay.

TUGS: Tugs normally join vessel approximately 1 mile before berth. 5 available with h.p. ranging from 200–1,700. There is no charge for the use of tug's lines.

CONTAINER FACILITY: A new generation, high-speed, all-electric container crane capable of handling 20 ft. and 40 ft. units, or single hook lifts of 40 long tons at National City Marine Terminal. This 17.4 acre facility will include 32,500 sq. ft. for a container freight station, a container steam-cleaning facility, office, maintenance shop, truck scales, railroad spur, and paved storage for 2,280 containers including electrical outlets for 45 refrigerated containers. Depth 35 ft.

SPECIALISED CARGO HANDLING FACILITIES: High-speed bulk-loading facilities exist with 800 ft. of 37 ft. deep water berthing space and bulk storage for 13,600 metric tons, plus a bulk loader boom that travels 500 ft. laterally and can be extended or raised enough to load nearly any size or type of ship.

High-speed bagging of bulk commodities is available for bagging of bulk materials from powder to pellets at the rate of 1,000 tons per 8-hour shift.

STEVEDORES: Advance notice of 24 hours desired in order to arrange gangs.

MEDICAL: Agents should receive notification of medical attention required 24 hours prior to ETA of vessel. Complete hospital facilities available.

TANKERS: Diameter of load/discharge line 6 to 8 in. Slop (residue) discharge facilities available upon request. 2 tanker berths – max. draft 30 ft. There are also 2 new Tanker Berths at National City Marine Terminal with 12 in. discharge lines.

DENSITY: Salt water in bay.

FRESH WATER: Fresh water available, delivery via pipeline.

FUEL: Diesel and bunker fuel available.

GANGWAY/DECK WATCHMEN: Available if considered necessary.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CERTIFICATES: Registered Load-line Certificate, Certificate of Inspection, Safety Certificate.

CUSTOMS ALLOWANCE: Tobacco: Per each crew member U.S. Customs allowed 2 cartons of cigarettes and 1 box of cigars. Wine and/or Spirits: Quantity allowed per each crew member – 1 quart.

CARGO GEAR: Up-to-date certification of all cargo gear required in order to comply with Pacific Coast Marine Safety Code.

IDENTIFICATION CARDS: U.S. Immigration requires completion of Form 95, U.S. Coast Guard requires landing permits.

CONSULS:

Chile
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
Finland
France
Honduras
Italy
Mexico
Netherlands
Norway
Panama
Peru
Sweden
West Germany

REPAIRS: All types of deck and engine repairs are available.

DRY DOCKS: Largest dry dock 700 ft. length, 104 ft. width. Capability can accommodate C–2 mariner type or San Diego type hulls (600 ft. length, 85 ft. width) and up to and including 28,000 displacement tons. 4 additional floating dry docks with capabilities up to and including 3,500 displacement tons.

AIRPORT: Distance from marine terminal approximately 5 miles. Airport is serviced by major airlines.

TIME: Local time GMT minus 8 hours. Daylight Saving Time becomes effective the last Sunday in April and continues to the last Sunday in October.

HOLIDAYS: Recognised holidays are: New Year's Day; Lincoln's Birthday; Washington's Birthday; Memorial Day, Independence Day, Labour Day, Columbus Day, Veteran's Day, Thanksgiving Day, Statewide Election Day, Christmas Day, or any other legal holiday that may be proclaimed by State or National Authority; when a holiday falls on a Sunday, the following Monday shall be observed as a holiday.

POLICE/AMBULANCE/FIRE: Police 238–7373; Emergency Ambulance 238–7373; Fire 238–1212.

TELEPHONES: Arrangements exist for placing telephones on board. No charge for hooking up.

SERVICES: Tank-cleaning equipment. Facilities for tank washings Compass and radar adjustments, etc.

SHORE LEAVE: Permitted.

DEVELOPMENTS: Broadway Pier has been reconstructed for use as a passenger vessel facility, public park, for berthing of public visit Naval vessels, and for berthing and clearance of fishing vessels. U.S. Customs has an office at the end of the pier.

AUTHORITY: Port of San Diego.

AGENT: See "Los Angeles".

SAN FRANCISCO, California: 37.48 N. 122.25 W. (See Plan Book)

DOCUMENTS:

General Declaration (arrival) on Customs Form 1301.

Cargo Manifest (Customs Form 7257 A or 7527 B). One original copy indicating all the cargo on board, used for making formal entry. One copy listing all cargo on board, to be used by the Customs Inspector. One copy indicating cargo for this port only.

2 copies of Crew's Effects Declaration on Customs Form 1304.
2 copies of Ship's Stores Declaration on Customs Form 1303.
2 copies Passenger List (Form I 418).
2 copies Crew List (Form I 418).
1 Copy "Oil Pollution Certificate", issued in Washington D.C.

Customs boarding officer will also examine ship's register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from abroad, or 24 hours of arrival from a U.S. port:

(a) Health Pratique.
(b) Master's Oath (Customs Form 1300).
(c) U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).
(d) Certified Crew List (U.S. vessels only).

PILOTAGE: Pilotage in and around Golden Gate Region is provided by 3 groups of experienced, licensed ship Pilots. California Inland Pilot Association, Redstack Tugs and Independent Pilots.

The San Francisco Bar Pilots' Association, maintains a sea station 12 miles outside the Golden Gate, in the vicinity of the large navigation buoy for vessels arriving and leaving the area.

On station around-the-clock. Pilot boats are equipped with VHF radio-telephone, and maintain continuous watch for ship traffic and operate co-operatively with the Marine Exchange communication centre and lookout station. The Bar Pilots also carry portable VHF radios.

Some 8,500 ships are piloted annually into and out of the port complex, through the Golden Gate and the 2,000-ft. wide, 55-ft. deep main ship channel across the alluvial sand bar about 9 miles outside the Gate.

Considerable Summer fog is experienced on the pilot grounds. In Winter months radiation or tule fogs frequently occur. The tidal prism of hundreds of square miles of inland waters cause unusually swift and changing currents in the area. Pilotage for San Francisco Bar and entrance is compulsory and available 24 hours a day. The Pilot boat is at a station 3 miles outside Main ship Bar channel about 14 miles from San Francisco, VHF Channels 18A and 10 for radio contact. Vessels with a draft of 42 ft. or more are requested to arrive at the Pilot station for the inward passage about one hour before high water at the Golden Gate Bridge.

ANCHORAGE: Several anchorages available in San Francisco Bay for any type of vessel up to 50 ft. draft.

The well-protected bay affords excellent shelter and anchorage in all weather. The Captain of the Port (Coast Guard) will assign an anchorage to a vessel upon request. In San Francisco and San Pablo Bays, there are a large number of anchorages available for naval, quarantine, general and explosives.

The specific anchorages available include:

1. *General Anchorage*

(a) No. 5 – found just South of the Richmond-San Rafael Bridge, has no limitations.

(b) No. 9 – found in the South Bay, also has no limitations.

2. *Temporary Anchorage*

(a) No. 7 – found off Treasure Island, has a 12 hour limit. A ship cannot lighter nor bunker at this mooring.

No. 8 – same as No. 7 but has a 6 hour limit.

3. *Explosive Anchorage*

No. 12 – is normally not activated.

No. 13 – found off Larkspur, this mooring is activated only as the need arises.

No. 14 – found in the South Bay, this mooring is always activated.

4. *Naval Anchorage*

No. 10 and No. 21 are the most frequently utilised.

RESTRICTIONS: The San Francisco Bay region is the first on the West Coast to have sea lanes established by the Coast Guard for greater safety in its ocean approaches. Use of the lanes is not mandatory, but is strongly recommended to reduce chance of ship collisions in congested approach and departure areas. The lanes are not intended to supersede or alter applicable rules of the road.

The lanes begin within 6 miles of the San Francisco Lightship, with each lane inbound and outbound separated by a buffer zone. The headings are: North lane outbound, 305°: North lane inbound

120°, main line outbound, 247°; main line inbound, 058.5°; Southern lane outbound, 169°; Southern lane inbound 343°.

The size of the bay and the narrowness of the Golden Gate cause tricky and sometimes difficult tidal and current conditions. The flood current sets into all parts of the bay and causes swirls as far East as Alcatraz and Angel Islands. At the San Francisco-Oakland Bay Bridge there are large current eddies near the foundation piers which may require care to maintain proper course.

The bar channel is dredged to 55 ft. MLLW by the U.S. Army Corps of Engineers. Entrance channels to the various ports are dredged to 35 ft., with the exceptions of Sacramento, Stockton and Redwood City, which are 30 ft. Stockton, however, is approved for a 5-ft. deepening, and study of similar deepening for Redwood City is being completed.

MAX. SIZE: The max. permissible draft for tankers at the oil installation is 35 ft., for regular freighters and passenger ships at the San Francisco piers is 30 ft. No restrictions on length or berth. The best time to dock with max. draft is at a rising tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station via RCA – Radio Corporation of America – Station KPH ITT – World Communications – Station KFS.

Safe and efficient navigation for all bay vessel traffic is maintained through a Ship Location and Reporting Service operated by the Marine Exchange. U.S. Coast Guard Vessel Traffic Service on Yerba Buena Island and at Port Bonita maintains 24 hour radar surveillance of all traffic from Golden Gate on the West (with 32 mile capacity beyond) to Oakland on the East, Dumbarton Bridge on the South and Port San Pablo on the North. Vessel Movement Reporting System (VMRS) extends beyond Port San Pablo all the way to the Ports of Stockton and Sacramento. Coast Guard urgently requests that all vessels as specified below, moving anywhere within the VMRS (including all area under radar surveillance), tune to Channel 13 (156.65 mHz., VHF FM): All ships of 300 gross tons and over, passenger ferries for hire over 100 gross tons, and tugs with tows of barges or dredging rigs of over 26 ft. length.

TUGS: Tugs available and normally join the vessel when approaching their pier. Tug's lines are always used, with no extra charge.

BERTHING: No restriction on berthing other than draft limitation and preferable at slack water.

Alameda: (See Plan Book). (Not part of the Port of San Francisco). Alameda, an island and city across the Inner Harbour channel from Oakland, is the home of Encinal Terminals, the largest privately owned and operated steamship terminal in the United States. There are 6 berths for vessels at Encinal.

Berths 1, 2, 3 and 4: Used for general cargo and bulk or drummed liquids. Total berthing length 2,125 ft. Depth 31 ft.

Berth 5: Used for general and containerised cargoes. Length 750 ft. Depth 35 ft. Berth equipped with Paceco container crane.

Berth 6: Used for receipt and shipment of bulk or drummed liquids. Depth 30 ft. Facility has tank storage of 12 million gallons.

Agent: See "San Francisco".

BULK HANDLING FACILITIES: *Copra Terminal, Pier 84:* Pier assigned to Cargill Company for receiving bulk copra. Berthing for 1 vessel. Length of face 185 ft. and 430 ft. North side 120 ft. Depth alongside face 32 ft. Facilities include 4 portable pneumatic unloaders, total capacity 180 t.p.h.

Port of San Francisco Grain Terminal, Pier 90: Berthing for 2 vessels. Length 1,285 ft. Depth alongside 40 ft. The terminal is used for receiving, storing and loading of grain, feeds, chemicals, fertilisers and storing automobiles. Facilities consist of a 2 million bushel grain elevator. Rail holding yard for 100 cars. 6 marine loading spouts with capacity of up to 1,500 tons of bulk material per hour (no shifting required).

CONTAINER HANDLING FACILITIES: *Mission Rock Terminal, Pier 50:* Berthing for 4 vessels. Pier used for container traffic, general cargo and passengers. Length of face 1,000 ft. North side 1,480 ft. and South side 1,100 ft. and 582 ft. Depth alongside terminal 35 ft. Facilities include a 250-ton container crane rated at 25 containers per hour. Container wharf length 1,000 ft. and width 200 ft. Storage for 900 (20 ft.) containers on pier.

Pier 80: Berthing for 7 vessels. Length of face 1,296 ft. North side 1,138 ft. South side 2,657 ft. Depth alongside 40 ft. Pier equipped with two, rail-mounted container cranes (each having a 30-ton capacity); 270 refrigeration outlets; container freight station and flexibilities to handle Ro-Ro, container and breakbulk cargoes.

Pier 94: New one-berth (716 ft. apron) container facility with 40 ft. alongside depth, 2×30-long-ton container cranes, and 16.5 acre container yard, with at least 50 acres available for expansion. Apron and crane rails are extensions of Pier 96 immediately to the South.

Pier 96: Berthing for 2 vessels. Depth alongside 40 ft. The facility is used by container ships and LASH vessels. It also has flexibilities to handle Ro-Ro and general cargo ships. Lifting equipment consists of 2, rail-mounted, Paceco container cranes, forklifts, straddle carriers and mobile cranes. Other features include 230 refrigeration outlets; a LASH lighter freight station; lighter basin; elevated control tower with radio and P.A. communications system; computerised container inventory control and a container freight station.

STEVEDORES: Stevedores orders must be placed 1000 hrs. for night gangs and day gangs. 2×8-hour shifts 7 days a week. Sunday and Sunday night gangs must also be ordered on Saturday 1000 hrs.

MEDICAL: Medical, and all hospital facilities available. No advance notice required.

TANKERS: All major oil companies have their own oil discharging piers which are outside the jurisdiction of the Port Authority. Reducing pieces are available. The max. drafts are 35 ft. Tankers arriving with a greater draft are partly discharged in the bay before docking.

Davis Point: Union Oil Co. Oleum Refinery Wharf, depth up to 38 ft. MLW.

Martinez: Shell Oil Co. Wharf, depth alongside 30 to 42 ft. MLW. Phillips Petroleum Co. Amorco Wharf, 2 berths, depth 30-42 ft. MLW. Phillips Petroleum Co. Avon Wharf, depth alongside 35 ft. MLW. Urich Oil Co. depth alongside 35 ft.

Ozol: Oil Wharf, depth alongside 39 ft. MLW.

Hercules; Sequoia Ref. Corp. Terminals, depth 35 ft. MLW.

DENSITY: Average density in the bay is 1016.

FRESH WATER: Available at all piers rate between 25 and 50 t.p.h.

FUEL: Fuel available by barge or at the oil companies own pier. Special blends require some advance notice.

FIRE PRECAUTIONS: Any special instructions are given to the Master upon docking.

GANGWAY/DECK WATCHMEN: Not required but this service available at Master's request.

OPENING/CLOSING HATCHES: Normally done by stevedores. But crew may open and close before arrival at the dock or after departure.

CUSTOMS ALLOWANCE: Each crew member may land free of duty and/or taxes articles acquired abroad not exceeding $10 in value, plus 50 cigars or 300 cigarettes or 3 lb. of smoking tobacco, and not over 1 quart of alcoholic beverages.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.-95, issued for the same vessel.

CONSULS: All Maritime countries represented at San Francisco.

REPAIRS: The major yards in the Golden Gate region have fully equipped machine-shop facilities capable of handling virtually any job; welding, heavy plate construction, turning, boring, facing, grinding, milling and rolling.

The larger yards also have facilities for pipe, sheet metal, electrical, carpentry, painting, rigging, machining and boiler work.

Pacific Ship Repair and Triple "A" Repair are both located in San Francisco and provide berth space for all types of ship repairs at plant and at any location in the San Francisco Bay area.

DRY DOCKS: Bethlehem Steel's San Francisco shipyard has 3 floating dry docks, 1 with 22,000 tons capacity and 654 ft. long, 1 of 11,400 tons capacity and 542 ft. long, and 1 of 6,500 tons capacity and 450 ft. long. With a recently completed pier, its tie-up and outfitting space totals 4,271 ft.

Todd Shipyards Corp. has 2 dry docks at Alameda. Their larger dry dock is 873 ft, long with a clear width between wing-walls of 140 ft. and a lifting capacity of 40,000 tons. The smaller dry dock has a lifting capacity of 10,000 tons and is 542 ft. long with a clear width between wing-walls of 86 ft. There are 3,500 ft. of berthing space for ships undergoing in-the-water repairs. Todd has 3 mobile units for out-of-yard work.

Williamette Iron and Steel Company's yard in Richmond has 5 concrete graving docks. 4 of these docks can each accommodate a vessel 600 ft. long with 83 ft. beam, and 1 dock can handle a vessel 750 ft. long by 83 ft.

Tonnage capacity is limited only by the above dimensions. Williamette's facilities include 1,500 ft. of concrete outfitting pier for in-the-water repairs. The graving docks are served by 4 gantry cranes of 60-ton capacity and 2 of 45-ton capacity, and the outfitting pier by 3×45-ton cranes. Williamette has fully equipped shops for repair and conversion work, and mobile units for out-of-yard work at all Bay Area piers.

Hunters Point Naval Shipyard: (Triple A Machine Shop) Under lease from the US Navy, graving docks and repair facilities available to all types of ships. Triple A operates 3 graving docks: (No. 4) 200 ft. beam×1,100 ft. length and 50 ft. depth; (No. 3) 150 ft.×1,000 ft. and 39 ft. depth; (No. 2) 100 ft.×800 ft. and 27 ft. depth, 17 repair berths can serve ships of any length. 12 gantry cranes of 50 ton capacity serve graving docks and repair berths. 50 ft. depth channel from Golden Gate to Hunters Point; unique to West side of San Francisco Bay.

DEVELOPMENTS: The channel over the bar has been deepened to 55 ft. A new channel will be cut 600 ft. wide and 45 ft. deep (at low water), through the upper bay and the channel through San Pablo and Suisun Bays will be deepened to 45 ft. Manoeuvring areas near Richmond and the refinery terminals will be widened. The Stockton Deep Water Channel will be deepened to 35 ft. and the channel alignment improved.

REPATRIATION: All facilities available for crew changes by sea, air or land.

AIRPORT: Distance about 10 miles South of San Francisco and is served by most domestic and international passenger airlines plus 20 international air cargo carriers..

TIME: GMT minus 8 hours, Summertime from last Saturday in April till last Saturday in October GMT minus 7 hours.

HOLIDAYS: New Year's Day; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday (afternoon); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Admission Day (Calif. only Sept. 9th); Columbus Day (October 12th); Veteran's Day (November 11th); Election Day (1st Tuesday after the first Monday in November); Thanksgiving Day (last Thursday in November); Christmas Day.

When any of the holidays fall on Sunday, the holiday will be observed on Monday.

On a holiday the longshoremen are working at the overtime rate (time and a half) except on the following days when no work will be performed:

1. New Year's Day;
2. Bloody Thursday (July 5th, memory of 3 longshoremen killed during the 1936 strike);
3. Labour Day;
4. Thanksgiving Day;
5. Christmas Day.

POLICE/FIRE/AMBULANCE: Police, tel. 533-0123; Fire, tel. 861-8020; Ambulance, tel. 431-2800.

TELEPHONES: On some piers telephone connections to ships are available, no extra cost for this service.

GENERAL: Vessels arrival has to be reported to the U.S. Coast Guard 24 hours prior arrival by Agent.

SHORE LEAVE: Crew members are allowed to go ashore after passing U.S. Immigration at first U.S. Port.

AUTHORITY: San Francisco Port Commission.

AGENT: Cascade Shipping Co., 550 Miner Road, Orinda, California 94563. Phone: 415-254-1030. Telex: TWX 910-482-8477. Cables: "Caship".

SAVANNAH, Georgia: 32.02 N. 81.07 W.

(See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Store Lists.
3 Curio Lists.
3 Manifests.
3 Passenger Lists.

These documents required in order to enter vessel at U.S. Customs.

Direct Foreign Arrival – Quarantine Pratique issued by Public Health Service representative; Cargo on Inward Foreign Manifest Form 7527 A or B or substantially similar form, in duplicate with abstract manifest of Savannah only cargo; Crew list on Form I-418, in triplicate; Passenger List on Form I-418, or other acceptable form, in triplicate; Crew curio list, in triplicate, with crew declaration on Form 5123, or crew list on Form I-418, in triplicate, with numbers of attached Forms 5129 endorsed thereon; List of sea stores and ship's stores, in triplicate; for American vessels, repair declaration on Form 3415; for American vessels, certified crew list; Clearance from last foreign port, if one issued.

Coastwise arrival with Residue Foreign Cargo or Passengers – Form 1385, "Permit to Proceed", in duplicate; Travelling Manifest; Abstract Manifest, in duplicate, of cargo to be discharged in Savannah – if none, 2 "pro forma" manifests; Stores list, in duplicate; Crew list, in duplicate; Crew purchase list, in duplicate, and any crew declarations on Customs form 5123 for Savannah; Passenger list, in duplicate, if passengers are disembarking in Savannah.

PILOTAGE: Savannah Pilots' Association, 204 East Bay Street, Savannah, Georgia, 31401 (telegraphic); Pilot required all vessels; ETA 24 hours advance notice, change ETA 8 hours; VHF Channel 16 (monitored at all times), 18, 12, 13 – Radio telephone 2182 and 2738. Pilot boards vessel 1 mile outside fairway buoy.

SHIP CHANNEL: *Project depth and widths are as follows:* Sea buoy to jetties 40 ft. depth×600 ft. width; New Channel Range through Upper Flats Range 38 ft. depth×500 ft. width; The Bight Channel 38 ft. depth×600 ft. width; Fort Jackson Range to Wreck Channel 38 ft. depth×500 ft. width; City Front Channel to Kings Island Channel 38 ft. depth×400 ft. width; Whitehall Channel 36 ft. depth×400 ft. width.

ANCHORAGES: Outside fairway buoy North and N.E. of fairway buoy; no anchorages in river.

RESTRICTIONS: 29 ft. at any time; over 29 ft. on incoming tide, no restrictions day or night.

MAX. SIZE: Abbreviation OT: Ocean Terminal. Vessels berthing at OT 10 A/B and OT 12 A/B should not exceed 550 ft. length and 26 ft. draft. For berths OT 14–15–16–17 vessels 550 to 600 ft. on slack water; vessels less than 550 ft. any time to berths 14 and 17; vessels docking or undocking at OT 15–16, with vessels in OT berths 14 and 17, can be docked or undocked during slack water. Vessels entering Stevens Terminals should not exceed 525 ft.; max. of 550 ft. could be handled under ideal conditions, i.e. slack water and all berths clear in slip. Vessels over 500 ft. undocking from berths 35–37–41–42, Stevens Terminals, should not be undocked during strength of ebb or flood tide, but may be undocked at or near high or low water slack. Vessels berthing at river front berths: vessels up to 650 ft. will be handled any time and vessels from 650 to 900 ft. on tide conditions; vessels will be handled at whatever drafts Bar Pilots will bring them in or out. Also see "Developments".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels route ETA cables to Agents, etc., via Radio Lantana.

TUGS: Tugs join vessels at city front for berths above city; for berths below city, tugs usually meet vessels in vicinity of Fort Jackson or well below berth. Tugs' lines used all times.

BERTHING: The Georgia Ports Authority operates 19 general cargo berths, 2 tanker berths, 3 container berths, 2 dry bulk cargo berths, and a LASH facility.

CRANES: Ocean Terminal – Two 50-short ton gantry cranes; Garden City Terminal – Two 35-short ton gantry cranes, two 30-short ton gantry cranes, two 45-short ton container cranes, Garden City Terminal (Container Central) – four 45-short ton container cranes, six 45-short ton rubber tyred bridge cranes. Other cranes, floating and mobile, are available from various private contractors.

BULK CARGO FACILITIES: Located at the Georgia Ports Authority's Garden City Terminal are 2 dry bulk cargo berths (1 loading and 1 discharge berth). This facility is suited for the handling of various ores, grains, peanuts, meals and fertilizer materials. The storage at this facility consists of silos for the storage of grain and grain type products as well as flat floor storage for these various other materials.

SPECIALIZED CARGO HANDLING FACILITIES: Located at Container Central, on the up-river end of berth 60, is an adjustable ro-ro ramp which is situated as to allow a vessel to utilize the ro-ro ramp and container cranes at the same time. This ramp has a design capacity of 600 tons on the centre or 300 tons anywhere on the ramp or deck with the weight of the load properly distributed. At the Garden City Terminal there is a modern cold storage facility. The refrigerated space consists of 3 rooms of approximately 28,000 sq. ft.

BRIDGES: *Eugene Talmadge Memorial Bridge:* 135 ft. vertical clearance for 400 ft. at MHW.

STEVEDORES: In order to order gangs Agent should receive ETA from vessel no later than 1300 hrs. day prior to arrival, when vessel coming coastwise. When calling at Savannah from a foreign port Agent normally receives ETA 72 hours and again 24 hours prior to arrival.

MEDICAL: Agent should be advised as far in advance as practicable for required medical attention. U.S. Public Health Clinic in Savannah, also other extensive medical facilities. Standard information required as to inoculations, vaccinations, etc.

TANKERS: Standard requirements on diameters of load-discharge lines. No facilities for slop (residue) discharge facilities except American Oil Company. S.G. & A.P.I. of local types of oil is 36 gravity marine diesel fuel. 6 tanker berths in port, max. drafts range from 32 ft. – 36 ft.

DENSITY: Average density of water at 20° Centigrade in channels of Savannah Harbour are:

	High Water	Low Water
Savannah River Entrance		
Surface	1.0196	1.0090
Bottom	1.0196	1.0181
Port Area		
Surface	1.0022	0.99915
Bottom	1.0120	1.0075

FRESH WATER: Available at all terminals. Charge $1.05 per ton with a minimum charge of $15.75 for each service.

FUEL: Light marine diesel fuel (No. 2 Fuel), heavy marine diesel fuel (No. 4 Fuel), all Intermediate grades from Intermediate 2 (equals 200 secs. Redwood 1 scale at 100° F.) through No. 30 (equals 3,000 secs. Redwood 1 scale at 100° F.), Bunker "C" Fuel (No. 6 Fuel). All above grades available in either bonded or domestic except light marine diesel, which is domestic only. Advance notice required 24 hours.

FIRE PRECAUTIONS: No special fire precautions. All tanker berths have water and fire extinguishers on dock. Fire fighting equipment on dock. Fire fighting equipment on tugs.

DEVELOPMENTS: Presently being contracted are two 125-short ton gantry cranes to be erected at the Ocean Terminal.

GANGWAY/DECK WATCHMEN: Garden City and Ocean Terminals of Georgia Ports Authority require that a watchman, or someone in authority, will be aboard any vessel tied to their facilities at all times. Seaboard Coast Line Terminal watchman furnished by Steamship Company if watchman required. The Stevens Shipping and Terminal does not require a watchman.

OPENING/CLOSING HATCHES: By crew if mechanical; by stevedores if not mechanical.

CERTIFICATES: See "Documents". Current Registry Papers, Load Line Certificates, Certificates of Inspection, etc., are required.

CUSTOMS ALLOWANCE: Tobacco, a crew member may take ashore 50 cigars, 300 cigarettes, or 3 pounds of smoking tobacco, or a proportionate amount of each. An appropriate amount of tobacco products may be held out of bond for use of passengers and crew members while aboard ship when in port. Wine and/or Spirit, a crew member may take ashore one quart of alcoholic beverages for his own use. Container should be opened, that is the seal should be broken. An appropriate amount of wine and/or spirits may be held out of bond for consumption by passengers and crew while aboard ship when in port.

CARGO GEAR: Certified in accordance with U.S. Department of Labor Regulations. Supplied by stevedores.

IDENTIFICATION CARDS: Identification required by crew members coming ashore. U.S. Immigration & Naturalisation Service issues landing permit, Form I-94, to any crew member of a foreign vessel who is not considered a security risk. This form must be in man's possession any time he is ashore.

CONSULS: The following countries are represented in Savannah:

Brazil
Costa Rica
Dominican Rep.
France
Germany
Italy
Norway
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible at Savannah Machine and Shipyard Company. Deck repairs from Diamond Manufacturing Company.

RADAR/VHF REPAIRS: Marine Industrial Electronics has qualified radar and RDF, also VHF men available. They can be contacted through ship's Agents or through the Pilots or Atlantic Towing if vessels should require service on arrival.

DRY DOCKS: Savannah Machine & Shipyard Drydock 540 × 72 × 21 ft.

REPATRIATION: Responsibility of Owner's Agents. Can be arranged to all points.

AIRPORT: Savannah Municipal Airport regularly served by Delta Air Lines with 13 scheduled flights daily and National airlines with 5 flights daily. Charter service also available. Distance to Garden City Terminal approximately 5 miles, to Ocean Terminal approximately 7 miles, and to Stevens Terminal and SCL Terminal approximately 9 miles.

TIME: Savannah maintains Romeo or Eastern Standard Time GMT minus 5 hours, from 0200 hrs. the last Sunday in October, to 0200 hrs. the last Sunday in April. Quebec or Eastern Daylight Saving Time GMT minus 4 hours maintained from April to October.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); George Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (First Monday in September); Columbus Day (October 12th); Armistice Day (November 11th); Thanksgiving Day (Fourth Thursday in November); Christmas Day (December 25th); Good Friday.

No work will be performed on New Year's Day, Independence Day, Labor Day, and Christmas Day.

POLICE/AMBULANCE/FIRE: Police, City: 232-4141 and 233-9321, County: Police: 352-7780; Ambulance: Fields and Sons Ambulance Service, 233-0191, Fire: City: 232-5121.

TELEPHONES: G.P.A., Garden City and G.P.A., Ocean Terminals: telephones on board can be provided through local Agents. Stevens Shipping & Terminals – not available to ship (phones on dock). S.C.L. Terminal – not available to ship (phones on dock).

SERVICES: Compass Adjusting, Coste Compass Adjusters, 121 East 63rd Street, Savannah, Georgia 31405, Tel. 355-9607.

Radar, RDF, VHF, Marine Industrial Electronics, Inc., Savannah Industrial Park, Savannah, Georgia, Tel. 232-3489.

SHORE LEAVE: Crew members are allowed ashore provided they are not detainees.

DELAYS: With reasonable advanced notice of ETA no delay anticipated in berthing, loading, discharging or bunkering.

AUTHORITY: Georgia Ports Authority. Stevens Shipping & Terminal. Savannah Port Authority.

The Savannah Port Authority does not operate terminals; however, is engaged in port and industrial development for the City of Savannah and Chatham County, Georgia. Harbour regulations pier and bulkhead lines, etc., come under the jurisdiction of this organisation.

SEARSPORT, Maine: 44.28 N. 68.56 W.

(See Plan Book)

DOCUMENTS:

1 Crew List.
1 Passenger List.
2 Stores Lists.
2 Foreign purchases Lists.
2 Inward foreign Manifest uniform cargo.
Original Bill of Lading.
1 Form 3251 Masters oath on entry vessel.
2 Form 1374 outward foreign Manifest.

PILOTAGE: Ship's agent notifies Pilot approximately 48 hours in advance of arrival, correcting at 24 hours. Pilot's boat called on Channel 16 and 13 VHF. Pilot boards at Monhegan Island, W.B. 14 m. When weather bad, suggest vessel heaves-to at 43° 45.3′ N. 69° 22.5′ W.

Shipmaster's Report: There is a second pilot station for ships approaching from the East.

The pilot station is located on Matinicus Rock Island. Pilot boards at Wooden Ball Light Bell Buoy "2WB." Lat. 43° 49′ N. Long. 68° 50′ W.

The pilot boat is a fishing boat with a white hull showing the international signals.

Pilot signal: 3 long and 2 short on ship's whistle.

Radio contact: VHF Channel 16 (156.8 mc/s).

36 and 24 hours ETA requested, cable "Penbay - Belfast/Maine", via Chatham Radio.

ANCHORAGES: No restrictions on anchoring.

RESTRICTIONS: No restrictions at night. Deep draft vessels brought in only on high water. Draft in concurrence with docks, 32 ft. low water. 10 ft. rise in tide - approach to Searsport 35 ft. - Bay 60 ft. limit.

MAX. SIZE: Size of vessel restricted to 38 ft. draft in harbour area. No outside installations at the port yet.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Searsport Harbour use Channel 16 and 2182. Vessels arriving Searsport go through radio station at Chatham, Mass., RCA installation, SSB station or a VHF public correspondence station.

TUGS: Penobscot Bay Towing Co., Marshall Wharf, Belfast, Maine 04915. Tel. (207) 338-3000. 24-hour service. Requested that orders for tugboat service be given during normal business hours, 24 hours in advance.

Tugs: "Ellen F.", diesel 1,200 h.p.
"Eileen McAllister", diesel 1,200 h.p.
"Roderick McAllister", diesel 1,200 h.p.
"Cape Fear", diesel 1,800 h.p.
"Michael H. Holmes", diesel 1,000 h.p.

Radio: ship to ship, VHF Channels 16-13-14.

Sea Pilots dock ship with tug's assistance.

BERTHING: Draft conditions govern arrival and departures.

Bangor and Aroostock Pier: Length 800 ft., width 100 ft. Depth alongside (East side) 34 ft., (West side) 32 ft.

C.H. Sprague Dock: Length 614 ft., depth alongside East side 34 ft. There are 3 towers for discharge of bulk cargoes.

Turning basin off docks, depth 34.5 ft. and 1,200 ft. width.

STEVEDORES:

Week days:

Order gangs by 1700 hrs. for following day 0800 start.
Order gangs by 0900 for same day 1300 start.
Order gangs by 1300 for same day 1800 start.

Weekends:

Order gangs by Saturday 1200 for a Sunday 0800 start.
Order gangs by Saturday 1200 for a Monday 0800 start.

MEDICAL: No advance notice required by Agent. 1 hospital, Waldo County, which takes bed patients. All seamen require Certificate showing they have had smallpox vaccination during last 3 years.

TANKERS: 2 berths at Searsport – 1 for No. 6 oil and 1 for light oil and gas. 2×8-in. hoses. 34 ft. low water.
DENSITY: Average density 1024.
FRESH WATER: Available by tug for boilers only at rate of tug hire. Drinking water available at piers.
FUEL: No. 6 oil at C. H. Sprague dock. Light oils delivered by tank truck at dock.
FIRE PRECAUTIONS: At certain oil piers information given to Shipmaster upon arrival at pier. Ample fire protection, salt-water lines, sprinkler system on pier, local fire department.
DEVELOPMENTS: 2 new 40,000 bbls. tanks for liquid fertiliser.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Ship's crew may open hatch after longshoremen boarded ship.
CERTIFICATES:

Load-line Certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. tonnage Tax Certificate of previous trip if have them.
Radio Operator Licence.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per man. Wine and/or Spirit allowance 1 bottle per person.
CARGO GEAR: No additional cargo gear necessary.
IDENTIFICATION CARDS: Form I-95 must be filled out on arriving unless seamen has had a prior one made out for a previous arrival on same ship (on plastic card).
CONSULS:

Norwegian: Allan Kjos-Hansen, 30 Mayer Road, Portland, Maine, Vice-Consul.
French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.
Finnish; Frank W. Bjorklund, 163 Main Street, Norway, Maine.
Italian: Dr. Domenica A. Santoro, 43 Deering Street, Portland, Maine.
Panamanian: Mary Navarro de Carrillo, Lafayette Town House, Portland, Maine.
Swedish: Martin Johnson, Vice Consul, 443 Congress St., Portland, Maine.

REPAIRS: All types of machinery repairs.
DRY DOCKS: None.
REPATRIATION: Arrangements must be made with Agent in advance by telegram.
AIRPORT: Bangor International Airport, 30 miles, Northeast Airlines.
HOLIDAYS: New Year's Day; Washington's Birthday; Patriot's Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas Day and Veteran's Day. Possible to get gangs to work all days except on Labor Day and Christmas.
POLICE/AMBULANCE/FIRE: Police 548-2256; Ambulance 548-2900; Fire 548-2900.
TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.
AUTHORITY: Maine Port Authority, Portland.

SEATTLE, Washington: 47.36 N. 122.20 W

(See Plan Book)

PORT LIMITS: Port of Seattle limits are co-extensive with the boundaries of King County in which Seattle is situated. A vessel has "arrived" when it has tied-up to a berth.
DOCUMENTS (on arrival from foreign):

Clearance from Last Foreign Port.
2 Crew Lists on Form. I.418.
2 Passenger Lists on Form I.418 (if applicable).
Passenger Declarations if applicable.
2 Store Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for discharge on CF.7527-A or 7527-B.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on CF.7527-A or 7527-B, one for Customs at this port and the other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43.
B – For U.S. Dept. of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form AIQ.43.
C – For U.S. Immigration Boarding Officer:
1. Crew List on Form I.418 visaed by U.S. Consul abroad.
2. Passenger List on Form I.418.
3. Attachment to Passenger List on Form I.92.
4. Form I.94 for each passenger.
5. Form I.95 or ID Card (Form 184) for each crewman. (These are reusable for multiple entries, but for seamen on first trip to United States a new Form. I.95 must be ready for presentation on arrival.)
D – For U.S. Customs Boarding Officer and Agent or Broker:
1. 3 copies Crew List (Form I.418).
2. 3 copies Cargo Manifest on Form 7527A or B.*
3. 3 copies Store List – no official form provided.*
4. 3 copies Crew Purchases or Curio List (no official form provided).*
5. 3 Passenger Lists on Form I.418.
6. For U.S. Ships – Declaration re foreign repairs on Form 3415.
7. For U.S. Ships – Certified Crew List from last U.S. port before going foreign.

*At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.
PILOTAGE: Compulsory for all vessels except those on coasting trade. Pilots may be obtained from Puget Sound Pilots' Association, Seattle, at short notice. Inward, Pilot boards vessel at pilot station off Port Angeles.
ANCHORAGE: Extensive anchorage in Eliott Bay, depths of 90 ft.
RESTRICTIONS: Only for Inner Harbour, entrance through Canal Locks, max. 800 ft. × 80 ft. × 29 ft. fresh water.
MAX. SIZE: Controlled by depth at berth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, 2nd tug normally used.
BERTHING: Over 62 berths for ocean-going vessels. Depths alongside, 30 to 73 ft. MLLW.
SPECIALISED HANDLING FACILITIES: Terminal 20 has among its equipment a 200-ton capacity shear-leg crane. Also has pipe-lines to carry molasses, tallow or other non-petroleum liquid cargo, and has a tank farm for storage.

Terminal 115 – 2 berths, capacity, import steel and autos.

Terminal 115 – Foss Alaska Barges, has specialised finger piers, to handle container-to-barge operations.

Terminal 128 – A barge terminal.

Terminals 5, 18, 25, 37 and 46 – Container Terminals, equipped with large container cranes and yards to handle van shipments. Depth alongside, Terminals 18 and 25 – 50 ft. Terminals 5, 37 and 46 – 40 ft.

Pier 86 – fully automated, deep water, Grain Terminal. With 1 berth it can accommodate a vessel with up to 73 ft. draft and length up to 1,400 ft. Storage capacity 4.2 million bushels. Loading rate 3,000 tph.

CRANES: *Terminal 5:* 4×33-ton container cranes.
Terminal 18: 3×45-ton and 2×33-ton container cranes.
Terminal 20: 3×50-ton revolving cranes and 1×200-ton sheer leg.
Terminal 25: 3×45-ton container cranes.
Pier 28: 1×50-ton gantry crane and 1×40-ton gantry crane.
Terminal 37: 4×45-ton container cranes.
Terminal 46: 1×45-ton container cranes.
Terminal 115: 1×50-ton and 1×35-ton gantry crane.
Terminal 91: 1×35-ton gantry crane.
STEVEDORES: 58 local gangs available. Gang requirements must be made known to the contracting stevedore prior to 1100 hrs. on day before vessel plans to dock. Order before 1030 hrs. on Saturday for Saturday afternoon, Sunday, and Monday.
DENSITY: Salt water in Outer Port. Fresh water inside Canal Locks.
FRESH WATER: Available at all wharves.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Watchmen required if detainees aboard.
OPENING/CLOSING HATCHES: Normally carried out by stevedores while in port.
CERTIFICATES:

Certificate of Registry.
Certificates for any previous U.S. tonnage tax payments within the past year.
International Load Line Cert.
Safety Radio Cert.
Deratisation Cert.
Cargo Gear Inspection Cert.
Cert. of Inspection (for U.S. vessels).

CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
IDENTIFICATON CARDS: Required.
CONSULS:

REPAIRS: All types of repair possible.
DRY DOCKS: 10 dry docks for vessels up to 20,000 tons.
REPATRIATION: All facilities exist.
AIRPORT: Seattle International Airport.
TIME: Pacific Standard Time, GMT minus 8 hours; Pacific Daylight-saving Time, from end April to end October, is GMT minus 7 hours.
HOLIDAYS: January 1st, New Year's Day (no work); February 12th, Lincoln's Birthday (work); Third Monday in February, Washington's Birthday (work); Last Monday in May, Memorial Day (work); July 4th, Independence Day (work); First Monday in September, Labour Day (work); Second Monday in October, Columbus Day (work); Fourth Monday in October, Veteran's Day (work); First Tuesday in November, Statewide Election Day (work); Fourth Thursday in November, Thanksgiving Day (no work); December 25th, Christmas Day (no work); In addition July 5th, known as "Bloody Thursday", while not a holiday, is a no work day for longshoremen.
SHORE LEAVE: Allowed, except for crewmen detained by Immigration.
AUTHORITY: Port of Seattle.

AGENT: Cascade Shipping Co., Colman Building, 811 1st Avenue, Seattle, Washington 98104. Phone: 206-622-2803. Telex: TWX 910-444-2079. Cables: "Caship".

SEWARD, Alaska: 60.06 N. 149.27 W.

(See Plan Book)

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527-A or 7527-B) the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I.-418).
2 copies Crew List (Form I.-418).

Customs boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Customs Form 3255).
All Foreign clearances.
U.S. Certificates of payment to tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Alaska Marine Pilot's Association, Box 273, Homer, Alaska 99603. 48 hours advance notice. 2182 calling frequency KC–KTE–21. Anchorages as noted on chart. C. & G. S. 8529 Resurrection Bay.

Pilot boards at Cains Heads in Resurrection Bay.

MAX. SIZE: Harbour depth 35 ft. MLLW.

ANCHORAGE: Suitable anchorage in 30 fathoms depth available for deep draft vessels at the head of the Bay, South of marked buoy.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: KWA 346 (AM) Alaska Railroad Dock, frequency monitored 2182 kc/s. KWA 364 (SSB) Alaska Railroad Dock frequency monitored 4-6-8-12 Megs.

TUGS: No regular tug service available. Prior arrangements need be made with tugs from Cook Inlet. Foss Tug & Barge or Puget Sound Tug & Barge Company.

BERTHING: 24 hour berthing. Berthing permit required. Advance notice of 48 hours requested.

200 ft. by 735 ft. steel and concrete finger pier.
East Side — 600 ft. long with 35 ft. depth of water. (10 ft. out from dock face).
West Side — 600 ft. long with 35 ft. depth of water.
South End — 200 ft. long with 35 ft. depth of water.
(East and West Berths serviced by railroad spurs).

CRANES: East Berth – 2 gantry cranes. Maximum capacity – 45 short tons, maximum radius – 105 ft. Forklifts ranging up to 35 ton capacity.

STEVEDORES: Northern Stevedoring and Handling Corporation supply labour force.

MEDICAL: Fully staffed 30 bed hospital. All medical facilities available.

DENSITY: 1.0248 water density at Mean High Water.

FRESH WATER: Available at East and West berths. 4 in. water line; 67 lb. pressure.

FUEL: Diesel fuel available from pipeline at South and West Berth only. Other grades delivered by tank wagon.

OPENING/CLOSING HATCHES: Handled by crew, if done before berthing ship. By stevedores if tied to dock.

IDENTIFICATION CARDS: U.S.C.G. Port Security Card or Seaman's Card required.

REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.

AIRPORT: 1 mile. Charter Service. No regular air service.

TIME: Alaska Standard Time.

HOLIDAYS: All holidays are time and one half. Cargo can be worked on all except Christmas, New Year's and Labour Day.

POLICE/FIRE/AMBULANCE: Police, tel. CA 4-5201; Ambulance, tel. CA 4-3042; Fire, tel. CA 4-3444.

AUTHORITY: The Alaska Railroad.

SITKA, Alaska: 57.03 N. 135.20 W. (See Plan Book)

Located on the Western side of Sitka Sound, Baranof Island. Open all year.

APPROACHES: 3 natural channels: Western, Middle and Eastern.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pilot pick-up point – close aboard vicinity Eckholm Light.

ANCHORAGE: Jamestown Bay.

MAX. SIZE: Harbour depth 22 ft. MLLW. Tides: diurnal range – 9.9 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs, local.

TUGS: 7 tugs 300 h.p. to 1,200 h.p.

BERTHING: 3 wharves.

1. Conway Dock: Berthing length 160 ft., depth 30 ft. MLLW. No cranes, 3 lift-trucks; 10,000 sq. ft. covered shed space; fresh water.

2. Japonski Dock: Government dock only for limited commercial use.

3. Alaska Lumber & Pulp Co.: (Private) Berthing length 700 ft., depth 35 ft. LW. Walking cranes only. Not less than 12 lift-trucks, 30,000 sq. ft. covered shed space; fresh water. (Located at Silver Bay, Sawmill Cove, 4 miles South of Sitka). 30,000 sq. ft. open storage.

STEVEDORES: 3 gangs.

REPAIRS: Light repairs only.

FRESH WATER: Available.

FUEL: Not available.

MEDICAL: Sitka Community Hospital and U.S. Public Health Service Hospital on Japonski Island.

TRANSPORTATION: Air and ferry.

SKAGWAY, Alaska: 59.27 N. 135.18 W.

Located at the Northern end of Lynn Canal, 14 miles North of Haines.

APPROACHES: Via Lynn Canal.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pick-up point located in vicinity of Point Retreat.

MAX. SIZE: Harbour depth 30 ft. running out to 300 ft. Tides diurnal range 16.7 ft. Also see "Berthing".

ANCHORAGE: In Lutak Inlet, 14 miles South of Skagway.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, and Customs, local. Immigration from Haines.

BERTHING: 1. White Pass and Yukon Railroad Dock: Containerized cargo to Vancouver and Whitehorse is the principal use, also used for tankers and cruise ships. 900 ft. long, 100 ft. wide; depth at face varies from 20 to 43 ft. Southern end in poor condition. No covered storage. Open storage 80,000 sq.ft. 1 fork-lift is available. Containers presently loaded and unloaded with ship's gear. 2 straddle cranes for containers on dock.

2. Skagway Terminal Co.: Ore loading facility. 1,000 ft. berth, fender dolphins, and walkway. 42.5 ft. deep at face. Sole use for bulk cargo ships. Adjacent to the berth is a warehouse of 108,000 sq.ft. Also available are 50 acres for open storage. Loading equipment consists of 1 fixed loading spout with a capacity of 1,500 t.p.h.

TUGS: 3 available from Haines.

STEVEDORES: 3 gangs.

REPAIRS: None.

WATER: Available in small quantities in temperate seasons only.

FUEL: None.

MEDICAL: Medical clinic and one nurse.

TRANSPORTATION: Rail, ferry and air.

SMITHS BLUFF, Texas: 30.00 N. 93.59 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs required berthing/unberthing.

BERTHING: Pure Oil Co.: distance from sea 38 miles, depth at berth 37 ft. Sun Oil Co.: distance from sea 38 miles, depth at berth 36 ft.

MEDICAL: All facilities available.

DENSITY: Fresh water.

FRESH WATER: Available ex wharf at Pure Oil Terminal, otherwise by barge.

FUEL: Available ex wharf at Pure Oil Terminal. All grades available by barge from Port Arthur or Beaumont.

GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.

CUSTOMS ALLOWANCE: 300 cigarettes and 1 quart wine or spirits for each man.

IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.

CONSULS: Nearest at Houston.

REPAIRS: DRY DOCKS: See "Port Arthur".

AUTHORITY: Port Director, Port of Beaumont.

STOCKTON, California: 37.57 N. 121.19 W.

(See Plan Book)

DOCUMENTS: See "San Francisco".

PILOTAGE: Pilots commissioned by Stockton Port District. Pilots obtained by contacting Secretary of California Inland Pilots' Association, located at Marine Exchange, World Trade Center, San Francisco, California (KBP 386).

ANCHORAGE: Emergency anchorage only permitted in Turning Basin, 32 ft. depth.

RESTRICTIONS: Restrictions only in effect if water at flood stage. See "San Francisco".

MAX. SIZE: Draft restrictions of 30 ft. at low tide, 32 ft. at high tide.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Ship to shore Radio (KBP 376) enables constant contact with Pilots who therefore aware of any problem that may develop up or down river. Arrangements also may be made for readiness of ordered gangs within 15 minutes of ship's arrival.
TUGS: Tugs join vessel 0.5 mile up river from Main Channel; generally, ship's lines used, however, tug lines may also be utillised.
BERTHING: *Port Stockton Bulk Material Wharf, Berths 12-13:*

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use; Shipment of dry-bulk commodities, including clay clinkers and petroleum coke; receipt of molasses and petroleum products.

Dimensions: Length of face 566 ft.; lower side 13.5 ft., upper side 13.5 ft.; depth alongside at MLLW 35 ft.; usable berthing space 566 ft.

Mechanical handling facilities: Max. vessel coke loading rate 240 long t.p.h. 2 small bulldozers available for trimming cargo in holds of vessels, in addition to 360° spout trimmer.

Remarks: Car dumper has an operating rate of 275 tons coke/hour.

Port Stockton Ore Wharf, Berths 10-11:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Container-handling dock; receipt of molasses and petroleum products.

Dimensions: Length if face 810.5 ft., lower side 102 ft.; depth alongside at MLLW 32 ft.; usable berthing space 810.5 ft.

Remarks: Face of wharf is in line and contiguous with face of Berth 9 providing a total of 1,455.5 ft, of berthing.

Port Stockton General cargo Wharf, Berth 9:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 645 ft., upper side 75 ft.; depth alongside at MLLW: Face 37-34 ft., upper side 35 ft.; usable berthing space; Face 645 ft. upper side 110 ft. with dolphin; width of apron: Face 41.25 ft.

Mechanical handling facilities: Forklift trucks and other types of cargo-handling equipment, owned by the Port District and by stevedoring companies, are available as needed.

Port Stockton Wharf No. 8:

Owned by: Stockton Port District.

Operated by : Stockton Port District.

Use: Receipt and shipment of general cargo; Liquid sugar facility and receipt of molasses.

Dimensions: Length of 396 ft.×88 ft.; depth alongside at MLLW 37-36 ft.; usable berthing space 484 ft. with trestle.

Port Stockton Wharf No. 7:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 516 ft. depth alongside at MLLW 37-36 ft.: usable berthing space 516 ft.; width of apron 31 ft.

Port Stockton Wharf No. 6:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 418 ft.; depth alongside at MLLW 37-36 ft.; usable berthing space 418 ft.; width of apron 31 ft.

Port Stockton Wharf No. 5:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 428 ft.; depth alongside at MLLW 34-32 ft.; usable berthing space 429 ft.; width of apron 31 ft.

Port Stockton Grain Wharf No. 4:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo, receipt of bulk phosphate rock by self-discharging vessel; and shipment of bulk fertilisers.

Dimensions: Length of face 461 ft.; depth alongside at MLLW 32-35 ft.; usable space 462 ft.; width of apron 31 ft.

Port Stockton Wharf No. 3:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 461 ft.; depth alongside at MLLW 32-36 ft.; usable berthing space 461 ft.; width of apron 31 ft.

Port Stockton Open Wharf No. 2:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo; shipment of logs, and handling of heavy-lift cargo.

Dimensions: Length of face 506 ft.; depth alongside at MLLW 32-36 ft.; usable berthing space 506 ft.; width of apron: open.

Remarks: Wharf has 39,000 sq. ft. of open storage area with an additional 2.3 acres of open storage area in rear. At the Industrial Park approx. 104 acres of open storage area are located South of W. Washington Street; over 50 acres of this area can be used for storing logs awaiting shipment. An additional 56 acres of open storage are located North of W. Washington Street.

Logs may be transferred to wharf by trucks and by tractors equipped with log clamps.

Stockton Elevators Grain Elevator Main Wharf No. 1:

Owned by: Stockton Elevators Inc.

Operated by: Stockton Elevators Inc.

Use: Shipment of grain by vessels and by ocean going and inland waterway barges; receipt of grain by self-unloading barges.

Dimensions: Length of face 564 ft., West side 20 ft., East side 20 ft.; depth alongside at MLLW 35-37 ft.; usable berthing space 564 ft.; width of apron, open end 20 ft.

Mechanical handling facilties: 2 towers on wharf, each with 13-in. diameter, telescopic, mechanically operated, grain-loading spout; loading rate, 900 short t.p.h. (29,877 bu.) at East tower; 800 (26,557 bu.) at West tower; combined rate, 900 short tons.

Remarks: Grain gallery connecting towers on wharf has a 30-in., electric-belt conveyor; and gallery extending from East tower to grain elevator has two 30-in. belt conveyors.

BRIDGES: Fixed-span high-level toll bridge across Carquinez Strait, with min. clearance of 135 ft. above MHHW. Southern Pacific Railroad lift span bridge crosses Suisun Bay 6.5 miles upstream from Carquinez bridge, with min. clearance above MHHW of 70 ft. when closed and 135 ft. when open. Horizontal clearance on lift span 290 ft. A third bridge, 22 miles above Southern Pacific bridge, near Antioch, has min. clearance 70 ft. when closed and 135 ft. when open. Horizontal clearance of span 265 ft.
STEVEDORES: *General Cargo* – For gang start at 0800 hrs., orders must be placed at 1600 hrs. of previous day; night gangs must be ordered by 1100 hrs. These times pertain to week-day gangs. For week-end gangs, 1100 hrs. Saturday for Saturday night, Saturday morning, Sunday night and Monday morning. Day shifts run from 0800 to 1700 hrs. Night shifts 1700 to 0300 hrs. Arrangements can be made for a special third shift from 0300 to 0800 hrs. Rates quoted on request.

Bulk Ore and Grain Cargoes—Orders for gangs must be placed at same time as for general cargo. This operation on 24 hour basis; day shift, 0800 to 1600 hrs., night shift 1600 hrs. to midnight, swing shift, midnight to 0800 hrs. Also see "Radio".
MEDICAL: Arrangements with San Joaquin Medical Society for physicians, surgeons and dentists. 5 hospitals within radius of 6 miles from port. Ambulance service readily available. Telephone number for this service is 466-9535 (day or night).
TANKERS: 2 berths, 32 ft. depth available.
FRESH WATER: Available through pipelines.
FUEL: All grades of fuel available with 1 day's advance notice.
DEVELOPMENTS: Deepening of channel to 35 ft. proposed.
GANGWAY/DECK WATCHMEN: Services of watchmen not necessary. Available if requested.
OPENING/CLOSING HATCHES: Hatches may be opened prior arrival and closed after ship sailed from port; any opening or closing of hatches at dockside must be performed by stevedores.
CERTIFICATES: See "San Francisco".
CUSTOMS ALLOWANCE: Tobacco, Wine and/or Spirit, see "San Francisco".
CARGO GEAR: Safety regulations require strict adherence to max. loading or unloading weight capacity of ship's gear.
IDENTIFICATION CARDS: Not required.
CONSULS: See "San Francisco".
REPAIRS: Minor types of repairs carried out.
DRY DOCKS: Nearest dry docks, San Francisco.
REPATRIATION: No facilties in Stockton for effecting crew changes and arranging any necessary repatriations. Special arrangements may be made through Customs.
AIRPORT: Stockton Metropolitan Airport located approx. 6 miles from port. Serviced by United Air Lines and Air West.
TIME: Pacific Standard Time in effect from last Sunday in October to last Sunday in April; Pacific Daylight Time goes into effect on last Sunday of April until last Sunday in October, when clocks are advanced 1 hour.
HOLIDAYS: New Year's Day; Lincoln's Birthday; Washington's Birthday; Memorial Day; Independence Day; Labour Day; Admission Day; Columbus Day; Veteran's Day; Thanksgiving Day; Christmas Day are all holidays. In addition to above. General Election Day, both State and National, as well as any day proclaimed by Governor of California or President of United States shall be observed as holiday. Work can be arranged for all holidays.
POLICE/AMBULANCE/FIRE: Security Force on duty 24 hours a day and can be reached by dialling extension 246 for any emergency that might arise. Stockton Police Department's emergency telephone number (209) 466-6843. Stockton Fire Department (209) 464-4646. Ambulances may be secured by telephoning (209) 466-6869; 464-4846; 463-3202; 466-1601; 464-4611; 464-1546.
TELEPHONES: Telephones placed aboard on request.
ELECTRIC CURRENT: At wharves where current available for ship's use, it is 110 volt, single phase, 60 cycle for lighting and 440 volt, 3 phase, 60 cycle for power.
SHORE LEAVE: Permitted.
REGULATIONS: Port of Stockton requests notice of ship's intent to come into port at least 7 days prior to arrival; vessels, who have made prior arrangements, will have precedence over vessels who sail into port without previous notice.
AUTHORITY: Port of Stockton.
AGENT: See "San Francisco".

TACOMA, Washington: 47.14 N. 122.28 W. (See Plan Book)

DOCUMENTS (on arrival from foreign):
Ship's document.
Clearance from Last Foreign Port.
2 Crew Lists on Form I.418
2 Passenger lists on Form I.418 (if applicable)
Passenger declarations if applicable.
2 Store Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of cargo for discharge on C.F. 7527—A or 7527-B.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on C.F. 7527-A or 7527-B, one for customs at this port and other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43.

B – For U.S. Department of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form A1Q.43.

C – For U.S. Immigration Boarding Officer:
1. Crew List of Form I.418 visaed by U.S. Consul abroad.
2. Passenger List on Form I.418.
3. Attachment to Passenger List on Form I.92.
4. Form I.94 for each passenger.
5. Form I.95 of ID Card (Form 184) for each crewmen. (These are reusable for multiple entries, but for seamen on first trip to United States a new Form. I.95 must be ready for presentation on arrival.)

D – For U.S. Customs Boarding Officer and Agent or Broker:
1. 3 copies Crew List (Form I.418).
2. 3 copies Cargo Manifest on Form 7527A or B.*
3. 3 copies Store List – no official form provided.*
4. 3 copies Crew Purchases or Curio List (no official form provided).*
5. 3 Passenger Lists on Form I.418.
6. For U.S. Ships – Declaration re foreign repairs on form 3415.
7. For U.S. Ships – Certified Crew List for last U.S. port before going foreign.

* At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Is compulsory for all vessels except those under coasting trade on West coast of the United States, including Alaska and British Columbia. Pilots board off Port Angeles Pilot Station.

ANCHORAGE: The depths as a rule are too great for convenient anchorage, but vessels occasionally anchor under the Northern shore about 1 mile Eastward of Brown's Point. Vessels may anchor in about 18.29 m., 450 yd. N.N.W. of the outer end of Puyallup Waterway West Jetty.

City regulations permit anchorage in any part of the bay outside harbour lines so as not to interfere with vessels arriving or departing from their docks.

MAX. SIZE Length over 305 m. (centre to centre dimensions of mooring dolphins), draft subject to berth depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, join vessel in Commencement Bay, approx. half way between Brown's Point and the designated Dock. Tug's lines are used and there is a charge for tug's lines.

BERTHING: 29 deep water berths.

General Cargo: 161,000 sq.m. warehouse space, 91 hectares of open storage paved, lighted, fenced, serving all piers.

Water depths: 9.15 m. to 21.34 m. below MLLW.

BULK HANDLING FACILITIES: 550 m. pier with 12 to 15 m. water depth. 5 heavy lift whirley cranes and bulk unloading crane with 750 to 1,500 t.p.h. capacity; 150,000 tons capacity alumina storage structure with load-out facility; 12.14 hectare stockpile area including holding area for 300 rail cars.

2 Bulk grain elevators: United Grain: Pier 1, 4.5 million bushel capacity; loading rate: 1,000 t.p.h.; 271.34 m. dock; 15.24 m. water depth.

Continental Grain: 3 million bushel capacity: loading rate: 2,400 t.p.h.; 137 m. dock with dolphins to 244 m.; 21.34 m. water depth.

Bulk Liquid Facility: 3.5 million gallon capacity; heated tanks and piping for both rail and truck shipping and receiving; serves vessels at Pier 1, 676 m., 10.67 m. water depth, and Pier 5, 174 m., 10.06 m. water depth.

CONTAINER HANDLING FACILITIES: *Terminal 4:* Container handling and general cargo. Container handling capability – 5,000 units per month. 2 berths, total length 378.6 m., width 42.7 m., Depth 13.7 m. MLLW. 1 warehouse 13,935 sq.m., 2×40-ton IHI container cranes, 10.12 hectares paved, lighted, fenced, back-up storage. 80 Reefer container outlets (240-480 volts). Direct rail access to pier.

Terminal 7: Containers and General cargo. 4 berths, total length 823 m., width 41 m., depth 13.7 m. MLLW. 2 warehouses each 9,290 sq.m. 2×45-ton Whirley cranes, 1×40-ton IHI multipurpose crane, 1×50-ton Peiner multipurpose crane (Containers, dry bulk). 17 hectares paved, lighted' fenced, back-up storage. 54 Reefer container hook-ups (240–480 volts). Direct rail access to pier.

BRIDGES: The 11th Street Bridge: All ships are required to notify for opening 2 hours in advance. The Puyallup River Bridge on 11th Street has been deactivated. The Blair and Hylebos Bridges have no restrictions. Closed periods apply to the 11th Street Bridge and the hours are as follows: 0645 – 0745 hrs., 1530 – 1730 hrs.

STEVEDORES: Seattle Stevedoring Company, Jones-Washington Stevedore Company, Crescent Wharf and Warehouse Co., American President Lines Terminals Northwest.

Gang requirements must be made known to contracting stevedore prior to 1100 hrs. on day before the vessel plans to dock. (1030 hrs. on Saturdays for gangs on Saturday p.m., Sunday and Monday.)

Stowage of cargo for discharge or load determines the gang size requirements. Sufficient information for intelligent gang orders is a necessity – i.e. advance cargo plans, unusual size and/or weight, etc.

TANKERS: Loading/discharge lines 8 in. and 10 in. 150 ASA flanged connections. Slop discharge facilities not available. Fresh water available. Coast Guard regulations strictly enforced.

DENSITY: The average density in the port is 16.8 at 15° C.

FRESH WATER: Available. Delivers to vessel through portable meter hose.

FUEL: Available.

Grade	*Viscosity at 122°SSF*
Bunker "C"	165–175
PS–400	112–116
Bunker Special	50-60
PS–300	32–35

Advance notice required

FIRE PRECAUTIONS: Very strict precautions in force.

GANGWAY/DECK WATCHMEN: Watchmen required if detainees are aboard.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. In practice, however, the crew can perform this task while in transit.

CERTIFICATES:
Certificate of Registry.
Certificates for any previous U.S. tonnage tax payments within the past year.
International Load-line Certificate.
Safety Radio Certificate.
Deratisation Certificate.
Cargo Gear Inspection Certificate.
Certificate of Inspection (U.S. vessels).

CUSTOMS ALLOWANCE: Tobacco: Wine/Spirit: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

IDENTIFICATION CARDS: Required.

REPAIRS: The largest repair yard in Tacoma can haul out vessels up to 1,000 tons for all kinds of repairs, including electronics, welding, painting and machining; shafts up to 30 ft. in length are machined here. Another plant does shipbuilding exclusively, but will perform topside repairs if needed. Wreckage and salvage facilities are available. Larger vessels go to Seattle for dry-docking. Minor repairs and services for small craft are available at marinas on the City Waterway and the N.E. shore of Commencement Bay.

AIRPORT: Seattle – Tacoma International Airport is 16 miles North from Port and Tacoma Industrial Airport 8 miles West.

TIME: Local time reference is GMT minus 8 hours. In Summertime it is GMT minus 7, or Pacific Daylight Saving Time, started the last week-end in April and finished the last week-end in October.

HOLIDAYS: New Year's Day (January 1st) no work; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th) no work; Bloody Thursday (July 5th); no work; Labour Day (September 1st) no work; Columbus Day (Friday after Thanksgiving); Veterans' Day (November 11th); Thanksgiving Day (November 27th) no work; Christmas Day (December 25th) no work.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers:
Police 593-4911; Fire MA 7-0151; Ambulance 473-1611.

TELEPHONES: Pay telephones available at Piers 1, 2, 4, 7, Blair Terminal, Pierce County Terminal, Grain Docks 23 and 24. There is no charge for this service.

SHORE LEAVE: Allowed.

AUTHORITY: Manager, Terminal Division, Port of Tacoma.

AGENT: See "Seattle".

TAMPA, Florida: 27.57 N. 82.28 W. (See Plan Book)

DOCUMENTS:
Passports and Seamen's Books.
Vaccination Certificate for each Seaman.
Certified Crew List: must be on American form and certified by American Consular office at foreign country from which departed.
U.S. Customs requires Inward Foreign Manifest (original and 3 copies). This must describe cargo which is to be discharged this port and/or any other port in vessel's itinerary. It must show:
Vessel's name and flag.
Master's name.
Last foreign port of departure.
Net registered tons of vessel.
When and where vessel built.
Consigned to Agent.
Bill of Lading Number.
Marks and numbers (on cargo).
Complete description of merchandise.

Weight in kilos or pounds.
Port of loading.
Port of discharge.
Stores Lists (original and 3 copies).
Crew Curio List (original and 3 copies).
Narcotic List (original and 3 copies).
*Dangerous Cargo List (original and 3 copies).
*This should be filled out even if nothing dangerous aboard.

Health officials will board vessel first. Bills of Lading not needed for Customs purposes.

GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Eller & Co. Inc. (Port Authority Berths Nos. 209, 210, 211)	Harbor Boulevard, Holland Terminal	1,800 ft. Marginal Wharf	34ft.	Fork Lifts: 1×10 tons, 4×8 tons, 5×2.5 tons, 11×4 tons. Mobile shore cranes available 70–300 tons
Garrison Terminals Inc.	13th and Beatrice St.	1,759 ft. Marginal Wharf	30 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity. Bulk handling: 5 hoppers, clamshell buckets, shipside conveyor. Bagging: openmouth and valve baggers for bulk fertilizer materials.
Garrison West	Foot of Franklin St.	543 ft. Marginal Wharf	27 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity. Bulk handling: 5 hoppers, clamshell buckets, portable shipside conveyor. Stationary under hopper bulk receiving system.
Spassard L. Holland Terminal (Port Authority Berths Nos. 209, 210, 211)	Harbor Boulevard	1,800 ft. Marginal	34 ft.	Back land leased to Uiterwyk Cold Storage and Eller & Company with preferential berthing rights. The 100 ft. apron on all berths is public.
Spessard L. Holland Terminal (Port Authority Berth No. 202)	Harbor Boulevard	600 ft. Marginal Wharf	34 ft.	
Kreher Terminal Berths No. 223, 224	Carbide Avenue, Hookers Point	1,120 ft. Marginal Wharf	34 ft. (for 800 ft.) 14/16 ft. (for 320 ft.)	Back land leased to South State Terminals, Union Carbide and Standard Gypsum. Wharf apron and docking area is public and subject to preferential berthing rights of one tenant.
S.E.L. Maduro (Florida), Inc.	13th and York St.	1,200 ft. Marginal Wharf	30 ft.	All sizes fork lifts including specialized newsprint handling and 52,000 lb. capacity for handling of containers; mobile shore cranes available.
Metroport Terminals Berths 263, 264, 265, 266.	601 N. 13th Street	2,255 ft. Marginal Wharf 6 berths	30/27/25 ft.	Banana unloading conveyor system, 20 ton gasoline crane with 45–100 ft. boom, 4 lift trucks.
Southport Stevedores Inc. (Port Authority Berths Nos. 251, 252)	Foot of Grant St.	1,200 ft. Marginal Wharf	34 ft.	Cranes: 4×40 tons gantries Fork Lifts: up to 20,000 lb.
Tampa Import and Export Terminal	521 Ashley St.	960 ft. Marginal Wharf	29 ft. 06 in.	Cranes: 2×35 ton Spanner, 1×25 ton Lift Trucks: 4,000 tp 10,000 lb. capacity. Dry bulk cargo conveyor system
Uiterwyk Cold Storage Corp. (Port Authority Berths Nos. 209, 210, 211)	Harbor Boulevard	800 ft. Marginal Wharf	34 ft.	Fork Lifts

SPECIALISED GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Commercial Metals Transport Co.	West end of Port Sutton, east side of turning basin	530 ft. Marginal Wharf	30 ft.	Scrap metal loading facility. 4 diesel cranes 3×80 ft. boom, 1×70 ft. boom each equipped with electric magnets
Tampa Bay Terminal Inc.	Foot of Grant St.	700 ft. Marginal Wharf	34 ft.	Scrap metal loading facility. 2 diesel electric travelling, revolving, full-portal shipside cranes with 130 ft. boom and capacity of 40 tons. Equipped with electric magnets.
Cattle Loading Facility (Berth No. 232)	Lehman St. Hookers Point	245 ft. Timber Pier	22 ft.	Loading chutes, squeeze chutes, watering troughs. Partially covered timber frame holding pens with metal roof and concrete floor which will accommodate up to 800 head of cattle depending on their size. Centre of ship airspace clearance 68 ft. above MLW.
Westinghouse Electric Corp.	6001 S Westshore Boulevard	300 ft.×50 ft. barge slip	12 ft.	400–600 ton capacity bridge crane with 90 ft. span.

DRY BULK FACILITIES:

*Can load longer vessels by shifting during operation.

Shipmaster's Report: Bulk phosphates are loaded in Port Sutton (one berth) and in the East Bay (two berths: Rockport owned by SCL Seaboard Coast Line and Eastern Associated Terminal).

Loading rates: about 1,000 t.p.h. at Port Sutton;
about 1,200 t.p.h. at the two berths in East Bay area.

Trimming: the loading elevators are not equipped with trimming devices. Most cargoes can be trimmed by bulldozers. The bulldozer weighs 5 long tons, and is placed on board with ship's gear. The IMC elevators at Port Sutton and the SCL elevator (Rockport) use shore gear to place the bulldozer on board. A minimum of 8 to 7.5 ft. headroom under the coaming is required for bulldozer trimming.

DRY BULK FACILITIES: Others:

Operator	*Location*	*Depth*	*Berthing Space*	*Handling Equipment*	*Storage Area*	*Product Handled*
Cargill Inc. (Port Authority Berth No. 258)	North 19th St.	27 ft.	700 ft.	Marine leg for unloading and spout loader-rate of 600 tons (30,000 bushels) per hour	Capacity of elevator is 1,000,000 bushels; 8,000 ton bulk warehouse; 4,800 ton bulk warehouse.	Grain and dry bulk agriculture products
Detsco Terminals, Inc.	14th St. and Harbor	30 ft.	540 ft.	None.	Storage area leased out	Salt, cement and caustic soda
Florida Portland Cement Division	Hookers Point	34 ft.	820 ft.	Belt material handling system capable of receiving 4,000 short t.p.h. of aragonite or 1,500 short t.p.h. of gypsum 3 electric, travelling bridge cranes equipped with 2.5 and 3 cu. yd. grab buckets.	800×100 gypsum storage shed; 215,000 barrel holding tanks for fuel storage (for plant consumption) 220,000 ton capacity open storage.	Gypsum rock, aragonite
Ideal Basic Industries, Inc.	Port Sutton	34 ft.	1,038 ft.	2×8 in. pipelines to storage 4×12 in. pipelines to storage.	8 silos with 190,000 barrel capacity. 3 bins with 5,640 ton capacity.	Cement
I.S. Joseph, Co.	Port Tampa	34 ft.	700 ft.	Belt elevator from storage to loading spout. rate of discharge of 500 t.p.h. Direct transfer from rail cars to vessels at 200 net t.p.h.	Silo capacity of 10,000 net tons.	Citrus pellets and other dry bulk products.
National Gypsum Co.	Port Tampa	34 ft.	950 ft.	Receiving hopper and conveyor-unloading rate of 2,000 net t.p.h.	Open area approx. 10 acres.	Gypsum rock
Paktank Florida, Inc.	Pendola Pt., Port Sutton	34 ft.	700 ft.	Dock crane with 80 ft. boom with unloading rate of 400 t.p.h. Loading tower with rate of 1,200 t.p.h.	Building 125 ft.×700 ft. with storage capacity of 50,000 tons. 4 silos with 8,000 ton capacity.	Potash, phosphatic products.
Standard Gypsum Corp. (Port Authority Berth No. 223)	Hooker Point	33 ft.	800 ft.	Evacuator and conveyor system; radial stacker.	4.62 acres	Gypsum
Tampa Electric Co.	Big Bend	35 ft.	788 ft.	200 ft. high travelling tower-conveyors system with unloading rate of 4,000 t.p.h.	24 acres	Coal
Tampa Electric Co.	Port Sutton	30 ft.	450 ft.	2 electric travelling unloading towers equipped with straight-line boom, and receiving hopper-combined unloading capacity of 1,600 t.p.h.	Exact size unknown	Coal and slag

PILOTAGE: Vessel applies for Pilot through radio station WPD and through Agent. Telegraphic address for Pilot is: Tam-pilot. Advance notice is not necessary. However, U.S. Coast Guard requires a 24-hour notice of the vessel's ETA. VHF Channel in Tampa is Channel 12.

5 pilot boats – each are different. All 40-45 ft. motor launches flying "H" flag and carrying prescribed red and white pilot lights. No light or sound signals necessary by vessels requiring Pilots.

Normally pilot boat located between sea buoy and No. 2 Buoy in main channel. During bad weather they are located off lighthouse at Egmont Key. Anchorage within 1 mile area of sea-buoy.

ANCHORAGES: Vessels with good ground tackle can anchor anywhere outside Egmont Bar in depths of 35 to 50 ft. Inside anchorages Southward of Mullet Key in depths of 30 to 35 ft.; and S.W. of Gadsden Point in depths of 29 to 36 ft.

Explosives and quarantine anchorages East of Mullet Key and South of Interbay Peninsula.

(1) Explosives anchorage East of Mullet Key. A rectangular area in Tampa Bay, approximately 4,459 yd. long and 1,419 yd. wide, beginning at Lat. 27° 38′ 30″, Long. 82° 39′ 09″, and extending N.E. to Lat. 27° 39′ 48″, Long. 82° 37′ 15″; thence S.E. to Lat. 27° 39′ 17″, Long. 82° 36′ 46″; thence S.E. to Lat. 27° 37′ 52″, Long. 82° 38′ 38″; thence N.W. to point of beginning. Anchorage is used by vessels awaiting loading or unloading at Port Tampa where duration of anchorage will exceed 72 hours.

(2) Temporary explosives anchorage South of Interbay Peninsula. Beginning at a point bearing 107°, 1,750 yd. from Cut F Range Front Light; thence to a point bearing 125° 2,050 yd., from Cut F Range Front light; thence to a point bearing 180°, 1,725 yd., from Cut F Range Front Light; thence to a point bearing 222°, 2,180 yd., from Cut F Range Front Light; thence to a point bearing 251°, 1,540 yd., from Cut F Range Front Light; and thence to the point of beginning. Anchorage is used for vessels engaged in loading explosives when duration of the anchorage is less than 72 hours.

(3) Temporary explosives anchorage off Port Tampa. A circular area with a radius of 200 yd. with the point at Lat. 27° 50′ 22″, Long. 82° 34′ 15″.

(4) Quarantine anchorage. S.E. of the temporary explosives anchorage, beginning at a point bearing 97° true, 4,370 yd., from Cut F Range Front Light; thence to a point bearing 113° 30′, 5,370 yd., from Cut F Range Front Light; thence to a point bearing 161° 30′, 3,770 yd., from Cut F Range Front Light; thence to a point bearing 163° 30′ 2,070 yd., from Cut F Range Front Light; thence to the point of beginning.

RESTRICTIONS: Draft recommendation is 33 ft. 6 in. No tidal restrictions with exception of loaded vessels into Port Tampa.

Existing channels:

Name of Channel	*Width (ft.)*	*Length (naut. miles)*	*Depth MLW (ft.)*
Egmont Channel	600	3.9	36
Mullet Key Channel	500	2.9	34
Tampa Bay Channel Cuts A-F	400	13.6	34
Gadsden Point Cut	400	3.1	34
Hillsborough Bay Cut A, C & D	400	7.6	34
Seddon Channel	300	1.1	34
Garrison Channel	275	0.4	30
Ybor Channel	400	0.9	34
Sparkman Channel	400	1.2	34
East Bay Channel and Turning Basin	2,700	1.5	34
Port Tampa Channel	400	7.3	34
Port Sutton Channel	280	1.0	34
Alafia River Channel	200	3.4	30

MAX. SIZE: Max. draft 34 ft. MLW. No limit on length and breadth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Radio station "WPD" should be used by vessel to route ETA cables to Agents, receivers, etc. Station KUZ 383 on Channel 25 VHF, available for public messages.
TUGS: Positions are:

Main port area – right past Beacon No. 35
Port Sutton & East Bay – Beacon No. 29
Port Tampa – Cut "K"
East Tampa – Beacon No. 16

Tug's lines only.

Facilities available for smaller vessels.

Operator	*Depth*	*Berthing Space*	*Product Handled*
Bay Con Industries	9 ft.	685 ft.	Shell
International Salt Co.	10 ft.	170 ft.	Salt
Morton Salt Co.	14 ft.	600 ft.	Salt
Paktank Florida, Inc.	12 ft.	500 ft.	Grain fertiliser, materials, potash, caustic soda, salt.

BRIDGES: The Sunshine Skyway Bridge spans lower Tampa Bay. The twin central cantilevered span has a navigation clearance of 800 ft. and a maximum vertical clearance of 151 ft. at MLW.
STEVEDORES: Stevedoring gangs must be ordered approximately 24 hours in advance (before 1700 hrs on day before needed).
MEDICAL: Advance notice for medical attention not required, but is preferable. All U.S. ports require valid certificate of vaccination (renewable every 3 years) for smallpox.

Note that part of above terminals use same piers. Most terminals have residue discharge facilities.

DENSITY: Density is affected by local rains due to Hillsborough River. Seasonal variances too great to allow advance prediction.
FRESH WATER: Available all over port and delivered through hoses and meters. Rates of delivery various.
FUEL: All grades and types available, including all types of blended fuel and Bunker "C". 24 hour notice required. All types of lube-oil available with delivery in bulk or drums – 24 hours notice is required. Major oil companies (i.e. Shell, Amoco Oil, Texaco, Gulf, Chevron, etc.) represented in Tampa. Delivery ex pipe-line, barge or truck.
PRECAUTIONS: No specific precautions other than usual.
DEVELOPMENTS: The Tampa Port Authority has three new projects under construction: a roll-on/roll-off dock capable of handling the largest vessels in the trade; a liquid bulk dock to accommodate vessels up to 900 ft. in length with 43 ft. drafts; and a dry dock to accommodate vessels up to 900 ft. in length. All three facilities are scheduled for completion in late 1978.
Dredging operations are underway by: the U.S. Corps of Engineers to deepen the main harbour channels from 34 to 43 ft. Completion of the project is scheduled for 1982.
GANGWAY/DECK WATCHMEN: Watchmen not necessary, but available when required.
OPENING/CLOSING HATCHES: Longshoremen open and close hatches.
CERTIFICATES:

Documentation Papers.
Load-line Certificate.
Certificate of Safety at Sea (when carrying passengers).
Certificate of Safety Equipment.

CUSTOMS ALLOWANCE: Tobacco, 2 packs of cigarettes per day per man, wine and/or Spirit, no set amount. Each boarding officer has different views (i.e. German and Scandinavian vessels allowed 2 bottles of beer per day per man). Allowances made within reasonable bounds at Master's discretion subject to boarding officer's approval.
CARGO GEAR: No local special safety requirements. Longshoremen and U.S. Department of Labor requirements are uniform over the U.S.
IDENTIFICATION CARDS: Passports required.
CONSULS: The following countries are represented in Tampa:

Belgium
Colombia
Denmark
Ecuador
El Salvador
Finland
France
Germany
Honduras
Korea
Mexico
Nicaragua
Norway
Sweden
Turkey

REPAIRS: All types are possible.
DRY DOCKS: Graving dock: 525 ft. long on bottom × 80 ft. wide, and depth over keel blocks 16-18 ft. at MHW. New graving dock to be completed late 1978, 900 ft. long × 150 ft. wide (See "Developments"); Dry dock: 200 ft. long × 65 ft. wide there are 2 other dry docks besides those listed above.
REPATRIATION: No foreign crew pools in Tampa (located in New Orleans, San Francisco and New York). But crew changes can be made when Master radios requirements to Agent who arranges with local consul or through crew pool in nearest city named above for applicable country (if no consul is available in Tampa). American crew pools for all unions in Tampa.

Repatriation available at Tampa International Airport and is handled by consul or Master.
AIRPORT: Tampa International Airport served by regular airlines and located approximately 5 miles from main port area; 5 miles from Port Tampa and 16 miles from East Tampa.
TIME: Tampa normally on Eastern Standard time with Daylight Saving Time in effect from last Sunday in April to last Sunday in October.
HOLIDAYS: New Year's Day (January 1st); Jan. 15th (Martin Luther King's Birthday); Gasparilla Day (2nd Monday in February, local holiday); Lincoln's Birthday (February 12th); Washington's Birthday (3rd Monday in February); Good Friday; Memorial Day; Independence Day (July 4th); Labour Day (1st Monday in September); Columbus Day; Veterans Day; Election Day;Thanksgiving Day (last Thursday in November); Christmas Eve; Christmas (December 25th).

When any of these holidays fall on a Sunday, they will be observed on Monday following. Work on these holidays by special arrangement only.
POLICE/AMBULANCE/FIRE: Police 223-8521; Ambulance 223-1551; Fire 223-4211.
TELEPHONES: Installation of telephone aboard can be arranged.
SERVICES: Compass adjustments available; radio direction finder; radar repairs; tank cleaning.
SHORE LEAVE: Immigration authorities grant clearance after examination of passport or bona fide seaman's papers.
DELAYS: Delay can be expected in loading phosphate rock (1 or 2 days), and same delay applicable for berthing at elevators. No delays in general cargo loading or berthing and bunkering.
AUTHORITY: Tampa Port Authority.

TEXAS CITY, Texas: 29.22 N. 94.53 W. **(See Plan Book)**

DOCUMENTS, PILOTAGE, etc., refer to "Galveston".
RESTRICTIONS: Controlling depth in entrance channel 40 ft. Otherwise restricted by depth available at berth. Vessels enter day and night.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available if required.
BERTHING:

American Oil Tanker Docks	depth	36 ft.
Monsanto Tanker Dock	,,	36 ft.
Texas City Oil Docks	,,	36 ft.
Union Carbide Terminal	,,	34 ft.
Import Crude Terminals:		
Docks 40–41	depth	40 ft.
Arco Docks No. 11–12	,,	40 ft.*

*(Completion expected Spring 1979)
MEDICAL: All medical assistance available.
DENSITY: Brackish.
FRESH WATER: Available at all wharves except Union Carbide Terminal.
FUEL: Bunker C available to tankers loading/discharging. All grades available by barge from Houston.
GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.
CUSTOMS ALLOWANCE: Each man 300 cigarettes or 100 cigars or 1 lb. tobacco. 1 qt. wine/spirits.
CONSULS: See "Houston".
TIME: Central Standard Time. Daylight saving time effective from April to October.
SHORE LEAVE: No restrictions unless detained by Immigration.
SHIPMASTER'S REPORT: February, 1979.
Restrictions: Vessels on maximum draft must be clear of Texas City channel before dark. There is no sailing or berthing during darkness.

For large vessels it is necessary to ballast during discharge otherwise shore connections become too high.
VHF: Channel 13 from sea and Channel 14 for berthing.
Tugs: Usually 6 for vessels on maximum draft.
Tankers: Large tankers dock at Docks 40 & 41 usually starboard side to. On either dock it is not easy loading stores from the dock. 2×12 in. connections.
Consuls: British Consul at Houston.
Customs Allowances: All souvenirs to be collected (items intended as presents) and sealed.
Repatriation: As with all U.S. ports must make out Form I-408 – application to pay off or discharge alien crewman.
Airport: At Houston.
Telephone: Pay telephone at bottom of gangway.
General: Will require ship's gangway abaft of manifold if bottom of gangway is more than 115.5 ft. (35.20 m.) abaft after manifold with a freeboard of 23 ft. or more.
AUTHORITY: Texas City Terminal Railway Co.

TOLEDO, Ohio: 41.42 N. 83.28 W. **(See Plan Book)**

Refer to "St Lawrence Seaway" for important general information.
PILOTAGE: By Seaway Pilots.
RESTRICTIONS: Navigation season from mid-March to end-December, approx. The port is connected to Lake Erie by an entrance channel, depth 27 ft. Vessels size restricted by Seaway locks.
MAX. SIZE: 730 ft. length; 26 ft. draft. Height restriction of 108 ft. above water-line which applies to grain berths only.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required. Toledo Port can be contacted through Lorain, Ohio or Port Colborne, Ontario.
TUGS: Available. Not compulsory, but sometimes necessary in bad weather.
BERTHING:
C & O Railway Dock: 2,000 ft. long, 26 ft. depth alongside.
Lake Front Dock: 1,200 ft. long, 26 ft. depth alongside.
Interlake Steel Corporation: 23 ft. depth alongside.
Mid States Terminals: 27 ft. depth alongside.
Cargill, Inc. Elevator: 27 ft. depth alongside.
Port Authority Facility: 4,100 ft. long, 27 ft. depth alongside.
Anderson Elevator: 27 ft. depth alongside.
CARGO HANDLING FACILITIES: 3 grain elevators at Toledo load vessels at 50,000 b.p.h. There are 6 coal-loading machines, each of which can dump 1×100-ton car per minute, also 1 machine which dumps 2 cars simultaneously, for a max. of 6,000 t.p.h. There are 7 Hulett ore machines; unload lake vessels at a rate of 4,000 t.p.h. Bulk liquids handled include petroleum products, industrial molasses, palm kernel oil, liquid sugar, trichlorethylene and perchlorethylene.
CRANES: Located at Port Authority Facility No. 1 – electric gantry cranes 72.5 and 110 tons. Four 25-ton gantry cranes.

REPAIRS: Major repair facilities available.
DRY DOCKS: No. 1: 510 ft.×72 ft. 6 in.; No. 2: 641 ft.×78 ft.
DEVELOPMENTS: Major construction projects by the three riverfront grain operators will increase grain handling capacity from present 10.2 million bushels to over 18 million bushels by 1979. A new 6 million gallon facility for storage of liquid fertiliser is planned and an additional ship loading dock is under construction.
AUTHORITY: Toledo – Lucas County Port Authority.

VALDEZ, Alaska: 61.07 N. 146.21 W.
Also see "Valdez Marine Terminal".

Located at head of Valdez Arm in Prince William Sound.
APPROACHES: Via Prince William Sound to the Valdez pilot station.

DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilots board approx. 2 miles North of Busby Light.
MAX. SIZE: Harbour depth over 300 ft. Tides: diurnal range 12 ft. Also see "Berthing" and also see "Valdez Marine Terminal".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Excellent, close by dock. Bay is too deep.
CUSTOMS: Quarantine, local, Immigration and Customs from Anchorage.
TUGS: Limited availability.
BERTHING: 1. Valdez City Dock: 36 ft. MLLW. 600 ft. long by 40 ft. wide. 2 warehouses, 1 heated, 1 unheated. Stevedore provides equipment which includes fork-lifts and 2×100-ton mobile cranes and 1×150-ton mobile crane. Dock operated by North Star Stevedoring Co.
STEVEDORES: 3 gangs.
TANKERS: *Valdez Dock Co., Petroleum Dock:* Length 200 ft., width 40 ft., depth 36 ft. at MLLW.

Also see "Valdez Marine Terminal".
REPAIRS: Minor repairs only.
FRESH WATER: Available in temperate seasons.
FUEL: Not available.
MEDICAL: 150-bed mental patient hospital; 15 beds for local use; 1 doctor, 1 dentist regularly from Anchorage.
TRANSPORTATION: Air; highway to Fairbanks and Anchorage.

VALDEZ MARINE TERMINAL: 61.05 N. 146.24 W. (See Plan Book)

OPERATORS: Alyeska Pipeline Service Company.

The terminal does not provide any tug, launch or pilotage assistance for the berthing or unberthing of tankers calling at the terminal. These services, as well as any other tanker services, must be arranged separately by tanker owners.

LOCATION: The Trans-Alaska Pipeline Valdez Marine Terminal is situated on the Southern shore of Port Valdez.

Port Valdez is a natural deep-water fjord located at the N.E. part of Prince William Sound which provides access from the Gulf of Alaska. Port Valdez is about 12 miles long and 2.5 miles wide, is surrounded by steeply rising mountains, and remains ice free throughout the year. The approach to Port Valdez is by way of Valdez Arm, a deep-water channel with a minimum width of approximately 3,000 ft.

The overland approach to the site, which is close to the mouth of the Lowe river, is by road about 6 miles long connecting the terminal with the Richardson Highway. The town of Valdez is 14 miles from the terminal by this route. The distance by boat across to Port Valdez is approx. 2.5 miles.

The terminal operates 24 hours per day, 7 days per week, throughout the year.

The administrative offices will normally be open between 0800 and 1700 hrs., Monday through Friday. The office telephone number is (907) 835–2261.

DOCUMENTS:

Certificate of Financial Responsibility.
SOLAS Safety Equipment.
SOLAS Safety Construction, or for U.S. documented vessels: U.S. Coast Guard Certificate of Inspection.
SOLAS Radiotelegraphy Certificate.
Crew Lists.
De-rat Certificate.
Clearance from Last Port.

PILOTAGE: The Pilot boards off Cape Hinchinbrook. Arrangements to be made by vessel's Agent.

ARRIVAL ADVICE: Masters of vessels bound for the terminal must advise the terminal as follows:

Last Port ETA: Tankers en route to the terminal, upon departure from their last port of call prior to Valdez, will send a telegram or telex to Alyeska Pipeline Service Company, Valdez, Alaska, Telex No. 090-35-469 (Answerback: Alyeska Valz) advising the estimated Alaskan local time and date of arrival.

72-hour ETA: Not less than 72 hours, unless transit time is less than 72 hours, prior to arrival at Cape Hinchinbrook, tankers will send a telex or telegram to Alyeska Pipeline Service Company providing the terminal with the following information:

a. ETA at Cape Hinchinbrook.
b. Position/course/speed.
c. Estimated fore and aft draft upon arrival.
d. Quantity of ballast to be pumped ashore and grade of last cargo.
e. Quantity of oil to be loaded.
f. Distance from the bow to cargo manifolds.
g. Size, number and type of cargo connections.
} At first call to Terminal. Not necessary on subsequent voyages.
h. Amount of provisions and stores to be loaded.

Final ETA: Tankers will send a final ETA, 24 hours in advance of their arrival. This 24 hour ETA shall be as accurate as possible and tankers will notify the terminal whenever the arrival time changes by more than 3 hours.

Notice of Arrival: After entering the Coast Guard's Prince William Sound Vessel Traffic Service, vessels ready to commence loading or deballasting should give immediate notice to the terminal. This notice is extremely important as it can affect berthing priority.

Coast Guard Notification: Terminal will advise USCG at Valdez of all ETA's received.

AMVER Participation: The notice of arrival requirement to be given to the U.S. Coast Guard Captain of the Port in Valdez, Alaska, can be met if vessels participate in the Automated Mutual-assistance Vessel Rescue System (AMVER). Participation in AMVER will also make the Coast Guard's Prince William Sound Vessel Traffic Service aware of the tankers that will be entering the service.

Initial Radio Contact: Ship-to-shore radio telephone calls can be made to the terminal, (907)-835-2261, 24 hours a day by normal commercial Channels.

RADIO: All times are GMT – following information produced as a "guide" and subject to change.

Weather Broadcasts:

Broadcast Notice to Mariners: Broadcast Notice to Mariners are disseminated on the following schedules:

Safety Broadcast:

(1) RADSTA Ketchikan (NMJ). (a) Code (CW) — Last 15 seconds of 1st Silent Period after receipt, next on operator schedule and repeat text only on next scheduled broadcast unless message cancelled. Additional broadcasts as directed, preliminary call on 500 kHz, broadcast on 416 kHz.

(2) COMMSTA Kodiak (NOJ). Voice (AM) — Upon receipt, repeat text only on next scheduled broadcast. Additional broadcasts made as directed with preliminary call on 2182 kHz, broadcast on 2670 kHz.

(3) RADSTA Adak (NOX). Code (CW) — Last 15 seconds of 1st Silent Period after receipt, next on operator schedule and repeat text only on next schedule broadcast unless message cancelled. Additional broadcasts as directed, preliminary call on 500 kHz, broadcast on 450 kHz.

(4) RCA — Alascom Ketchikan (WGG 58). Voice (AM) — On 2400 kHz upon receipt and as directed in broadcast instructions.

(5) RCA — Alascom Ketchikan (WGG 56). Voice (AM) — On 2400 kHz upon receipt and as directed in broadcast instructions.

Note: Watch hours (GMT) for single operator ships:

West Coast	*Central Pacific*
0000–0200 hrs.	0000–0200 hrs.
0400–0600 hrs.	0400–0600 hrs.
1600–1800 hrs.	0800–1000 hrs.
2000–2200 hrs.	2000–2200 hrs.

Scheduled Broadcasts: (Routine Precedence)

(1) RADSTA Ketchikan (NMJ)
(a) Code (CW) — 416 kHz — 0530Z and 1730Z
(b) Voice (AM) — 2670 kHz — 0630Z and 1800Z
(2) COMMSTA Kodiak (NOJ).
(a) Code (CW) — 2670 kHz — 0630Z and 1930Z
(b) Voice (AM) — 2670 kHz — 0445Z and 1645Z
(3) RADSTA Adak (NOX). Code (CW) — 450 kHz — 0430Z and 2130Z
(4) RCA — Alascom Juneau (WGG 58). Voice (AM) — 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).
(5) RCA — Alascom Ketchikan (WGG 56). Voice (AM) — 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).

TUGS: Three 5,750 h.p., twin-screw tugs and two 300 h.p., single-screw mooring launches are on standby at the terminal to provide oil spill containment, cleanup and contingency services and fire fighting services as required by the terminal. The tugs are equipped with telescoping fire monitors and will be capable of providing 3,500 g.p.m. of foam or firewater at 150 p.s.i.g. at an elevation 70 ft. above the tug's waterline. The tugs are equipped with VHF-FM radio-telephone communication equipment. Should tankers desire to contact the tugs, the tugs may be reached by calling on Channel 16 (156.80–mHz).

The tugs and mooring launches are available to provide berthing and unberthing services to tankers calling at the terminal.

VHF: The Alyeska Pipeline Service Company operates a VHF-FM base station in Valdez, Alaska under the call sign "WAB-952". This base station is maintained for the purpose of transacting company business with either inbound or outbound vessels and is open 24 hours a day. The official language for all communications shall be English.

Channel	Frequency	Use	At
10	156.500–mHz	Intership and Ship to Coast Guard	A–B–C
16	156.800–mHz	Distress – Safety and Calling	A–B–C

A – Contingency Management Centre
B – Oil Contingency Warehouse
C – Operational Control Centre

The VHF-FM marine radio system utilized by the terminal is compatible with the Prince William Sound Vessel Traffic Service which is operated by the U.S. Coast Guard in Valdez, Alaska. The USCG Vessel Traffic Service will have VHF–FM radio-telephone coverage extending beyond Cape Hinchinbrook and including Prince William Sound, Valdez Arm, and Port Valdez. The tugs available at the terminal will also be equipped with VHF–FM transceivers.

TANKER REQUIREMENTS: *General:* Certain requirements of governmental agencies are in effect at the terminal in order to minimize the chances for a pollution incident. These requirements apply to all tankers calling at the terminal.

Operations at the terminal are primarily aimed toward the safe loading of tankers and the prevention of collisions and groundings of vessels that call at the terminal. These aims will be met by insisting upon and utilizing conventionally constructed tank vessels manned by skilled crews, use of positive vessel traffic control within Prince William Sound and Port Valdez, and use of all traffic advisory and communications services in West Coast ports. The purpose of the following requirements for tankers calling at the terminal is to materially enhance tanker loading and discharge operations and to increase the safety of navigation so that the danger of pollution from oil spills is substantially reduced.

Safe Navigation: Tankers will observe the rules and directions issued by the U.S. Coast Guard as operator of the Prince William Sound Vessel Traffic Service. These rules and directions will pertain to communications check points, ETA's, traffic lane separation, anchorages, one-way traffic, speed, etc.

In addition to the normal instruments used in celestial navigation and piloting (sextant, pelorus, etc.), the following electronic devices must be aboard and in good working order:

a. Fathometer/Depth Sounder.
b. Loran C Receiver.
c. Two Independent Radar Systems.
d. Radio Direction Finder.

All vessels must have a qualified Pilot aboard for the transit of Prince William Sound and Port Valdez.

Communications: Tankers calling at the terminal will be required to have the following communications equipment aboard and in good operating condition:

a. VHF–FM radio-telephone with sufficient Channels and speakers to comply with the Prince William Sound Vessel Traffic Service operating rules and the Bridge-to-Bridge Radiotelephone Act.
b. Radiotelegraph.
c. Portable UHF transceiver will be supplied by the terminal.
d. Single sideband radio.

The portable UHF transceiver shall have at least five Channels which are tuned to the berth frequencies listed.

Additional Equipment: Tankers calling at the terminal will be required to have the following additional equipment:

a. Tankers must carry standard 6 in. hose sufficient to make at least 50 ft. in length for emergency lightering purposes.

b. Accommodation ladders and Jacob's ladders must be of sufficient integrity and free from ice and snow to permit safe embarking and disembarking by the Pilot.

c. Mooring lines must be of sufficient size, strength, and quantity to permit safe mooring of the vessel.

d. Manifold reducers, connectors, and extensions must be made of steel. Cast iron reducers will not be permitted.

e. Tankers which call at the terminal will be required to retain all solid waste refuse aboard the vessel, or use a suitable sewage treatment plant before discharge.

f. All ullage caps will remain closed during loading except during gauging or sampling.

Operational Requirements: The following procedural and operational requirements are listed in order to make tanker Owners and Masters aware of some additional safety and anti-pollution measures in effect at the terminal. These requirements will be restated in the sections pertaining to the pre-loading inspection and cargo loading.

a. No repairs to radars shall be made while a vessel is moored to the loading berth unless authorized by the Terminal Marine Supervisor.

b. The tanker's main CW wireless set must be de-energized and switched off while alongside the loading berth.

c. Tank tops shall remain closed during loading operations. Petroleum vapours shall be vented through mast risers or stand pipes at an appropriate height above the main deck.

d. Ship's crew will be responsible for connecting and disconnecting loading arms to and from the vessel's cargo transfer manifold. Assurance that the arms are secured properly without damage shall be observed during pre-loading inspection. However, as a convenience the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection.

e. All sea valves connected to the cargo piping system shall be sealed in the closed position prior to loading oil.

f. Prior to commencement of loading operations, a joint inspection of the vessel and a pre-transfer conference will be held by the Terminal Marine Supervisor and the tanker officer in charge.

g. No repairs that would result in immobilization of the vessel shall be carried out while alongside of the loading berths unless the Terminal Marine Supervisor specifically authorizes such work.

BERTHING: *Berth Priority:* Berth priority and berthing order will be determined by the Terminal Marine Superintendent who will use the general guideline of assigning tankers and berths in the order by which tankers enter the Prince William Sound Vessel Traffic Service and are in all respects ready to discharge ballast or load.

Procedures: Tugs wil be dispatched by the Marine Shift Supervisor to meet inbound tankers and to assist in berthing at the nominated berth. The Master shall remain solely reponsible, on behalf of his owners, for the safety and the proper navigation of his vessel. Manoeuvring power must be available on the main engines during berthing operations. The positioning of the tanker's loading manifold in relation to the metal loading arms has to be carried out to a proper alignment, as required by the berth operator.

Maximum Allowable Berthing Velocities: The following table gives the designed maximum allowable berthing velocities for Berth Nos. 1, 3, 4, and 5. The velocities are given in inches per second for the various size tankers in the 40% ballast condition:

	Berth No. 1	Berth Nos. 3, 4 and 5
85,000 d.w.t.	9 in./sec.	12 in./sec.
120,000 d.w.t.	8 in./sec.	11 in./sec.
265,000 d.w.t.	—	7 in./sec.

Note:
(a) 1 knot=20.2 in./sec.
(b) Velocities are given for a line normal (perpendicular) to the axis of the dock or the berthing dolphins.

Mooring Hooks and Mooring Capstans: Each berthing dolphin and each mooring dolphin will be equipped with a mooring capstan and either 2 or 3 quick-release mooring hooks. Berthing dolphins will have double quick-release hooks, and the mooring dolphins will have triple hooks.

The recommended mooring line arrangement diagrams included in the "Plan Book" show the location of these double and triple hooks. Since Berth No. 1 has no berthing dolphins, the 4 double quick-release hooks are located on the loading dock.

These mooring hooks are designed to service 1 mooring line per hook. Thus, no more than 3 lines should be led to any mooring dolphin nor should more than 2 lines be led to any berthing dolphin. These mooring hooks may be released either locally or by remote control from the berth operator's control position.

Each mooring capstan will be mounted on, and form an integral part of, the associated double or triple quick-release mooring hook. This will provide a mooring capstan to assist in securing mooring lines at every berthing dolphin, mooring dolphin, and on the floating berth loading dock.

These mooring capstans are designed to give a minimum running pull of 2,000 kg. (4400 lb.) at a rate of 30 m. (98.4 ft.) per minute. The capstan will be positioned at a height sufficient to prevent mooring lines and messengers from becoming snarled on the quick-release hooks.

Mooring launches will be used to assist the tanker in running mooring lines to the mooring dolphins at each berth.

The terminal will provide suitable messengers for heaving in mooring lines from the launches.

Mooring Lines: Mooring arrangements shall be satisfactory to the Marine Superintendent. All critical moorings shall be of similar size and elasticity. Ropes of different material from those used to moor the ship may be used for positioning the vessel but shall not count as part of the final moorings. It is required that in ships of 90,000 d.w.t. and greater all final moorings shall be wire rope. Nylon tails may be used if fitted to all moorings. Ships should be outfitted with sufficient moorings of similar material for normal moorings. Ropes of different material may be used in emergency.

Moorings While Alongside Berth: Tankers must at all times remain adequately secured alongside the berth. Moorings must be kept at an even tension, avoiding a slack line or varying tensioning situation. Should such a situation arise and not be immediately rectified by the ship's crew after communication with the deck officer, the berth operator will suspend any transfer operation. All vessels fitted with tension winches should apply brakes once the tanker is moored and shall not leave winches in the self-tensioning position.

Emergency Towing Wires: While at a loading berth, tankers will provide emergency towing wires positioned at both the offshore bow and stern. The wires shall be in good condition, have an eye in each end, and be of adequate strength to move the vessel off the dock. The outboard eye shall be maintained at water level, and slack aboard ship shall be secured with small pieces of fibre line.

Mooring Line Arrangement Diagrams: (See "Plan Book"). The recommended mooring line arrangement diagrams are provided in the "Plan Book" as guidelines to acquaint the tanker Master with the general mooring line arrangement for the loading berths at the terminal. These arrangements are indicative of the minimum suggested number of lines and do not preclude the Master from using additional lines.

BERTHING FACILITIES: The major ship loading facilities include four independent loading berths, numbered 1, 3, 4 and 5. Berth No. 1 is a floating berth whereas Berth Nos. 3, 4 and 5 are fixed structures.

	Berth No. 1	Berth No. 3	Berth No. 4	Berth No. 5
	(1)	(1) (2)	(1) (2)	(1) (2)
Vessel Size (Design) d.w.t.	16,000 – 120,000	16,000 250,000	16,000 – 265,000	16,000 – 265,000
Type of Berth	Floating dock	Fixed loading platform	Fixed loading platform	Fixed loading platform
Deck Level of Berth above MLLW	32 ft. 8 in.	36 ft. 7 in.	36 ft. 7 in.	36 ft. 7 in.
Depth Alongside at MLLW (ft.)	160	75 to 87	75	75
Loading Arms (Number × Size)	4 × 12 in.	4 × 16 in.	4 × 16 in.	4 × 16 in.
Max. rate Per Loading Arm (bbls.p.h.)	20,000	27,500	27,500	27,500
Max. Design Flow Rate (per berth) (bbls.p.h.)	80,000	110,000	110,000	110,000
Loading Arm Spacing on Operating Dock (ft.)	11	11	11	11
Maximum Ship Manifold Pressure	Pressure alarm points will be set, based upon information given by ship's officers.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Emergency Shutdown	Can be initiated by berth operator or by OCC shutdown complete within 6.5 seconds after initiation.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Access to Ship	42 ft. aluminium gangway	49 ft. 6 in. aluminium gangway	49 ft. 6 in. aluminium gangway	49 ft. 6 in. aluminium gangway
No. of Mooring Dolphins	4	4	4	4
No. of Berthing Dolphins	0	4	4	4
Mooring Hooks (One line per hook)	One triple hook per mooring dolphin Four double hooks on the operating dock	One triple hook per mooring dolphin One double hook per berthing dolphin	One triple hook per mooring dolphin One double hook per berthing dolphin	One triple hook per mooring dolphin One double hook per berthing dolphin
Potable Water	None	None	None	None
Bunker Facilities	None	None	None	None
Public Telephone	Available ashore in vicinity of berth	See Berth No. 1	—	See Berth No. 1
Minimum Ship Manifold Spacing 1	—	—	—	—
Minimum Ship Manifold Spacing 2	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Minimum Ship Manifold Spacing 3	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Minimum Ship Manifold Spacing 4	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Quick Disconnect Coupling (QDC) Size (in.)	12	16	16	16
Manifold Size Range Acceptable to QDC (in.)	10 to 16	12 to 16	12 to 16	12 to 16

Note: (1) Although all berths are designed to handle vessels in the 16,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 10 in. in diameter. Normally, vessels less than 45,000 d.w.t. will be handled at Berth No. 1.

(2) Because of mooring dolphin limitations, vessels of more than 180,000 d.w.t. would be acceptable only if their deck machinery mooring leads allowed an efficient bow and stern mooring line pattern. In addition to this requirement, distance from bow to manifold and prevailing weather conditions would have to be considered before berthing of such vessels would be authorized.

PRE-LOADING INSPECTION: *Pre-transfer conference and joint safety inspection:* Prior to the discharging of ballast from cargo tanks or loading of oil, a pre-transfer conference and a joint safety inspection will be conducted by the Terminal Marine Supervisor and a responsible deck officer aboard the tanker who will be in charge of bulk liquid transfers aboard the tanker.

The purpose of the pre-transfer conference and the joint safety inspection is to insure that both the terminal and the tanker are suitable and ready for safe loading and handling of oil.

The checklist is designed to meet the following requirements:

a. Section 4.4 of the International Oil Tanker and Terminal Safety Guide which relates to the agreed procedures and safety checks prior to the commencement of cargo loading.

b. Title 46, U.S. Code of Federal Regulations, Section 35.35-30 relating to a Declaration of Inspection for Tank Vessels.

c. Title 33, U.S. Code of Federal Regulations, Section 156.150, relating to a Declaration of Inspection prior to the transfer of bulk liquid cargo from a shore facility to a large vessel.

The checklist is to be taken aboard the tanker by the Terminal Marine Supervisor and shall be used during the pre-transfer conference and the joint safety inspection of the tank vessel to insure compliance with applicable regulations and safety standards. Columns are provided on the checklist for the Terminal Marine Supervisor and the tanker person-in-charge to initial, indicating that the requirements have been met. The original of the checklist shall remain aboard the tanker, and a copy shall be returned to the Terminal Marine Supervisor for subsequent delivery to the berth operator.

Terminal personnel, after giving due notice to the responsible deck officer, are authorized to suspend oil transfer operations if any of the safety rules listed or on the checklist are not observed, or if any other danger is believed to exist.

The Master of the tanker or his representative has the right to shut down loading operations in the event he feels shore operations are unsafe, provided he gives adequate prior notice to the Terminal Berth Operator and Marine Supervisor.

During the pre-transfer conference, the Terminal Marine Supervisor shall provide the responsible ship's officer with a printed sheet detailing description and location of the fire-fighting system and the other emergency systems at the terminal in general and at the berth to which the tanker is moored in particular. The Terminal Marine Supervisor shall also advise the vessel if any unusual or dangerous weather conditions are forecast or expected.

As the shifts on the berth change, the relieving Terminal Marine Supervisor and berth operator shall assure themselves that all conditions pertinent to their responsibilities are as previously agreed to, and shall sign the copy of the Declaration of Inspection. The relieving officer aboard the tanker shall assure himself that the original conditions still exist and shall sign the original of the Declaration of Inspection aboard the tanker. These relieving personnel will then become the person-in-charge of the transfer operation for the terminal and the tanker respectively.

BALLAST: *Ballast Quantities:* The terminal is to be informed of the approximate quantities of segregated clean and dirty ballast in the Master's pre-arrival message. This message should also state where the ballast was shipped and the grade of last cargo.

Ballast Reception Facilities: The terminal facilities will include three 430,000-barrel ballast reception tanks. Discharge of dirty ballast will be by way of the four 12 in. loading arms (Chiksans) on Berth No. 1 and the four 16 in. loading arms on Berth Nos. 3, 4 and 5. These loading arms connect to 20 in. lines at the berths and lead into a 42 in. line connecting each berth to the ballast reception tanks. Although the shore lines are insulated, they are not heat traced and there are no booster pumps to assist in the discharge of dirty ballast.

No. 5 berth is situated approx. 1.25 miles from the reception tanks and has a possible head of 150 ft.

In the event of any stripping problems, it is recommended that tanks containing unpumpable ballast be stripped internally to the slop tank and that the Load-on-top procedures be adopted.

Segregated Ballast: Only segregated ballast will be permitted to be discharged overboard. Segregated ballast is defined as ballast water that is introduced into a tank which is completely separated from the cargo oil and the oil fuel system and which is permanently allocated to the carriage of ballast. The deck log book must record all times of ballast discharge and when pumps are started or stopped. This log must also indicate whether or not the segregated ballast is being dropped in the initial stages to sea level. A close watch must be maintained on the overside discharge, with a deck floodlight or portable explosion-proof light being trained on the discharge during hours of darkness. If there are any indications of discolouration or sheen, discharge must be suspended and an investigation must be carried out. If there is any doubt as to the quality of the segregated ballast, all discharge will be made into the shore reception facilities.

Dirty Ballast: All ballast contained in any compartment or tank used for the carriage of oil will be classed as dirty no matter how clean the ballast may appear to be. No ballast carried in cargo tanks may be discharged at sea or in port.

After the connection of the loading arms has been completed and the suitable valves between the arms and the ballast reception have been opened, permission to commence discharge will be given to the responsible tanker officer by the berth operator who will have received approval from the Operations Control Centre (OCC).

Contact between the tanker and the terminal will be by means of the UHF radio that will be placed on board by the Pilot. As during all transfer operations, there will be a continuous watch near the ship's manifold. In the event of an emergency on the berth, pressing of the emergency alarm will activate the valve closing mechanism.

On hearing this signal, the Crew member at the manifold must stop the ship's ballast pumps to avoid damage by pumping against a closed valve system ashore. (See Emergency Procedures.) On commencing discharge of dirty ballast and at frequent intervals during the discharge, a watch will be kept on the area around the sea valves even though the sea valves have been inspected during the initial safety checks and a seal has been placed on them by the inspecting Terminal Marine Supervisor. Any indications of any oily sheen will necessitate a shutdown of the discharge pumps and an investigation to be carried out before any further ballast can be discharged. Thirty minutes before completion of discharge, the responsible tanker officer will inform the berth operator who will in turn advise the OCC and the duty Terminal Marine Supervisor.

On completion of the discharge and after pumps have been stopped, the loading arm(s) used for dirty ballast discharge must be drained back into the slop tank. On vessels with an inert gas system, gauging will be taken by way of the deck purge pipes to determine that tanks are empty. It is not intended that vessels will depressure cargo tanks for visual inspections, nor should tank lids be opened on any compartment that is not gas free.

All safety regulations applicable during the loading of oil will also apply during the discharge of ballast.

Governmental Ballast Discharge Requirements:

State of Alaska: The State of Alaska requires that the Master of a vessel scheduled to take on any petroleum product or cargo, complete and sign the State of Alaska Department of Environmental Conservation Ballast Water Discharge Certificate Affidavit. To support this affidavit, the Master must be prepared to produce both deck and engine room log books and a legible copy of that portion of the Oil Record Book relevant to the sea passage from last discharge port to the terminal.

Federal Requirements: Prior to loading oil on any vessel, the terminal is required by the United States Department of the Interior to obtain from the Master of the vessel a legible copy of that part of the Oil Record Book that pertains to the voyage of the vessel to the terminal from the vessel's last oil discharge port. This legible copy shall be certified under oath by the Master as being true and correct. If the vessel is not required to maintain an Oil Record Book or similar records, the Master of the vessel is required to provide the terminal with an affidavit, duly sworn to and signed, stating any and all facts bearing upon any discharge of oil or oily water from the vessel during its voyage to the terminal from its last oil discharge port.

Should the Master be unable to comply with the preceding requirement or if it appears from the Oil Record Book or other documentation that a vessel has discharged oil or oily water during its voyage to the terminal, the terminal is required to promptly notify the Department of the Interior's representative, the Authorized Officer. Tankers discharging ballast water or other oily mixtures may be subject to penalties.

OIL CHARACTERISTICS: The predominent oil to be available at the terminal is currently North Slope crude oil. The following preliminary characteristics of North Slope crude oil are given to acquaint the Master and the cargo officers of tankers that will call at the terminal with the general properties of the cargo they will load.

Specific Gravity: 0.888 at 60° F.

API Gravity: 27.8° API.

Pour Point: + 15° F.

Viscosity: 73.5 SSU at 100° F., 169 SSU at 60° F.

Reid Vapour Pressure: Range of likely crude oil vapour pressures will be added, as pumpability is related to vapour pressure.

Sulphur Content: 0.94 per cent by weight.

Waxing: 85-117° F. (begins to precipitate). 50-55° F. (bulk of wax begins to come out of solution).

Mercaptan Sulphur: approx. 20 parts per million.

Loading temperature: approx. 117° F.

Dissolved H_2S: less than 0.2 parts per million.

LOADING FACILITIES: *General:* All loading operations will be accomplished in accordance with the joint inspection pre-transfer conference. Loading operations cannot commence until the vessel has complied with all State of Alaska and Federal Requirements and all required documentation has been provided.

Crew Responsibilities: Ship's crews will be responsible for handling the loading arms on board the tanker, furnishing and making the adaptor connections, removing blind flanges, and guiding the loading arms (Chiksans) to the appropriate manifold connections. However, as a convenience, the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection. The Chiksan loading arms and couplings are hydraulically controlled by the berth operator who will be in constant voice communication with the individual responsible for the connection by means of the UHF portable radio that will be supplied to all vessels by the docking pilot.

If required, the terminal will supply 8 in. to 10 in. reducers at Berth No. 1 and 10 in. to 12 in. at Berths Nos. 3, 4 and 5.

Checklist Requirements: After the Terminal Marine Supervisor is satisfied that all the safety requirements have been complied with, permission will be given to commence loading. All operations in connection with starting of loading, switching of tanks, and topping off will be the responsibility of the responsible ship's officers.

Before the maximum pressure or loading rates agreed to at the pre-transfer conference are reached, slow loading will be started and the responsible ship's officer will ensure that the cargo is flowing to designated tanks, thus ensuring that all block valves separating lines are open. On completion of this check and after advising the berth operator, the pressure/rate will be increased to the maximum previously agreed by the Master, or the officer in charge.

A responsible member of the crew will remain near the manifold within sight of the berth operator. This is in addition to the officer on cargo watch who, at frequent intervals, will check the state of loading with the berth operator by means of the UHF radio. This officer will also advise the berth operator when changes in the loading rate are required.

The rate of flow into the tanker can be observed on the large digital readout situated by the berth operator's control position.

Loading Suspension: Terminal: Terminal personnel will suspend loading operations if any of the safety rules are not followed, or if terminal personnel supervising loading operations believe any other danger exists, providing adequate notice is given to the responsible ship's officer.

Tanker: The master is required to shut down loading if he feels that shore operations are unsafe, provided adequate advance notice is given to berth personnel.

Emergency Shutdown: In the event of an emergency (See "Emergency Procedures") the following types of shutdown could occur:

(1) "Dangerous" shutdown.
  (a) All berth block valves close.
  (b) Metering upstream block valves close.
  (c) Berth control valves close – one for each loading arm (in 5, 5.5, 6.0, and 6.5 seconds, respectively, to prevent surge to line).
(2) Fire shutdown
  (a) The preceding valve closures plus fire alarm and start fire pumps.
(3) Emergency shutdown, one per arm, closes control valve only.
(4) Low vapour pressure on any crude tank – initiates (1) preceding.

Pushbuttons for (1) preceding are located in berth area plus one on berth operator's alarm panel.

Pushbuttons for (2) 1 on roadway; 1 on roadway at land; 1 in Power Distribution Cabinet (PDC); 1 in Berth Operator Control (BOC) alarm panel; 1 in loading arm area.

Pushbutton for (3) 1 local at each valve.

Topping Off: Near the end of loading when topping off, the responsible ship's officer will request the gradual reduction of loading rate for topping off operations. This reduction will be achieved by the berth operator slowly closing the berth loading valves. The berth operator will progressively reduce the opening of the berth control valves and will take loading arms out of service, until the point when all berth control valves and block valves are finally closed, when advised by the ship's officer "Shut Down" or "Finished Loading". The loading arms will then be drained into a ship's tank.

Disconnecting: On being satisfied that loading arms and ship's manifold are empty, the order will be given from the responsible ship's officer to the berth operator to uncouple the quick release couplings.

During the period of disconnecting, the USCG Vessel Traffic control Centre at Valdez will have been advised. Tugs will be on standby, and providing that there are no other ship movements that would interfere with sailing, the "Early Departure System" will be carried out. The actual Bill of Lading figures will be sent to the master by W/T or Telex after departure.

COMPLETION/DEPARTURE PROCEDURE: *Topping Off:* As the tanker begins the topping off stage, the responsible ship's officer shall notify the berth operator who will in turn keep the OCC informed as the cargo loading rate is reduced. When the ship's officer estimates approximately one hour remains in the loading process, he shall notify the berth operator.

Tug Assistance: After being notified by the tanker that one hour remains in the loading sequence, the berth operator shall notify the OCC and the Terminal Marine Supervisor. The OCC shall continue to monitor the topping off process and the Terminal Marine Supervisor shall place the vessel's pre-arranged tugs on standby.

The tugs shall be alongside the vessel after all loading arms have been disconnected and before any mooring lines are let go.

U.S. Coastguard Vessel Traffic Service: The departure of tankers from the terminal shall be in accordance with the published standard operating procedures for the Prince William Sound Vessel Traffic Service. The Coastguard Operations Centre located in Valdez shall be the directing authority for the operation of the vessel traffic service. The Terminal Marine Supervisor will notify the USCG-VTS one hour prior to the completion of loading and again when loading is complete. When the Terminal Marine Supervisor notifies the USCG-VTS that loading is complete, he will verify the tanker's status to enter the Vessel Traffic Service and will check on any inbound vessel traffic.

SAFETY: After the tanker is secured, the Terminal Marine Supervisor will board the tanker to contact the Master or his representative to:

- provide information on terminal safety regulations.
- agree on designated smoking areas
- advise ship's personnel on "Work Permit" and "Hot Work Permit" procedures.
- present ship/shore Safety Check List.
- present printed sheet describing terminal emergency procedures and fire fighting capabilities.

The following are **some** of the safety requirements.

Warning Signs, Lights, and Signals – Upon arrival at the terminal, a tanker shall display the following notice at the gangway:

WARNING
NO OPEN LIGHTS
NO SMOKING
NO VISITORS

During transfer of oil, and when in the non-gas free condition a red signal (flag by day and electric lantern at night) shall be displayed so that it is visible from all sides.

Blowing tubes – Funnel uptakes and boiler tubes will not be blown while a tanker is berthed at the terminal.

Use of Tools – No chipping or other operation likely to produce sparks will be allowed in any designated hazardous area. The Terminal Marine Supervisor and the responsible ship's officer shall both be satisfied that there is no such activity on the vessel or on the facility.

Flashlights, Hand Torches, Lanterns – Only self-contained battery powered flashlights, hand torches, lamps and lanterns, approved by USCG will be permitted to be used aboard the vessel or on the berths.

Main Engine – While berthed at the terminal, the tanker's main engines, steering machinery, and other essential manoeuvring equipment shall be maintained on standby status to permit the tanker to move from the berth on short notice.

Communications Equipment – A tanker's main transmitter shall be turned off and the main transmitting aerials shall be grounded whenever a tanker is alongside a loading berth at the terminal.

VHF-FM radiotelephone equipment, both portable and fixed, may be used as long as the equipment is permanently installed or intrinsically safe, conforms to FCC marine requirements, USCG requirements, and operates with a power and output of 1 watt or less.

The preceding requirements do not mean that essential servicing of ship's radio equipment cannot take place while alongside a berth. However, suitable arrangements for insuring safety during this work shall be made between the tanker and the terminal, including the securing of an appropriate work permit.

Operating and servicing of radar equipment aboard a tanker berthed at the terminal shall be agreed to by the Terminal Marine Superintendent or Marine Supervisor and shall be the subject of an appropriate work permit.

Vessels Alongside – Unauthorised craft shall be prohibited from securing to a berth at which a tanker is moored.

No craft shall come alongside a tanker while the tanker is handling crude oil or deballasting without the permission of the Terminal Marine Superintendent who shall instruct personnel aboard the craft that smoking, naked light, and galley fire regulations must be observed.

Designated Smoking Areas: Smoking shall be strictly prohibited within an area enclosing all tanker berths and loading docks and on board any tanker while at a berth, except.

(a) in buildings or other shore locations specifically approved for smoking and with such approval notices posted.
(b) on board a tanker in places specified by the Master, and agreed to by the Terminal Marine Supervisor.

Places designated for smoking shall not be outside of any of the accommodation areas. Special precautions shall be taken during conditions that may suggest danger; in particular, conditions of no wind or any indication of unusually high gas concentrations.

The Master is responsible for insuring that all on board are informed of the selected places for smoking and for posting suitable notices.

Only safety matches are permitted in approved smoking areas. The use of lighters is prohibited.

Galley Fires and Cooking Appliances – Galley burners are to be adjusted to insure efficient combustion and to prevent galley stack fires and sparks from incandescent soot. Flues are to be cleaned at regular intervals. When bottled gas equipment is used, the gas shall contain an additive which will give it a distinctive odour. Sufficient fire extinguishers shall always be provided near the galley. Oily rags and fat shall not be allowed to accumulate, and the exhaust fan ventilators shall be kept clean.

While a tanker is at a berth, the use of galley stoves and other cooking appliances with non-immersed elements such as electric hot-plates and toasters shall be permitted provided that the Terminal Marine Supervisor agrees that no hazard exists and that such use is in the galley, in the pantry, or in designated smoking areas.

Work Permits – If repairs are to be carried out on a tanker alongside a berth at the terminal, the responsible ship's officer must discuss and obtain agreement from the Terminal Marine Supervisor on the details of the work to be done. Certain types of repairs will be the subject of written work permits which shall be completed by the responsible ship's officer and authorised by the Terminal Marine Supervisor at the time of the pre-loading inspection check list. These types of repairs include but are not limited to:

(a) Repairs to main engine, steering machinery, or other manoeuvring equipment which might immobilise the tanker.
(b) Repairs to tanker's radiotelephone or communications equipment.
(c) Repairs to radar equipment.
(d) Repairs to galley equipment and cooking appliances.

Hot Work Permits – Any hot work done at the terminal, either on the berth or aboard a tanker moored to a berth must be approved by the U.S. Coastguard Captain of the Port, Western Alaska. This approval will be in the form of a signed Hot Work Permit, issued by the U.S. Coastguard.

EMERGENCY PROCEDURES: Fire: The signal for a fire aboard a tanker moored at the terminal shall be 5 prolonged blasts of the ship's whistle or siren supplemented by a continuous sounding of the ship's general alarm. In the event of a fire within the terminal, the tanker shall be notified by the berth operator and, in addition, the terminal fire alarm will also be sounded.

The initial action required of tankers in the event of a fire within the terminal is to prepare for a shutdown of all loading and ballast water discharge arms. This shutdown will be initiated by the terminal and not by the tanker. In case a shutdown does occur, loading and ballast discharge will not be commenced again until the all clear notification has been received from the Terminal Marine Supervisor.

In the event of a fire aboard the tanker or on the loading berth, the initial actions will consist of shutting down all transfer operations. The standby tug, followed by the other tugs, will be dispatched by the OCC to the appropriate berth and the fire water pump shall be started. If necessary, the tanker will be towed off the berth by tugs, using the emergency tow wires. Each berth is equipped with an independent fire water system which includes a 2,000-gallon-per-minute pump and a liquid foam system. Each berth is also equipped with the following fire-fighting equipment:

(a) 2 fixed foam monitors.
(b) 2 fixed firewater monitors.
(c) 5 fire hydrants.
(d) 3 hose reels.
(e) 1 shore to ship firewater connection including 75 ft. of 2.5 in. hose.

Each berth also has the capability to be interconnected with the tugs or with fire trucks to provide increased fire-fighting capacity. The foam system is designed for coverage of fire on the berths only and is not normally interconnected for use by shipboard firefighters in the event of a fire.

Note: Regardless of any assistance the terminal may render, vessels at the berth are expected to put their own emergency procedures into effect whenever required.

Man Overboard: In the event of a man overboard from a tanker moored at the berth, rescue efforts will be implemented immediately, and the berth operator shall be advised by UHF radio. The Terminal Marine Supervisor shall also be notified by the berth operator. The standby tug and mooring boat shall be advised by the berth operator and shall get underway immediately to attempt the rescue.

Life rings will be in position around the loading berth and also on the berthing and mooring dolphins. In case of a man overboard, the medical authorities will also be alerted by the berth operator.

Oil Spills: The notification requirements for an oil spill are delineated by Federal Law. The Federal Water Pollution Control Act (FWPCA) requires persons in charge of vessels (among others) to notify the appropriate federal agency whenever an oil spill enters navigable waters or the adjoining shoreline. The appropriate agency designated to receive these reports is the U.S. Coastguard which can be contacted on Channel 16, VHF-FM.

Notification of an oil spill shall be passed by the tanker to the berth operator who in turn shall inform the Terminal Marine Supervisor.

The terminal will call other agencies that are required to be notified.

The terminal will provide any available containment and cleanup assistance for any oil spill at the terminal. The terminal will activate its oil spill response procedures upon notification of an oil spill and shall utilise all available personnel, equipment, and resources to limit and minimise pollution.

CHARTS/PUBLICATIONS: The following official charts and publications are recommended for study when planning a voyage to Valdez, Alaska and the terminal:

(a) National Ocean Survey Charts:

Chart Number Old System	New System	Title
8500	531	Gulf of Alaska – Strait of Juan de Fuca to Kodiak Island
8502	16013	Cape St. Elias to Shumagain Islands
8551	16700	Prince William Sound
8520	16709	Prince William Sound – Eastern Entrance
8519	16708	Prince William Sound – Port Fidalgo & Valdez Arm, Valdez.

(b) Nautical Chart Catalogue No. 3 – Alaska

(c) United States Coast Pilot No. 9, Cape Spencer to Beaufort Sea (1964) with current supplement.

(d) Tides Tables, West Coast, North and South America (current year).

(e) Tidal Current Tables, Pacific Coast of North America and Asia (current year).

(f) United States Coastguard Light List, Vol. III, Pacific Coast and Pacific Islands (current year).

(g) Weekly Notice to Mariners published by Defense Mapping Agency Hydrographic Center (DMAHC).

(h) Local Notice to Mariners issued by Commander, Seventeenth Coastguard District, Juneau, Alaska.

(i) Radio Navigational Aids, Pacific and Indian Oceans (Publication No. 117B), published by U.S. Hydrographic Office.

WEATHER: *Wind:* The mountains which surround Port Valdez tend to constrain the flow of air to either an Easterly or Westerly direction. At Valdez Narrows, the predominant directions are Northerly and Southerly.

Jackson Point experiences stronger winds than Valdez Airport; however, light winds (less than 13 m.p.h.) occur about 85 per cent of the time. The prevailing wind directions are S.W. from May through September and N.E. from October through April. The N.E. Winter winds reach gale force but usually do not prevail for long periods. The site is well protected from Southwesterly winds but is fully exposed to the Northeasterlies and to winds coming off Mineral Creek, directly North of the facility, approx. 2.5 miles away across Port Valdez.

The occurrence of winds with speed greater than 19 m.p.h. from any direction is less than 7 per cent throughout the year.

A wind chill factor chart is presented for use in conducting operations during Winter seasons. As indicated, combinations of low temperatures and high winds combine to provide extremely low equivalent temperatures. Outdoor operations under these conditions should be closely supervised to insure that personnel and crewmen do not suffer from exposure or frostbite.

Precipitation: Precipitation is abundant during all seasons with the majority falling during the months July through November. Valdez has an average annual precipitation of 62.37 in. with a mean total of 244.5 in. of snow per year. Greatest snowfall in a 24-hour period was 43 in. in February 1928. Precipitation of an amount in excess of 0.01 in. occurs an average of 170 days per year. Estimate 1 in. rain = 12-15 in. snow.

Temperature: The mean monthly annual temperature is 35.7° F. with recorded extremes of +87° F. (June 1953) and −28° F. (February 1947). The month of January is the coldest with a mean daily minimum of 11° F. and a mean daily maximum of 26° F. The month of July is the warmest with a mean daily minimum and maximum of 45.2° F. and 60.1° F., respectively.

Visibility: Snow or snow with fog are the major causes of reduced visibility during Winter months. At the Valdez Airport, visibilities of 1 mile or less occur 3.7 per cent of the time, annually. Visibilities greater than 5 miles occur 85 per cent of the time.

Tides: The tide at Port Valdez has a diurnal range of 12 ft. and a mean range of 9.7 ft.

Waves: The port is surrounded by mountains and is well protected from the open sea and the wave action within the port is limited to wind-generated waves which are constrained by the fetch available. The maximum calculated wave height is 9.4 ft. from the East with a period of 4.3 seconds. Waves in the order of 6 ft. could occur from the N.W. quarter. An important exception to this is a tsunami or seismically generated wave which can be far in excess of the heights quoted above. Investigations in 1968 showed mean wave heights 3 to 6 ft. in Winter (independent occurence 0.7 per cent of time) and 2 to 3 ft. in Summer (0.1 per cent of time). Berths at the terminal are designed to withstand waves of 12 ft. with a vessel alongside and 20 ft. when vacant.

Ice: Valdez is an ice-free port as far as tanker operation is concerned. Light ice forms along the banks and in the small boat harbour at Valdez, but this has not interfered with small-boat operations.

Currents: It appears that surface currents measured during calm wind conditions in Port Valdez often oscillate with the tide, moving generally in and out of the port with maximum speeds of 0.5 knot. The Easterly (flooding) surface current during a falling tide may or may not persist throughout the year. Although Volume 9 of the U.S. Coast Pilot for Alaskan waters describes the current in Port Valdez as "too weak and variable to be predicted", measurements of surface current speeds typically show maximums of 0.5 to 1.0 knot.

It is requested that inbound tankers keep the OCC advised of weather conditions in the Gulf of Alaska, Prince William Sound, Valdez Arm, and Valdez Narrows in order that accurate information may be passed to outbound tankers.

VISITORS: Access to the terminal is limited to terminal personnel, authorised governmental personnel and authorised visitors with valid reasons for entry onto the terminal site.

Visitors to the Valdez Marine Terminal are requested to make arrangements through the Administrative Office in advance of their arrival at the terminal. Authorised visitors shall be met at the main gate, which provides the only land access to the terminal and is located at the East end of the terminal site, and shall be escorted through the terminal area. All persons passing through the main gate shall sign in and out with the guard. Any visitor who arrives at the main gate outside normal working hours of the Administrative Office and who has not made prior arrangements shall be turned away and requested to contact the Administrative Office during normal working hours.

The guard at the main gate shall ask any visitor desiring to meet a tanker crewman to wait at the gate until the vessel is called and arrangements have been made to meet the visitor.

Small boats and other vessel traffic will not be permitted to dock at the terminal site without the approval of the Terminal Marine Supervisor. Only taxicabs with valid passes will be permitted to enter the terminal site, and any private or commercial vehicles that are permitted in the terminal area will be subject to inspection on entering and departing the area.

SHORE LEAVE: If tanker personnel return to the Valdez Marine Terminal site in such a condition that they might require assistance to insure their safe return to the ship, they shall remain at the main gate until the guard grants them admittance. Should an escort be required, it will be provided by terminal personnel.

All tanker personnel transiting the terminal area will be required to carry their United States Merchant Mariner's Document (USMMD) and company identification of tanker owner for identification. These documents shall be presented to the guard at the main gate whenever tanker personnel enter or leave the terminal site. Should a crewman present himself without these documents, he will be detained and the Master will be called to resolve the matter.

TIME: Alaska Standard Time (150th West meridian) for a zone description of +10(ZD=+10). Local time is modified from the last Sunday in April to the last Sunday in October by the use of Daylight Saving Time for a zone description of +9 (ZD =+9 for Alaska Daylight Saving Time). This time is 2 hours behind that in Seattle and California and 5 hours behind New York.

To avoid confusion, all communications regarding sailing times, sailing dates, arrival times, arrival dates, etc. are to be quoted in Alaska Local Time.

FRESHWATER: Only in cases of extreme emergency can potable water be supplied and in a very limited quantity.

FUEL: Not available.

POLLUTION: U.S. Federal Pollution Prevention Regulations and Federal Water Pollution Control Act to be strictly observed.

TELEPHONES: Pay telephones will be located in the vicinity of each loading berth for the use of ship's personnel.

Telephones will not be placed aboard tankships calling at the terminal.

AGENCY: Alyeska Pipeline Service Company will not act as Agent for tankers calling at the Valdez Marine Terminal. Any requirements for such services as ship chandler, etc. must be obtained through the Owner's appointed ship's Agent. For security, the Valdez Marine Terminal must be notified of the appointed Agent.

VANCOUVER, Washington: 45.36 N. 122.40 W.

DOCUMENTS: 3 copies of following:

Cargo Manifest.
Store List.
Crew Cargo List.
Crew List.

One copy of following:

Clearance from last Port.
Tonnage Tax Certificate.
Copy of Vessel register and itinerary of vessel port by port.

PILOTAGE: When entering from sea (without service of a bar Pilot) vessel or Agent must give notice between hours of 0800 and 1700 and at least 12 hours prior to ETA Astoria. Calls may be placed with Astoria office (325-4532) or at Portland office (228-9325) or by radio to "Colrip Astoriaore". River Pilots board at Astoria in channel in vicinity of Astoria Crossing Lighted Buoy No. 37. Signal for river Pilot is 1 long and 3 short whistles. When ordering bar Pilots, request radio via KLB, Seattle, Wash., about 12 hours before arrival. Address "Bar Pilots, Astoria, Ore.", giving date and time of arrival at lightship. When "Peacock" is on station Pilot boards from small power boat; when "Columbia" is on station, Pilot boards directly from "Columbia". When pilot is boarding from small boat keep engines at about 4 knots speed. Do not change course or speed until signalled by Pilot vessel. Vessels having radio telephone contact pilot vessel for instructions on following frequencies: radio phone watch on Channel 16 VHF (156.8 mgc/s) also 2182 and 2738 kc/s. Pilot boat "Peacock" call WS 7217; pilot boat "Columbia" WJ 8200; Astoria Bar Pilots' office (Channel 16) KOK 360. Also see "General-Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Only designated anchorages on U.S. Coast and Geodetic Charts are at Tongue Point (Astoria), Oreg. 2 in number and designated on Chart 6151 Columbia River, Pacific Ocean to Harrington Point, as 1 Lower Tongue Point and 2 Upper Tongue Point. Additional locations on Columbia and Willamette Rivers where safe anchorages can be made upon advice of Columbia River pilots. Anchorage in Vancouver harbour by permission of Harbour Master.

RESTRICTIONS: No restrictions on night entry. State of tide and draft restrictions not applicable to vessels drawing less than 40 ft.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Vancouver maintained at 45 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Vancouver.

HEALTH: See "Health; All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: "Agriculture" before first U.S.A. port (Albany).

RADIO: Route ETA cables through KBLITT Seattle, Wash.

TUGS: Normally join vessel at designated berth. Tug lines used at no charge.

BERTHING: No special requirements for berthing and no special arrival times required except under particular circumstances.

STEVEDORES: Allocation for gangs Mondays through Saturday must be confirmed at 1100 hrs. to the longshore hiring hall. Allocation for gangs Sunday and Monday are made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. afternoon of night gangs are to work.

MEDICAL: Any type of medical treatment can be provided and hospital facilities available. Only inoculation requirement for entry to U.S. is smallpox, except when vessels have called at an area infected by another disease.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential.

FIRE PRECAUTIONS: Port fire precautions respecting tankers are administered by U.S. Coast Guard, which enforces shipboard regulations under Code of Federal Regulations, Part 46, Sub-part D, Sections 20 to 40; Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; and Fire Marshal, who exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

DEVELOPMENTS: Will continue building new cargo warehouses, additions to dock facilities, 3×50-ton gantry cranes available, berths for 4 cargo vessels, container yard and lumber yard.

GANGWAY/DECK WATCHMEN: Services at option of vessel Owner/Agent and available through private firms.

OPENING/CLOSING HATCHES: While ship is at dock, opening and closing hatches is work of longshoremen. Ship may open or close own hatches while under way.

CERTIFICATES: Registered tonnage certificate.

CUSTOMS ALLOWANCE: Tobacco, reasonable quantity. Wine and/or Spirit, reasonable quantity.

CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.

IDENTIFICATION CARDS: Immigration Dept. requires forms No. 595 and No. 31 (Repatriation). Changes can be effected at any U.S. Consulate and are honoured here.

CONSULS:

Austria
Belgium
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland

France
Federal Republic of Germany
Great Britain
Iceland
Italy
Japan
Lebanon

Mexico
The Netherlands
Norway
Republic of Panama
Peru
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: See "Portland, Oregon".

REPATRIATION: Any arrangements possible for crew changes or other repatriation.

AIRPORT: Airport 10 miles from town, served by 7 regularly scheduled airlines with direct service and/or connections domestically and world-wide.

TIME: GMT minus 8 hours. Daylight saving time becomes effective annually on last Sunday in April through last Saturday in October.

HOLIDAYS: Following holidays are recognised: *New Year's Day; Lincoln's Birthday (Feb. 12th); Washington's Birthday (Feb. 22nd); Memorial Day (May 30th); *Independence Day (July 4th); *Labour Day (1st Monday in September); Columbus Day (Oct. 12th); Veteran's Day (Nov. 11th); Thanksgiving Day; *Christmas Day (Dec. 25th); Statewide Election Days. Other legal holidays may be proclaimed by State or national authority. When holiday falls on Sunday, following Monday observed as holiday. Longshore work performed on any of above-listed days is at overtime, which is one-and-a-half time rate. Days marked(*) are stop-work days, viz., no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police 693-2555; Fire 693-1441; Ambulance provided by several private firms, but can be obtained through police or fire number.

SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.

SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.

AUTHORITY: Port of Vancouver.

AGENT: See "Portland", Oregon.

WILMINGTON, Delaware: 39.44 N. 75.32 W.

DOCUMENTS: Handled through local Agents.

PILOTAGE: See "Philadelphia."

ANCHORAGE: At Cherry Island.

MAX. SIZE: Length unlimited, breadth unlimited, draft 35 ft. MLW tide range 5.5 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Baltimore Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: U.S. Coast Guard, Gloucester, N.J.

TUGS: Available through Wilmington Launch Service.

BERTHING: 3,260 ft. marginal wharf. 20-100 ton crane capacity. 400-600 t.p.h. bulk unloader. Covered bulk storage of 472,000 sq.ft. Dockside freezer capacity of 200,000 cu.ft. at present. Additional 100,000 cu.ft. by December, 1978.

DENSITY: Fresh water port. Normal 12 hour tides.

FRESH WATER: Hose connection from dock.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Required.

OPENING/CLOSING HATCHES: Optional.

IDENTIFICATION CARDS: See "New York".

CONSULS: All Consuls are located in Philadelphia, Pa.

REPAIRS: Possible.

DRY DOCKS: Major repairs and dry dock facilities – Sun Ship Yard, Chester, Pa.

REPATRIATION: Facilities are available and arranged by Agent.

AIRPORT: Philadelphia International Airport, regular service.

TIME: U.S. Eastern Standard and Daylight Time.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, tel. 302-654-5151.

TELEPHONES: Dock-side pay phones.

SERVICES: All services available.

SHORE LEAVE: Allowed unless restricted by Immigration.

AUTHORITY: Port of Wilmington.

WILMINGTON, N. Carolina: 34.14 N. 77.57 W.
(See Plan Book)

PORT LIMITS: A ship is considered an "arrived vessel" upon arrival at Buoy 2CF.

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (curio list) (Customs Form 1304).
3 copies Stores List (Customs Form 1303).
3 copies Passenger List (Form I.418).
3 copies Crew List (Form. I.418).

Customs boarding Officer will also examine ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Master's oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
Oil Pollution Cert.
General Declaration (Customs Form 1301).
Load Line Certificate.
Safety Equipment Certificate.

PILOTAGE: Pilots board vessels at Buoy 2CF off the mouth of the Cape Fear River. Masters should notify local Agents by radio of their ETA's at Buoy 2CF in order that the Pilots may be on station in advance of arrival. Additionally, Masters may communicate with Pilots by radio telephone on 2738 frequency and by VHF Channel 18A. Pilots remain on board until harbour limits of Wilmington, where docking masters normally board vessels for purposes of docking.

APPROACHES: The port terminal at Wilmington is located on the East bank of Cape Fear River, approximately 26 miles from the sea buoy at the mouth of the river. Wilmington is 150 miles S.W. of Cape Hattaras and 26 miles North of Cape Fear.

RESTRICTIONS: The approach channel and basins adjacent to the port are maintained at a depth of 38 ft. MLW.

ANCHORAGE: Vessels awaiting Pilots normally anchor in area off Buoy 2CF. There is no safe anchorage in the port of Wilmington for large vessels to be accommodated. Small vessels can be accommodated for brief periods in anchorage basin, although it is necessary to swing with the tide in order to avoid blocking channel.

MAX. SIZE: No limits on length, breadth, and draft limit is present channel project depth of 38 ft. Master should communicate with local Agent regarding stage of tide for passage of vessels drawing 34 ft. or above.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Fort Monroe Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 2 towing companies operate at Wilmington.

BERTHING: A continuous marginal wharf, 6,000 ft. long. Docking at any hour, day and night.

SPECIALISED CARGO HANDLING FACILITIES. State Port Terminal: fully equipped to serve cellular type container ships, for bulk handling; equipped with 6 yard rehandler buckets, receiving hoppers, and paved open storage areas, 2×45-ton, 1×115-ton and 1×225-ton gantry crane; 1 berth with tank farm for handling liquid chemicals.

Almont Shipping Company: 3 berths, open and covered bulk storage, 2×25-ton cranes and 1×85-ton derrick. No facilities for LPG carriers.

TANKERS: 10 tanker berths with drafts from 30 to 40 ft. MLW. Night berthing at all berths. Fresh water available.

FRESH WATER: Available from shore connections at rates up to 50 t.p.h.

FUEL: Bunker "C" and diesel fuels available locally.

FIRE PRECAUTIONS: Normal precautions observed.

DEVELOPMENTS: 1×225-ton gantry crane, 9 additional acres paved open storage and dockside sewage facilities to receive waste from ships available.

REPAIRS: Minor ship repairs available.

DRY DOCKS: 1×1,000-ton lift floating dry dock.

AIRPORT: New Hanover Country Airport, 7 miles from N.C. State Port Terminal. Served by Piedmont Airlines.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form. I.95, issued for the same vessel.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

AUTHORITY: North Carolina State Port Authority.

WRANGELL, Alaska: 56.28 N. 132.22 W.

Located on Wrangell Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.

ANCHORAGE: Good anchorage N.E. of Woronofski Island in 22 fathoms of water.

MAX. SIZE: Harbour depth 32 ft. MLLW. Tides: mean range 13.7 ft., diurnal range 16.1 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Immigration, Guard Island or local Customs office. Quarantine and Customs, local.

BERTHING: 3 wharves. 1. Wrangell Wharf Co. Berthing length 220 ft., East end depth 24 ft., West end depth 38 ft. 2 lift-trucks; 4,800 sq.ft. covered shed space.

2. Wrangell Lumber Co. Dock; Berthing length 320 ft., 150 ft. wide, depth South end 32 ft. North end 40 ft. LW. Height of pier from zero tide 23.5 ft. Crane – 1 mobile, 8 ton, 6 lift-trucks. No shed space. 3 acres open storage.

3. Alaska Wood Products: Berthing length 300 ft., 50 ft. wide. Depth at LW 32 ft. Height of pier from zero tide 23 ft. No shed space.

TUGS: 3 available, 500 h.p. each.

DEVELOPMENTS: Possible mineral potential for future development from Iskut River and Stikine River lodes.

STEVEDORES: 4 gangs available.

REPAIRS: None.

WATER: Available.

FUEL: None.

MEDICAL: Small but new hospital.

TRANSPORTATION: Air and ferry.

NOTES

Please also advise Shipping Guides Ltd.

67

Uruguay

REGULATIONS: Increased fines became effective in June 1973 in respect of infringements of the Uruguayan Marine Code. There are approximately 119 Articles to the Marine Code, and Owners and Masters of vessels proceeding to Uruguayan ports are recommended to obtain a copy of the Code (which lists port regulations and amounts of fines for infringements) prior to arrival. We understand that copies of the Code, entitled "Reglamento Preventivo y Represivo de Infracciones Maritimas, Fluviales y Portuarias" may be obtained from Centro Navegacion Transatlantica, Colon 1486 p. 3, Montevideo.

Freely translated, we give below some extracts of Port Regulations as specifically applicable to Montevideo, but also to all Uruguayan ports in general:

Articles 1 to 8 cover respectively the reasons for setting up this preventive set of regulations; the definition of what a vessel is in terms of the legislation; the establishment and amount of fines (they may be tripled in the event of repeated offences); the fact that very small vessels may only have imposed 10 per cent of the full fine; the jurisdiction for the regulations covering the whole of the Uruguayan coast and river frontage; the stipulation whereby the General Marine Prefecture must send to the Captain of the vessel a statement of the offence immediately it is observed and this in triplicate and to the local Agent for the vessel.

The actual information which the form must contain is delineated. Notification of offences can be made after a vessel has sailed, this being to the local ship's Agent by phone and confirmed within 24 hours in writing. All Captains must give written consent to their local Agent, and the Agent must accept this in writing, empowering the Agent to act in the Captain's name in all cases of fine payment. The Authorities may delay the sailing of a vessel if they see fit in connection with any offence. Finally, article 8 deals with the right to appeal to the General Marine Prefecture against any fine imposed, this having to be done within 10 days dating from the day following personal notification of the offence.

Articles 9 to 119 cover the specific offences subject to fine and indicate individually the full fine imposable in local pesos.

An abridged summary of each of the articles is as follows: No anchoring within 900 metres of the illuminated buoy in the port access channel.

Vessels carrying hazardous cargo must hoist flags according to the Int. Code of Signals.

Vessels with anyone on board with contagious diseases must hoist appropriate flag (letters QL).

Flag Q must be hoisted and maintained in position until health authority has given free pratique.

All vessels anchoring in the roads, bay or ante-port must take due precautions not to harm or cause damage to other vessels; the fine will be imposed notwithstanding claims for damages from third parties.

Agents of vessels which may wish to anchor in the roads must obtain prior permission from the Marine Authority, specifying vessel's measurements and the reason. If authorised, the anchorage to be used will be notified.

No anchoring at the docks unless justified, and anchors must be raised immediately the reason for dropping them has gone. There must be no delay on the part of vessels in complying with the Marine Authorities instructions to change berth or anchorage.

No tying up to other vessels without Marine Authority permission; no attachment to berths which have not been allocated and no changing of berth without authorisation.

No anchoring in places not authorised by the Marine Authority, the maximum fine being applied should this have caused damage to third parties.

No small craft to be tied up obstructing gangway or quays. Where this is necessary for embarking crew members, passengers, provisions, etc., the small craft must be removed immediately the operation has been completed.

Small craft must not be tied up to buoys or beacons. Vessels must not tie up at buoys or beacons.

Maximum speed of vessels in docks is 4 knots.

Navigation in channels of access to ports is governed as follows:
Maximum speed 8 knots.

Vessels must always keep to starboard.

Vessels must not overtake each other, but where this is necessary they must conform to the International Signal Code.

No anchorage in channels.

No fishing in channels.

Vessels navigating in channels must keep a distance of 1,000 metres from each other.

Vessels must not cross in front of each other in the fore-ports.

All vessels entering or leaving the ante-port or docks, changing berths or anchorages must be assisted by a Pilot and tug, unless specifically given exception to this rule by the Marine Authority.

No vessel must enter port with damage to hull, machinery or rudder unless prior inspected by the Technical Commission of the Mercantile Marine Directorate.

Any vessel springing a leak whilst navigating in the access channel, and which the bilge pumps cannot overcome, must go aground as quickly as possible off the channel so as to leave the channel open.

In case of fire on board whilst navigating in the access channel, Captains must observe usual procedure and give signals accordingly.

The strict use of semaphore signals within port must be observed.

When vessels enter the docks or remain in them, Captains, owners or Agents must request permission from the Marine Traffic Office, and report to the Office of Pilotage, and proceed in whatever form they may instruct. On leaving the same procedure must be followed.

Captains and owners of vessels must see that their vessels do not obstruct or cause harm to port works, beacons, buoys, or semaphores and once tied up they must not slacken ropes without permission of the Marine Authority except under conditions covered by items 1, 2 and 3 of article 64 of the Port of Montevideo Marine Regulations.

No vessel to have badly stowed cargo, excess weight, or evidence of lists due to bad trim of cargo.

Only those lines necessary for tying up to be used. When two or more vessels tie up alongside to load or discharge they are all obligated to ensure that the handling of their respective cargoes does not prejudice the working of the others.

Vessels must take proper precautions when loading or discharging raw material, i.e. sand, bones, ash, coal, etc., by placing suitable planks of wood close together to prevent any such material falling into the water.

No vessel to enter docks with the gangway already rigged.

During unloading operations, no goods to be thrown on to the quay. This must be done manually or mechanically.

During discharge operations, cargo must be so positioned on the quay as to leave adequate passage for vehicular traffic, i.e. police, fire-brigade, health authorities, customs and port officials.

Planks of wood — when planks are used for any operation, they must not be placed in contact with mooring bitts or cables. When work ceases all pieces of wood, ladders, small trucks, etc, must be removed from quay, and those belonging to the ship must be taken on board, this so as not to obstruct the public path along the quay.

When cleaning or washing ships tied up at quays, no rubbish, water or cleaning material must be allowed to fall on the quay.

A very serious offence is the throwing into the water of any rubbish, sewage or other material susceptible to dirtying the water.

Very serious offences are the lightening of ships carrying petrol, crude oil, or the like, likewise the washing-out of tanks, except in authorised zones. The fine is based on the area spoiled by the wrongful discharge.

All ships should have local Agents, otherwise in the case of offences the Captain is held responsible and vessels may be detained.

Vessels are responsible to ensure that no damage is made to quay installations by the cargo they load or discharge, and must always leave berths in a tidy and clean state.

Vessels' auxiliary small craft, launches and the like must not hang over the side of the vessel in port, except during operations of launching and reshipping on board, where such operations are conducted at points indicated by the Marine Authority. Such small craft may only be used for the purpose and at the times authorised by the Marine Authority.

Usual regulations concerning carriage of passengers in vessels and heavy fines are imposable for the carriage of passengers or crew members not listed.

Vessels exceeding their navigation limits shown in their Certificate of Navigability are subject to fine.

All vessels must be cleared to sail by the Marine Authority.

Vessels must use their proper name and this must be painted on in letters of minimum of 15 centimetres height and 8 centimetres wide. Letters must be white on black or black on light colour.

Captains, Owners and Agents must report any crew offence or irregularity on board to the Marine Authority.

Vessels in port must hoist the Uruguayan flag. *N.B. It is recommended that Masters correctly establish the proscribed times for raising and lowering the Uruguayan flag, in order to avoid fines.*

Vessels must have their gangway equipped with handrails, and the gangway must be clearly lit at night.

All lines to shore must have rat-guards fitted.

When there are hazardous goods on board or when such goods are being worked, the vessel must hoist the International Signal Code letter B, and at night show a red light on the bow masthead, must always have engines in a state of readiness in case of danger, keep two-thirds of the crew on board, keep watchmen and firemen available (the number of whom will be determined by the number of holds containing the hazardous material), must only work with incandescent lights, and keep a port pilot on board if the Marine Authority so directs.

Vessels moored at quays must not move propellors, except under the direction of the Marine Authority.

Vessels must not moor in the port access channel. There must be no improper use of the International Signal Code. Signal flags must not be interspersed with flags of nationality.

If a vessel wishes to dress flags over all, or fly a flag at halfmast due to a bereavement on board, the Marine Authority's permission must be first obtained.

The use of whistles, sirens or any other audible signal within the area of the roads, bay, ante-port or docks, for any reason other than justifiable for navigation is prohibited.

Any vessel anchored, tied up to other vessels or to the shore or quays, must show a white light from sunset to sunrise which can be seen at a distance of 500 metres.

In the access channel to Montevideo, no more than 4 vessels may navigate at one time — 2 entering, 2 leaving.

Maximum speed in the Montevideo ante-port is 6 knots. There must be no anchoring in the Free Zone, reserved for the manoeuvring of vessels entering and leaving.

At Montevideo there must be no anchoring along the route leading from the Free Zone to channel "A", between the quay and the pier of the same letter. Also on the route leading from pier "A" along a line to 100 metres to the North of the end of the West Jetty.

No anchoring in any area less than 200 metres from pier "A" in a semi-circular coverage, taking as middle point a position half way between quay "A" and pier "A".

All vessels must keep to the right or to the middle when there are no other vessels in the vicinity.

International Regulations for the Prevention of Collisions apply, plus the following:

Vessels navigating along the routes established in the anteport or which have to pass directly through the passage between jetties "A" and "B", must keep to the right when another vessel is coming in the opposite direction.

Vessels which have to cross the North, the South route or directly between jetties "A" and "B", must ensure that they pass any other vessel at a distance not less than 50 metres.

Any vessel navigating under her own power must give way to a vessel under tow by a tug.

Vessels with tugs following routes which cross one another, thereby creating a collision risk, the one passing to the starboard of the other is the vessel which must take the precautionary measures to avoid collision. If, however, the risk persists, the vessel passing to port of the other must also take measures to increase the distance between the two vessels.

No vessels to pass in pairs or in opposite direction between jetties "A" and "B"; the semaphore signals transmitted by quay "A" must be observed. If the signal is "vessel entering from the ante-port to the docks", the vessel in the docks, ready to sail, must wait until the incoming vessel has entered.

If the signal is "vessel leaving the docks for the ante-port" the vessel in the foreport, moving towards jetty "A" to enter the docks, must wait in the free zone, stop engines, keeping to the right, and drop anchor if necessary, until the outgoing vessel is outside and well clear of jetty "A".

The same regulation applies to vessels leaving the River Dock. In this case, the vessel leaving to jetty "A" has priority, coming from docks I and II the first will wait for the second before starting engines.

All vessels navigating in the same direction in the ante-port must keep a distance of not less than 300 metres from each other stern to bow. They must not pass each other or navigate in pairs.

In the event of offences being incurred whilst an Uruguayan pilot is on board, at the request of the local ship's Agent, the Marine Authority will determine whether the Pilot is responsible for the offence having occurred, and take measures accordingly.

Vessels which load beyond the appropriate load line will be subject to a fine of 1,000,000 pesos.

DOCUMENTS:

1. Required by Vessel

For Customs:

Visaed Manifest and Bills of Lading – see below.
1 Visaed copy of ballast certificate from each port of origin.
1 Visaed negative cargo certificate from each port of call; if there is no Uruguayan Consulate at any of the ports the negative cargo certificate must be visaed at the next port of call where there is a Uruguayan Consul.
2 Copies of Store List covering Deck, Engine and Cabin Stores.
2 Lists of Personal crew effects.
2 Lists detailing total available stocks on board of cigars, cigarettes, tobacco and all spirits.

Note: All these lists must be made out in triplicate, original and duplicate to be handed to Customs and triplicate to be kept on board for reference purposes. Store List covering Engine Room stores must include total quantity of bunkers on arrival – *this is most important.*

1 Copy of list of passengers finally disembarking at Montevideo (or negative). Passengers' Baggage declaration forms, signed by each passenger.

For Port Health Officer

1 International Health Declaration, signed by Master and Doctor, if aboard. This is the first document requested by the Receiving Commission, and must be ready for delivery immediately the authorities come on board.
1 Copy of list of passengers finally disembarking at Montevideo.
1 Copy of crew list.
Consular clearances – see note.
Deratting Certificate to be at hand if required.
Vaccination Certificates to be laid out in order of Crew List.

For Immigration Officials:

2 Copies of list of passengers finally disembarking at Montevideo (or negative list).
1 Copy of crew list.
2 Copies of transit list of passengers.

For Police Authorities:

2 Copies of list of passengers finally disembarking at Montevideo
1 Copy of crew list.
2 Copies of transit list of passengers.

For Port Captaincy (Prefectura):

2 Copies of list of passengers finally disembarking at Montevideo
1 Copy of crew list.
2 Copies of transit list of passengers.
1 Visaed copy of passenger list from port of origin and 2 copies (not visaed).
1 Visaed copy of crew list from port of origin and 1 copy (not visaed).
1 Visaed passenger list or negative list from all ports of call.
1 Visaed crew list from every port of call in which there have been changes in crew.

For Agents:

2 Copies of list of passengers finally disembarking at the port.
2 Copies of transit list of passengers.
2 Copies of crew list.
2 Copies of all Stores Lists.
2 Copies of all Manifests and Bills of Lading, including, Manifests of all inflammables or dangerous cargoes in transit.
2 Copies of Stowage Plans and/or Hatch Lists.

Other Documents

Masters must also have at hand all the usual certificates, such as Freeboard, Classification, Measurement, Safety Equipment, Radio, Fumigation, or certificate of exemption (valid for six months only).

All persons on board must have their smallpox vaccination certificates, while vessels proceeding from recognised endemic or epidemic Cholera or Yellow Fever zones must also have the necessary certificates, or Inoculation or Vaccination. All these certificates will be examined by the Boarding Commission before pratique is confirmed.

In resume, the following number of various documents are needed, plus extra copies where possible:

Crew List: 6 plus 1 visaed form from each port where changes are made.
Passenger List for the port: 10, plus 1 visaed list from port of origin and from each port of call with new passengers.
Store Lists: 5. Separately for Deck Engine and Cabin Stores. Engine List to include Declaration of Bunkers and Luboils.
Health Declaration: 1.
Baggage Declaration: 1 for each passenger.
Manifest and Bill of Lading: 1 visaed, alternatively Ballast certificate or Negative plus sufficient copies for Agents as per individual needs.

Consular Clearances and Manifest etc. – Great importance is attached to these documents. Consular clearances must cover all ports declared in the Health form by the Master, irrespective of whether the ship has cargo or passengers for Uruguay from those ports. These documents must be carefully checked prior to arrival to make sure that the Health form only shows those ports with clearances and/or cargo or passengers for the Country.

A vessel receiving orders en route to call at Montevideo, if not previously contemplated, must take out Consular Clearances at that port and take care with the declarations.

Vessels arriving from Buenos Aires, with no cargo or passengers from previous ports of call for Uruguay, can declare Buenos Aires only on this form.

At first port of sailing, the crew list is legalised by the Consul, and any subsequent changes must be legalised at the port where the change takes place, or if not at the next port of call where there is a Consul.

The Consuls at first and subsequent ports will send, care of the Master, envelopes addressed to the Direccion General de Aduanas (Custom House) and to the Prefecto del Puerto de Montevideo. The former will contain the legalised manifest and stamped Bill of Lading, or a negative manifest, and the latter a Consular Passenger List or a legalised Negative passenger declaration. Such envelopes must be produced for each port as declared by the Master.

A vessel arriving direct from a port or series of ports where there is no Uruguayan Consul will pay the dues on arrival, but without fine.

The fine for non compliance with these regulations is heavy.

2. Required by Passengers

Valid Passport – With or without visa, see below.

Vaccination Certificate – International form against smallpox.

Tourists – Citizens of the following countries can enter as Tourists for 90 days without visa:

Austria
Belgium
Bolivia
Canada
Colombia
Costa Rica
Chile
Denmark
Rep. Dominica
Greece
Great Britain
W. Germany
Guatemala
Haiti
Holland
Honduras
Hong Kong
Ireland
Italy
Mexico
Nicaragua
Norway
Panama
Peru
El Salvador
Spain
Sweden
Switzerland
United States

while citizens of these countries require visas:

Australia
Egypt (ARE)
Hungary
India
Japan
Lebanon
Netherlands Antilles
Portugal
Syria
South African Republic
Thailand
Turkey
Yugoslavia

Citizens of Argentina, Brazil and Paraguay can enter with their own police identity cards.

Tourists in transit, without a visa, are permitted from all countries, provided they have a confirmed outbound passage, and with the exception of European Communist countries.

Consular Visas are valid for 1 year.

Passengers intending to reside in Uruguay must complete all formalities in the respective Consulate before embarking.

3. Store Lists

Separate list for Deck, Engine and Cabin stores must be prepared before arrival, and be ready in triplicate for the authorities with extra copies for the Agents, whose intervention is later needed in any ordering of further stores or in case of difficulties.

The same forms as in use in Buenos Aires are accepted, and the same regulations as to weights in kilos or measures in litres, etc., rule. There are some points of difference, however.

Full quantity of bunkers must be declared. A separate list must also be made, detailing ship's store of cigarettes, cigars, tobacco and liqueurs.

This refers to the maximum quantities which it is permitted to purchase in Montevideo for ship's stores of these particular items, as the final permit for such shipments will be subject to the list of cigarettes, spirits and liqueurs on board on arrival.

According to the latest decree, vessels of over 1,000 tons gross will have the right to purchase, ex bond, 1 litre bottle per person on board for each 6 days of voyage, with a maximum of 40 cases of 12 litre bottles. In cigarettes, the allotment is 1 packet of 20 per person per day of voyage, with a maximum of 20,000 such packets.

Agents must be informed of any orders placed for Bonded stores since their signature is required on the documents.

Bonded lockers are sealed by Customs on arrival, and any bonded stores purchased in Uruguay must not be opened or used whilst in port.

PILOTAGE: Also see "Montevideo" Pilotage section for Port Control in the River Plate. Pilotage is compulsory in all river and port zones, except for vessels coming from the East to ports between La Paloma and Montevideo Roads, or entering Montevideo Roads for no commercial reason. All coastal vessels either Uruguayan or foreign are also exempt.

Pilotage Zones.

(1) RIVER PLATE – Comprises zone between imaginary Lines in the East from Punta del Este (Uruguay) and Punta Rasa, on Cape San Antonio (Argentina) and on the West between Colonia and San Isidro (Argentina).

(2) RIVER URUGUAY – From 56.5 km. of Farallon Channel to Uruguayan ports on the River Uruguay.

(3) PORTS – Pilotage zones, comprises limits of each port including its Roads.

In the River Plate, Pilots presently board to the South of the wreck of the *Calpean Star*, approximately 4.5 km. South and lying 70 m. West of the dredged access channel.

Several of the pairs of buoys are missing, and only the mid channel buoy indicating the entrance to the access channel, 5 miles South from the port, and the 2 pairs nearest to the breakwaters are operating.

When taking tankers, the port Pilot usually goes out to the 5-mile mark.

There is no more than 30 ft. in the access channel at the moment; dredging is being carried on, but there are only 2 dredgers operating between the channel and the port of Montevideo itself.

The current is across the channel, running at about 1 knot, and changes direction more with the wind than the tide.

Vessels awaiting Pilot should anchor on the West of the channel and South of the *Calpean Star;* there is 24 ft. up to 500 m. West of the channel. The zone to the East of the access channel has submarine cables and must therefore be avoided.

Pilots are ordered through the Agent, and have an up to date communications system installed in their office on the 21st floor of a modern skyscraper, whence they dominate a large area of the estuary.

Permanent watch is kept on Channel 16 VHF, and operator speaks English. It is possible to call "Practicos Montevideo" and ask to be connected by phone to the vessel's Agent's office for last minute instructions, etc.

Channel	Frequency	Channel	Frequency
9	154.50	11	155.50
16	158.00		

The port is closed when wind force exceeds 43 knots or, at night, 37 knots, or if visibility is less than 1 kilometre, but otherwise vessels can enter or sail at any time.

There is also a Telex machine with 24 hour watch, over which messages can be transmitted to Agents out of office hours, over a weekend, for example. Call sign is DGT 843 Pilot CX. This is particularly useful for vessels sailing late from Buenos Aires, and the Office will pass on the message to the corresponding Agency by phone.

All Pilots carry a "walkie-talkie" and can communicate either with their office, the Port Authority or the Semaphore station, using Channel 9 for the port offices and 11 for the Pilot's office, 16 being kept for use with vessels.

Ordering of River Pilots for sailings from Uruguayan River Ports – Although Masters can apply directly for Pilots such applications must be made by telegram addressed to the Practico Mayor Montevideo, it is preferable for them to keep their Montevideo Agent fully informed and leave the latter to order the Pilot.

The opportunity of ordering Pilots at any hour having been discontinued makes it more essential than ever that Montevideo Agents are kept accurately informed regarding expected readiness to sail. Failure to do so will result in unnecessary demurrage being paid to Pilots or delay to the ship concerned.

Pilots for vessels proceeding from sea to a Uruguayan Port on the River Uruguay – A Uruguayan Pilot must be employed to conduct ships from sea to a Uruguayan Port on the River Uruguay.

Vessels must call at Montevideo Roads to embark Pilot and pay the cost of tug to take out Pilot. They can also, alternatively, take an Argentine Pilot at Recalada who will take the vessel to Intersection, where in either case an Argentine river pilot will board to take the vessel to the Roads of port of destination, where a Uruguayan Port pilot will come aboard, this being a simpler procedure and all handled by Agents in Buenos Aires (one radio advice).

Vessels from an Argentine Port bound for Uruguayan River Port – Such vessels are normally taken to immediately off port of destination by an Argentine Pilot, but they must be berthed by a Uruguayan Pilot who has to be sent from Montevideo, thus Montevideo Agents must be kept promptly informed of vessel's position to enable them to order a Pilot to berth ship without delay.

Vessels leaving Uruguayan Port for Argentine Ports on the River Parana – Uruguayan River Pilot supplied from Montevideo must be employed for unberthing, and this Pilot takes vessel to the Bravo Channel off Nueva Palmira, where the Argentine River Parana Pilot, who is normally already aboard, takes over.

The Uruguayan Pilot is paid in accordance with tariff to Nueva Palmira plus an unberthing fee and travelling expenses.

HEALTH: In order to be able to enter port and berth without delay, the Authorities accept a radio, cable or telex request, couched in the following terms (messages must be sent in Spanish).

Vessels arriving from elsewhere

Capitan .... solicita libre platica
here the name of the vessel
informando proceder de Buenos Aires, siendo su escala anterior
....
here a port in another previous country which could be Santos, Valparaiso, Capetown, etc.
condicion sanitaria buena..Capitan
here the name of the Master

Vessels arriving from Buenos Aires

Capitan ....solicita libres platica
here the name of the vessel
informando proceder de.............here a port of origin, say London – Liverpool – San Francisco – Rijeka – Kotka – Tokyo – Oslo, etc.
siendo su ultimo puerto..............here say Santos – Valparaiso – Capetown, etc.
condicion sanitaria buena..Capitan
here the name of the Master

There have been cases of delay in delivery of radio messages, even though passed on by phone, but the original message must accompany Agent's request for free pratique, hence it is advisable to use cable or telex services if possible. Messages must be sent at least 24 hours ahead, and changes in ETA advised.

Although it is possible to take pratique in Uruguayan River ports, there is frequently delay there, and since vessels must enter Montevideo to pick up the river port pilot also, it is advisable in these cases to ask for pratique at Montevideo as above, and the order from Sanitary Authorities granting Free Pratique will be handed to the Pilot to take on board with him.

In no case, however, does the granting of pratique by radio modify the inspection in port, where the usual commission must be the first to go on board.

Illness on board – Any private doctor attending a patient on board must immediately inform the Sanitary Inspector should the disease be contagious.

No patient can be landed without the consent of the doctor of the Health Department with the exception of accident cases that require immediate medical attention, and even in those cases the Health department Doctor must be informed in order to issue a Sanitary Pass for the Hospital where the man was taken to.

If a Captain does not report the existence of illness on board he is liable to fines which are double if patients land without the consent of the Sanitary Authorities.

RADIO:

Notice to Mariners

Official Uruguayan Notices to Mariners are transmitted in Spanish only preceded by the signal TTT, the number of the Notice, letter R, then contents and are repeated for 15 days. Should there be no Notices to transmit, the wording "no hay avisos para navegantes" will be radioed.

Punta Carreta CWF 2768.5 kc/s. A 3 0.4 kW. at 00.03, 14.03 and 19.03 hrs. (after the weather forecast).

Cerrito CWA on 4346, 8602, 12750, 17208.8 A1, 1.5 kW., also on 421.5 kc/s. A1 and A2 5 kW. at 00.00, 14.00 and 19.00 hrs. (after the weather forecast).

Montevideo CX 16850 kc/s. A3 10 kW. at 13.02 and 16.02 hrs. on working days, at 17.00 hrs. on Sundays.

Montevideo	CX 6	659 kc/s.	A3 2.5 kW.
	CX 26	1050	A3 all transmit Notices to Mariners at 16.00.
	CX 38	1290	A3 5 kW.
	CXA 4	6125	A3 10 kW.
	CXA 6	9620	A3 20 kW.
	CXA 10	11900	A3 20 kW.

Weather Forecast

A weather forecast is transmitted in Spanish to cover 3 zones.

Reference AAA 830 is the Coastal area from 30° S. 50 W. out to 30° S. 46 W. and down to 33° 30' S. 53° W. and 35° S. 49° W.

AAA 860, River Plate zone from 33° 30' S. 57° W. to 35° S. 49° W. and down to 35° 30' S. 57° W. to 39° S. 53° W.

AAA 870 Coast of Argentina from 35° 30' S. 57° W. to 39° S. 53° W. and down to 41° S. 62° W.

Details of all 3 zones are transmitted as follows, valid for 24 hours.

CWA on 421.5 A1 5 kW. at 00.00, 14.00 and 19.00 hrs.

CWF on 2768.5 A3 0.4 kW. at 00.05, 14.05 and 19.05 hrs. and in A1 over 4346 kcW. 8602 kc/s., 12750 kc/s. and 17208 kc/s.

Time Signals

Are transmitted from 2 stations in Montevideo at 15.00 and 20.00 hrs. The hour is indicated by 6 dots preceded by a ten second dash and a 5 second silence. The last dot indicates the hour.

CX 6 on 650 kc/s. A3 25 kW.
CXA 6 9620 kc/s. A3 20 kW.

Standard time is GMT less 3 hours.

Direction Finding

There are 2 radio beacons specially for maritime navigation. Both operating on circular sweep from the lighthouses at Cape Polonio and Isla de Lobos.

Cape Polonio at 34° 24′ 00″ S. and 53° 47′ 45″ W. frequency 295 kc/s. A2 range 380 miles, and 500 kc/s. A1 A2.

The signal is P repeated 3 times in 10 seconds followed by 18 dashes in 30 seconds, repeat P 3 times and 10 seconds silence total period 1 minute. This is repeated 4 times after 5 minutes silence, total 10 minutes.

In good weather transmission must be requested from CWM 21 on 500 kc/s. A1 A2. In fog, there is continuous transmission from the hour.

Isla de Lobos 35° 01′ 33″ S. 54° 53′ 17″ W. frequency 300 kc/s. A2 range 380 miles. The signal L is repeated 3 times in 10 seconds, followed by 18 dashes in 30 seconds, repeat L three times, silence 10 seconds. Total period 1 minute, repeated 4 times, then 5 minutes silence total period 10 minutes.

In good weather this transmission must be requested from CWM 26 on 500 kc/s. A1 and A2.

In fog transmission is continuous from 05 minutes in each hour.

There are also the following airbeacons which can be used.

		S.	W.	kc/s.	
Colonia	COL	34° 27′ 33″	57° 45′ 49″	203	A 2 0.075 kW. cont.

Punta del Este	CB	34° 55′ 00″	54° 55′ 00″	325	A 2 occasional only.

GENERAL INFORMATION:

River Uruguay

Rises in Brazil, and later separates Argentina and Uruguay. Its right bank is generally low, wooded and swampy, the left bank high and hilly. Preparatory work has commenced on a large hydroelectric dam to be built at 332 km., above Concordia, which will take some years but will contribute to a regularisation of the river, which at present rises and falls twice every year, with the varying rainfall seasons in its basin, so that approximately half the year the water is low, usually from January to April and again in August. However, the wind also affects the depth of the water as in the River Plate, so that any seasonal forecast is impossible. A safe year round draft to Concepcion del Uruguay can be taken at 20 ft. 6 in., though vessels from time to time load to 22 ft. 6 in.

The Ministry of Marine publishes fortnightly a bulletin with all information on depths of water in the channels, as well as of changes in buoys, lights, etc.

Two new bridges communicating with Argentina now span the Uruguay river at Fray Bentos and Paysandu. The bridge at Fray Bentos has a clearance of 36 m. over zero, and a main span of 220 m.

CARGO

Movement of Cargo

Once stevedores have come aboard, no cargo, either for the port or in transit, may be handled by the crew, as otherwise the vessel will be called on for high extra wages to stevedores. This also affects the lashing of transit cargo on deck.

Stevedores will not work in the rain, except when loading meat, earning double wages while doing so. They can also be persuaded to handle baggage or mail.

When handling dusty cargo in general, or which gives off ammoniacal, nicotine, or organic emanations, masks must be provided for stevedores' use.

Overcarried Cargo

Cargo for Montevideo is often overcarried to Buenos Aires with the consequent delays in delivery and expenses for the vessel. Holds should be carefully inspected as soon as discharge is said to have been finished to avoid possible overcarrying.

Clean Receipt

Agents will advise if they wish to receive any cargo for which a clean receipt cannot clearly be given, otherwise the cargo should be rejected. Mate's receipts cannot be claused to cover any damage from rain, wetting or other causes which might be sustained after the cargo is received on ship's tackle.

Bulk cargoes falling or drifting into water or on dock

When handling bulk cargoes vessels must place between the vessel and the dock side a wooden scaffolding, with lateral boards, or strong canvas to collect all material which is liable to fall into the water or on to the Dock during handling. There is a heavy fine for non-compliance.

This should be remembered when writing charter parties, especially under FIO conditions, as this should be for account of shippers or receivers.

Delivery of cargo from vessels

The cargo is discharged direct to Fiscal Warehouses, to lorries, lighters or wagons. When the cargo is delivered to Fiscal Warehouses, receipt for this is given to the vessel's agents by the Custom House official in charge of the Warehouse. If discharged to lighters the lighterman obtains receipt from the Custom House official once the cargo is received in warehouse. When the cargo is delivered direct to Consignees' lorries, the receipt is given by special Custom House officials called "Cargo Receivers".

The goods are delivered by the Custom House officials to the Consignees against the presentation of the "transferencia" (transfer ticket) signed by the Agents of the vessel. The Agents sign the "transferencia" extended on stamped paper, against the Original Bill of Lading, which must be legalised by the Uruguayan Consul at the port of loading.

The steamship Agents must keep a special register of all "transferencias", and are responsible to the Authorities for keeping this register. Agents must retain Original Bill of Lading for cargo discharged, as it must be shown to the Customs Authorities immediately if demanded.

When the Consignees have not received the original documents and they wish to take delivery of the goods from the Custom House they must present a Bank guarantee, drawn up in accordance with the form approved by the Shipagents Association.

Cargo manifested to this country in transit to other countries without documents for Uruguay may not be re-shipped to other countries without government permission.

Marks on goods imported to Uruguay

By a Decree dated 30th January 1939, the Uruguayan Government decided that:

"Packages entering Bonded Warehouse, excepting those containing provisions or beverages, and excepting also 'Barraca' articles, shall be marked with the gross weight, the nett weight and corresponding measurement, in a clear and legible manner. These marks may be either 'fire-branded or printed'.

"The 9th August 1939, the Customs Authorities requested that marks and numbers of cases entering Montevideo warehouses should be placed on the extreme ends".

The Customs Authorities have also made known that it is necessary for the packages entering the warehouse to show their weight and measurement in the decimal-metric system.

The inspection of potato cargoes can be effected on board the carrying vessel, and if found in good sanitary condition, can be discharged direct to shore.

Opening and Closing of Hatches

This can be carried out by either crew or stevedores, and hatches must be kept closed when not in use.

Shipments of Meat

These are controlled by the Ministry of Agriculture, whose inspectors check ships' holds before shipment can commence. Holds must be clean and disinfected and temperature controlled to minus 1° to a maximum of plus 1° Celsius for chilled meat, or minus 10° for frozen meat.

Chilled is to be hung on hooks adjustable for height and space and stow of frozen must give a uniform distribution of weight. Alternatively, special cuts are packed and shipped in cartons.

Containers

Use of containers is very limited, since these must be opened up and emptied on the dock alongside, or even on board the vessel. The container itself is considered as part of the vessel's gear, and must be reshipped without delay.

On rare occasions the Armed Forces have had containers moved out to their barracks.

The Port Authority is buying a crane to handle containers of 8 ft. × 8 ft. × 20 ft. and a maximum loaded weight of 44,800 pounds.

Consular Dues

All ships arriving at Montevideo must pay Consular dues, with the following exceptions:

Ships that due to a change en route, or by special call of their Agents in Uruguay, during passage, arrive at Montevideo with the sole purpose of receiving orders, as long as no commercial operations are effected.

Ships arriving in distress and which leave port without effecting operations.

Ships arriving for the sole purpose of landing or embarking pilot.

The Ministry of Foreign Affairs consider bunkering as an operation, therefore ships calling at Montevideo for bunkers must pay Consular dues.

Consular value of the Uruguayan Peso – For the payment of fees abroad, the Executive Power will fix periodically the respective values of the peso, in accordance with exchange fluctuations.

Hours of Attendance at the Uruguayan Consulates – The Office hours of the Consulates will be those fixed by the Government in agreement with the Consuls in each country, endeavouring in each case to have the same working hours as those of the Custom House and other Public Offices of each City. Outside these hours, overtime is charged.

Consular dues on Bills of Lading – When vessels load cargo for Uruguay at ports where there is no Uruguayan Consulate, these dues are collected when the vessel arrives at Montevideo or at any other Uruguayan port. The Agent then recovers these charges from the Consignees.

CREW:

Deserters – Captains and/or Agents must report any deserters when the vessel sails. The Maritime Authorities give intervention to the Police Department, and if the men are located, the Agents must hand them over to the respective Consuls. However, the Agents continue to be responsible before the Authorities for the ultimate repatriation of the men, which must be done at first opportunity.

Vessels are subject to a fine per man. The Agents have also to pay repatriation expenses, in cases where the respective Consuls will not do so.

They must also deposit a guarantee which can be used for repatriation expenses in case the deserter stays in the country for more than 15 days.

Time limit for getting crew members left behind out of the country – According to law, Agents must arrange that such crew members leave the country within fifteen days. This period of grace commences as from the date of vessel's departure in respect of deserters and for those disembarked for medical treatment as from date on which they are medically certified as fit for travel.

Upkeep of men left in hospital or temporarily disembarked and traced deserters – The Agents are responsible for the maintenance of men disembarked for medical treatment, or temporarily with a special Immigration permit, and for deserters, until they leave the Country.

Stowaways – Captains of vessels having stowaways on board must report them to the Authorities, stating their name and port of embarkation. The stowaways must be kept on board. If they escape and are found after the vessel sails, Agents will be responsible for their repatriation and upkeep charges until they leave the Country. As with deserters, vessels with stowaways on board are liable to a fine per man if this regulation is not complied with.

Agents must also deposit a guarantee per man, amount to be used for repatriating the stowaway or for conveyance to the port of embarkation.

Landing members of crew – Paying off men for other than medical assistance is not permitted, but exceptions are granted in special cases. An application must be presented by the Agents to the Immigration Department, and if the permit is granted, a formal declaration is signed by the Captain of the vessel, the Agents, the Immigration Inspector and the person wishing to disembark, setting forth length of time he is going to remain in the Country and conditions of departure. The personal documents of the person allowed to land, remain in charge of the Immigration Board.

If any member of the crew is landed for medical treatment or paid off without the corresponding permit, the vessel will be fined.

Gangways and Rat-Guards

A gangway must be placed and ready after a vessel comes alongside the quay, but this must not be presented before coming in to the quay. Authorities will only come aboard by the gangways.

Gangways must also have a lifebuoy with suitable line attached and handy, and a safety net must be placed under the gangway, otherwise shore labour will not board vessels, with consequent delay.

The gangway must also be brightly illuminated at night; an oil lamp is not sufficient.

As soon as vessel is securely moored, regulation size (not less than 80 cms.) rat-guards must be placed on all ropes, wires, fenders, lines and hoses.

Heavy fines are imposed for non-compliance with any of these or other regulations.

Overside Discharges

All overside discharges from latrines, bathrooms, gallery, scuppers, engine room, etc. must be screened or covered when vessel is alongside the quay, as vessels will be fined if the discharge falls on the dock or gangway.

Adjustment of Compasses

Vessels proceeding through Magellan Straits – The disposition issued by the Chilean Shipping Authorities on 13th April 1953, states:

"When a foreign ship arrives at the Magellan Straits and applies for a pilot, official or private, for navigating the Channels, the Pilot must first check the compass for deviations of more than 5 degrees, and if such deviation has been determined more than 6 months ago, especially in a place with great difference of latitude or different hemisphere, compensation of compass is obligatory when not in true order, and a written declaration to this effect will be made in the pilotage agreement. The Authorities will also send an officer to verify that the compass is in satisfactory condition before entering the Straits".

To avoid probable delays, ships heading for the Straits can make the necessary compensation in the Port of Montevideo or in the ante port whilst waiting for orders for departure. This port is most convenient for this class of compensation because at the present moment there is no magnetic variation and also because it is a quiet harbour with sufficient depth for turning. A compass adjuster may be obtained at any time.

200 Mile Limit and Fishing

Uruguay has declared sovereignty over 200 miles off shore, reserving all fishing and undersea exploitation rights. A number of foreign flag vessels fishing without permits have been seized and heavily fined, their catch and gear being confiscated.

Permits are obtainable, but in no case for vessels over 500 tons gross, to operate within sixty miles from shore, while all activity in territorial waters (200 miles) is forbidden in the months of May and June.

Garbage

Garbage is collected every morning by truck. There is a strict prohibition of dumping anything into the port, and oil tanks must not be cleaned within 30 miles of the coast, and on a falling tide.

Old dunnage should not be dumped or sold, without permission from the Authorities, through Agents.

Ships' Boats

Use of ship's boats is forbidden within the port, unless they are being lowered, with prior permission, for maintenance or exercises.

Fenders

All vessels must have at least 2 large fenders, to keep them 5 feet or more off the quay. If the vessel has no fenders, or due to deck cargo cannot use them Agents should be warned in advance to rent the necessary equipment and have it ready on arrival.

Dropping Anchor when Berthing

If an anchor is dropped when approaching a dock to berth, to control the vessel as she moves in, it is essential that the anchor should be hove in again once the ship is moored. Port regulations require this and any damage to other craft, real or imaginary, through fouling anchor or chain, would cause considerable trouble.

COLONIA: 34.28 S. 57.51 W.

On the right bank of the River Plate from seaward exactly 27 miles in a straight line E.N.E. of Buenos Aires, to which it is connected by ferry and hydrofoil services.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

DESCRIPTION: There are 3 accesses to the port, of which only 2 are of use to ocean-going vessels. Canal del Medio, for those coming down river, with 18 ft. and Canal Gabriel from S.W.

The port consists of an angled breakwater, and a basin with 3 quays. One of these, with 15 ft. is used for ocean-going vessels and has 4 × 3-ton cranes and 2 × 5-ton cranes.

The West quay is for coastal vessels, with only 13 ft. of water.

FUEL: Not available.

FRESH WATER: Available.

MEDICAL: Attention available.

CONSULS: Argentine, all others at Montevideo.

FRAY BENTOS: 33.06 S. 58.18 W.

Km 95 River Uruguay. On the right bank of the River Uruguay from seaward 213 miles by river from Montevideo or 145 miles from Buenos Aires.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

RESTRICTIONS: Vessels loading should pay particular attention to the daily river and draft forecast issued by local authorities. Draft depends on depth at the Marques and Punta Caballo passes.

MAX. SIZE: For berthing maximum draft 26 ft. fresh water, depending on river conditions.

BERTHING: Official Pier: 325 m. long, depth in deepest berths 26 ft. Grain and general cargo handling. Railway Pier: 1 berth, depth 26 ft., used principally for discharging coal. Anglo Pier: Depth alongside 26 ft., used for loading frozen meat and products.

STEVEDORES: Working hours: 0700 – 1100 and 1300 – 1700. Saturdays: 0700 – 1100 hrs.

MEDICAL: Doctors and hospital facilities available.

FRESH WATER: Obtainable from berth at Official and Anglo Piers.

FUEL: Not available.

REPAIRS: Only minor repairs can be effected.

CONSULS: Argentina is represented locally. All others at Montevideo.

MONTEVIDEO: 34.55 S. 56.13 W. (See Plan Book)

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

APPROACHES: The Roads of Montevideo consist of the Outer Roads situated to the South of the bay and Inner Roads situated outside the Western breakwater.

Both anchorages are very exposed and vessels are recommended to enter the anteport.

The entrance channel has 30 ft.; the channel to Ancap's wharf (La Teja) 30 ft. 6 in. Basins 1 and 2 have a depth of 28 ft. to 31 ft., and the River Traffic Basin, 15 ft. These depths depend on dredging being maintained, but even so vessels often "drag" when on the higher marks; the bottom is fine soft silt.

PILOTAGE: A system of ship control has been set up for Montevideo and its approaches.

The system of control and information comprises:

1. *Zona "Alfa"*. Zone of the River Plate, situated between Long. 55° 30′ W. and 56° 15′ W., the coast and the limit of the River Plate with the Argentine Republic.

2. *Zona "Bravo"*. Zone between the meridians which encompass Punta Yeguas and Punta Brava, the coast, and parallel Lat. 35° 01′ S. It also comprises the Access Channel of the Port of Montevideo, Anteport, Basins, the channel to the Inflammables Basin, and the Inflammable Basin (ANCAP).

Control and Information Centre:

1. The system is controlled from the Prefectura Nacional Naval, Pilot Office, situated on floors 11, 12 and 13 of the Edificio Aduana, Lat. 34° 54′ 07″ S., Long. 56° 12′ 07″ W. (Custom House Building).

2. The call-sign of the Control and Information Centre is CWC104, henceforth to be known as Control Montevideo Prefectura.

A — *Channels and Frequencies.*

The Channels for transmission and reception to be used are the following: (it is intended to utilize Channels which will not interfere with 12 and 14, used by the control and security system of the River Plate of the Argentine Prefectura Nacional Maritima).

Channel	*Frequency*		*Employment*
16	156.800 mHz		Call-sign and Security
11	156.550 mHz	(3)	Broadcast by the Centre Calls to the Centre by vessel navigating in Zone A; eventually Zone B.
13	156.650 mHz	(4)	Broadcast by the Centre Calls to the Centre from vessels navigating in Zone A, eventually Zone B.
9	156.450 mHz	(5)	Port Operations
10	156.500 mHz	(9)	Port Operations and eventually Channel 11
15	156.750 mHz	(14)	Emergency (to be installed)
6	156.300 mHz		Inter-ship calls
8	156.400 mHz		Inter-ship calls

B — *Listening-out by Vessels.*

1. Vessels will maintain a listening-out watch on Channel 16 from the moment they enter the Zones of the system until they are tied up alongside, in the Port of Montevideo, or until they leave the Zones of the system.
2. Whenever a vessel may not, for some reason, listen-out on Channel 16, it will pass to Channel 11 or 10, informing the Control and Information Centre of this.
3. In Zones A and B, vessels will communicate with the Centre on Channel 11 (eventually 10).

C — *Language.*

The personnel operating the Centre use Spanish. Any vessel which cannot use the Spanish language may do so in English, and if any further difficulties are encountered, may make use of the international code, the international word/letter system or the 'Q' code.

D — *Communications from Ships (Messages).*

Ships navigating in Zone:

1. ALFA: Must inform the Centre of the following details:
   a) Entering the Zone: Flag; Name of the ship; Destination; Position (Lat., Long., and time); Course and Speed; ETA Channel Entrance Buoy; Max. Draft.
   b) During navigation her position: Abreast of Flores Island; Abreast of the Channel Entrance Buoy; If comes to anchor in any position in the Zone.
   c) Leaving the Zone.
2. BRAVO:
   a) Dropping or weighing anchors in the Roads.
   b) Will inform the Centre, while navigating in the channel or within the port: Passing the "Calpean Star"; Passing the breakwaters; Anchoring in the Anteport; Docking or Undocking in Basins; Dropping or weighing anchor in the Zone.
3. IN ALL ZONES: Must give the following information to the Centre:
   a) Any accident, damage, or fire on board the vessel.
   b) Any assistance rendered to any other vessel in distress or in difficulties.
   c) The sighting of any object hazardous to navigation which is not buoyed.
   d) Any marked reduction in visibility.

E — *Further communications to the Centre.*

1. Regarding Pilots:
   a) That which is specified by the General Pilot Regulations.
   b) Time of boarding or disembarking.
   c) Request from the Master to change anchorage or berth.
   d) Any possibe difficulties in pilotage.

F — *Other requirements*

a) Any vessel taking up a mooring, unmooring or anchorage, must request to carry out the manoeuvre required. It is to be understood that the Master will have complied with all the necessary formalities required by the Authorities for entry or departure of the vessel.

b) This permission expires automatically after 15 minutes of its being given further permission must be applied for in order to carry out the manoeuvre.

G — *Information Service*

The Centre will issue:

1. Notices to Mariners at 0900 hrs. and at 1500 hrs. local time. Urgent information will be broadcast immediately it is received.
2. Meteorological reports every 4 hours commencing at 0001 hrs. local time.

The Centre will provide to any vessel information with regard to Maritime Traffic, weather, security in navigation, and any port information which may be used to speed up or aid the vessel's future operation.

e Eastern breakwater projecting from Punta Sarandi is 940 m. long and the breakwater lying to the West at right angles with the Eastern one is 1,300 m. long. The passage between the 2 breakwaters is 300 m. wide.

ANTEPORT: The Anteport is to the North of the entrance, between the breakwaters, and has 27 ft., but requires dredging, there not being safe room for more than 5 vessels at present.

PORT: The port is formed by the North side of the Montevideo Peninsula and the "Dique de Cintura", a breakwater running parallel to the coast, about 840 m. distant.

It consists of 3 basins, 2 of which are for ocean-going vessels and 1 for river traffic.

Basins 1 and 2 have a depth of 30 ft., and the basin for river traffic 15 ft.

ANCHORAGE: In Montevideo outer or inner roads. Vessels must not anchor within 0.5 mile of the entrance channel to the anteport, nor in the area bounded by Lat. 35° S. and 35° 15′ S. and Long. 55° 56′ 30″ W. and 56° W. where there are submarine cables. Outer roads and inner roads are separated by the Western breakwater. Both anchorages are exposed in bad weather.

Captains of vessels anchoring in the roads should bear in mind that as the bottom consists of soft clay, it does not afford a good hold for the anchors, which are liable to drag during a severe storm. In consequence, precautions should be taken to anchor at a safe distance from other vessels already riding at anchor, and to use a stout anchor and chain, while having another ready for emergency.

A vessel that anchors in the Outer or Inner Roads and does not effect commercial operations is not considered an arrived vessel in Uruguayan waters, and is not boarded by the Authorities.

Semaphores: There are 2 Semaphores, 1 on the corner of Depot 1, on Pier A, which controls traffic in the port and which is in constant touch with Pilots on board through the "walkie-talkie". At night the following emergency code signals are used.

Red light	meaning stop
Green light	meaning proceed
White light	meaning anchor

These are beamed with an aldis lamp to the bridge of the vessel and must be obeyed.

The other semaphore is situated 47 m. above sea level, on the S.W. post of the anemometric tower of the Central office, and indicates wind forecast as follows:

Red Red	strong wind starting to blow from the N.W.
White White	strong wind starting to blow from the S.W.
Red White	strong wind starting to blow from the N.E.
White Red	strong wind starting to blow from the S.E.
Red	strong wind from indeterminate quarter.
Green	winds over 100 km/hour are expected.

MAX. SIZE: Up to 30 ft. fresh-water draft. Also see "Tankers".

TIDE: Rise and fall is nominal, rarely exceeding 1 ft.

TUGS: Compulsory for vessels berthing in the harbour basins. 2 tugs normally used, join vessel in the anteport.

Booms – Masters are reminded that the Port Authorities require a special boom to be placed on the side of the vessel where the nose of the tug will push, to avoid damages and subsequent claims.

BERTHING: Anteport: 7 anchorage berths in 28 ft. depth. However in practice there is rarely room for more than 5 vessels to anchor. Basin No. 1: 7 berths, 28 to 33 ft. depth alongside. Basin No. 2: 4 berths, 28 to 33 ft. depth alongside. La Teja: Ancap basin with berths for 2 tankers 30 ft. depth in basin and entrance channel.

Berths are allotted by the Port Authorities in the order of arrival of the vessels and according to their category, as follows:

1. Mail vessels.
2. Regular Line vessels carrying immigrants.
3. Cargo vessels.
4. Sailing vessels.

The Authorities allocate the deposit at which vessel must discharge or load.

Port Authorities give preference at Deposit No. 10 to ships operating with refrigerated cargo from this Deposit; and at Deposit No. 11 (Florida Wharf) to tankers discharging to the pipe-line situated there. Conditional that they vacate the berth within 2 hours notice, to permit berthing a preference vessel, other ships may operate at either berth.

Muelle de Escala – On the pier head, formed by the Southern side of the River Traffic Basin, and running Westwards, a quay has been built, known as "Muelle de Escala", 288 m. long, originally constructed for berthing passenger liners and war vessels, but now only used by cargo vessels, loading and discharging, when there is port congestion. There are no shore cranes and work is very slow, nor are there shore deposits. A fixed heavy lift boom capacity 200 tons is placed at the East end.

The berth is very exposed to wind and swell, and Masters are recommended to take every precaution to ensure their vessels are strongly moored and a lookout kept for changes of weather which, locally, are very sudden.

The depth of water alongside depends on dredging, but generally is over 28 ft.

River Traffic Basin – This basin is situated on the Western side of Pier "A". It is 400 m. long and has a passenger landing station on one side. The opposite side of the basin is used for coastal vessels, but mainly by the Navy.

2 warehouses, called Warehouse "A" and Warehouse "B", have been built on the East side of this basin and are serviced by 3 electric cranes. In addition, there are on the quay a 1.5 and 6-ton steam crane, which are employed when necessary.

These berths can only be used by light-drafted vessels, as depth of water is around 16 ft.

Basin No. 1 – This basin is situated between piers "A" and "B". Its entrance between the "Dique de Cintura" and the pier head "A" is about 150 m. wide. It encircles a total mooring space of 1,093 linear metres and 7 vessels can comfortably berth along the quay walls.

Pier "A" is 501 m. long on the West side; 306 m. on the East side, and 50 m. wide at the Northern pier-head.

On this pier 2 brick and concrete warehouses, Nos. 1 and 2, have been constructed, consisting of a ground floor, 3 storeys and a basement.

On the City side of Basin 1, there are 3 brick warehouses, numbered 3, 4 and 5, consisting of a ground floor of between 17,800 and 19,600 cu. m. capacity.

On the Western side of Pier "B" facing Basin No. 1, there are 2 brick and concrete warehouses, Nos. 6 and 7, with a ground floor and 1 storey having a capacity of 30,174 and 33,140 cu. m. respectively.

In Basin No. 1, berths Nos. 1, 2, 3, 4 and 5 are generally used for the discharge and/or loading of liners running to timetable.

Depths alongside vary, as it depends upon dredging, but generally are 26 ft. to 30 ft.

Basin No. 2 – This basin is situated between Pier "B" and the foot of Florida Street. The entrance to this basin is also about 150 m. wide. It has a total mooring space of 722 m. and it can accommodate 4 vessels.

Pier "B" is 294 m. long on the Western side, 328 m. long on the Eastern side, 148 m. at the Northern pier-head and 13 m. wide on the bend at the Western corner of the pier-head.

At the Northern end of pier-head "B", livestock is embarked. This berth is also used for general cargo operations in times of congestion. Moorings must be strong and carefully watched as the berth is very exposed to wash of passing vessels.

There are 2 warehouses on this pier, numbered 8 and 9, facing Basin No. 2, built of brick and concrete, with a ground floor and 1 storey and with a capacity of 33,320 cu. m. each. On the city side, there are 2 warehouses, built of brick, numbered 10 and 11, consisting of a ground floor with a capacity of 15,362 cu. m. each. Warehouse No. 10 carriers an additional storey, and is being used for refrigerated cargo. Vegetable oils can also be loaded at Warehouse 11 berth ex pipe-line from 4 storage tanks each of a capacity around 1,250 tons, in the vicinity.

Depths of water alongside vary, depending upon intensity of dredging but are generally 28 to 30 ft.

Coasting Quay Wall – From Florida Street to Mole F, which is the end of the Port, and over a distance of 1,900 m., there is a quay used for coastal craft, and on part of which a fish-receiving and industrialising plant is being opened; depth in this zone is 15 ft.

A floating dock is also anchored in the N.E. part of this section.

Basin For Inflammables "La Teja". (Also see "Tankers".)

On the North side of the Bay, the National Administration of Alcohol, Cement and Fuels, known as A.N.C.A.P., has a basin with concrete walls for the discharge of tankers arriving with oil to their consignment. This basin is known as the "Darsena de Inflamables", and has 1 berth for tankers on the North side in 30 ft. 6 in. and for liquid gas discharge on the Southern side, max. draft 22 ft., while on the West or land side there is a berth for coastal vessels. Width of the basin here is 147 m., which is the same as the entrance, while the South berth is 248.75 m. long. On the North berth the jetty protrudes 34 m., and is 96 m. long.

Vessels berth bows to shore, and on leaving turn immediately outside the basin, if draft is less than 22 ft., otherwise they must reverse back down the narrow access channel.

The North berth has separate lines for Crude, 10 in. and 12 in. maximum pressure 105 lbs. Fuel Oil, 8 in. and 10 in. with a pumping rate of 300 t.p.h. at temperatures between 40° and 70°C. Diesel/Gas Oil/Kerosene 6 in. connections and pumping rate of 300 t.p.h. Naptha 8 in. Lube oils 6 in. lines, 150 t.p.h. and a line for Alcohol 6 in. There is no line for Gas. There are 3 × 5-ton electric cranes and 1 × 12-ton diesel crane. Coal and Cement are also discharged at this berth, the coal to Decauville cars and the Cement to trucks, handling 750 tons per 8 hour day, with 5 gangs.

At the South berth the oil lines are identical, and there is also a 6 in. connection for loading or discharging Super Gas, at 200 t.p.h. There are no cranes at this berth.

The Western berth has the same installations except for Super Gas and Alcohol.

There are 3 in. water lines at each berth, and use of 2 tugs is essential for berthing or unberthing. At the North berth, vessels fully loaded often lie up to 15 m. out from the quay, owing to accumulation of mud, and will gradually close in as the vessel lightens. Access gangways are placed by the Port.

Railway Connections – Basins 1 and 2, River Traffic Basin and also Deposits "A" and "B" have railway lines on all sides, belonging to the Port Administration, which are connected with the main lines of the Uruguayan State Railways.

The Port Administration has 2 electric locomotives used exclusively in the port.

Cranes – The Port Administration has 1 heavy-lift floating crane of 80,000 kilos, a mobile crane of 20,000 kilos, also 46 movable electric cranes of 5,000 kilos each; 5 movable electric cranes of 1,500 kilos each; 1 fixed electric crane of 4,000 kilos; 33 of the aforementioned 5,000 kilos cranes, are placed alongside the quay walls for vessel's operations.

There are also 24 electric trolleys of 1,500 kilos, and one of 1,000 kilos. There is a fixed crane for 200 tons on Muelle Escala.

Fiscal Lorries – The Port Administration has purchased special lorries and 12 auto cranes for receiving cargo, as the railway wagons available are not sufficient to carry all the cargo that is at present being handled at this port.

Loading Operations – Loading is effected from carts, lorries and/or wagons and the cargo is hoisted on board with the cranes. Cargo is also loaded from lighters.

Grain Loading – There are 2 Mobile grain vacuvators, each of which can load bulk grain at around 35/50 t.p.h, also 10 smaller machines that can each load around 20 t.p.h.

Fumigation – Montevideo is the only port in Uruguay at which vessels can fumigate, using the Cyanide method. The tariff is per cubic metre fumigated over a basic charge which varies according to nrt. There are surcharges for overtime.

Disinfection of Mail Bags – To avoid delay through disinfection mail bags can be fumigated on board in a 10% formalin solution and kept in a closed space for 4 hours before vessel gets into port. The closed space will be opened in the presence of a Health officer who will verify the use of formalin. When in doubt, fumigation will be carried out again and exposed for 2 hours.

Height of Quay above water – Tide being very small, the height of quay above water only varies from 8 to 10 ft. at low water to 10 to 12 ft. at high water. Wind influence is felt even in the bay, as a South wind will raise water as much as 5 ft., or a Northerly wind reduce it 2 or 3 ft.

New Equipment – In process of supply:

Fork-lift trucks – 3 of 5 tons and 1 of 6 tons, to lift to 3 m.

Container lifter – 1 to lift to 22.4 short tons, size 8 ft. × 8 ft. × 20 ft.

Fork extensions for fork-lift trucks in use – 25 pairs.

Mobile cranes (diesel) – 2 capacity 7.5 tons with telescopic arm up to 10 m., turning through 360°; 8, capacity 7.5 tons, fixed arm; 1 capacity 10 tons with telescopic arm up to 12 m., 360°; 1 truck-mounted crane no less than 60 tons, with arm not less than 21.5 m.

Pallets – material for making 15,000 pallets, in 2 sizes.

Slings for these pallets, also for heavy-lift cargo for use with the mobile cranes.

Lighters – 7 new lighters, ranging from 100 to 400 tons.

STEVEDORES: Working hours: 1st shift, 0700 to 1300 hrs.; 2nd shift, 1300 to 1900 hrs.; 3rd shift, 1900 to 0100 hrs.; 4th shift, 0100 to 0700 hrs.

Normal capacity per gang per hour: *(a)* Rice – about 80/90 tons per gang/hour. *(b)* Meat – about 60/100 tons per gang/hour.

Overtime is compulsory if port is congested.

Lavatory Conveniences for Shore Labour – Each vessel must furnish conveniences for all shore labour employed on board. Work has been stopped until such conveniences are installed. It is advisable, therefore, for vessels calling at Montevideo to be equipped with 2 spare lavatories, 1 for talley clerks and 1 for stevedores, etc.

FRESH WATER: Fresh water is supplied by the Port Authorities at all quay berths. Request must be made through the Agents, vessels supplying their own hoses where possible. It is important that the water meter should be read together with the Port official both at connecting and disconnecting to verify the exact quantity. The cost of water is high.

FUEL: All grades available by barges during loading/discharging. Vessels calling for bunkers only are refuelled in the anteport. There are 2 barges, capacities respectively 311 tons and 598 tons.

TANKERS: Apart from La Teja Basin, mentioned above, tankers discharge in Basin No. 2 at Muelle Florida. Distance to oil tanks is considerable and discharge rate is about 80/100 t.p.h. Heavy grades of cargo require high heating to facilitate discharge.

At La Teja, vessel's max. dimensions LOA 230m., Draft at HW. 31 ft. Max. d.w.t. 35,000. Max. loading rate 300 cu.m./hour. Max. discharge rate 850 t.p.h.

REPAIRS: All repairs possible.

DRY DOCKS: 2 dry docks available: Nacional, length 463 ft., width 61 ft. Maua, length 260 ft., width 28 ft. Also a floating dock, lifting capacity 12,000 tons, 545 ft. long and 93 ft. wide.

Entrance is by turn, counting from presentation of the application, but this may vary.

(a) when the vessel has damage to repair.

(b) when there is a fixed sailing date.

(c) when a vessel requires a dock for no more than 4 days, and is preceded by 1 requesting 15 days or more.

(d) when by reason of size a vessel cannot enter with another which is on turn.

(e) national Naval vessels.

GANGWAY/DECK WATCHMEN: Shore watchmen compulsory. Arranged by Agents. 1 required on deck and 1 for each gangway. Vessels carrying dangerous cargo must also employ a guard of the Prefectura.

Vessels calling for supplies only, for orders, in distress or to land sick crew members or to enter dry dock, need not employ Watchmen. Repairs afloat require a watchman, if they do not carry out commercial operations.

Shifts are of 8 hours, commencing at 0700 hrs. Vessels under repair, and those at Ancap moles may fix 12-hour shifts, paying a shift and a half.

If special watchmen are required for goods or working equipment, application must also be made to the Union.

If watchmen are needed in the holds, same applies.

Regulations also require a watchmen in the holds wherever the ship has a crew member, cadet or officer permanently on watch to prevent pilferage. However, where ship's personnel are in the hold to watch the stowage of the cargo, no extra watchman is required. Masters should therefore, advise Agents if they intend to place crew members permanently in the holds during discharge, so that Agents can advise the Association before they make their claims.

Care must also be taken on arrival, since the watchman is on duty from 0700 hrs. on, whereas it may be necessary to place the gangway safety net, etc., before that time, so that Pilot may disembark.

Only those involved in this operation should go ashore. The Receiving Commission may ask for the gangway to be opened before 0700 hrs., which is in order, but no one else should use the gangway to avoid claims from the Union.

Vessels lying in the anteport must provide launches for the transport of watchmen employed.

DENSITY: This varies according to wind and tide. The degree of salinity is broadcast daily in the weather reports by radio, and varies from fresh to brackish to sea water. Steady South winds give the highest degree of salinity.

LAYING UP MONTEVIDEO: Montevideo Ante-Port is considered the most convenient and cheapest place for vessels arriving in the Plate in ballast, unfixed, to anchor, lay up or await orders.

Vessels could subsequently load at any of the Argentine or Uruguayan River Ports and would also be in a handy position to load at an Argentina South Atlantic coast port. She could also be ordered away again from the Plate in ballast having incurred no heavy pilotage bills or other expenses, as would be the case had vessel proceeded up to, and anchored in Buenos Aires Roads, or entered an Argentine port.

The expenses at Montevideo, including inward and outward pilotage, light dues and clearance, are not high, and no written permit is necessary for a vessel to lie in the anteport, but the permission of the Captain of the Port must be obtained in each case.

This permission will not be refused unless there is congestion in the anteport.

No vessel can be laid up at Uruguayan ports, unless a responsible shipping Agent is nominated to attend.

HOLIDAYS: 1st and 6th January, Carnival Monday, Shrove Tuesday, Easter (6 days), 19th April, 1st and 18th May, 19th June, 18th July, 25th August, 12th October, 2nd November, 8th and 25th December.

AIRPORT: International airport with world-wide connections.

TIME: GMT minus 3 hours. Summer time may be kept.

SHORE LEAVE: Allowed.

TELEPHONES: Can be connected on board vessels berthed at the quays.

AUTHORITY: Administracion Nacional de Puertos.

NUEVA PALMIRA: 33.53 S. 58.25 W.

Situated on East bank of Uruguay River, 155 miles above Montevideo. Km. 0 on River Uruguay.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

RESTRICTIONS: Vessels loading should pay particular attention to the daily river draft forecast, issued by local authorities. Draft controlled by depth of San Pedro Channel.

ANCHORAGE: Off Montevideo.

MAX. SIZE: Up to 25 ft. draft fresh water depending on river conditions.

TUGS: Not required. Mooring launches available.

BERTHING: Manganese Pier: Depth alongside 24 ft. Loading rate: 600 t.p.h. Pier Head Berth: Depth alongside 24 ft. Grain loading.

STEVEDORES: Working hours: 0700–1100 and 1300–1700 hours. Saturdays: 0700–1100 hrs.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Obtainable from berths.

FUEL: Not available.

REPAIRS: Only minor repairs can be effected.

GENERAL: Refer to "Montevideo" for all general information.

PAYSANDU: 32.18 S. 58.06 W.

Situated on the East bank of Uruguay River, 380 kms. above Montevideo.

Km. 204 on River Uruguay.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

RESTRICTIONS: River navigation controlled by depth in the passes at Almiron, Vera and Urquiza. Since river conditions vary from season to season, Agents should be consulted beforehand regarding available draft at any particular time.

ANCHORAGE: Off Montevideo.

MAX. SIZE: Up to 20 ft. draft fresh water, depending on river conditions.

TUGS: Available.

BERTHING: Grain Elevator Berth; 30 ft. depth alongside. General Cargo pier has been demolished. Coastal Berth: Length 300 m. Depth 4.5 m. Ancap Pier: 1 berth for tankers, 22 ft. depth.

There is 1×5-ton crane on the grain quay, and 3×3-ton cranes on the coastal berth. Loading on the Ancap berth is by lorry.

STEVEDORES: Working hours: 0700–1100 and 1300–1700 hrs. Saturdays: 0700–1100 hrs.

MEDICAL: All assistance available.

FRESH WATER: Available at all berths.

FUEL: Not available.

REPAIRS: Minor repairs can be effected.

CONSULS: Local representation for Argentina, Brazil, Italy and France. All other Consuls at Montevideo.

GENERAL: Refer to "Montevideo" for all general information.

NOTES

Please also advise Shipping Guides Ltd.

Venezuela

GENERAL: *Berthing Priority:*

The Venezuelan Ministry of Communications has decreed, through the Directorate General for Transport and the Port Captaincies, the following new docking priority system:

1. Vessels owned by the C.A. Venezolana de Navegacion or chartered by that company.
2. Venezuelan vessels belonging to private companies.
3. Vessels of other countries.

Previously, vessels chartered by the C.A. Venezolana de Navegacion did not get priority treatment and it is understood that, with these new priorities, the number of vessels with docking privileges has been tripled, thus resulting in greater delays for vessels operated by foreign companies.

AMUAY BAY: 11.46 N. 70.15 W. (See Plan Book)

OPERATORS: Lagoven, S.A.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Amuay Bay. During hours of darkness all vessels must identify themselves on arrival either by radio-telephone or aldis, preferably the former.
2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Amuay Bay, certain information must be radioed prior to arrival to avoid heavy fine and/or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Ballast disposal facilities are available at Amuay Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and for movements inside the bay.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by ships anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's chest must be presented to Authorities on arrival.
7. Emergency fire signal is 5 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.
8. Ratguards must be in place on all mooring lines.

LOCATION: The port of Amuay Bay is located on the Gulf of Venezuela, on the West Coast of the Paraguana Peninsula, Venezuela. The seabuoy marking the entrance to the bay is located in Lat. 11° 44′ 25″ N., Long. 70° 14′ 50″ W.

DOCUMENTS: Inward clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from last port (Consul Mail) 1 visaed.
Ballast Certificate from last port (1 copy, visaed according to paragraph *(a)* if there is no Venezuelan Consul).
Crew Lists (5 copies).
Passenger Lists (5 copies visaed).
Baggage List (3 copies visaed).
Lists of Personnel Effects (3 copies not visaed).
Store Lists (3 copies, see note below).
Lists of Slop Chest (3 copies not visaed).
Sailing permit (Zarpe).

Vessels arriving with cargo to discharge, will also require:

Manifest (Sobordo) (1 original visaed and 2 copies not visaed from each loading port).
Consular Mail (1 sealed envelope from each loading port).
Bills of Lading, 1 original and 1 copy visaed, and 4 copies not visaed from each loading port.
Tally Books (6 from each loading port).
Consular Invoice (3 originals visaed and 3 copies not visaed from each loading port).
Commercial Invoices (3 from each loading port).

Note: 1. The Store and Provisions Lists may be prepared on board prior to arrival unless the ship is coming from the Netherland Antilles, the Guianas or any other islands in the Antilles which have not attained independent status, in which case 2 copies must be visaed by the Venezuelan Consul at the port of departure.

2. The Slop Chest List is not required if included in the Provisions List.

(a) Cargo and clearance documents should be visaed by the Venezuelan Consul at the last port of call. In the absence of a Venezuelan Consul, they may be visaed by the Consul of a friendly nation, by the Chamber of Commerce, or by 2 reputable merchants, the latter's signatures to be notarised. In the absence of a Venezuelan Consul the following notation should be written on each document, in Spanish, and signed by the alternates designated above:

"Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento."

(Signature) ....

Although vessels proceed directly to Amuay Bay, clearance documents should be prepared showing the port as Las Piedras, Paraguana (Amuay Bay). Failure to observe this requirement may result in penalties up to a maximum of Bs.2,000.

Admeasurement Certificate: All ships calling at a Venezuelan port for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, or any other certificate with which Venezuela is in agreement, which is used as a basis for recalculating tonnage under the Venezuelan Regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call. Vessels registered in the following countries are excluded from the above regulations: Netherlands, Germany, France, Portugal, United Kingdom, Denmark, Sweden, U.S.A, Ireland and Norway.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to "Lagomar-Judibana" prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival.
Last port of call
Port for which originally cleared
Grade and quantity of cargo to be lifted.

This information is required in order to make in advance special arrangements for inward clearance, to avoid payment of fine.

Outward clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form, delivered on board on arrival, must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information by the Captain of the Port.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Marine Department will arrange for Pilots to board all vessels as necessary.

The Pilot acts in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

ANCHORAGE: For vessels awaiting berth, there is a good anchorage about 1 mile N.W. of the seabuoy in 8 to 12 fathoms with a sand and mud bottom. Ship Masters are requested not to anchor at a distance greater than 3 miles from the seabuoy.

RESTRICTED AREA: A restricted fishing area has been established by the Venezuelan Government which is prohibited for mechanically propelled vessels drawing more than 5 ft. This zone lies within the area off the Paraguana Peninsula from Punta Macolla, Lat. 12° 5′ 32″ N., Long. 70° 12′ 55″ W., to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the positions below indicated: Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.; Lat. 12° 03′ 15″ N. Long. 70° 19′ 23″ W.; Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

HEALTH: *Sanitary Inspections:* A close control of veneral diseases has been put into effect by the government Sanitary Office.

Immediately after docking a Sanitary Inspector will board the vessel and all Crew members will be checked before going ashore. Those persons found with infection must be sent to the Government Anti-veneral Clinic for proper medical attention and return to vessel before sailing. 20 Bolivares per ship.

Shore passes will be granted to all wealthy persons.

Masters are required to cooperate in this campaign.

MAX. SIZE: Length 1,000 ft.; draft 43 ft. Also see "Berthing".

TUGS: Tug-boat assistance is considered essential and is afforded all vessels entering, leaving or shifting in the harbour by 2 × 1,600-h.p. tugs. Disposition and manoeuvres of tug-boat are directed by the Pilot, who uses a "walkie-talkie" to convey orders to the tugs.

BERTHING: 4 finger piers provide 8 berths, numbered 1 to 8, from South to North.

	1	2	3	4	5	6	7	8
Max. Arrival d.w.t. (m.t.)	70	92	24	44	16	30	16	30
Max. departure d.w.t. (m.t.)	112	112	48	48	38	38	94	94
Max. Draft (S.W.)	43′	43′	*37.6′	*37.6′	*37.6′	*37.6′	*37.6′	43′
Max. Length Ship	1000′	1000′	650′	700′	700′	700′	856′	856′
Max. Beam	Unl.	Unl.	Unl.	†	†	†	†	Unl.
Bow to manifold distance	495′	495′	300′	320′	330′	330′	340′	340′

Ballast line, fresh water and all grades bunkers at all berths.

*The max. draft will be increased to 40 ft. in 1979.

†Max. beam permissible varies dependent upon the beam of vessel berthed on other side of the slip.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

Products handled:

Berth No. 1 & 2: F.O., heating, heavy distillates, TJ-102, topped crudes, all crudes.

Berth No. 3 & 4: Lubes, F.O., LCT asphalts (penetration).

Berth No. 5 & 6: Naphtha, jet fuel, crudes, F.O., heating, MC/RC asphalts, kerosene, TJ-102, topped crudes, LCT (pref.).

Berth No. 7 & 8: Naphtha, kerosene, heating, F.O., jet fuel, MC/RC asphalts, all crudes except TJ-102.

RADIO: The cable and telegraphic address for the Lagoven S.A. at Amuay is "Largomar Judibana". Radio messages to and from ships at sea are routed through "shipward 2 New York" for retransmittal through aircon system to Judibana (Amuay Bay).

Radio notice of arrival should be sent 72 hours prior to arrival at Amuay.

Ship-to-shore telephone: Radio-telephone listening watches are maintained on a 24-hour basis in the Marine Office on the following frequencies: 2182 kc/s.; 156.8 Mc.

International telephone: International telephone calls are routed through Caracas, Venezuela. Telephone number is Punto Fijo area 069-51557. (It is usually difficult if not impossible to complete a call.) Telex: 54193 Lagoven.

Also see "Documents".

LOADING: Loading rates particulary for low-flash products loaded during the hours of darkness or when topping-off cargo tanks, will be reduced by the terminal to meet existing conditions.

All loading and discharging will be stopped during the passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calm, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping-off, if requested by the ship's officer.

Some of the fuel cargoes are loaded from fuel reservoirs through certified positive displacement meters, and shipping documents are prepared on the metered figures. All reconstituted crudes are line blended with conditions recording of component rates and quantities. Actual loading rates of both this crude and metered fuel cargoes are available at any time upon request of the standby.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on completion of inward clearance. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than this 10% limitation it is necessary to cable New York for confirmation.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "stand-by" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Vessels loading liquid and flaked sulphur: *For vessels loading liquid sulphur, the following applies:*

Location: Pier 2, berth 3 at Amuay Bay.

Draft – 40 ft., length overall – 700 ft., beam – no limitation.

Loading will be at the rate of 400 long tons per hour through a 6 in. line and rubber hose.

Maximum cargo size – 25,000 long tons.

Normal loading temperature is 275° F. Minimum – 265° F. Maximum – 295° F. Density at normal loading temperature is 112 pounds per cu. ft. Viscosity at same temperature is 8.5 centipoises.

Safety precautions/provisions: Molten sulphur classified as "Grade E Liquid" by U.S. Coast Guard. No naked light, open flames or sparks should be permitted near any tank openings. Molten sulphur is combustible but is handled at temperatures below its flash point (325-370° F) and ignition temperatures (476-502° F).

For vessels loading flaked sulphur, the following applies: Physical characteristics of the loading facilities:

(a) Location: Lat. 11° 44′ N., Long. 70° 14′ W. Anchorage approximately 2,000 ft. South Punta Adaro with a depth of 33 ft. 400 yards offshore and dropping off to 50 ft. 1,000 yards offshore. In the rare event that the wind is Westerly the vessel would anchor further offshore.

(b) No draft, length or beam limitation. (Vessels loading up to 24 ft. draft may be anchored inside the bay).

(c) Loaded barges whose overall dimensions are 200 x 42 x 17 ft. will be brought alongside with the aid of tugs and removed when required, barges will be equipped with fenders. The hoppers are 160 × 37 × 14 ft. Loading from barges to ship will be done using ships gear and clam shells of 1.25 ton capacity. Clam shells will be furnished by Lagoven free of charge. Personnel (stevedores) to carry out the loading operation will be supplied by Lagoven or the ships crew can be used if this is set forth in the charter party. Loading rate 1,000 long tons per day.

(d) The anchorage is sheltered in the lee of the Adaro peninsula. Wave heights vary between 1 and 2 ft.

(e) Normal Maximum parcel size – 10,000 tons loaded at a rate of 1,000 tons per day, however, an additional 2,500 tons can be supplied at a loading rate of 500 tons per day.

(f) Flaked sulphur when stored in large quantities varies in density from 55 to 90 pounds per cu.ft. Average density is anticipated to be 70 lbs./cu. ft. Individual flakes are of irregular shape and are less than 0.5 sq.in. in area and less than 0.0625 in. thick. This size data is not a specification nor guarantee and is provided only to indicate the order of magnitude dimensions.

General:

Fee of Bs. 200 will be charged for trips between the Terminal and the anchorage by launch or tug for delivering personnel.

Method of cargo quantity determination: Barge drafts are marked to the nearest inch and capacity tables prepared by Charles Martin. The draft prior to commencement of and upon completion of discharging are noted. The amount transferred is obtained by consulting the tables. The quantity arrived at by totalling the amounts from the barges used is compared to the ships figures and reconciliation reasoned.

BALLAST: Vessels should arrive with sufficient ballast to permit safe handling. The Pilots require a draft of min. 8 ft. forward,18 ft. aft, on a T-2 or similar size tanker, 11 ft. forward and 20 ft. aft on a 26,000 d.w.t. or larger vessel. Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously.

Absolutely oil-free ballast may be discharged overside. All dirty ballast must be pumped ashore. A 30-in. ballast line, 2×60,000 and 1×120,000 barrel slop tanks and separator system are available.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the Lagoven concession, operated by the Society of Catholic Medical Missionaries. Several dentists are located in the area.

Italian Crew members covered by Casa Maritime insurance receive medical attention from the appointed medical representative in Punto Fijo.

Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FUEL: Ship's requirements specifying grade and quantity desired are to be given to the Marine Representative boarding the vessel on arrival. All grades of bunker fuel, intermediate fuels and Diesels are available except Esso diesel. Bunker delivery rates average 2,500/3,500 barrels per hour. Bunkers are loaded through meters which automatically register quantities on bunker receipts.

It is the responsibility of ship's engineer to give "standby" notice to the terminal employee and advise him when to shut down.

FRESH WATER: Fresh water can be supplied if necessary; however, supplies are limited to essential requirements. All fresh water is piped from distant sources. Loading rate is about 10 t.p.h.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer, All firearms and ammunition must be noted on the stores list. Officers must not carry firearms while the ship is in Venezuelan waters and these sidearms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

While the vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in the officers' mess-room, to avoid difficulties.

DENSITY: The usual specific gravity of sea water at the berth is 1025, temperature ranges from 78°F. to 85°F.

CONSULS: Brazil, Great Britain, Italy, the Netherlands, and Norway have consular representatives in the area.

TIME: GMT minus 4 hours.

SHORE LEAVE: Also see "Health". Shore passes will be granted to all healthy persons. A representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the Pilot undocking the vessel. Vessels are not permitted to sail until all Crew members are on board, unless hospitalised or prior arrangements made for disembarking. A letter to this effect is required from the Master.

REGULATIONS: (i) *Pollution:* The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with the greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require that a written report be submitted by the ship involved in the event of an oil spill.

(ii) *Gangways:* All vessels using the port of Amuay must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations, and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(ii) *Passengers:* Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

(iv) *Visitors:* All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

(v) *Rats:* Rat guards required at all times.

GENERAL: *(a) Weather Conditions:* There is little rainfall at Amuay Bay; annual precipitation averages 12 in. The so-called rainy season usually coincides with the Caribbean hurricane season, from August to November, although Amuay lies South of the usual hurricane track. During these months calms are often experienced and winds from a Westerly direction may be expected. Normal winds are steady from the N.E., average force 4, Beaufort Scale, with a max. of force 8. Temperatures average about 85°F., with little variation from day to night or season to season.

(b) Tides: The normal range of the tide is about 12 in.; however, a 28-in. range has been observed during spring tides.

(c) Lubricating oil: Supplies of Essomarine lubricating oils are available. Requirements should be given in vessel's radio notice of arrival.

(d) Bonded Stores: Cigarettes or other stores in bond are not obtainable in Amuay Bay.

(e) Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's ETA radio, to permit delivery on board on arrival.

(f) Charts: No supplies of charts or sailing directions are available at Amuay Bay.

(g) Laundry: A 6 hour laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

(h) Mail: Itemised lists are required for ship's mail, to be signed by the Master. Unless other instructions are given, ship's mail received after sailing, or for vessels on which no advice has been received, will be held for 30 days and then returned to Owners or Operators at ship's expense.

(i) Inspection – Petroleum Products: Chas. Martin & Co. and E. W. Saybolt, petroleum inspectors, are available if specified. Telephone numbers, Chas. Martin 44665, 44650 and 44211; Saybolt 44639, 44645 and 44227.

(j) Norwegian Government Seamen Service: A field representative of the above service is stationed at Amuay providing Norwegian and Swedish film exchange and other usual services. His telephone number is 51459.

(k) Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seamen, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

(l) Provisions and Stores: Provisions and stores in limited quantities are available, the prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc. are competitive; dry stores are considerably higher than in most ports. The Port Steward will assist in filling requisitions.

(m) Radar and Radio: Radar and radio repairs can be effected in Amuay. A service repair man is available, but spare parts are limited.

(n) Repairs: Shore facilities are available only for emergency repairs of a minor nature. The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

(o) Surveyors: There are no appointed surveyors to American Bureau of Shipping or Lloyd's in the area. However, with sufficient advance notice, arrangements can be made to have their nearest representatives come to Amuay to attend surveys.

(p) Walport Film Exchange: Subscribers to the Walport Service may exchange films at the Marine Office.

(q) Plimsoll Marks: The Captain of the port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(r) Landmarks: Three conspicuous radio towers, 350 ft., painted alternate red and white bands, with red flashing aircraft warning lights, are located in the refinery area, 1 mile East of the docks.

ATTENDANCE: Representatives of the Marine Department board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ship's requirements. The Marine Office Building is located at the Pierhead Trestle and personnel are available for assistance at all hours. Telephones are located on all docks and the Marine Shift Supervisor can be called on telephone No. 444475 or 444465.

CARIPITO: 10.09 N. 63.02 W.

OPERATORS: Lagoven, S.A.

LOCATION: Caripito is located on the West bank of the San Juan River in Lat. 10° 09′ 25″ N., Long. 63° 02′ 01″ W.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send to Caripito their ETA Guiria at least 3 days in advance followed by confirmation 48 and 24 hours before arrival.

2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Caripito, certain information must be radioed to Caripito prior to arrival to avoid a heavy fine and/or delays. See "Radio".

3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Limited ballast facilities are available at Caripito Terminal.

4. Vessels calling at Caripito must obtain Government Pilots at Guiria.

5. The Venezuelan flag must be displayed during daylight hours while vessel is within port limits.

6. The emergency fire signal in Caripito dock area is 6 short blasts and 1 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.

APPROACHES: The traffic in San Juan River is restricted to one-way from Marieta Point to Caripito. Therefore, instructions are issued at Guiria to incoming vessels relative to what action to take on arrival at Marieta Point. Outbound traffic is controlled so as not to conflict with these instructions.

1. Guiria. The town of Guiria is located on South coast of Paria Peninsula on N.W. shore of Gulf of Paria. When approaching from East a signal tower will be observed on a bluff slightly to North of town.

2. Maturin Bar. Buoy E-1, marks the entrance to Maturin Bar Channel. At Punta Gorda there is a light tower located in approximate Lat. 10° 09′ 50″ N., Long. 62° 37′ 52″ W. displays a flashing red light.

3. Channel. Maturin Bar Channel is 14 miles in length and 400 ft. in width. The tidal range over the bar varies from 4 ft. 6 in. to 4ft. 9 in. with currents up 3 knots. The average salinity of water is 1.009; however, this may vary considerably between wet and dry seasons and spring and neap tides. Maximum draft permitted by Venezuelan regulations is 34 ft. in fresh water. There is a restriction of 6 in. less for all motor tankers. On leaving Maturin Bar Channel the San Juan River narrows from approximately 1.25 miles in width to about 0.7 miles with slight variations in width up to Marieta Point where it narrows to about 1,200 ft. and varies between 800 and 2,000 ft. up to Caripito. Marieta Point marks intersection of Cano Frances and the San Juan River. It is also at this point that course of San Juan River changes approximately 100° to starboard and it is the beginning of one-way traffic. Frequently, incoming vessels are requested to anchor below this point to await outbound traffic. There are 32 lights marking strategic points in San Juan River between Maturin Bar and Caripito terminal. These light towers are painted aluminium and are easily visible during daylight hours.

DOCUMENTS: (also see under "Radio").

1. *Clearance (inward and outward).* Inward clearance is effected at Caripito. The sanitary inspector boards vessel at anchor or at berth depending on tidal conditions and/or the availability of a berth. The Customs and other Government officials usually board at the berth. However, should there be a delay awaiting berth or tide, the entry will be granted while vessel is at anchor, in which case accommodation ladder must be rigged.

It is necessary that the following documents be ready on arrival:
Ballast List (1 original, visaed).
Passenger List (5 copies, none of which visaed).
Baggage List (5 copies, none of which visaed).
Crew List (7 copies, none of which visaed).
Sailing Permit from Last Port (1 original, visaed).
Stores List (5 copies, see *Note*).
List of Personal Effects (3 copies, none of which visaed).
List of Contents of Slop Chest (3 copies, none of which visaed).
List of Passengers in Transit (5 copies, none of which visaed).

Note: The Stores Lists may be prepared on board prior to arrival unless ship is coming from Netherlands Antilles or the Guianas, in which case they must be visaed by Venezuelan Consul at port of departure.

2. *Cargo documents.* The Port of Caripito has in force a system of cargo documentation for expediting the sailing of vessel. It is as follows:

a. Certain documentation with approximate cargo figures of unofficial nature are placed on board and official cargo documents are airmailed to discharge port.

b. Blank signed documents are placed on board to vessel's departure from Caripito and thence correct figures are radioed to sub-agency at Guiria who delivers them in writing to Master, who acknowledges its receipt by signing carbon copies of transmittal sheet.

PILOTAGE: Pilots are employees of Venezuelan Government and act in an advisory capacity. The Master retains responsibility for ship at all times. In the event it becomes necessary to disregard the

Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

Pilots are compulsory and are embarked and disembarked at port of Guiria through a sub-agent. Vessels should proceed to the Guiria sea buoy (position 10° 33′ 12″ N. 62° 15′ 00″ W.) and await instructions. If arriving during the hours of darkness, certain instructions are usually transmitted by light signals from the signal tower. Voice radio communications can be established at any time with Guiria or Lagoven Caripito on frequencies 2182 kc/s, 2638 kc/s and 2738 kc/s. The launch which embarks the Pilot will also deliver instructions to the Master relative to the movements of his vessel en route to Caripito, port regulations, facilities, etc. The regular pilotage fees cover the area from the entrance to Maturin channel to and from Caripito. The Pilot is to be provided sleeping quarters and food equal to that provided the officers aboard ship.

Note: Complaints or observations concerning the Pilot's handling of vessel should be noted on back of pilotage ticket.

TIDES: The normal range of tide in the dock area is about 12 ft. with currents up to 3 knots during the flood and 4 knots during the ebb in rainy season (May-December). The normal current is 2.5 knots during the flood and 3 knots during the ebb.

ANCHORAGE: For vessels awaiting berth, there is an anchorage about 1,000 m. up-stream from the Caripito terminal. Vessels awaiting clear channel may at times be requested to anchor at Punta Marieta. Vessels awaiting high tide anchor at Punta Marieta or off Punta Gorda.

MAX. SIZE: Vessels up to 745 ft., 52,000 d.w.t. and max. draft *33 ft. (FW) at No. 2 berth and LOA 630 ft., 32,000 d.w.t. and max. draft *33 ft. (FW) at No. 3 berth.

*Safe draft per tide tables.

RADIO: The cable and telegraphic address for Lagoven at Caripito is "Lagomar - Caripito". Messages to and from ships at sea are routed through the Government Radio Station at Maiquetia (La Guaira), call letters "YVG". This station operates on a 24-hour continuous watch, on the following frequencies:

Listening Frequencies: low frequency, 500 kc/s; high frequency, 4178, 6267, 8356, 12534, 16712, 22225 kc/s. Transmitting Frequencies: low frequency, 500, 472, 464, 417 kc/s; high frequency, 4322, 4352, 6505.5, 6519.5, 8722, 8730, 12817.5, 17141.6 kc/s. Radio notice of arrival should be sent 72 hours prior to arrival at Guiria and corrected if weather or other conditions delay the vessel.

Radio telephone listening watches are maintained on a 24-hour basis at Guiria and at Caripito on 2182 kc. The following frequencies are available for communications after contact: 2638 kc and 2738 kc.

All vessels en route to Caripito may also communicate with Amuay or La Salina Marine offices and request that message dealing with corrected ETA's, Pilots and other business be relayed to the Caripito Marine Office.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to Creole Caripito prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival at Caripito.
Last port of call
Port for which originally cleared.
Grade and quantity of cargo to be lifted.

This information is required in order to make in advance special arrangements for inward clearance, to avoid payment of a fine. It is necessary in such a case that the following documents be ready on arrival:

Crew List (original and 6 copies).
List of Personal Effects (original and 2 copies).
List of Contents of Slop Chest (3 copies).
Stores List (original and 1 copy).

Also required are the original and 2 copies of the radiogram instructing Master to proceed to Caripito. Outward clearance documents are placed on board the vessel prior to departure from the Caripito terminal.

Masters should bear in mind that while vessels are within Venezuelan territorial waters, Government authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. Caripito has also radio telephone communication with North and South America and Europe. For further information contact Port Services Section in the terminal building, telephone C-335.

BALLAST: Ballast is not required when mooring. Any ballast carried should be in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously. All ballast clean or dirty must be pumped ashore. Contaminated residues may be pumped ashore, where facilities are available for receiving up to a max. of 20,000 barrels.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

BERTHING: The Marine Office Building is located on the West bank of the San Juan River upstream from the berths. Representatives of the Marine Department board vessel immediately upon arrival and it is particularly requested that Masters indicate at that time all ship's requirements. Personnel are available for assistance at all hours.

Lagoven maintains a deep water terminal, consisting of 2 ocean tanker berths, Nos. 2 and 3. These are T-type piers with breasting dolphins located approximately 10 ft. off the face of each pier.

All terminal facilities are under the control of Lagoven, S.A. The port is open for navigation during day and night. All ocean tankers are moored at berths No. 2 and 3 on the flood tide only. Vessels may sail from berth No. 3 at any stage of the tide. Sailings from berth No. 2 are restricted to flood tide only when berth No. 3 is occupied.

A vessel entering or leaving port must be assisted by the same Government Pilot taken aboard at Guiria. A Custom guard will board at the same time and remain with the vessel. A Lagoven Representative will deliver to the Master his loading and docking instructions together with any other information pertinent to the vessel's call. He will also sign the Notice of Readiness if requested. The vessel will proceed to anchor to await flood tide to dock, to await berth, or will swing to the flood tide in the turning basin and proceed directly to the berth depending on circumstances.

LOADING: Loading rates, particularly for low-flash products loaded during the hours of darkness or when topping off cargo tanks, will be reduced by terminal to meet existing conditions.

All loading and discharging will be stopped during passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calms, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazard from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from Owners or charterers do not agree with terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than 10% limitation consultation is necessary.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes"standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the concession. Several dentists are located in the town of Caripito. Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: Fresh water is available in any quantity. Delivery is made through 2.5 in. national standard fire hose thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker "C" fuel oil, marine diesel and intermediate fuels are available. It is the responsibility of ship's engineer to give "standby" notice to the terminal employee and advise him when to shut down.

CONSULS: There are no consular representatives in the area. Vessels bound for U.S.A. or British Caribbean ports will be provided with a letter stating this fact.

CERTIFICATES: All ships calling at a Venezuelan port for the first time must be measured for tonnage by Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued is forwarded to the Owners. A fee is charged for this certificate, which is payable only on ship's first call. Vessels registered in following countries are excluded from above regulations: Netherlands, Germany, France, Portugal, United Kingdom, Denmark, Sweden, U.S.A., Ireland and Norway.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officals during regular meal hours. Masters are requested to give them the privilege of eating in the officers' messroom, to avoid difficulties.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed 1 per officer, nor can ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the stores list. Officers must not carry firearms while ship is in

Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

REPAIRS: Only minor repairs of an emergency nature can be made. There are no electronic repair services available in the area.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to the Lagoven Despatcher undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking.

TIME: Local time is GMT minus 4 hours.

GENERAL:

Gangways: Gangways at berths No. 2 and 3 are provided by the terminal.

Plimsoll Marks: The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

Surveyors: There are no appointed surveyors to the American Bureau of Shipping or Lloyd's in the area. With 48 hours notice, non-exclusive surveyors can be obtained from Caracas, or at times from Puerto La Cruz, or qualified Masters or chief engineers may be available for appointment as surveyors when required.

Bonded Stores: Cigarettes or other stores in bond are not obtainable at Caripito.

Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's ETA radio, to permit delivery on board on arrival. Cash returns can be accepted only during the normal working day – 0700 to 1600 hrs. Sundays and holidays excluded.

Provisions and Stores: Provisions and stores in extremely limited varieties and quantities are available at prices considerably higher than in most other ports.

Charts: No supplies of charts or sailing directions are available at Caripito.

Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seaman, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

Laundry; Laundry service is available.

Lubricating Oil: Supplies of marine lubricating oils are available from Puerto La Cruz. Quantities required should be included in the ETA cable.

Mail: Any pending ship's mail will be delivered on board by the marine dispatcher on arrival at Caripito. At the same time he will receive any ship's mail to be dispatched. The marine dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises postage by signing 7 copies of the Company Post Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter. Copy of this will be returned aboard vessel when leaving this port outward bound. If not ready on time, it will be air-mailed to the vessel's next port of call.

Inspection – Petroleum Products and Crude Oil: Charles Martin & Co. and E. W. Saybolt, petroleum inspectors, are available from Puerto La Cruz if specified.

Visitors: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

Pollution of Harbour and Coastal Waters: The laws of Venezuela are strict in regard to pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The authorities require that a written report be submitted by the ship involved in the event of an oil spill.

EL CHAURE: 10.15 N. 64.37 W. (See Plan Book)

OPERATORS: C.V.P./Llanoven.

LOCATION: El Chaure Marine terminal is located on the South shore of the head of Bergantin Bay. 1.8 miles N.E. of Puerto La Cruz: Lat. 10° 14′ 50″ N. Long. 64° 36′ 57″ W.

This terminal is also considered to be berth No. 6 of 'Puerto La Cruz' which see. It is presently under repair but expected to be operational in January 1979.

DOCUMENTS: To avoid penalties, ships clearing for Venezuelan Ports must present certain papers herein set forth for arrival and clearance after docking. The Clearance is made by Government officials accompanied by a company representative.

The following documents must be presented:

1 copy of Ship's register
Clearance from last port
1 copy of Ballast Certificate
6 copies of crew list
5 copies of Passenger and baggage list
2 copies of List of passengers in transit
4 copies of List of personal effects
4 copies of Stores list
2 copies of List of slop chest
Sailing permit issued by Marine Authority of last port of call.
Dispatch issued by Venezuelan Consul at last port.

*If ship was dispatched from a Caribbean port, store list must be visaed by Venezuelan Consul at port of departure, otherwise, list may be made on board before arrival. Lists should be made separately for deck, engine and cabin stores. If no Venezuelan Consul is available, visa may be made by Consul of a friendly nation, by Chamber of Commerce or two prominent businessmen. In these cases, when Venezuelan Consul is not available, each document should have the following notation: "Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores certifico el presente documento" (Signature).

Translation of above Spanish quotation: "In the absence of a Venezuelan Consul in this area and per request of the shippers, this document is hereby certified (signature).

The same authority signing the above statement must attach a dispatch (Despacho) stating ship's name, nationality, Master's name, net tonnage, port of departure, port of entry in Venezuela. This dispatch must have the signature and either seal of the authority or proof of responsibility.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Company will arrange for Pilots to board all vessels as necessary. Whenever it might be deemed necessary for the Master to disregard the Pilot's advice in order to ensure the safety of the vessel, a written report must be submitted by the Master to the Venezuelan Port Captain, explaining the reason for such action.

ANCHORAGE: The crossed line portion on the plan is the anchorage zone for all ships after arrival at Pozuelos Bay. The Company will dispatch the Pilot, by launch, to all ships when they are ready to be docked. On entering the Pilot Zone, the Venezuelan flag must be flown from the foremast; it must be flown at all times between sunrise and sunset.

MAX. SIZE: Max. draft 39 ft. 6 in.

RADIO: El Chaure Terminal Office may be contacted on radio-telephone SSB or AM frequencies of 2738, 2638, 2182 and 2120 kc/s. Frequency 2182 kc/s should be used for initial contact.

Arrival advice: Masters are required to advise by cable their ETA. Such notice should reach El Chaure at least 48 hours ahead of vessel. In cases of ships being diverted at sea to a Venezuelan Port, or to another Venezuelan Port, Venezuelan regulations require, by cable, prior to arrival, name of Master, number in crew, port of departure, port to which originally cleared, flag of ship and net registered tonnage.

VHF: Channel 16 can be used after arrival at Pozuelos Bay.

TUGS: Tug assistance to moor and unmoor is compulsory at El Chaure installations. Ships over 145 m. long must use 2 tugs having not less than 1,600 h.p. each for mooring and unmooring at El Chaure. 1 launch is required for handling the lines.

BERTHING: The wharf has a length of 100 ft. with dolphins established on each side. The dock accommodates vessels drawing up to 39 ft. Sea conditions are usually very good in the entire area. Waves are almost nil and out of the hurricane path. A chain of small islands makes El Chaure a natural port. Only 1 vessel at a time can be moored for loading or unloading. The normal range of the tide is 1 ft.

BALLAST: Vessels arriving in El Chaure must carry sufficient ballast to ensure safe handling. By Venezuelan Law, all dirty ballast must be pumped ashore into ballast pits. Vessels having separate clean tanks for ballast may pump overboard, after first being inspected and passed by Port Authorities. The Company Terminal facilities include a 16 in. ballast line, which empties into ballast pits about 3,500 ft. from the dock. These pits have an elevation of 32 ft. above the dock and will hold 50,000 bbls. The ballast line will stand a pressure of 100 p.s.i.g. The pressure is recorded at the dock. The vessel will be held responsible for damages to the shore ballast line and spills that maybe occurs because of line rupture.

LOADING: Before tying up, blind flanges on the ship's manifold should be removed, hose derrick to be top and rigged to lift shore hoses along with dock booms. All vessels must dock with starboard side to dock. The Company dock supervisor will inform the Master of the vessel as to characteristics of cargo to be loaded, loading rates and all other information necessary for safe and efficient loading operations. During the ship's stay at the dock, company employees are available at all hours to assist in any manner. After loading is completed, if the dock space is required for another vessel the ship must vacate the berth and wait at anchorage until cargo and sailing papers are completed.

FRESH WATER: Available, rate 10 t.p.h.

REPAIRS: Facilities are limited; any repair work must be requested by Master in writing.

CONSULS: The following are in Puerto La Cruz: Belgium, Brazil, Denmark, France, Great Britain, Holland, Italy, Panama, Norway, Colombia, Spain, Sweden and West Germany.

SURVEYORS: Aivepet, Charles Martin & Company and E. W. Saybolt maintain offices in Puerto La Cruz for inspection of cargo if required.

TIME: Local time is 4 hours slow on GMT, year round.

POLLUTION: Pollution of coastal waters is strictly forbidden by Venezuelan Law. The escape of dirty ballast or of cargo either at the dock or in the harbour or in territorial waters will result in heavy fines by Venezuelan authorities. If oil is spilled an estimation of quantity should be made by the Master of the vessel, Venezuelan Authorities and Company personnel, acting jointly. Their joint report must be submitted to the Venezuelan Petroleum Inspector from the Energy and Mines Office, and also the National Guard Headquarters in Puerto La Cruz. The Ministry of Energy and Mines will assess a fine based on the quantity of oil that was spilled. Also the ship is held responsible for the spill and cleaning. Chemicals, equipment, boat and labour used for this purpose are for the ship Owner's and/or operator's account. Each ship must maintain strict supervision on discharging of ballast as well as loading cargo in order to avoid spillage.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct crews not to take cigarettes or other articles ashore.

GENERAL: *Crew:* Passes for shore leave for ship's crew will be given to Master by Company Representative on docking or at anchorage. These passes must be filled out for each Crew member prior to Venezuelan authorities visit. Passes may be used during the ship's stay but must be returned to the National Guard at the dock prior to departure. Before ship's departure a report must be made to the Dock Master if any Crew member is missing. Crew members left behind will be placed in custody by Venezuelan authorities until deported at vessel's expense. A Crew member requiring medical or dental treatment must submit his request for such aid through the Master to the Dock Master. Arrangements for seamen arriving from other ports, transferring to other ships or being repatriated are handled by the vessel's Agency.

Under the Venezuelan law the vessel is responsible for all seamen in the country during their entire stay. Masters are requested to leave written instructions with the Dock Master for handling seamen left ashore. The Master of the ship must indicate his acceptance of the responsibility for all costs incurred in handling a seaman.

Seaman Left Ashore: A letter from the Master is required advising the amount of cash advance and any other instructions concerning the seaman's repatriation. All expenses incurred by the seaman, including the cost of repatriation are for the vessel's account. The documents and personal effects of seamen left ashore for hospitalisation, repatriation or any other reason, must be delivered to the Terminal Office before sailing. Venezuelan Law holds the Master, ship's representatives and Owners responsible for any seaman left behind in this country.

In Dock: Masters are requested to observe the following regulations while alongside the Company Terminal:

1. – Sufficient number of Crew members must be on board at all times, during discharge of ballast and loading of cargo to ensure proper handling of mooring lines.
2. – Rat guards are to be on all mooring lines during entire stay.
3. – Venezuelan authorities do not permit blowing of heavy smoke from vessel's funnel, while in port. Breaking of this rule may result in Government fine and/or removal of ship from the dock.
4. – Venezuelan National Guard personnel are assigned to guard duty for each ship while it is at the dock. Meals must be furnished for these guards in the Officers' Messroom.

Visitors: All visitors to vessels are prohibited, without written permission of the Port Authorities. Dock Master, Petroleum Inspectors, Dispatchers and Terminal employees handling hoses may board ship in performance of their duties.

Charts: Are not available at El Chaure.

AGENCY: All incoming vessels must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all vessel disbursements.

EL GUAMACHE: 10.52 N. 64.04 W. (See Plan Book)

SHIPMASTER'S REPORT: October 1978

LOCATION: The Port of El Guamache is a new developing port, located about 1000 feet northward of Pta Mangle on the Isla De Margarita (see B.A. Chart 230).

DOCUMENTS:
Clearance from last port.
Sealed envelope for Customs
Visaed B/L and Sobordos.
Despatch from last Venezuelan port, if any.
Consular Documents from last foreign port.
6 Crew Lists.
Vaccination Certificates of Crew.
4 Store Lists (Deck, Engine, Provisions, Bonded store).
4 Personal Effects Lists.
4 Arms & Ammunition Lists.
4 Passengers Lists.
4 Mail Lists

ANCHORAGE: On the Western side of the Pta Mangle in Bahia Guamache depth 8–11 fathoms.

PILOTAGE: Pilotage is compulsory. Pilot boards on arrival or at anchorage. Vessels arriving at the anchorage must keep engines on stand-by and wait for shifting or berthing instructions.

Note: As at other Venezuelan ports, vessels must fly the Venezuelan flag at masthead and lower gangway for boarding party – Agents, Customs Officers, Quarantine Officers, Immigration Officers, Pilot and representative of Port Captain etc.

RADIO: As a new developing port, no radio service at Margarita Island, all ETA wireless messages must be sent via ITT or YVG–72, 48, and 24 hours prior to arrival

The port office is equipped with radio telephone installation, operating 0600-2000 hours, transmitting on VHF frequencies 156.8 mc/s (Channel 16.) Vessels calling in Spanish language will be answered promptly; if calling in English will be answered by English speaking person when on duty.

TUGS: Not available.

BERTHING: Length 126 m. with 3 dolphins installed at each end with catwalk to dolphins. Depths of water, 36 ft. at LW and 42 ft. at HW.

STEVEDORES: Arranged by Agents, normal working hours 0700-2100, cargo discharged into warehouse.

GANGWAY/DECK WATCHMAN: Necessary, normally engaged by Customs or Police.

OPENING/CLOSING HATCHES: Normally by crew.

FRESH WATER: Not available.

FUEL: Not available.

SHORE LEAVE: Shore leave permitted. Passes issued by representative of the "Direccion De Marina Mercante" on arrival. Shore passes to be collected prior to sailing and given to Agent.

TIME: Local time is GMT minus 4 hours.

AIRPORT: Distance about 15 km. from port. Connections to other cities.

MEDICAL: Available at Polamar City about 31 km. from the berth.

PROVISIONS: Fresh and dry provisions supplied through ship chandlers from Polamar City and delivered on board.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle of wine or spirit.

REPAIRS: No repair facility available.

TELEPHONE: No telephone connection to vessel at present but provided inside warehouse and port office.

DENSITY: 1025

HOLIDAYS: As other Venezuela ports.

DEVELOPMENTS: El Guamache has a development programme to construct new wharves Northward from present pier to accommodate 6 ocean-going vessels and expected to complete within 3 years.

All port facilities will be available. Margarita Island is the only free port in Venezuela. Tourism from the mainland and overseas is increasing day by day as Margarita Island has very nice weather and beaches.

EL PALITO: 10.29 N. 68.07 W. (See Plan Book)

OPERATORS: C.V.P./Llanoven.

LOCATION (of El Palito Terminal): The terminal facilities operated by Llanoven S.A. at the port of Puerto Cabello (Punta Chavez), are situated on the Venezuelan coast, 7 miles West of Puerto Cabello. The terminal has a 2,475 ft. pier, part causeway and part trestle, extending out from Punta Chavez along a shallow reef then angling into water 48 ft. deep. 2 tankers can tie up simultaneously at the berths.

WEATHER: Winds are normally from the N.E. with an average Beaufort scale force of 2-3. Average temperature about 85°. The months of January, February and March have the roughest sea and swell, and vessels may not be able to dock due to the weather.

TIDE: The normal range of the tide is 1 ft.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA 72 hours before arrival at El Palito Terminal and another 24 hours before arrival advising any change of ETA.

2 If a vessel originally cleared for another port (including some other Venezuelan port) is diverted at sea to El Palito, certain information must be received prior to arrival, to avoid heavy fine and/or delays.

3 *No Ballast* may be pumped overside in port. Ballast disposal facilities are available at the El Palito Terminal.

4. The use of Venezuelan Government Pilots is compulsory for docking and undocking.

5. The Venezuelan flag should be displayed at the mast-head during daylight hours by vessels anchored and berthed in Venezuelan waters.

6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.

7. The emergency fire signal is 5 long blasts on the vessel's whistle or siren. No other signal is to be given in case of emergency.

8. Rat guards must be in place on all mooring lines.

APPROACHES: The terminal pier is marked by the following lights: One occulting red light at tthe top of No. 1 (N.W.) Hose Rack, 80 ft. above sea level. Latitude 10° 29′ 51″ N., Longitude 68° 07′ 13″ W., and one green light, flashing every 3 seconds at the top of No. 2 (S.E.) Hose Rack, 80 ft. above sea level, located 275 ft. S.E. of No. 1

Hose Rack. A group of 5 crude storage tanks, painted aluminium, visible 20 miles on a clear day, are located 1.25 miles 200° from the head of the pier.

DOCUMENTS:

A. Admeasurement Certificates. All vessels calling at Venezuelan ports for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take the Ship's Panama Canal or Suez Canal Certificate, which is used as a basis of recalculating the tonnage under the Venezuelan regulations and is returned before sailing. The Venezuelan Admeasurement Certificate is forwarded to the owners at a later date. A fee is charged for the certificate which is payable only on the vessel's first call. Vessels registered in the following countries are excluded from the above regulations: Denmark, France, Germany, Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

B. Inward clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from last port (1 copy).
Ballast Manifest from last port (1 copy, visaed according to paragraph *(d)* if there is no Venezuelan Consul).
Crew List (9 copies).
Passenger and Baggage Lists (5 copies, visaed; 2 copies not visaed).
List of Personal Effects (5 copies not visaed).
Store List (3 copies, see paragraph (c)).
List of Slop Chest (3 copies not visaed).
Sailing Permit (issued by maritime authority of last port).

Vessels arriving with cargo to discharge, will also require:

Consular Mail (one sealed envelope from each loading port).
Manifest (Sobordo), 1 original visaed and 2 copies not visaed from each loading port.
Bills of Lading, 1 original and 1 copy visaed, and 4 copies not visaed from each loading port.
Tally books; 6 from each loading port.
Consular invoice: 3 originals visaed and 3 copies not visaed, from each loading port.
Commercial invoices: 3 from each loading port.

C. Store list prepared should indicate separately all deck, engine and cabin stores. The store lists may be prepared on board prior to arrival unless the vessel is coming from the Netherlands Antilles or the Guianas, in which case they must be visaed by the Venezuelan Consul at the port of departure.

D. Cargo and clearance documents should be visaed by the Venezuelan Consul at the last port of call. In the absence of a Venezuelan Consul, they may be visaed by the Consul of a friendly nation, by the Chamber of Commerce or by two reputable merchants, the latters' signature to be notarised. In the absence of a Venezuelan Consul, the following notation should be written on each document in Spanish, and signed by the alternates designated above: "Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento".

(Signature)

Vessels originally cleared for another port, and diverted at sea to El Palito, should radio Llanoven Puerto Cabello the following information as soon as the change of sailing orders are received:

1. Advise diverted.
2. Name and class of vessel.
3. Number of crew.
4. Flag of vessel.
5. Last port of call.
6. Port from which originally cleared.
7. Estimated time of arrival at Pilot station.
8. Type and amount of cargo vessel will load.
9. Time required to discharge ballast.
10. Master's name in full as signature (John Jones, Master).

This information is required in order to make in advance special arrangements for inward clearance to avoid payment of fines.

Outward clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form which is delivered on board on arrival must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information required by the Captain of the Port. In addition, one of the 9 copies of the crew list specified above, corrected to show any changes made while in port, should be attached to the form.

PILOTAGE: The Pilot's working hours are from 0600 to 1800 hrs. There are no special charges for their assistance during those hours on workdays. On Sundays and holidays they charge overtime. There is also a charge when ship has anchored in the bay as according to the pilotage law each movement (and entering the bay is one movement) requires a Pilot. By special agreement only Pilot's overtime will be charged for anchorage, as anchorage and docking is considered as one movement with respect to Government Pilotage Fee.

Pilotage is compulsory government service. The government charges the Pilot's assistance according to ship's net tonnage. Vessels under flags of Panama and Liberia are required to have their Venezuelan Tonnage Certificate. The government charges for docking and sailing.

Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The terminal will arrange for Pilots to board all vessels as necessary. Pilots meet the vessel via launch provided by the terminal. The Pilot may decline to moor the vessel if it is not equipped with satisfactory mooring equipment, lines, gear, etc., or if it is not sufficiently ballasted. It is the responsibility of the Master to notify the Pilot of any special conditions or peculiarities, such as defective navigation equipment, mooring lines, tackle, gear or lack of necessary equipment, which might impose hazards in connection with the handling, mooring, discharging or loading of vessels.

At the berths, vessels must be moored to the entire satisfaction of the Pilot and the terminal operators' Mooring Master.

The Pilot acts in an advisory capacity. The Master retains responsibility for the vessel at all times. In the event it becomes necessary to disregard the Pilot's advice in order to ensure the safety of the vessel, the Master must forward a full written report of the circumstances through the terminal for delivery to the Captain of the Port.

ANCHORAGE: Notice of Readiness can be tendered at anchorage. The suggested anchorage for El Palito Terminal is located 0.5 to 1 mile North or West of the seaward end of the pier. The area to the East of the pier is not recommended as an anchorage.

RESTRICTIONS: None. Vessels enter day or night and at any state of tide.

MAX. SIZE: East berth draft 38 ft. 6 in. West berth draft 40 ft. Length 730 ft.

BALLAST: Due to the exposed location of the oil piers, vessels are required to be ballasted to the following minimum drafts for safe manoeuvring to and from the berths:

Overall Length of Vessel	*Minimum Draft Required*
400–480 ft.	forward 9 ft., aft 17 ft.
481–700 ft.	forward 12 ft., aft 20 ft.
701–730 ft.	forward 14 ft., aft 23 ft.

A total capacity of 220,000 barrel slop pits and a 20 in. ballast line are available to receive all ballast.

Vessels with separate ballast tanks, lines and pumps may discharge ballast overside. Ballast for entering the harbour should be carried in the minimum number of tanks, and all other tanks stripped dry so as to minimise the time required for discharging ballast alonside berths.

All ships in ballast from abroad are charged for Consular Ballast Certificate.

HEALTH: No radio pratique. Health officers board vessel at berth.

RADIO: Puerto Cabello, Venezuela, Coastal Station call sign YVL, makes radio contact with all vessels "CQ" on 8722 kc. at the following hours: 1130, 1330, 1530, 1830, 2130, 0030, 0200 GMT. Also "CQ" on 17141 kc. at 1630 GMT and "CQ"on 4322 kc. at 0430 and 0630 GMT.

Vessels originally cleared for another port, and diverted at sea to El Palito, should radio C.V.P./Llanoven Puerto Cabello the following information as soon as the change of sailing orders are received:

Advise diverted.
Name and class of vessel.
Number of crew.
Flag of vessel.
Last port of call.
Port from which originally cleared.
Estimated time of arrival at pilot station.
Type and amount of cargo vessel will load.
Time required to discharge ballast.
Master's name in full as signature (John Jones, Master).

This information is required in order to make in advance special arrangements for inward clearance to avoid payment of fines.

VHF: Master should call El Palito Marine Terminal 3 hours before arrival on Channel 16.

TUGS: Use of tugs compulsory. Usually 2 tugs (1,600 h.p.) assist during docking and 1 (1,600 h.p.) during undocking.

BERTHING:

1. The use of both anchors is required for docking at both berths. It is considered prudent to have both anchors hove-out prior to entering the harbour in order to facilitate speedy release while mooring. The Pilot will advise whether the vessel is to be moored port or starboard side to the dock.

2. In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

3. East Berth. Approach at very dead slow speed along a line parallel to a line formed by the East and the West berth at a distance from it equal to the distance of the North buoy. Drop the starboard anchor at the point of intersection of the ship's fore with a line formed by the two East shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the East berth. Drop the port anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by Pilot and with the help of the ship's engines.

4. West Berth. Approach at very dead slow speed along a line parallel to a line formed by the East and West berths and at a distance from it equal to the distance of the North buoy. Drop the port anchor at the point of intersection of the ship's fore with a line formed by the two West shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the West berth. Drop the starboard anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by the Pilot and with the help of the ship's engines.

5. General. Available hose connections, all 8 in., are as follows: 3 for Fuel oil, 1 for diesel products and 1 for leaded or unleaded gasolines. All dirty ballast to be pumped ashore through the fuel oil loading hoses.

LOADING:

1. *Cargo:* On completion of inward clearance, information regarding the number of hoses and loading rate will be given to the Master and Chief Officer. During ballast discharge supplementary information will be given to the Chief Officer. A 15 minute standby is required prior to finishing any grade.

2. *Contamination of Crude:* It has been established that one of the major causes of contamination of crude oil is the small amount of salt water remaining in the ship's tanks, pumps and ballast lines after discharging ballast. This small amount of salt water frequently results in costly damage and downtime to refining equipment and also presents many other problems. Therefore all tanks and lines must be pumped as dry as possible.

3. *Draining of Hoses:* Hoses are drained by gravity on all products and crude. Ship personnel must co-operate with terminal personnel in this operation to ensure complete draining of hoses into ship tanks and adequate drip cans must be placed to catch the remaining oil in line. Sawdust or equivalent must be on standby to clean up any oil leaks.

4. *Loading Rates:*

Commodity	*Available at berths*	*Size of line (in.)*	*Estimated max. barrels per hour*	*Hoses Pier 1 (in.)*	*Hoses Pier 2 (in.)*
Crude oil	1–2	30	27,000	3–8	2–8
Bunker C	1–2	24	17,500	3–8	2–8
Diesel	1–2	16	9,000	1–8	1–8
Unleaded gasoline	1–2	16	8,000	1–8	1–8
Leaded gasoline	1–2	16	8,000	1–8	1–8
Ship's bunkers	1–2	24/16/8	6,000	1–8	1–4
Lube	2	8		1–8	1–4

Loading rates will be reduced by the terminal when topping off tanks at the vessel's request.

5. *Scuppers:* Loading will not be started till all deck scuppers are properly sealed to the satisfaction of the terminal.

6. *Simultaneous Deballasting and Loading:* Vessels equipped with separate and completely segregated ballast tanks, and lines and pumps never used for oil may be permitted to discharge ballast and load simultaneously providing approval has been obtained from the terminal.

MEDICAL: Medical treatment and hospitalisation, if required, are available at the Seguros Sociales in Puerto Cabello. Several dentists are located in Puerto Cabello. Authorisation for any medical and/or dental treatment must be made by the Master. Transportation is available at the Terminal Office. If the patient does not speak Spanish an interpreter should accompany him.

FRESH WATER: Not available.

FUEL: Bunkers are available only for vessels loading cargo. Disputes as to quantity should be registered by signing the bunker receipt under protest and noting the ship's quantities thereon.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore.

Cigarettes in cartons, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel), should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest which will be sealed for the duration of the vessel's stay in port.

CONSULS: French, Norwegian, Danish, Italian and Panama Consulates are represented in Puerto Cabello. There is no American Consulate. It is necessary for Masters of Panamanian flag vessels to visit the Panamanian Consulate at Puerto Cabello to present documents and receive dispatch as required by law. Regular office hours are from 0800 to 1200 hrs. and from 1400 to 1700 hrs. Mondays through Fridays; any dispatch issued outside of regular office hours is billed at double fees. Terminal Office will arrange transportation to Puerto Cabello upon request.

REPAIRS: Only emergency repairs of a minor nature can be made. Prices are very high.

REPATRIATION: The documents and personal effects of seamen left ashore for hospitalisation, repatriation or other reason, must be delivered to the Terminal Office before sailing. A letter from the Master is required advising the maximum amount of advances to the seaman and any other instructions concerning his repatriation. All expenses incurred by the seaman, including the cost of repatriation, are for the vessel's account. Venezuelan law at all times holds the Master, Agent or Owner responsible for any seaman left behind in Venezuela.

AIRPORT: Distant about 4 miles.

TIME: Local time is about GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the National Guard watchmen on board.

Vessels are not permitted to sail until all crew members are on board, or special permission has been obtained to sail without a crew member.

REGULATIONS:

1. *Engines:* No engine repairs will be made while the ship is in dock. Engines are to be kept at standby at all times while the ship is in port.

2. *Rat-guards:* Vessels must use rat-guards on all mooring lines.

3. *Visitors:* All visitors to vessels are prohibited, without written permission in each case by the Port Captain or his assistant. Mooring Master, petroleum inspectors, dispatchers, and terminal employees handling hoses may board ship in performance of their duties.

4. *Pollution:* The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast or oil is to be pumped or allowed to escape over the side. No engine-room or pump-room bilges may be pumped overboard. All pump-room sea suctions and overboard discharge valves must be secured prior to loading or discharging cargo. Loading must be conducted with the utmost care and vigilance so that errors or delays may not result in spills. All deck scuppers must be plugged tight before loading so that in the event of a spill pollution of the harbour may not result.

5. *Garbage;* No garbage is to be thrown over the side while the vessel is in port.

6. *Passengers:* Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include this information in his ETA.

7. *Firearms:* Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the store list. Officers must not carry firearms while the vessel is in Venezuelan waters and these sidearms and ammunition should be collected and held in the Master's safe custody.

GENERAL:

1. *Bonded Stores:* No cigarettes or bonded stores are available at El Palito.

2. *Cash Advances:* Cash advances are available in Venezuelan Bolivares only and should be included in the vessel's ETA radio, to permit delivery on board at arrival.

3. *Charts:* No charts or sailing directions are available at El Palito.

4. *U.S.S. Club:* There is no U.S.S. Club available at El Palito or film exchange service.

5. *Inspection Petroleum Products:* Chas. Martin and Company and E. W. Saybolt, petroleum inspectors, are not available at El Palito. However, if specified in sufficient time, they may be obtained from Puerto La Cruz.

6. *Laundry:* Laundry facilities are available at El Palito.

7. *Lubricating Oil:* Certain types of Llanoven lube-oils only are available in small quantities. Requirements should be sent by radio with ETA.

8. *Mail:* Mail service posted from El Palito has been found to be fair.

9. *Provisions:* Provisions are available at El Palito.

10. *Radio and Radar:* No repairs made at El Palito.

11. *Gangways:* Gangways are provided by El Palito Terminal.

AGENT: See "Puerto Cabello".

GUANTA: 10.15 N. 63.35 W. (See Plan Book)

SHIPMASTER'S REPORT: 1978

LOCATION: 10° 15′ N. 64° 35.5′ W. About 5 miles East of Puerto La Cruz.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (or negative).
6 Ship's Stores Lists.
6 Crew Personal Effects Lists (well detailed).
1 Declaration of Health.
Clearance from last port.
Cargo Manifests visaed by Venezuelan Consul at loading ports.
Full set of Manifests and B/Ls.

Entry Formalities; Normally carried out after docking unless there are no berths available; then vessel can be cleared at anchorage in Bahia Pozuelos, during daytime. At night only in case of emergency.

Accommodation ladder must be rigged.

Hours of entry: From 0700 till 1100 hrs. and from 1300 till 1700 hrs. Overtime outside these hours.

APPROACHES/PILOTAGE: A vessel bound for Guanta has to enter Bahia Pozuelos as she must first call at Puerto La Cruz to embark a Pilot. The anchorage area for waiting berth turn is also in Bahia Pozuelos. This anchorage is in depths of 48 to 80 ft. and is well protected from swell by surrounding islands. No size limitation.

Bahia Pozuelos is the anchorage and Pilot embarking area for 3 ports: Puerto La Cruz, Guanta and Pertigalete.

The use of government Pilot is compulsory for all vessels docking or undocking. ETA: 48 and 24 hours in advance via the vessel's Agent.

Pilot boarding hours: From 0530 till 1700 hrs. every day. Vessel cannot dock after sunset. Sailing may be arranged at any time.

HEALTH: All vessels boarded by Port Doctor. No automatic pratique.

RADIO: Curacao Radio PJC. No local station.

VHF: All Agencies maintain radio watch on Channel 16 during office hours. Tugs and launches also equipped with VHF (call: "Ramrey").

TUGS: 3 tugs available: 1 of 1,700 h.p. and 2 of 1,200 h.p. All privately owned. Sometimes vessels bound for Guanta or Pertigalete have to wait for 2 or 3 hours as these private tugs have contracts with oil companies in Puerto La Cruz and are available only when no tanker is docking or undocking. Tug's lines used. Normally tugs join the vessel inside Guanta Bay.

BERTHING: One concrete pier on piles, 763 ft. in length where vessels normally dock starboard side to. The apron is 20 ft. wide in centre, 42 ft. at ends.

One modern concrete pier on piles, 1,056 ft. in length where vessels normally dock port side to. The apron is 115 ft. wide in centre and 85 ft. at ends. The piers are well fendered with rubber hoses and used tires.

Height of piers above HW: 10 ft. Mean tidal range: 1 ft. 6 in. Max. draft alongside small pier: 23 ft. 08 in. Min. draft alongside long pier: 26 ft. 08 in. Depths varies from a min. of 27 ft. to a max. of 34 ft. at the Western end of the long pier.

CARGO HANDLING FACILITIES: All cargo normally discharged by vessel's own gear, directly on to truck or trolleys. The piers are not connected to the railroad. No floating crane.

The following mobile cranes are available in the port area: 1 crane max. 120 tons; 1 crane max. 30 tons, with telescopic extension boom, max. 60 ft.; 2 small cranes max. 6 tons with a boom length of 30 ft.

Forklifts: 15 forklifts capacity 3.5 tons; weight 5.2 tons with fixed counterweight. To use these forklifts on board, the hoisting gear should lift over 6 tons.

2 forklifts capacity 5 tons, weight 12 tons; 1 forklift capacity 20 tons, weight 25 tons, specially for containers.

Flatbed trolleys: 30 trolleys capacity 8 tons; 1 trolley capacity 70 tons.

No lighters available.

All discharging gear normally supplied by Agency. For heavy lifts, it is recommended to have special slings on board.

BULK CARGO FACILITIES: On the Eastern side of the Guanta Bay, there is a berth for loading coal by means of a fixed shoot. Depth alongside 30 ft.

Grain Cargo: Receivers supply suction machines. There are 2 machines available, capacity 1,000 tons per machine during 24 hours. Grain vessels work round the clock.

Liquid Cargo: Sometimes tallow and liquefied gas are handled. Discharged by vessel's pump into tank trucks. Hoses normally supplied by vessel.

CONTAINER HANDLING FACILITIES: No container berth. No crane. 1 forklift capacity 20 tons. There is a small container stacking area.

STEVEDORES: Normal working hours: 0700–1100 hrs. 1300–1700 hrs. (Monday to Friday); 0700–1100 hrs. (Saturdays).

Overtime: Monday to Friday, 1800–2300 hrs. (night shift); Saturday, 1300–1700 hrs.

Normally port does not work after 1700 hrs. on Saturdays or Sundays.

Ordering of gangs: For 0700 hrs. requested previous day before 1500 hrs. For 0900 hrs. requested same day at 0700 hrs.

Overtime rates: 50% for the night shift (Monday to Friday); 100% for Saturday afternoon shift.

The gangs consist of 12 longshoremen and 12 stevedores, including 2 winchmen, 1 signalman and 1 checker.

Capable supervision only available from Agency.

Rigging or cleaning gangs are available.

MEDICAL: Private hospitals at Puerto La Cruz. Private doctors generally do not visit ships. If medical attention is required on board, the Port Doctor will attend patient, unless he authorizes another doctor to make the visit.

In case of emergency, when the vessel is anchored in Bahia Pozuelos, a launch can be arranged to pick up the sick crew member.

FRESH WATER: Available at 5 Bolivares per ton at the main pier only. Hoses supplied by ship. Rate: about 5 t.p.h.

Presently there is no water available at Berth No. 3 (Western end of pier).

DENSITY: Salt water all the year round.

FUEL: No Bunker "C".

Diesel: Delivered by trucks; arrangement must be made at least 24 hours in advance.

Gas Oil: Delivered by trucks under previous arrangement.

GARBAGE DISPOSAL: No facilities.

CONSULS: See "Puerto La Cruz".

REPAIRS: Only minor engine or electric motors can be repaired.

GANGWAY/DECK WATCHMEN: Not available. No shore gangway available.

DRY DOCK: Not available.

SURVEYORS: None.

CUSTOMS ALLOWANCE: 200 cigarettes and one open bottle spirits.

REPATRIATION: Can be arranged. No special requirements.

IDENTIFICATION CARDS: Passes for shore leave are issued by officials of the Port Captain's Office, when boarding the vessel for clearance. These passes should be filled out on board. They are valid for the duration of the vessel's stay in port only and have to be returned before sailing.

In order to comply with Immigration Regulations, crew should be carefully checked before departure and any missing seaman reported to the Agent. The same applies to passengers in transit.

AIRPORT: At Barcelona, about 15 miles by road. 3 flights daily to Caracas.

TIME: 4 hours slow of GMT, all the year round.

HOLIDAYS: New Year's Day, Holy Thursday, Good Friday, Holy Saturday, April 19th, May 1st, June 24th, July 5th, July 24th, October 12th, November 24th, Christmas. No labour available on these days.

TELEPHONES: No facilities at Guanta. Private calls can be made from the central office at Puerto La Cruz (5 miles) during the following hours: 0700–2100. Long distance calls dispatched quicker from the Hotel Melia at Puerto La Cruz.

SHORE LEAVE: From a ship anchored in Bahia Pozuelos: Allowed if the vessel has been cleared and if every crew member has shore pass. One private launch available but very expensive.

From Guanta berths: Allowed with shore passes.

DELAYS: Presently, Guanta is somewhat congested and the waiting time varies from a few days to 15 days, especially during the rainy season.

GENERAL: Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast or throwing garbage or dunnage in territorial waters. Heavy fines are imposed for pollution of waters and sometimes fishermen are quick to report any infringement.

Berthing Turn: On the basis "first come, first served" but Venezuelan vessels have some priority.

Supplies and laundry: Several private firms based at Pto La Cruz. Nearly all kinds of fresh provisions are available.

Laundry service available; may be completed in 8 to 10 hours.

General: Guanta is a natural harbour surrounded by mountains which protect the bay completely in bad weather. The port has never been closed for bad weather.

Venezuelan Flag: Upon arrival at Pozuelos Bay ship should display the flag from the foremast at all times. When anchored or docked, the flag should be displayed only between sunrise and sunset.

Warehouses and Cargo Sheds: No transit cargo shed. No refrigerated storage available.

There are 5 warehouses with a total floor space of 75,000 sq.ft.

Open Space: A total of 5.7 acres, mostly covered with asphalt or concrete.

Weather: The rainy season starts in mid-May and ends in November or December. During the rainy season it is usually calm in the early hours of the day followed before mid-day by light Westerly or variable breezes. In the afternoon the breezes change to north-easterly at about 12 knots until midnight. During the dry season the cycle is similar but the N.E'ly wind may reach 25 knots. This can prevent all communications between anchored vessels and the shore.

AUTHORITY: "INP" Instituto Nacional de Puertos.

SHIPMASTER'S REPORT: 1975

LOCATION: 10° 14.7′ N., 64° 35.5′ W.

Guanta is located in the Bay of Guanta. It is a well protected port against currents and winds.

The port is entered between 2 well lighted islets.

DOCUMENTS:

Maritime Declaration of Health (together with inoculation list of crew).

10 Passenger– (or non-passenger) Lists.

10 Transit passenger– (or non-transit passenger) Lists.

10 Crew Lists.

4 Personal Effects Lists. (new clothes, etc., to be mentioned).

4 Ship's Stores Manifests.

Clearance last Port.

PILOTAGE: Government pilotage is compulsory. Pilot is embarked and disembarked near the sea buoy of Puerto La Cruz, in position: 10° 15.5′ N., 64° 41′ W.

ANCHORAGE: On the Pto La Cruz roads.

RESTRICTIONS: Entering: In daylight hours only: 0600–1800.

Sailing: Day and night.

TUGS: One powerful tug available, compulsory to use when ship's length more than 90 m.

BERTHING: *New Pier:* Length 322 m. *Old Pier:* Length 233 m.

Water Depth: According to Pilots information: *Old Pier:* 29 ft. *New Pier:* 34 ft.

STEVEDORES: *Working Times:* Mon. to Friday: 0700–1100 hrs., 1300–1700 hrs., 1800–2300 hrs. Saturday: 0700–1100 hrs., 1300–1700 hrs. Sunday: No work is done.

Gangs have to be ordered by 1500 hrs. the day before required.

FRESH WATER: Ships can replenish their fresh water tanks without charge (Included in port charges). Own hoses to be used.

OPENING/CLOSING HATCHES: Opening/Closing hatches, setting derricks: Special Rigger gangs take care of this. It is absolutely forbidden for ship's crew to touch these kind of jobs.

GENERAL: *Waste Water:* Special care should be taken to prevent waste water, from sanitary– or engine-room systems fouling the jetty. Heavy fines are made in case this happens and a special shore gang might be ordered to clean same.

Customs: 2 Customs officers have to be provided with food.

OPERATORS: Servicio Portuario de Guanta.

LA GUAIRA: 10.36 N. 66.56 W. **(See Plan Book)**

DOCUMENTS:

Sealed envelopes for Customs.

Visaed B/L and Sobordos not in envelopes.

Consular Despatch for all Venezuelan ports.

Despatch from last Venezuelan port, if any, or

Zarpe from last foreign port, if arriving directly from abroad.

Fumigation Certificate.

Vaccination Certificates of Crew.

Landing Cards for Crew and Passengers.

6 Store Lists (with arms and narcotics).

6 Lists of Personal Effects.
10 Crew Lists.
10 Lists of Passengers for La Guaira, or negative Passenger List.
10 Lists of Passengers in Transit.
2 Sets of B/L not visaed.
4 Sobordos not visaed.
14 Tally Books.

PILOTAGE: Compulsory and vessels have to wait for Pilot in the pilotage zone N.W. of the port entrance.

MAX. SIZE: Also see "Developments."

21	290	30	Warship Berth

RADIO: In order to enable Agents arrange for quick entry and berthing, Masters should give their ETA message at following intervals, via Curacao Radio (ITT): 72, 48 and 24 hours prior to arrival, indicating in the 48-hour message, the quantity of parcels (or tonnage if bulk cargo) per hatch. This is imperative for applying for the necessary personnel of the National Port Services. Also, draft, passengers, requirements for bunkers, fresh water, provisions, repairs, medical assistance, etc. This telegram the Master to sign with his full name.

TUGS: The use of tugboats within the port is compulsory, both for entering and leaving port, as well as for manoeuvres in the port basin. Ships longer than 139 m. must be assisted by 2 tugboats.

BERTHING: Normally a minimum of 19 ocean-going vessels can berth at a time. Berths No. 1, 2 and 3 are along the breakwater pier East-West, parallel to the coast.

Within the port is a finger pier, parallel to the breakwater pier, with 2 Customs warehouses alongside, with berths North and South, 2 each. The main pier is parallel to the coastline, East-West, with berths Nos. 10, 11, 12, 13, 14 and 15,, along which piers there is ample Customs warehouse space, including outdoor space on the roofs as well as ample uncovered storage area.

The Passenger Terminal is on a finger pier, in direction North-East with its land end in the corner of berth No. 15. There are 2 berths each side, namely Nos. 16 and 17 in the inner basin and Nos. 18 and 19 in the outer basin.

Passenger vessels have priority for berthing and they have to leave port within 24 hours.

Also see "Developments".

LOADING/DISCHARGING: Cargo is discharged into railcars alongside the piers, or directly into the transport means of the Importer and vice versa when loading. The latter, however, applies only for bulk cargo or considerable one-type commodity.

If electric shore cranes are used, the same procedure applies unless the cargo is to be stored outdoors on the roof of the warehouses. Piers Nos. 4 and 9 have no rails alongside, so the cargo is discharged on the pier, wherefrom it is immediately taken away by two-boys, fork-lifts and/or other mechanical equipment supplied by the National Port Services as per kind of cargo. The use of such equipment is included in the handling fee per weight. There are 2 grain towers on berths 3 and 3A leading via conveyor belts to storage silos of 12,000 ton capacity. Average daily discharge rate 2,000 tons approximately.

STEVEDORES: Supplied exclusively by the governmental National Port Services at costs per weight of cargo in accordance with governmental decrees.

The Port Agent applies for the necessary number of gangs per ship. Each gang consists of 11 stevedoremen (estiba) and 11 longshoremen (caleta).

Switching of gangs from one hatch to another is not permitted.

There are no longshoremen costs for cargo handled during straight time, but only for that handled during overtime.

(a) *Straight time*
Monday–Friday 0700–1100 hrs.
1230–1630 hrs.
Saturday 0700–1200 hrs.

(b) *Overtime*
Monday–Friday 1800–2300 hrs.

(c) *Saturday afternoon* work is not permitted, but if a vessel could terminate operation and sail within a maximum of 3 additional working hours, a special permit would be granted by Customs and Port Authorities. In such a case, the additional working hours are considered as overtime.

(d) *Work on Sunday* is not permitted except for passenger vessels (officially those carrying 60 passengers, but exceptionally vessels with less passengers might occasionally obtain same consideration by authorities).

EQUIPMENT:

(a) *Electric Shore Cranes:* Berths 10 to 15 have 14 electric shore cranes on rails, of 6 tons capacity each. The National Port Services allow 2×6-ton cranes to lift pieces up to 9 tons weight. The arms of the cranes reach the roofing of the warehouses. Use of shore cranes is not compulsory, unless the Technical Board of the National Port Services rules to use them. There are also 13×8-ton mobile cranes. Other piers have no shore cranes.

(b) *Diesel-Driven Rolling Cranes:* There are a considerable number of these cranes which can lift heavy pieces of about 17 tons.

(c) *Floating Cranes:* Not available.

(d) Special lumber carriers of about 20 tons capacity.

(e) Tow trucks, fork-lifts, trucks and trailers up to 10 tons capacity.

OPENING/CLOSING HATCHES: Not performed by the National Port Services but by either the ship's crew, or the assistance labour of the Agent.

FRESH WATER: Available through pipe-line on the pier, day or night, by water trucks of up to 10 tons capacity in day time only.

OFFICIALS: Once the vessel is anchored at La Guaira, Representatives of Customs, Port Captain, National Guard, Health Service, Immigration and Agency board the vessel.

DEVELOPMENTS: The following is an English translation of a Notice to Mariners supplied to Shipping Guides Ltd. in Spanish.

Captaincy of the Port of La Guaira
Notice to Mariners
AGSI 5/78

Mariners, shipowners and ships' Agents in general are informed that by reason of the extension of the thermo-electric station for electricity supply to Caracas located at Arrecifes, a tanker terminal has been constructed which will come into service this year, and the indications are as follows:

This discharge terminal incorporates a system of buoys as its floating part.

Buoy No.	*Name*	*Latitude*	*Longitude*
1	A–2	10° 35′ 25.244″ N.	67° 05′ 04.784″ W.
2	A–3	10° 35′ 20.389″ N.	67° 05′ 16.525″ W.
3	A–4	10° 35′ 25.985″ N.	67° 05′ 18.929″ W.
4	A–5	10° 35′ 25.432″ N.	67° 05′ 11.639″ W.
5	A–1	10° 35′ 32.533″ N.	67° 05′ 06.004″ W.

All buoys with the exception of the hoisting buoy have an indicator light with the following characteristics:

Name	*Colour*	*Range*	*Period*	*Flash*	*Eclipse*
A–1	White	5 miles	6.0 sec.	3.0 sec.	3.0 sec.
A–2	Red	3 miles	4.0 sec.	1.0 sec.	3.0 sec.
A–3	Red	3 miles	4.0 sec.	0.5 sec.	3.5 sec.
A–4	Red	3 miles	4.0 sec.	1.5 sec.	2.5 sec.
A–5	Red	5 miles	3.0 sec.	0.5 sec.	2.5 sec.

Other Developments: It has been reported that the second of 7 new berths is in operation. Length of dock 200 m. Max. LOA 960 ft. Max. draft 33 ft. The 7 berth project is expected to be completed in March, 1979, when a total length of 700 m. will be available.

AGENTS: Head Office (Control), Management/Brokers, Chartering and Tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 101. Cables "Selvic" or "Seltank" Tel. (02) 81.02.71, Telex: 21402, 21934, 22859, 21631. Local Office: PO Box 304, La Guaira. Tel. (031) 27092, 27566, 27340. Cables: "Selvic LaGuaira" or "Seltank LaGuaira". Telex: 31143.

Section D – MARACAIBO
Section E – EL TABLAZO AND PUERTO MIRANDA
Section F – PUNTA DE PALMAS
Section G – SAN LORENZO

GENERAL: The following "Depth Bulletin", dated June 1978, was received from a Shipmaster in February 1979.

REPUBLIC OF VENEZUELA
NATIONAL INSTITUTE OF CANALIZATIONS
ZULIA ZONE

Depth Bulletin No. BP–6–78 Dated: 13–06–78

The following data represents the latest information reported and refer to the date shown for each section of the channel. Depths are expressed in metres and are related to the same level of the local Navigation Charts 1001, 1002, 1003 and 1004 of the M.M.M. Mean Monthly Lowest Low Water.

The controlling depths refer to the centre area of the channel demarked by parallel lines on either side at a distance of 60 m. in the outer channel and 45 m. in the rest of the channel. The Puerto

Miranda channel is of 30 m. The theoretical position of the buoys in the aforementioned navigation charts are located at a distance of 30 m. from the edge of the channel.

Main Channel

Channel	*From*	*To*	*Date*	*Depth (m.)*	*Remarks*
Outer Section	B–1	B–28	19-05-78	12.8

Puerto Miranda Channel		AP–2	11-05-78	11.6	

Signed............................ *Signed*..................................

The Port Captain — The Director N.I. of Can. Zulia Zone

(N.B. Certain information common to all Vessels entering Maracaibo Lake is given below. For specific details of ports/terminals within the Lake, see relative Section as indicated above).

FLAG: Local authorities require that the Venezuelan ensign be flown at vessel's masthead, from the time of entering the outer channel until clear of the outer channel outbound.

DOCUMENTS: *(a) Inward Clearance for Scheduled Vessels:* Vessels arriving in ballast or with cargo in transit require following documents:

1 copy Sailing Permit from Last Port.
2 copies – 1 visaed Ballast Certificate.
1 or more letters Consular Mail (in sealed envelope).
4 copies – 2 visaed Passenger Lists.
4 copies – 2 visaed Baggage Lists.
4 copies – 2 visaed List of Passengers in Transit.
4 copies List of Slop Chest.
4 copies List of Personal Effects.
4 copies – 2 visaed Store Lists.
5 copies Crew Lists.

Vessels arriving with cargo should have, in addition to the foregoing:

4 copies – 2 visaed Sobordos (Venezuelan Inward Manifests).
6 copies – 2 visaed Bill of Lading.
2 copies visaed Inward Manifests.

In absence of a Venezuelan Consul at the last port, clearance documents should be signed by consul of a friendly nation, one of the Port Authorities, Notary Public, the Chamber of Commerce or by two well-known firms.

(b) Inward Clearance for Diverted Vessels: Vessels diverted to Maracaibo Lake Ports to load cargo, should submit all documents indicated in 1 through 10 above, except consular mail, which they will not have.

Vessels diverted at sea to Maracaibo Lake Ports which do not have a Venezuelan clearance on board, must advise loading port via radio to arrival, the name of vessel, Master's name, vessel's flag, Venezuelan net tonnage (if available, if not, the registered net tonnage), last port of call, destination port for which originally cleared, ETA San Carlos Pilot station and grade and quantity of cargo to be lifted. This information is required in order that Inward Clearance may be arranged with government officials in ample time prior to vessel's arrival. Also 3 copies of the diversion telegram received by vessel and signed by Master, together with copies of those documents listed under *(a)* should be presented to the Port Authorities upon arrival at Maracaibo. In the absence of this information, or of presentation of each of these documents to the Port Authorities the vessel will be subject to a fine. Please note, that the documents covered under *(a)* have to be presented upon arrival, regardless, if the vessel is not arriving with consular clearance or arriving after being diverted at sea.

(c) In Maracaibo 2 clearances from Custom's authorities are needed: One for proceeding from Maracaibo to loading berth, and another after loading for proceeding from Maracaibo to destination. For this reason Custom Dispatch charges may be incurred twice.

(d) American Crew List. All non-American vessels loading for a U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service form No. I.–418 (Crew List Manifest) and should contain 2 sections:

Section 1 should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 should list, in the alphabetical order of their last names, those alien crew men who lack United States visa documentation and therefore require inclusion in the visa of the crew list.

Only one name may be placed on each line of the crew list. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the crew list presented must be legible. Occasionally the names of the crew men included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition.

The information requested under columns 1, 2 and 3 should be filled in completely. Column 1 should always contain the complete first name and middle initial of the crew man. Column 2 should show the nationality of each crew member and the number of his travel Document. Column 3 should always include the name of the port where the crew man was shipped, not simply the country.

At the time of vessel's first application for a crew list, the crew list must be presented in four copies: Original and 1 copy should contain only information requested under Columns 1, 2 and 3. 2 copies must include following information of those crew men to be included on crew list visa. Column 4 should list date, city and country of each crew man's birth. Column 5 should show place of issuance of seaman's travel document and name of Government which issued travel document. (It is not necessary to list date of issuance of travel document).

Below is a sample line correctly entered on the Master crew list.

(1)	(2)	(3)	(4)	(5)
Bello, Tomas E.	Z.23455 Venezuelan	Maracaibo Venezuela	December 8, 33 Caracas, Venez.	Cabimas, Venez

Upon subsequent crew list applications by same vessel within same year, the crew list need be presented in duplicate only, and the information in Columns 4 and 5 need be provided only concerning any new crew members who require visa documentation. When twelve months have elapsed since presentation of Original crew list, a crew list should again be prepared in 4 copies and should contain all the information required in columns 1–5. Such a master crew list is required after each 12 months period.

APPROACHES: Also see "General" above. The channels leading to the Lake of Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel. The controlling depths of the Outer Channel, Inner Channel and the channel Southward to buoys M1 and M2 are normally 45 ft. At certain times the controlling depth may be less. At such times suitable notices are published advising mariners of these temporary reductions of controlling depth.

Outer Channel. The Outer Channel starts at the E.M. Buoy in position 11° 13′ 47″ North and 71° 33′ 31″ West. The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles. The distance from E.M. buoy to the Southern end of the Outer Channel, marked by buoys B–27 and B–28, is approximately 15.75 miles. The channel is 1,000 ft. wide and has a normal controlling depth of 42 ft. minimum monthly observed lowest water (MMOLW) with tidal range varying about 2 ft. 3 in. This depth is maintained by periodical dredging. Tankers are required to have a keel clearance of at least 2 ft. and dry-cargo vessels a keel clearance of at least 3 ft. Vessels navigating the channel at the maximum allowable draft are confined from 2 hours before to 2 hours after high water. There are no turns in the channel and the course is 189°.

There is a breakwater 0.5 mile East of, and parallel to, the Outer Channel and extending 1.6 miles Northward from the North side of Zapara Island. The end of this breakwater is marked with a skeleton steel tower with a light 27 ft. above sea-level. Light characteristics – flashing white light every 8 seconds; visibility about 3 miles.

On Zapara Island there is a skeleton iron tower with a height of 136 ft. above sea-level.

Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at low water when the cross currents are strong. Overtaking at these points should be avoided.

There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B–14, B–15, B–16 and B–18. All buoys in the Outer Channel are equipped with radar reflectors.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge.

Inner Channel. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. Entire length of the Inner Channel is about 12 miles.

The beginning of the Inner Dredged Channel is marked by buoys B–29 and B–30. Channel is marked by beacons, and terminates at beacons T–55 and T–56. The channel is 800 ft. wide and the normal controlling depth is 43 ft. MMOLW with tidal range varying from 1.5 ft. to 2.5 ft.

The channel from beacons T–56 to Maracaibo Harbour is a dredged channel, the end of which is marked by buoys Nos. B–73 and B–74.

About 0.2 mile South of buoys B–29 and B–30, there are located 2 towers – 1 on each side of the channel, and about 1 mile further South are 2 more towers. These 4 towers are marked E–31 and E–32 (North) and E–33 and E–34 (South). Towers No. E–31 and E–32 are of single steel pipe construction on a concrete pile base. Towers

No. E–33 and E–34 are of skeleton steel construction (former oil-well derricks) each mounted on 4 concrete piles. The characteristics of these towers are:

	Height above water (LWS)	
Tower No.	*Light*	*Light*
E–31	43′	Green – Fl.
E–32	43′	Red – Fl.
E–33	123′	Green – Fl.
E–34	128′	Red – Fl.

Vessels are not allowed to overtake each other in the Inner Channel between buoys B–29 and B–30 and light beacons T–25 and T–26. Vessels may overtake each other in the Inner Channel between light beacons T–39 and T–40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight.

Lake Channel. The channel starting at light beacons T–39 and T–40 and leading to Maracaibo Roads is called the Lake Channel. This is a natural channel 3,000 ft. wide and 11 miles long.

The Main Channel through Maracaibo Lake is approximately 83 miles long, not less than 244 m. wide and with a greater depth than the outer channels.

The access channels to the various ports and terminals branch off from the main channel as described under Section for each port.

CHANNEL NAVIGATION:

(a) Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

(b) Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

(c) Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

(d) Approaching vessels are to reduce speed in order to minimise the suction force of the displacing waters.

(e) Vessels must maintain a distance of 5 ship's lengths by day and 8 ship's lengths by night from other vessels navigating in the same direction.

(f) No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

(g) A grounded vessel is not allowed to start any manoeuvre when another vessel is passing.

(h) Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime

Black cylinder hoisted on side of yardarm: You can overtake me on the side on which the cylinder is shown.

Two black balls over the bridge: The channel is blocked.

Night

Green light on side of yardarm (a white light on mast-head helps to show on which side the green light is placed): You can overtake me on the side on which the green light is shown.

2 red lights over the bridge: The channel is blocked.

The tidal range is 4 ft. at neaps.

(i) Maximum speed for vessels navigating in lake channels has been limited to 10 knots. Masters should exercise the utmost care in complying with this regulation as heavy fines may be imposed to offending vessels.

PILOTAGE: (N.B. Maracaibo Pilotage Regulations require that inbound tankers, in ballast, while crossing the Bar, shall not have greater than 8 ft. difference between fore and aft draft. The Government Pilot will not take the vessel if this requirement is not met, unless he is satisfied that the actual draft of the vessel will permit safe navigation through the Outer and Inner Channels.

Every Master of a vessel navigating in Lake Maracaibo who desires to enter the main ship channel in Pilotage Zones No. 1 or No. 2 must first ensure that said Channel is free of traffic.

The limits of the Main Ship Channel in Pilotage Zone No. 1 are from buoys B1/B2 located at the entrance to the Outer Bar Channel and buoys B73/B74, of the city of Maracaibo. Pilotage Zone No. 2 begins approximately 1 mile below Maracaibo and extends Southward to lightfloats M36/M37. All other channels are considered as access channels to their respective port zones and subject to special local rules. Every vessel navigating to or from any port in Lake Maracaibo must follow the prescribed routes through the main and access channels leading to or from such ports, (unless special permission has been granted to do otherwise).

(a) Pilots are employees of the Venezuelan Government and act in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must prepare a full written report of the circumstances, for delivery to the Captain of the port.

(b) Inbound vessels have the option at present to embark government Pilot at the following areas:

(i) In the channel off San Carlos Pilot Station between buoys B–24 and B–26.

(ii) Anchorage area approximately 5.5 miles N.E. of Pilot station, San Carlos Island. Position N. 11° 04′ 22″, W. 71° 33′ 48″ East of buoy B–17. This area is demarcated with green light buoy equipment with radar reflector.

(iii) At the E.M. Buoy.

(c) The Port Captaincy of Maracaibo is unable to guarantee embarking or disembarking Pilots at the E.M. buoy or at anchorage area position. For this reason Masters should communicate with San Carlos Pilot station for necessary instructions as to where to pick up Pilot, who usually embarks between buoys B–24 and B–26. The communication system between San Carlos Pilot station and vessels will be by Morse lamp and radio-telephone. The stand-by frequency at San Carlos is 2182 kc/s. Other existing frequencies are 2120 and 2080 kc/s.; 156.6 and 156.8 mc/s. Each Pilot launch has a radio-telephone with 2182 kc/s. frequency. The launch that leaves San Carlos Pilot station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance between Buoys and San Carlos is approximately 6 miles or 10 kms.

(d) Pilot Permit to navigate the Outer Channel without aid of a government Pilot will be granted to those Masters who desire to obtain same. In order to fill the application required, a blank sealed paper and 3 copies should be signed by Master on arrival. Copy of this solicitude duly endorsed by port Captain of Maracaibo, will serve the Master as temporary permit until the official one has been received. Masters in possession of permits to cross the Outer Channel without a Pilot, have the option to enter channel either at the E.M. buoy or between any other buoy, taking into consideration the heavy traffic of the channel. Government pilotage through the inner channel is compulsory at all times.

(e) Outbound vessels will receive Pilot in Maracaibo, who will Pilot vessel up to San Carlos area approximately between Towers E–31 and E–33, where he will disembark. The Port Captain of Maracaibo has instructed that all Captains should always in ample time identify themselves with the San Carlos Pilot station by radio-telephone regardless of time of day. While inbound – between buoys B–17 and B–19 and sailing outbound – between markers T–42 and T–40. These instructions are obligatory and are required in order for the Pilot service to be aware, at any moment, of any emergencies which may arise, and also to avoid, especially during the night, the launch departing with an official Pilot aboard believing that the ship in sight needs his services, in which case, even though the launch or Pilot services are not rendered, the same will be charged to the company owning the ship, or its representative.

TONNAGE: Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e.:

(a) On Registered Net Tonnage. Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement. As of this date, such countries are:

Norway
England
France
Sweden
Ireland
Germany
U.S.A.
Denmark
Holland
Portugal

(b) On Venezuelan Nett Tonnage. Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

(c) In practice, the procedure for stating the tonnage of all ships entering the Lake of Maracaibo is as follows: The inward Pilot boarding the ship presents Master a form on which among others the Master should fill in the tonnage of ship. Pilotage charges are based on this tonnage given by the Master. Master's attention is drawn to the fact that the Venezuelan nett tonnage is usually higher than the International nett tonnage. Care should be taken if an old Venezuelan nett tonnage certificate is on board, because the country in which the ship is registered might later have signed the reciprocal tonnage agreement with Venezuela. If the pilotage charges are made on basis of a higher tonnage than the one that should be applied, it is later very difficult, if not impossible, to get a refund.

CUSTOMS: *(a) Customs Watch.* While vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with customs regulations. The Law requires meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in officers' messroom, to avoid difficulties.

(b) Firearms and Ammunition. Firearms must not exceed one per officer nor may the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be carefully declared on Store List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

(c) Contraband. Strict compliance with the customs law of the country is enforced by the authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to very strict enforcement of the customs regulations, it is recommended that no goods be carried which are not shown on Store List. Any new articles (clothes, shoes, etc.) should be included in Store List and marked as personal belongings. If during a check-up by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS: The following nations maintain consular representative in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Netherlands
Norway
Nicaragua
Panama
Peru
Portugal
Spain
Sweden
Switzerland
United States of America

TIME: Local time is GMT minus 4 hours.

VISITORS: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

PASSENGERS: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

POLLUTION: The Laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require a written report to be submitted by the ship involved in the event of an oil spill.

SEAMAN LEFT BEHIND: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

Section A

BAJO GRANDE: 10.29 N. 71.38 W. (See Plan Book)

(1) OPERATOR: C.V.P. Llanoven Oil Terminal.

(2) OPERATOR: C.V.P. Llanoven. Natural gas liquids processing facilities.

(N.B.) For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

(1) **OPERATORS:** C.V.P. Llanoven.

LOCATION:

Maracaibo: On the North-Western shore of the Lake Maracaibo: Position: 10° 40′ North and 71° 38′ West.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at terminals in the Lake of Maracaibo. Upon arrival to Maracaibo, a representative of the appointed Agency will go on board to assist vessel.

Bajo Grande: Loading Pier: Position 10° 30′ 50″ N. and 71° 36′ 8″ W., about 8 miles (12.8 kms.) South of Maracaibo on the Western shore of the Lake and about 9,000 ft. (2,743 m.) offshore with its centre line North-South. Two vessels can berth simultaneously, one outside at Berth No. 1 and one inside at Berth No. 2.

The wharf is constructed as a pile-supported concrete island. It consists of 3 breasting platforms plus bow and stern mooring platforms. Pier Heads are 860 ft. apart.

DOCUMENTS: The following documents should be presented by the Master:

1. *Clearance from Sailing Port consisting of:*

(A) Sealed envelope from *Venezuelan Consul* in sailing port addressed to "Administrador de Aduana".

(B) Sealed envelope from *Venezuelan Consul* in sailing port addressed to "Aduana de Maracaibo" and attached to this envelope:

Store List.
Crew List.
Slop Chest Inventory.
Ballast Certificate.

(All visaed by Venezuelan Consul in sailing port).

(C) Special ballast report made up by Master.

The Maracaibo Port Captaincy, requires that the Masters of all vessels entering this jurisdiction, deliver to the Maracaibo Port Captain's representative, during his visit to ships in the port of Maracaibo, a report which must answer the following questions concerning ballast:

(1) Port or place where ballast was taken.
(2) Quantity taken.
(3) Type of ballast and condition of same.
(4) Where deballasting operation was or is to be carried out.
(5) Approximate deballasting time.
(6) Any other pertinent information that may be required.

2.	Crew List	6 copies
3.	Store List.	6 copies
4.	Slop Chest Inventory (Deck, engine and cabin stores listed separately)	6 copies
5.	List of Personal effects.	6 copies
6.	Deratisation Exemption Certificate	Original
7.	Venezuelan Net Tonnage Certificate	Original
8.	American Crew List.	4 or 2 carbon copies.

(If required: See under "American Crew List" below).

Boarding Party: The boarding party usually consists of the following persons:

One Quarantine Official
Two Customs Officials.
One Sanitation Dept. Official.
One Port Captain's Representative.
One Foreign Service Dept. Official.
One Vessel's Agent.

American Crew List: All non-American vessels loading for USA port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service Form No. 1–418 (Crew List Manifest) and should contain two sections:

Section 1 – Should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 – Should list, in the alphabetical order of their last names, those alien crewmen who lack United States visa documentation and therefore require inclusion in the visa of the crew list.

Only one name may be placed on each line of the crew list. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the crew list presented must be legible (Occasionally the names of the crewmen included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition).

The information requested under column 1, 2 and 3 should be filled in completely.

Column 1 – Should always contain the complete first name and middle initial of the crewman.

Column 2 – Should show the nationality of each crew member and the number of his travel document.

Column 3 – Should always include the name of the port where the crewman was shipped, not simply the country.

At the time of the vessel's first application for a crew list, the crew list must be presented in 4 copies:

Orig. and 1 copy – Should contain only the information requested under Columns 1, 2, and 3.

Two Copies – Must include the following information of those crewmen to be included on the crew list visa.

Column 4 – Should list the date, city and country of each crew member's birth.

Column 5 – Should show the place of issuance of the seaman's travel document and the name of the Government which issued the travel document. (It is not necessary to list the date of issuance of the travel document).

Cargo documents:

1. *Captain's copy of Bill of Lading* – The Bill of Lading form used is the usual Warshipoilvoy form. Masters wishing to use another form should furnish 20 blanks on arrival in Bajo Grande. Master is requested to sign 3 negotiable Bills of Lading (Originals).
2. *One Copy of the Certificate of Quantity and Quality (Q. & Q.).*
3. *One copy of the Ullage Report.*

Outward Clearance:

Following documents are delivered on board by the local Agent before sailing:

1. *Customs Clearance* – Duplicate of "Conocimiento de Embarque" and Duplicate of "Manifiesto de Carga". (Both stamped and signed by Customs) or any other document specifically requested by the consignee or nominating source.
2. *Communication* – A letter from Maracaibo Customs Authorities to Authorities in port of destination.
3. *Zarpe* – Permission to sail signed by Maracaibo Port Captain. This is brought on board in Bajo Grande by the outbound Pilot.

Customs Guard: The Customs Guard will request Master to countersign his time on board the vessel. This is counted from the time the first hose was connected until all hoses were disconnected, regardless of whether the vessel was receiving cargo or not.

Accommodation Ladder: Vessels must provide an accommodation ladder. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations. Port authorities will board only by means of an *accommodation* ladder. it is recommended to rig this in advance in order to avoid unnecessary delays.

In order to guarantee the security and safeguard the lives of the officers that board the vessel inbound in Maracaibo, it is imperative that Masters strictly comply with the following precautionary measures:

(1) Each of the components and functional parts that holds together or supports the gangway ladder must be maintained in excellent condition.
Therefore, wire ropes, guide blocks and bolts etc., found to be defective or in bad condition must be immediately replaced.

(2) For maximum security, each time that your vessel arrives in this jurisdiction, the above mentioned mechanisms should be thoroughly checked and tested by the personnel aboard vessel before the gangway ladder is used by the boarding party.

APPROACHES:

Channels leading to Lake Maracaibo: The channels leading to the Lake Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel.

Outer Channel: The Outer Channel starts at the E.M. Buoy position: 11° 13′ 47″ North and 71° 33′ 31″ West and ends at the Zapara Island, a distance of about 14 miles. (About 22 kms.).

The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles.

There are no turns in the channel and the course is 189°. The channel is 100 ft. wide and has a normal controlling depth of 44 ft. LWS with tidal range varying about 2 ft. 3 in. Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at LW when the cross currents are strong. Overtaking at these points is forbidden. There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the buoys B–14, B–15, B–16 and B–18. All buoys in the Outer Channel are equipped with radar reflectors.

The Southern end of the Outer Channel is marked by buoys B–27 and B–28.

Inner Channel: The beginning of the Inner Channel is marked by buoys B–29 and B–30. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°, The entire length of the Inner Channel is about 12 miles. Beacons T–55 and T–56 mark its Southern end. The normal controlling depth is 44 ft. LWS. The channel is 800 ft. wide. Vessels are not allowed to overtake each other in the Inner Channel between buoys B–29 and B–30 and light beacons T–25 and T–26.

Vessels may overtake each other in the Inner Channel between light beacons T–39 and T–40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight. From beacon T–56 to Maracaibo harbour the channel is 800 ft. wide, depth 44 ft., its end is marked by buoys B–73 and B–74.

Navigation through Channels:

Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

Approaching vessels are to reduce speed in order to minimize the suction force of the displacing waters.

Vessels must maintain a distance of 1 mile (1,852 m.) by day, or night from other vessels navigating in the same direction.

No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

A grounded vessel is not allowed to start any manoeuvre when another vessel is passing. Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime: Black cylinder hoisted on side of yardarm:

You may overtake me on the side on which the cylinder is shown.

Two black balls over the bridge:

The channel is blocked.

Night:

Green light on side of yardarm (A white light on mast head helps to show on which side the green light is placed).

You can overtake me on the side on which the green light is shown.

Two red lights over the bridge:

The channel is blocked.

The tidal range is 4 ft. at neaps. Observed squat in the channels is about 1 ft.

Maracaibo Lake Channel Guard Service Corps have had evidence of vessels travelling out of the navigation channel in the vicinity of buoys B–3, B–5 and B–7; this risky procedure is considered very dangerous to the safety of the channel buoys and its installations.

Captains of all ships are reminded that all vessels inbound or outbound *must* pass the EM Buoy on the port side. This operation will be registered and controlled by their electronic devices installed at San Carlos Pilot Station.

Violators of this regulation, in addition to being economically responsible for damages to the buoys and related accessories, will be prosecuted in accordance with Article 118 Section I of the Venezuelan Law of Navigation.

In view of the above, and keeping in mind the protection of the interests of your owners, we ask that you comply at all times with this regulation emanated from the Port Captaincy.

PILOTAGE: Compulsory. Vessels proceeding direct to the Bajo Grande Terminal must enter outer channel and embark Pilot between buoys 25 and 27. After vessel arrives in vicinity of channel entrance, Master must contact *San Carlos Pilot Station* by radio telephone on Channel 16 requesting Pilot at buoys 25–27. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance, between Buoys and San Carlos is approximately 6 miles (10 kms.).

Master must advise C.V.P. Llanoven and Agent ETA buoys 25–27, 72, 48 and 24 hours prior to arrival there.

Masters of Vessels entering Lake Maracaibo for the first time must cable their Local Agent notifying this fact, in order that the Agent may comply with the Port Regulations. This security measure makes it necessary for the ship to pick up a Pilot at Punta Cardon.

The Captain should notify Agent or contact Maraven, Punta Cardon by radio on Channel 16. As no Pilots are available at Punta Cardon, the Local Agent for the vessel requires 48 hours' notice in advance to facilitate making arrangements to fly a Pilot to Cardon and then have Maraven place the Pilot on board the ship.

The co-ordinates of Punta Cardon are approximately 11° 36′ North and 70° 15′ West. Maraven will charge approximately Bolivares 220.00 for this service. In addition, the ship will have to pay air fare, hotel expenses, and a higher Pilotage fee for this service. However, if the Captain of a ship has previously entered the channel as an officer of a ship, he is not required to pick up a Pilot at Punta Cardon.

We remind you that Pilots are authorised to leave the Jurisdiction, only when they are disembarked in Venezuelan ports. With this understanding, when special circumstances arise in which the Pilot cannot be disembarked at San Carlos and the ship is unable to enter the nearest Venezuelan port to disembark the Pilot, in this case the port of "Las Piedras", it is required that the Agent as well as the Captain of the vessel, forward to the Port Captaincy at the earliest opportunity a detailed report giving the reasons that compelled the Captain to take the Pilot abroad.

Pilots act in an advisory capacity only, and therefore the Master of the vessel retains full responsibility at all times. In the event it becomes necessary to disregard the Pilot's instruction in order to ensure the safety of the ship, Master must forward to Local Agent a full written report on the circumstances for delivery of same, to port authorities.

The Venezuelan Pilotage Law stipulates that Pilots must be provided with the same lodging as is given an officer. In case no extra officer's cabin is available, suggest the hospital be used by the Pilot. Also, Pilot should be seated at the officers' mess for his meals.

In case of accident to Pilot while performing his duty on board, it is the responsibility of the Master to furnish the Pilot with a full written report on the accident before the Pilot leaves the vessel. The Pilot must be able to present such a report in case of a legal claim.

As a result of accidents that caused the loss of lives, the Maracaibo Port Captaincy issued a Regulation with the view of safeguarding human life at sea and other navigable waters; Official Pilots that must embark on or disembark from undocked ships, must use an automatic-inflated type life vest. This procedure is also compulsory for all persons from private or public entities that are required to go aboard vessels that are anchored, stopped or navigating in the waters of Lake Maracaibo. Likewise, at the side of the boarding ladder where the Pilot boards or disembarks, a hoist or boatswain's chair shall be placed there, and within it a life line and a gas light ready to be used in case it becomes necessary. The Port Captaincy will see to it that this Regulation is strictly complied with.

Docking Pilot: The Government's Pilot will assist in docking operations. It should be borne in mind that Pilot acts as adviser only. The Master retains full responsibility at all times. Any damage incurred to vessel or loading platform which may be deemed to have been caused by the Mooring Pilot's fault or negligence, may be held against the ship.

Undocking: Government's Pilot will assist in undocking. Two tugs will be used as for docking.

ANCHORAGE: The Pilot will not manoeuvre the ship into anchorage, but will indicate the proper location to anchor. Care should be taken because of small boat traffic.

MAX. SIZE: The following restrictions in size and draft upon loading exists for vessels docking at Bajo Grande:

	Maximum Loading Draft	*Maximum Vessel Size*	*Max. displacement upon Berthing (tons)*
Outside Berth (No. 1)	40ft. 00in.	55,000 d.w.t.	—
Inside Berth (No. 2)	34ft. 06in.	36,000 d.w.t.	20,000

RADIO: *Information to be cabled to Local Agents 3 days prior to arrival*

1. *Flag:* If the vessel has loaded in Bajo Grande before or is listed in the Tanker Register published by H. Clarkson & Company Ltd., London, the nationality of the vessel need not be cabled.

2. *Sailing port and at which other port vessel will call in this area:* For clearing the vessel in and out of Maracaibo, local ship Agents must know beforehand from where the ship comes and which other port it will call in this area. Therefore, it is of importance to inform Agents whether the vessel will load part cargo or bunker, at which terminal, and whether inbound or outbound.

3. *Port for which vessel is cleared:* In case the vessel was diverted *en route* and consequently is not cleared for Maracaibo or one of the terminals in the Lake of Maracaibo, the Local Agents must obtain from authorities special permit for the vessel to enter the Lake of Maracaibo.

4. *Ballast Certificate:* If the vessel arrives in ballast a "Ballast Certificate" is mandatory. A fine against the vessel will issued by the Port Authorities if vessel does not have this certificate.

5. *Estimated Time of Arrival:* Cable ETA San Carlos Pilot station Buoys 25–27 (See "Pilotage") or, if the vessel is taking part cargo or bunkering inbound, cable ETA, bunker or first loading port. Please use local time if possible (4 hours behind GMT).

6. *Tonnage:* If the vessel has not loaded at Bajo Grande before, also cable the Gross and Net Tonnages. To determine whether the International or the Venezuelan tonnage should be mentioned, see General – "Tonnage Applicable".

7. *Master's Full Name:* Please sign your first message with Master's name and surname, which is also needed to clear the vessel in Maracaibo.

8. *Changed ETA:* An additional cable should be sent about 48 hours and 24 hours prior to arrival at Pilot stations Buoys 25–27 stating ETA.

Proper use of Radio Frequencies: We have received several circulars from the Maracaibo Port Captaincy, requesting Terminal Operators to caution all Masters of vessels calling at Bajo Grande Terminal on the improper use of the International Distress Frequency of (2,182 k/cs) for personal conversations. This procedure is contrary to the security of vessels.

A letter containing such caution will be delivered to the Master of each vessel loading at Bajo Grande by the Agent, requesting that the Master sign a copy signifying his acknowledgement of said letter of notice.

The International Distress Frequency was established specifically and exclusively for emergency calls such as shipwreck, fire and accidents. It is also used by ships and shore stations to make first contact but immediately after contact is made, the operator should switch to one of the following frequencies: 2120, 2080, 2630 and 2738 k/cs.

9. *Compulsory use of Single Side Band radio:* A circular letter from the Venezuelan Ministry of Communications, states that no licence will be granted for the installation of radiotelephone stations of modulated amplitude (A3). The installation and use of Single Side Band radiotelephone equipment is obligatory.

In consequence, the Ministry has requested that the terminal inform all users of Double Side Band (A3) radiotelephone equipment in order that they proceed immediately to install in their ships, launches and all other marine vessels Single Side Band equipment with the same frequencies that are presently in authorised use, which are: 2080, 2120, 2182, 2638 and 2738 k/cs.

The listening and Safety Station YXW–3 installed at the Venezuelan Nautical School is equipped to answer any calls on the International Distress Frequency with their transmitter of 1 kW.

As a result of the foregoing, a letter containing the above information has been prepared by the Terminal which will be delivered to the Masters of all vessels calling at the Bajo Grande loading terminal. The Masters of all vessels are required to sign a copy of this letter in acknowledgement of receipt.

TUGS: The Venezuelan Government has ruled mandatory the use of 2 tugs for docking and undocking.

NOTICE OF READINESS: Masters are free to tender their ships as being ready to load at any place and time which, in their opinion, conforms with the terms of the charter party. Terminal personnel authorised to countersign the notice of readiness have been instructed to indicate the time vessel was all fast or, if the vessel anchored to wait for berth, the time the vessel anchored. This does not imperil in any way the rights of the shipowner in his negotiations with the charterer and it limits the Terminal's liability to the consignee.

CARGO OPERATIONS:

Deballasting Facilities:

A recent Circular letter from the Venezuelan Ministry of Communications, Maracaibo's Port Captaincy, states that as of October 1976, no ballast (either clean or dirty) can be discharged into Lake Maracaibo waters. Therefore, all ballast must be pumped ashore to the petroleum terminal on which vessel is to take cargo. Heavy fines are assessed for vessel's violating this law and therefore we strongly recommend Masters to be particularly careful in this regard.

Shore deballasting facilities are available at Bajo Grande and are subject to no special regulations and procedures as yet. Tanker ballast water is pumped through two 8 in. hose connections into a 24 in. line of about 9,000 ft. in length to a 120,000 bbl. receiving basin situated on shore.

The deballasting basin is limited to receiving *only* petroleum hydrocarbons and petroleum hydrocarbons derivates. Emulsifiers, caustics, acids and chemical slops are absolutely unacceptable. Contamination of Lake Maracaibo waters with oily or chemical materials of any nature is strictly prohibited by Venezuelan Laws. The terminal is required to report to the Authorities any such contamination by vessels docked at Bajo Grande. HEAVY FINES ARE THEN ASSESSED AGAINST THE SHIPS. Vessel's cooperation is requested to prevent contamination from tank overflows, bilge oil, line leaks or from any other source.

Tank Cleaning and Drying:

Precautions as are common for any heavy oil should be taken to ensure that no ballast is left in any tank. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lbs. per 1,000 bbls. for every 0.10% contamination by sea water. All cargo compartments must be stripped extremely dry.

Cargo pipe-line should be drained and or purged of water. On standard T-2 type vessels, this can be done by draining the fore and aft main cargo lines, both suction and discharge sides, into the pump room bilges followed by opening of main suction valves on each individual compartment, thereby releasing water retained in dead and transverse lines. After this procedure is completed, each compartment should be restripped with stripping pumps and lines, followed by draining the stripping line to pump room bilges. On other ships equipped with looped systems it is possible to blow the system with air and drain water into the bilges. In other situations, fresh water might be used to flush cargo piping systems of salt water and in turn strip salt water and fresh water as outlined for T-2 vessels. All deck scuppers should be securely plugged and all precautions should be taken to avoid pollution of lake waters.

Inspection of Tanks:

Before loading can commence, tanks and loading system must be inspected and passed. This is usually done by the Terminal's own Cargo Inspector but, if consignee so requests, third party inspection can be arranged.

Inspection Companies available in Maracaibo are the following:

Chas. Martin Venezolana de Inspecciones	(CHAS MARTIN)
E. W. Saybolt & Co., S.A.	(SAYBOLT)
Redwood Petroleum and Petrochemical Division	(REDWOOD)
Analistas e Inspectores Venezolanos de Petroleo C.A. Inspecciones, S.A.	(AIVEPET)

Line Displacement:

When a vessel is loading crude and products, it is usually necessary to displace lines once or twice during loading. Masters will be advised of necessary line displacements before loading starts and are required to take note because NOTICE HAS TO BE GIVEN BY VESSEL when pumping should be stopped and tanks changed. Once shore tanks have been changed, it will not be possible to change the quantity of the product already in the ship, as shore lines will then contain a product different from the one already loaded. *Ship's gauges and/or draft should be carefully checked when calculating required quantities.*

Spillage:

In case spillage occurs, the Terminal Port Supervisor must be advised immediately, as any spillage must be reported to the Authorities without delay.

There has been considerable discussion in Venezuela concerning oil spillages resulting in contamination of Lake Maracaibo. Considerable pressure is being exerted by Government agencies to eliminate all spillage, and the Terminal is making every effort to avoid contamination of Lake Maracaibo.

While vessel is at Bajo Grande take special precautions to avoid dirty ballast, bilge water or any other contaminant entering the Lake.

If a spill should occur and Terminal representative, the Government's representative of the National Guard observes that the waters of the Lake are being contaminated by any substance from the vessel the Terminal will request that vessel suspends deballasting, loading or discharging operations immediately and all consequences that might arise from this operation such as short loading, the unmooring of your vessel, fines, damages to fishermen, clean up costs, etc., *will be strictly, for vessel's account.*

We strongly recommend to Masters to emphasize to the officers on deck to endeavour to avoid spillages and to make certain that the scupper plugs are installed prior to commencement of loading operations in order to withhold on deck any spillage that might occur.

After Loading:

All Butterworth plates, tanks tops and ullage plugs should be inspected to ensure against entry of water. Inspection of ullage plugs should follow on completion of temperature readings because of the necessity of taking temperatures en route. Sea suction valves should be secured by positive means until all cargo has been discharged. This may be accomplished by numbered seals, chains and padlocks. The method of securing should be noted on the inspection documents. Regardless of which method is used, appropriate log entries should be made indicating the date, time and method used and under whose supervision, both vessel officer and/or Cargo Inspector, such method was applied.

About 1 hour is required for the preparation of the cargo documents which are normally delivered on board before sailing.

Temperature of Boscan Crude and Boscan Products at Sea:

On short voyages, as for instance to the U.S.A., it has proved most practical to maintain the loading temperature. On longer voyages, as for instance to Europe, the temperature may be dropped to 130°F., which does no harm as long as sufficient time is given to bring the temperature up again to that required for discharging. Masters should, however, not expect a temperature rise of more than 5°F. per day, especially if the sea temperature is low. The heat transfer properties of Boscan Crude are very poor as are those of the heavy products made from this crude. Many ships have been delayed in the discharge port due to too low cargo temperature. A temperature of 160°F. is suggested for discharging Boscan Crude, Topped Boscan and cutback asphalts.

Discharge Cargo:

Boscan Crude has a flash point of 110–160°F. and a maximum viscosity of 1400 SSF at 140°F. The viscosity at other temperatures follows the pattern of other petroleum products. Boscan Crude has been successfully handled in ships fitted with both reciprocating and centrifugal type pumps with forward and after pumprooms respectively. It is generally found that this crude can best be handled at a temperature which brings its viscosity to about 600 SSF 160°F. Vessels with forward pumproom should control stern trim so that it does not exceed about 4 ft. while stripping the after tanks. Also a 5° list is very helpful when stripping. Once the cargo gets below heating coils, tanks must be pumped empty as fast as possible. At times it has been found helpful to gather tanks strippings into a single tank for discharge ashore, as it is very difficult to strip against heavy back pressures. Watch reciprocating pumps for vapourlock. Because of high viscosity, proper care should be taken that no oil is left in vessel discharge lines at low temperature.

Tank Cleaning After Discharge Cargo:

Many Masters have expressed concern over tank cleaning after discharge. Assuming that the ship proceeds to sea for this operation and has sufficient time for proper execution, vessel may be cleaned quite thoroughly using the Butterworth system. However, it is of vital importance that the system be used at maximum pressure and temperature (not below 160 p.s.i. and 170°F respectively). At these conditions and with 2 machines, it has been found that about 4 hours are required for each tank. It is of importance to keep the tanks well stripped during the Butterworthing. Some prefer to steam out the tanks before Butterworthing. If this course is adopted care should be taken that the steaming does not last more that 1 hour as the heat will drive off the light ends of the oil and leave a rubbery residue that is very difficult to remove.

It has been found helpful to keep the machines in LOW position for about 1 hour and the HIGH – MIDDLE and LOW in order, in the usual manner.

Boscan Crude and Products/Light Products:

Product	*API Gravity*	*Loading Tempera-ture °F*	*Loading Lines used*	*Normal Loading Rate B/H*
Boscan Crude	10.0–10.4	160	2×18 in.	10,000
Boscan Crude Blends	13.0–19.0	140	2×18 in.	10,000
Topped Boscan Crude	9.5–10.0	160	2×18 in.	10,000
Topped Boscan Crude Asph. Grade	8.0–10.0	160	2×18 in.	10,000
Cutback Asphalt	11.0–15.0	170	2×12 in.	5,000
Asphalt Cement (Pas)	5.0– 8.0	300	1×14 in.	5,000
Gasoil	35.0–42.5	90	1×12 in.	6,000
Fuel Oil No. 2	38.0–40.0	90	1×12 in.	6,000
Fuel Oil No. 5	21.0–22.0	120	1×12 in.	5,000
Fuel Oil No. 6	16.0–18.0	160	1×18 in.	12,000
Light Naphtha (LSR)	70.0–73.0	85	1×12 in.	6,200*
Heavy Naphtha (HSR)	52.0–53.5	85	1×12 in.	6,200*
JP-4	45.0–51.9	80	1×12 in.	6,200*

*Maximum rate due to Bajo Grande Terminal security regulations.

FUEL: *Advance Notice of Requirement:*
Should a vessel arriving at Bajo Grande require any bunkers, Owner or Operator must place their nomination with C.V.P/Llanoven via Telex as much in advance of the delivery date as possible. Telex should indicate name of vessel, ETA at Bajo Grande and quantity and quality of Marine Fuels required. A cash deposit in U.S. Dollars covering the nomination must be made prior to the delivery date into the following account:

First National City Bank
339 Park Avenue
New York, N.Y.
U.S.A. 10022
Current Account No. 36990309
(C.V.P./Llanoven Petroleum Income Account)

Owner or Operator must also request F.N.C.B. to confirm via Telex to C.V.P./Llanoven that such deposit has been made in order to cover the cost of bunkers to be delivered to vessel arriving at Bajo Grande at the current ETA. Only after this Telex has been received will delivery actually proceed.

Should the Owner or Operator have a credit account with Chevron, he can also contact either Chevron International Oil Company Inc. in San Francisco (California, U.S.A.) and New York (N.Y., U.S.A.) or Chevron International Oil Company, Ltd., London (England), requesting credit to cover the delivery. CHEVRON would in turn cable to C.V.P./Llanoven the order to supply bunkers. If such is the case, the above mentioned cash deposit will not be required.

Bunker Facilities:
Bunkers are available from pipe-line at Bajo Grande Terminal for vessels loading and unloading cargo at berths No. 1 and 2. Bunkering rate is about 2,500 bbls.p.h. for Bunker "C", Intermediate Bunker Fuels, Marine Diesel and Gasoil.

Marine Fuels and Lubricants available:
Bunker Fuel (sometimes called Bunker "C")
Intermediate Bunker Fuels.
Marine Diesel and Gas Oil.

Lubricants are generally available in the Maracaibo area. Should you require any, we recommend to contact vessel's local Agent.

Lighterage:
Bunker Fuel, Intermediate Bunker Fuels, Marine Diesel and gas oil are also available for ships in the Maracaibo area. The barging rate is $0.30 per barrel; minimum $100.00. 72 hours advance notice is required for barge deliveries of all products.

FRESH WATER: Delivery of boiler and potable water is made by barge at an all-inclusive price of Bolivares 16.00 per metric ton, *minimum quantity 100 tons.* The barge holds about 160 tons and the pumping rate is about 25 t.p.h. Requirements should be cabled in advance to the Agent of the vessel in Maracaibo.

REPAIRS: No major repair facilities are available in Maracaibo but small repairs can be undertaken by local machine and electric shops. Shore labour can be furnished if required. Technicians are available for minor radio repairs. Nearest dry docks are at Curacao for vessels up to 30,000 d.w.t. and at Puerto Cabello, Venezuela for vessels up to 18,000 d.w.t.

CUSTOMS: *Contraband:* Strict compliance with the Customs Law of the Country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but a greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to the very strict enforcement of the customs regulations, it is recommended that no goods be carried which are not shown on the store list. Any new articles (clothes, shoes, etc.) should be included in the store list and marked as personal belongings. If during a checkup by customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS:
Following countries have consular representation in Maracaibo.

Argentina
Austria
Belgium
Bolivia
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany (West)
Great Britain
U.S.A
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Puerto Rico
Peru
Spain
Sweden

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo. Their services may be procured by cabling requests to the local Agent at Maracaibo.

HOLIDAYS: The Terminal office will be closed on the following days. New Year's Day (January 1st); Easter Thursday/Friday (March/April); Declaration of Independence (April 19th); Labour Day (May 1st); Battle of Carabobo (June 24th); Independence Day (July 5th); Birthdate of Simon Bolivar (July 24th); Columbus Day (October 12th); Chiquinquira's Day (November 18th); Christmas Day (December 25th); All Saturdays; All Sundays.

SHORE LEAVE: Shore Leave is permitted at the discretion of the Port Authorities; required number of shore passes will be brought on board on arrival in Maracaibo and have to be returned to the customs guard again before the vessel leaves Bajo Grande.

GENERAL:

Tonnage applicable on fees:
On ships registered in countries which have a reciprocal tonnage agreement with Venezuela, the gross Tonnage registered in such countries will be applied for calculating pilotage fees. Such countries are:

Denmark
France
Germany
Netherlands
Ireland
Norway
Portugal
Sweden
United Kingdom
U.S.A.

On ships registered in countries not listed above, such ships calling at Venezuelan ports for the first time must be measured for Venezuelan tonnage by the Port Captain. It is usual practice to take ashore the ship's Panama Canal or Suez Canal International Gross Registered Tonnage Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Firearms and Ammunition:
Firearms must not exceed 1 per officer nor may the ammunition exceed eighteen cartridges per officer. All firearms and ammuniton must be carefully declared on the store list and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

Guards:
Customs guards are stationed on the platform at Bajo Grande. They must be provided with sleeping quarters on the ship and seated in the officers' mess for their meals. Non-compliance may cause cargo stoppage and fines. Masters are reminded that these guards are representatives of the Venezuelan Government and any uncourteous action on the part of the crew or passenger will be regarded as a slight against the Country itself.

Gangways:
The ship is to supply a safe gangway, which allows easy access to the vessel. The Terminal has a gangway which may be used on request with the understanding that any damage to the gangway or ship or shore personnel through its use may be held against the ship.

Safety:
Vessel must be in readiness to move at all times. The attention of Masters of turbine steamers are called to this regulation.

Ship's fire fighting equipment must be ready for instant use while vessel is alongside. Shore personnel will render assistance in an emergency but, since no fireboats are stationed in the immediate area, vessels should be prepared to combat fire without outside assistance. It is necessary to obtain Terminal's approval for repairs of propelling machinery.

Normal safety precautions apply. Smoking is not allowed on the pier. No hotwork is permitted on vessels alongside without a *written* permission from the Port Supervisor. *Swimming alongside pier is dangerous and absolutely prohibited.*

Launch Service:
The launch is primarily for the use of the port staff, but will transport crew when convenient.

Taxi:
Taxi service will be generally available upon request to vessel's Agent.

Visitors:
According to Port regulations concerning access to ships and loading terminals and in the interest of industrial safety, only persons directly concerned with loading operations will be permitted to board vessel or visit the loading platform at Bajo Grande.

Plimsoll Marks:
The Port Captaincy requires that Plimsoll Marks be readily visible. If they are not clearly legible, permission to sail may be withheld and a fine imposed. This is applicable to inbound and outbound vessels.

We therefore, request your full compliance with this Regulation from the Maracaibo Port Captaincy.

Marine Store/Charts:
Marine stores are available in limited supply. Marine charts are not available.

Compass Adjusters:
There are no compass adjusters in Maracaibo.

Seaman left behind:
Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

Crew in Transit:
In case a crew member is left ashore for a justified cause, such as hospitalization, repatriation, etc., his documents and personal effects are to be delivered to the vessel's Agent before sailing. A letter is required from the Master with detailed instructions as to maximum cash advance, etc. All expenses incurred by such members are for vessel's account.

Port Supervisor:
Masters or their representatives are invited to call at the Port Supervisor's Office on shore in Bajo Grande or over the telephone on the pier, for any further help, information or complaints.

Terminal:
Cable Address: C.V.P./Llanoven Maracaibo. Telex: Nos.: 61254 and 61161.

(2) **OPERATORS:** C.V.P./Llanoven.

Location: S.W. of channel buoys B–87 and B–88.

The installations for processing natural gas liquids at Bajo Grande processes liquids for C.V.P./Llanoven, and they are known as Product Owners. The Plant is situated in Bajo Grande, approximately 10 miles to the South of the Port of Maracaibo, on the West bank of Maracaibo Lake.

FLAG: The local authorities require the Venezuelan flag to be hoisted to the top of the vessel's mast from the time it enters the outer channel on arrival, until it leaves the outer channel on departure.

DOCUMENTS: *Customs Clearance for Programmed Vessels:*

Vessels which arrive in ballast or with cargo in transit, require the following documents (with additional file copies if these are required):

(A) Clearance from the last port
2 copies–1 visaed Ballast Certificate
1 or more letters Consular Correspondence (in sealed envelope)
4 copies–2 visaed Passenger List
4 copies–2 visaed Lists of Equipment
4 copies–2 visaed List of Passengers in Transit
4 copies–2 visaed List of Mess Equipment and Spares
4 copies List of Personal Effects
4 copies–2 visaed List of Stores
5 copies Crew Lists.

Vessels which arrive with cargo must have, apart from the foregoing:

(B) 4 copies–2 visaed Venezuelan Entry Manifests
6 copies–2 visaed Bill of Lading
2 copies visaed Entrance Manifests.

In the absence of a Venezuelan Consul at the last port, the Customs clearance documents must be signed by the Consul of a friendly nation, one of the Port Authorities, Notary Public, the Chamber of Commerce, or by two recognised signatories.

Clearance through Customs of diverted vessels:

Vessels diverted on the high seas to Maracaibo to load at Bajo Grande must present all the documents indicated in (A) above, except the consular correspondence, which they will not have.

Vessels diverted on the high seas to Maracaibo (Bajo Grande) which do not have a Venezuelan Customs Clearance on board, must advise their Agents by radio prior to their arrival, the name of the vessel, the name of the Master, nationality of the vessel, net Venezuelan tonnage (if available, if not, the net registered tonnage), last port of discharge, port to which it was originally sailing and the ETA at the Pilot station at San Carlos. This information is required to obtain the Entry Permit prior to the arrival of the vessel. Three copies of the diversion telegram received by the vessel, signed by the Master, together with those documents detailed above, must be presented to the Port Authorities on arrival at Maracaibo. Non-presentation to the Port Authorities of the documents or the information mentioned will occasion a fine to the vessel.

Inspection by Customs: All vessels arriving from foreign ports destined for the dock at Bajo Grande must anchor in the Port of Maracaibo for Customs inspection by the Port Authorities before proceeding to Bajo Grande. The vessel's gangway must be in position prior to arrival at Maracaibo.

A member of the National Guard of Venezuela will come on board every vessel at Bajo Grande to observe the activities in connection with the operations of loading and unloading. This official is authorised as representative of Customs and is known as the "Vigilante de Aduana". He must be fed and lodged at the same standard as ship's officers.

Loading Documentation: The loading and Customs papers will be delivered to the Captain by the Agent of the ship on his arrival at the Port of Maracaibo, on his voyage outwards.

PILOTAGE: Vessels entering currently have the option of taking on the official Pilot at:

(a) The channel in front of the Pilot station at San Carlos, between the Buoys B–24 and B–26.

(b) In front of Amuay Bay or Punta Cardon. However, to arrange this service, Agents must be advised at least 48 hours in advance of this requirement.

The Pilot who boards the vessel in front of San Carlos will take it to Maracaibo, where he will disembark.

Due to weather conditions, the Port Captaincy of Maracaibo cannot guarantee the embarkation or disembarkation of the Pilots at the "EM" buoy. For this reason, Captains must communicate with the Pilot station of San Carlos to receive necessary instructions as to where the Pilot will be embarked, the latter usually coming on board between Buoys B–24 and B–26. The system of communication between the Pilot station of San Carlos and the vessels will be via radio-telephone. The San Carlos frequencies are: 2182 kc/s. and 156.6 mc/s. (VHF Channel 16). Other frequencies are: 2122 and 2080 kc/s. and 156.8 mc/s.

Pilotage to navigate through the inner and outer channels is compulsory at all times. The maximum speed of navigation in the dredged channels is 10 knots.

Vessels leaving will take the Lake Pilot on board at Bajo Grande and on reaching the port of Maracaibo the Pilot will be changed for another to take the vessel through the channel. The channel Pilot will pilot the vessel up to the San Carlos bank, generally between Towers E–31 and E–33, where he will disembark. The Port Captain of Maracaibo has issued instructions to all ships' Agents so that they may inform the Captain and/or Owners of the vessels that all vessels must identify themselves with the Pilot station of San Carlos by radio-telephone, regardless of the time of day, when they are entering between Buoys B–17 and B–19 and when they are leaving between Buoys T–42 and T–40.

Every time a launch with an official Pilot on board leaves to attend to a vessel in sight, the costs will be charged to the company which owns the vessel or to its representative, even when the service has not been given.

A government Pilot will assist each vessel from Maracaibo to Bajo Grande and on the outbound trip to Maracaibo. The government Pilot will also assist in the berthing and unberthing operations. The ship's Agent will inform the Master of each vessel, as well as the government Pilot, the schedule for berthing the vessel.

The Plant Mooring Supervisor will board each vessel prior to approaching the dock. Mooring Supervisor will assist in the mooring and unmooring operations. It should be understood that the Mooring Supervisor acts only in an advisory capacity to the Master. The vessel's Master retains full responsibility at all times. The Plant assumes no responsibility in connection with any acts or advice given by the Mooring Supervisor.

APPROACHES: The buoy which marks the entrance to the outer channel (buoy "EM") is situated in approximately position 11° 13′ 47″ N., 71° 33′ 31″ W. The characteristics of the light of the "EM" buoy are: white flash every ten seconds, visibility approximately 5 miles. The distance between the "EM" buoy to the Southern extremity of the outer channel, marked by the Buoys B–27 and B–28, is approximately 15.75 miles. The channel is 1,000 ft. wide and normally has a depth of 42 ft. minimum at low tide observed at the time of neap tides with a tidal amplitude varying 2 ft. 3 in.

There is a breakwater 0.5 miles to the East of and parallel to the outer channel which extends 1.6 miles to the North from the Northern side of the Island of Zupara. The end of this breakwater is marked by a steel frame tower with a light 25 ft. above sea level. Characteristics of the light are: white flash every 8 seconds, visibility about 3 miles.

Commencement of the inner dredged channel is marked by the Buoys B–29 and B–30. The length of this channel, which is marked by buoys, is approximately 12 miles, and ends at Buoys T–55 and T–56. The channel is 800 ft. wide and the normal checked depth is 43 ft. neap tides with a tidal amplitude varying between 1.5 ft. to 2.5 ft.

The channel from the Buoys T–56 as far as the port of Maracaibo is a dredged channel, whose end is marked by Buoys B–73 and B–74. It is some 800 ft. wide and has a depth of at least 43 ft. The distance is about 11 miles and the tidal amplitude range is insignificant.

RESTRICTIONS: Bridge, clearance at MHHW 146 ft.

MAX. SIZE: The maximum permissible fresh water draft at the dock is 36 ft. and the maximum overall length vessel the dock will accept is 700 ft. Vessels with a berthing displacement up to 20,000 long tons will be accepted, providing the approach velocity can be controlled to 0.3 ft. per second or less.

Vessels with an overall length greater than 700 ft. or with a fresh water draft of more than 26 ft. or a displacement greater than 20,000 long tons will not be accepted for loading at Bajo Grande, unless they have obtained the prior authorisation of C.V.P./Llanoven. If the vessel is not equipped to moor, load and unmoor in a safe manner, the vessel will not be loaded. In such cases, there will be no responsibility on the part of C.V.P./Llanoven.

RADIO: C.V.P./Llanoven Export Department also has radio-telephones with the following frequencies: 2080, 2120, 2182 (stand-by), 2638 and 2738 kc/s. and 156.6 (stand-by) and 156.8 mc/s., operated in accordance with the following schedule:

Monday through Friday:	From 0730 until 1130 From 1300 until 1700
Saturday, Sunday and Holidays:	From 0730 until 1030 approx.

Any tanker or vessel bound for Bajo Grande shall cable C.V.P./Llanoven, at least 5 days in advance of its scheduled arrival time in Maracaibo, giving notice of its estimated time of arrival, loading capacity, amount and type of product to be lifted and condition of ship's tanks.

At least 48 hours in advance of arrival at the San Carlos Pilot station, the vessel's estimated time of arrival, nationality, Venezuelan net tonnage (if available, otherwise its registered tonnage), quantity and type of cargo required, condition of ship's tanks, name of Agent, last port, Master's name and all requirements of the vessel while in port should be cabled to "C.V.P./Llanoven Maracaibo" and to the ship's Agent. As the cable office in Maracaibo is not able to communicate directly with vessels at sea, messages to "C.V.P./Llanoven Maracaibo" and to Agent should be routed via PJC Curacao, and should be prefixed "Via AAC" (All America Cables and Radio Inc.). Failure to give such proper notices shall absolve the Plant from any claim for delays or demurrage.

TUGS: 2 tugs, each 1,600 h.p.; will be used for mooring and unmooring operations.

BERTHING: The dock proper may be identified by the overwater pipe-line trestle that connects the dock with shore.

The dock is located approximately 10° 30′ N. 71° 36′ W., which is 2 miles off shore from the Bajo Grande Natural Gas Liquids Processing Plant and S.W. of channel buoys B–87 and B–88 on the Maracaibo channel. The dock is single sided and consists of 4 breasting pilings, 4 mooring dolphins and a loading platform.

The dock is equipped with a compressor and auxiliary equipment to assist the ship in compressing and re-condensing the ship's vapours. No liability will be assumed by the Plant Operator for unavailability of the Dock's vapour compressor. The dock is also equipped with a vent system to dispose of contaminated vapours.

A tie-up crew will handle all mooring or pick-up lines before and after loading.

The Plant tie-up crew will assist the ship's crew in positioning and connecting the cargo loading arms and in removing same on completion of loading. The dock loading arms are equipped with 10 in. ASA 300 lb. RF flanges. It shall be the responsibility of the ship to furnish its own fittings to mate with the dock's 10 in. ASA 300 lb. FR flanges.

Mooring procedure. Any vessels calling at Bajo Grande must be equipped with mooring hawsers of sufficient length and strength to run a line to each of the 2 bow and 2 stern mooring dolphins and shall use such equipment while at the dock. Vessels equipped with tension winches and cables shall utilise these in addition to the mooring hawsers or alone if the vessel has sufficient cables to meet the minimum requirements of running a cable to each of the bow and each of the stern mooring dolphins. For added security of those vessels not equipped with tension and/or cables, 1 steel cable will be furnished for a bow and another for a stern mooring dolphin by the Plant. It should be recognised by all parties that while the use of these cables is strongly recommended, the Plant accepts no responsibilities for loss or damage to any vessel or to any facility or to any person that may result from the failure of this equipment.

For the convenience and safety of all personnel boarding or disembarking while at Bajo Grande it is recommended that the vessel's accommodation ladder be rigged on the port side, this being the side normally laying against the dock. The ladder should be suspended after the Mooring Master boards and during docking operations to avoid being fouled.

BALLAST: There are installations for unloading dirty ballast. Vessels which arrive at Bajo Grande with dirty ballast must advise 48 hrs. in advance with regard to any emulsifiers, detergents or chemicals which may be present in the ballast and which are going to be unloaded. If these emulsifiers, detergents and chemicals are not acceptable, C.V.P./Llanoven will advise the ship and the latter must arrive at Bajo Grande with clean ballast.

The ballast will be unloaded at a rate of approximately 5,000 bbls.p.h., nevertheless in the case of unexpected damage or malfunction of the system at Bajo Grande, C.V.P./Llanoven will give instructions to the Master of the vessel so that he may arrive with clean ballast and C.V.P./Llanoven will not be responsible for the delays which may be suffered by vessels in cleaning their tanks prior to arrival.

It is strictly prohibited to discharge into the lake any liquid or solid waste resulting from tank cleaning. Therefore it is recommended that the Master gives instructions to all personnel so that they avoid any possible leak or contamination in the lake.

In the event that the representative of the Plant or the National Guard observe that dirty ballast is being discharged into the lake, or even residues or other contaminatory organisms whilst clean ballast is being unloaded, such operations will immediately be suspended and the consequences will be strictly for the account of the ship.

LOADING: *Notice of Readiness:* On arrival at Bajo Grande and after inspection by the Customs Authorities, and having obtained any other official approval required before loading, the Master of the vessel will notify C.V.P./Llanoven in writing that the vessel is ready to load. This notification must include a report of the conditions of the tanks of the vessel, specifying in detail the temperature, pressure, last loading, list of vessel and trim, possibility of contaminatory organisms and any other conditions which may effect the loading.

The Master of the vessel may request any equipment and/or service which he considers necessary for the safe and efficient loading of his vessel and C.V.P./Llanoven will make every effort to fulfil this request.

It will be the responsibility of the vessel to provide its own connections to join up with the RF 10 in. 300 ASA flanges of the dock.

It will be the responsibility of the ship's Master to ensure that prior to commencement of loading, the atmosphere inside the tanks, which are to receive products are within the safety limits stipulated. Nevertheless, C.V.P./Llanoven reserves the right to inspect at any time, to verify the fulfilment of these safety precautions and to refuse to load any vessel which in the opinion of C.V.P./Llanoven does not fulfil the safety requirements stipulated.

LPG refrigerated vessels will not be considered ready to load at Bajo Grande unless all the LPG tanks contain LPG vapours and are sufficiently cooled to permit shipment of the nominated products.

Vessels which receive completely refrigerated products must be capable of receiving at their boiling point from 0.5 to 2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquifying all the vapours resulting from the shipment at the rate specified and including those vapours which form as a result of the heat gained by the vessels tanks.

Loading Procedure: The positioning and connection of the loading arm must be effected to the satisfaction of the personnel in charge of the vessel. After approval of the personnel in charge of the vessel, the loading valves may be opened to check that the connections do not have leaks and loading may commence.

The maximum loading rate is 8,000 bbls.p.h. (750-775 metric t.p.h for completely refrigerated products and petrol) and a minimum loading rate of 250 bbls.p.h. (23 metric t.p.h.).

The pumps are designed to supply a minimum flow of 250 bbls.p.h. at a pressure of 225 p.s.i.g. and, since the installations at the Bajo Grande Dock do not have facilities for controlling the pressure of LPG which is being loaded, they are not responsible for any damage or delay which may occur due to the request for reduction in flow and pressure of LPG in order to cool or purge the vessel's tanks.

There are no installations for generation of inert gases. LPG vessels which require cooling, purging or any other assistance in Bajo Grande can be accepted after prior request in writing from the Master of the vessel; however, these services will be charged to the vessel. The responsibility for helping to effect purging and/or cooling is charged at 733 Bolivares per hour, during the time that such operation of purging or cooling causes the vessel to exceed the permitted period of stay.

The quantity of products used in such purging or cooling will be for the account of the vessel.

In the event that the dock vapour compressor is operated at the request of the vessel's Master for a purpose other than for purging or cooling, this will be charged at the rate of 500 Bolivares per hour to the ship.

All loading and unloading operations must be suspended whilst there is bad weather and the tank covers of the vessel must be closed and secured. During periods of calm, petrol or other products with a low flash point can be loaded at reduced rates or the loading operation can be interrupted if the heavy vapours are not being dispersed with sufficient speed to avoid dangers of gas accumulation. Officers on the vessel must be alerted so that they may be on watch whilst such conditions apply.

Under normal operational conditions it may be necessary to displace the loading line. This will require the person in charge of the vessel advising the representative of the Plant when the loading is nearing completion in order to complete an equal quantity to the capacity of the loading line.

Permitted Period of Stay: (a) The permitted period of stay, as is defined hereunder, shall commence to be counted from 6 hours after arrival of the vessel at Bajo Grande. The permitted period of stay will be terminated when the final mooring cable has been withdrawn from the quay.

For the purpose of these instructions, the Notice of Readiness, may be delivered after the vessel has tied up at the dock; nevertheless, the arrival at Bajo Grande shall be defined as the time when the vessel passes between Buoys B-87 and B-88, which mark the Maracaibo navigational channel and are situated approximately 1,000 m. in front of the Bajo Grande Dock.

(b) In the event that a vessel arrives at a different time to that confirmed in the shipping programme, and unless C.V.P./Llanoven has approved a different arrival time, vessel must await mooring of other programmed vessels before arriving and which vessels may have arrived at that time and the permitted period of stay will commence when the loading operation commences, or 6 hours after receiving Notice of Readiness, whichever is the later. It is agreed that a vessel shall be included in the loading programme if it arrives at Bajo Grande between the hours of 12.01 hrs. on the accepted date and 0600 hrs. of the following day.

(c) Except for the provisions in (b) above, all vessels arriving at Bajo Grande will have the right to moor in the order in which they appear in the shipping programme. C.V.P./Llanoven, at their discretion, may change the order of shipment when it may be necessary for reasons of safety or for the purpose of obviating a closure of the Plant or reduction in production.

(d) The waiting time permitted shall be 24 hours, plus one (1) hour for each 6,000 bbls. of product loaded in excess of 114,000 bbls. This waiting time shall be that permitted to load the complete cargo or part of the cargo of the vessel, it being understood that any time spent in deballasting operations will not be taken as waiting time. If the loading operations are delayed or interrupted by *force majeure*, which shall include the closure of the shipping terminal due to bad weather, the time thus lost will not be counted as permitted waiting time.

(e) The loading operations shall be considered as terminated when the loading hoses are disconnected. Every vessel will leave the quay as quickly as may be practically possible after having completed shipment of the cargo and the personnel of the vessel and those on land have arrived at an agreement as to the quantity of products shipped.

(f) In the event that a vessel is moored at the quay for six consecutive hours after C.V.P./Llanoven has notified the Master of the ship that the installations are ready to deliver the product, if the vessel on completion of this time is not in a position to receive products, then at the discretion of C.V.P./Llanoven, the vessel may be withdrawn from the quay, to prevent the products burning or a reduction in production.

A vessel may be withdrawn from the quay at any time for reasons of safety.

Verification and Measurement: Determining factors to arrive at the official figures of a shipment:

(a) Petrol and Butane:

(1) Correction factors of the individual meters less than 1%. In this event the terminal shall always use the figures of the meters as official (and not take into account the absolute difference in barrels) taking always the precaution of carrying out a comparison between the figures of the ship and those of the land.

(2) Factor of correction in any of the meters greater than 1%. In this event the vessel's figures will be used, comparing them in all aspects with the figure of the meters without applying the correction factor and with the land tanks.

In those cases in which the vessel's figures are used, it is appropriate to suggest that they check their figures.

(3) In the event of the measuring system not operating, and the vessel cannot give its own figures, as a last recourse the figures of the shore tanks will be used.

(b) Propane:

(1) the vessel's figures will be taken proceeding in exactly the same way as in point (2) of sub-section (a) above.

(2) In the event that the vessel cannot supply figures, the figures of the shore tanks will be used.

All volumes will be adjusted to the volume equivalent to 60° F in accordance with the applicable sections of Standard API 2534 and the corresponding tables of the Measurement Tables of Oil ASTM (latest edition) or other methods or standards selected by C.V.P./Llanoven.

If the product delivered is LPG, the content of the ship's tanks will include the quantity of the product in the form of vapour.

All volumes will be calculated in U.S. liquid barrels at 60° F and the adjustments at this temperature will be made in accordance with the Oil Measurement Tables ASTM-1P, American Edition 1952 (or the ruling tables which may replace these).

In the event of the products being loaded in a vessel whose tanks, pipes and equipment are empty when loading commences, the gross volume of products which may remain in the pipes and equipment on completion of shipment and at the time of final measurement, shall be calculated on the basis of the volumetric capacity of those pipes and equipment, adding the calculated volume loaded in the vessel's tanks and including in the total volume delivered to and received by the vessel at that time. In the event that the procedure described is used to determine the volume of products delivered and if during the time of this delivery vapours from the vessel's tanks be vented then the quantity of vapours vented shall be determined as shall also be the liquid volume equivalent to these vapours in normal conditions and this will be added to the quantity determined in (a) and (b) above.

Permissible Composition of the Atmosphere of the Tank for purging: Maximum percentage per volume of air or oxygen permissible for the safe shipment of the product when the vessel's tanks are purged with CO_2 or N_2:

	Air		*Oxygen*	
Product	*(CO_2)*	*(N_2)*	*(CO_2)*	*(N_2)**
LPG	50	40	8	7
Petrol	50	40	8	7

*The percentages of nitrogen do not include the nitrogen of the air in the mixtures.

Example: If a vessel is going to load LPG and it is going to be purged with N_2, it must add sufficient N_2 to ensure that the mixture does not contain more than 40% by volume of air. The other 60% will be N_2.

Ref. Principles & Practices of Purging, 1954. American Gas Assoc. – Chapter 2, page 28.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available in the area. Lubricating oils in limited quantities are also available from local contractors. All bunker, lubricating oils, water and other requirements should be cabled to the ship's Agent. For reasons of safety, no bunkers may be taken on the vessel while berthed at Bajo Grande.

FRESH WATER: Available at Maracaibo Harbour.

MEDICAL: Complete medical services are available in Maracaibo.

REPAIRS: Maracaibo: No major repair facilities are available, minor repair jobs can be taken care of through local machine and electrical shops. Shore labour can be furnished if required. Radio, radar and gyro compass technicians are available upon request.

Bajo Grande: No repair facilities are available, but when required, personnel from shops in Maracaibo will travel to Bajo Grande to effect repairs.

SHORE LEAVE: Launch service for official business purposes and emergencies is readily available in Maracaibo. Launch service for shore leave can be arranged through contact marine service and will be the responsibility of ship's personnel. Arrangements for shore leave transportation can be made through the ship's Agent. No shore leave facilities are available at Bajo Grande.

CONSULS: The following nations have Consular representation in Maracaibo:

West Germany
Belgium
Colombia
Costa Rica
Chile
Denmark
Ecuador
El Salvador
Spain
United States of America
France
Great Britain
Guatemala
Netherlands
Italy
Norway
Panama
Peru
Sweden
Switzerland

CLASSIFICATION SOCIETIES: American Bureau of Shipping and Lloyd's Register of Shipping, U.S. Salvage Association, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale, and Germanischer Lloyd have Agents in Maracaibo. Surveyors are available by appointment from any of these Agents.

CURRENCY: The Venezuelan unit of currency is the Bolivar (Bs) and is the only currency recognised as legal tender within the country. Masters desiring a cash advance should make the request to their Agent when advising ETA.

MAIL: Outgoing mail for ship's account may be given to the Agent's representative who boards the vessel on arrival at Maracaibo inbound. Personal mail will be accepted only if carrying the correct amount of Venezuelan postage, or if postage is authorised by the Master for the vessel's account.

GENERAL: *Maracaibo Port Captaincy:* Directive which must be observed by vessels entering and leaving Maracaibo Lake:

OBJECTIVES:

To increase the safety of Human Life at Sea, to take all necessary measures to avoid marine accidents in general and to ensure that vessels are navigated with safety in the navigable channels and waters of Maracaibo Lake.

1. All radio-telephone communications between the Control Offices of Maritime Transit under the control of the Port Captaincy of Maracaibo and vessels, shall be made, for the first contact, via Channel 16 (156.8 mc/s.) and immediately it shall be agreed that for the transmission of required information they will change to Channels 12 or 14. Also this procedure will be adopted in communication from ship to ship.

2. Any vessel which navigates in the vicinity of the buoy "EM" of the outer channel being 10 miles from the latter shall call the Pilot station at San Carlos, requesting permission to enter the zone and will supply the following information:

(a) Name and type of the vessel.
(b) Nationality.
(c) Draft.
(d) Last port of call
(e) ETA at the "EM" and "B-26" buoys.

3. The Port Captaincy will authorize by radio, via the Pilot station of San Carlos, to Masters of vessels who have reported to that station request to cross the outer channel, or part of it, with the assistance of the Official Pilot, in accordance with the sequence of arrival.

4. Every 5 miles, the Master of the vessel will call up San Carlos, indicating any information which he may have and giving his position within the channel, by reference to the buoys which are on his starboard side.

5. When communication in item 1 has occurred, San Carlos will inform the vessel as follows:

(a) The location of any dredger (mobile or stationary) which is operating in the outer channel, buoys whose lights are out, changes in buoys' positions or where buoys have disappeared, vessels which have sunk, etc.

(b) If there are vessels leaving the port, to give the position of these by reference to the odd numbered buoys.

6. Vessels shall establish radio-telephone communications with the dredger "Zulia" when they are 5 miles from it. In this communication, they will indicate the place they estimate that the vessel will meet the dredger and any other information which they consider necessary for the safety of navigation of both.

7. San Carlos will keep vessels informed of all the circumstances mentioned above, especially the time and place that each of them estimate to pass close to any dredger which is operating in the outer channel, and in order that they do not meet the dredger simultaneously.

8. Masters of vessels will inform the Pilot station at San Carlos of any other information which the latter may request.

9. Masters of vessels will keep a watch on Channel 16, on the order of the Official Pilot, until their arrival at port of destination in Maracaibo Lake and on leaving until the Pilot has left the vessel.

10. Pilots, when they are bringing a vessel into the port, at the level of the parallel of Palmas del Norte Point (Buoys T-55 and T-56), will call up the Port Captaincy and transmit the following information:

(a) Name of vessel
(b) Time
(c) Port where operations will be effected
(d) Name of Pilot calling.

11. When the vessel continues to navigate to the South of General Rafael Urdaneta Bridge, the Pilot will inform the Control Office of Maritime Transit in Maracaibo, the time at which the vessel will pass Buoy "B-79".

12. The average speed of vessel in the navigable channels will be ten (10) knots, Masters being authorized as are also Official Pilots, to alter this, when the safety of navigation may require it.

13. San Carlos will check by radio-telephone the transit of vessels from the entrance buoy "EM" to the level of the parallel which passes in front of Palmas del Norte Point (Buoys T–55 and T–56 and vice versa).

14. Loaded vessels navigating outwards, and being in the outer channel, will have priority over vessels coming in to the same channel, provided that these do not meet with those coming out in the critical zone, included between Buoys B–21 and B–22 and E–33 and E–34. For this purpose, the San Carlos Pilot station will inform entering vessels the situation of leaving vessels so that they may take necessary measures to avoid meeting those vessels coming out in the referred zone.

15. The Port Captaincy will check via the office of Control of Maritime Transit, the Navigation of vessels, from the parallel passing Palmas del Norte Point (Buoys T–55 and T–56), as far as the terminals and ports to the South of General Rafael Urdaneta Bridge and vice versa.

16. Every Official Pilot navigating outwards when passing the Buoy B–72, will call up San Carlos by radio-telephone and will supply the following information:

(a) The time that he is passing Buoy B–72.
(b) The time that he is arriving at San Carlos.

17. When the dredger receives any call from a vessel it will give information as follows:

(a) Location where it is at that time.
(b) Direction of dredging (South North or North South).
(c) The side on which the vessel must pass.
(d) Time necessary to make the manouevre indicating on which side of the channel dredging will continue after the manouevre.

18. The Pilot station at San Carlos will be attentive to all communications made and will take note of them, in the event that their intervention may be required by dredgers or by vessels.

19. Any vessel sailing from any port in the No. 2 pilotage area of Maracaibo, will inform the Port Captain as follows:

(a) Type and name of vessel.
(b) Where from and time of leaving the port.
(c) Speed and port of destination.
(d) Estimated time of passing Buoy B–72.

Signed – Port Captain.

Section B

LA ESTACADA: 10.42 N. 71.32 W.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATORS: C.V.P./Llanoven.

LOCATION: Loading Terminal in the Lake of Maracaibo at La Estacada, located at 10° 42′ 30″ N. and 71° 31′ 40″ W. Entrance to and leaving this terminal is made between buoys B.65 and B.66.

DOCUMENTS: As soon as vessel is safely moored Agents representative will board the ship together with port authorities. The following documents are needed on arrival:

1. Clearance from last port consisting of:
   Sealed envelope from Venezuelan Consul in sailing port addressed to "Aduana de Maracaibo" and attached to the envelope:
      Store List
      Crew List
      Slop Chest Inventory
      Ballast Certificate
      All visaed by Venezuelan Consul in sailing port.
2. Crew List (6 copies).
3. Store List (6 copies).
4. Slop Chest Inventory (Deck, engines and cabin store listed separately) (6 copies).
5. List of Personal Effects (6 copies).
6. Deratization Exemption Certificate (original).
7. Venezuelan Net Tonnage Certificate (original).

See "Tonnage applicable".

The health officer sometimes requests to see the vaccination certificate of Crew members.

PILOTAGE: (See "Maracaibo Lake"). Pilotage Compulsory.

1. All vessels must call C.V.P./Llanoven and Agent of VHF Channel 16, when passing the E.M. Buoy and when embarking the Pilot at San Carlos.

2. Reduce speed approaching inner channel buoy B–63; rig accommodation ladder starboard side properly illuminated. Company Cargo Co-ordinator will board between B–63 and B–65.

3. Listen during transit on 2182 kc/s. and VHF Channel 16.

4. In event of unforeseen circumstances requiring vessels to anchor, area West of Estacada Northern Buoy mooring outside of channel limits will be used.

Vessels proceeding to La Estacada Terminal must enter the Outer Channel and embark the Government Pilot between buoys B–25 and B–27. After vessel arrives in the vicinity of the E.M. buoy, Master must contact San Carlos Pilot Station by radio-telephone on frequency 2182 kc/s. or VHF Channel 16 requesting Pilot between buoys B–25 and B–27.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge. Once the Pilot is on board the vessel will proceed to La Estacada, reducing speed in the vicinity of Inner Channel buoys B-63 and B-65 where C.V.P./Llanoven Cargo Co-ordinator will board. Accommodation ladder must be rigged up starboard.

MAX. SIZE: Water depth in both buoy moorings is 42 ft. mean monthly observed lowest water (MMOLW). Because of the depth of the surrounding approaches, 41 ft. (MMOLW), admissible midship's maximum draft in both moorings is 39 ft. freshwater. Under certain tidal conditions, however, with vessels over 60,000 d.w.t. and LOA exceeding 750 ft., it may be necessary to restrict loading to 38 ft. 6 in. Masters are requested to be guided by the Cargo Coordinator in appropriate draft to be loaded.

Berth No. 2 will accommodate vessels up to 850 ft. LOA, and Berth No. 1 up to 720 ft. LOA. Beam in both berths is unlimited.

RADIO: *Information to be cabled to Agent, Maracaibo.*

Upon vessel's departure from the last port bound for La Estacada cable 72–48 and 24 hours ETA at San Carlos Pilot station, including in this message last port, Master's name, if a.c. current on board and any requirements. If diverted, cable original destination, also have 5 copies of diversion cable ready on arrival. If the vessel is nominated to load a part cargo only at La Estacada, indicate at which port cargo will be completed. All cables should be sent via PJC (Curacao Radio) and via ITT All American Cables.

A separate cable should be sent to C.V.P./Llanoven, Maracaibo indicating ETA at San Carlos only.

BERTHING: *(a) Description:* Marine Oil Loading Terminal, is an offshore installation and consists of two permanent buoy moorings, No. 1 to the South, and No. 2 to the North.

Berths No. 1 and No. 2 consist of 4×14-ft. cylindrical steel buoys, each fitted with a pelican hook to which ship's mooring lines are attached by contractor's mooring launches. On each buoy there are 2×1.625-in. improved plow steel wirelines to supplement mooring lines in order to provide additional security during strong winds. In berth No. 1 the plow steel wires are 520 ft. long and in berth No. 2 585 ft.

Both berths are two directional; ships moored heading North or South according to prevailing current.

(b) Deballasting. There are no facilities at La Estacada to receive and treat dirty ballast therefore *same must be clean.* All ballast is discharged ashore through a 16 in. line.

(c) Mooring. All ships should have an adequate supply of stoppers or other special, equipment necessary to handle wires attached on mooring buoys. Vessels mooring in berths must be equipped with 4 ropes forward and 4 ropes aft. Vessels are cautioned that good quality ropes are essential and that they will be held liable for any damage occurring through improper or poor mooring ropes or inability to properly handle same.

Vessels in buoy moorings must have deck winches in readiness for use at all times. Method of berthing will be at discretion of the Government Pilot, as weather and other conditions permit.

During berthing and unberthing, ship's engines, tackle and all other gear must be in operative condition and in a state of readiness for use on immediate notice.

Weather permitting, and berths being available, vessels may be berthed at any hour of the day or night. Mooring buoys are properly lighted.

Government Pilots will assist in mooring the vessel in berth No. 1 or 2. Loading hoses can be connected both port and starboard side, according to ship's position. The Company Cargo Co-ordinator will remain on board ship to advise on connecting and disconnecting loading hoses, and loading of cargo.

The Government Pilot will later unmoor the vessel and take her out to the channel for departure.

Please keep in mind that he acts as adviser only and the Master retains full responsibility at all times. When ship is in position and mooring wires tautened, mooring winches such as tension winches must have their manual brakes put on securely, and should not rely on automatic rendering devices.

During time vessel is at the berth, frequent and regular inspection of mooring essential to ensure that mooring lines are kept taut and that movement of ship is kept to a minimum. When tugs are alongside or assisting a tanker, all cargo openings, permanent ballast tanks, lids and pump-room doors must be closed no matter what grade oil is being or has been carried, unless these spaces are gas-free.

The mooring operations are carried out by 2 mooring launches and 2 tugs.

TUGS: Use of 2 tugs of at least 1,600 h.p. is compulsory for mooring and unmooring at La Estacada (Government Decree). Use of 2 mooring launches with crew including a diver, who inspects the submarine loading hoses, is compulsory at La Estacada. These mooring launches remain alongside ship during stay in berth order act in any emergency.

TANK INSPECTION: As soon as all ballast is discharged and hoses connected, production supervisor or cargo co-ordinator will inspect ship's tanks. If same are dry and clean he will sign corresponding certificate.

LOADING: Berth No. 1 has 1×24 in. loading line with the corresponding manifold and Berth No. 2 also has 1×24 in. line. 12-in. – 150 lb. marine loading hoses are used. Each berth capable of a max. loading rate of 22,500 bbls.p.h., with an appropriate reduction for topping-off.

However, maximum loading rate entirely at Company's option and will vary according to circumstances and type of tanker concerned. When completing loading, stoppage of cargo will be determined on board, and Masters are requested to inform Cargo Co-ordinator at least 30 minutes in advance in order reduce pumping rate for topping-off. Cargo Co-ordinator will be in continuous contact with pumping station by means of portable radio. Should this means of communication fail, the following signals on ship's whistle will apply:

One long blast	Stand by
Two long blasts	Commence pumping
Three long blasts	Stop pumping

Upon completion of loading, Cargo Co-ordinator, together with ship's officer, will gauge ship's tanks and later prepare cargo documentation.

FUEL: Bunkers and marine fuels supplied by barge before or after loading operation at anchorage. Agent should be given prior notice.

FRESH WATER: Must be ordered with first ETA cable to Agents so that arrangement can be made with supplier. A water barge and a tug must be hired.

DENSITY: 997–1003.

REPAIRS: Only smaller repairs can be effected locally; however, technicians available for radio and radar repairs. Contact Agent.

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo.

CONSULS:

The following have consular representatives in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Switzerland
Denmark
Ecuador
Sweden
El Salvador
France
U.S.A.
Germany (West)
Great Britain
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Spain

SHORE LEAVE: Launch is primarily for use of authorities and company staff, but will effect trips for crew if required by Master. Contact Agent who will make necessary arrangements.

GUARDS: One National Guard stationed on board. He must be provided with sleeping quarters and seated in officers' mess for meals.

He is the representative of the Venezuelan Government and therefore any courtesy extended to him will be appreciated.

CLEARANCE: Immediately after termination of loading operations, hoses are disconnected and Government Pilot will proceed to unmoor vessel. In the meantime, cargo documents are prepared by Terminal personnel, and as soon as vessel is cleared, she will proceed to her destination.

CURRENT/TIDE: Current velocity max. 4 knots. Nature of bottom, mud. The tidal range in feet for the Estacada Terminal is springs 1.5, neaps 0.5.

GENERAL: *(a) Cash Advance.* Cash advance will be in local currency (Bolivares). Cable in advance any such requirements to Agents.

(b) Mail. Outgoing correspondence may be given to the marine dispatcher. For personal mail (crew) a list should be made, indicating name of Crew member, quantity of letters and destinations, and handed to Agents.

(c) Ship Chandlers. 2 ship chandlers in Maracaibo who can supply vessels with fresh meat, fish, vegetables, fruits, etc. Requirements should be transmitted in first ETA cable to Agents.

TONNAGE APPLICABLE:

The Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e. on registered net tonnage or on Venezuelan net tonnage.

On Registered Net Tonnage:

Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement.

As of this date, such countries are:

Norway
Sweden
Ireland
Denmark
Netherlands
France
Germany
Portugal
United Kingdom
U.S.A.

On Venezuelan Net Tonnage:

Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Section C

LA SALINA (Lacustre): 10.22 N. 71.28 W.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATORS: All terminal facilities are under the control of Lagoven, S.A.

APPROACH: Entrance and leaving this terminal is made between buoys B.97 and B.98.

LOCATION: La Salina located on Eastern shore of Lake Maracaibo, in Lat. 10° 22′ 18″ N., Long. 71° 27′ 49″ W.

CARGO DOCUMENTS: These are generally placed on board prior to departure. Vessels whose Master accepts the early departure procedure may sail with documents in blank. Figures are then radioed for inclusion in blank documents. Outward clearance documents are placed on board the vessel prior to departure.

PILOTAGE: In the event that no contact can be made with San Carlos pilotage station, or if there is a language problem, contact should be made with Vensport, at La Salina by voice radio on VHF Channel 16 (156.6 mc/s.).

A vessel entering or leaving the harbour must be assisted by a Government Pilot, an inbound vessel being boarded by him at the anchorage area approximately 3 miles off shore.

ANCHORAGE: For vessels awaiting berth there is an anchorage area located West of a line between rig L–175 to buoy S3 and the light buoys M1, M1A and S1 (chart No. MO–G–4–C) about 3 miles West of the loading terminal in 6 to 7 fathoms of water with a mud bottom.

RESTRICTIONS: None. The port is open for navigation during the day and night, allowing ships to enter and sail at any hour.

MAX. SIZE: Up to 112,000 d.w.t. LOA 900 ft. and max. draft 39 ft. (FW) at Berth Nos. 6N, 6S, 7N and 7S.

Pier No. 3 (West Side) LOA 690 ft., draft 26 ft. (FW) and 36,000 d.w.t.

Pier No. 3 (East side) LOA 575 ft., draft 26 ft. (FW) and max. d.w.t. 18,000 tons.

No restrictions on vessel's beam at any of the berths. An increase of draft to 41 ft. is expected in 1979 at berths Nos. 6 and 7.

The access channel to La Salina has a least depth of 41 ft.

Special Note: Maximum draft for loading vessels at La Salina Lacustre Terminal is actually restricted to 39 ft. Vesels loading at this maximum draft of 39 ft. must cross the outer bar channel at HW.

RADIO: The cable and telegraphic address for the Lagoven, at La Salina is "Lagoven La Salina". Radio messages to and from ships at sea are routed through the Government radio station at Maiquetia (La Guaira) call letters YVG. This station operates on a 24 hour continuous watch, on the following frequencies: Listening frequencies: long wave: 500 kc/s.; short wave: 4178–6267–8356–12534–16712–22225 kc/s.

Transmitting frequencies: long wave: 500–472–464–417 kc/s.; short wave: 17141.6–12817.5–8730–8722–6519.5–6505.5–4352–4322 kc/s.

Radio notice of arrival should be sent 72 hours prior to arrival at La Salina and corrected if weather or other conditions delay the vessel.

La Salina Port Services section maintains radio-telephone listening watches on a 24 hour basis on following frequencies: 2182 kc/s., 156.8 mc/s.

Frequencies 2638 kc/s., 2738 kc/s., 2120 kc/s. and 156.6 mc/s. are available for use after initial contact on one of the above listening frequencies.

All vessels en route to La Salina may also communicate with Lagoven Amuay or Caripito Marine offices and request that messages dealing with corrected ETA's, Pilots and other business be relayed to the La Salina Marine Office.

TUGS: Lagoven S.A. maintains one 3,000 h.p. diesel tug and one 1,600 h.p. diesel tug. Tug-boat assistance is considered essential and is afforded all vessels entering, leaving or shifting in the harbour.

BERTHING: At La Salina, Lagoven maintains a deep-water terminal (Lacustre) consisting of an island where are located 2 finger piers, each 1,100 ft. in length and 500 ft. between piers, providing 4 berths to accommodate tankers up to 112,000 d.w.t. Berths are numbered 6N, 6S, 7N and 7S, from North to South. At these berths various products can be loaded simultaneously namely – 6N and 6S – Crude, Naphtha and Butane; 7N and 7S – Crude; Pier No. 3 (West side), Propane and Butane; Pier No. 3 (East side), same as West side but not concurrently with West side. In addition there is an offshore platform (Pier No. 3) where liquefied petroleum gases (Butane and Propane) can be loaded.

Instructions concerning berthing are given by Port Services Section by means of radio-telephone.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

BALLAST: Vessel should arrive at La Salina with sufficient ballast to permit safe handling. Government Pilot requirements in this connection under normal weather conditions are interpreted as drawing approximately 8 ft. forward, 18 ft. aft, on a T–2 or similar type tanker, and 11 ft. forward, 20 ft. aft on a 26,000 d.w.t., on larger type vessels the minimum draft required is 14 ft. forward and 22 ft. aft.

Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimize deballasting time.

It has been established that one of the major causes of contamination of crude oil is the relatively small amount of salt water remaining in the ship's tanks, pumps, and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and downtime to refining equipment, besides presenting many other processing problems.

It is therefore requested that the full co-operation of the Master and Officers of ships loading for Aruba, be given to ensure that all ballast tanks and lines are flushed with lake water and stripped as dry as possible.

Vessels equipped with a separate and completely segregated system of ballast tanks, lines and pumps, will be permitted to discharge ballast and load cargo simultaneously, providing approval of both the pier foreman and Petroleum Inspector is secured.

A pier supervisor who is in direct communication with the loading pumphouse is stationed at each pier during the entire time the vessel is discharging ballast or cargo or receiving cargo.

All dirty or clean ballast must be pumped ashore. A 34 in. ballast line, with dirty ballast treating facilities are available.

If it is desired to follow the "load-on-top" procedure it is requested that the marine representative be informed on arrival.

LOADING: Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on arrival. Supplementary information including number and size of lines and Chiksan arms will be furnished to the Chief Officer before loading commences. Loading rates will be reduced as required when topping off.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Shut-down controls for all crude oil pumps are available at each loading berth at ship's rail of loading vessels for use in case of emergency only.

LOADING RATES: Loading operations at La Salina Terminal are normally carried out at relatively high pumping rates; up to an average of 40,000 b.p.h. Ship's officer will be advised by the pier supervisor at what rate the cargo will be loaded. LPG is loaded up to an average max. rate of 7,500 b.p.h. at Platform No. 3.

The loading and discharging of all crude petroleum and its products will be stopped during the passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calms, loading of gasoline or other similar low flash products may be at lower rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ships' officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

MEDICAL: Complete medical, dental and hospitalisation facilities are available at La Salina. Medical treatment is provided at a private clinic.

Authorisation forms for medical treatment are provided which require the Master's signature. Transportation will be supplied by Port Services Section.

If the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: A limited supply of fresh and boiler water is available at La Salina Lacustre Terminal. Delivery is made through 2.5 in. National Standard Fire Hose Thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker C fuel oil, marine diesel and intermediate fuels are available at La Salina Terminal Lacustre. Delivery is made alongside Piers 6 or 7 by 8 in. diameter Chiksan hose, located about midship's.

It is the responsibility of the ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

Supplies of lubricating oils are available. Delivery will be effected while loading and requirements should be incorporated in the ETA radio.

DENSITY: The average density at the berth is 1002 but varies dependent upon amount of rainfall. The temperature ranges from 82° to 86°F.

REPAIRS: The Marine Port Staff will assist with emergency repairs as may be required in each case depending upon availability of competent personnel and equipment. The company's shop facilities while not equipped for extensive ship repairs, may be made available to fabricate or repair items that are urgently required.

The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

Radio technicians are available for minor repairs. With sufficient advance notice a radar specialist can be arranged to board the ship at La Salina.

CONSULATES: The following countries have consular representatives in the area:

Belgium
Chile
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Netherlands
Norway
Nicaragua
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to Pilot undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking. No launch service for liberty parties is available while vessel is anchored off La Salina awaiting berth.

GENERAL: Representatives of the Marine Department board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ships requirements. The Marine Office Building is located at the Pierhead Trestle and personnel are available for assistance at all hours.

(a) Bonded Stores. Cigarettes or other stores in bond are not obtainable in La Salina.

(b) Cash Advances. Cash advances are made in local currency, the Venezuelan Bolivare. Cash requirements should be included in the ETA radio.

(c) Charts. On first arrival of each tanker, the Marine Dispatcher will furnish a set of local charts if required. No supplies of U.S. Hydrographic or British Admiralty charts, or sailing directions, are available.

(d) Classification Societies. American Bureau and Lloyd's Register have non-exclusive Agents in Maracaibo, and qualified Masters and Chief Engineers are available for appointment as Surveyors when required.

(e) Gangways. All vessels using the port of La Salina must provide a safe gangway. The use of rung ladders, Pilot ladders, etc., is contrary to port regulations and port authorities will not board except by means of a safe gangway or accommodation ladder.

(f) Plimsoll Marks. the Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels may be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(g) Port services. On arrival at La Salina terminal, a company representative boards vessels, so it is particularly requested that Masters make known to him all ship's requirements. Master should bear in mind that while vessels are within Venezuelan territorial waters, Government authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. La Salina also has radio telephone communication with North and South America and Europe. For further information contact Port Services Section in the terminal building, tel. 88694 and 88695.

(h) Rat-guards. By order of the Port Authorities, vessels are required to use ratguards on all mooring lines.

(i) Personnel – Seamen left ashore. In the case of seaman left ashore for hospitalisation, repatriation or other reason, his documents and personal effects are to be delivered to the Marine Office in La Salina before sailing. A letter is required from the Master advising maximum advances to be made to seaman if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or Owner, responsible for any seamen left behind in Venezuela.

(j) Provisions and stores. Fresh and dry provisions are supplied by various shipchandlers in Maracaibo and Cabimas (La Salina). Master should deliver his signed requisition to the Marine Department representative who boards on arrival. Provisions would then be delivered to the vessel while loading. The prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc., are competitive; dry stores are considerably higher than in most ports. The Fleet Steward will assist in filling requisitions. It is important that the Master sign the ship-chandlers invoice as authorisation for the Marine Department to make settlement.

(k) Mail. Any pending ship's mail will be delivered on board by the Marine Dispatcher on arrival at La Salina. At same time he will receive ship's mail to be dispatched. The Marine Dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises the postage by signing 7 copies of the Company Postal Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter.

Copy of this list will be returned aboard the vessel when leaving this port outward bound. If not ready on time, it will be airmailed to the vessel's next port of call.

(l) Inspection of Petroleum Products and Crude Oil. Chas. Martin & Company and E. W. Saybolt petroleum inspectors are available if specified.

(m) Laundry. Laundry service is available between 0700 and 1700 hrs. on week-days. No guarantee can be given on time of delivery.

Section D

MARACAIBO: 10.42 N. 71.39 W.

On the N.W. shore of the Lake Maracaibo.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at one of the Terminals in the Lake of Maracaibo. (N.B. For information details of Documentation, Pilotage etc., see "Maracaibo Lake").

ANCHORAGE: The Pilot will not con the ship into the anchorage, but will indicate the proper location to anchor. Care should be taken because of small boats and ferry traffic.

ACCOMMODATION LADDER: Vessels must provide an accommodation ladder. The use of trunk ladders, pilot ladders, etc., is contrary to port regulations. Port authorities will board only by means of an accommodation ladder. It is recommended to rig this in advance to avoid unnecessary delays.

BOARDING PARTY: The boarding party usually consists of the following persons: One Quarantine Official, Two Customs Officials, One Port Captain's Representative, Two representatives (Agent and Mooring Master).

RADIO: "Radio Marina" transmits information of interest to navigation every day from Monday to Friday from 1000 to 1015 hrs. and from 1600 to 1615 hrs. on frequency of 4,420.7 kHz in the 60 m. band, output 1 kW. All bunker, lubricating oils, water and other requirements should be included in the cable giving ETA of the vessel.

TUGS: Service not compulsory, assistance is rendered if required by the Harbour Master.

BERTHING: The manoeuvring area within Maracaibo harbour has a depth of 26 ft.

		Length	Depth alongside
Wharf No.	1	106 m.	15 ft.
,, ,,	2	106 m.	15 ft.
,, ,,	3	159 m.	15 ft.
,, ,,	4	159 m.	22 ft.
,, ,,	5	135 m.	25 ft.
,, ,,	6	135 m.	26 ft.
,, ,,	7	135 m.	26 ft.
,, ,,	8	135 m.	26 ft.
,, ,,	9	120 m.	25 ft.
,, ,,	10	120 m.	22 ft.
,, ,,	11	120 m.	22 ft.
National Brewery Wharf		125 m.	19 ft.
Regional ,, ,,		120 m.	21 ft.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker C fuel oil are available at Maracaibo from local contractors with barges. Supplied only by barge at the wharves or anchorage. Lubricating oils are also available.

FRESH WATER: All wharves supplied with fresh water by 2 in. hoses. Rate 15/20 t.p.h. Fresh water also available from local contractors with barges.

MEDICAL: Complete medical services are available.

CONSULS:

	Telephone		Telephone
Germany	76061	Netherlands	4621
Belgium	3235	Great Britain	6169
Colombia	72232	Italy	
Costa Rica	6511	Mexico	6781
Denmark	6531	Nicaragua	76703
Ecuador	74055	Norway	78911
El Salvador	74241	Panama	78110
Spain	71118	Peru	4545
United States	2123	Portugal	80870
France	5297	Dominican Rep.	6511
Guatemala	71193	Sweden	6511

STEVEDORES: Normal working hours 0700–1100; 1300–1700 and 1800–2300 hrs.

TELEPHONES: There is no service for connecting telephones on board vessels. Public telephones are situated in the warehouses adjacent to all wharves.

HOLIDAYS: All Sundays; 1st January; Good Thursday and Friday; 19th April; 1st May; 24th June; 5th July; 24th July; 12th October; 24th October; 18th November; 17th December; 25th December.

POLICE/FIRE/AMBULANCE: Police tel. 3821; Fire tel. 6585; Ambulance tel. 2209.

REPAIRS: No major repairs facilities are available; however, repair jobs can be done through local machine and electrical shops, and shore labour can be furnished if required. Radio and radar technicians are also available.

SHORE LEAVE: Launch service in the Maracaibo harbour is readily available for official ship business. For shore leave personnel, depends on launch availabilities on arrival.

AIRPORT: International Airport "Granode Oro" situated N.W. of Maracaibo City served by many national and international airlines. A second airport with cargo and passenger services is situated at Santa Barbara del Zulia, on the banks of the Escalante river.

PROVISIONS: Fresh and dry provisions are procurable through ship chandlers in Maracaibo for delivery at Maracaibo Harbour or at the terminal.

SHIPMASTER'S REPORT: 1976

Communication: Considerable difficulty was experienced raising La Guaira radio station (YVG) for transmitting the necessary ETA's. Our messages were transmitted via Portishead (GKR). Agents, however, advised that messages are normally transmitted through Curacao (PJC).

Pilotage: Masters making their first visit to the port are to embark the Pilot at Punta Cardon (Paraguana Peninsula). Ample notice must be given to the Agents as the Pilot has to be flown there from Maracaibo. Masters making their first visit to Maracaibo must also disembark the Pilot at Punta Cardon on departure. Masters may thereafter proceed directly to San Carlos pilot station.

As previously reported the VHF station at Punta Cardon manned by 'Compania Shell' is no longer operational. Communications can now be made through the Harbour Master's Office Punta Cardon.

Delays experienced off Punta Cardon as previously reported did not occur on this particular occasion. Pilot boards and normally rests in the pilots cabin until 30 minutes from the "EM" buoy.

Berthing: 2 tugs are compulsory for vessels berthing/unberthing when the vessel's length exceeds 476 ft. All other vessels 1 tug compulsory.

National Guard: A member from the National Guard is placed on board the vessel during working hours. A room has to be at his disposal (*not* the hospital) and necessary food and beverages supplied.

Stevedoring:

Normal working hours
(Monday–Friday) 0700 to 1100 hrs.
1300 to 1700 hours
1800 to 2300 hrs. (Overtime)
(Saturday) 0700 to 1200 hrs.
(Sundays & Public Holidays) *No work.*

Vessels must be fully rigged and hatches open and ready in all respects to load or discharge at least 15 minutes before stevedores arrive. If necessary shore labour is available to assist.

SHIPMASTER'S REPORT: 1975.

Arrival messages: Cable Agent – Maracaibo via La Guaira Radio on departure Cristobal with ETA Punta Cardon, draft, cargo stowage, gang required and requirements. (For subsequent calls vessel will be permitted to proceed to San Carlos pilot station to embark Pilot).

24 hours prior to arrival repeat ETA Punta Cardon, to be sent as described above.

2 hours before arrival pilot station – Punta Cardon call Compania Shell on Channel 12 VHF to update time of arrival. (See report above, station no longer in operation).

Pilotage: Pilot boards at Punta Cardon about 1 mile off the tanker berths from a launch with a "roof landing", therefore the pilot ladder must be about 6 ft. from the water. This Pilot travels from Maracaibo to meet the vessel at Punta Cardon and takes the vessel all the way to Maracaibo. Punta Cardon to "EM" Fairway buoy – 78 miles. "EM" Buoy to Maracaibo – 35 miles.

Once the vessel has made a call at Maracaibo the Master is then exempt and may take his vessel direct to the "EM" buoy and negotiate the buoyed channel for 12 miles to San Carlos pilot station. The channel is straight, wide and the buoys are well lit and marked. A Westerly set is said to prevail across this channel from the "EM" buoy to San Carlos pilot station but it was not evident on our passage in or out. However, a strong ebb tide was noticed running out to sea off San Carlos pilot station. The channel from the "EM" buoy to Maracaibo is dredged to 41 ft. but off the berths at Maracaibo the maximum draft is 26 ft. There had been a lot of unseasonal rain prior to our call and we noted that the density of the dock water was 1001.

Documents:

1 Health Declaration.
8 Stores Lists.
8 Crew Lists.
6 Passenger Lists (If no passengers these papers have to be entered as "Nil" passengers).
8 Crew Declaration Lists.
2 Venezuelan Manifests (Sent from N.Z.)
2 Sets Bills of Lading (Sent from N.Z.)
12 Sets Tally Books (Sent from N.Z.)

Stevedores: "Servicios Portuarios De Maracaibo".

They have 24 gangs in the port and mechanical equipment to support 16 gangs. Normal working hours are 0700–1130 – 1300–1630 hrs. Overtime 1800–2230 hrs. Saturday 0700–1200 hrs. No work on Sunday.

The labour works well but is not accustomed to working refrigerated ships and when the gangs work into the wings the Agent had to supply the men with warm clothing and hot coffee. Their discharge rate for cartons of frozen cream was 18 t.p.h. In hindsight I would suggest that it would be advisable to stow frozen cream for Maracaibo in a hatch square if possible to obviate the need for the labour to go into the wings as the complaint about the "cold" does not arise until this happens. They had 14 open trucks laid on to take the cartons of cream direct to the butter works and they had an unbroken flow so the "hook" was not held up on this account.

Berthing: There are berths for 6 ocean going ships and they say they can berth these ships up to 26 ft. Tugs are available and because of berthing starboard side to we used 2 tugs. The berths are concrete with rubber fenders and there is plenty of working space for the mechanical vehicles. The Pilots speak a little English but sufficient to make themselves understood and are capable. Fresh water is available alongside but I understand if bunkers are required they have to be brought by barge and there is a minimum charge of $1,000 irrespective of the amount of fuel required. They have a repair facility which is in the hands of a local engineering company. Fresh vegetables are available and can be recommended, supplied by the only providore. He maintains a listening watch on Channel 16 VHF and has a liaison with Agents for any messages sent prior to arrival at the berth. His station is called Automercado Venezia.

AGENT: Head Office, (Management and Control), Brokers, Chartering and Tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 101 Venezuela. Cables "Selvic" or "Seltank". Tel. (02) 81.02.71 Telex: 21402, 21631, 21934 and 22859.

Local Office: PO Box 496, Maracaibo. Tel. (061) 224960. (061) 224962. Cables: "Seltank Maracaibo", or "Selvic Maracaibo". Telex: 62166.

EL TABLAZO: 10.45 N. 71.32 W. (See Plan Book)

(*N.B.* for important details of Documentation, Pilotage, etc., see "Maracaibo Lake".)

OPERATORS: C.V.P./Llanoven.

LOCATION: S.E. part of Puerto Miranda. Entrance by buoys 63 and 64. Distance from San Carlos Pilot Station 16.5 miles.

MAX. SIZE:

	Depth alongside MMOLW ft. in.	*Depth approach channel ft. in.*	*Max. recom-mended Draft ft. in.*	*Max. d.w.t.*	*Max. LOA ft.*	*Limiting Factor*

Products Handled: 1. Ethylene; 2. Propylene; 3. Propane; 4. Butane; 5. Nat. Gasoline; 6. Anhydrous Ammonia; 7. Urea in Bags; 8. Urea in Bulk; 9. Chlorine; 10. Caustic Soda; 11. Salt; 12. Styrene Monomer; 13. Monovinyl Chloride; 14. Potable Water; 15. Inert Gas; 16. Ballast Water; 17. Methanol; 18. General Cargo.

Products to be handled:

Natural Gasoline	at 687 t.p.h.		
Estirene	160		
Methanol	687		
Isobutane	687		
Ammonia	525	,,	temp. −33.3°C
Propylene	40	,,	40°/6°C
Butane	160	,,	37.8°C
Monovinyl Chloride	420	,,	37.8°C
Ethylene	80	,,	−104°/−70°C

Cargo Equipment:

North Berth: One urea in bulk loader
Cargo capacity 650/700 t.p.h.

South Berth: Three urea in sacks conveyors.
Cargo capacity 2,400 sacks of 50 kgs each per hour.

FRESH WATER: Available, 8 t.p.h., but expensive.

DENSITY: 997–1003.

PUERTO MIRANDA: 10.46 N. 71.34 W. (See Plan Book)

(N.B. For important details of documentation, Pilotage, etc., see "Maracaibo Lake").

LOCATION: Situated at Eastern shore of entrance to lake of Maracaibo, in position Lat. 10° 46′ N., Long. 71° 34′ W.

OPERATORS: Maraven, S.A.

CLEARANCE: Pratique and Custom's clearance will be granted on arrival either at the anchorage or after the vessel has been berthed. Masters therefore requested to have the accommodation ladder ready on arrival to avoid delays, since the Government Officials do not board the vessels by pilot ladder.

On arrival when pratique is requested, all vessels should fly International flag signal "Q", or show a yellow light during hours of darkness.

PILOTAGE: On arrival Puerto Miranda under Government Pilot's advice the vessel will be boarded by Government Berthing Master, who will assist Master in docking vessel. He will also assist in undocking.

CHANNEL: Channel has a leading mark formed by the towers "P" and "M" and is marked by buoys.

(1) Incoming traffic bound for Puerto Miranda must leave the main channel between the buoys B-57 and B59 towards the anchorage.

(2) Vessels coming from the Lake in ballast or to complete cargo at Puerto Miranda must leave the main channel when passing the buoy B–65 on their starboard side and proceed in the direction of Jetty 3 towards the anchorage.

(3) All vessels on leaving Puerto Miranda should enter the main channel by the buoyed exit channel marked by the buoys numbered AP3, AP2, AP1 and B59.

Once the ship is unmoored, the Berthing Master on duty at Puerto Miranda will emphasise to the official Pilots the route to be followed in each case.

MAX. SIZE: See "Berthing".

RADIO: Port Services Office equipped with radio-telephone installation operating on 24 hours basis, transmitting on following frequencies (simplex press to talk system).

		Int. VHF Channel
Approach calling and safety	156.8 mc/s	No. 16
CSV and other tankers port operations	156.6 ,,	No. 12
Emergency calling	2182 kc/s	

ARRIVAL ADVICE: Vessels equipped with radio-telephone installation operating on above frequencies are requested call Puerto Miranda about 3 hours before arrival at port. Calls made in Spanish language will be answered promptly, since there is always a Spanish-speaking clerk on duty. Calls in English will be answered by Berthing Master on duty, except when he is occupied, in which case the call should be repeated later on, as an alternative, the Master could ask Government Pilot to report in Spanish his vessel to Puerto Miranda. During hours of darkness all vessels must identify themselves on arrival, either by radio-telephone or Aldis lamp.

TUGS: 2 motor tugs of 2,800 h.p. assist all vessels in docking and undocking. Also one or two mooring launches will be standing by to take ropes.

BERTHING:

Jetties/Berths	*Depth M.M.O.L.W. ft.*	*Maximum Permissible Draft ft.*	*Length ft.*	*Displacement tons*
Jetty No. 2				
1 (North Outer)	38	36	720	90,000
2 (South Outer)	38	36	720	90,000
3 (North Inner)	35	34	†575	62,000

	70,000	x			7 (5)*	7 (5)*

Remarks: Alongside UKC for ships up to 700 ft. O.A.L. = 1 ft. Alongside UKC for ships over 700 ft. O.A.L. = 2 ft.

(*) When vessels are fitted with tension winches-Forward and Aft.

(†) O.A.L. in Berth No. 3: This can be increased up to 620 ft. whenever vessels of Berth No. 1 have O.A.L. up to 665 ft.

(‡) O.A.L. in Berth No. 4: This can be increased only for LPG vessels up to 610 ft. if Berth No. 2 or 5 are empty when vessel arrives, then Berth No. 2 has to be temporarily restricted to vessels up to 665 ft. O.A.L.

General: Nature of bottom soft mud, but near buoys B-59 and AP-1 is partly hard.

Density of Water at Berths 997-1003.
Density of Water outer channel 1015-1025.

These alongside drafts are subject to reduction owing to depth in inner and outer channels.

Recommended under keel clearance (UKC) in Exit Channel 2 ft. Vessels drawing 37 ft. and over will according to monthly sailing draft table issued by Maraven, S.A.

BALLAST: Discharge of oil or water polluted by oil into lake waters is prohibited and will incur heavy fines and compensation to beach owners and fishermen for cleaning nets.

All dirty ballast must be discharged ashore. Clean ballast in cargo tanks may only be pumped overboard after prior consultation with Port Services Dept. Deballasting line pressure must not exceed 100 lb. p.s.i. Vessels equipped with a special separate and clean ballast system are to discharge their ballast into lake.

Ocean vessels should be ballasted on arrival E.M. Buoy for inward passage with minimum ballast necessary for safe handling, taking into consideration Article 31 of Maracaibo Pilotage Zone Regulations, which states all vessels entering lake Maracaibo shall have a trim of no more than 8ft., to permit safe navigation through channels.

One of the major causes of contamination of crude oil is relatively small amount of salt water remaining in ships tanks, pumps and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and down-time to refining equipment, besides presenting many other processing problems. It is therefore requested that full co-operation of Master and officers be given to ensure that all ballast tanks and lines are stripped as dry as possible.

MOORING: Vessels are to be moored to satisfaction of Pier Master. A suitable gangway will be provided by shore installation. When it is out of order vessel's gangway has to be used, which will be notified on VHF telephone before arrival at E.M. buoy.

Vessels of any deadweight must secure with at least: *Forward:* 4 headlines; 4 breasting fibre ropes in berths 1 and 2; 1 spring. *Aft:* 2 sternlines; 4 breasting fibre ropes and one spring in berths, 1 and 2. In berths 3, 4 and 5, *Forward:* 2 headlines; 4 breasting lines; 1 spring– *Aft:* 2 sternlines; 4 breasting lines; 1 spring.

When vessel is fitted with tension winches (forward and aft) the following ropes are required:

Forward: 2 headlines; 2 wires from tension winches as breasting lines in berths numbered 1, 2, 5 or 6; 1 spring. *Aft:* 2 sternlines; 2 wires from tension winches as breasting lines in berths numbered 1, 2, 5 or 6; 1 spring.

When vessels are nominated to load at berth 1 or 2 of Jetty 2 one extra headline and a second spring is required. Vessel's best ropes or wires should be used as breasting lines.

LOADING: Vessels should load in accordance with International Loadlines Regulations taking into account maximum permissible draft at this Terminal and also at Maracaibo bar channel.

The Captain of the Port requires that the load-line marks of all vessels using the port be clearly visible. If Harbour Authorities should refuse to pilot an out-going vessel due to being overloaded, Master will be held responsible for all delays and expenses, in connection with discharging any overloaded cargo and all further losses.

Vessels' maximum permitted loading rate should always be required. Maximum shore loading rate is 7,000 M.T. per hour, using 2 shore lines and 4 hoses.

Following ship's whistle signals should be used for loading: 2 blasts=Stand by (15 minutes prior to completion of cargo and or part cargo). 1 blast=Stop (2 minutes prior to complete cargo and or part cargo).

EMERGENCIES: In order to deal quickly and efficiently with any emergency during loading/deballasting operations, the following equipment is available:

(a) Control for quick closing of shore manifold valves. This is a red-painted hydraulic valve situated on the ship/shore gangway. In the event of a spillage aboard, this valve must be opened. Within ninety seconds the shore manifold valves will close against the loading pumps.

(b) Direct ship/shore telephone. This is a red telephone and in order to obtain instant communication with the loading supervisor in the Control Room it is only necessary to lift the receiver. An Alarm Bell will alert the supervisor and a light will advise him from which berth the call originated.

FUEL: Available ex wharf: Bunker "C", thin fuels from 200 to 3,500 seconds Redwood 1 at 100 deg. F., and marine diesel. Delivery rate 400 and 80 tons respectively. Gas oil, F. oil and thin fuels may be supplied by barge ex Maracaibo delivered at anchor, at a max. rate of 110 and 140 tons.

FRESH WATER: Available on all jetties with a loading rate between 20 and 30 t.p.h. This depends on number of vessels at the same time.

MEDICAL: Ship's personnel may visit local doctor on week-days between 0700 and 1130 hrs., or 1400 and 1700 hrs. Outside these hours, or in cases which require special treatment, patients receive attention in Maracaibo. Written request for medical attendance, as well as a shore pass, is always required.

CUSTOMS: 1 opened packet of cigarettes allowed to be taken from vessel by each crew member when going ashore. Masters advised to strongly caution crew against attempted smuggling.

SHORE LEAVE: Not granted until shore passes are stamped and signed by Authorities. Passes must be shown to guards at gangway and gates. Crew members must be properly dressed (long trousers and shirt) before proceeding ashore. Master must collect all passes and return them to Agent before vessel's departure.

GENERAL: *(a) Tides:* In view of the available depth in the channels which allow navigation to vessels up to about 70,000 d.w.t. fully laden at high water, permanent predictions of sailing draft tables have been prepared by Maraven S.A., and they will send these on board ships of over 47,000 d.w.t.

(b) Currents: The tidal current (Lunar tide) at this port can at times be very strong and subject to changes. Usually outgoing tide runs for 7 to 8 hours against 4 to 5 hours for incoming tide. Direction approx. at right angles to jetty.

(c) Movement of Passengers: Embarkation or disembarkation of passengers through this port is not allowed by Venezuelan law, as this Terminal is only authorised by the Treasury Ministry (Ministerio de Hacienda) exclusively for exporting crude oil.

(d) Short Dispatch Procedure: This procedure is available for ships loading cargoes consigned to Shell Companies.

(e) Failure to rejoin vessel: If any member of crew is not aboard at sailing time, Authorities will not clear vessel although permission may be given to proceed to anchorage if the berth is required. If sailing permission is granted, Master is required to sign letter accepting all costs in connection with missing crew member to be for Owner's account.

(f) Launch Service: A charge will be made for a round trip to Maracaibo, but launches are only available on written request by Master. Masters who have to go on business to Maracaibo (Agency or Consulates) can make use of public service launches.

(g) Proceeding to Cardon: Vessels proceeding to Cardon to load or to take bunkers, are required to have ready on arrival at Cardon:

4 Lists of Deck and Engine Stores and Spares.
4 Lists of Stewards Stores.
6 Lists of Personal Effects.
6 Crew Lists.

In order to prevent delays it is imperative that these documents are presented to the port officials when they board to clear the vessel.

(h) Loading for Curacao: Unless Master requests otherwise, arrangements will be made for Goverment Pilot to board ship 1 hour after vessel has signalled "Stand-by".

(i) Guards: Custom Guards (Guardia Nacional) will be posted on all vessels and Masters are reminded that these guards must be accommodated and treated in the same manner as ships' officers. Non-compliance entails not only a fine but will result in delays in clearance and cargo operations.

(j) Visitors: Only persons on business allowed on piers. Visitors, as guest of Master, allowed board vessels provided a written and signed request presented by Master to Port Services Department. Further particulars covering procedure for obtaining permits for visitors can be obtained from Port Services Office.

(k) Cables and mail: Crew mail list forms put on board all vessels when entering Puerto Miranda. Crew's private mail accepted for posting provided all letters bear the sender's name and a list in duplicate is prepared showing addresses and sender. 1 copy of list will be forwarded to Master showing individual charges. Cables can be dispatched at all times.

(l) Norwegian Government Seamen Service: A field representative of the above service is stationed at Puerto Miranda providing Norwegian and Swedish film exchange and other usual services.

(m) Charts – Nautical publications: On arrival of each tanker the Agency Representative will furnish a set of lake charts if required. No supplies of U.S. Hydrographic or British Admiralty charts or Sailing Directions, Nautical Almanac, etc., are available at this port.

(n) American Crew List: Vessels sailing for U.S. ports requested have American Crew List ready on arrival, so it can be forwarded to U.S. Consulate without delay.

(o) Films Exchange: Films may be exchanged at this Terminal.

(p) Fire Alarm: Each Friday morning at 1000 hrs. there will be a test of fire alarms including sirens at the wharves. Before the test will be a warning message in English and Spanish.

(q) Cash Advances: Local currency is Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in vessel's ETA radio, to permit delivery on board on arrival.

REGULATIONS: Following regulations should be strictly observed by Master of vessels alongside jetties. Non-compliance with these instructions entails not only a fine but delays in cargo operations.

Use of rafts for painting the ship's sides is strictly prohibited.

Lifeboats should not be lowered without the special permission of the Government Port Captaincy (obtainable on request).

Swimming in the harbour is strictly prohibited.

Waste water, sanitary or other must not be discharged on jetty.

It is strictly prohibited to paint ship's name or others on jetties. When this occurs the vessel will be charged for the cleaning.

Painting in ships alongside is strictly prohibited.

Before commencing loading, all dock scuppers should be securely plugged.

It is necessary to keep a close and constant watch on moorings and to adjust when necessary. When adjusting, call for assistance of harbour tugs before slackening off any mooring lines.

TELEPHONES:

Head Port Services Operations Office 228 during day.

AUTHORITY: Maraven, S.A. Port Services Department, Estado Zulia – Venezuela.

Section F

PUNTA DE PALMAS: 10.24 N. 71.34 W.

(See Plan Book)

(N.B. For important details of Documentation, Pilotage etc., see "Maricaibo Lake").

OPERATORS: C.V.P./Llanoven.

FLAG: The authorities require the Venezuelan flag to be flown from the mast head from the time the vessel enters the outer channel to come into the port until it leaves again by the same channel.

LOCATION: The terminal is located at Punta de Palmas del Sur, approximately 13 miles South of the port of Maracaibo on the West shore of Lake Maracaibo. The terminal proper may be identified by a 300 ft. radio tower, having 2 small red lights 200 ft. from the base, and 1 large red light on top of tower. The top light flashes every 2 seconds.

PILOTAGE: Vessels which arrive have the option of taking on the Official Pilot at the following places:

(a) In the outer channel of the Lake of Maracaibo, between buoys B-24 and B-26.

(b) In the anchorage area, located approximately 5.5 miles to the N.E. of the Island of San Carlos and to the East of the buoy B-17. This area is identified by a green light buoy, equipped with a radar reflector (geographical position: Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W.).

(c) On the "EM" buoy (i.e. Entrance to Maracaibo), there is also a radar reflector (geographical position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W.).

The Official Pilot who comes on board at San Carlos will take the vessel to Maracaibo. At times, due to bad weather, the Maracaibo Port Captaincy cannot guarantee the embarkation or disembarkation of Pilots at the "EM" buoy or in the anchorage at Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W. For this reason, Masters must contact the Pilots station at San Carlos so that they may give him appropriate instructions as to the place of boarding or disembarkation of the Official Pilot, who, generally speaking embarks between buoys B-24 and B-26.

The system of communications which vessels use with the Pilots station of San Carlos will be the morse lamp, radio-telephone or radio.

The frequencies on which San Carlos listens out are: Radio 2182 kc/s. Radio-telephone 156.6 mc/s. It also operates with frequencies 2080, 2120, 2638, 2738 kc/s R/T and 156.8 mc/s VHF.

Vessels sailing from Punta de Palmas will take on the Official Pilot at the mooring where they are located after having terminated their loading operations. This Pilot must be requested an hour and forty-five minutes before the estimated time of being ready to sail. Vessels which embark their Official Pilot at Punta de Palmas to sail to Maracaibo will change their Pilot again on arriving at that port. The Pilot who embarks will guide the vessel to the proximities of the Island of San Carlos, between the towers E-31 and E-33, where he will disembark onto a Pilot launch. The port Captaincy of Maracaibo has given instructions to shipping Agents for the purpose of informing Masters and Owners of vessels that every Captain must identify himself in advance to the Pilot station at San Carlos at any time of the day, when they are arriving at buoys B-17 and B-19, and when they are sailing at T-42 and T-40. These instructions are of an obligatory nature in order to keep the Pilots' service informed at all times of any emergency that may arise. Also to avoid an Official Pilot going out unnecessarily from his base, especially during the night in the belief that the vessel which is in sight requires his services; in this case both the service of the launch and that of the Pilotage not given will be charged to the ship's Agent or Representative.

Lake Pilotage: An Official Government Pilot will assist every ship in crossing from Maracaibo to Punta de Palmas and in its exit voyage from Punta de Palmas to Maracaibo. This Pilot will also assist in the operations of mooring and unmooring. The Agent will inform the Captain and the Official Pilot of the time determined for berthing the vessel when it arrives at Maracaibo. Vessels which load in Punta de Palmas must request a Pilot for their exit journey at least 1 hour 45 minutes in advance of the time at which they consider the vessel will sail.

CARGO DOCUMENTS: Vessel's clearance and cargo papers will be delivered to the Master on arrival in Maracaibo Harbour outbound. C.V.P./Llanoven will accept no responsibility for delay in clearing a vessel due to unavailability of personnel from offices of the Port Authorities.

APPROACHES: The buoy which indicates the entrance to the outer channel ("EM" buoy) is located in the geographical position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. The light of the "EM" buoy has the following characteristics: white light, with 1 flash every 10 seconds, visibility approximately 5 miles. The distance between the "EM" buoy and the inner extremity (South) of the inner channel, marked with buoys B-27 and B-28 is approximately 15.75 miles. The outer channel has a width of 300 m. between the limit on both sides. The navigable portion for loaded vessels is 240 m. wide. The average depth which has been checked at low tide is 13.72 m. (45 ft.) and the tidal amplitude is up to a maximum of 1.49 m. (4.9 ft.). There is a breakwater located a half a mile to the East and parallel to the external channel which extends for 2,574 m. (1.6 miles) to the North from the Northern coast of the Island of Zapara. In its outer extremity there is installed the lighthouse of the steel lattice type construction, with a height of 7.62 m. (25 ft.). The characteristics of its light are: white, with 1 flash every 8 seconds, visibility approximately 5,556 m. (3 miles).

The commencement of the internal dredged channel is marked by buoys B-29 and B-30. The extension of this channel is 19.31 kms. approximately (12 miles) and ends at towers T-55 and T-56. The channel is 244 m. wide (800 ft.) and its normal checked depth is 13.72 m. (45 ft.) at average low tide, with a tidal amplitude which varies between 0.49 and 0.89 m. (1.5 and 3 ft.), at tower T-66, and from 0.82 to 1.46 m. (4.5 ft.) at buoy B-29.

The channel from tower T-56 as far as the Port of Maracaibo is dredged and its termination is marked by buoys B-73 and B-74. It is 244 m. wide (800 ft.) and has a depth of 13.72 m. (45 ft.). Its distance is 17 kms. (11miles).

The depth in all the channels may vary in accordance with the sedimentation to which they are subjected and the formation of sandbanks. The Port Captaincy at Maracaibo issues notices to navigators keeping them informed as to changes in depths in the channels. Navigators are advised to keep themselves up-to-date with these notices of variations of depth when they calculate their exit draft of their respective vessels.

MAX. SIZE:

Berth	*Max. LOA*	*Max. Draft*	*Max. d.w.t.*
No. 1	835 ft.	38 ft.	80,000 tons
No. 2	835 ft.	37 ft. 6 in.	80,000 tons
No. 3	890 ft.	42 ft.	100,000 tons

Also see "Berthing"

RADIO: *Time of Arrival (ETA):* When a vessel leaves its previous port destined for the Terminal of Punta de Palmas, it must inform both its Agent and C.V.P./Llanoven in Maracaibo as to its best estimate of the date and time of arrival in Maracaibo. Then at least 24 hours prior to arrival at the San Carlos Pilots' station, it must send another message to confirm the time of arrival at Maracaibo. The nationality of the vessel, name, nett Venezuelan tonnage (if it does not have this, its registered tonnage), last port, name of Master, permanent ballast or cargo in tanks or both, and any other information which is pertinent must be included in this message. The cable address of C.V.P./Llanoven is as follows: C.V.P./Llanoven, Maracaibo, Telex 61126. By virtue of the circumstances that the Cable Office in Maracaibo is not equipped to communicate with vessels on the high seas directly, messages sent to C.V.P./Llanoven and to the Agent of the vessel must be transmitted through "PJC" (Curacao), with the prefix "Via ACC" (All American Cables and Radio, Inc.).

We wish to emphasize that by virtue of the fact that our undertaking rents a part of its equipment which it uses for mooring vessels in accordance with the last message of arrival of the vessel, this message must be compiled with the greatest accuracy possible. Any alteration in the time and date of arrival affecting the vessel before or after the time indicated in its message, will be for the account of the vessel as will be the cost of rental of the equipment used.

C.V.P./Llanoven is in no way obligated to carry out the mooring of any vessel, except at the estimated time of its arrival at Punta de Palmas, although exception is made where the vessel may have been delayed in Maracaibo by virture of reasons beyond the control of the Master.

The C.V.P./Llanoven Export Department is equipped with radio-telephone and radio on the following frequencies: (2182 listening out) 2080, 2120, 2638, 2738 kc/s. R/T and (156.6 listening out), 156.8 mc/s. VHF. These are operated at the following times: Mondays to Fridays: From 0730 until 1130 and from 1300 to 1700 hrs. Saturdays, Sundays and Holidays: From 0800 until 1000 hrs. approximately.

TUGS: Tug service consisting of 2 tugs of not less than 1,600 h.p. each is provided by the terminal operator for all vessels. Both tugs will assist all vessels in mooring and unmooring operations. Should it be deemed necessary by the terminal operator to require a tug in addition to the 2 terminal tugs for mooring or unmooring vessels exceeding 750 ft. in length, charges for this additional service will be for the account of vessel.

Vessels which exceed 835 ft. overall length, and destined for Berth No. 3, require the assistance of at least an additional tug. This additional tug will remain at the convenience of the Terminal for the time that the vessel remains at the berth.

In all cases where there are adverse weather conditions, without taking into account the size of the vessel, the Operator of the Terminal, at his convenience, may request the services of an additional tug to protect the installations of the Terminal and the ship, which will be for the account of the vessel.

The Terminal Department will make the necessary arrangements through the intermediary of the ship's Agent, for contracting additional tugs. These services will be charged to the ship's Agent by the tug operator who is contracted.

MOORING: *Berth No. 1:* Located approximately 8.85 kms. (5.5 miles) from the Terminal and 2 kms. (1.25 miles) to the West of buoys D-95 and D-96 in the Maracaibo Channel. Distance between the bow and stern buoys is 364.90 m. (1,200 ft.).

This berth is equipped, apart from the mooring buoys, with a transversal mooring pile on its Eastern side, submerged, with chain and cable the same as those of the buoys. This does not interfere with the operations of mooring and unmooring.

Berth No. 2: Located approximately 8.85 kms. (5.5 miles) from the Terminal and 2 kms. (1.25 miles) to the East of the buoys D-95 and D-96 and to the N.E. of berth No. 1. Distance between the bow and stern buoys is 350.50 m. (1,150 ft.).

This berth is equipped, apart from the mooring buoys with a transversal submerged mooring pile equal to that of berth No. 1.

Berth No. 3: Located approximately 9.65 kms. (6 miles) from the Terminal, 1.2 kms. (0.75 mile) to the West of the buoys D-95 and D-96 and approximately 914 m. (3,000 ft.) to the East of berth No. 2. Distance between the bow and stern buoys is 365.76 m. (1,200 ft.).

This berth is equipped similarly to berths Nos. 1 & 2 with a transversal submerged pile on the Western side of the berth.

Conditions applicable to all berths: (a) Vessels which have a total overall length of 239.26 m. (785 ft.) or more must be equipped with 2 tension capstans at the bow and on the after deck, with sufficient cable to reach the stern and bow buoys respectively.

(b) Every vessel loading at any of the berths must take into consideration that due to Government regulations, the vessel must have a minimum clearance of 0.984 m. (3 ft.) below the keel at any point during its transit through the Maracaibo Channel, without taking into account the limitations of the channel assigned to the 3 berths by the Terminal Operator. In view of this regulation and the constant variations of the depths of the channel, Masters must be guided by the most recent "Depth Bulletins" which are issued by the National Channel Institute, and by the tide tables when they are planning their transit time through the channel, and the maximum draft to which they may load their vessel.

Mooring procedures and rules applicable to mooring points: Every vessel carrying out mooring operations at any of the 3 berths must arrive with a minimum draft of 3.65 m. (12 ft.) forward and respect the following procedure and rules for berthing:

(a) Anchor: Vessels approaching the berths from the East, in the most convenient manner and safely as possible they must drop their starboard anchor in its location once the vessel has been berthed, the chain facing East, with a length of not less than 137.16 m. (450 ft.).

(b) Mooring cables: One of the following alternatives for mooring cables at each side of the vessel must be fulfilled:

1. Two cables of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 1 steel cable which has a minimum diameter of 1.25 in.
2. One cable of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 2 steel cables also supplied by the vessel and which have a minimum diameter of 1.25 in.
3. One cable of synthetic fibre with a 9 in. circumference and a safety cable of 1.5 in. diameter which will be supplied by the Terminal.

(c) Countertension cables: A countertension cable will be attached to the stern or fore deck. Vessels which have a length exceeding 800 ft. must use countertension cables on both sides of the deck simultaneously.

(d) Transversal cable: The transversal cable which will be supplied by the Terminal will be attached to the after deck on the starboard side. Vessels mooring at berth No. 3 must also attach an additional transversal cable to the after deck on the port side.

(e) All cables which are attached to vessels must have 6 turns around the bitts, and these must be secured so as to prevent them from unwinding.

(f) The pressure capstans must be secured in the braked position, once all other cables for mooring the vessel have been secured. These mooring cables must be maintained tight as the vessel goes down in the water whilst it is being loaded.

(g) Vessels must be supplied with sufficient cables as spares which can be used as the Terminal may require. All cables must be maintained in good condition and are subject to acceptance by the representative of the Terminal. Vessels must maintain sufficient personnel on deck during the whole time that the vessel is at the berth to attend to the cables for mooring purposes whenever this may be required by the Terminal.

It is understood by both parties that, when the Terminal may require safety cables to be used, and where such are required, C.V.P./Llanoven accepts no responsibility for damages or losses occasioned to any vessel, installation or person due to the use or failure of this equipment.

The vessel's gangway must be in position so that the mooring supervisor or other personnel from the Terminal can come on board the vessel when it arrives at Punta de Palmas.

This gangway must be suspended whilst manoeuvres are being carried out, this for the purpose of obviating any damage to it occasioned by tugs or launches.

Berthing Supervisor: The Berthing Supervisor of C.V.P./Llanoven will come on board every vessel prior to its entrance to the berth to establish radio contact between the vessel, the Marine equipment and the Office at the Terminal.

Mooring gangs and equipment: The mooring equipment will be handled by the launches employed in the manoeuvres. The tug service will be available 24 hours of the day through the intermediary of the Terminal Port.

The mooring gangs will assist the vessel personnel in the operations of hoisting, connecting and disconnecting the two 12 in. diameter loading hoses. The approximate weight of the loading hoses is 4 tons.

The launches used for the manoeuvres will place on board equipment to facilitate the work of connecting the hoses. This equipment will be at the disposal of the vessel's personnel when required as are also the launches to transport personnel.

Responsibility: The Master may request any equipment or service which he may consider necessary for a safe and efficient operation of his vessel and the Terminal Operator will do everything within his power to fulfil this requirement. Therefore all owners and operators of vessels arriving at Punta de Palmas will accept the responsibility of the safety inherent in the manoeuvring of their vessels and their movements to and from the Terminal. C.V.P./Llanoven will accept no responsibility for losses or damages occasioned to the ship, its installations and others unless such loss and damage be occasioned due to the faults in the installations belonging to the Terminal or operated by the Terminal with the exception of the security equipment.

Operational checklist: At the time when the vessel is moored and the hoses are connected, prior to the commencement of the operations of loading, the representative of C.V.P./Llanoven on board will deliver to the Master an operational checklist. The Master is required or whomsoever he may appoint to carry out this work together with Terminal representative, to check very carefully that all the safety regulations have been fulfilled.

Berthing Supervisor: The Berthing Supervisor will have charts and plans which will be at the disposal of the Master and his advice if he should require it. The representative will also be available to inspect the vessel's tanks and to act as liaison between the Master of the vessel and the Agent or with the Terminal of Punta de Palmas, to transmit any information relative to the ship. This supervisor must receive lodging and treatment at the same level as the ship's officers.

Unmooring procedure: When the loading operations are completed, the launches will proceed to remove all mooring cables from the buoys under the supervision of the official entrusted with the vessel or the Official Pilot, assisted by the Berthing Supervisor of C.V.P./Llanoven.

Documentation: The departure and loading documents will be delivered to the Master by his Agent or his representative, when he passes through the Port of Maracaibo.

BALLAST: *Deballasting:* It is understood that it is not permitted to discharge ballast in the lake, even though this may come from tanks used solely for ballast. Ballast will be discharged with the pumps of the vessel to the deballasting system which exists at the Terminal. As soon as the loading hoses are connected, the personnel of the Terminal will align the system with its respective valves. Once these operations are completed the Berthing Supervisor on board will inform the Captain that he may commence deballasting and in turn will keep him informed as to the pressures which will be used in the operation. Once the deballasting operation has been completed, the personnel of the Terminal will align the system again and its valves so that the vessel can receive cargo through the same hoses which are used for unloading ballast and simultaneously the personnel of the vessel will align their systems on board to receive cargo. The personnel of the vessel responsible for receiving the cargo will inform the Representative of C.V.P./Llanoven (Berthing Supervisor) when the vessel is in a condition to receive and he in turn will inform the personnel of the Terminal that they may commence pumping.

LOADING: *Oil leakage:* In order to obviate contamination of Maracaibo Lake and possible legal actions, we recommend strongly that Masters of vessels emphasize to their deck officers in order to obviate leakage that they make sure that all necessary measures have been taken on board to this end prior to commencing the loading operations. The purpose of this is to maintain on deck any leak or wastage which may occur in the vessel.

Guarantee of responsibility: In the event of an oil leakage or any other contamination or any other damages to installations caused by a vessel, the operator of the Terminal, prior to the vessel sailing, will require the Agent to deposit bond in favour of C.V.P./Llanoven to cover the fine or other charges which may be incurred in collecting, cleaning, repairing the installations of the Terminal and also to cover any claims from third parties.

Loading procedure and pumping rates: The position of the loading hoses, supports and connections must be to the satisfaction of the personnel on board. The valves of the hoses for loading purposes will be opened in order to test the connections, detect leaks and then ultimately to commence operations.

The responsibility and custody of the cargo passes to the personnel of the ship from the moment when the cargo arrives at the connection which is the property of the ship.

The minimum loading rate at berths Nos. 1 and 2 is 4,000 b.p.h. The average pumping rate, under normal conditions is 13,000 b.p.h. Sudden stoppages in loading will not be permitted during loading except in cases of emergency.

Personnel on board, responsible for the loading operations, must notify the Terminal representative, not less than 10 minutes in advance of the completion of loading. This will enable the representative to instruct the operator to reduce the rate of pumping or to continue loading by gravity as he sees fit.

For reasons of security, loading may be suspended and the hoses disconnected from the vessel's manifold when weather conditions are not favourable or at any time that the Terminal considers it convenient to do so due to force majeure or other reasons.

Displacement of the line: Sometimes it will be necessary to displace the submarine line in combination with the loading operation. To carry out this operation it is required that the personnel responsible for receiving the cargo notify sufficiently in advance the Berthing Supervisor when the amount of cargo lacking is equal to the capacity of the line.

The capacity of the line is a fixed quantity. Therefore it must not be considered with shortcomings or excesses.

Therefore when it is necessary to effect a displacement, the loading must be calculated carefully by the vessel personnel responsible for this operation.

It is understood that any error or negligence on the part of the vessel personnel in calculating the initiation point of the displacement of the line, will require a land pump to correct the displacement. Due to the submerged manifold it will be necessary to employ a diver to operate the valves and this operation may result in a fairly costly procedure and involve a lot of time. All costs involved in fulfilling this operation, together with the time lost will be for the account of the vessel.

Increase in pumping rates: At the request of the Master and subject to the approval of C.V.P./Llanoven, it is possible to suppy a pumping rate of 17,000 b.p.h. up to a maximum of 30,000 b.p.h., provided the operations of the Terminal permit this to be done.

MEDICAL: *Maracaibo:* Complete services are available.

Punta de Palmas: Emergency cases only will be transferred to Maracaibo for treatment, at the request of the official in charge of the vessel.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil available. Lubricating oils also available. Pumping will be affected during daylight hours and with prior permission of the Terminal.

FRESH WATER: Available from local contractors with barges. Pumping will be affected during daylight hours and with prior permission of the Terminal.

STORES: Fresh and dry provisions procurable through ship chandlers in Maracaibo for delivery at the Terminal.

REPAIRS: *Maracaibo:* There are no facilities available for carrying out major repairs. Nevertheless, repair work may be carried out through local workshops and labour can be supplied if this is required. Technicians in radio, radar, gyro compass repairs are also available.

Punta de Palmas: No type of repair will be effected here, which may prevent the unmooring of the vessel without the authority of the Marine Supervisor. Neither may boiler tubes be "blown" whilst the vessel is moored.

SHORE LEAVE: Launch service for business purposes and emergencies is readily available. Launch service for shore leave can be arranged through contract marine service and will be responsibility of ship's personnel. Arrangements for shore leave transportation can be made through Loading Master on board.

CUSTOMS: All vessels entering from foreign ports and bound for Punta de Palmas Terminal are required to anchor in Maracaibo Harbour for formal customs clearance and visit of government port authorities prior to proceeding to destination.

The vessel's accommodation ladder should be rigged prior to the vessel's arrival at Maracaibo. A member of the National Guard will board each vessel at Punta de Palmas to observe all activities connected with loading or unloading operations. This official is authorised as the customs representative, and is referred to as Customs Watch. Food and accommodation similar to officers should be made available to him by vessel.

CONSULS: See "Maracaibo".

GENERAL:

Transportation: Transportation will be supplied by launch between vessel and Punta de Palmas to the following persons, without exception:

1. Master of the vessel of the Chief Engineer, to attend to matters relating to the ship.
2. Sick personnel who require emergency medical attention.
3. Official Pilot.
4. Members of the National Guard and other Government Officials whose services relate to the tanker.
5. Doctors, when these may be required by Master, in the event of emergency only.
6. Inspectors of the oil industry.

Consular representatives, ship's suppliers, engineers, naval experts, representatives of the oil companies, suppliers of fuel and water and any other person who requires to come on board tankers when they are in Punta de Palmas must make their own arrangements for transportation to and from the ship through the intermediary of the ship's Agent. Also Agents must make their own arrangements for their own transportation.

Personnel of the ship with licence to disembark: The transportation of personnel with licence, when this is required by the Master, must be arranged through the intermediary of the Agent. Also passengers must embark and disembark at the Port of Maracaibo.

Personnel with licence are not permitted to go ashore at the Terminal of Punta de Palmas.

Classification Societies: American Bureau of Shipping, Lloyd's Register of Shipping, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale and Germanischer Lloyd have Agents in Maracaibo or in Caracas. There are experts available through the intermediary of the Agents mentioned above.

Monetary System: The monetary system of Venezuela is the Bolivar (Bs.), and is the only money legally recognised in the country. A Master who requires a cash advance must request same from his Agent when he notifies his ETA. Payment of all invoices for Terminal charges must be made in Bolivares at the Office of C.V.P./Llanoven in Maracaibo, unless other instructions are given.

Mail: Mail for the vessel can be delivered to the representative of the Agent who comes on board the vessel at the time of its arrival or sailing from Maracaibo.

AUTHORITY: C.V.P./Llanoven.

AGENT: Head Office. (Management and Control), Brokers, chartering and tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 101. Venezuela. Cables: "Selvic" or "Seltank". Tel. (02) 81.02.71. Telex: 22859, 21402, 21934 or 21631. New Boe Code.

Local Office: PO Box 496, Maracaibo. Tel. (061) 224960, (061) 224962. Cables: "Seltank Maracaibo" or "Selvic Maracaibo". Telex: 62166.

Section G

SAN LORENZO: 09.47 N. 71.05 W.

OPERATORS: Maraven, S.A.

LOCATION: S.E. side of Lake Maracaibo.

APPROACHES: Vessels have to arrive at Maracaibo Roads through a dredged channel with controlling depths of 45 ft. in outer bar, inner channel and Punta Palmas area. In vicinity of terminal the controlling depth is 36 ft.

PILOTAGE: It is compulsory from San Carlos to Maracaibo. Pilot normally boards vessel at buoy B–26 (Posn. 11° 01′ N. 71° 35′ W.). It is also compulsory for all vessels which have to load at any terminal located South of the bridge Rafael General Urdaneta. This bridge has a horizontal clearance of 656 ft. and a vertical one of 148 ft. at 45 ft. MMOLW level. Pilots have to embark and disembark at Maracaibo.

When Masters have no Pilot exemption Certificate for crossing outer bar, permission has to be requested by VHF or 2182 kc/s. prior arrival, which is being granted on request.

ANCHORAGES: Masters may use the following:

(a) Near E.M. Buoy, (not recommended because of the distance from San Carlos. The pilot launch never reaches this point).

(b) At Maracaibo Roads.

(c) At terminal approaches, in accordance with depths available in the area, and ship's draft.

LIGHTENING POSITION: In the Southern lake Area, arrangements have to be made in advance. Also at Maracaibo.

HEALTH: Quarantine officials board vessels at Maracaibo Roads. Pratique cannot be granted by radio.

RADIO: San Carlos Pilot Station has VHF Channels 12 & 16. Emergency call 2182 kc/s. Terminal has VHF Channel 12.

TUGS: Compulsory. When vessel is over 25,000 d.w.t. a second tug is required, which is available in the area, 1,200 h.p. each. There is also a launch to assist the vessel during manoeuvring.

BERTHING: Continuous wharf 2,340 ft. in length with dolphins. This terminal is only for handling crude and its products. Maximum berthing displacement: 20,000 tons.

	Berth No. 1	*Berth No. 2*	*Berth No. 4*
Max. LOA	560 ft. 00 in.	665 ft. 00 in.	
Max. Depth	24 ft. 06 in.	35 ft. 06 in.	Out of
Max. Draft	23 ft. 06 in.	34 ft. 06 in.	Service
Loading Rate	1,450 t.p.h.	2,000 t.p.h.	

These depths are referred to the minimum monthly observed lowest water level (MMOLW).

FRESH WATER: Available ex-barge at Maracaibo Roads.

DENSITY: At berths 0998 and at outer bar between 1020 and 1025.

FUEL: Any grade. In case vessels require grade not available at berth it may be supplied ex-barge at Maracaibo, which has mixing equipment able to supply the grade involved. Rate 20–140 t.p.h.

MOORING-UNMOORING: Carried out by Official Pilots. Mooring is Head-out to facilitate departure.

DEBALLASTING: Installations have ballast pit with capacity 650 cu. m. Max. discharge rate 600 t.p.h.

TANK CLEANING FACILITIES: Carried out by outside contractor.

REPAIRS: Minor ones only, including electronics.

INSERT LA CEIBA

MORON: 10.32 N. 68.11 W.

LOCATION: CVP's shipping and refining facilities are situated on the central coast of Venezuela in an area which is known as Golfo Triste, 11 miles West of Puerto Cabello.

The Terminal is an "S.B.M. System" located in position:
Latitude: 10° 31′ 50″ North
Longitude: 68° 10′ 50″ West.

(2 miles N.W. of Punta Moron and 5 miles S.E. of Yaracuy river mouth).

The Refinery and main storage tanks are located 1 mile South of the buoy on the nearby mainland.

DOCUMENTS: *Venezuelan Tonnage Certificate:* All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on the size and tonnage of the vessel.

It is the usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to the ship's Owners.

Vessels registered in the following countries are exempt from the above regulations, due to existing reciprocal agreement with Venezuela: U.S.A., Great Britain, Denmark, Ireland, France, Germany, Netherlands, Sweden, Norway, Portugal.

Above regulations, due to existing reciprocal agreement with Venezuela: Government Port Charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

Inward Clearance: Inward Clearance is effected on board by Government, Port and Customs Officials, CVP's Marine Office Representative and the Dispatcher or Expediter or a representative of the Agency, immediately after mooring.

The following documents must be ready on arrival:

(A) *In Ballast:*

1. Clearance from last port
2. Ballast manifest from last port (1 copy visaed according to paragraph (e) if there is no Venezuelan Consul)
3. Crew list (10 copies)
4. Steward's store list (all foodstuff, liquors, tobacco, etc.) to be declared on a separate and independent sheet (6 copies) (see paragraph D)
5. Deck and engine stores and spare parts list (paint, varnishes, chains, ropes, etc.) to be declared on a separate and independent sheet (6 copies) (see paragraph D)
6. Medicine chest list (including narcotics accurately itemised) (6 copies)
7. Slop chest list (6 copies)
8. Personal effects list (6 copies)
9. List of passengers in transit (if any) (6 copies)
10. Sailing permit (issued by Maritime Authority of last port of call)
11. Passenger and baggage list (if any) (6 copies visaed; 3 copies not visaed).

(B) *With Cargo to Discharge:*

In addition to the documents stated in paragraph (A), following will also be required:

1. Consular Mail (one sealed envelope from each loading port)
2. Manifest (Sobordo) (1 original visaed and 3 copies not visaed from each loading port)
3. Bills of Lading (1 original and 2 copies visaed, and 4 copies not visaed from each loading port)
4. Tally books (6 from each loading port)
5. Consular Invoice (3 originals visaed and 3 copies not visaed, from each loading port)
6. Commercial Invoices (3 from each loading port)

(C) *With Cargo in Transit:*

In addition to documents required in cases (A) or (B), a copy of the Bill or Bills of Lading covering all in-transit cargo is required.

(D) Store list prepared should indicate separately all deck, engine and cabin stores. The store lists may be prepared on board prior to arrival unless the vessel is coming from the Netherlands Antilles or the Guianas, in which case they must be visaed by the Venezuelan Consul at the port of departure.

(E) Cargo and clearance documents should be visaed by the Venezuelan Consul at the last port of call. In the absence of a Venezuelan Consul, they may be visaed by the Consul of a friendly nation, by the Chamber of Commerce or by two reputable merchants whose signatures shall be notarized. In the absence of a Venezuelan Consul, the following notation should be written in Spanish on each document signed by the alternates' designates above:

"Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento".

(Signature)

Outward Clearance:

On completion of loading, vessels will be unmoored immediately and proceed to the corresponding anchorage area for the completion of port formalities and cargo documents. These formalities usually take from 2.5 to 3 hours to complete from the time that the ship has been unmoored.

In order to obtain the sailing permit, a special form which is delivered on board on arrival, must be completed one hour before unmooring. This form gives cargo and freeboard information required by the Harbour Master to be handed together with the crew's shore passes via the Harbour Master's representative or Customs representative on duty (National Guard).

Outward clearance and cargo documents are delivered to the anchorage by the dispatcher or expediter.

PILOTAGE: On arrival at Moron, vessels should wait for the Government Pilot and for the CVP Marine Office representative.

Vessels must not enter the port limits unless Pilot and CVP Marine Office Representative are on board. The use of Government Pilot is compulsory for all vessels entering or leaving territorial waters, however, all manoeuvres or operations should be under direct supervision of the CVP Marine Representative.

CVP will arrange for this service at all times, and if for any reason, a tanker is required to wait for any time at anchor, the ship will be advised through the pilot boat or via the coastal radio station "YVL".

APPROACHES: The CVP Marine Terminal in Moron is well marked with light beacons, and presents no navigational difficulties in clear weather.

Reference to the chart, will show that the Golfo Triste is easily navigable; but owing to the presence of fishermen, when approaching the coast Masters should keep a particularly sharp lookout for fishing boats, nets and small craft.

Lighthouse on Shore:

Description: A post painted with red and white horizontal bands.

Position: Latitude 10° 31′ 06″ North.
Longitude 68° 11′ 21″ West.

Light: Flashing White, every 3 seconds. Flash 1 second, Eclipse 2 seconds, Flash 1 second. Visibility 10 miles.

Night Arrival: When the ship arrives after 1700 hrs. local time during Winter or after 1800 hrs. local time during Summer, it will have to anchor until daybreak. *No night mooring is allowed.*

Vessels are able to leave at night.

ANCHORAGE: It is forbidden to anchor near the SBM. The SBM is secured in position by 8 chains, each chain 234 m. long; there are also pipe-lines between the buoy and the coast. The recommended anchorage is well shown in the navigational chart, and it is recommended because it is near to the pilot boat pier (Punta Chavez). Vessels should anchor outside the Puerto Cabello pilotage zone.

MAX. SIZE: 55,000 d.w.t. and max. draft 39 ft. Depth of water 42 ft.

TUGS: Not available.

MOORING: All vessels planning to moor at Moron Marine Terminal shall be equipped with not less than 2 wires of sufficient length and strength (not less than 100 ft. long and 5.5 in. circumference).

Each end with thimble. Thimble must accept 2.5 in. shackles.

These two wires are fastened in the forecastle bitts one on each side according to the Marine Office Representative's instructions.

If the vessel is not equipped with 2 wires, CVP will furnish 2 wires 100 ft. long and 5.5 in. circumference.

When the vessel is about 300 ft. from the buoy, the mooring launch will pick up 2 ropes from the vessel and will secure then with 2.5 in. shackles, each one, to a wire of 1 in. diameter and 30 ft. long. These wires are connected in the opposite end, each one, to a specially shaped "triangle" plate.

These "triangles" are connected to a 10 ft. long chain, these chains are intended to rest (one at port and the other one at starboard), on the vessel's fairleads at the bow when mooring is completed.

The chains are attached by means of two nylon ropes 110 ft. long and 12 in. in circumference, to the buoy.

After heaving of ship's ropes and after placing the chain in the fairleads each "triangle" is connected with wires previously fastened to the forecastle bitts by means of a shackle, one on each side. In order to improve the ship's safety it is recommended to reinforce this operation with two or more ropes from vessel, to facilitate the sailing manoeuvre.

No ship in the mooring manoeuvre must be placed less than 300 ft. from the buoy.

Night Mooring:

The mooring manoeuvre is realised during the day, the sailing manoeuvre is carried out at any hour during the night, so the forecastle lighting must be adequate.

When the lighting in the forecastle is not sufficient, it will delay the sailing of the ship until daybreak, and all charges for this delay will be paid by the ship.

Unmooring:

The ship's lines used to reinforce the moorings remain secure until the last moment, in order to disconnect the shackles without risk.

A launch will be ready near the bow to release these lines.

RADIO: *Cable Address:* "Cevepe-Moron".

All Radio Communications from vessels should be via the coastal radio station "YVL" Puerto Cabello, and the first word of the text "Termar".

Arrival messages (ETA):

Loading:

(A) Masters of all vessels destined to load at Moron Marine Terminal are requested to give ETA at least 72 hours in advance of arrival.

The Radio Message should include:

1. First word of the text "Termar"
2. Ship's flag
3. Ship's name
4. Net registered tonnage
5. Port of departure
6. When originally cleared for another port, including any other Venezuelan port, and diverted at sea to Moron Marine Terminal, vessel should include diversion advice, and port to which vessel originally cleared.
7. Number of crew and passengers
8. Quantity of dirty ballast in metric tons
9. Time required to discharge ballast
10. Type and amount of cargo vessel will load
11. Bunker requirements (only bunker "C" fuel oil available)
12. Other requirements
13. Master's name

(B) 24 hours before arrival vessel should Radio advising any change (or no change) of ETA. First word of the text "Termar".

(C) Finally 12 hours before arrival vessel should *Radio* again confirming ETA. First word of the text "Termar".

Discharging:

(A) Masters of all vessels destined for discharging at Moron Marine Terminal are requested to give ETA at least 72 hours in advance of arrival.

The Radio Message should include:

1. First word of the text "Termar"
2. Ship's flag
3. Ship's name
4. Net register tonnage
5. Port of departure
6. When originally cleared for another port, including any other Venezuelan port, and diverted at sea to Moron Marine Terminal, vessel should include diversion advice and port to which vessel was originally cleared.
7. Number of crew and passengers
8. Deepest draft
9. Type and amount of cargo on board
10. API gravity of the cargo
11. Bunker requirement (only bunker "C" fuel oil available).
12. Other requirements
13. Master's name

(B) 24 hours before arrival vessel should Radio advising any change (or no change) of ETA. First word of the text "Termar".

(C) Finally 12 hours before arrival vessel should Radio again confirming ETA. First word of the text "Termar".

Important:

Notice of diversion of ship at sea not received prior to arrival of vessel, subject ship to heavy fines and delays.

When ship comes from neighbouring ports less than 72 hours from Moron Marine Terminal vessel should radio the first message, as soon as possible, in order to avoid delays on arrival. Any expenses incurred or delays resulting from lack of radio information will be for the account of the ship.

Example to confirm ETA:

The t/s "Petrolasa" estimate to arrive on July 15th at 1400.

Cevepe
Moron
Termar Petrolasa Confirm ETA 151400
Master

OR:

Cevepe
Moron
Termar Petrolasa Confirm ETA Wednesday 1400
Master

Marine Band:

Any ship which wishes to establish communication with Moron Marine Terminal on the frequencies of 2080 kc/s., 2120 kc/s, 2182 kc/s, 2638 kc/s and 2738 kc/s. (International Marine Band) it will be able to do so if previously sends a radiogram stating the date and the time, as there is no permanent radio operator.

When there is a ship at the port, the radio operator is permanently on watch on 2182 kc/s. from Monday to Friday between 0700 and 1200 hrs. and between 1300 and 1600 hrs. local time.

It is forbidden to use the radio equipment without the authorization of the CVP Marine Office Representative.

VHF: Any ship wishing to establish communication with the Moron Marine Terminal on the frequency of 156.55 mc/s. (Channel 11) will be able to if prior to arrival a cable is sent stating the date and time, as there is no permanent radio operator.

When there is a ship at the buoy, this Channel is used for cargo operations.

S.B.M.: *Description:* The uppermost part painted white, the hull white and red in vertical bands.

Fitted with radar reflector on top.

Position: Latitude: 10° 31′ 50″ North.
Longitude: 68° 10′ 50″ West.

Light: Flashing white every 9.5 seconds. Flash 2.5 seconds. Eclipse 7 seconds. Height 10 ft. Visibility 5 miles.

HOSES: *Floating Hose:*

Description: A 16 in. diameter black floating hose with red foam plastic floats. This floating hose can move freely 360° around the buoy and is 557 ft. long.

Light: The position of the floating hose is indicated by 2 red buoys with red light flashing every 1 second; Flash, 0.5 seconds; Eclipse 0.5 seconds.

During the manoeuvres while the mooring launch is working with the ship's lines another launch keeps the floating hose clear of the side of the ship. This floating hose is 170 m. long, to be connected to a 12 in. diameter ship's manifold.

Vessels nominated to load/discharge/take bunkers in this port must prepare their manifolds with 12 in. diameter connections.

Hose handling: Shore employees will assist in connecting and disconnecting hose to vessels. A ship's officer must be present and the ship's deck officer on duty must approve the hose connection on board.

Ships must be adequately equipped with derrick, blocks, tackle, wire runners and sundry equipment to efficiently hoist the floating hose from the sea to the loading position. Sundry equipment should include wrenches, drift pins, nuts and bolts, wire and fibre strops, drip pans, gaskets, etc.

To assist in vessel turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Pilot.

Loading is effected both by night as well as by day and such standards can only be assured by vessels having equipment fully suited to Terminal requirements.

Before mooring, blind flange on the ship's manifold should be removed in order to speed up the connection of floating hose by shore personnel. A maximum pressure of 150 lbs. is allowed on the loading hose.

LOADING: The approximate maximum loading rates of products available is:

Product	*Barrels per Hour*
Fuel Oil	up to 15,000
Bunkers	up to 15,000

Discharging Rate:

As governed by vessel's pumps, but a maximum pressure of 150 lbs. is allowed on the loading hose.

Documents:

The time to elaborate the documents and cargo papers, starting from the hour that the ship has been unmoored is about 3 hours. However, this time is reduced to only 40 minutes if the Master on arriving, signs the documents. This reduces the waiting time, and eliminates the possibility of the papers to the Consignee, Owner, etc., being dropped into the water or being damaged during the two journeys by boat.

BALLAST: A vessel *must have sufficient ballast for safe handling,* having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel a ship's Master may come to the Terminal with a minimum of ballast.

Clean Ballast can be pumped into the sea, but Masters are reminded that pollution of the sea incurs heavy fines.

Dirty Ballast can be received ashore via 16 in. submarine pipeline to ballast disposal facilities.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the CVP Marine Terminal Supervisor.

It is the ship Master's responsibility to see that no oil of any kind is pumped or spilled overboard from the ship.

The discharge of dirty ballast within the territorial waters of Venezuela is strictly prohibited. As a further measure to avoid pollution from oil within coastal regions, Masters of tankers are requested not to clean tanks and lines and not to pump dirty ballast within 50 miles of the Venezuelan territorial waters.

MEDICAL: No medical or dental services are to be expected at Moron (except in case of emergency and subject to a doctor being available).

FRESH WATER: Not available.

FUEL: Only Bunker "C" Fuel Oil is available. Chief Engineer to witness shore tanks gauges.

TIME: GMT minus 4 hours. No changes.

REPATRIATION: Not allowed.

CONSULS: French, Norwegian, Swedish and Panama Consulates are represented in Puerto Cabello, 12 miles East of Moron.

SHORE LEAVE: Launch for shore leave personnel depends on launch availability on arrival, advance notice should be given in order to arrange for one. The Master should so advise via coastal radio station "YVL" Puerto Cabello in a separate message, to the CVP Marine Office.

It is important that Master bear in mind that this service is supplied by an outside firm on a round trip basis and that the service is between Puerto Cabello and the ship, and between the Master and the contractor.

In Moron Marine Terminal there are no facilities to embark/disembark. CVP does not assume any liability for this outside service including injuries or accidents, even if it occurs inside the port limits. Master of the vessel is solely responsible in all respects, but CVP reserves the right, at anytime and without notice, to withdraw, control, supervise or change regulations of such service according to self interest.

GENERAL: *National Holidays:* By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following National Holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

Merchant Marine Holiday: On June 21st the country celebrates the National Merchant Marine Day. It is requested that all ships in port be fully dressed this day.

Launch Service: Launch service for transporting Pilots, Port Authorities and CVP personnel, handling lines to buoy, connecting floating hose, and for other official business is readily available.

These launches are on duty continuously under the direction of the Marine Terminal Supervisor, and are *only for official business.*

Laundry: No laundry facilities are available at Moron.

Formalities: With the Pilot and Marine Office representative a Quarantine Medical Officer will board the vessel and grant pratique, subject to no infectious diseases having been reported on board during the voyage. The ladder should be ready for this purpose before arrival.

On completion of mooring, a Customs inspection is carried out. The Master will be required to furnish particulars of the vessel including bonded stores, cargo, bunkers, and other information. Custom surveillance is strict and store rooms and bar will be sealed. All contraband will be confiscated by the Authorities and fines assessed.

After inspection, a member of the National Guard, as the Customs representative, will ensure that vessels in port comply with regulations. Food and accommodation similar to Officers should be made available to him by the vessel.

Strict compliance with the Customs Laws of the country is enforced by the Authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried, a greater quantity will result in the imprisonment of the offender with possible heavy fines and delays to the vessel.

The presence of unauthorised craft alongside a ship will render the ship unacceptable. it is the duty of the ship's personnel to see that the ship's side is clear of all such craft.

Harbour Master's representative who boards at the same time issues the required number of shore passes for crew members. These passes must be shown when proceeding ashore to the government guards. They are to be collected by the Master prior to sailing and handed to the Harbour Master's representative.

Masters are requested to have shore leave expire at least two hours before expected departure. Men then found missing should be reported to the CVP Marine Office.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or have previously been signed-off by the Master through the CVP Marine Office.

If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the CVP Marine Office as well as written instructions as to his repatriation, when found. All cost and expenses of a crew member so left behind will be for ship's account.

Safety of Personnel: No swimming is permitted within port limits. No fishing is permitted in the manoeuvring area. Chipping and scaling on deck or overside is strictly prohibited within the port limits.

No painting overside is permitted in the manoeuvring area.

No person under the influence of alcohol is to be allowed on deck.

It is strictly prohibited to carry firearms and ammunition, knives or other weapons. These may not be carried while in Venezuelan waters and must be declared on store list. Said arms and ammunition, should be collected and held in the Master's safe custody.

Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reason, all documents and personal effects are to be handed to the Marine Office representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seaman, and instructions concerning his repatriation. All expenses incurred by seaman left ashore, including cost of repatriation are for ship's account.

It is important that the Master bears in mind that the Venezuelan Law will at all time hold the vessel, her Master or Owner responsible for any seaman left behind in Venezuela.

Tank Cleaning and Mopping: Several contractors in the area provide labour for tank cleaning and mopping.

Masters in need of this service should submit requirements to CVP Marine Office, who will contact and request a contractor to go on board to discuss details and estimate cost of work to be effected.

It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore, it is up to him to decide the degree of tank cleaning necessary.

Seamen's Club: There is no Seamen's Club at Moron.

Film Exchange: No film exchange service.

Bonded Stores: No cigarettes or bonded stores are available at Moron.

Mail: Ship's mail received after the ship has sailed, or for vessels on which no advice has been received, will be held for 2 weeks and then returned by airmail to the Owners or Operators or senders, at ship's expense, unless specific instructions have been received beforehand.

For a good service please use the following address:

Name of crew member
Ship's name
Corporacion Venezolana del Petroleo
Atencion: Oficina de Marina
Apartado 146, Puerto Cabello – Estado Carabobo
VENEZUELA

Hydrographic and Meteorological Data: The local weather of Moron is on the whole favourable, and the visibility in this area of the Golfo Triste is generally fair to excellent. The climate is considered to be healthy. Easterly winds prevail most of the year. Moron lies far South of the usual Caribbean hurricane tracks but occasionally rough sea and swell are likely to occur.

Trade winds normally blow from the N.E., force 4 Beaufort scale. The average temperature is 28° C. and the density of water is 1028.

Calm days or even Westerly winds may be expected; at this time smog from the neighbouring factories is held in suspension in the atmosphere and visibility is reduced too a very short distance. The phenomena are more deceptive than fog in that mariners are apt to believe visibility to be greater than it actually is.

Provisions: No provisions or ships' chandlers are available at Moron. In Puerto Cabello, there are, but the service is very expensive and possible only on weekdays.

Sufficient Personnel: One qualified Deck Officer must be on deck at all times while the vessel is in port.

Competent crew members must be on deck at all times while the vessel is in port; one watching the mooring ropes, one watching the ladder and the others to ensure proper handling of cargo, or ballast. One responsible member of the ship's crew must be stationed by the ship's main control valves nearest the shore during loading and discharging.

Chief Engineer must provide sufficient and responsible personnel to ensure proper handling of bunkering.

In default of these requirements, the CVP's Marine Office Representative has full authority to stop loading/discharging.

All operations in connection with the starting of loading, discharging, gauging, switching of tanks and topping off must be directly and personally supervised by ship's officer.

Constant Readiness: Vessels must maintain engines and propulsion machinery in readiness to leave the Terminal under full power on short notice.

No repairs are permitted.

Inoperative ships or partially inoperative ships will be rejected. Should they become inoperative while in the Terminal, they will be removed at the vessel's expense.

An efficient watch must be maintained by both deck and engine departments while in port.

A sufficient number of men must be on board at all times for manoeuvring the vessel or for emergency situations.

Suspension of Loading: The Terminal reserves the right to suspend oil handling operations in the event any of the foregoing safety rules are not observed, or in the event of non-compliance with safety rules generally observed by competent tanker personnel. Oil handling operations may also be suspended if any other danger is believed to exist.

Visitors: all visitors to vessels are prohibited, except CVP employees, Petroleum Inspectors and others (technicians, ship chandlers, etc.) whose duties require their presence on board.

Passengers: Passengers will not be permitted to disembark.

Lubricants, Oils and Greases: Certain types of CVP lubricant oils only are available in small quantities. Requirements should be sent by cable in order that the necessary labour arrangements for delivery can be made.

Radio and Radar: No repairs made at Moron. However, with sufficient notice, it is possible to call a technician from Puerto Cabello.

Accommodation: The CVP Marine Office asks the Master to pay attention to everything possible while the vessel stays in port to its representative, as well as providing accommodation according to his rank.

SAFETY: The vessels personnel are responsible for the safety of the vessel and themselves and must take all necessary precautions whether or not so advised by the Marine Office. Any safety precautions imposed by the Marine Office representative and disregarded by the ship's officers or crew will be considered just cause for rejection of the vessel and all expenses related thereto will be for the account of the vessel.

When a ship is at the buoy or in vicinity thereof, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted at the Buoy.* Ship's whistle to be on instant readiness at all times.

The Bridge and/or Control Area shall not be locked or otherwise arranged to prevent immediate entry at all times by the Marine Office representative.

Not less than one deck officer and five seamen shall be on deck, alert and available at all times. No person under the influence of alcohol is to be allowed on deck.

No transistor radio sets or other electrical appliances may be used on deck unless certified for use in hazardous petroleum areas and subject to approval of Marine Office.

All scuppers must be plugged and witnessed by the ship's Master. Refusal to plug scuppers will result in the ship being rejected. Drain trays, sawdust and all materials necessary to clean up any oil spillage on deck to be available for immediate use. Adequate lighting on board as well as on the surrounding sea is required.

After complete discharge of ballast Marine Office representative or petroleum inspector will witness closing of pumproom sea suction and sealing of same.

The presence of unauthorised craft alongside a ship will render the ship unacceptable. It is the duty of the ship's personnel to see that the ship's side are clear of all such craft.

No stores of any kind will be handled while vessel is under "Notice of Readiness".

No stores will be handled while vessel is on the moorings or vicinity thereof.

Fire fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers available at the loading manifold while hose is being connected and disconnected. Water shall be available on deck at all times, and fire hoses connected at all fire stations and flaked out for immediate use.

No radio transmissions will be permitted on board ship except by the express permission of the Marine Office.

When ships are loading or discharging crude or ballast and while tank tops are open or ullage plugs are open, boiler tubes are not to be blown. Every precaution must be taken to see that no sparks escape from the funnel or from the galley stack. No ullage hole shall be left open unless effectively covered with a gauze mesh wire spark arrester. Smoking will be permitted in places approved by the Marine Office representative. There may be occasions when smoking will be entirely prohibited. Cigarette ends should not be thrown overboard or through portholes, at any time.

Lifebuoys should be available in the loading manifold area and at points of entry and exit from the ship.

All personnel should avoid breathing gas escaping from tank ullage plugs whilst loading and gas vents should be used.

Vessel's fresh air masks and resuscitators shall be laid out in a readily accessible position ready for immediate use.

All accommodation doors, port holes and ventilators should be closed during loading operations and doors and openings to machinery spaces in vicinity of ship's tanks to be closed.

There should be laid out on the forecastle deck and poop deck "Fire Towing Wires" of suitable strength.

No swimming is permitted whilst vessels are on the Buoy.

No fishing is permitted within the Buoy or within the restricted navigation area.

Chipping and scaling on deck or overside is strictly prohibited within the port limits.

No painting overside is permitted in the manoeuvring area.

AUTHORITY: CVP/Llanoven.

ORINOCO RIVER: 08.36 N. 60.25 W.

General information, followed by:

Section A – MATANZAS
Section B – PALUA
Section C – PUERTO ORDAZ
(CVG Ferrominera Orinoco)
Section D – PUNTA CUCHILLO
(Lagoven S.A.)

1. As early as possible, advise Puerto Ordaz Radio Station, call letters YVM, giving ETA at Buoy EO of North (natural) channel, or at Buoy 01 of South (dredged) channel.
2. 24 hours prior to arrival, send another ETA to YVM.
3. Upon arrival, depending on whether Master intends to enter Orinoco waterway through North or South channel, adhere to following procedure:
   (a) *North Channel.* Notify Port Captain, Ciudad Bolivar, via YVM, of time of arrival at Buoy EO and give ETA at Beacon G7 (mile 27.7).
   (b) *South Channel.* Request permission to enter from Port Captain, Ciudad Bolivar, via YVM. *Do not enter* until notified by YVM that Port Captain has granted permission; while awaiting, lay to or anchor at least 1 mile outside of Buoy 0.1.
   (c) All vessels must also communicate with the Point Barima pilot station, call sign YV5QE on 2182 kc/s. HF or 43.18 VHF to be informed of traffic.
4. While navigating waterway, inbound or outbound, report position to YVM hourly on the hour.
5. No Pilot required nor available for navigation along North or South channel at the Boca Grande of the Orinoco River.
6. The International Rules for Preventing Collisions at Sea apply outside of Beacon G7, mile 27.7.
7. Given the case of 2 vessels navigating North and South channels respectively the one navigating South channel is the privileged vessel.
8. Anchoring either in North or South channels is forbidden.
9. Throughout Orinoco waterway, the down-bound loaded vessel is the privileged vessel.
10. It is compulsory to fly Venezuelan ensign inside of Buoy EO or Buoy 0.1.
11. Vessels can only carry clean ballast within Orinoco Waterway.
12. Pilotage compulsory within Pilotage Zone No. 1 of the Orinoco. Pilots board at outer boundary of said pilotage zone in upstreamward vicinities of Beacon G7.
13. Regulations for the Pilotage Zone No. 1 of the Orinoco apply inside of Beacon G7.

APPROACHES: (Also see "Radio" – paragraphs *(b)* and *(c)*).

1. *The Waterway*

A Radio Direction Finder, located at Lat. 8° 31′ 45″ N., Long. 60° 28′ 28″ W., transmits following signal continuously: YV – AYV. The transmitter has an output of 500 watts with a range of about 200 miles and operates on a frequency of 305 kc/s. While navigating the waterway, ships should favour the shore on their starboard side to the extent possible, giving preference of manoeuvre to loaded vessels in all cases. Ships navigating upstreamward (inbound), upon approaching narrow channels should await the passing and give way to downbound vessels. It follows, therefore, that downbound loaded vessels are the privileged vessels.

2. *The Boca Grande (Barima Bar) Channels*

There are 2 navigable channels across the Boca Grande (Barima Bar), identified as follows: North channel (or natural channel), and South channel (or dredged channel). The 2 channels have converging courses and meet at mile 27.7 in the vicinity of Beacon G7. Vessels navigating the South channel are privileged, regardless of the direction in which they travel.

(a) The North (Natural) Channel

This channel has a min. depth of 12 ft., referred to Mean Low Water. The approach from the sea is marked by a battery-operated electric flashing black buoy, identified with the letters EO. This buoy is located in 46 ft. of water at Lat. 9° 00′ 10″ N., Long. 60° 18′ 20″ W. Its characteristics are: colour of light, white; flash, 1.0 seconds; eclipse. 6.0 seconds; height above water, 10.7 ft., visibility, 7 miles. From seabuoy EO, the channel develops for 7.3 miles to Buoy EOA on a course of 213° 40′ true, then for 2.8 miles to Buoy EOB on a course of 198° 57′ true. From this point the channel follows an approximate straight course of about 205° true for a distance of 17 miles to Beacon G7. Starting from EOB distances between successive navigation aids are as follows: G1 at 1.9 miles; G1A at 1.5 miles; G3 at 2.1 miles; G3A at 2.3 miles; G5 at 3 miles; EL 24 at 2.6 miles; G7 at 3.7 miles. All navigation aids are black buoys fitted with white lights, except Beacon G7 and EL 24 which is a range structure indicating the West side limit alignment of the South (dredged) channel. This structure has been fitted with a white flashing light to mark the North (natural) channel.

(b) The South (Dredged) Channel

The South channel is a 400 ft. wide dredged channel. Depths therein accommodate the maximum draft authorised by the Port Captain. The approach from the sea is marked by a battery-operated electric flashing black buoy, identified with the number 0.1. This buoy is located in 45 ft. of water at Lat. 8° 55′ 52″ N., Long. 60° 11′ 17″ W. Its characteristics are: colour of light, white; flash, 0.5 seconds; eclipse, 11.5 seconds; height above water, 25 ft.; visibility, 11 miles. From seabuoy 0.1, the channel develops along 4 different courses over a total distance of 27.7 miles to Beacon G7. The course reduces by about 7° true at each of 3 turning points, located at miles 9, 15 and 21 respectively. The initial course of 234° 18′ true continues to mile 9 where it changes to 227° 07′ true. Upon reaching mile 15, the course again changes to 219° 51′ true to mile 21. At mile 21, the course changes to 212° 45′ true to Beacon G7 at mile 27.7. The centreline of the channel on all courses is visually marked by range structures fitted with green flashing, directionally beamed lights. The West (right ascending) side limit of the channel through mile 21 is also visually marked by range structures fitted with amber flashing, directionally beamed lights; the alignment given by the side ranges develops 200 ft. to the West and parallel to the centreline of the channel. Battery operated electric flashing navigation aids are located along both sides of the channel. All navigation aids along the East (left ascending side of the channel are located 325 ft. from centreline or 125 ft. outside of the channel lateral limit. White flashing navigation aids are located at 1 mile intervals through mile 25.1; all aids along this side are black buoys, except beacons 8.1, 9.1, 14.1, 15.1, 20.1, 21.1, 22.1, 23.1, 24.1, 25.1, 27.1 and 27.7 (G7). All navigation aids along the West (right ascending) side of the channel are located 200 ft. from centreline or on the exact lateral limit of the channel. Red flashing buoys painted red are located at 1 mile intervals from mile 1.6 to mile 11.6. From mile 11.6 to mile 27.7, there are only 2 aids; red buoys 13.6 and 26.0.

3. *The River Channel*

From mile 27.7, the navigable channel develops upstream. The river channel is generally deep and wide, except for the following 12 reaches which require periodic dredging: miles 27.7 to 36.5; miles 37.3 to 38.6; miles 53.1 to 54.2; miles 99.0 to 106.5; miles 109.1 to 111.0; miles 131.7 to 131.9; miles 136.6 to 139.0; miles 141.2 to 145.8; miles 146.2 to 149.4; miles 167.6 to 170.8; miles 178.4 to 182.4; miles 183.5 to 184.1. Dredged channels are normally 300 ft. in width, but occasionally can be restricted to a min. of 250 ft. The depth maintained therein can accommodate the maximum draft authorised by the Port Captain. By notice to Mariners, the Port Captain has instructed all Masters and Pilots to reduce speed and to proceed with caution while navigating the aforesaid reaches, especially during the low water season.

4. *River Stages*

In response to the cycle of wet and dry seasons, the flow of the Orinoco River follows a relatively regular pattern of rise and fall each year. The river normally begins rising in late March or early April and continues to rise until it peaks at crest in late August. In September, the river begins a fairly steady recession until the extreme low-water stage is reached, generally in March. The amplitude of stage variation above the low water plane of reference (0.0 ft.) at Palua (Mile 181.7) averages about 35 ft. with min. variations of 31 ft. and max. variations of 39 ft. The effects of the flood rise decrease progressively below Palua and practically vanish in the upstreamward vicinities of the Boca Grande.

5. *Tides and Currents*

(a) The indicated mean tidal range is 5.4 ft. Tidal influence is not experienced above mile 60 during high river stages. At low river stages, a tidal effect can be observed throughout the waterway, although it progressively diminishes, moving upstreamward. However, the tidal effect is still significant at Puerto Ordaz, mile 184, where a max. semidiurnal change of 1.7 ft. has been recorded.

(b) The strength of river currents is generally commensurate with flow, the strongest currents occurring at high river stages. The velocity of currents at any one time generally decreases moving downstreamward. However, in certain locations, this pattern is affected by particular characteristics of river width and shape as well as by bottom gradient. Max. velocities of about 6 knots have been recorded.

6. *Navigation Aids*

(a) The navigation aids installed along the waterway consist of buoys, beacon and ranges. All aids are lighted. Identification is provided by means of numbers representing the approximate mileage of each aid, to the nearest one-tenth of a mile. The last digit of numbers identifying white lighted aids is odd, while the last digit of numbers identifying red lighted aids is even. White lighted aids mark the left ascending limit of the navigable channel, while red lighted aids mark the right ascending limit.

Aids are placed as as to be intervisible, to the extent that — when abreast of any one aid — the preceding and following ones can be sighted. Consecutive aids always carry different light characteristics. Buoys are normally placed on the exact lateral limit of the channel (except for black buoys along the South channel at the Boca Grande); beacons, instead, are located at variable distances outside of the channel.

(*b*) During the execution of dredging along any of the reaches which require periodic maintenance, buoys are generally moved 100 ft. outside of the channel lateral limits. This information is made available to ships by YVM.

(*c*) The Ministerio de Comunicaciones, Direccion de Marina Mercante, publishes semi-annually a complete list of navigation aids. Monthly lists of changes are also published so that the complete current list can be maintained up to date.

(*d*) Upon encountering damaged, inoperative, or misplaced navigation aids, vessels should immediately notify YVM.

(*e*) Vessels are forbidden to make fast to any navigation aid.

7. *Dredging Aids*

Range structures, generally located close to shore or over the bank, are normally used to mark the lateral alignments of the channel along the reaches which require periodic dredging. These ranges are generally fitted with amber flashing, directionally beamed lights. The lights are extinguished except during execution of dredging. Dredging ranges *are not* to be used for navigation.

8. *Navigation Charts*

Navigation charts of the Orinoco Waterway should be aboard vessels for use by the Master. These charts are sold by the Instituto Nacional de Canalizaciones and are also available for purchase from the Orinoco Mining Company. If requested, CVG will, if possible, arrange to make the charts and latest revisions available through the Pilot who boards at Punta Barima, provided such request is received by radio (YVM) at least 48 hours in advance of the Pilot's boarding. A set of navigation charts, corrected to latest revisions, is maintained in the office of the Traffic and Ships' Agency of CVG in Puerto Ordaz. Masters may use this facility to keep their charts up to date.

DOCUMENTS: (Clearance, documentation and other requirements).

1. *Consignment of Inbound Vessels*

The official documents of all vessels proceeding to Puerto Ordaz should show the following consignment: to: CVG Ferrominera Orinoco, Ciudad Bolivar, Zona de Puerto Ordaz. The proper consignment of vessels proceeding to Palua, on official documents, is as follows: Iron Mines Company of Venezuela, Ciudad Bolivar, Zona de San Felix.

2. *Customs Requirements*

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require the following documentation:

(*a*) Vessels must have a ballast despatch statement (Certificado de Lastre) which must consist of a note from the Venezuelan Consul, if such Consul is present at the port of departure; otherwise, in descending order of desirability, from the Consul of another friendly nation, the local Chamber of Commerce or 2 reputable merchants of the port of departure. The note should include the name and nationality of the vessel, name of the Captain, registration number of the vessel and tonnage, sailing date and assertion that the vessel is en route in ballast, cargo, or with passengers. The note should be given to the Captain of the vessel or his Agent in an open envelope, which the Captain can exhibit in intermediate Venezuelan ports of call and can turn over to Customs authorities in the Venezuelan ports of destination. Under no circumstances may the ballast despatch statement be signed by an Agency of the government of the country from which the vessel is departing.

(*b*) The vessel must have a clearance certificate (Certificade de Zarpe) or sailing authorisation issued by the Customs Authorities of the port of departure, representing the government of the country the vessel is departing from. No consular certification need be placed upon this document.

(*c*) Stores List (Lista de Rancho) signed by Master unless vessel is dispatched from the West Indies or Guianas, then the stores list must be visaed by the Venezuelan Consul at port of departure. Stores list must indicate separately all deck, engine and cabin stores. These lists may be prepared on board prior to arrival.

(*d*) Spare Parts List (Lista de Repuestos). It must contain a note of all the spare parts and objects for the service of the vessel, including fuel. No consular certification required. To be signed by the Master and to be current as of the day of entering the Venezuelan port.

(*e*) List of Effects for use of Captain and Crewmen (Lista de efectos personales de la dotacion). No consular certification required. To be signed by the Master and to be current as of the day of entering the Venezuelan port. The Customs are very strict and will confiscate any article that appears new.

3. *Health, Immigration, and Police Requirements*

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require following documentation.

(*a*) Current individual International Vaccination Certificates for each member of the crew.

(*b*) Rat Eradication Exemption Certificate. No consular certification required.

(*c*) Crew Lists (original and seven copies). No consular certification required.

(*d*) Panama or Suez Canal or any comparable type measurement certificate.

Contraband: The Venezuelan law is very strict on this subject. It cannot be emphasised too strongly that all new articles, clothing, cigarettes, liquor, etc., must be declared and sealed-up upon arrival.

Meals for Pilots and government officials. It is requested these men be granted the privilege of eating in the officers' dining salon.

N.B. Masters of vessels calling at Trinidad for bunkers before proceeding to Venezuela must also have the documents stamped by the Venezuelan Consulate at Port of Spain.

PILOTAGE: In order to expedite the movement of shipping in the waterways, Masters are requested to establish contact with YVM station as soon as possible, giving ETA pilot station at Barima (Orinoco River entrance). At the same time a radio-telegraph message must be sent to Agents giving ETA Barima and cargo required. When vessels is 24 hours from pilot station, send another ETA via YVM.

After reporting the ETA in advance of arrival, try to contact directly, by radio, the Estacion de Pilotos when the ship approaches the sea-buoy of the bar entrance (about 2 hours before arrival at the pilot station).

After taking the Pilots aboard, report to Radio Marina and continue giving the ship's position according to the mile, up-river, at exactly every hour on the hour, and receive from Radio Marina the pertinent information concerning the traffic in the river waterway. If no communication can be established by voice radio aboard, comply by radio-telegraph by way of the YVM station.

Pilots are employees of the Venezuelan Government and act in an advisory capacity. The Master retains responsibility for the ship at all times.

(1) Pilotage is not required and Pilots are not available for navigation outside the pilotage zone. Masters will take charge of inbound and outbound navigation on the North or South channel outside Beacon G7 at the Boca Grande, without Pilot's assistance.

(2) Pilotage is mandatory within the Pilotage Zone No. 1 of the Orinoco. Inbound vessels will embark the government River Pilot in the upstreamward vicinities of Beacon G7. It is important that vessels pass Beacon G7 and be in sight of the pilot station at Barima in order to avoid any delay, as Pilots may not proceed until vessel is sighted. The government River Pilot will pilot the vessel while navigating the waterway; a special government Docking Pilot will generally take the vessel into and out of the Puerto Ordaz harbour.

Signals

(1) All signals used outside of the pilotage zone (that is to say. seaward of Beacon G7 – mile 27.7) shall conform to the International Rules for Prevention of Collisions at Sea.

(2) Within the pilotage zone (that is to say, inside of Beacon G7 – mile 27.7) the signals used shall be in accordance with the "Regulations for the Pilotage Zone No.1 of the Orinoco". It should be noted that these signals are peculiar to the Orinoco Waterway, and are not necessarily in conformance with the International Rules.

(3) Within the pilotage zone, special signals are used for passing dredgers at work along the waterway.

Speed

The Captain of the Port has the authority to impose speed restrictions. By means of "Notices to Mariners", the Port Captain has ordered that all vessels reduce speed while navigating by the following locations: San Felix Dock, mile 179.8; El Toro, miles 95.4 to 96.6. It is recommended that speed be also reduced while navigating by the Palua Dock (mile 181.8), Barrancas (mile 143.2), and Curiapo (mile 60.4). At the inception of the low water season each year (generally in early January), the Port Captain has in the past issued a "Notice to Mariners" instructing all vessels to reduce speed and proceed with caution while navigating the following river reaches: (1) miles 184 to 178, (2) miles 171 to 167, (3) miles 150 to 141, (4) miles 140 to 137, (5) miles 133 to 131, (6) miles 112 to 109, (7) miles 106 to 98, (8) miles 55 to 53, (9) miles 39 to 36

ANCHORAGES:

(1) No ships are permitted to anchor either in the North or South channel at the Boca Grande. Vessels are to anchor at least 1 mile outside of Buoy EO or Buoy 0.1.

(2) Within the pilotage zone, no vessel is allowed to anchor in narrow channels, nor close to a turn.

(3) Between Beacon G7 — mile 27.7 and mile 137, vessels which need anchoring may do so by coming as close as possible to shore on the ship's starboard side.

(4) Between mile 137 and mile 184, the Pilotage Regulations provide for 3 permanent anchorages and 1 seasonal anchorage, as follows: Area No. 5 (permanent): miles 139.3 to 140.4. Area No. 6 (permanent): miles 150.1 to 151.7. Area No. 7 (permanent): miles 178.0 to 179.0. Area No. 8 (seasonal): at the junction of the Caroni and the Orinoco. It should be observed that Area No. 7, as determined in the Pilotage Regulations, partially encroaches on the narrow (dredged) channel and on shore. Vessels are to anchor in the naturally deep and wide part of the area.

(5) The low-water anchorage (for 1 ship only) previously established by the Port Captain between miles 182 and 183 is no longer in use. This area is currently used as the turning basin for vessels exiting the Palua channel, upon sailing from the new Palua dock at mile 181.8.

(6) If due to emergency a ship is required to anchor in places other than the designated areas, it should do so in such a way as not to obstruct the channel and by taking the necessary precautions to avoid swinging around.

(7) Upon anchoring vessels should notify YVM.

MAX. SIZE:

(1) *Max. permissible draft.* The Port Captain of Ciudad Bolivar can establish the permissible draft for the Orinoco waterway to a max. of about 43 ft.

(2) *Controlling Depths and Authorised Draft*

The draft authorised by the Port Captain for the Orinoco Waterway is made public by means of a "Daily Bulletin of Depths and Draft" (Boletin Diario de Profundidades y Calado). Each daily bulletin issued by the Port Captain carries the following information, in Spanish and English:

(a) Controlling (minimum) depth between miles 184 and 133, and corresponding location.

(b) Controlling (minimum) depth between miles 133 and 42, and corresponding location.

(c) Controlling (minimum) depth between miles 42 and 0, and corresponding location.

(d) Predicted high tides (height and times) at mile 13.5.

(e) River stage (height of river level above low water plane) at Puerto Ordaz and Palua.

(f) Authorised draft, in feet and inches.

The controlling depths given for locations comprised between miles 184 and 42 are actual depths, and reflect depth conditions as of the date of the bulletin. The controlling depth given for locations comprised between miles 42 and 0 is referred to mean low water springs and does not include the height of tide at high water.

The authorised draft may be predicted either on the controlling depth existent between miles 184 and 42 or between miles 42 and 0, dependent upon whichever is the least.

When the controlling depth between miles 184 and 42 is the significant factor, the permitted draft authorised is at least 2 ft. less than the controlling depth in this sector.

When the controlling depth between miles 42 and 0 is the significant factor, the permitted draft authorised is generally less than the mean low water springs controlling depth but occasionally can be equal to the mean low springs controlling depth.

Whenever the MLWS controlling depth existing between miles 42 and 0 does not provide sufficient clearance under the keel of the vessel at low water, the Master is expected to navigate by the site where the controlling depth is located only at times when the height of tide will assure a safe passage.

(3) *Variations in authorised draft:*

(a) The authorised draft is generally increased or decreased by multiples of 6 inches.

(b) Throughout the year the authorised draft is susceptible to variations, according to the conditions of the depth and width existing in the channel at any one time. On the basis of average river stages it is estimated that the authorised draft should be about 33 ft. in the dry season from December to May.

During the rainy season, from June to November, the max. permissible draft may be as high as 43 ft.

HEALTH: Radio pratique may be obtained by sending a message, after picking up Pilot, to the Port Health Officer, advising that there is no sickness on board, name of last port, ETA, number of crew and nationality of vessel and name and nationality of Master.

RADIO:

(a) Communications: Communications are generally handled through the radio-telegraph station at Puerto Ordaz, call letter YVM. This station is operated on a 24 hour basis. The operating frequencies are: 440 kc/s; 472 kc/s; 4322 kc/s; 6505.5 kc/s. The GMT — CQ times and frequencies are: 0900 hours, 4322 kc/s; 1200 hours 6505.5 kc/s; 1430 hours 8722 kc/s; 2000 hours 8722 kc/s; 0030 hours 8722 kc/s; 0300 hours 4322 kc/s.

There is no charge for messages from ship to shore or from shore to ship handled directly through YVM. A VHF frequency modulated radio system provides voice communications along the Orinoco Waterway. Master sets for the system are installed in the Puerto Ordaz radio-telegraph station (voice call: "Master Radio"); Marine Radio handles shipping matters exclusively, The system consists of a high-band VHF frequency modulated voice radio net. To ensure a more efficient and satisfactory coverage, this system operates on dual frequencies alternating according to location, so that ships can either transmit on 161.700 mc/s receiving on 159.000 mc/s, or transmit on 161.150 mc/s receiving on 159.850 mc/s. For best results, ships should select frequencies according to the following: From sea to mile 50: transmit on 161.700 mc., receiving on 159.000 mc.; From mile 50 to mile 112: transmit on 161.150 mc., receiving on 159,850 mc.; From mile 112 to mile 159: transmit on 161.700 mc., receiving on 159.000 mc.; From mile 159 to mile 184: transmit on 161.150 mc., receiving on 159.850 mc.

Pilot station at Barima Bar, Palua and Matanzas are equipped with this system. For the Puerto Ordaz area, ships will transmit to Marine Radio on a frequency of 43.02 megacycles and to others on a frequency of 43.18 megacycles, receiving in both cases on a frequency of 43.18 megacycles.

(b) Control of Navigation:

(i) Navigation on the North (natural) channel at Boca Grande is free. However, vessels are requested to notify the Port Captain, Ciudad Bolivar, via YVM, upon arrival at Buoy EO, giving ETA at Beacon G7, mile 27.7.

(ii) Simultaneous navigation in opposite directions by 2 or more vessels is not permitted on the South (dredged) channel at the Boca Grande. The restriction is placed on inbound traffic, to the extent that any vessel wishing to enter the South channel requires prior authorisation from the Port Captaincy of Ciudad Bolivar. The request for permission to enter the South channel is to be addressed to the Port Captain, Ciudad Bolivar, via YVM, and is to be transmitted before the vessel reaches Buoy 0.1. Upon receipt of the request, the Port Captain will notify the vessel via YVM whether permission is or is not granted, indicating, in the latter case, the approximate waiting time. Until permitted to enter, vessels are to anchor at least 1 mile outside of Buoy 0.1. Once that authorisation has been granted, vessels are to enter the South channel at the earliest opportunity. Any vessel which has been notified to wait may elect to proceed and enter through the North (natural) channel; in this case, the vessel will have to satisfy the requirements outlined in paragraph (1) above.

(iii) While navigating the Orinoco Waterway inbound or outbound vessels are to report their position to YVM hourly on the hour.

(c) *Accident, Stranding, etc.*

(i) Should a collision, stranding or other accident occur in the waterway, or should it be found necessary to take control of the vessel away from the pilot for any reason, the Venezuelan law requires that a written report be made to the Captain of the Port by the Master of the vessel involved within 24 hours. The report is to be addressed to the Captain of the Port and may be handed to the Pilot or the ship's Agent for delivery. The Master need not appear in person before the Captain of the Port unless specifically ordered to do so.

(ii) Slight groundings or touching of banks and bottom may simply be noted on the reverse side of the receipt for pilotage signed by the Master.

(iii) In case of collision, stranding, slight grounding, touching of banks and bottom, or other accidents, vessels should immediately notify YVM.

Section A

MATANZAS: 08.17 N. 62.50 W. (See Plan Book)

N.B. See "Orinoco River" for all important entry requirements.

OPERATORS: CVG Siderurgica del Orinoco CA.

ANCHORAGES: Between miles Nos. 195 and 197, Orinoco River.

MAX. SIZE: Length 600 ft., breadth 74 ft., distance between rail and hatch combing 23 ft., max. draft 30 ft. in rainy season May to November, and 26 ft. in dry seaon.

RADIO: See "Orinoco River". Cables address of Matanzas terminal operators is "Sidor Matanzas - Telex 22709" and cables may be routed through Caracas, Curacao or Trinidad Radio.

TUGS: Every vessel over 2,000 registered tons is required to use a tug when berthing. Tug is 1,600 h.p.

BERTHING: Undertaken day or night. Length of quay 300 m. Depth alongside 28 ft. (Summer), 60 ft. (Winter).

There are 2 gantry cranes for bulk cargo, capacity 20 tons, can also be fitted with electro-magnets. 3 gantry cranes with fixed jibs for general cargo, capacity 5 tons, can also be fitted with electro-magnets.

MEDICAL: Private hospital and several doctors available.

TIDE: 6 inches rise and fall at the berth. Current, in Winter 6 knots; in Summer 1.5 knots.

FRESH WATER: Available at rate of 12 metric t.p.h.

FUEL: Available in emergency.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle spirits allowed per crew member for personal consumption.

IDENTIFICATION CARDS: Provided by authorities, and necessary if crew going ashore.

REPAIRS: Local workshops undertake minor repairs.

AIRPORT: Distant 10 miles. 6 flights a week to Caracas.

HOLIDAYS: No work on 1st January, Maundy Thursday, Good Friday, 1st May and 24th December. Work can be arranged on other holidays.

DEVELOPMENTS: The existing quay is being extended by 430 m. Depth will exceed 42 ft. in Summer. Water and fuel services will be available. New equipment includes 6 semi-gantry cranes with capacity of 30 tons and a fixed heavy lift crane with 400 tons capacity.

Section B

PALUA: 08.21 N. 62.41 W.

N.B. See "Orinoco River" for all important entry requirements. Specific details, relevant to Palua only, are as follows:

SUPPLIER: The ore supplier is Iron Mines company of Venezuela, cable address El Pao San Felix (Venezuela). Their Palua office is fitted with VHF radio-telephone on 161.150/159.850 megacycles and 2182 (call) kilocycles.

CLEARANCE: Agent will secure the Clearance dispatch.

Note: The Palua dock and facilities are the private property of Iron Mines Company of Venezuela. All Company regulations must be obeyed by vessels and vessels personnel.

The Bill of lading will be prepared by Iron Mines Company of Venezuela, also the Commercial Invoice on the Consular Invoice form 138. The Inward Foreign Manifest, U.S. Customs form 7527-B, should be prepared by Master after sailing from Palua.

MAX. SIZE: Max. Draft 43 ft. Max. d.w.t. 70,000 tons.

BALLAST: To provide the best manoeuvring trim on docking, it will be at the discretion of the Master to properly ballast the vessel. But in order to lose no time on loading operations, as well as to prevent short loading, the ballast should be pumped out as soon as possible, using utmost caution not to pump oil or sludge overboard in the port area.

APPROACH AND DOCKING IN PALUA: After passing the village of San Felix, and before reaching the turn off from the main channel, a tug and a Docking Pilot will meet the vessel and will assist in the docking manoeuvre. Although the Master will always be responsible for the vessel's movements either in the case of docking or undocking, the Docking Pilot will actually pilot the vessel to, and dock the ship at Palua.

At mile 180.5 the ship should leave the main channel, turning to the left to follow the new dredged entrance channel of approach which is marked by 2 flashing buoys: white on the port and red on the starboard side. Diamond-shape range marks of 6 ft. side, painted white with black diagonal cross, indicate the centre line of the approach channel. The front range, fastened on the ore loading pier, shows flashing green light, and the rear range, set on a tower shows flashing green light, and the rear range, set on a tower approximately 2,000 ft. away, has fixed green light.

The docking shall be port side to in all events; and please stow all hatch boards, or pontoons, or steel battens, etc., on the starboard side of the hatch as this will keep the gear cleaner and lessen the work of the ore handling gang.

The dock will provide a gangway for access to the ship. Nothing should overhang the port side of the vessel on docking.

If the loading berth is not available the arriving vessel would be instructed to anchor at an anchorage just below the entrance to Palua approach channel at mile 179.

LOADING DOCK: The ore loading port is located at mile 181.5 of the Orinoco waterway, along the left bank going up-river. The new steel dock here is aligned up and down stream in the general direction of the current. It is 907 ft. long between its pointed heads, with 791 ft. of boarding side along, the deck fixed at about 6 ft. over the maximum rise of the river in the flood season. It has a strong fender system of steel structure covered with timber overhanging the side, down to near the lower river stage; and is fitted with 14 bollards plus 2 more, one on each head, for proper docking and securing the vessel.

Once the vessel is moored alongside the new ore loading dock, there shall be no further shifting necessary to load, as the loading tower moves along the dock on rails to facilitate the loading through the various hatches.

LOADING: The ore handling and loading equipment for Palua has a capacity to load 3,000 metric tons of ore per hour, for the time being. With this capacity, the vessel's mooring lines should be tended during the operation.

The boom of the loading tower is so designed as to allow free movement in any direction, fore and aft. The gantry and boom travel along the dock for a distance of 518 ft., and can place the ore at a distance horizontally out from the dock fenderline of 23 ft. min. and 62 ft. max. at the highest water stage, and from min. 29 ft. to max. 67 ft. horizontally out at the lowest stage.

Care must be taken during the course of loading to avoid piling the ore too high in the holds, as this necessitates hand trimming before the hatch covers can be properly secured, and incurs unnecessary trouble.

UNDOCKING: The Master, assisted by a Docking Pilot, if required, will handle the vessel on leaving the dock, going upstream from the dock not less than 0.75 miles distance to the turning basin in the same heading as when the ship moored alongside. 1 tug (or 2 tugs if required), will go alongside the ship prior to undocking and will assist the vessel until it is headed downstream in the main Orinoco channel. The amber lights at the heads of the dock form a range to mark the shoreside boundary of the local dredged channel. A red light high up on the loading gantry will come in the same range as the 2 amber lights. In the turning basin a tug-boat will assist the vessel swinging downstream.

When the ship is in the main channel, properly headed downstream, the Docking Pilot will leave on the tug, and the River Pilots (2 of them) will assume the navigational direction. Report to Radio Marina by voice radio and give ETA at mile 31.

Report again to Radio Marina giving position every hour, and try to contact Barima Pilot station sometime before arrival at mile 31, where the Pilots will disembark.

If voice radio communication is not possible, comply by radio-telegraph by way of the YVM station.

HEALTH: The vessel will be boarded by the Public Health Doctor after docking at Palua; unless instructions to the contrary.

In the event that the Authorities have to board the vessel anchored out in the stream, an accommodation ladder should be rigged, preferably on the starboard side, to keep the port side clear for docking. Venezuelan authorities and workmen will not use Pilot ladders.

REGULATIONS: The Master, members of the crew and passengers if any, are required to have in their possession individual smallpox vaccination certificates. Serious delays may result in the dispatch of the vessel if this requirement is not complied with.

The Venezuelan law is very strict on the subject of contraband. It cannot be stressed strongly enough that all *new* articles, clothing, cigarettes, liquor, etc., must be declared and sealed up on arrival.

Concerning passes, the regulation states that "members of the crew who are not officers of the vessel, in order to go ashore and return aboard, have to be supplied with an identification card to be issued by the Purser of the vessel or his substitute, which card will contain the name of the vessel, the name of the crew member and the date of issue. This card will have to be signed by the person issuing same and has to be authorised by the respective officer of the Port Captain's office for the district".

GAS-FREE CERTIFICATE: Vessels reporting to Palua to load ore should have the holds and cargo compartments swept clean and ready to receive cargo. Also, any combination ore/tanker vessel tendering to load iron ore at Palua shall present, along with the notice of readiness, a Gas-free Certificate if said vessel has in the past been employed in the carriage of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. But they are advised that around Palua in Venezuela there is no chemist available for granting such a Gas-free Certificate. It may be secured before arriving at Venezuela by calling at Trinidad, reporting to cable address: Harriman, Port of Spain.

In case of necessity, or for convenience, it could be arranged for the chemist to travel to Venezuela to meet the ship in Palua, advising Harriman (Port of Spain) at least 3 days before arrival at Palua.

If the vessel is equipped with a gas-indicating meter (explosimeter), Iron Mines Company of Venezuela will accept the Master's certification in writing that the vessel is gas-free. However, they reserve the right to check the vessel with their own equipment prior to acceptance.

RADIO: Should a vessel receive radio advice at sea to proceed to Palua, and the clearance is to another port, the Master must radio to Agents and advise the name of the vessel, flag, port of embarkation, original port of destination, Captain's name and the number of members in the ship's crew including the Master. This is necessary in order to comply with the Venezuelan Custom Law.

CONSULS: At the present time there are no Consular Agents located around Palua, the nearest being in Ciudad Bolivar or Caracas.

FLOOD SEASON: The port experiences a yearly flood season from the middle of June to the middle of November, to a max. of about 38 ft. at the last days of August, above the lowest stage (during the first days of April) in the dry season that occurs from the middle of November to the middle of June.

TIDE: The wind in the locality blows generally upstream, and on exceptional occasions during the dry or low-river season, when the current is weak, does overcome the current and cause the anchored ships to tend with stern upstream.

REPAIRS: Minor emergency repairs of mechanical, electrical and electronical types may be carried out in the shops by the personnel of the Iron Mines Company of Venezuela. The American Bureau of Shipping has a surveyor at Puerto Ordaz, near Palua.

MEDICAL: There is a medical dispensary at Palua, and a hospital of the Company at El Pao, where seamen may be admitted when requiring hospitalisation in emergency cases.

FUEL: All grades of bunker fuel are available at Palua, delivered by barge.

FRESH WATER: Drinking water is available at the dockside in limited quantity of about 100 tons every 24 hours. Small amounts of fresh provisions may be obtained in the locality.

Section C

PUERTO ORDAZ: 08.21 N. 62.43 W.

OPERATORS: CVG Ferrominera Orinoco.

LOCATION: The operations of the CVG Ferrominera Orinoco are centred in the State of Bolivar in Eastern Venezuela and iron ore is loaded into ocean-going vessels at Puerto Ordaz 8° 21′ N., 62° 43′ W., at the junction of the Caroni and Orinoco Rivers, approximately 184 nautical miles from the open sea.

GAS-FREE CERTIFICATE: Any combination ore-tanker vessel tendering to load iron ore at Puerto Ordaz shall present, along with the notice of readiness, a gas-free certificate if said vessel has in the past been employed in the transportation of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. Gas-free certificates can be obtained through an approved surveyor in Puerto Ordaz.

HEALTH: Vessels will be boarded by the Public Health Doctor in the stream off Puerto Ordaz. He will not come up a Pilot ladder and will insist on an accommodation ladder which should be rigged and ready when he approaches. In order not to delay docking, this accommodation ladder should be rigged on the port side during low river stage, and starboard side during high river stage.

RADIO: Should a vessel receive radio advice at sea to proceed to Puerto Ordaz, and the clearance is to another port, the Master must radio station YVM Puerto Ordaz, and advise the name of the vessel, flag, port of embarkation, original port of destination, Master's name and number of members in the ship's crew. This is necessary in order to comply with article 17 of the Venezuelan Customs Law.

TUGS: All vessels touching at Puerto Ordaz will be assisted by a tug in docking and undocking manoeuvres. Line-handlers are available on the dock to secure mooring lines on vessel's arrival, and to release them on vessel's departure.

BERTHING:

1. **The Harbour:** The Puerto Ordaz Harbour extends from mile 183.5 to mile 184.1 of the waterway. The harbour consists of a natural basin formed by the mouth of the Caroni as it flows into the Orinoco. The width of the turning area within the basin varies from a min. of about 1,600 ft. at low water to a max. of about 2,000 ft. at high water. The lighted buoys marking the navigable limits on either side of the harbour are moved to different positions according to river stages in order to achieve full utilisation of navigable waters. The bottom of the harbour is generally rock, with scattered layers of sand overburden deposited as sediment by the river. This sand is regularly removed by dredging in order to maintain depths which will accommodate the maximum draft authorised by the Port Captain. The bottom configuration across the harbour consists of a rocky shelf extending about 900 ft. from the face of the dock. Beyond this shelf the bottom slopes steeply into a deep gorge, then rises to form a sandy beach along the opposite shore. The velocity of river currents at this site varies according to stage levels. A slower current is generally experienced over the rocky shelf adjacent to the dock, with velocities averaging about 1.5 knots at flood stages and about 0.5 knots or less at reduced river stages. The velocity of the current over and along the deep gorge averages about 3.5 knots at flood stages and 1.5 knots or less at reduced river stages. During extreme low water, the basin is subject to tidal influence and the velocity of currents is minimal, although there is no reversal of flow. The direction of the current is aimed slightly toward the face of the dock at its S.E. end but deflects away from the pier about 500 ft. downstreamward. Access to the harbour is by way of a naturally deep and wide fairway which is the continuation of the gorge as it enters the Orinoco River.

2. **The Dock:** The Puerto Ordaz dock is located along the right ascending side of the harbour and extends outward from shore on a S.E. by East alignment. The all-steel fixed-height dock is 1,885 ft. long; its elevation is 41 ft. above low water plane (0.0 ft. stage). This dock is fitted with a strong fender system and with a sufficient number of accessible bollards for proper docking and securing.

3. **Arrival:**

(a) Notice of Readiness: When completely ready to receive cargo, vessels will submit "Notice of Readiness" to CVG Ferrominera Orinoco. Vessels will be loaded in the order in which Notices of Readiness are accepted by CVG Ferrominera Orinoco. The Company will advise when the vessel may proceed alongside the dock.

(b) Docking: Special Docking Pilots are provided for the docking and undocking of vessels at Puerto Ordaz. These Pilots are qualified River Pilots, thoroughly familiar with local conditions. All vessels will dock starboard side to. During the low water stage, which is from the middle of November to the middle of June, no gangway should be rigged and nothing should overhang the starboard side of the vessel. When the river is sufficiently high which is from the middle of June to the middle of November vessels are requested to have starboard gangway or accommodation ladder rigged and ready to lower immediately after docking in order to expedite the commencement of loading. Venezuelan authorities and workmen will not use Pilot ladders. Vessels reporting to Puerto Ordaz to load ore should have holds and cargo compartments broom clean and ready to receive cargo. Considerable time will be gained if this requirement is met prior to reporting.

(c) Hatches: On arrival at Puerto Ordaz all hatch boards or pontoons, beams, tarpaulins, steel battens, wedges, etc., should be stowed on the port side of the hatch. This will keep the hatch gear cleaner and lessen the work of the ore handling clean-up gang.

(d) Ballast: In order to lose no time with the loading operations, as well as preventing short-lifting, all ballast should be pumped out before arrival at the dock. Use utmost caution not to pump oil or sludge overboard in the port area. CVG Ferrominera Orinoco Ships' Agency Representative will contact vessel on arrival and will assist in every way possible.

4. **Departure:** All vessels which have completed loading at Puerto Ordaz and have received the latest river information from the port officials, and are ready for their river transit in every respect, will proceed outward via the Orinoco Waterway, disembarking the Pilot at mile 31. Once the Pilot has disembarked, vessels shall proceed over the South (dredged) channel to mile 0, and exit the waterway.

TANKERS: See "Punta Cuchillo".

MEDICAL: There is a hospital at Puerto Ordaz which will admit seamen requiring hospitalisation.

FRESH WATER: Drinking water is available alongside the dock.

FUEL: Bunker "C" and diesel oil is available.

CONSULS: An Italian consulate Agent at Puerto Ordaz, nearest consuls for other countries at Cuidad Bolivar or Caracas.

REPAIRS: Minor emergency repairs may be carried out in the shops of CVG Ferrominera Orinoco.

TIME: The legal time of Venezuela, which is 4 hours behind GMT, shall be used in Pilotage Zone No. 1 of the Orinoco river.

SHORE LEAVE: Permitted, but it is mandatory that all crew members should report back to their respective ships before sailing time.

GENERAL: 1. *Ore Loading Equipment:* The ore handling and loading equipment installed on the pier has a speed ratio of 6,000 long tons of ore loaded per hour. Due to this great loading capacity the vessel's mooring lines must be tended at all times.

2. *Handling Facilities:* A movable 110-ton, rail mounted stiff-leg derrick is installed on the dock for the handling of general cargo.

3. *Provisions:* Small amounts of fresh provisions are available.

4. *Surveyor:* The American Bureau of Shipping has a non-exclusive surveyor in Puerto Ordaz. Lloyds has an Agency in Ciudad Bolivar with a branch office in Puerto Ordaz, and will appoint surveyors upon request.

AGENTS: Mailing Address: CVG Ferrominera Orinoco C.A., Agencia de Barques, Puerto Ordaz. Telex No. 86249 (ORINADM).

CVG Ferrominera Orinoco acts as ship's Agent for all vessels consigned to load iron ore at Puerto Ordaz. This function is performed by the Superintendent, Traffic & Ship's Agency and his staff, whose offices are located adjacent to the loading dock at Puerto Ordaz.

Section D

PUNTA CUCHILLO, (Puerto Ordaz Terminal): 08.20 N. 62.47 W. (See Plan Book)

N.B. See "Orinoco River" for all important entry requirements. Specific details relevant to Punta Cuchillo only are as follows:

OPERATORS: Lagoven S.A.

LOCATION: The terminal and dock is located near Mile Post 192 on the South side of the river.

PILOTAGE: Government Pilot will pilot vessel to Puerto Ordaz. In some cases this same Pilot will act as Mooring Pilot and dock vessel at the terminal. If River Pilot does not also act as Docking Pilot, the River Pilot will disembark at mile 178 during low water, and mile 183, in high water, and a Docking Pilot will embark and take the vessel to mooring.

Pilots are obtained at the G7 buoy of the old channel, which is the same as Buoy 27.7 of the new channel and is located 5 miles West of the old lighthouse at Punta Barima at Lat. 08° 36′ 00″ N., Long. 60° 30′ 40″ W. It is important that vessels pass this buoy and be in sight of the Pilot Station (1 mile E.S.E. of Punta Barima Lighthouse), as pilots will not proceed to the vessel until it has been sighted.

RADIO: Vessels diverted at sea to Punta Cuchillo which do not have a Venezuelan clearance on board, must advise Lagoven by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessel will be subject to a fine.

MAX. SIZE:

Gauge Reading	*Maximum Draft*	*Tide Required at Bar*
12–14 ft.	33 ft.	None
14–17 ft.	34 ft.	None
17–20 ft.	35 ft.	None
20–23 ft.	36 ft.	None
23–26 ft.	37 ft.	None
26–29 ft.	38 ft.	None
29–32 ft.	39 ft.	None
32–35 ft.	40 ft.	None
35–38 ft.	41 ft.	half of high tide
38–41 ft.	43 ft.	half of high tide

HEALTH: Vessel will be boarded by the Public Health Doctor in the stream off San Felix or Puerto Ordaz or occasionally at the Terminal. If he boards before docking, an accommodation ladder should be rigged and ready when he approaches, as he will not come up a pilot ladder.

All Masters, members of the ship's crew, and passengers, if any, are required to have in their possession individual smallpox vaccination certificates. If this requirement is not complied with, a serious delay may result in the dispatch of the vessel.

BERTHING: The dock at the terminal consists of a docking platform, 2 breasting dolphins and 2 mooring dolphins. The docking platform is connected to shore by a 10 ft. causeway capable of carrying a light truck.

At mean low river stage, water depth at the face of breasting structures is 40 ft. The bank rises sharply from face of dolphins toward shore. The 40 ft. depth contour extends parallel to shore for a considerable distance upstream and down stream from the dock, allowing a flat approach angle.

Current is negligible during low river stage and is approximately 6 knots at midstream at high river stage. Current runs generally parallel to the face of the dock at the dock site.

Top of dock elevation is 45 ft. above low water stage. Buffering system extends from a point below low water stage to a point immediately below top of dock. Nothing should overhang the shoreward side of the vessel when docking during the lower stages of the river. The buffering system is designed to accommodate forces exerted by a vessel of 47,000 tons displacement, approaching the dock with a velocity component perpendicular to the dockface, of 0.5 ft. per second.

Bollards for vessel's lines are provided at the mooring dolphins and at the breasting structures. Mooring dolphins will safely withstand 200,000 lbs. of mooring line tension.

The facilities include a 24 in. diameter submarine pipe-line which crosses the river a short distance down-stream of the dock. The crossing is marked by triangular-shaped signs on both banks of the river. Masters are cautioned against use of vessel anchors in this area.

The terminal pumps are capable of loading oil aboard ship at the rate of approximately 14,000 barrels per hour.

INWARD CLEARANCE FOR DIVERTED VESSELS: Vessels diverted to Puerto Ordaz to load cargo should submit all documents, except consular mail, which they will not have. In lieu of this, they should submit 4 copies of the cable to divert, leaving enough space for the translation in Spanish. Vessels diverted at sea to Puerto Ordaz (Lagoven Terminal) which do not have a Venezuelan clearance on board must advise Lagoven at Puerto Ordaz, by radio as soon as they receive their orders to change destination. The following information must be given: Masters name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessels arrival. In absence of this information, vessels will be subject to a fine.

SAFETY: The following is a condensation of the safety precautions that should be observed when the vessel is alongside the dock:

(i) All passageway doors leading to the cargo deck areas are to be kept closed during cargo-loading operations.

(ii) Ship's firefighting equipment must be kept ready at all times while berthed at Lagoven dock.

(iii) Smoking or carrying lighted or unlighted pipes, cigars or cigarettes on the weather decks of the vessel, or on the dock, is strictly prohibited under all circumstances. Masters are requested to instruct their crew not to throw lighted cigars or cigarettes over the side or out of the portholes.

(iv) An efficient watch must be maintained on deck and in the engine-room on the vessel, and a sufficient number of men must be on board at all times to move the vessel any time, in case such is required.

(v) If the galley is located near oil-handling operations of any nature, the skylight lids should be kept down and secured to prevent the galley being sprayed with oil in the event of a burst hose.

(vi) Ventilators in the vicinity should be turned away from the scene of operation.

TUGS: The use of tugs is necessary in docking and undocking manoeuvres of boats at this Marine Terminal. Alcoa has a 2,100 h.p. tug available for this service. A tie-up launch will be provided to assist in the mooring of the vessel, and will handle all the mooring lines before and after loading.

LOADING: Monagas crude is the only cargo available at the Puerto Ordaz Terminal. This crude has an API gravity of 11.9° to 12.5° F. (6.490–6.517) U.S. barrels per long ton. This cargo must be heated to approximately 140° F. in order to attain normal discharge rates.

Loading is accomplished through 3×10-in. hoses provided with 10-in., 150 lb. ASA flanges. Hoisting gear is provided for handling the hoses. A dock crew will connect the cargo hoses and disconnect them on completion of loading. Some adapters and other tools are available on dock. The oil will be loaded at an elevated temperature.

Precautions, as are common for any heavy oil, should be taken to ensure that no ballast water is left in any tank to be filled with this oil. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lb. per 1,000 barrels for every 0.10% contamination by sea water.

All cargo compartments must be stripped dry. Cargo pipe-lines should be drained and/or purged of water.

There is no provision at the Puerto Ordaz Terminal for disposal of dirty ballast or tank washings. Tankers bound for Puerto Ordaz for loading must dispose of all dirty ballast and tank washings before entering the Orinoco River.

Prior to proceeding to sea, all butterworth plates, cargo tank hatch covers and ullage plugs should be inspected to ensure against entry of salt water.

FRESH WATER: Fresh water is available ex-barge; cable advice of 24 hours is required. Dry provisions may be obtained in very limited quantities.

FUEL: Bunker fuels are available at all hours from Astilleros Orinoco C.A., who operate a floating storage and blending facility in the Orinoco River. Bunker fuels may be received at Lagoven dry dock while loading crude. Fill cargoes can be made available.

TIME: GMT minus 4 hours.

MEDICAL: Medical assistance can usually be arranged, particularly in the case of an emergency.

REPAIRS: No major repair facilities are available. However, small repair jobs can be taken care of through local machine and electrical shops, and shore labour can be obtained if required.

AGENCY: Lagoven handles all papers and documentation connected with the ship's business. Lagoven will also help the ship's Master in providing required land transportation, limited provisions, or any other assistance that may be required for the operation of the ship's normal business. Alcoa will also assure that the ship's requirements are met in regard to Sanitary Inspection, Customs Inspection and Guardia Nacional.

PERTIGALETE: 10.15 N. 64.34 W.

LOCATION: Situated in a sheltered bay about 2 miles East of the port of Guanta, or about 4 miles from the pilotage zone situated in the North.

PILOTAGE: The pilotage zone in Pozuelos Bay is the same as for Guanta, i.e. an area situated between the islands of Borracha and Chimana, in the Bay of Pozuelos (formerly called Bergantin Bay).

From the pilotage zone for the port of Guanta/Puerto La Cruz, the private pier Pertigalete is to be approached by sailing between the Isla de Plata and the island of Cachicamo. Pilotage is compulsory in and out and is performed by well-trained government Pilots. The navigation is considered very safe.

MAX. SIZE: The depth of water for ocean-going vessels alongside the Pier is 20 ft. (shore side) to 40 ft. (sea side).

TUGS: Available from inward clearance port at Guanta/Puerto la Cruz.

BERTHING: The private pier in Pertigalete for berthing ocean-going vessels is up to 150 m. (492 ft.) long. The apron is ample and allows easy manoeuvre of trucks with cement. On the same pier the cement factory is regularly receiving raw material and machinery, but the berthing is along the West side of the pier for coastwise trade, so does not interfere with operations for ocean-going vessels. There are chutes, conveyor belts from the nearby silos, and a heavy crane.

TANKERS: Berth at private wharf at Pamatacualito, operated by Baroid de Venezuela SA.

Length of berth 113.60 m., depth alongside 10 m.

LOADING: The cement factory is able to deliver to the pier 2,000 to 2,300 bags per hour, to be loaded simultaneously into arrived vessels. According to experience load rate is about 300 bags per hour and gang by steam winches, and about 400 bags per hour and gang by electric or hydraulic winches.

STEVEDORES: Loading operations are performed exclusively by the personnel of the cement factory. Winchmen are also supplied by the cement factory. All costs, including overtime, are for account of the cement factory, inclusive of stowing and trimming the vessel.

Under normal conditions on Saturday afternoon there is no work, but almost without exception the cement factory works overtime on Saturdays if by doing so the vessel can be despatched that day. On holidays, if circumstances call for urgent operation, the cement factory has the option to work overtime. Work on Sunday is prohibited.

AUTHORITY: Private pier of C. A. Venezolana de Cementos and is under the jurisdiction of Customs and Harbour Master of Guanta/Puerto la Cruz, Eastern Venezuela. All charter business and general administration is covered by Caracas Headquarters of C.A. Venezolana de Cementos.

AGENTS: Head Office (Management and Control), Brokers Chartering and Tramp Agents, Victor H. Selinger, S.A., PO Box 1632, Caracas. 101. Cables: "Selvic" or "Seltank". Tel. (02) 81.02.71. Telex: 21402, 21934, 22859, 21631. Local Office: PO Box 4194 Puerto La Cruz. Tel. (081) 662107, 662665. Telex: 81340. Cables: Selvic Puertolacruz, Seltank Puertolacruz.

PUERTO CABELLO (inc. Barburata): 10.29 N. 68.07 W.

PILOTAGE: Pilotage is compulsory and vessels have to wait for Pilot in the pilotage zone, West and N.W. of the port entrance (S.W. of Punta Brava).

MAX. SIZE: Bulk Cargo Pier: up to 32 ft. draft. Inner Port: up to 28 ft. draft. Also see "Tankers".

TUGS: The use of tug-boats within the port is compulsory both for entering and leaving port, as well as for manoeuvres in the port basin, for foreign flag ships over 300 tons.

BERTHING: The port entrance is 100 m. wide in direction West to East. Berth No. 1 and half of Berth No. 2 are along the same entrance channel, where ships are berthed only as an exception or when the port is rather congested. The total length of the North (main) Pier for the berthing of ocean-going vessels is 1,025 m., room enough for 6 to 8 vessels. For administrative reasons the pier is divided into 8 berths of about 128 m. each. Between Berths No. 2 and 3, the pier is bent Southwards. Along the pier there are warehouses which under normal circumstances provide sufficient indoor space.

Along the East Pier, of 350 m. length, there are no warehouses. This pier gives berthing facilities to 3 or 4 middle-sized vessels.

Along the South Pier, of 500 m. length, there are 2 warehouses. This pier is exclusively used for coastwise shipping, fishery and small craft in general.

The dredged channel along the East Pier is only 80 m. wide. This is the only channel which connects the main basin of the port with the South basin of the port, the latter served through the South Pier.

BULK-HANDLING FACILITIES: 400 m. long new pier, designed exclusively for the handling of bulk cargoes.

This bulk cargo pier has an apron of about 25 m. and allows ships with a draft of 10 m. at any time.

Ships moored along this new pier are not able to take water there, but have to be shifted to the general cargo piers in the port of Puerto Cabello.

There is no telephone installation on the new pier.

Tug-boat service and assistance of Pilots is compulsory to negotiate the distance to and from the bulk cargo pier.

General cargo is not allowed to be handled at this pier. There are no cargo handling facilities whatsoever and no kind of rolling equipment either. All the vessels, unless they have up-to-date discharging equipment of their own, have to provide derricks of minimum 5 tons capacity to support the SKT discharging equipment of receivers. The cargo is discharged in bulk cargo trucks, fully closed and with only rather narrow manholes for the SKT arm.

The new grain terminal has been opened. The wharf is 400 m. long and allows 2 vessels to berth. Max. depth 30 ft. Average discharge rate 1500 tons per day.

TANKERS: *Borburata:* The Maroven Terminal lies about 2 miles East of the port entrance.

Berth No.	*Max. length*	*Max. beam*	*Max. draft*
1	400 ft.	—	20 ft.
2	575 ft.	72 ft.	31 ft.

No. 1 berth is used for bunkering only.

No. 2 berth is used for the discharge of refined products and bulk chemicals. It is fitted with 4×8-in. chiksans and a range of hoses form 4 to 8 in.

A Pilot is compulsory, and boards at Puerto Cabello. If the vessel is cleared outwards at Borburata, the Pilot may return to the pilot station by road.

Berthing and unberthing in daylight only.

Lagoven Terminal: The buoy mooring is used for the discharge of petroleum products. Max. length 198 m. Max. beam 28 m. Max. draft 34 ft., will be increased to 38 ft. in 1979. Max. Tonnage 40,000 d.w.t. Vessels berth using 5 shackles on the port anchor, and 6 stern lines to 3 mooring buoys.

Terminal Marino Holanda: Consists of 3 buoys situated in a depth of 45 ft. near Guaguaza Lighthouse. Used for loading/discharge of Chemicals.

STEVEDORES: *Straight time:* Monday to Friday: 0700–1100 hrs. and 1300 to 1700 hrs.

Overtime: Monday to Friday: 1800 to 2300 hrs. Normally overtime beyond 2300 hours is not permitted.

Relief Gangs: Obtainable, if there are not too many ships working in the port at a time, for the hours from 1100 to 1300 and 1700 to 1800.

Work on Sunday: Not permitted except for passenger vessels, and considered as such are those carrying more than 60 passengers, and with a medical doctor on board.

Saturday afternoon work: Not permitted. But if a vessel can terminate operation and sail with a maximum of 3 additional hours' work, a special permit can be obtained from Customs and Port Authorities. In such case, the additional working hours are considered straight time work.

FRESH WATER: Water is supplied through pipe-line on the pier, day or night.

For night work, a special gratuity to watermen is customary.

The drinking water in Puerto Cabello is tropical treated, well-filtered and wholesome.

Every vessel of over 600 tons net calling at Puerto Cabello, and other ports in Venezuela, should arrange to take water only at Puerto Cabello in order to avoid double water dues.

OPENING/CLOSING HATCHES: Is not performed by the National Port Services, but instead either the ship's crew or hired assistance labour must be used. Recommended that ship's crew open and close hatches.

REPAIRS: The adjacent Naval Yard, the entrance to which is within the main ports, opposite the North Pier, is equipped for minor repairs both on engine and hull. For emergency purposes, the dry dock could be used. Its capacity is for ships up to 30,000 to 35,000 tons. All repairs on the hull are effected by a special crew transferred from the Naval Yard.

At the dry dock there is 1 crane of 15 tons capacity. Within the Naval Yard there are 2 slipways for ships of 125 ft. max. and 210 ft. length max. respectively.

Venezuelan Navy ships always have priority.

AGENTS: Head Office (Direction and Control). Brokers, Chartering and Tramp Agents, Victor H. Selinger, S.A., PO Box 1632, Caracas, 101 Venezuela. Cables: "Selvic" or "Seltank" Tel. (02) 81.02.71. Telex: 21402, 22859, 21631, 21934. Local Office, PO Box 108, Puerto Cabello. Tel. (042) 2866, (042) 3088. Cables: "Selvic Puertocabello" or "Seltank Puertocabello". Telex: 42431.

PUERTO DE HIERRO: 10.38 N. 62.05 W.

DOCUMENTS:

Last Port Venezuelan Consulate Clearance.
6 Crew Lists.
6 Passenger Lists.
6 Stores Lists.
6 Narcotic Drugs Lists.
2 Health Declarations (forms provided and filled by doctor on arrival).
Smallpox Vaccination Certificates of Crew.
Derat Certificate.

PILOTAGE: Pilot boards at sea buoy 10° 37′ N., 62° 06′ W. If no pilot boat meets vessel on arrival, ship must anchor to wait orders. Send 72, 48 and 24 hour ETAs to cable address "Transterm Guiria". Vessels should anchor in the vicinity of sea buoy. No radio-telephone available.

ANCHORAGE: Vicinity of sea buoy. Good holding ground.

RESTRICTIONS: Vessels may have to wait at anchorage until slack water for docking when tide/current is strong.

MAX. SIZE: Dock, East berth: 30 ft. at low water 33 ft. at high water 690 ft. length, 90 ft. beam. Dock, West berth: 19 ft. at low water, 32 ft. at low water. 600 ft. length, 60 ft. beam. Also see "Berthing".

HEALTH: Doctor boards at berth and grants pratique. Any suspected disease or fever to be reported at that time. Vessels arriving from a Venezuelan port do not require pratique.

RADIO: La Guaira, Venezuela.

TUGS: None available.

BERTHING: Berthing at times limited to slack water period depending on strength of tides. Pilot will advise.

Bauxite Terminal: Max. draft 37 ft. Depth alongside 40 ft. Max. d.w.t. 40,000 tons. Loading rate 3,000 t.p.h.

STEVEDORES: Bulk cargoes: discharging rate 700/800 t.p.h., loading rate 800/1,000 t.p.h. No facilities available for handling general cargo.

MEDICAL: No notice required. Venezuelan Navy Hospital with limited medical assistance.

TANKERS: No oil carriers.

DENSITY: Low water – 1020. High water– 1023.

FRESH WATER: Available in limited quantities at berth. Rate of delivery 30 t.p.h.

FUEL: In an emergency. Diesel fuel medium, specific gravity at 60° F. 0.85, API gravity at 60° F. 35, viscosity SSU at 100° F. 37, viscosity engler at 20° C. 1.40.

DEVELOPMENTS: Possibility of increasing draft to 42 ft. at loading berth, and to 30 ft. at discharging berth.

CUSTOMS ALLOWANCES: 2 cartons of 200 cigarettes each or equivalent in tobacco. Two 0.75 litre bottles.

IDENTIFICATION CARDS: Issued locally by Navy on arrival.

REPAIRS: None. Small company workshop.

CONSULS: None.

AIRPORT: Nearest airport (1 hour voyage on launch) is Guiria with 2 weekly flights to Caracas and the same number to Port of Spain, Trinidad. Next nearest (1 hour launch plus 2 hours car) is Carupano with 4 daily flights to Caracas.

TIME: GMT minus 4 hours. Permanent.

HOLIDAYS: Cargo worked 24 hours a day, 365 days a year.

GENERAL: The whole of Puerto de Hierro is a Venezuelan Navy Supply Base. The dock and cargo installations are operated by Puerto de Hierro, S.A., a subsidiary of Caribbean Steamship Company, S.A. Only bulk cargoes transhipped by Caribbean Steamship are handled.

AUTHORITY: Puerto de Hierro, S.A.

PUERTO LA CRUZ, (Puerto La Cruz Terminal): 10.13 N. 64.38 W. (See Plan Book)

OPERATORS: S. A. Meneven. Postal Address, Apartado 4064, Puerto La Cruz, Venezuela. Radio Address, Meneven, Puerto La Cruz. (Venezuela). Telex: 81147 Meneven.

FLAG: Venezuelan flag must be displayed from the foremast when entering zone as well as in docking operations regardless of the hour. At all other times the Venezuelan flag must be displayed between sunrise and sunset.

LOCATION: Puerto La Cruz located on Pozuelos Bay on the N.E. coast of Venezuela. Its harbour is well protected by numerous islands against sea currents. The hurricane path is several hundred miles to the North and has never affected the flow of navigation in the Puerto La Cruz area.

The lighthouse marking the entrance to Pozuelos Bay is located: Lat. 10° 18′ 18″ N., Long. 64° 41′ 7″ W. Visibility is 20 miles.

DOCUMENTS: Arrival clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company. The following documents are required:

1. Ship's Register.
2. Dispatch issued by Venezuelan Consul at last port (1 copy).
3. Ballast Manifest (1 copy).
4. Crew List (6 copies).
5. Passenger and Baggage List, if any (5 copies).
6. List of Passengers in Transit, if any (5 copies).
7. List of Personal Effects (4 copies).
8. Store List (5 copies).
9. List of Slop Chests (4 copies).
10. Sailing Permit issued by Marine Authority at last port of call.

*Store List should indicate separately all deck, engine and cabin stores.

PILOTAGE: The use of Government Pilots is compulsory for all vessels entering or leaving territorial waters. The Company will arrange for this service at all times. If it becomes necessary for the Master of the vessel to disregard Pilot's orders in order to ensure safety of the ship a written report from the Master shall be submitted promptly to the Government Port Captain in Spanish. Meneven will assist in translation, when necessary.

The zone for Pilot to board or to anchor awaiting Pilot is delineated by the following 3 lines: South by parallel 10° 15′ N., East by meridian 64° 40′ W., and West by an imaginary line from Punta Puinare on Isla Chimana del Oeste to the North point of Morro de Barcelona.

When ready to dock, a Pilot will be despatched by launch to ship.

MAX. SIZE: No limitation is placed on width of tankers. Ships up to 1,000 ft. in length can be turned around in the inner harbour area. Max. safe draft alongside (berth No. 5) is 55 ft. (Also see "Berthing".)

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

Ships cleared between the hours of 1700–0800. Mondays through Fridays and all day Saturday, Sundays and holidays are charged by Immigration Service for the issuance of shore leave passes. There is no charge for this service from 0800–1700 hrs. Mondays through Fridays. Transportation and immigration clearance fees on movement of seamen are billed at cost.

RADIO: Masters are requested to advise Meneven Puerto La Cruz by radio 48 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship. Vessels may contact the terminal by radio-telephone on 2182 kc/s. and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channel 13.

Ship-to-shore radios are installed on the oil dock and on both tugs. A 350-watt AM transmitter-receiver is monitored 24 hours a day.

TUGS: 2-tug service is compulsory by law in this port. The Company has available a first-class diesel-electric tug of 1,600 h.p. and a contract tug of 2,100 h.p.

Tug assistance is charged as follows for each tug per manoeuvre according to the following deadweight scale – as published in the "Tanker Register" by H. Clarkson of London.

1 – 20,000 d.w.t.	– Bs. 2,450
20,001 – 30,000 d.w.t.	– Bs. 2,870
30,001 – 40,000 d.w.t.	– Bs. 3,300
40,001 – 50,000 d.w.t.	– Bs. 3,750
50,001 d.w.t. upwards	– Bs. 4,200

BERTHING: The loading facilities consist of 6 berths. Products available and safe draft are as follows:

	Berth 1	*2*	*3*	*4*	*5*	*6*
Crudes	×	×	×	×	×	×
Heavy fuel oil					×	×
Refined products			×	×		
LPG		×	×			
Bunker "C" fuel	×	×	×	×	×	
Diesel fuel	×	×	×	×	×	×
Intermediate fuels	×	×	×	×	×	
Fresh water	×	×	×	×	×	×
Max. safe draft (ft.)	38	38	38	38	55	39.5
Max. d.w.t. (thous.)	45	45	45	45	110	55

*El Chaure Terminal – Now Pier No. 6 – is actually out of service for repairs. The Terminal is expected to be back in service by January 1979 as a renewed installation. Also see "El Chaure".

Upon arrival at dock the following rules must be observed:

(*a*) Masters must ensure that mooring lines are properly tended during the discharge of ballast and loading of cargo, and that sufficient personnel is on board at all times to handle same. Discharging or loading will be temporarily suspended upon infringement of this regulation.

(*b*) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore hoses by company personnel. Vessels using berth No. 5 are also requested to have their derrick and gangway ready for use.

Note: Vessels normally dock with starboard side to dock, unless otherwise advised.

(*c*) While docked, discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(*d*) Rat-guards must be placed on all ropes connected with the shore.

(*e*) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(*f*) Meals must be provided in officers' mess-room for Venezuelan National Guard personnel who may be assigned to the vessel during stay in port.

LOADING: After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions as to grade or grades of cargo, loading rates, information on size of hoses and lines, and other information pertinent to the loading of the vessel.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo, hoses are normally displaced with air at controlled rates prior to disconnecting. If the ship's officers request that the alternate procedure of draining hoses be effected, shore personnel will be happy to comply provided the following steps are observed by ship's officers:

1. Advice be received prior to termination of loading cargo.
2. Ship's receptacles be situated to receive oil drained on board. It should be noted that heavy fines are imposed for spills or overflows which contaminate the bay.

Shortly after completion of loading company personnel will take ship's ullages and, later, deliver cargo and sailing papers to an officer of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage if the berth is needed for another vessel. The Dock Supervisor on duty will advise ship's officer of this matter.

BALLAST: Although climatic conditions in Puerto La Cruz are relatively mild, vessels should arrive with sufficient ballast to permit safe handling. Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast in territorial waters. All ballast must be pumped ashore with the exception of vessels especially equipped with clean segregated systems which are reserved for ballast only. Vessels so equipped will be permitted to pump overboard after first being inspected and approved by shore personnel. Heavy fines are imposed for pollution of waters and industrial fishermen are quick to report any infringement. Max. discharge pressure to shore installations is 90 p.s.i. through the 16 in. line which dumps into ballast lakes approximately 300 m. South of dock.

No vessel will be allowed to discharge ballast if last previous cargo was sower crude and/or could result in unpleasantness to area inhabitants.

FRESH WATER: Fresh chlorinated water is available at an average rate of approximately 10 t.p.h. Total volume of water that can be supplied during the normal period alongside averages about 150 tons. As water is not held in special reserve for vessels requirements but supplied from terminal water system, availability may be limited dependent on time of year and other conditions.

FUEL: The terminal is not a general bunker station. Only ships loading petroleum may take bunkers.

Bunker "C", heavy diesel fuel and complete range of intermediate fuels are available in quantity. Delivery rates to the ships are approximately as follows: Bunker "C", 200 t.p.h.; heavy diesel, 150 t.p.h.; intermediate fuels, 150 t.p.h.

Bunkers are delivered concurrent with the cargo and should be taken as soon as clearance is granted.

Meters are installed on all bunker systems and are calibrated in net barrels.

The dock valves on the bunker lines will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

CUSTOMS: Crew members should be warned against taking knives or other lethal weapons ashore, as this is strictly prohibited. All firearms and ammunition must be noted on stores list. They cannot exceed 1 per officer and 18 cartridges per gun. No arms may be carried while ship is in Venezuelan waters or tied up at dock. Contraband of any description will be confiscated. Each man is allowed 1 package of cigarettes on his person and this package must be opened. No liquor is to be taken ashore. It is prohibited to carry liquor from shore to ship without authorisation from captain of vessel. It is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. However, upon written request to the National Guard contingent on the oil dock, special permission may be obtained. This is subject to 2 limitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

IDENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent. Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Norway
Sweden
The Netherlands
Dominican Rep.

Vessel's Agent should be appraised of vessel's consular requirements promptly upon docking.

REPAIRS: Request for repair work by local contractors must be accompanied by a written request from the Master of the vessel.

REPATRIATION: Seamen discharged from hospital for transfer to another port, seamen arriving from another port or those being repatriated are handled by the vessel's Agent, who must comply with all Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation. Venezuelan regulations, at all times hold the vessel responsible for a seaman during his stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

TIME: GMT minus 4 hours. Permanent.

REGULATIONS:

Excessive Smoke. It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's docks. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. Vessel's discharge of ballast or loading of crude or products will be immediately shut down.
2. Vessel will be subject to fine from authorities.
3. Vessel may be removed from dock.
4. Owners will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution. Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries exempted from Arqueo compliance and payment of fees: Denmark, England, France, Germany, Netherlands, Ireland, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL:

Charts. No charts or sailing documents are available in the terminal. Same should be forwarded by airmail to the vessel's Agent for delivery to the ship.

All ship requirements such as chandlery supplies, mail, cash advances, medical, dental, consular requirements, repair work, laundry service, bonded stores, transportation etc. should be obtained through the vessel's Agent.

PETROLEUM INSPECTORS: E. W. Saybolt Company, Chas. Martin & Company, Aivepet and Redwood have resident representatives in Puerto La Cruz for independent petroleum or product inspections. Their offices are located in the dock office building located between berths Nos. 1 and 2 (second floor).

TELEPHONES: There is a telephone booth on each dock. The supervisor on duty may be contacted by calling number 308 or 906.

SHIPMASTER'S REPORT: February 1979.

Documents:

3 Copies of list of passengers or nil passengers.

3 copies of a letter by Master stating that vessel was diverted after sailing from previous port and explaining why clearance destination is wrong.

3 copies of cable ordering diversion.

Anchorages: Good holding ground in N.W. part of anchorage area, thick mud.

Restrictions: Maximum height of manifold about 18.95 m. so necessary for vessels of 140,000 d.w.t. to load some cargo before completion of ballast.

Max. Size: If draft less than 30 ft. on arrival vessel can approach berth direct from West, and use 2 tugs. If more than 30 ft. draft then vessel must use channel to the North of berth and 3 or 4 tugs. This for vessels of 140,000 d.w.t.

VHF: Tankers call "Meneven" on Channel 16, then change to Channel 12 or 13. Also call Agents on Channel 16.

Berthing: Back springs to bollards on jetty. Breasts and heads and stern lines to hooks on dolphins. These hooks are secured to bollards by wire of circumference 19 cm. or diameter 6 cm.

Consuls: No U.S. Consul available and Agents will give Master letter to this effect for U.S. Immigration.

General: Ballast, if clean, may be pumped overside. If dirty, advise Meneven prior to arrival of quantities to be pumped ashore. They will also accept slops if not sour crude or smelling too badly.

Notice to Shipmasters:

We wish to advise the Masters of all vessels calling at this port that it is strictly prohibited to take photographs.

It is likewise contrary to regulations to carry ashore a camera. Same is liable to be confiscated by the Government Authorities.

Signed S. A. Meneven.

AGENCY:

All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

S.A. Meneven as operator of the Terminal charges a fixed fee of Bs. 2,000 for General Services such as supervising the docking and undocking manoeuvres, hose connections, loading and documents required by the cargo buyers or consignee. Handling of Telexes, documents and airpostage will be charged at cost.

Offices of Meneven loading and marine personnel are located on the first floor of the building between berths Nos. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours of every day. On the ground floor of this same building is located the Documentation Section.

PUNTA CARDON: 11.36 N. 70.15 W.

PORT LIMITS: The area enclosed by the parallels of 11° 38′ 00″ N. and 11° 36′ 38″ N. and the meridian of 70° 14′ 25″ W.

OPERATORS: Maraven, S.A.

FLAG: It is compulsory to display a Venezuelan flag at the foremast starboard yardarm during daylight hours for ships anchored or berthed in Venezuelan waters. The ships Services will provide a Venezuelan flag at any time for ship's account.

LOCATION: The port of Punta Cardon is located on the Gulf of Venezuela, on S.W. coast of Paraguana a Peninsula, Venezuela. Punta Cardon is an open sea port with practically no swell, due to the Easterly winds prevailing almost all year from the shore side.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Punta Cardon.

2. If a ship, originally cleared for another port (including any other Venezuelan port) is diverted at sea to Punta Cardon, certain information must be radioed prior to arrival in order to avoid heavy fine(s) and/or delays.

3. No dirty ballast may be pumped overside in port in Venezuelan coastal waters. Ballast disposal facilities are available at Punta Cardon Terminal.

4. The use of Venezuelan Government Pilots is compulsory for berthing and unberthing.

5. In addition to other clearance documents, 5 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.

6. The emergency fire signal is 5 long blasts on the ship's whistle or siren. No other signal is to be given in cases of emergency.

7. Rat-guards must be placed on all mooring lines.

DOCUMENTS: Clearance (inward pratique). Inward clearance is effected on board by Government Port and Customs Officials and a representative of the Oil Movements Department immediately after berthing. The following documents must be ready on arrival:

(1) In ballast:

*(a) Clearance from Last Port (1 copy).
*(b) Ballast Manifest from Last Port (1 copy).
(c) Crew List (7 copies).
(d) Steward's Store List (all foodstuff, liquors, tobacco, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
(e) Deck and Engine Stores and Spare Parts List (paints, varnishes, chains, ropes, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
(f) Medicine Chest Lists (including narcotics accurately itemised) (5 copies).
(g) Slop Chest Lists (5 copies).
(h) Personal Effects Lists (4 copies).
(i) Sailing Permit (issued by Maritime Authority at Last Port of call) (1 copy).
(j) Passenger and Baggage Lists (if any) (2 copies).
(k) List of Passengers in transit (if any) (4 copies).

* Documents marked with asterisk are to be visaed by Venezuelan Consular Authorities at the last port of call.

In the absence of a Venezuelan Consul the documents must be visaed by the Consul of a friendly nation, or by the Local Chamber of Commerce, or by 2 local reputable businessmen, whose signatures shall be notarised.

In the absence of a Venezuelan Consul the following notation should be written in Spanish on each document signed by the alternates designated above.

"Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento".
(Signature)

(2) Both the Steward's Store List, the Deck and Engine Stores and Spare Parts List may be prepared on board prior to the vessel's arrival. However, if the vessel is dispatched from the colonial Antilles or Guianas, these lists as well as the personal Effects List must be visaed by the Venezuelan Consul at the port of departure. The Steward's Stores List must be comprehensive and accurate, especially with regard to cigarettes and liquor. All new clothing, gift, souvenirs, etc. are to be clearly marked. All personal effects of the crew are to be collected and placed in the Bonded Stores Locker, ready for sealing by the Customs Authorities on arrival.

Although vessels proceed directly to Punta Cardon, clearance documents should be made out showing the port as "Las Piedras, Paraguana (Punta Cardon)". Failure to comply with this requirement may result in fines up to a max. of U.S. $600.00.

(3) Clearance documents out-bound: Outward clearance and cargo documents are delivered on board by the Ships Services Representative.

In the event that the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents and clearance.

PILOTAGE: Pilots are employees of Venezuelan Government and pilotage is compulsory for vessels entering or leaving harbour. The Ships Services Office will arrange for this service at any time. If it becomes necessary for Master of the vessel to disregard Pilot's orders in order to ensure safety to the ship, the Master must promptly submit a written report to the Harbour Master on the matter, via the Ships Services Representative, stating reason for this action.

Pilots sustaining injuries: It is compulsory to submit a full report in cases where a Pilot is injured while performing duties on board vessels.

ANCHORAGE: The anchorage at Cardon roads within a radius of 2 miles from end of jetties has depths varying from 54 to 100 ft. (LWS) and a bottom consisting of mud with some patches of small stones, sand and shells. There are no known obstructions from West to N.W. of the Piers and there is ample water for a clear approach when coming from West and N.W., but the anchorage is limited on the South by a sandspit projecting 1 mile S.W. off Punta Cardon Cape. A beacon is located on this Sandspit in position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W. Fl.R. ev. 1 sec. 17 ft. 5 miles (U).

APPROACHES: Restricted Fishing Area. Masters when approaching coast should keep a particularly sharp lookout for fishing boats, nets and small craft.

Mechanically propelled vessels drawing more than 5 ft. are prohibited from navigating in the restricted fishing area that extends off Paraguana Peninsular from Punta Macolla, Lat. 12° 5′ 32″ N., Long. 7° 12′ 55″ W. to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the position indicated below:

(*a*) Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.
(*b*) Lat. 12° 03′ 15″ N., Long. 70° 19′ 23″ W.
(*c*) Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

Leading Lines

	Position			*Height in Metres*
Jetty	*Latitude N.*	*Longitude W.*	*Colour*	*(LWS)*
I	11° 37′ 19.2″	70° 13′ 54.6″	Green	4.70
	11° 37′ 23.1″	70° 13′ 47.6″	Green	14.20

	11° 37′ 09.1″	70° 13′ 50.6″	White	14.94
IV	11° 37′ 41.9″	70° 14′ 12.0″	Blue	5.10
	11° 37′ 42.4″	70° 14′ 09.4″	Blue	21.54

Land Marks

2 radio towers, very conspicuous, with micro-wave antenna at the middle painted in aluminium white, in position, Lat. 11° 38′ 03″ N.,lbong. 70° 13′ 56.2″ W. Height 205 ft. (62.5 m.).

Navigation aids

A light is located on the outer radio tower.

Position: Lat. 11° 38′ 03″ N., Long. 70° 13′ 56.2″ W.

Characteristics: Fl. White and Red, ev. 10 sec. Height 205 ft. (62.5 m.) 21 miles (U).

Sectors: Red 340° – 009°, White 009° – 009°, Eclipse 202° – 340°. (All bearings are true from seaward).

Beacon: Located on sandspit of Punta Cardon.

Position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W.

Characteristics: Fl. Red. ev. 1 sec. Height 17 ft. (5.2 m.) 5 miles (U).

2 large chimneys are very conspicuous in the Refinery Area. The North chimney is situated Lat. 11° 37′ 54.6″ N., Long. 70° 13′ 10.8″ W. Height above MLWS 399.6 ft. (121.8 m). The South chimney is situated Lat. 11° 37′ 52.9″ N., Long. 70° 13′ 09.8″ W. Height above MLWS 396.3 ft. (120.8 m.). For daylight distinguishing marks, both are painted with broad red and white bands and at night both have a string of all round fixed red lights at the top and the same at the middle height.

A steel tower. A commercial radio tower is situated outside the Refinery Area in position: Lat. 11° 36′ 29″ N., Long. 70° 13′ 42″ W. Height above MLWS 164.7 ft. (50.2 m.). This is not very visible during the day, but at night it has at the top, flashing every second, an all round Red Light, visible at 12 miles.

MAX. SIZE:

	Jetty/Berth		*Depth LWS*	*Draft*	*Length in feet*	*Displac. in tons*
No. 1	North Outer	(3)	42′ 00″	39′ 06″	710	25,000
	South Outer	(4)	42′ 06″	40′ 00″	710	25,000
	North Inner	(1)	31′ 06″	30′ 00″	575	25,000
	South Inner	(2)	32′ 06″	31′ 00″	575	25,000
No. 2	North Outer	(3)	43′ 00″	40′ 06″	710	25,000
	South Outer	(4)	41′ 06″	39′ 00″	710	25,000

	South Outer	(4)	48′ 00″	45′ 06″	900	62,000
No. 4	North Outer	(3)	47′ 06″	45′ 00″	900	54,000
	South Outer	(4)	47′ 06″	45′ 00″	900	54,000

TUGS: 2 tugs of 1,200 h.p. and 1,600 h.p. respectively are available, and their assistance is compulsory for berthing. Number, disposition and manoeuvres of tugboats are directed by the Pilot. The following tug signals in practice in this port are listed below for Master's guidance:

Short blasts are used to give orders to the tug situated ahead.

Short blasts are used to give orders to the tug situated ahead.

Long blasts are used to give orders to the tug situated aft.

1 blast means *push* tug engine, ahead (if it is stopped); *stop* tug engine, stop (if it is moving).

2 blasts, *pull* tug engine, astern.

1 long, 1 short, 1 long and 1 short whistle, "Calling tugs"

2 long and 2 short whistles, "Tugs Dismissed".

RADIO: Arrival messages (ETA). Master of vessels bound for or diverted to Cardon are requested to radio the following information to "Maraven. Caracas" via "La Guaira Radio", call sign YVG, 72 hours in advance of estimated arrival, or as soon as possible.

(*a*) Name of vessel
(*b*) Flag
(*c*) ETA
(*d*) Last Port.
(*e*) Master's name
(*f*) Number of crew and passengers
(*g*) Port for which the vessel is cleared
(*h*) Quantity of clean ballast on board
(*i*) All requirements

This information is of the utmost importance to the Harbour Authorities in facilitating the entry of vessels in general, and in case of diversion.

VHF Radio Telephony. The radio and communication centre is located in the Oil Movements Office Building situated at the foot of No. 2 Pier at a height of 50 ft. above sea level. The roof of the building is painted black and the word "Marine" painted across in large white letters.

There is a RT set operating 24 hours a day on the following frequencies, and manned by English speaking operators:

156.6 mc/sec.FM	VHF	(Channel 12)	Range limit	25	miles
156.8 mc/sec.FM	VHF	(Channel 16)	,, ,,	25	,,
2120 kc/sec. AM	HF		,, ,,	150	,,
2182 kc/sec. AM	HF	(Channel 1)	,, ,,	150	,,
7620 kc/sec. (SSB)	HF	(Channel 3)	,, ,,	300	,,

Call sign: "Marine Cardon"

Vessels not equipped with radio telephone may call the installation by signal lamp (Aldis lamp) whereupon the service launch will be sent out to vessel to pick up any message it may have.

BERTHING: Without exception ships always moor head-in on all berths. It is considered prudent to have the outboard anchor hove out prior to approaching piers to facilitate speedy release while docking if necessary. Vessels are to be moored to satisfaction of the Port Services Superintendent or his deputy; mooring lines must be tended regularly and kept hove taut to prevent surging and possible damage to ships, docks or hoses. When adjusting mooring lines, the assistance of harbour tugs should be requested before slackening off any mooring line.

BALLAST: It is suggested that vessels nominated to load at this installation arrive with the minimum of ballast on board, necessary for the safe handling of the vessel under normal conditions. In this connection experience has shown that, under normal weather conditions, vessels can be safely berthed and unberthed with a quantity of ballast of approximately 20% of their respective Summer deadweights. Clean ballast can be pumped into the sea, but Masters are reminded that pollution of the sea incurs heavy fines. Dirty ballast can be received ashore. Maximum discharge pressure to shore installation is 150 p.s.i. in the 20 in. ballast line of Jetty No. 2; Jetties Nos. 4 and 1 have a 24 in. ballast line, and Jetty No. 3 has a 16 in. line. Masters are requested to endeavour to arrive at this port with 20% SDW ballast.

MEDICAL: Facilities are available for medical and dental treatment, vaccination and hospitalisation in a private clinic.

The doctor's working hours for out-patient treatment are as follows: Monday to Friday, 0900 to 1100 hrs., 1400 to 1700 hrs. Saturdays, Sundays and holidays, only urgent cases will be attended to.

Emergency cases will be attended to at all times.

Masters requiring medical or dental service or vaccination for their crew members should call Ships Services by dialling 2105. Our representative will make the necessary arrangements with the clinic and arrange for transportation to pick up the crew members on the pier and to take them to the clinic and back. Any crew member who is sent ashore for medical or dental treatment, and who does not speak English or Spanish, must be accompanied by a crew member who speaks one of these languages.

Doctors do not attend patients on board. In serious cases where the patient is unable to walk an ambulance will be provided to take him to the hospital.

FRESH WATER: Fresh water is available at all berths. Loading rate is 30 t.p.h.

CUSTOMS: Venezuelan National Guards are stationed at the piers to ensure that vessels in port comply with regulations.

1. *Smuggling.* Strict compliance with the Customs laws of the country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle ashore cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried but a greater quantity will result in the imprisonment of the offender with possible heavy fines and delay to the vessel.

2. *Bar.* On Customs Authorities instructions vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep the bar closed during the vessel's stay in port.

3. *Firearms.* Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be declared on stores list. Officers must not carry firearms while ship is in Venezuelan waters. Said arms should be collected together with the ammunition and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore as these will be confiscated and the bearer fined.

CONSULS: Brazil, Great Britain, Italy, the Netherlands and Norway have Consular representatives in this area.

TIME: Local time is GMT minus 4 hours.

CERTIFICATES: All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on size and tonnage of vessel.

It is usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans, which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to ship's Owners.

Vessels registered in following countries are exempt from above regulations, due to existing reciprocal agreement with Venezuela:

U.S.A., Great Britain, Denmark, France, Germany, Netherlands, Ireland, Sweden, Norway, Portugal.

The Venezuelan Tonnage Certificate is used in calculating Venezuelan Government Port charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

HOLIDAYS: By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following national holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

REPAIRS: Shore facilities are available for emergency repairs of a minor nature. The nearest dry docks are located at Puerto Cabello and Curacao, N.A. Request for repairs should be mentioned in the ship's ETA message.

SHORE LEAVE: Shore leave is permitted and Harbour Master's representative who boards vessel on arrival issues the required number of shore passes. These passes must be shown when proceeding ashore to the Government and Company Guards at the gangway and refinery gates. They are to be collected by Master prior to sailing and handed to Pilot unberthing the vessel. Masters are reminded that in accordance with the instructions of local police, crew members be properly dressed before leaving the vessel, i.e. long trousers and shirts.

Masters are requested to have shore leave expire at least 2 hours before expected departure. Men then found missing should be reported to the Ships Services Office, tel. 2105, who will endeavour to locate them. An officer must accompany shore personnel in order to identify the missing crew member.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or previously signed off by the Master through the Ships Services representative. If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the Ships Service representative, as well as written instructions as to his repatriation, when found. All costs and expenses of a crew member so left behind will be for ship's account.

GENERAL:

1. *Animals:* The importation and transit of all birds belonging to the genus parrot or parakeet is prohibited. For other birds a valid health certificate is required. For so-called "small animals" e.g. dogs, cats, monkeys, rabbits, etc. a valid health certificate and a valid rabies vaccination certificate are required.

2. *Bonded Stores:* Stores in bond are not obtainable in Punta Cardon. The nearest port with bonded stores facilities is Curacao.

3. *Board of Trade Gangway;* A safe gangway must be provided by the vessel and should be rigged as soon as possible after mooring to allow the Port Authorities to board, and should not be taken in until Pilot has boarded to unmoor vessel. The use of rung ladders, pilot ladders, etc. is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

4. *Damage during Manoeuvres;* When a vessel or the pier sustains damage during manoeuvres with an official Pilot on board, it is the responsibility of the Master to submit to the Ships Services representatives, immediately after the accident, a report in quintuplicate, for presentation to the Harbour Master. Such reports should give full details of the accident and of all engine movements as ordered by the Pilot, as well as a sketch in triplicate of the ship's manoeuvring position at the time. These will be translated by the Agents into Spanish and forwarded to the Harbour Master.

5. *Cash Advance to Masters:* Cash advances to Masters are made only in Venezuelan currency, which is the Bolivar. Cash requirements should be included in the vessel's ETA message. Foreign currencies are accepted in the United Seamen's Service Club.

6. *Rat-guards:* By order of the Port Authorities rat-guards must be fitted to all mooring lines. Non compliance entails a fine of 200 bolivares for each unguarded line.

7. *Kerosene, Motor Gasoline, Gas-Oil, Solvents:* Supplies for ship's purposes are available in drums. The return of empty drums ashore is prohibited by Customs regulations. Therefore the cost of each drum will be billed to the vessel in the Port Disbursement Account.

8. *Lubricants, Oils and Greases:* Supplies of products are available. Vessels arriving at Punta Cardon on Saturday or Sunday or on a holiday should give ample notice of their requirements by cable in order that the necessary labour arrangements for delivery can be made. This procedure also applies to the delivery of white oils mentioned under 7 above, when required outside working days.

9. *Laundry Service:* Laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

10. *Wireless Transmitters in Port:* It is strictly prohibited to use vessel's wireless transmitters in the Port of Cardon. Non-compliance with this regulation may result in a fine being imposed on the vessel by the authorities.

11. *Mail:* On vessels' arrival, blank Mail List Forms will be handed to the Master to be completed in sextuplicate and duly signed by him, when sending ship's and crew mail ashore for posting. Ship's mail received after ship has sailed, or for vessels on which no advice has been received, will be held for 15 days and then returned by airmail to the owners or operators or senders, at ship's expense unless specific instructions have been received beforehand.

12. *Marine Surveyors:* Both the Lloyd's Agents at Maracaibo and Norske Veritas at Caracas have a representative in Punta Cardon who acts on their behalf when a surveyor is requested. However, in the case of continuous or classification surveys, advance notice of 4 days should be given in order to arrange for an appointed surveyor to come from Caracas. There is also a representative of the American Bureau of Shipping in this area (Caracas).

13. *Miramar Club:* Masters, chief engineers and their wives can visit the Miramar Club. For this purpose entrance passes should be requested from the Ships Services Office, tel. 2105.

14. *Manaure Bathing Beach:* The above mentioned bathing beach is open to all ship's staff and crew members.

15. *Norwegian Government Seamen Service:* A Norwegian Vice Consul and Welfare Officer is stationed at Punta Cardon, and provides the usual services to seamen of this nationality. His telephone number is 4359.

16. *Navigation Charts:* Navigation charts are not available at this port.

17. *Passengers;* Movement of passengers over Cardon Piers is subject to restriction under terms of agreement with the government. Passengers will not be permitted to disembark unless in possession of the required Venezuelan visa and travel documents. If passengers are carried, Master should so advise in his radio ETA so that arrangements can be made for Immigration Authorities to visit vessel on arrival and thus facilitate clearance.

18. *Petroleum Inspection:* Charles Martin & Co., and E. W. Saybolt, petroleum inspectors, are available in this area. Contact can be made through the Loading Supervisor (tel. 2821).

19. *Personnel – Seamen Left Ashore:* In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reasons, all documents and personal effects are to be handed to the Oil Movement Department's representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seaman, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, or Owner responsible for any seaman left behind in Venezuela.

20. *Photographing:* The taking of photographs within the boundary fence of the Cardon Refinery is prohibited. Taking cameras ashore is likewise prohibited.

21. *Provision and Stores;* Provisions and stores are available. Requisitions should be conducted through the Ships Services Office. Telephone number 2105 or the Ships Services representative when he calls on board with the authorities on arrival. Ships chandlers are not permitted to visit ships, unless specifically instructed to do so by the Agents.

22. *Radar and Radio Repairs:* Repair and maintenance services for radar, radio, gyro compass, radio direction finder, echo sounder, etc. are available. The repair man should be contacted through the Ships Services Office, telephone number 2105.

23. *Safety of Personnel:* It will be appreciated that persons intoxicated by alcoholic drinks can create risks of accidents; therefore we ask the Master's co-operation to ensure that these persons do not enter the refinery gates and/or board their vessel unless accompanied by sober members of their crew. In this connection we will advise the Master or one of his officers, so that measures can be taken to ensure the safety of the forementioned person(s) e.g. by sending one or more of the crew to the gate to accompany him (or them) to the ship.

24. *Visitors:* Visits to ships are prohibited except from those company employees, petroleum inspectors, etc., whose duties require their presence on board.

25. *Walport Film Exchange:* Subscribers to the Walport service may exchange films at the U.S. Seamen's Club situated at the foot of No. 2 Pier, from 0730 to 2200 hrs. every day, by telephoning 2803.

26. *Staff and Crew Changes:* No staff and/or crew should be engaged or discharged without consulting Ships Services (telephone 2105). In case of discharge, identification documents must be handed to the Ships Services representative or the Norwegian Consular Officer in the case of Norwegian vessels.

27. *Tank Cleaning and Mopping:* Several contractors in the area provide labour for tank cleaning and mopping. Masters in need of this service should submit their requirements to the Ships Services Office (telephone 2105), who will contact and request a contractor to go on board to discuss details and estimate costs of work to be effected. It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore it is up to him to decide the degree of tank cleaning necessary. He may, of course, seek advice from the installation representative in this respect, whenever there is any doubt.

28. *Turnaround:* To promote the economical operation of their vessel, Masters are requested to co-operate with installation representatives in minimising their in-port time. Any delays which are considered unnecessary or extensive should be reported to the loading Supervisor (tel. 2133) so that corrective measures can be taken.

29. *U.S.S. Club:* All seamen are welcome to the club operated by United Seamen's Service which is located at the shore end of Pier No. 2. Shore passes are required to reach this Club. Beer, soft drinks, ice-cream, candies and various souvenirs and presents can be purchased at reasonable prices. Free cinema shows are usually held twice weekly. A letter-posting service is available as well as

recreational facilities, e.g. billiards, table tennis, darts, etc. A barber shop operates during daytime.

TELEPHONES:

Communications Office (General and Port Information, 24 hours service), 2604. Ships Service Office (All services to ships: mail, doctor, taxi, papers, etc., 24 hours service), 2105. Agents Office (Weekdays) (07.00 to 12.00 – 13.00 to 16.00 hrs.), 2125. Loading Supervisor (Re cargo and bunkers), day, 07.00 to 16.00 hrs., 2821/2133; at night, after 16.00 hrs., 2133. U.S.S. Seamen's Club, 2803.

AUTHORITY: Maraven, S.A.

NOTES

Vietnam, Socialist Republic of

DANANG: (Tourane): 16.04 N. 108.13 E.

(See Plan Book)

SHIPMASTER'S REPORT: 1976.

DOCUMENTS: On arrival usually dealt with immediately by the: Immigration Service, Police Service, Customs Service, Agency and Health Service.

Ships Documents: Certificate of Registry, Radio Certificate, Load line Certificate, Safety Equipment Certificate, Port Clearance from last port.

Cargo-Documents: Bill of Lading (8 copies), Cargo Manifest (8 copies), Stowage Plan (5 copies), In Transit Cargo Manifest (if any).

Immigration: Crew List (7 copies), Store List (2 copies), Crew's Effect Declaration (2 copies), Passports of the Crew.

Health: Vaccination List (2 copies), Provision List (2 copies), International Vacc. Certificates.

All documents to be ready on arrival. Cameras and binoculars to be collected and placed in a locker, to be sealed. Bonded stores not sealed.

PILOTAGE: Pilot station at a position 16° 10′ N. 108° 11′ E. Pilot boards from a tugboat and moves the ship to a position about one mile West of Phare de l'observatoire. Pilot boarding during daytime only. Ships arriving at night should anchor in a position close to the pilot station. Pilot will board the ship at 0600 hrs in the morning. ETA should be given 48 hours and 24 hours prior to arrival at the pilot station.

RESTRICTIONS: There are no restrictions for entering the bay.

HEALTH: A 24 hours cable should be sent to the Agent, stating that all crew are fit and healthy. If any sickness on board cable 48 hours in advance.

RADIO:

Callsign	*Frequency*	*Working hours GMT*
XVT	500 kc/s.	0000 — 1200 hrs.
XVT 2	417.5 kc/s.	0000 — 1200 hrs.
XVT 2	8,570 kc/s.	0130 — 0145 hrs.
		0830 — 0845 hrs.
		1200 — 1315 hrs.

VHF: There is no VHF station.

RADAR: There is no radar post.

TUGS: There are three tugboats available, one of 1,200 h.p., two of 800 h.p. each. Tug's lines are used if necessary.

BERTHING: There is one fingerpier of 250 m. and another under construction. The latter to be ready towards the end of 1976. A tanker berth is situated in position 16° 04′ N. 108° 15′ E. called My Khe. Tankers proceed to this position, after clearance, with pilot rounding by the peninsula. (See Plan). At the cargo pier all discharging is done by ship's gear.

CRANES: There are no cranes available. There is one heavy lift Floating Crane of 100 tons capacity.

BULK HANDLING FACILITIES: Bulk cargoes are sometimes handled at the port (i.e. maize) but there are no special facilities.

BRIDGES: No bridges.

STEVEDORES: Ordered by the Agent. No ETA necessary. Working hours 0000 — 0400 hrs., 0800 — 2400 hrs. Approx. discharging rate general cargo 400 tons/gang.

MEDICAL: Six hours notice required for medical assistance. There is a hospital in town. Inoculations required for cholera, smallpox and yellow fever.

TANKERS: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kg. at ship's manifold. Average discharging rate 200 t.p.h. per line.

DENSITY: Cargo pier brackish depending on the season. At the tanker berth salt.

FRESH WATER: Available by barge, rate of delivery 50 t.p.h.

REPAIRS: Repairs taking longer than 2 hours are not permitted unless permission is granted by the Port Master. Small repair facilities can be carried out ashore. There are no drydocks at this port.

DECK WATCHMEN: Cargo ships alongside the pier are provided with a gangway watch. Tankers discharging at My Khe will get two security guards on board during the stay in port.

HATCHES: Old type hatches opened and closed by shore labour. Special patent hatches by crew.

CUSTOMS ALLOWANCE: The bonded stores are not sealed. There are no restrictions for quantity of spirits, cigarettes beer etc. It is strictly prohibited to supply any bonded stores to shore personnel.

CARGO GEAR: There is one floating heavy lift crane of 100 tons.

REPATRIATION: Possible, but takes some time and can be very difficult. Haiphong is a better place for crew changes.

AIRPORT: There is an airport about 7 km. from the town. Air services to Ho Chi Min City and Haiphong, local flights only, twice a week.

TIME: GMT plus 7 hours (no Summertime) is kept along the whole coast.

HOLIDAYS: There are no special holidays.

POLICE/AMBULANCE/FIRE: Via local Agent, telephone number 21161.

SERVICES: There are laundry facilities (2 days ashore) with a 24 hours service. Shipschandler available at all times. Good fresh vegetables and fruits, depending on the season. Also good sea food.

SHORE LEAVE: Permitted via local Agent with 6 hours notice. Persons with invalid passport are not allowed to go ashore.

REGULATIONS: It is strictly prohibited to throw any garbage into the bay, heavy fines. Garbage collected by barge.

DELAYS: Remittance has to be granted by owners or charterers before sailing. Without a sufficient remittance the vessel does not receive a clearance.

Alongside the pier berthing and unberthing only between sunrise and 1400 hrs. due to strong winds in the afternoon. At any other time when strong winds are experienced berthing and unberthing not allowed. The fore mentioned also for the tanker berth at My Khe, here berthing is normally carried out during the morning hours, when there are weak winds. During a strong monsoon it is sometimes necessary to stop discharging operations and unberth the ship.

GENERAL: Ships calling for the first time at Danang port should give their ETA and call sign, nationality, all other necessary particulars so that the ship can be identified by the Navy. Ships, chartered by the Vietnamese Government should state this also and whether time or voyage charter. Ships carrying general cargo should also give all particulars about the stowage of the cargo, whether any deck cargo, heavy lifts etc.

AGENTS: Ocean Shipping Agency, 1a Quang Trung, Danang. Cable: OSA Danang, telephone 21161.

HAIPHONG: 20.52 N. 106.41 E.

SHIPMASTER'S REPORT: 1976.

DOCUMENTS:

8 Crew Lists.
2 Ships Stores Manifests.
2 Crew Personal Effects Declaration (especially: cameras, binoculars, and Foreign Currency).
2 Vaccination Lists: smallpox and cholera. All International Vaccination Certificates. All Passports (are taken in custody by Security Officials).

Special Documents: Special forms which are handed to vessel on arrival.

Health Dept:
1 Declaration of Health on arrival.
1 List of Provision Store (incl. vegetables, fruits, fish, shellfish, meats etc. and where taken).
1 Report of water taken on board: (Drinking — or Ballast water, tons, ports where taken) — tank now being used to supply drinking water.

State Security Dept.:
4 Copy List of Articles forbidden to be used in port: ie. radio transmitter/receiver — Numbers and power; radar; VHF; radio direction finder; echo sounder; sextant, signal gun, signal rockets, flare signals, arms, ammunitions, cameras, binoculars, tape recorders, band recorders.

Note: The radio transmitter, VHF, radar, binoculars, cameras are sealed.

2 Copies: Declaration of Arrival.

Note: Cameras, binoculars of the crew have to be collected and placed in a locker which is sealed. Bond is *not* sealed, and consumption is free.

PILOT: Boards at ZERO buoy.

Note: There is no VHF radio contact possible and there is no signal station available, ETA should be given as exact as possible.

RESTRICTIONS: Max. draft to enter: 25 ft. (on HW).

If ship's draft is more than 25 ft. ship has to lighten into lighters. This is done in Baie d'Halong. The procedure is that after embarking the pilot at Zero buoy, the ship is brought to this bay (in daylight hours only) via: Bai de Lan Ha – Entree Profonde – Rade du Crapaud – Chenal du Volta – Chenal de la Cathedrale.

In our case we anchored in Chenal de la Cathedrale; 20° 52′ N. 107° 03′ 06″ E. and discharged our gas oil cargo into tanker barges varying in size from 125 – 400 long tons. Some coastal tankers (1,500 – 2,000 long tons) are also available for accepting the cargo.

When discharging into lighters – ship should provide suitable hoses.

GENERAL: 1. Ship was cleared by authorities at this anchorage. In view of the distance to Haiphong – 5 hrs. by motorboat – this clearance is only given in daylight hours. Often the ship's Agent stays on board during cargo operations.

2. Because the radio transmitter is sealed, no direct contact with the outside world is possible. All messages for the Agents at Haiphong should be given to the lighters going there.

3. Medical assistance: A doctor and Hospital is available in Hongay – on the other side of the Baie d'Halong. The doctor inspects the patient first on board before permission to go ashore is given.

4. Outward clearance: Same procedure as inward clearance. Authorities come by motorboat from Haiphong (boat leaves there at about 0600 and arrives in Halong Bay at about 1100 hrs. Passports are handed back to crew.

5. On inward as well as on outward clearing, crew has to stay in their cabins for inspection by customs and security officials.

AGENTS: Vietnam Ocean Shipping Agency, 11 Dai lô Tran Phu, Haiphong. Phone: 166-245-513. Telegrams: VOSA Haiphong.

HO CHI MIN CITY: 10.45 N. 106.45 E.

DOCUMENTS: On arrival at Nha-be or at the Port. As usual, the examination is executed immediately by the Officers representatives of: Sanitary Service, Immigration Service, Customs Service, Police Service, Stevedoring Agencies.

Stevedoring Agencies:

8 Ho Chi Min City Inward Cargo Manifests or In-transit Cargo Manifests at Ho Chi Min City.
2 Crew Lists.
All Original Cargo Manifests.
3 Landing or In-transit Passenger Lists.
2 Landing Passengers Luggage Lists.
2 Free of Tax Goods Lists.

Ho Chi Min City Port Authority:

Following Documents are to be presented to the Ho Chi Min City Port Authority by the Stevedores:

1 Report, informing the arrival of the ship.
2 Cargo Plans on board.
3 Cargo Manifests.
3 Cargo Unloading Plans.
1 General Cargo Unloading Permit.
6 Requests to Sanitary Officer for sanitary examination operation.

Important Notices:

(1) Manifests of Ho Chi Min City Inward Cargo are to be compiled by complete set, each set comprising original port's manifests; a recapitulation table will be added to each set indicating the total amount of parcels, tonnage or volume loaded on board for each port. This total amount will be repeated in all letters, stating: "This total amount has been visaed by the Customs Office."

(2) On arrival at Vung-Tau, (Cape St. Jacques), the Commandant of the ship should collect all required documents and get them ready to be presented. The Quarantine Officials may possibly come unawares on board for prior examination and would never admit mistakes.

PILOTAGE: Upon arrival at pilot station the pilot service should be informed by cable of the exact position of anchorage, draft of the vessel, and the maximum speed the ship can do in the river.

Every evening from 2000 hrs. to 2200 hrs. (local time) radio watch should be kept with Ho Chi Min City XVS on the frequency of 500 kc/s. In case the vessel is to proceed up the river the next morning the pilot service will cable the Captain the exact hour of departure from Cape St. Jacques (Vung Tau).

The pilot service will not send any Pilot to ships that do not give the information as to draft, speed of vessel, and exact position at the anchorage station at Cape St. Jacques (Vung Tau).

Pilot station at Vung Tau, tel. 6. Pilot station at Ho Chi Min City, tel. 21222 and 90503. Pilot boards at Vinh Dua (Gulf of Coco Trees).

RESTRICTIONS: River transits, berthing and unberthing are effected in daylight hours only. Vessels should arrive 2 hours before daylight HW. At least 1 ft. keel clearance required. Least depth in channel, 27 ft. below chart datum.

ANCHORAGE: In depths of about 30 ft.

MAX. SIZE: Length 673 ft. Vessels can proceed without restrictions above 27 ft. depending on daily tide.

RADIO: Ho Chi Min City Radio, call sign XVS.

HEALTH: Port officials board at Vung-Tau if vessels call at Vung-Tau. Free pratique will be obtained from local authorities. For vessel calling at Ho Chi Min City, port officials will board upon docking alongside at Ho Chi Min City. Port and free pratique will be pratique at Ho Chi Min City.

TUGS: Available up to 2,600 h.p. Tankers usually berth without tug assistance.

BERTHING: Depth at quays 26 ft. to 36 ft.

TANKERS: Discharge at Nha-Be: Ex-Caltex Terminal, narrow pier with mooring buoys, depth in berth 27 ft. Ex-Shell Terminal, "T" jetty with mooring buoys, depth in berth 31 ft. Ex-Stouvae Terminal, pier with mooring buoys, depth in berth 30 ft. No slop disposal facilities.

DENSITY: About 1005 at berths.

MEDICAL: Doctors and hospital facilities available.

FRESH WATER: Can be supplied by barge subject to advance notice of 24 hours.

FUEL: Diesel oil can be supplied.

REPAIRS: Machine shop facilities only.

AIRPORT: Situated about 5 miles from the city. International services.

NOTES

Please also advise Shipping Guides Ltd.

Virgin Islands

FREDERIKSTED, St. Croix: 17.43 N. 64.53 W.

DOCUMENTS: All forms are standard U.S. Government Forms:
Passenger List (I–418) – 3 copies.
Crew List (I–418) – 3 copies.
Clearance from Last Port.
Inward Customs Manifest (7527-B) – 4 copies.
Ship's Stores Declaration – Customs Form 1303 – 2 copies.
Crew Effects Declaration – Customs Form 1304 – 1 copy.
(Also see separate headings – "Health" – "Customs" – "Immigration".)

PILOTAGE: Services available day or night. Payment for Pilot services is mandatory whether Master uses Pilot or not. (Vessels commissioned by the U.S. or foreign government, yachts and vessels under 100 gross tons are exempt from pilotage fees, except when the services of a Pilot are requested).

ANCHORAGE: Open roadstead on the lee (West) side of St. Croix, providing a good anchorage with no significant tide.

TUGS: None readily available – tugs can be arranged with 48 hours advance notice.

BERTHING: A government-owned pier with a 1,400 ft. long approachway, bridging Maritime Zone to a pier-head 240 ft. long by 60 ft. wide. Vessels 600 ft. and over with a max. forward draft of 25 ft. have been accommodated.

RADIO: *(a)* Vessels may communicate with Island via:

Mackay Radio, Amagansett, New York	Call Letters WSL
Chatham, Massachusetts Radio	Call Letters WCC
Lantana, Florida Radio	Call Letters WOE
Barbados Radio, Barbados	Call Letters VPO
Destrellan Radio, Guadeloupe	Call Letters FFO
Fort de France Radio, Martinique	Call Letters FFP
Tuckerton Radio, New Jersey	Call Letters WSC

All stations maintaining 24-hour service. These radio stations then relay the messages by cablegram to Frederiksted via either ITT World Communications Inc. or Cable and Wireless, Western Union International.

(b) Master of every vessel arriving Frederiksted is required to give at least 24 hours advance notice of arrival to Captain of the Port, U.S. Coast Guard – San Juan, Puerto Rico, by wireless on 500 kc/s. or by radio telephone 2182 kc/s.
Call Letters for U.S. Coast Guard, San Juan, Puerto Rico – NMR.

(c) Masters are requested to advise Agent their expected time of arrival as far in advance as is possible, vessels arriving from ports other than U.S. or Caribbean Islands should give at least 7 days notice, and vessels arriving from U.S. ports should give at least 4 days notice. In addition, a message should be sent verifying arrival at least 48 hours in advance, with delays reported as necessary. Arrival messages should include information regarding repairs, stores, number of crew and passengers on board. If cash is required, a minimum of 7 days (prior to date of arrival) notice is mandatory.

(d) While vessels are in Frederiksted the authorities do not permit the use of the ship's radio transmitters.

(e) Vessels equipped with VHF equipment should commence radio watch on Channel 16 when vessel is 100 miles from St. Croix. Contact with Agents and shore facilities can be made direct or via Virgin Islands Marine Operator – Station WAH – Call Letters WAH.

FRESH WATER: Very limited, delivered by truck.

TIME: GMT minus 4 hours. Atlantic Standard Time.

HOLIDAYS: The following are legal holidays: Sundays; January 1st (New Year's Day); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; Last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 2nd (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President or the Government may by proclamation declare as holidays.

The following are legal half-day holidays, commencing at Noon, viz: Every Thursday during the months from April to November, inclusive, except Thursdays in those weeks where there already is a legal holiday other than Sunday. Whenever any holiday falls upon a Sunday, the Monday following is a legal holiday.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands. Local Port Regulations are similar to those applying in U.S. Mainland Ports.

HEALTH: See "Health Regulations" before first U.S.A. Port (Albany).

Garbage should be disposed of beyond the 3-mile limit. On passing the 3-mile limit all garbage disposal units which open to the sea should be closed. All garbage should then be placed in covered cans and retained on board until the ship is again beyond the 3-mile limit.

CUSTOMS: Customs Officers will board at anchorage or wharf berths, and will require an accommodation ladder.

Vessels required to enter and clear through Customs House:
Vessels loading or unloading cargo;
Vessels embarking or disembarking passengers;
Vessels remaining in port over 24 hours:
Vessels requesting permission for their passengers to go ashore during the stay of the vessel in port.

Vessels in above categories must present following documents:
Clearance from Last Port;
3 copies of Crew List (Form I.418) or substantially similar form – see note below*)
3 copies Passenger List (Form I.418) or substantially similar form – see note below*)
4 copies Inward Foreign Manifest covering all cargo for discharge at St. Croix, V.I., showing weights or measurements (of basis of how cargo is freighted) on all items (Customs Form 7527-A or 7527-B).
2 copies Stores List (Engine-Deck-Commissary-Narcotics).
1 copy Crew Effects Declaration (Custom's Form 1304).

* List of passengers and crew shall be on Customs and Immigration Form I.418 or on a substantially similar form, except that where no steerage passengers are aboard upon arrival, the listing of the passengers may be in the form of a vessel "Souvenir List". Or similar list, in which the names of the passengers are listed alphabetically by class.

Sealing of Stores: Upon arrival of a vessel from a foreign port, or a vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use of consumption on board while vessel is in port and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless customs officer is of the opinion that circumstances do not require such action. Customs Inspectors in charge of vessel, from time to time, may issue stores from under seal for consumption on board by passengers and crew.

Passengers disembarking must present personal baggage declaration if from foreign.

IMMIGRATION: Recommended that Masters who are unfamiliar with U.S. Immigration Procedure should seek clarification from Agents as far in advance as is possible.

If a vessel arrives direct from a United States mainland port or from Puerto Rico no immigration inspection will be performed. If a vessel arrives direct from a foreign port the vessel shall undergo immigration inspection.

Vessels arriving without a visaed crew list, may be able to obtain a waiver from Officer in Charge of U.S. Immigration & Naturalisation Service, by making application on Form I.193. A fee of $10.00 is required to obtain a waiver.

In order to expedite the clearing of the vessel, it is suggested that prior to arrival all passengers subject to inspection should be assembled where the inspection is to be performed.

Stowaways must be reported in ETA Message and listed on a Passenger Manifest (Form I.418) and on Form I.94, and must be reported to the U.S. Immigration Officer as soon as he boards.

All non-resident alien crew members, whether shore leave is required or not, are required to have in their possession valid Passports, Seamen's Book or Identification Card (with photo) and Form I.95 (crewman's Landing Permit) or Form I.184 (Alien Crewman's Permit and Identification Card) on arrival. All resident alien crew members are required to have in their possession Alien Registration Receipt Card (Form I.151) on arrival.

SHORE GANGWAYS: Available.

LAUNCHES/TENDERS: Not available.

AIRPORT: Distant 8.5 miles.

AUTHORITY: Virgin Islands Port Authority.

LIMETREE BAY, St. Croix: 17.41 N. 64.44 W.

LOCATION: The facilities of Hess Oil Virgin Islands Corp. (Hovic) are located in Limetree Bay on the South coast of the island of St. Croix, U.S. Virgin Islands. St. Croix is 32 miles South of St. Thomas and St. John Islands and 50 miles S.E. of the island of Puerto Rico. It is the largest of the U.S. Virgin Islands being 19 miles long and averages 3.5 miles in width.

The sea buoy "ELB" No. 2 marking the entrance to Limetree Bay channel is located in 60 ft. of water on the Westerly side of the channel: Latitude, 17° 40′ 42″ North, Longitude 64° 44′ 18″ West.

The sea buoy is painted red and is equipped with a flashing white light having a 1 second flash, 9 second eclipse with a visibility of 7 miles.

DOCUMENTS: Clearance (U.S. – Foreign). Inward clearance is effected on board immediately after docking Clearance should be made for Christiansted, St. Croix, via Limetree Bay.

The following documents are required by the Customs and Immigration authorities for entry and clearance:
Master's Certificate on Preliminary Entry.
Master's Oath.
Stores List.
Crew Purchase List (Curio List).
Inward Foreign Manifest.
Quarantine Free Pratique.
Deratisation Certificate.
Crew List (Certified).
Clearance from Last Port.
Crew men Landing Permits.
Passenger List (if any passengers).

PILOTAGE: Service is available 24 hours a day and is compulsory for all vessels using HOVIC facilities in Limetree Bay. The HOVIC Harbour Master acts as Pilot and will assist the Master in docking and undocking vessels using Hess facilities; however, the Master of the vessel retains full responsibility for the ship at all times. The Pilot can be contacted by VHF Channel 16. Pilot boards at the sea buoy, position 17° 40.7′ N., 64° 44.3′ W. Vessels over 45,000 d.w.t. are subject to movements in daylight only. Vessels should remain outside the sea buoy until boarded by the Pilot. The Pilot will be placed aboard by a company tug.

The tug HOVIC 1 is equipped with a radio-telephone having the following crystals: 2182 kc/s. U.S.C.G., 2638 kc/s., Ship to ship. 2738 kc/s., Ship to ship 2134 kc/s., San Juan, Puerto Rico and Galveston, Texas. Ships having the above crystals should call the HOVIC 1–3 hours before their arrival at the sea buoy, and advise of any change in their ETA.

ANCHORAGE: There is no suitable anchorage for deep draft vessels off the port. Normal practice is to stop engines and wait 6 to 8 miles from the sea buoy if required to wait instructions. In bad weather vessels should proceed to Frederiksted and anchor in the vicinity of the long pier in depths of 30 to 60 ft. Vessels shall have their anchors ready to let go upon entering the channel into Limetree Bay.

APPROACHES: Entrance to channel marked by a black sea buoy, equipped with a white flashing light, visible 8 miles. The buoy (ELB No. 1) (flashing every 5 seconds) is at the West side of the channel (Lat. 17° 40′ 42″ N., Long. 64° 44′ 18″ W.). At sea buoy there is 60 ft. of water and the channel has a depth of 60 ft. to Nos. 3 and 4 berths.

The turning basin opens up Eastward from the channel line and is approximately 1,200 ft. long and 1,000 ft. wide. The West turning basin is 1,500 ft. by 1,200 ft. with a max. depth of 35 ft.

RESTRICTIONS: Navigation permitted 24 hours a day except for ships over 50,000 d.w.t.

The Harbour Master will check and report on each vessel's draft before piloting them inbound or outbound.

HEALTH: National quarantine laws are enforced in the U.S. Virgin Islands by officers of the U.S. Public Health Service. All vessels are subject to inspection.

RADIO: Masters are requested to advise both HOVIC – St. Croix and their Agents by radio 48 hours and 24 hours in advance of their ETA giving the vessel's name, date and hour of arrival (local time), bunkers and water required.

TUGS: Tug assistance in the channel, docking and undocking is mandatory and is provided by 3×1,800-h.p. diesel tugs stationed in the port to provide this service. All tugs are under the orders of the HOVIC Harbour Master and are equipped with fire pumps and monitors to assist in fire fighting.

There are also 2 tugs of 7,000 h.p. available for the mooring of large tankers.

BALLAST: United States laws prohibit the pumping overboard of dirty ballast while a vessel is within U.S. coastal waters. All ballast must be pumped to facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump overboard at the dock after first being inspected and approved by the Dock Master.

In pumping dirty ballast ashore, the ballast is received through 1×12-in. shore line at a max. discharge pressure to shore installations of 125 p.s.i. The ballast is pumped into a ballast facility about 1 mile North of the dock. Due to the limited facilities and to the possibility of 2 vessels deballasting at the same time, it is requested that vessels arrive with the min. possible ballast.

The U.S. Oil Pollution Act of 1924 applies to the Pollution of Coastal Waters. Violators are subject to fines of up to $2,500 and a year's imprisonment for each offence.

NOTICE OF READINESS: Notice of readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge, and that all of the ship's equipment (including, but not limited to tanks, pumps, valves, and pipe-lines) is ready and fit to load or discharge petroleum and/or petrochemical products. Notice of readiness will not be accepted unless the vessel is in all respects ready to load or discharge as appropriate. Vessel will not be deemed ready to load or discharge and pumping will not commence until the senior deck officer shall have executed and delivered to HOVIC a "Declaration of inspection prior to bulk cargo transfer" as required by U.S. Coast Guard Regulations.

BERTHING: A shore gangway is provided.

There are at present, 7 berths on finger pier, 3 on East side and 4 on West side.

Deepest berths are No. 3 and No. 4 each with 60 ft. depth of water alongside.

LOADING: Loading operations are normally carried out at relatively high pumping rates. Loading rates may be reduced by request. Loading cargo overall will not be permitted without specific written authorisation from HOVIC'S General Manager.

Hose pressures should not exceed 125 p.s.i. during loading or discharging.

Oil Dock is serviced by: 1×24-in. diameter crude line, 1×24-in. diameter No. 6 oil line. 1×20-in. diameter gasoline line, 1×20-in. No. 2 oil line, 1×10-in. diameter kerosene line, 1×12-in. diameter ballast line, 1×8-in. diameter fresh water line.

4×10-in. hoses are available for connecting up to each of the 20 in. and 24 in. shore lines – single 10 in. hoses are available for the kerosene and ballast lines.

Oil Dock 2 serviced by: 1×24-in. diameter crude line, 1×24-in. diameter 6 oil line.

MEDICAL: Medical attention is generally available from the public hospital at any hour of the day or night to crew members of all vessels. The representative of the ship's Agent should be contacted by the Master with any requests for medical attention for the crew. For each man needing medical or dental attention, a form should be completed in duplicate and signed by the Master, or in his absence, by the Chief Officer. The form should provide the date, patient's name, rating, and the name of the vessel. In case of emergency, or when a patient cannot be moved from the vessel, the Master should advise the ship's Agent by radio if at sea, or on the telephone if in port.

DENSITY: 1025.

FRESH WATER: The island of St. Croix is dependent almost entirely on rainfall for its supply of fresh water. There are wells but many of them are rather saline in nature. As a result fresh water is scarce and expensive. In conjunction with its refinery operation HOVIC operates a desalination plant and limited quantities of fresh water are available providing at least 48 hours notice of these requirements is given prior to the ship's arrival. All fresh water is metered aboard ship.

FUEL: Both No. 6 fuel oil (Bunker C) and light marine diesel are available by prior arrangement. Advice concerning quantities should be given in the vessel's arrival message (ETA) sent 48 hours prior to arrival.

DEVELOPMENTS: New docks under construction.

AIRPORT: Situated 5 miles from port facilities.

SHORE LEAVE: Under normal circumstances, no restrictions are imposed by the Immigration Authorities on shore liberty. Masters are requested to have all crew members on board at least 1 hour prior to departure time, to avoid delay "awaiting crew members". If crew members of foreign vessels are to be given shore leave, Form I-95 must be prepared for each member of the crew.

TIME: The U.S. Virgin Islands use Atlantic Standard Time, which is four hours slow of Greenwich Mean Time.

GENERAL: *(a) Immigration:* The United States immigration laws apply in the U.S. Virgin Islands. Passports and visas are required.

(b) Customs: The customs collection district of the U.S. Virgin Islands is under the jurisdiction of the U.S. Treasury Department but has its own Customs laws.

(c) Liquors: The transportation of alcoholic beverages inside HOVIC's property is strictly prohibited; consequently, no liquor or beer may be removed from vessels, the only exception to the foregoing is in the case of bonded stores ordered by Masters.

(d) Visitors: No visitors are permitted in the dock area. Only persons on official ship's business are permitted on the piers.

(e) Laundry: Only limited facilities are available to handle ship's laundry.

(f) Surveyors: Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available in San Juan, Puerto Rico on 12 to 24 hours notice. The ship's Agent will assist Masters in soliciting their services.

(g) Mail: Official and personal mail will be delivered on board by the ship's Agent when vessels are being cleared inwards. Mail received for vessels while in port will be delivered on board prior to sailing. Outgoing mail is accepted from Masters, provided it is accompanied by a mail transmittal slip to support disbursements.

(h) Transportation: Walking through the refinery is not permitted. Arrangements for transportation will have to be made through the ship's Agent or the Refinery General Manager's Office.

(i) Supplies and Repairs: Limited supplies of provisions and marine hardware are available on the island. There are no facilities for major repairs closer than San Juan, Puerto Rico. Machine shops in Christiansted and Fredriksted can assist in making minor repairs.

(j) Overloading: Masters are advised that the international laws are strictly enforced with regard to overloading and should be guided accordingly. In cases where overloaded cargo has to be discharged, all expenses incurred, including ship delay, will be for the vessel's account.

(k) Weather Conditions: The loading and discharge of all crude petroleum and its products will be stopped during any electrical storm. Ullage screens or ullage plugs must be in place. Loading gasoline or other similar low-flash products will be stopped during periods of calms when the heavy vapours cannot be dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions. In the event of abnormal weather conditions in the area, such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters will be told to suspend all operations and proceed to sea until normal weather conditions again prevail.

(l) Demurrage: Vessels are required to vacate berth promptly upon completion of cargo handling operation (loading or discharging operations, as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the Dock Master. The Harbour Master will keep vessels advised of other vessels awaiting berth. If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be responsible for penalties and demurrage as follows:

- *(a)* To pay dock demurrage.
- *(b)* To hold HOVIC blameless for any demurrage and damages incurred as a result of other vessels awaiting berth.

The following rules shall govern the determination of demurrage:

- *(a)* One hour free laytime will be allowed after completion of cargo handling operations. This free time will start at the time cargo hoses are disconnected from the ship's manifold on completion of loading or discharge of cargo. Vessels awaiting cargo papers and/or Customs clearance must vacate the berth within 1 hour of such completion and move outside to wait for their papers.

(*b*) Three hours free laytime will be allowed for ballasting after discharge operations.

AUTHORITY: Hess Oil Virgin Islands Corp.

ROAD HARBOUR & PORT PURCELL, Tortola, British Virgin Islands: 18.25 N. 64.37 W.

PORT LIMITS: All the area of water North of an imaginary line drawn from Burt Point to Hog Point (see B.A. Chart 2020).

DOCUMENTS:

Clearance from last port;
1 Declaration of Health Certificate;
4 Crew Lists;
2 Crew Store Lists;
2 Ships Stores Lists;
2 Passenger Lists.

PILOTAGE: Only compulsory for vessels of 200 n.r.t. and over, when proceeding alongside or leaving Port Purcell unless a vessel is in possession of a valid Exemption Certificate issued by the Ports Manager. Pilot boards at Port limits after receiving advice from Agents preferably 12 hours prior to arrival. Link calls made through Tortola Radio, Channel 27 daytime and Channel 16 at night.

Vessels arriving ahead of ETA sound "G" on whistle if unable to advise Agent.

No inward pilotage at night, unless emergency, night Pilotage outwards by special arrangement.

ANCHORAGES: Between Buck Island and Beef Island or immediately South of Port limits, approximately 12 fathoms.

RESTRICTIONS: Anchorage within Port limits prohibited unless authorised by Ports Manager, max. draft alongside Port Purcell 22 ft.

MAX. SIZE: Tanker anchorages independent of Port Authority and maintained by Shell and Esso, for small vessels only, little tidal influence.

HEALTH: Customs issue pratique for vessels with clear bill of health, otherwise request doctor to board on arrival alongside or at anchor.

RADIO: Cable and Wireless maintain a Public Coast Station on Tortola, callsign Tortola Radio, with an approximate range of 50 miles and provides linked telephone calls between ships and any shore based telephone subscriber. Continuous watch is kept on Channel 16.

For distances in excess of 50 miles any other convenient shore station, (eg. Barbados, St. Thomas) that will accept messages for onward cabling or telephoning to Tortola.

BERTHING: Port Purcell quay is 800 ft. long, max. draft 21 ft. at any state of tide, salt water. Ships discharge with own gear.

CRANES: Port Purcell has 1 mobile shore crane, max. lift 8 tons. Prior advice required for use.

MEDICAL: Hospital facilities available, no routine inoculations, etc., required unless specially notified.

DENSITY: Entirely salt water within port limits.

FRESH WATER: Available in limited quantities at Port Purcell, approx delivery 20 t.p.h. and costs US$5.00 per 1,000 gallons.

FUEL: Diesel only for small vessels delivered by road tanker to Port Purcell, 2 hours notice.

REPAIRS: Elementary only.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCE: No sealing of tobacco, wine or spirits.

AIRPORT: Beef Island, 7 miles, regular local flights to St. Thomas, Puerto Rico, Antigua which connect with several main lines to Europe and the Americas.

TIME: GMT minus 4 hours.

HOLIDAYS: Port Purcell closed Xmas Day, Good Friday and August Monday (1st in month).

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: Telephones available for use on board ship, cost for connecting US $25.00 and 8 cents for local calls.

SHORE LEAVE: No restrictions for crews.

IDENTIFICATION CARDS: None required.

DELAYS: None should be expected. Cargo working is geared to ship's arrival irrespective of time and 24 hours continuous working if required.

AUTHORITY: Ports Manager and Harbour Master, Road Town, Tortola.

ST. THOMAS: 18.20 N. 64.56 W.

Harbour of St. Thomas, U.S.V.I. situated on South side of Islands of St. Thomas. It is 1,434 miles from port of New York. Northern side of Islands borders on Atlantic Ocean, and Southern side on Caribbean Sea. The Harbour is one of the best in the West Indies, being almost landlocked.

WEATHER: There is a signal station on Cowell Hill which shows storm signals. The weather is usually mild with little wind. Squalls when they occur, usually come from the N.E.

DOCUMENTS: *Quarantine.* – see "Health". *Customs* – see "Customs". *Immigration* – see "Immigration". *Agent:*

1 Copy Crew List (Form I. 418).
1 Copy Passenger List (Form I. 418).

PILOTAGE: Compulsory and available day and night. Pilot Boat has letter "P" on deck house and flies International Code flag "P". Pilots will meet vessels 1 to 3 miles outside harbour, boarding via Jacob's ladder.

ANCHORAGE: Outer Harbour Anchorage located beginning at Scorpion Rock Lighted Buoy No. 1 (18° 91′ 25.6″ N: 64° 55′ 8″) thence 180° 1,580 yards; thence 263°, 2,490 yards; thence due North 1,255 yards; thence due East to the Southerly tip of Sprat Point, Water Island; thence to Cowell Point, Hassel Island, and thence to point of beginning. This anchorage is considered good and is about 8 fathoms with sand bottom.

TUGS: Normally not considered necessary for docking, however tugs are available for docking and undocking ships.

RADIO: The St. Thomas Marine Operator will guard the following from 0600 to 2100 hrs.: Channel 26, 16 VHF, 2009–2506 and 2182 AM, and the upper side band (2010.4–2507.4) of the same frequency. The Harbour Master's Office maintain a 24-hour watch on VHF Channel 16 (talk Channel 12).

(*b*) Master of every vessel arriving St. Thomas is required to give at least 24 hours advance notice of arrival to Captain of the Port U.S. Coast Guard – San Juan, Puerto Rico by wireless on 500 kilocycles or by radio telephone 2182 kilocycles.

(*c*) Masters are requested to advise Agents their ETA, at least 36 hours in advance. Arrival messages should include cash requirements (local currency U.S. Dollar) and advice regarding repairs, stores, etc. This information is particularly necessary in the cases of vessel arriving on weekends or holidays. For cruise vessels the arrival messages should also include the number of passengers and crew on board.

(*d*) While vessels are in St. Thomas Harbour, the authorities do not permit the use of the ship's radio transmitters.

(*e*) U.S. Coast Guards: This organisation maintains a small Light Attendant Station in St. Thomas to observe, service and effect repairs to aid navigation in vicinity of St. Thomas. An 82-ft. Coast Guard Patrol Boat "Point Whitehorn" (82364) is attached to the station for primary purpose of search and rescue work. Maintains watch on VHF Channel 16. Radio telephone marine information broadcasts, including Notices to Mariners, will be made on 2670 kc/s., after first making a preliminary announcement on 2182 kc/s. Radio telephone urgent and safety broadcasts or Marine Informations will continue to be made on 2182 kc/s.

BERTHING: Wharf of the West Indian Company Limited, located on Eastern shore of harbour basin. Wharf is bulkhead type, 2,234 ft. long, running N.E./S.W., and is well protected to seaward. Mooring bits are spaced at intervals of 50 ft. There is a "cut out" in the wharf 950 ft. from N.E. corner, which is 22 ft. wide and approximately 3.5 ft. above low water. This ramp is slanting from 8.3 to 3.5 ft. over a distance of 20 ft. Similar type of ramp located on West Corner of wharf. Safe depth alongside from 27 ft. near N.E. end to 30 ft. on S.W. end. Bulwark is 8.3 ft. above mean tide. Average difference between high and low tide is 11 in.

Dockages dues are payable to the West Indian Company Limited, as per tariff.

In the Crown Bay area (access via East or West Gregerie Channels) the VI Port Authority maintains facilities which include a "T"-head pier extending 500 ft. from shore, where ships up to 25,000 g.t. can moor to breasting dolphins 200 ft. on centres, and mooring dolphins 200 ft. fore and aft from them. Controlling depth presently 30 ft. This pier is used for berthing tourist and tanker vessels only. A curved bulkhead at top of Crown Bay, approximately 900 ft. long, is used for roll-on/roll-off, container and break bulk cargo. Controlling depth 15 ft. 24-hour arrival notice is required.

CARGO HANDLING: Containers are handled at the West Indian Company and the Crown Bay area (VI Port Authority), but no special gantry cranes are available. Roll-on/roll-off cargo handled at these facilities as well. No liquid chemicals facilities exist here but there is a small privately-owned LPG plant limited to 20 ft. draft and 250 ft. length. Shell uses this facility for gasoline and light diesel. The "T"-pier in Crown Bay is used for the VI Water and Power Authority for movement of fuel and water, and Texaco has its own pipe-line on the same pier for their products.

STEVEDORES: Discharging and/or loading arranged by the West Indian Company Limited for account and risk of vessels.

Rates of discharging and /or loading dependent on vessel's equipment and stowage. However, following may be considered average:

General Cargo 6 weight tons per gang hour.
Bagged Goods 8/10 weight tons per gang hour.
Lumber 10/12 weight tons per gang hour.

Each stevedore gang normally consists of 12 stevedores (10 on board and 2 ashore) 2 winchmen, 1 signalman, 1 foreman.

FUEL: The West Indian Company Limited operates the bunkering terminal and are agents for Esso. Marine diesel fuel handled through 6 in. or 8 in. pipe-lines (4 in. or 6 in. hoses) at maximum rate of approximately 125 t.p.h., at the wharf of the West Indian Company Limited, where vessels drawing up to 30 ft. can be accommodated.

Delivery by barge is not available. Bunkers available at all hours, including Sundays and holidays. Owners of vessels must make prior arrangements for bunkers.

Overtime as incurred will be charged to ships for bunkers supplied outside normal working hours, Saturdays, Sundays and holidays.

FRESH WATER: Mostly rain water which when available is supplied by the West Indian Company Limited. Delivery effected by pipe alongside wharf. Water by barge can be delivered in St. Thomas.

MEDICAL: Local hospital is the Knud-Hansen Memorial Hospital, which is equipped with facilities for operations, etc.

TIME: Official St. Thomas time is Atlantic Standard Time, which is 4 hours behind GMT.

HOLIDAYS: The following are legal holidays in St. Thomas: Sundays; January 1st (New Year's Day); January 15th (Martin Luther King); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; The last Monday in May (Memorial Day);,June 22nd (Organic Act Day); July 4th (Independence Day); July 25th (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President of the Government may by proclamation declare as holidays.

The following are legal half-day holidays, commencing at Noon, viz: Every Thursday during the months from April to November, inclusive, except Thursdays in those weeks where there is already a legal holiday other than Sunday. Whenever any holiday falls upon Sunday, the Monday following is a legal holiday.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands.

Local Port Regulations are similar to those applying in U.S. Mainland Ports.

HEALTH, CUSTOMS, IMMIGRATION: Refer to Frederiksted.

CONSULS: Following countries have consular representatives in St. Thomas.

Belgium
Denmark
Dominican Republic
El Salvador
France
Great Britain
Haiti
Netherlands
Norway
Panama
Sweden

AIRPORT: Distance 2 miles. Connections with International flights from Puerto Rico.

GENERAL: *Gangway.* 1 aluminium gangway available which is 34 ft. long and 2 ft. 6 in. wide – made with skidding prevention strips only and therefore not recommended for use as a passenger gangway. Since presently this is the only gangway it is made available to vessels on first-come-first-served basis.

Stores. St. Thomas should not be depended upon for large quantities of provisions or deck and engine stores, as practically all commodities are imported making prices higher than United States mainland ports and Puerto Rico. No regular Ship's Chandlers established in St. Thomas, V.I.

Storage Facilities: The West Indian Company Limited undertakes ordinary storage for a limited period of time in 8 transit warehouses, all 14 ft. high with a total floor area of 80,000 sq. ft., plus an additional 9,600 sq. ft. roof covered area. There is also a large uncovered area available for outside storage. Only limited cold storage facilities are available on The West Indian Company's Dock.

Ice: Small quantities may be obtained.

Laundry; Modern laundry service is available.

POLICE/AMBULANCE/FIRE: Police 915; Ambulance 774-1212; Fire 921.

AUTHORITY: Virgin Islands Port Authority.

NOTES

Please also advise Shipping Guides Ltd.

Western Samoa

APIA: 13.50 S. 171.45 W. (See Plan Book)

DOCUMENTS:

1 Clearance from previous port of call.
3 Crew Lists.
3 Passenger Lists.
2 Health Documents.
1 Manifest.
Bills of Lading.
Ship's Papers (stores and poisons).
List of Dangerous Goods.

PILOTAGE: 72 hours ETA is required, confirm 24 hours before arrival. Pilotage is compulsory for merchant vessels. Pilot boards 1.5 miles outside harbour on line of leading beacons. Pilot boat painted white with yellow awning. "Pilot" written on both sides of wheelhouse in brass lettering.

By night, in addition to usual navigation lights, Pilot boat carries standard identification, i.e. a red light on foremast with all-round visibility. Exemption from pilotage may be granted to Masters of vessels trading regularly to Apia, but pilotage dues are still payable.

ANCHORAGES: In 20 fathoms outside a line drawn between the 2 reefs and preferably on line of leading beacons. Bottom is coral.

RESTRICTIONS: No night-time or tide restrictions. Turning basin dredged to 36 ft., extending to 1,200 ft. from each end of the wharf. Arrivals preferred during daylight hours.

MAX. SIZE: Shore bollards to take stern and bow lines for vessels up to 800 ft. in length. Max. draft 35 ft.

Buoy mooring for tankers up to 32,000 d.w.t. consists of 3 white buoys, 1 ahead and 2 astern. Vessel also uses starboard anchor.

HEALTH: Doctor boards vessel on arrival alongside.

RADIO: ETA's should be sent 72 hours before arrival, and confirmed 24 hours before. Signals to incoming ships by radio or radio-telephone from Apia radio station 5WA. For radio, ships should call on 500 kc/s. and operate on 483 kc/s. For radio-telephone, ships should call on 2182 and operate on 2162 or other available frequency as may be arranged once contact has been established. Apia maintains continuous service. Call sign "Apia Radio" repeated.

Apia radio maintains continuous service, and the Port Administrator and Harbour Master can be called on Channel 16 during normal working hours. The tug and pilot launch also operate on Channel 16 and all can switch to Channel 14 or 12 on request.

TUGS: 2 tugs available, *Pualale*, 670 h.p. (7 ton pull) and *Savaii*, 400 h.p.

BERTHING: Small charge made for use of hawsers and moorings. Export Wharf – reinforced concrete wharf 604 ft. in length on the East side of inner harbour. Max. depth alongside 36 ft. All loading and discharging is carried out with ship's gear. No wharf cranes available. This wharf and all surrounding areas enclosed by fence is Customs area and all vessels trading to or from places outside Western Samoa must depart from or arrive at this wharf.

New wharf 604 ft. long, vessels up to 800 ft. may be berthed.

Ro-Ro Facilities: At present Ro-Ro vessels discharge in middle of existing wharf. New Ro-Ro ramp is being constructed and should be operational early 1979.

No shore equipment except one 20 ton fork lift.

STEVEDORES: Arranged by ship's Agents.

MEDICAL: Advance notice to Agents preferable. No private doctors but good general hospital where seamen may be admitted.

TANKERS: Shell, Mobil, and B.P. operating in Samoa, and have own discharging facilities. Tanker terminal situated on West reef. Discharge line is 6 in. diameter. Launch service may be provided between ship and shore at a small charge.

DENSITY: 1025 – but may alter considerably during rainy season.

TIDES: Mean high water intervals 6 hours 27 minutes, Spring range 3.8 ft., mean range 2.6 ft. Tidal stream normally slight, but after heavy rain outflow from rivers and streams can cause it to become quite strong.

The current across the harbour entrance about 600 m. off the reef can be variable, but is predominantly Westerly and velocities up to 4 knots have been reported but this is not normal.

FRESH WATER: Available at wharf from shore installation.

FUEL: Only light diesel fuel available.

FIRE PRECAUTIONS: Fire services available on wharf, station is 0.5 miles distant.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCE: No enforcements.

IDENTIFICATION CARDS: Not needed.

CONSULS: The New Zealand High Commissioner represents all British subjects; French Consul, tel. 156. Australian High Commissioner, Embassy of the Chinese People's Republic.

REPAIRS: Minor repairs only.

AIRPORT: 25 miles from Apia on Western side of Island. Regular and frequent mail and passenger services. Direct to Auckland or USA via American Samoa.

TIME: GMT minus 11 hours. No alteration to clocks.

HOLIDAYS: No cargo on Sundays between 0300 and 2100 hrs. The recognised holidays are Christmas, New Year, Boxing Day, Good Friday, Easter Monday, Whit Monday, Anzac Day and Independence holidays from 1st June to 3rd June.

TELEPHONES: Police and public telephones near wharf and provisions are available for telephone connection to tourist vessels berthed at the wharf.

POLICE/AMBULANCE/FIRE: Hospital 21.212; Police 22.222; Fire 999 emergency or 20.404.

SHORE LEAVE: No restrictions.

GENERAL: *Supplies:* Provisions available. Deck and engine room supplies can be obtained in limited quantities.

Divers: No divers other than scuba divers are available, and skin divers may be recruited for up to 50 ft. diving.

Oil Pollution: The pumping of bilges, etc., within harbour limits is not permitted and *heavy penalties will be imposed for any breach.*

Garbage Disposal: The dumping of refuse of any kind within harbour limits is strictly prohibited. Properly covered receptacles will be made available and rubbish disposal vans will clear them as necessary. A small charge will be made for this service.

Charts: BA 1730 – Samoa or Navigation Islands.
BA 1339 – Plans in Samoa.
BA 2211 – Apia Harbour.

DEVELOPMENTS: New Ro-Ro ramp as above, construction has already started, expected completion November 1978.

New dry-docking system to take vessels up to 200 ft. keel length is under discussion, and preliminary studies have been completed. Expected to start construction when Ro-Ro ramp is completed.

AUTHORITY: Port Administrator and Harbour Master.

Windward Islands

CASTRIES, St. Lucia: 14.00 N. 60.59 W.

(See Plan Book)

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
1 Stores List.
1 Clearance from Last Port.
2 sets of Manifest mailed prior to arrival.
2 copies each Bills of Lading.
3 copies each of Manifests on arrival.
1 Health Certificate.

PILOTAGE: ETA to Agents at least 48 hours in advance, and further advice if any changes. Agents inform Pilot's office of expected time. Ship remains approximately 3 miles out of harbour, and is located by Lighthouse guard who immediately informs Pilot's office. Pilot meets ship in Pilot boat – *Bertram* 25 ft. Hard top with a "V" hull and twin inboard outboard Mercruiser engine complete with navigation and pilot lights. Painted dark blue all around, with letter "P" painted in white on both sides of bow. Signal for Pilot: day time flag "G"; and night: white light or blue light. VHF and 2182. Pilot embarks on the starboard side via Pilot ladder.

ANCHORAGE: North of leading lights, about 0.5 mile from harbour, depth about 12 fathoms.

RESTRICTIONS: No ship exceeding 100 nett registered tons must enter without a Pilot.

MAX. SIZE: Not longer than 600 ft. (cargo and passenger). Tankers – not longer than 400 ft. Alongside, all ship's draft 24 ft.

HEALTH: Pratique given by Pilot. Health Officer boards ship and if any infectious diseases are on board, ship is anchored out until doctor arrives.

RADIO: 2182 kc/s., 2527 kc/s., 2638 kc/s., 2146 kc/s., 2582 kc/s., 2381 kc/s.

VHF transmitting and receiving in the 156 mHz range on Channels 6, 12, 14 and 16.

These radio stations are situated at Vigie Lighthouse, Castries and at Moule-a-Chique Lighthouse, Vieux Fort operating on a 24 hour basis.

TUGS: Not necessary.

BERTHING: Berthing arrangements are made by the Port Manager before the ship's arrival having received the ETA.

Castries: Deep and sheltered anchorages off entrance. Approach channel 300 ft. wide, with min. depth of 6 fathoms. Turning basin 1,100 ft. in diameter, depth 6 fathoms. Inter-island cargo berth 450 ft. long, 12–18 ft. deep. Short stay cruise ship berth, 550 ft. long, 28 ft. deep. Also see "Shipmaster's Report".

Vieux Fort: Depth of 8 fathoms at the entrance and 5 fathoms within the Port. 2 berths, 500 ft. long, 27 ft. 6 in. deep. Also see "Shipmaster's Report".

MEDICAL: In urgent cases only, advise requirements in advance. Hospital facilities available.

TANKERS: Discharging by marine and floating hose, 6-in. and 4-in. lines. Berths alongside quay (2), off shore (2). Presently fuels discharged: Mogas 95 and 83, kerosene gas oil, colas RS2, cutback RC2, banana spray oil.

FRESH WATER: Available by delivery hose from water hydrant on wharf.

FUELS: Gas oil 48/52 DI-API. Viscosity at 60° 36.3 S.G. at 60° 0.8435.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Ship's Register required on board.

CUSTOMS ALLOWANCE: Tobacco, one carton of 200 cigarettes. Wine/Spirit, one quart.

CONSULS:

Norway	Tel. 2214	France	Tel. 2351–2
Portugal	Tel. 2811	U.K.	Tel. 2484–5
Holland	Tel. 2811		

REPAIRS: Only welding and painting work available.

DRY DOCKS: None.

REPATRIATION: Facilities available.

AIRPORT: Distance from wharf 2 miles. Flights per day 4. Airlines: BWIA, LIAT, Caribair.

TIME: GMT minus 4 hours. No alterations to clock.

HOLIDAYS: New Year's Day (1st January); New Year's Holiday (2nd January); Statehood Day (1st March); Good Friday (late March or early April); Easter Day (April); Easter Holiday (April); Labour Day (1st May); Whit Monday; Corpus Christi (late June); Queen's Birthday (12th June); Emancipation Day (1st Monday in August); Harvest Day (1st Monday in October); Discovery Day (13th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/FIRE/AMBULANCE: Police dial 99; Fire 97; Ambulance 95.

TELEPHONES: Arrangements exist for placing on board.

GENERAL: Ships arriving after 2000 hrs. cannot be attended to until 0700 hrs. following day.

SERVICES: Compass adjusting.

SHORE LEAVE: Allowed.

DEVELOPMENTS:

New Expansions. Under Plan "A":– (See Plan Book)

The new expansion includes 2 berths which will be built to accommodate vessels between 700 and 800 ft. in length with a draft of 35 ft.

There will also be a new container park storing up to 500 containers using the laneway system, but using block stowage, about 1,000 containers can be stored. This will increase storage capacity for containers to 3,500. After the new expansion is completed, there will also be a total upland of between 15–17 acres and covered space of 100,000 sq. ft. Provision is also being made for storing up to 200 reefer containers (8 ft.×8 ft.×20 ft.).

A new transit shed will be built with 40,000 sq. ft. and cold storage with 80,000 cu. ft. for reefer cargo.

An effective part of the port of Castries can already offer transhipment facilities.

Under Plan "B":—

Length of berth 500 ft. (vessels up to 600 ft. can easily be accommodated). Depth of berth 28 ft. 18,000 sq. ft. transit shed for stuffing and unstuffing containers. Storage space for containers – 1,000 of the international size 8 ft.×8 ft.×20 ft.

SHIPMASTER'S REPORT: January 1979. Castries.

Pilotage: Compulsory. Pilot boards 0.75 miles West of Vigie light, ladder usually on the port side.

Restrictions: Vessel is able to enter and leave at any stage of the tide, day or night.

Max. Size: Max. draft 23 ft. 6 in.

Tugs: Available.

VHF: Pilot on Channel 16.

Berthing: No. 6 Berth, West Wharf: Distance from entrance to berth 1 mile. Max. LOA (Approx.) 550 ft. Max. draft 23 ft. 6 in. There is mechanical equipment available to handle palletised cargoes, adequate storage space for breakbulk cargoes and palletised cargoes. There is no equipment for handling containers, however, there is sufficient storage space for containers. The loading rate for bananas is 15 t.p.h. per gang with ship's derrick and the labour was satisfactory. Accommodation ladder required.

Services: Fresh water, fresh provisions, repair facilities, machine shop, Airport, laundry services, bunker fuel oil, diesel oil, lubricating oils, doctor, hospital, groceries and meats.

SHIPMASTER'S REPORT: January 1979. Vieufort.

Pilotage: Not compulsory, but recommended. If required Pilot boards 0.5 miles S.W. of Mathurin Point (there is a strong N.W. current off Mathurin).

Restrictions: Vessel may enter and leave at any stage of the tide, day or night.

Max. Size: Max. LOA 520 ft.

Tugs: Tugs are not available and are not necessary for docking and undocking.

VHF: Not available.

Berthing: One berth only available. Distance from entrance to berth 0.5 miles. Nature of bottom at the berth is mud. All banana loading is carried out by the side doors. Vessels berth port side to the quay. A very high rate of loading is attained (100 t.p.h.) as the stevedores carry a bundle under each arm and upon their heads. There is no mechanised equipment for handling palletised cargoes also there is no storage space for palletised cargoes or breakbulk cargoes. No storage facilities or equipment for handling containers. Accommodation ladder required.

Services Available: Only fresh water, airport and doctor available (i.e. no fuel or provisions available).

AUTHORITY: St. Lucia Port Authority.

KINGSTOWN, St. Vincent: 13.09 N. 60.57 W.

Immigration:
2 copies Passenger List.
2 copies Crew List.

Port Officer:
1 copy Declaration of Health.
1 copy Passenger List.
1 copy Crew List.
2 copies Port Officer Return.

PILOTAGE: Not compulsory. Cable Agents 24 hours prior arrival order arrange Pilot. English-speaking Pilot boards at harbour entrance – about 2 miles from anchorage. By day Pilot vessel flies Pilot flag and by night signal lights.

ANCHORAGE: Well protected. Tourist vessels lie at anchor, between 15 and 20 fathoms, or at pier.

RESTRICTIONS: None. Vessels may arrive and/or sail any hour day or night.

HEALTH: Port Health Officer boards vessel at anchorage requires Bill of Health or Master's declaration, and one copy Passenger List. Vessel's own form of manifest accepted. Vaccination Certificates are not required to be shown and passengers and crew do not require inoculation. Passenger and crew muster, not required. Health Doctor requires letter signed by Ship's Doctor (if any) and certified by Master stating all passengers and crew in possession of

valid smallpox vaccination certificates. No persons allowed leave vessel before pratique granted and Immigration officials boarded vessel.
TUGS: Are not required for berthing and none are available in the port.
BERTHING: No tidal restrictions, no strong currents. Occasional on-shore South winds during August and September but only light winds. Rest of year off-shore winds. Mooring boats available for taking lines. No special moorings required. Jetty situated at S.E. corner of harbour and about 70 ft. out from beach. Bow and stern lines to landing stage. Landing stage in good condition and well lit. If vessel at anchorage and not at berth transit ashore by ship's motor launches only. Anchorage about 2 cables distant from quay.
FRESH WATER: Available.
TELEPHONE: May be connected on board if required, rental charge 4 dollars per day.
CUSTOMS/IMMIGRATION: Customs and Immigration officers board vessel at anchorage or quay. Vessel entered and cleared at Customs House by Agents. Ship's own form of manifest accepted by Customs and Immigration. On passenger vessels, ship's bar is sometimes sealed.
IDENTIFICATION CARDS: Not required for going ashore.
VISAS: Not required for crews or passengers, but nationals of foreign countries other than U.S.A. or Canada disembarking for permanent residence require Visas.
PROVISIONS: Limited quantities of provisions, fish, fruit and vegetables. Pasteurised cows' milk obtainable. Stocks of ice available.
CURRENCY: No special currency regulations in force and passengers permitted to take ashore any amount of U.S., Canadian or foreign currency. Currency exchanges at Banks or tourist bureaux, but Bank tellers do not board vessel to exchange currency. Local currency may be re-exchanged for U.S. dollars at local Tourist Bureau before departure. U.S. or Canadian currency accepted by stores, shops, restaurants and hotels.
SHIPMASTER'S REPORT: January 1979.
Pilotage: Not compulsory. Pilot boards 0.5 miles South of Fort Charlotte Light. A heavy swell may be experienced and vessel is always rolling.
Restrictions: Vessel may enter and leave at any stage of the tide, however, berthing is not recommended during hours of darkness. Unberthing may be carried out at any time.
Max. Size: LOA 550 ft. Max. draft approximately 30 ft.
VHF: Fort Charlotte on VHF Channel 16.
Berthing: One berth only available, vessels always dock port side to. Wharf is concrete with hard rubber fenders. There are storage facilities for breakbulk cargoes and palletised cargoes, there is also mechanised equipment for handling bananas. There is no equipment for handling containers nor is there storage space for containers. Loading rate for bananas 15 t.p.h. per gang using ship's derricks. Vessel's accommodation ladder required.
Facilities Available: Fresh water, fresh provisions, airport, laundry services, doctor, hospital, groceries and meats.
AUTHORITY: Port Manager, Kingstown Port Authority.

PORTSMOUTH, Dominica: 15.32 N. 61.29 W.

(See Plan Book)

Portsmouth is an anchorage port principally engaged in the export, by lighter, of bananas and the export of agricultural produce by small inter-island vessels.

Documentation required is as for "Roseau". Safe anchorage is available anywhere within the port with distance off dependent on the size of vessel. Pilotage is not compulsory and if required must be obtained at the Roseau Pilot station.

No alongside facilities (except those for lighters) exist and no cargo handling equipment is maintained.

A steel piled/concrete decked finger pier 230 ft. long, 40 ft. wide is planned for construction at Longhouse during 1978/79. This berth will have 12 ft. of water at the head. It is intended that the pier will provide lighterage berthing and accommodate inter-island sloops, schooners and motor vessels. Final planning of upland and equipment is yet to be undertaken.

All enquiries in the respect of the use of the port of Portsmouth should be addressed to the Port Authority, Roseau.
MEDICAL: A Cottage Hospital is available.
POLICE/AMBULANCE/FIRE: Police Tel. 5222, Ambulance Tel. 5237 (Hospital), Fire Tel. 5215, Custom House Tel. 5255.

SHIPMASTER'S REPORT: January 1979.
Pilotage: Not compulsory or required.
Restrictions: Vessels may enter or leave at any stage of the tide during day or night.
Tugs: None available.
VHF: Not available.
Anchorage: Vessel anchored with the lighter jetty bearing 100°, distance 4 cables. Depth of water 70 ft. Cargo is delivered to the vessel by small lighters which are towed from a timber and steel jetty owned by Geest Line. Loading of bananas is carried out through side doors only. The quality of work was good.
Services Available: Doctor and airport (fresh water, fuel and other services are not available).

ROSEAU, Dominica: 15.17 N. 61.24 W.

(See Plan Book)

PORT LIMITS:
15° 19′ 00″ N., 61° 24′ 29″ W.;
15° 21′ 00″ N., 61° 24′ 29″ W.;
15° 21′ 00″ N., 61° 23′ 09″ W.
DOCUMENTS: Port Authority requires before commencement of discharge, 2 copies of the vessel's manifest, and 1 stowage plan or hatch block sheet. Masters are advised that these should be airmailed ahead of the arrival. On arrival, documents required are:
Port Authority:
Ship's Register to sight.
International Health Declaration.
1 Crew List.
1 Passenger List.
1 Hazardous Cargo List.
Customs:
Clearance from last port.
1 Stores List.
2 Personal Effects Declaration.
1 Manifest.
1 Crew List.
1 Passenger List.
Immigration:
1 Crew List.
1 Passenger List.
PILOTAGE: Pilotage is compulsory for berthing all vessels in excess of 100 g.r.t. Pilotage is available for anchorage on request. Pilots will board in approx. 15° 17′ 54″ N. 61° 24′ 50″ W. The pilot boat will display International code "H" by day and a white light over red light by night. Requests for Pilots should be made 24 hours in advance either through the vessel's Agent or by cable to "Domport". Vessels may contact the Port Authority through Dominica Port Radio on VHF Channel 6 from 0800-1600 hrs., and for 2 hours in advance of the vessel's ETA.
ANCHORAGE: A restricted area exists in Woodbridge Bay between:
15° 19′ 00″ N., 61° 24′ 15″ W.,
15° 18′ 00″ N., 61° 24′ 15″ W.,
15° 18′ 00″ N., 61° 24′ 00″ W.
and vessels may not anchor therein, except under Port Manager's instructions. Anchorage may be taken South of this area and in Roseau Roadstead 1.5 – 2 cables offshore in 15 – 30 fathoms depending on the vessel's size. All anchorages are steep-to and care should be exercised so as not to drag off the bank when anchoring.
MAX. SIZE: See "Berthing".
HEALTH: International declaration of Health. In addition any death, fever or suspected contagious disease should be notified in advance to Agents or Port Authority by cable or radio.
RADIO: See "Pilotage".
TUGS: None.
BERTHING: Woodbridge Bay Ocean Berth Length 500 ft., min. depth 36 ft. MLWOST.

Schooner berth 120 ft. with a depth alongside of 9 ft. (inshore) to 36 ft.

Roseau Jetty, Length 93 ft. min. depth 18 ft.
STEVEDORES: Arranged by vessel's Agents.
CARGO HANDLING FACILITIES:

Mechanised Cargo Handling: Breakbulk cargo is handled palletised on ships/shippers/port pallets. Adequate forklift trucks, trailers, and tractors are available to work all berths, Small inter-island vessels can be discharged by 5-ton mobile cranes (2). Containers up to 18 d.w.t. can be handled ashore if placed on port trailers by ship's gear. Ro-Ro barges capable of trimming to ramp height of +10 ft. are accommodated on the South end of Woodbridge Bay Pier.

A ramp with 10 ft. water at MLWOST is planned at the Dominica Mining Co. facility 1 mile North of Woodbridge Bay. This could only be used by special arrangement and prospective users area are advised to contact the Authority well in advance.

Tankers/Bulk cement carriers: Petroleum products are presently handled at 5 different anchorages on the west coast.

L.P.G. Woodbridge Bay (2) max. draft 12 ft. floating hose from vessel.

Mogas – Gasoil (Dieselene), Kerosene, Sprayoils: Rockaway (2), 1 mile North of Woodbridge Bay, draft 18 ft. 800/900 ft. floating hose from ship.

Boiler Fuel (Bunker C): Belfast, 2 miles North of Rockaway, max. draft. 18 ft. (up to 25 ft., if vessel equipped for stern discharge) 4-in. submarine line.

Bulk Edible Oils and Soap Chemicals: Belfast max. draft 14 ft., 4-in. floating hose (200 ft.) from shore.

The above are single anchor, stern-to berths with stern lines to shore posts. Vessels should have at least 4 ropes available aft and provision to bend 2 lines together.

Bulk Cement: Rockaway, mooring to buoys off Dominica Mining Co. jetty (mooring shackles required). this berth is for specialised cement carriers only, max. draft 15 ft.

Quarry Products: Rockaway – Ro-Ro ramp. Specialised vessels only.

The above are private facilities but pilotage is available. In the case of Woodbridge Bay (L.P.G.) pilotage is compulsory. Tankers in their ETA advice should include their cargo by products and their draft.

MEDICAL: One Government General Hospital, One Private group Medical Clinic and One Private Dental Clinic are available.

On board visits by a Doctor Can be arranged.

Where possible advance notice should be given.

DENSITY: Approx. 1025.

FRESH WATER: Available alongside all berths at a cost of EC $12.00 for 1,000 gals.

FUEL: Dieselene (Gas oil) available in limited quantities ex-tank wagon at all berths. Other grades not available.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Beam and board hatches, crew or stevedores; Ship's option. Patent Hatches; ship's crew.

CERTIFICATES: Previous port clearance; ship's register, to sight.

CUSTOMS ALLOWANCE: 200 cigarettes, or 0.5 lb. tobacco or 25 cigars, 26 ounces of spirits per crew member.

IDENTIFICATION: Dock passes for crew members will be issued through the vessel's Agents.

CONSULS: (Or Consular Agents).

		Business	*Residence*
France	C. A. Butler	Tel. 2033	Tel. 1146
Netherlands	W. A. Astaphan	3221	2524
Belgium	Achille L. Pinard	2781	2756

REPAIRS: Minor and emergency repairs can be arranged. Engines and deck gear cannot be put out of service without permission of the Port Manager.

REPATRIATION: Limited inter-island flight capacity to nearest international airports – Guadeloupe, Martinique, Antigua, Barbados.

AIRPORT: Melville Hall 37 miles. Inter-island services only.

TIME: GMT minus 4 hours.

HOLIDAYS: New Year's Day, Carnival (Mardi Gras) 2 days. Good Friday, Easter Monday, Labour Day, Queen's Birthday, Whit Monday, August Monday, National Day (Nov. 3rd–4th), Union Conference Day (A Sunday in November), Christmas Day, Boxing Day.

Minimum working: Can be arranged on these days, but it is not advised over the Carnival or National Day Holidays.

POLICE/AMBULANCE/FIRE: Police Tel. 2222 or call on 2182 kHz., Fire Tel. 2888, Ambulance Tel. 2321.

At anchor or away from a telephone, blow 3 short and 1 prolonged blast at frequent intervals until acknowledged on VHF Channel 16 or by lamp.

TELEPHONES: On board service can be provided at the Ocean Wharf, Woodbridge Bay.

SERVICES: Assistance can be given for emergency repairs to electronic equipment, compass adjusting and D/F calibration subject to advance notice. Provisions can be obtained, but advance notice should be given especially for fruit and vegetables of high quality.

SHORE LEAVE: After inward clearance, there are no restrictions on shore leave. Masters are advised to note that immigration law holds the vessel/owner/agent, financially reponsible for any crew member or intransit passenger left behind (for whatever cause). Vessel's having no accredited Agent will be required to satisfy Immigration Authorities before outward clearance is granted.

SHIPMASTER'S REPORT: January 1979.

Pilotage: Compulsory. Pilot boards 0.5 miles off the quay and requires two hours notice of vessel's arrival.

Restrictions: Vessel is able to enter or leave at any stage of the tide day or night.

Max. Size: Max. LOA 550 ft.

Tugs: Not available. Vessels able to dock and undock without the aid of tugs.

VHF: Channel 16.

Berthing: One berth only available with wooden fenders. A heavy swell may be experienced whilst alongside berth as it is very exposed. Loading rate for bananas is 16 t.p.h. per gang. There is ample mechanised equipment for loading palletised cargoes. There is also storage space for breakbulk and palletised cargoes. The quality of the labour was good. There is no equipment for handling containers and there is no storage space for containers. Accommodation ladder required.

Services Available: Fresh water, fresh provisions, airport, hospital and doctor (no fuel, repair facilities or other services available).

AUTHORITY: Dominica Port Authority.

ST. GEORGE'S, Grenada: 12.02 N. 61.46 W.

DOCUMENTS:

Health Authority: Health Declaration.

Harbour Master: 1 Crew List, 1 Passenger List.

Customs: Stores List, Crew Declaration, Crew List, Passenger List, Clearance from last port.

Immigration: 2 Crew Lists, 2 Passenger Lists.

PILOTAGE: If Pilot is required at daybreak order should be placed by 1600 hrs. the day before.

ANCHORAGE: Vessels anchor in position 12° 02' N., 61° 46' W.

BERTHING: Length of berth 850 ft. Depth alongside 28 ft. at the Southern end and 21 ft. at the Northern end. Berth owned by the Government of Grenada.

STEVEDORES: Available.

FRESH WATER: Available.

FUEL: This can be arranged with sufficient notice.

TELEPHONES: Telephones can be arranged through the local Agent.

MEDICAL: Doctor and general hospital available.

SHIPMASTER'S REPORT: January 1979.

Pilotage: Pilotage not compulsory but recommended. Pilot boards off the channel green buoy.

Restrictions: It is not recommended to enter in hours of darkness, however, it is possible to unberth. Vessels may enter and leave at any stage of the tide.

Max. Size: Max. LOA for single screw vessel is 520 ft.

Tugs: Tugs are not available and they are not required for docking and undocking.

VHF: Not available.

Berthing: There is only one quay and vessels usually dock port side to. Berthing in hours of darkness is not recommended as there is a sharp bend in the approach channel. Loading rate for bananas is 10 t.p.h. per gang with ships derricks. There are no facilities for loading palletised cargoes, however, there is adequate storage space for both breakbulk cargo and palletised cargoes. There is no equipment or storage space for containers. Accommodation ladder required.

Fresh Water: Available.

Medical: Doctor and hospital available.

Airport: Available.

Services: Laundry services and provisions available.

NOTES

Please also advise Shipping Guides Ltd.

Yemen Arab Republic

HODEIDAH: 14.48 N. 42.55 E.

FLAG: It is essential that from the time they enter Yemen territorial waters all vessels fly the Yemen Arab Republic flag and this should be flown continuously until they leave these waters on sailing. Failure to observe this courtesy may result in a heavy penalty. The design of the flag is red, white and black horizontal strips of equal size with green star in centre of white strip.

DOCUMENTS: On arrival 8 copies of Manifests of cargo for discharge are required and each must be endorsed with the word *Correct* by the *Customs Authorities* at the Port of Loading. It is advisable that at least 2 of the 8 copies of manifests on board the ship should be freighted copies, otherwise 2 additional copies, showing freight details should be airmailed to Hodeidah separately to arrive in advance of the vessel. The Master should also be in possession of 1 copy of each Bill of Lading and certificate to show vessel is not blacklisted.

PILOTAGE: Pilotage is compulsory and as the entrance of the Channel giving access to the Port cannot be observed from the port area itself it is essential that accurate ETA's be given to Hodship Hodeidah (the Agent) in order to avoid delays waiting for a Pilot.

Vessels will be piloted down a dredged channel of about 8 miles in length. The channel, which is buoyed with black starboard and red port buoys, is 7.5 m. deep and 100 m. wide. – *The buoys are not at present lit and therefore entrance and exit from the harbour can only take place during daylight hours.* It is understood that in due course illumination of buoys and leading marks will be carried out and night movement possible.

ANCHORAGE: Masters are also recommended to ensure that on arrival they anchor off the entrance to the new port to await the Pilot and do not anchor off the old port opposite the town some 5 miles to the South and which is still shown as being the Port of Hodeidah on some charts. Vessels anchoring in the wrong area may suffer some delay before they can be contacted and asked to proceed to the correct area. Masters should be advised to anchor at the outer anchorage in the following position: 14° 55′ N., 42° 54′ E.

MAX. SIZE: Max. draft alongside 23 ft.

HEALTH: All members of the crew must be vaccinated against yellow fever, smallpox and cholera otherwise permission will not be given to disembark.

RADIO: Masters should also ensure that a radio watch is kept to receive calls from the Port Authorities. The Hodeidah Radio station is operative between 0600 and 1800 hrs. daily, the call sign is: 4WD or 4WD3 (short).

TUGS: 1 tug of 450 h.p. Pilot launch 250 h.p. also available to assist.

BERTHING: The quay is 370 m. in length with 3 berths, the first 70 m. long, depth 6 m., the second and third are of 150 m. length and 8.5 m. depth. *Officially, ships berthing are restricted in length to 140 m. and to a max. draft of 23 ft., but vessels up to 150 m. have berthed. For such vessels prior advice is required.*

The quay is concrete construction and is well founded, vessels being secured to bollards in the normal manner. Use of rat-guards is recommended. The quay is equipped with 3 electric cranes described as having a max. capacity of 5 tons. At present only 2 of these cranes can be operated simultaneously owing to insufficiency of current.

There is also a dolphin berth for discharging of petroleum products, which is connected by submarine pipes to storage tanks near the port area. The depth alongside is 6 m.

STEVEDORES: All labour is provided by Agent's representative including winchmen and tally clerks, but winchmen are provided entirely at ships' risk.

Rates of discharge vary but are quite satisfactory and with bagged cargo the average obtained is 15 tons per hatch per hour. Night work is possible.

It is normal for labour working on board to request drinking water to be supplied. Whilst this may be unusual Masters are advised to comply, as otherwise slow working or perhaps even stoppages may result.

Vessels are expected to supply food on board to cargo-supervisors, foreman, and tally clerks. It may be left to Master's discretion whether this is supplied, but if not the Agency will have to supply same and the cost will be debited to the vessels.

WORKING HOURS: Normally from 0600 hrs. to 1400 hrs. and again from 1700 hrs. to midnight. Additional work outside these hours, including after midnight can usually be arranged if necessary, although this cannot be guaranteed. Any work after midnight is overtime.

MEDICAL: Hospitals at Hodeidah and Sanaa-Taiz.

FRESH WATER: Available; pumping rate 10–15 t.p.h.

FUEL: Available from Yemen Petroleum.

CONSULS: (and Embassies):

Algeria
China
Egypt
E. Germany
Ethiopia
France
Italy
Iraq
Korea
Kuwait
Lebanon
Libya
Saudi Arabia
Syria
United Kingdom
U.S.A.
U.S.S.R.
W. Germany
Yugoslavia

REPAIRS: Light repairs can be carried out.

AIRPORT: Flights from Cairo to Hodeidah, Asmara to Taiz and Jeddah to Sanaa. International airport under construction.

TIME: GMT plus 3 hours.

HOLIDAYS: 1st January Eid Al-Adha Wagfa; 26–28th January Eid Al-Adha; 16th February Islamic New Year; 5th May Birthday of the Prophet; 26–30th September Proclamation of the Republic; 5–8th November Eid Alfitr.

Friday is the weekly day of rest, Sunday being a normal working day. There are also a number of Moslem holidays, the date being based on the Moslem calendar, and which therefore vary from year to year on the Christian calendar. Work is usually possible on such days but cannot be guaranteed. Holidays for special occasions are also liable to be declared at short notice. Friday if worked 25% and public holidays 100% surcharge. During the Moslem fast period of Ramadhan lasting about twenty eight days, which again varies from year to year, work is slower.

SHORE-LEAVE: Allowed. The Master should prepare a list of persons wishing to go ashore as Agent has to issue I.D. cards.

REGULATIONS: It is strictly forbidden for crew and passengers on board to take photographs while a vessel is in the harbour approaches or secured to the jetty in harbour.

Any vessel which permits oil and/or water to be discharged into the harbour will be liable to a minimum penalty of US $100.

AUTHORITY: Hodeidah Port Authority.

MOCKA: 13.17 N. 43.10 E.

Mocka is a small port with equipment for loading and unloading.

BERTHING: 100 m. of quay for small craft up to 7 ft. draft. Vessels of up to 28 ft. draft may anchor in open roads 1.5 km. from pier. Cargo is discharged into lighters with total capacity of over 2,000 tons. It is inadvisable to stow cargo in No. 1 hatch during windy season September to May.

TUGS: 2 available.

FUEL: Not available.

TIME: GMT plus 3 hrs.

NOTES

Please also advise Shipping Guides Ltd.

Yemen, People's Democractic Republic of

ADEN, (including Little Aden): 12.48 N. 44.54 E.

DOCUMENTS:
3 Crew Lists for Ship's Agent, Police and Immigration.
3 Passenger lists for Ship's Agent, Police and Immigration.
1 Health Form to be shown to Pilot on boarding and handed to Ship's Agent.
Manifests, Bills of Lading if landing cargo only.
Ship's Register to be sighted by Pilot.
Arrival Declaration to be filled in by Ship's Agent after arrival.
Dangerous material declaration to be handed to Pilot on boarding.

PILOTAGE: Compulsory for all vessels proceeding to oil berths or over 100 tons net. To call Pilot fly International Code Flag "G" or red/white/red lights at night. Call "Harbour Control" on VHF Channel 16, or R/T 2182 kc/s., or Signal Station by lamp. 48 hours notice of ETA with draft to Harbour Office.

Pilot boat will meet ship at the Fairway Buoy in all weathers. Pilot boat is 50 ft. launch painted red, flying Pilot flag by day or white/red lights at night. Pilot will board on port side of ship by Pilot ladder. Vessels waiting Pilot can anchor anywhere in Outer Harbour except in a Prohibited Area of 2,000 ft. from Fairway Buoy.

ANCHORAGES: Ample anchorage area available with depths from 18 to 54 ft.

(*a*) Anywhere North of Fairway Buoy clear of Main and Little Aden Channels and clear of Prohibited Area mentioned above.

(*b*) Deep water anchorage anywhere to S.W. of Fairway Buoy clear of Little Aden Channel and Prohibited Area mentioned above.

MAX. SIZE:
Aden:

(*a*) Max. length 900 ft., breadth no restriction, depth 38 ft. at datum for vessels taking bunkers from BP, Shell or Gulf.

(*b*) Vessels taking bunkers from Mobil, Caltex, Stanvac and Esso, max. length restricted to tankers of 750 ft., and passenger ships of 600 ft., breadth no restriction, depth 39 ft. at datum.

(*c*) Larger vessels can be considered on application to the Port Officer. Longest vessel to enter 940 ft.

Little Aden Refinery:
Max. length 760 ft., breadth no restriction, depth 40 ft. at datum and max. deadweight 55,000 tons.

Note: In both harbours vessels manoeuvring require 2 ft. water under keel, and vessels of draft 37 ft. and above require 4 ft. water under keel.

Ballast draft for Tankers: All tankers when manoeuvring within the port shall be ballasted properly to a mean ballast draft which shall not be less than half the Summer draft and the trim by the stern not exceeding 6 ft. These figures are the minimum for normal conditions and may be increased when conditions necessitate at the discretion of the Pilot.

HEALTH: Vessels requiring pratique fly International Code Signals or 3 red lights at night.

Control of quarantinable and infectious diseases is direct responsibility of Port Health Officer. All passengers from infected local areas except children under age of one year are required to have valid international certificate of vaccination or revaccination against yellow fever and cholera. Valid certificates of vaccination against smallpox are required of arrivals from all countries.

RADIO: All ships landing passengers are boarded by Assistant Port Health Officer unless radio pratique has been given. Pratique may be obtained by wirelessing Port Health Authorities no earlier than 12 hours and no later than 4 hours before arrival, in accordance with international procedure. All landing passengers medically inspected and vaccination certificates checked on board before free pratique granted. Ships having infectious diseases on board are also boarded; after examining the case and taking any necessary precautions the Assistant Port Health Officer grants restricted pratique. Ships also inspected for issuing deratting exemption certificates. Deratting carried out when necessary and deratting certificate issued.

Free zone. Initial Stage 525,420 sq. ft. open space and 162,000 sq. ft. covered space. Import and export industrial facilities. No restrictions, no taxes. Transhipment storage Free for unlimited period.

STEVEDORES: ETA advice to Ship's Agents at least 48 hours before arrival.

MEDICAL: Advance notice for medical attention not normally required except for serious cases requiring doctor's attendance on board, or ambulance cases. Vaccination certificate required for landing. Hospital facilities available.

TANKERS: Tankers carrying dangerous petroleum (flash point below 73° F) and those not gas free cannot enter Aden Harbour during hours of darkness. They can enter Little Aden day or night. Slop (residue) discharge facilities available at Little Aden. 4 tanker berths for discharge/loading at Little Aden with max. datum depth of 40 ft.

Berthing at Oil harbour: Functions of Oil Harbour Little Aden to receive crude oil in bulk for oil refinery and to export refined petroleum products. Vessels carrying cargo for refinery other than oil discharge at Inner Harbour.

Oil harbour has finger jetty and 2 T-head jetties which provide berths for 4 tankers. Tankers of up to 55,000 tons Summer deadweight can be accommodated.

Berth	*Type*	*Normal maximum length of ship in feet*	*Datum depth in in feet*
1	Dolphin & mooring dolphins	750	40
2	Dolphin & mooring dolphins	750	40
3	Dolphin & mooring dolphins	750	40
4	Dolphin & mooring dolphins	750	40

DENSITY: Salt water at all times.

FRESH WATER: Ample available, delivered by barge in Aden at about 50 t.p.h. Ordinary water in Little Aden supplied by pipe-line at about 40 t.p.h. and condensate at about 2 t.p.h.

FUEL:

(*A*) B.P., Shell Gulf.
Marine fuel 2500 sec., 1000 sec., 600 sec., 200 sec.
Diesel oil and gas oil.

(*b*) Caltex, Mobil, Esso, Stanvac.
Marine fuel – all grades below 3,500 sec.
Diesel oil and gas oil.
All supplies done on a Nomination basis through the Company's Head Offices, with the vessel giving at least 48 hours notice to Aden.

FIRE PRECAUTIONS: As per the Refinery regulations. Tug wires to be rigged.

GANGWAY/DECK WATCHMEN: It is recommended watchmen are employed; they can be supplied by Ship's Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, derrick-topping by ship's crew. Vessels not to move in harbour with beams off.

CUSTOMS ALLOWANCE: Tobacco/Wine, Spirit allowance. No restriction at the moment. Bonded stores not allowed to be supplied more than 1 hour before ship sails.

IDENTIFICATION CARDS: Not required at the moment.

CONSULS:

Embassies	Consuls
United Kingdom	Belgium

Cuba	
P.R.C.	
Ch.SR.	
P.R.B.	
K.D.R.	

REPAIRS: Workshops are equipped to carry out: Boiler repairs; Plating and sheet metal work; Galvanising work/moulding work; Welding and blacksmith's work; Main and auxiliary machinery repairs; Carpentry and joinery work; Electrical and plumbing work; Refrigeration repairs; painting, cleaning and chipping. Repairs afloat to vessels up to 80,000 tons are undertaken; repairs to the largest vessels carried out mostly in Outer Harbour.

Wireless engineering section with fully qualified personnel giving round-the-clock service of repairs and maintenance of radar and wireless equipment.

DRY DOCK: 1 sideways slipway taking 1,500 tons and floating dock lifting capacity 4,500 tons. Length 137 m., breadth 31 m. Max. draft 6.0 m.

REPATRIATION: Arranged through Ship's Agent and Immigration.

AIRPORT: About 5 miles from port. Flights to U.K. via Beirut (Middle East Airlines), Khartoum (Sudan Air Lines).

TIME: GMT plus 3 hours. No alteration of clocks.

HOLIDAYS: Most holidays are religious which have moveable dates. National holidays are 14th October and 30th November. Cargo work usually carried out during all holidays. Friday is a public weekend holiday.

POLICE/AMBULANCE/FIRE: Ambulance Crater 53232; Harbour Police 22851; Port Health 22626/7; Fire 22222.

TELEPHONES: No connection to ships but link calls can be made on VHF through Yemen Communications using Channel 16 to call and working on Channel 26. Some Agents have private VHF channels.

GENERAL: Outer harbour contains ample anchorage area for vessels requiring datum depths up to 54 ft. Inner harbour approached by 2.7 mile dog-leg channel, dredged to 35 ft., from Fairway buoy in Outer Harbour where Pilots board. Inner harbour protected by breakwater at Steamer Point and by rubble mound. It provides 24 buoy or anchor-and-buoy berths, including 13 with oil bunkering facilities. Majority of these berths have a datum depth of 30 or 38 ft., with max. length of ship ranging from 275 to 750 ft. In addition 3 dolphin berths, with bunkering facilities, of 39 ft. datum depth and normally accommodating ships of 750–900 ft. max. length; vessels of greater length can be accommodated with the approval of the Port Officer. Quays and wharves cater for shallower-draft vessels and lighters.

Oil harbour, serving refinery at Little Aden, reached by 38 ft. channel from Fairway buoy, provides facilities for tankers of up to 750 ft. All berths and anchorages are under the jurisdiction of the Port Officer.

SHORE LEAVE: *Regulations:* In accordance with Art. 8 of the Immigration Rule No. 28 of the year 1969, all crew members coming ashore will be excused from obtaining visa provided they surrender their passports to the Immigration Officer-in-Charge. These passports will be given back to the holders before they return to their particular vessels. Any crew member unable to comply with these instructions will not be permitted to visit the town.

Ships' crew are not allowed to stay ashore after 0300 hrs., unless permission is granted for longer period.

REGULATIONS: Vessels must fly the National flag of P.D.R.Y. at foremast. No movement of "dangerous petroleum" at night. Vessels must vacate oil berths on completion of bunkering. Main engines must not be immobilised in an oil berth. Sufficient crew must remain aboard vessel at all times to move her.

SHIPMASTER'S REPORT: 1976

Documents:

Pilot: Sights Ship's Register to check tonnages.

Customs: 2 Crew Lists; 1 Bond List.

Immigration: 2 Crew Lists.

Doctor: 1 Health Form; 1 Vaccination List (smallpox).

Note: Crew List should have consecutive numbers as well as Agreement numbers.

Agents:

2 Crew Lists; Arrival information sheet; Statement of Owners full address also Cable address; 2 Arrival declaration for Yemen Ports Corporation; 2 Aden Port Log; 1 Charges sheet for Mail; 1 Sailing information sheet; 1 Currency refund sheet.

Agent brings these Forms on board and will assist with filling in the information.

Communications: It was found impossible to make Radio Contact with Aden prior to 5 days before arrival. Best time seems to be after Aden sends its Traffic List. VHF contact was made at 12 miles as the hills around Aden appear to blanket signals when further away. Channels 16 or 12.

Approach: This is straight forward. The B.A. Charts appear to be well up-to-date. The Fairway Buoy is easily seen at 8 miles. Pilot boards here. Pilot ladder required. Authorities will not allow the accommodation ladder to be used.

Mooring: There was a trainee Pilot with both the inward and outward Pilot.

Ship was swung using starboard anchor and 1 tug aft. Berthed at No. 4 Berth. Forward: 3 ropes to buoy on inside plus starboard anchor 5 shackes. Aft: 1 rope from port quarter and 1 from starboard quarter taken to outside buoy, then 2 ropes, 1 from each quarter taken to inside buoy. Ship then hove to be centred between the 2 after mooring buoys. When ship in position oil pipe-line, on floats is towed alongside.

Visit: Agent boarded with Doctor. At first Doctor was insisting all had to have Cholera vaccinations but this seems to be so that he can charge the fees and is not really necessary. Immigration and Customs boarded. All pleasant and helpful. Bond was sealed.

Port Facilities: 2 fairly powerful tugs. Numerous mooring boats, 1 floating crane seen but as to lift capacity this was not ascertained. Port is run by The Yemen Ports Corporation. Like the Agency it is State owned.

Watchmen: Agents automatically provide 2 watchmen. Seemed to be alert.

Regulations: Masters are requested to assist the Port Authority by not allowing Bumboatmen or fishermen to board without written permission. The Port Authority advises Masters to be most careful if they do issue written permission. There were no bumboats about and no one seeked permission to come aboard to do business.

One half hour prior to sailing the Pilot signal red-white-red in a vertical line or "G" to be hoisted also call Port Control on VHF 16.

Use of ship's whistles or sirens is very controlled.

Bunkering: Ship's crane used to hoist pipe-line aboard. The bunkering operation went smoothly and the Oil people seemed co-operative.

Walport Film Exchange: Agents were cabled but it is necessary for an Officer to go with the Agent to make the exchange.

Mail: Mail posted in London on 22nd March or 23rd March was stamped as having arrived Aden 28th or 29th March.

General: It would seem that the Port Authority, State, etc., are very keen to build up a thriving Port. It would also seem that they endeavour to give a good efficient service. I gather there is a special duty free shop ashore for the purchase of souvenirs, goods, etc.

AUTHORITY: Director General, Port of Aden Authority.

NOTES

Please also advise Shipping Guides Ltd.

Yugoslavia

BAR: 42.05 N., 19.03 E. (See Plan Book)

DOCUMENTS/HEALTH: General Declaration, Health Declaration, Crew Lists and Passenger Lists.

PILOTAGE: Advance notice 24 hours through ships Agent. Pilot boat blue hull, white deck house, with letter "P" on each side. Pilot boards off West Breakwater.

ANCHORAGE: Safe anchorage in about 57 m. off West Breakwater. Anchoring not allowed nearer then 0.5 mile off Breakwater.

RESTRICTION: Vessels enter/leave port by day and night. Tankers allowed only during daylight. Depth entrance 14 m..

MAX. SIZE: Fully loaded vessels up to 14 m. draft.

RADIO: Bar-Radio, call sign YUW, 500 kc/s. and 447 kc/s. Radio telephony on 2182 kc/s on 2 meters band and on Channel 16.

Pilots/Agents can be contacted through Bar-Radio on VHF.

TUGS: Available.

BERTHING: Berth assigned at Agent's request or Receiver's/Shipper's, both for liners or tramps, at the daily meeting of the Harbour Board.

STEVEDORES: The Port Enterprise "Luka Bar" is the sole stevedoring company. Work is done in 2 shifts: first 0600–1400 hrs., second 1400–2200 hrs. Third shift can be ordered at daily meeting, paid as overtime.

MEDICAL: Medical care available at Medical Centre at Bar.

TANKERS: New oil berth can accommodate tankers up to 80,000 d.w.t., draft limit 14 m. Bunkers from local bunker station. Tank cleaning, pumping of slops and degassing not permitted in port.

Tankers must be ready to leave port at 30 minutes notice, at any time and at request of Port Authorities.

CARGO-HANDLING FACILITIES: Available for all kinds of general cargo, containers, pallets, Ro-Ro. bulk, fuel oil and chemical cargoes. Regular passenger service to Italy and from May – October to Greece.

DEVELOPMENTS: See "Plan".

FRESH WATER: Available from hydrants on quay.

DENSITY: Sea water average Salinity.

FUEL: Can be obtained from local bunker station. All grades available. A fuel barge may be available in the near future.

GANGWAY/DECK WATCHMEN: Available at Captain's request.

OPENING/CLOSING HATCHES: Normally performed by crew, or as per Charter Party.

CARGO GEAR: *Mobile Shore Cranes:* 6×5/6 tons, 3×3 tons, 3×8 tons. Fork-lifts capable of handling containers, Vacuvators, 3 cranes for bulk cargoes. 1×40 ton container crane. If not agreed in C/P, loading and discharging is by shore cranes.

CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount wine/spirits per man per day.

IDENTIFICATION CARDS: Shore passes issued by local Police.

SHORE LEAVE: Allowed.

CONSULS: Same as "Rijeka".

REPAIRS/DRY DOCKS: Dry Docks at Shipyard "Veljko Vlahovic', Bijela 36 miles from Port of Bar, capacity of about 130,000 d.w.t. and 35,000 d.w.t., available for all types of deck and engine repairs. Minor damage can be done while loading/discharging.

REPATRIATION: From Bar by bus, train (International Lines), and ship. From Airports Tivat, Titograd and Dubrovnik by plane.

TIME: Central European Time, GMT plus 1 hour. No daylight saving.

SERVICES: At nearby town of Tivat is representative of Yugoslav Register of Shipping, and compass adjuster. Other services at Captain's request.

HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 13th, November 29th and 30th. Work can be arranged on Sundays and 2nd day of two-day holiday.

POLICE/AMBULANCE/FIRE: Police Tel. 92; Ambulance Tel. 94: Fire Tel. 93.

AUTHORITY: Lucka Kapetanija.

AGENT: Jadroagent – Bar. Topolica b.b. P.O. Box 10 81350 Bar. Cable: Jadroagent Bar. Telex: 63141 yu jadrag.

DUBROVNIK (Gruz Harbour): 42.38 N. 18.07 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".

PILOTAGE: Compulsory. Pilot boards at a point situated approximately in centre of triangle formed by Kolocep Island, Daska Island and Grebeni Rocks.

ANCHORAGE: In about 22 fathoms in channel between Daksa Island and mainland. This anchorage is exposed to strong N.N.E. winds in Winter time.

RESTRICTIONS: Only port of Gruz is open to commercial traffic, the old port of Dubrovnik (within the city walls) can accommodate only yachts and small craft drawing under 9 ft.

MAX. SIZE: Max. length 230 m., max. draft 32 ft., no limits on beam.

RADIO: Call sign YUX, working on 500 kc/s. and 447 kc/s., from 0800 to 1100 hrs. and 1600 to 1900 hrs.

TUGS: No permanently stationed tug boats, but can be ordered when necessary from other ports.

BERTHING: Berths for 5 ocean going vessels. Six cranes from 1, 5 to 25 tons lifting capacity.

CARGO HANDLING FACILITIES: The port handles some bulk cargoes (grain and bauxite) occasionally and in small quantities but is not specially equipped for handling these and other cargoes.

STEVEDORES: One State stevedoring company.

MEDICAL: General hospital and medical facilities available.

FRESH WATER: Available from hydrants on quay.

FUEL: Not available. Only oil for diesel engines in limited quantities. Heavy fuel can be delivered by coastal tankers from Split.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: If not performed by crew, stevedores.

CUSTOMS ALLOWANCE: About 40 cigarettes and limited amount wine/spirits per man per day.

CARGO GEAR: Although operations are performed usually with shore cranes ship must have efficient cargo gear and relative certificates.

IDENTIFICATION CARDS: Issued by local police.

CONSULS: None.

REPAIRS: Small repairs only.

REPATRIATION: By bus, ship or plane from Dubrovnik International Airport.

TIME: Central European Time. GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police, tel. 92; Fire, 93; Ambulance, 94.

SHORE LEAVE: Allowed.

AUTHORITY: Lucka Kapetanija Dubrovnik.

AGENT: Jadroagent – Dubrovnik. Gruska obala 26, 50000 Dubrovnik. Cable: Jadroagent Dubrovnik. Telex: 27514 yu jadrag.

KOPER: 45.31 N. 13.44 E.

PORT LIMITS: The seaward boundaries of the port are between "Debeli Rtic" (Punta Grossa) and Pt. Vilizan.

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
5 Cargo Manifests.
2 Freighted Manifests.
2 Bills of Lading.
2 Store Lists.
1 Crew Effects List.
1 Cargo Gear Certificate.
1 Derating Declaration.
1 Health Certificate.

PILOTAGE: Pilot station may be contacted on VHF Channels 16 and 20 from 0600 hrs. until 2200 hrs. every day excluding holidays. Pilot boards 1 mile from entrance in roads or at anchorage. Definite notice to be sent by telex 24 hours before vessel's arrival in port area through its Agent in Koper. In case of bad weather, ship must wait for a Pilot at anchorage.

ANCHORAGE: Port area, depth 17 m., sandy bottom. Safe anchorages in case of S.E. wind near Pt. Vilizan and in case of N.E. wind near Debeli Pt. (Punta Grossa).

RESTRICTIONS: Vessels enter port by day and night, except tankers which enter during daylight hours and at nights in fair weather.

MAX. SIZE: General cargo and container vessels drawing up to 32 ft. and tankers with 39 ft. draft. No length restrictions.

HEALTH: Ship must have Health Declaration and in this case pratique is automatic. In the event of any suspected disease or fever on board, Master must advise Harbour Master or Agent by VHF Channel 16 or by telegraph.

RADIO: Communication on MW and SW through Rijeka Radio.

VHF: Communication on Koper Roads on Channel 16, 20 and 12. On Channel 20 it is possible to telephone outside the country.

RADAR: No service available.

TUGS: In area of old port, 2 available, 750 h.p. and 1,500 h.p. equipped for fire fighting.

BERTHING: 1,200 m. of operative quay with depths from 6 to 12 m. Berth Nos. 2, 8, 9 are equipped with shore cranes. On other berths handling is by ship's own gear.

CRANES: 4 shore cranes with capacity of 20 tons each and 1 with capacity of 25 tons. 3 shore cranes are on Pier 8, 9 and 2 on Pier 2. Mobile cranes: 2×20 tons, 1×12 tons.

Timber terminal is equipped with Portal crane of 8 tons. All harbour services are mechanised, i.e. performed by fork-lifts, trucks, transporters, pallets and other modern means.

BULK CARGO FACILITIES: 2 berths, (No's. 8 and 9) with length 280 m. together equipped with 3 shore cranes (grab discharging/loading) with max. draft 32 ft. Loading/discharging rates for grain, ores, meal, etc. 1,500 M/T per WWD. Fertilisers etc. 1,000 tons WWD. Also used for handling logs and timber.

SPECIALISED CARGO HANDLING FACILITIES: 1 Ro/Ro berth (No. 6) for handling Ro/Ro traffic.

The temporary container berth (No. 2) is equipped with 2 shore cranes with annual capacity of 40,000 TEU. the new container berth (No. 7) has recently been completed and will become operational in June 1979 with a capacity of 60,000 TEU. For handling containers the port has 2 straddle carriers for 20 – 40 ft. containers. Containers stacking 2 high, 6 Mafi tugs, forklifts for handling empty containers, etc.

Terminal for liquid chemicals has a depth of 10 m.

BRIDGES: None.

STEVEDORES: Gangs ordered from the Port of Koper Authority, who are stevedores, by Agents and forwarding agents in Koper.

MEDICAL: Medical assistance and hospital available.

TANKERS: Tanker berth for crude oil with max. draft 40 ft., equipped with 3×8 in. arms.

FRESH WATER: Available from any pier. Rate of delivery about 15 t.p.h.
FUEL: None available.
FIRE PRECAUTIONS: Usual precautions.
CONSULS: Italy.
REPAIRS: Small repairs can be carried out at Koper. In Izola, 2 miles from Koper, is wharf "2nd October". The repair service for containers is in the Port.
DRY DOCKS: In Izola for vessels up to 16,000 d.w.t.
SURVEYORS: In Koper – Jugoregister. In Rijeka or Trieste all representatives.
GANGWAY/DECK WATCHMEN: Available at ship's request.
HATCHES: Opening/closing hatches. If not performed by crew, then by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and 1 bottle of spirits and reasonable amount of wine per man per day.
CARGO GEAR: 40 ton heavy lift shore crane available.
REPATRIATION: By bus, by railway from Koper or by air from the airport.
AIRPORT: Ljubljana (Brnik) – 120 km. Rijeka – 100 km. Pula – 100 km. Ronke (Italy) – 80 km.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's days (1st, 2nd January), 27th April, May Days (1st and 2nd May), 4th July, 22nd July, 1st November, Republic Days (29th, 30th November).
POLICE/AMBULANCE/FIRE: Police No. 92, Ambulance No. 94, Fire No. 93.
TELEPHONES: From anchorage it is possible to phone through VHF Channel 20. Telephones can be installed onboard at berths Nos. 1a, 1, 2, 3, 4 and 5.
SHORE LEAVE: Allowed after clearing inwards (free pratique).
IDENTIFICATION CARDS: Shore pass issued by local police (without photograph).
REGULATIONS: None.
DEVELOPMENTS: Construction of a new berth for bulk cargoes (No. 10) nearing completion, will become operational in January 1980. New Ro/Ro ramp under construction until March 1980. The equipment (container crane with lifting capacity 40 tons) for the container berth (No. 7) will start operating in June 1979.

2 new straddle carriers expected December 1978. The new equipment will be used at the timber terminal.
AUTHORITY: Lucka Koper.
AGENT: Jadroagent – Koper. Vojkovo nabrezje 30, P.O. Box 60, 66000 Koper. Cable: Jadroagent Koper. Telex: 34234 yu jadrag.

PLOCE: 43.03 N. 17.26 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards vessel at entrance of the channel.
ANCHORAGE: Vessels may anchor under lee of the coast between Point Visnjica and Dobrogosce Bay except in case of S.W. and West winds when recommended drop anchor about 1 mile South of Soline Bay (S.E. of the entrance of the channel). Good holding.
RESTRICTIONS: Ship entering channel between Visnjica Point and embankment of right hand bank must keep in middle, leaving buoys to starboard. Recommended speed 5–8 knots.
MAX. SIZE: Only draft limited to a max. 38 ft. Also see "Shipmasters Report".
RADIO: Nearest Radio Station Split Radio YUS – 2574 kc/s.
TUGS: 2 tugs of 850 h.p.
BERTHING: New Dock No. 5, depth 38 ft. Channel depth 38 ft. All other berths from 31 to 34 ft. 6 ins.
STEVEDORES: Port Enterprise of Ploce is sole stevedoring company.
MEDICAL: Medical service available. Nearest hospital at Mostar (64 km.).
FRESH WATER: Available from quay.
FUEL: Nearest bunker station at Split.
DEVELOPMENTS: Dredging to accommodate vessels of 60,000 d.w.t. and construction of facilities for unloading tankers with crude oil for refinery of Bosanski Brod.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: If not performed by crew, stevedores.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount wine/spirits per man per day.
IDENTIFICATION CARDS: Shore pass issued by local police.
REPAIRS: Only small repairs.
REPATRIATION: By train or bus. By plane from nearby airports, Mostar, Split and Dubrovnik.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, Tel. 79–006; Ambulance, 79–115; Fire, 79–029.
SHORE LEAVE: Allowed.
SHIPMASTERS REPORT: 1977. Master states the max. draft is 34 ft. 6 in. (New No. 5 berth).
AUTHORITY: Lucka Kapetanija – Ploce.
AGENT: Jadroagent – Ploce, Trg Marsala Tita 5, P.O. Box 111, 58340 Ploce. Cable: Jadroagent Ploce. Telex: 26239 yu jadrag.

RIJEKA: 45.21 N. 14.26 E.

DOCUMENTS:

10 Crew Lists – 2 by mail from last port of call if time allows.
5 Passenger Lists.
3 Manifests of Dangerous Cargo (send cable before arrival with description).
3 Stores Lists.
2 Private Declaration.
8 Cargo Manifests with one extra for customs.
2 Transit Cargo Manifests.
1 List of Organic goods.

Cargo Manifests and copy of Cargo Plan with Hatch Lists, if possible, should be mailed to Agent from loading port.
PILOTAGE: Compulsory in Inner Harbour only for vessels over 500 BRT. Pilot boards in the roads 0.5 mile from main breakwater. Pilot on VHF Channel 8.
ANCHORAGE: All vessels, with the exception of those loaded with dangerous or hazardous cargoes, must anchor in the zone enclosed by the following points:

a) 45° 20.0′ N. – 14° 22.7′ E.	c) 45° 15.1′ N. – 14° 27.1′ E.
b) 45° 17.5′ N. – 14° 20.0′ E.	d) 45° 18.4′ N. – 14° 28.5′ E.

Tankers and vessels with dangerous cargoes must anchor in the following zone:

a) 45° 17.8′ N. – 14° 28.0′ E.	c) 45° 14.1′ N. – 14° 29.4′ E.
b) 45° 15.1′ N. – 14° 27.1′ E.	d) 45° 16.1′ N. – 14° 31.8′ E.

RESTRICTIONS: At Bakar petroleum berth only daylight berthing permitted.
MAX. SIZE: Rijeka and Susak Basins, permitted draft 31 ft. but 34 ft. at the Silo berth. Bakar Basin, permitted draft 50 ft. Vessels up to 120,000 d.w.t. have discharged ore at Bakar.
HEALTH: To obtain free pratique radio 24 hours before arrival advising following details; number of crew and passengers, health conditions and possible infectious diseases. No one allowed to leave vessel until free pratique obtained.
RADIO: Rijeka Radio, call sign YUZ, 500 and 512 kc/s. Radio telephone on 2 m. band covering area of Kvarner Gulf.
TUGS: From 600 to 2,170 h.p. available.
STEVEDORES: Port works 5 days a week in 2 shifts: 1st shift from 0630 to 1430 hrs. 2nd shift from 1430 to 2230 hrs. The third shift may be worked on overtime, from 2230 to 0630 hrs. Saturdays, Sundays and holidays may be worked on overtime.

Unloading of bulk cargo at the basin of Bakar during the first shift on Saturday from 0630 to 1430 hrs. is considered to be an ordinary working shift. The working week of this basin, therefore, lasts from Monday 0630 hrs. to Saturday 1430 hrs.

Unloading of bulk cargo at the above mentioned Basin includes, as well as the unloading, continuation of unloading the vessels that might be, for some special operational reasons, shifted from Bakar Basin to Susak Basin.

Loading/unloading of cereals and oilseeds in bulk by means of loading/unloading towers in Silo Rijeka in the first shift on Saturday, from 0640 to 1430 hrs. is considered to be an ordinary working shift, and therefore the working week for such operations lasts from Monday 0630 hrs. to Saturday 1430 hrs.

The working week for handling timber at Susak Basin lasts from Monday to Friday from 0630 to 1430 hrs.
Shipmaster's Report: Floating crane 100-ton capacity available.
MEDICAL: 2 hospitals and all kinds of medical assistance.
TANKERS: Old Petroleum Port, for tankers up to 150 m. length, berthing alongside breakwater.

Bakar, 2 berths for tankers up to 70,000 d.w.t. stern to quay. 1 berth alongside quay for tankers up to 30,000 d.w.t.

Urinj, 5 miles East of Rijeka, a new berth for tankers up to 200,000 d.w.t. Slop reception facilities available – advance notice required. Vessels moor stern to quay using both anchors.
DENSITY: 1020 to 1025, depending on place, season and weather.
FRESH WATER: Available from quay in any quantity.
FUEL: All grades of bunkers available by barge at 48 hours' notice.
FIRE PRECAUTIONS: If 2 tankers moored side by side in Bakar a tug required standing by. Tankers moored stern to quay, must have towing wire rigged.
GANGWAY/DECK WATCHMEN: Service available.
OPENING/CLOSING HATCHES: Crew may do this, otherwise stevedores for extra payment.
CUSTOMS ALLOWANCE: About 40 cigarettes and 0.5 litre wine per man per day.
CARGO GEAR: Although operations usually by shore cranes, ship must have efficient cargo gear and relative certificates.
IDENTIFICATION CARDS: Shore passes issued by local police.
CONSULS: Netherlands. Others at Zagreb and Beograd.
REPAIRS: All kinds available. Floating cranes up to 100 tons capacity.
DRY DOCKS: 3 docks floating up to 5,600 d.w.t., 12,000 d.w.t. and 24,000 d.w.t. lifting capacity.
REPATRIATION: Possible by train, bus and air. New airport at Rijeka.
TIME: GMT plus 1 hour.
HOLIDAYS: January 1st and 2nd; May 1st and 2nd; July 4th; July 27th; November 29th and 30th. Work can usually be arranged on Sundays, January 2nd, May 2nd and November 30th from 0700 to 1400 hrs. for extra payment. If a holiday falls on a Sunday the first working day after becomes a holiday.
POLICE/AMBULANCE/FIRE: Police, tel. 92; Ambulance, tel. 94; Fire, tel. 93; Port fire brigade, tel. 25–126.

SHORE LEAVE: Allowed. Crew members and passengers have to be on board 1 hour before scheduled sailing time.
AUTHORITY: Lucka Kapetanija – Rijeka.

AGENT: Jadroagent – Rijeka, Obala JR Mornarice 16, P.O. Box 120, 51000 Rijeka. Cable: Jadroagent Rijeka. Telex: 24100 yu jadrag.

SIBENIK: 43.43 N. 15.52 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: Pilot boards vessel at the entrance of St. Ante Channel, within a circle of 3 miles radius from Jadrija Lighthouse.
ANCHORAGE: Vessels waiting Pilot must anchor between Prvic Island and the shore if coming from the West, or between the South point of Zlarin and the shore if coming from the East, all in depths of 22 m.

In the Bay of Sibenik, vessels may anchor on the N.W. side of St. Ante Channel in depths of 30–40 m. Alternatively, a buoy mooring is available.
RESTRICTIONS: All vessels over 50 g.r.t. must apply for permission to enter St. Ante Channel by using International Code Signal Z by flag, or sound signal or light signal. Alternatively, a white light above a red light visible all round may be used.

Vessels may enter channel only when authorised by a signal, 2 black balls vertically disposed by day or 2 green lights vertically displayed by night, made by the signalling station at Jadrija
MAX. SIZE: Only draft limited. 33 ft. alongside in deepest berth.
RADIO: None. Vessel may call Agent through Rijeka Radio.
TUGS: 1 of 750 h.p. 1 of 350 h.p.
STEVEDORES: Port Enterprise Sibenik.
MEDICAL: Medical service available including hospitalisation.
FRESH WATER: Available from quay.
FUEL: Can be delivered by barge from Split. Recommended to check well in advance.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount wine/spirits per man per day.
CARGO GEAR: General cargo discharged using ship's gear. Ore and other dry bulk cargoes handled by shore cranes fitted with grabs.
IDENTIFICATION CARDS: Shore passes given by local police.
REPAIRS: Small repairs only.
REPATRIATION: By train or bus, by air from Split Airport nearby, or from Zagreb or Zadar.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
SHORE LEAVE: Allowed.
PORT AUTHORITY: Lucka Kapetanija.

AGENT: Jadroagent – Sibenik, Obala oslobodenja 9, 59000 Sibenik. Cable: Jadroagent Sibenik. Telex: 27323 yu jadrag.

SPLIT: 43.31 N. 16.26 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: Pilot boards vessel in roads.
ANCHORAGE: Vessels anchor in Solin Basin within a circle with centre approximately in 43° 32′ 36″ N. 16° 24′ 36″ E.
MAX. SIZE: Length and breadth not limited. Draft permitted in Southern Basin 29 ft. Northern Basin 34 ft. (ore, coal), 36 ft. (grain). General Cargo, 31 ft.
RADIO: Split Radio working on 2182 and 1574 kc/s.
TUGS: From 240 to 1350 h.p. available.
MEDICAL: All medical assistance including hospitalisation.
TANKERS: 2 berths for tankers, max. length 200 m., draft 31 ft.
FRESH WATER: Available from quay.
FUEL: Available from local storage tanks.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By crew or stevedores.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount wine/spirits per man per day.
IDENTIFICATION CARDS: Shore passes issued by local police.
CONSULS: British, Dutch, Italian, and German.
REPAIRS: Any kind, including dry docking.
DRY DOCKS: Floating dock at Trogir for vessels up to 28,000 d.w.t.
REPATRIATION: By train, bus or air from Split Airport.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, 92,; Ambulance, 94; Fire, 93.
GENERAL: Port consists of 2 basins: The Old Southern Port for passenger ships and with a few berths for general cargo.
SHORE LEAVE: Allowed.
AUTHORITY: Lucka Kapetanija.

AGENT: Jadroagent – Split, Saveznicka obala 1, 58000 Split. Cable: Jadroagent Split. Telex: 26116 yu jadrag.

ZADAR: 44.07 N. 15.14 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: 48 and 24 hours notice of ETA must be given to Agent. According these notices Agent arranges for Pilot to board on arrival. Pilot boat blue motor launch with large "P" on bows and "H" flag. No particular signals to be made by vessels requiring Pilot. Pilot contacted on VHF Channel 12 and boards ship in the anchorage.
ANCHORAGE: About 0.5 mile, 245° from green port light, (FL. G. 2 sec.) on the North part of Zadar Peninsular. Average depth about 40 m.
MAX. SIZE: Zadar, old port, permissible draft 6.25 m. (20.5 ft.) Zadar-Gazenica, port for dry cargo, max. draft 6.60 m. (21.7 ft.) forward. Length 160 m. Also see "Tankers" and "Soya Bean Berth".
RADIO: Rijekaradio, JUZ.
VHF: Information/Operations Centre Zadar listens on VHF Channel 16.
TUGS: No tugs available, but can be ordered from Split.
BERTHING: *Soya Bean Berth:* 1 berth for soya bean with discharging equipment 400 t.p.h. Max. draft 11 m. (36.1 ft.).
STEVEDORES: Number of gangs required to be stated in usual notice of ETA.
MEDICAL: Advance notice not necessary, hospital facilities available.
TANKERS: At Zadar-Gazenica Port: 1 tanker berth max. draft 10.35 m. (34 ft.) forward. Length of the ship is not restricted.
DENSITY: Average density in the port – 1026.
FRESH WATER: Fresh water connections on piers, rate of delivery 8–15 t.p.h.
FUEL: Fuel available for coasters only.
DEVELOPMENTS: Zadar-Gazenica Port second berth for dry cargo ships (length 60 m.)
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally, but not compulsorily, carried out by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes per person. Tobacco and liquor sealed in bond.
IDENTIFICATION CARDS: Needed. Issued by local police.
CONSULS: None.
REPAIRS: Possible.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.
AIRPORT: Zadar airport served by regular daily flight for Zagreb with connection on all international flights.
DRY DOCK: 1 floating dock for ships up to about 2,000 b.r.t. in Zadar. 1 floating dock for ships up to about 20,000 b.r.t. on Ugljan Island near Zadar.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
TELEPHONES: No facilities for placing telephones on board.
AUTHORITY: Lucka Kapetanija – Zadar.

AGENTS: Jadranska Pomorska Agencija, Filijala Zadar, N. Nodila b.b., Zadar. Tel. 23210, 23215. Telex: 27129 Yu Jadrag. Telegrams: Jadroagent Zadar.

ZELENIKA: 42.27 N. 18.35 E.

DOCUMENTS/HEALTH: Same as "Rijeka".
PILOTAGE: Pilot boards at entrance of the Bay of Kotor, near point Punta Ostro. In bad weather Pilot boards at anchorage.
ANCHORAGE: Good ground for anchorage S.W. of Zelenika, about 0.25 mile off port light in about 27 fathoms.
MAX. SIZE: 2 quays 330 ft. and 420 ft. for vessels drawing 17 ft. to 27 ft. Breadth not limited. Vessels the size of a liberty have been berthed by mooring the vessel a couple of metres off quay. 2 other quays, but with very shallow water, used for coastwise traffic only.
HEALTH: Radio Agent requesting free pratique, 24 hours before arrival. For vessels over 500 g.r.t. pratique is given at the anchorage. For small ships and yachts, pratique is given at Zelenika.
TUGS: None. In cases of necessity can be ordered from shipyard at Bijela.
BERTHING: The berth is assigned through the Agents giving notice 24 or 48 hours in advance.
STEVEDORES: State stevedoring company.
MEDICAL: Nearest hospital at nearby town of Herceq-Novi.
FRESH WATER: Available from hydrant on quay.
FUEL: Nearest bunker station is Bar.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable quantity wine/spirits per man per day.
CARGO GEAR: Loading, unloading performed with ship's gear.
IDENTIFICATION CARDS: Shore passes issued by local police.
CONSULS: None.
REPAIRS: Any kind of repairs including dry docking at nearby shipyard at Bijela.
DRY DOCKS: Floating dock lifting capacity 10,000 tons, LOA. 184 m., length over keelblocks 165.6 m., inside free breadth 25.5 m.

Floating dock lifting capacity 33,000 tons. LOA 252 m., length over keelblocks 235 m., inside free breadth 44 m.

The yard is about 4 miles East of Zelenika. The yard has 1,300 m. of fitting pier.

REPATRIATION: By bus to Dubrovnik, and from there bus, plane or ship to main cities in Yugoslavia.
TIME: Central European Time. GMT plus 1 hour.
HOLIDAYS: January 1st and 2nd; May 1st and 2nd; July 4th and 13th; November 29th and 30th. Work can be arranged on Sundays and on 2nd day of two-day holidays.
POLICE/AMBULANCE/FIRE: No direct connection, in case of necessity call Agency, Tel. (082) 43-436-Jadroagent or (082) 43-933 Jugoslovenska.
SHORE LEAVE: Allowed.
AUTHORITY: Lucka Ispostava Zelenika.
AGENT: Jadroagent, Medunarodna pomorska i saobracajna agencija, Poslovna jedinica, Bijela. Tel. 87-436. Telegraphic address: Jadroagent Bijela.

NOTES

Please also advise Shipping Guides Ltd.

Zaire Republic

GENERAL:

ETA: It is essential that any change of vessels ETA should be transmitted sufficiently in advance in order to avoid short shipments of cargo.

Matadi is only a transit port where cargo is not stored in order to avoid congestion.

Imported cargo is immediately re-forwarded to the interior while export cargo is only brought to Matadi a few days before the ETA of the vessel for which it has been booked.

Therefore, in order to make the cargo available at Matadi, shippers need a notice varying according to the cargo concerned, but which cannot be less than 2 weeks as is the case for coffee.

Agents at Matadi and Boma have been instructed to inform Port Authorities latest 4 days before berthing of inward cargo tonnages.

Non compliance with this provision may result in berthing delay.

PILOTAGE: Ships bound for Matadi and/or Boma must take a Pilot at the pilot station at Banana (at the mouth of the Zaire River). Pilot station at Banana can be contacted directly by radio (VHF).

In order to increase the safety and to facilitate the navigation on the river the Regie des Voies Maritimes have decided that in case a vessel is not equipped with a VHF installation the Pilot will bring one on board, for which a charge is made.

The following rules must be observed at the request of the Regie des Voies Maritimes for embarking and dis-embarking of Pilots.

If gangway is rigged astern on the port side it is compulsory to use the pilot ladder also.

If gangway rigged amidships on port side it is recommended that the pilot ladder is used in combination.

Pilots requesting only the gangway do so at their own risk.

Ships sailing from Matadi for Banana must pass Boma before 1630 hrs. otherwise they remain at anchor at Boma since navigation on the Zaire River is normally limited to daylight hours.

With regard to the trim the pilotage services ask Masters to comply with following rules:

Maximum trim 12 ft. aft; 4 ft. forward.

DOCUMENTS: *Ship's Documents required on arrival:*

7 Crew Lists.
3 Lists of Arms and Ammunition.
7 Passenger Lists.
2 Crew Declarations.
3 Lists of Ports of Call.
2 Stores Lists.
1 International Tonnage Certificate.
1 Deratisation Exemption Certificate.
1 Cargo Ship Safety Equipment Certificate.
1 Certificate of Registry.
1 Radiotelegraphy Certificate.
1 Construction Certificate.
1 Certificate Form on Board.
Free Pratique.

Documents required for disembarking passengers and discharging cargo:

A. To be received by mail at least 8 days before ship's arrival:
(1). Cargo:
  3 Freight Manifests
  8 Cargo Manifests
  5 Copies of Bills of Lading
  6 Copies of Stowage Plans.
(2). Passengers:
  1 Accountancy
  3 Passenger Lists, for passengers for the port/or in transit.
B. To be received by ship's bag at ship's arrival at quay:
  On arrival following documents must be available on board:
(1). Cargo:
  1 Freight Manifest
  4 Cargo Manifests
  3 Copies of Bills of Lading.
(2). Passengers:
  1 Freight Manifest
  4 Passenger Lists for passengers for the port and/or in transit.

It is most important that stowage plans be available before vessel's arrival. Vessel's operations are indeed delayed to the next shift if same are only remitted upon arrival.

FUEL: Must be ordered from Petrozaire at least 48 hours before required. Normally supply of gasoil, light and heavy fuel is effected at Banana between buoys 12 and 14 ex barges with: minimum quantity – 250 tons; maximum quantity – 800 tons (total barge quantity).

Smaller quantities can also be supplied in Matadi or Ango Ango.

DRAFTS AND CURRENTS: Drafts on River Zaire are as follows:

Inwards: High water: 25 ft. 06 in. Low water: 24 ft. 06 in.

Outwards: High water: 26 ft. 06 in. Low Water: 25 ft. 06 in.

The authorized drafts are notified regularly by the Port Authorities.

The currents of the river and from berth to berth as well in Matadi as in Boma vary and depend upon the high and low levels of the water sometimes adverse currents and still waters as stated before.

For proceeding to Matadi and according to the season vessels must have at least a speed of 10.5 to 11 knots, especially to pass the "Devils Cauldron" about 3 miles before Matadi.

STEVEDORES: The ONATRA (Office National des Transports) – public institution, has the monopoly of the handling, stevedoring and transit operations at the ports of Matadi and Boma.

At each berth the responsible "Pier Master" remains in constant contact with the first Mate during the whole operation.

Working shifts are as follows: 1st. shift: 0630–1430 hrs.; 2nd shift: 1430–2230 hrs. overtime; 3rd shift: 2230–0630 hrs. overtime.

Work must be ordered the day before vessel's arrival. However, if gangs are available, work can still be ordered the day of vessel's arrival but latest at 0930 hrs. during week days.

In principle no work is done on Sundays, holidays and during the night. If required same has to be ordered by writing 1 working day in advance before 1000 hrs. Port Authorities will then decide according to the situation at that moment.

According to the situation of the Port, the Authorities can also order labour 24 hours per day Sundays and holidays included.

At Boma there is no third shift – however on special request, work can eventually be granted until 2400 hrs.

At Matadi work during third shift will only be ordered upon special request from vessel.

GENERAL: *Quay Practices:*

The courtesy Zaire flag must be hoisted by foreign ships during daytime.

In view of the proximity of the town, the use of whistles, sirens and similar signals is forbidden.

Safety nets must be put between ship and quay at each of the working hatches and beneath the gangway.

No rubbish whatsoever may be thrown overboard.

Cargo plans:

According to Onatra's instructions stowage plans of ships calling at Matadi/Boma must be issued in such a way that they show clearly where all goods loaded for Matadi/Boma in several ports are located. This enables Onatra to have a clear view of each vessel and to study, before ship's arrival, the discharging/loading possibilities.

Those stowage plans must reach Agent before ship's arrival.

Vessels loading/discharging operations will only start during the next shift if stowage plans are remitted upon vessels' arrival. A request can be made to shift the vessel to a more convenient berth depending upon the cargo concerned.

With regard to cargo loaded Onatra does not issue stowage plans and Masters should consequently be instructed to draw up stowage plans for transmission to corresponding discharging ports.

It is customary not to moor ships at Matadi/Boma between 2200 hrs. and 0600 hrs. They remain at anchor.

Important Notices:

In connection with manifests for Matadi/Boma cargo:

1. Liner Terms Cargo:

According to the General Rules and Tariffs stowing, unstowing, loading, discharging rates are applied on weight/measurement, whichever is the highest irrespective of the freightunit.

The Port Authority Onatra instructs therefore that:

a) The freight-manifest remitted to them must show three columns detailing respectively weight and volume and freightunit (freighttons) of each cargo/bill of lading.

b) At the bottom of each page a summing up of tonnage/weight, tonnage/volume and freightunits (freighttons) should be mentioned.

c) The last page of the manifest shall contain a separate recapitulation of weighttons, volumes and freightunits (freighttons) showing thus the respective totals of each item.

Corrections or additionals added by the Agent at Matadi/Boma by hand or with typewriter are not accepted by Onatra.

Onatra is fully implementing the regulations and, for vessels whose manifests are incomplete or incorrect, a penalty, which may reach 1,000% of the stevedoring costs (or 10 times) is charged.

2. F.I.O. Cargo:

The same information is to be supplied as for Liner Cargo but, in addition, the manifest and B/L must clearly mention that cargo is carried on free out terms.

BANANA: 6.01 S. 12.25 E.

DOCUMENTS: See "General" before first port.

APPROACHES: In view of the strong current, and in view of the fact that the lights of the navigation buoys on the river do not always work properly, night navigation is practically impossible. Tankers, therefore, arriving at night, or in times of congestion, are recommended to anchor approx. 5 miles West of Moita Seca Light in approx. 10 fathoms, about 12 miles from Stella Buoy.

PILOTAGE: River can be entered direct from sea in deep water. Pilots not compulsory. Mooring Master boards incoming tankers to assist mooring at buoys. Notice of arrival to be given to Harbour Master, radio "Maritime Banana".

The position of the flare of the SOCIR Refinery at Moanda is:

5° 57′ 51″ S.
12° 25′ 07″ E.

The flare is visible during day and night and may be a good bearing for vessels approaching river.

Sailing from "Stella Buoy" after 0600 hrs. Vessels with a speed of up to 14 knots must pass Bulabemba before 1400 hrs. and vessels with speed in excess of 14 knots by 1500 hrs.

MAX. SIZE: Tankers up to 40 ft. draft may discharge at buoy moorings. Banana Creek is limited to vessels draft not exceeding 15 ft.

HEALTH: Quarantine Officer boards at sea buoy. Free pratique usually granted as soon as Maritime Health Declaration completed. Valid smallpox, cholera and yellow fever inoculations required for all crew members.
RADIO: At least 3 days notice required to Agent (ETA and draft only) and to Harbour Master, Maritime Banana (ETA only). It is necessary to transmit these notices via another shore station (e.g. Capetown Radio, Libreville Radio, etc.), as the Banana Radio Station can only be reached 2 days prior arrival. Close advice on changes in ETA necessary to prevent delays in waiting for cargo-lighters and push-boats.

Radio Banana (9 PA) working on 495 kc/s. and 8714 kc/s.
BERTHING: Tankers berth in river anchorage between buoys 12 and 14, both anchors used. Tugs not available and not required.

Upon arrival at the berths, tankers should use both anchors on long scope in view of the current. When anchoring it is recommended to drop outside anchor first, up to approx. 3 shackles and subsequently, after the ship's swing to starboard, the starboard anchor. It is essential that ample cable is used on both anchors, approx. 8 shackles. Tankers sail without Pilot and may leave any time.
CARGO OPERATIONS: Tankers discharge-into/load-from cargo barges moored alongside either side. These barges (3 in total) are equipped with 8-in. cargo hoses (position of hose connection amidships) and suitable fenders, have a capacity of 1,650 long tons or 2,050 cu.m., and can receive the cargo at the rate of up to 800 t.p.h. or, alternatively, can load at a rate of approx. 400 t.p.h. Under normal conditions the refinery will handle 3 barges per shift of 12 hours. Cargo operations are effected continuously day and night, during Sundays and holidays, in shifts from 0600 to 1800 hrs. and from 1800 hrs. to 0600 hrs. Therefore a tanker of approx. 19,000 tons can be completed in a net discharging/loading time of approximately 48 hours. During the cargo operations, 6 deckhands stay on board to handle cargo hoses and barges. These men are to be provided with meals and accommodation (one spare cabin will be sufficient). Masters are also requested to instruct their crew to assist with the mooring/unmooring of cargo barges alongside.
DENSITY: Brackish to salt.
FRESH WATER: Not available.
FUEL: Must be ordered 48 hours in advance from Petro-Zaire. Bunkering takes place between Buoys Nos. 12 and 14. Gasoil, light and heavy fuel oil available. Barge capacity 800 ton, minimum order 250 tons.
MEDICAL: Doctor available for emergency only. No dental or hospital facilities.
TANKERS: No tank-cleaning facilities. Barge available for dirty ballast reception limited to 2,000 cu.m. per trip.
REPAIRS: No facilities.
GENERAL: During stay of tankers at anchorage the discharge and/or loading operations are constantly supervised by representatives of the refinery, who are to be accommodated on board and to be provided with meals.
SHORE LEAVE: Shore leave is presently not allowed due to lack of communications; only in urgent cases a crew member may join one of the refinery tugs. There is no entertainment whatsoever ashore.
AUTHORITY: Office National des Transports, Onatra.

AGENT: See "Matadi".

BOMA: 05.51 S. 13.03 E.

DOCUMENTS: See "General" before first port.
PILOTAGE: Port is situated on the right bank of river, about 44 miles above Pilot station at Banana.

Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Pilot available between 0700 and 2200 hrs. for arriving vessels and 0600–1600 hrs. for vessels sailing for Matadi or Banana.
RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating river varies between 20 ft. to 27 ft. according to local conditions and should be checked with Port Authority in advance.
HEALTH: Quarantine Officer boards on arrival. All Crew members require valid smallpox, cholera vaccinations and yellow fever inoculation certificates.
TUGS: 2 tugs of 200 and 300 h.p. available to assist berthing.
BERTHING: Total quay length 450 m. with 3 berths alongside. Depth of water at the quay 8 m. at low water. Maximum current at the berths is 3 knots.
STEVEDORES: See "General" before first port.
Port Equipment:
- 6 electric cranes on rails, capacity 3–6 tons.
- 2 steam cranes on rails, capacity 7.5 ton at 6 m. 5.0 ton at 10 m.
- 5 banana conveyors.
- 1 electric crane, capacity 6 tons.
- 8 forklifts.
- 7 barges, capacity 100 tons.
- 1 pontoon, capacity 75 tons.

FRESH WATER: Available from quays, not suitable for drinking.
FUEL: See "General" before first port.
MEDICAL: Doctors and hospital facilities available.
REPAIRS: No facilities.
AUTHORITY: Office National des Transport – Onatra.
AGENT: See "Matadi'.

MATADI, (including Ango-Ango): 05.49 S. 13.27 E.
(See Plan Book)

DOCUMENTS: 7 days before arrival of vessel the following must be in the hands of the Agent:

4 Manifests (detailing explosives, general cargo, heavy lifts).
3 Stowage Plans.
6 Copies of Bills of Lading.
1 Freighted Manifest.

On arrival:
Maritime Declaration.
Ship's Register.
3 Crew Personal Effects Lists.
2 Stowage Plans.
1 Freighted Manifest.
3 Lists of Ports of Call.
7 Passengers Landed.
7 Passengers in Transit.
5 Crew Lists.
5 Crew Boys Lists.
2 Provisions Lists.
4 Individual Manifests.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Pilot boards at Banana Pilot station. Distance from Banana to Matadi about 75 miles. Pilot available between 0700 and 2200 hrs. for arriving vessels and 0600–1600 hrs. for vessels sailing.
RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating Zaire River varies between 20 ft. and 27 ft. according to local conditions and should be checked with the Port Authority 3 days in advance.
MAX. SIZE: Controlled by draft in river.
HEALTH: Quarantine Officer boards on arrival. All crew members require valid smallpox, cholera and yellow fever inoculation certificates.
TUGS: 2 tugs, largest 600 h.p., available to assist berthing.
BERTHING: At Matadi.

Pier 1	149 m.	Pier 6	176 m.
Pier 2	161 m.	Pier 7	188 m.
Pier 3	156 m.	Pier 8	149 m.
Pier 4	158 m.	Pier 9	167 m.
Pier 5	156 m.	Pier 10	143 m.

Min. depth at Piers 8–10 – 10 m.
At Ango-Ango:
Pier A. Length 150 m.
(As a rule for discharge of inflammable goods and explosives.)
UNLOADING RATE: 400 to 600 tons of general cargo per day of 2 shifts.
CRANES:

44 Cranes Electric and hydraulic on rails	3–6 tons	
2 Cranes Steam	5 tons	
1 Crane Steam	10 tons	
1 Derrick Fixed	50 tons	Pier 4
1 Floating Crane	14 tons	
1 Portic Crane	5 tons	
6 Cranes Electric	3–6 tons	
2 Cranes Electric	10 tons	
3 Cranes Electric	6 tons	

BULK HANDLING FACILITIES: Palm oil is stocked by 4 companies in Matadi, 3 of which have pipe-lines to a main quay. The palm oil installations of CCP are at Ango-Ango where ships must berth at Sep Zaire pier. Vessels handling Sep Zaire cargoes are given priority at this pier and in case of unavailability of berth, palm oil would be loaded by barge of 260 tons capacity at Matadi.

Palmkernel Oil is also loaded at Berth Nos. 2–9 and Palm Oil at Berth Nos. 2–8 in Matadi.

P.L.Z. (Plantations Lever au Zaire) capacity	13,450 t.
AMATO-Freres	3,700 t.
MADAIL	2,340 t.
C.C.P.	3,627 t.

BARGES:

2 lighters	capacity 42 tons each
5 pontoons	capacity 75 t.
44 lighters	capacity 558 t.
3 Pontoons	capacity 450/500 t.
1 Tank barge	capacity 279 t.

DENSITY: Fresh water.
STEVEDORES: See "General" before first port.
TANKERS: Discharge at Sep Zaire pier at Ango-Ango or Matadi. If lightening necessary before berthing, this can be effected at Ramler Buoy, 17 miles above Banana. No tank-cleaning facilities. No fresh water.
FRESH WATER: Delivery aboard the ship through valves and at each pier. Maximum daily capacity 200 tons. Delivery takes place according to the quantity asked for and usually during night.

Delivery cannot be done at the loading berth of Sep Zaire at Ango Ango.

Suppliers need 48 hours notice. It is therefore highly recommended that Masters cable their needs well in advance to Agent and/or through owners.
FUEL: See "General" before first port.
TIDES: From early December till middle of February current runs at 10.5 to 11 knots. During this period vessels calling at Matadi must

have min. speed of 12.5 to 13 knots. It is reported that during the rainy season in June the tide runs at 12 knots plus, between Matadi and River entrance and navigation is very difficult at this time.

MEDICAL: Doctors and hospital facilities available.

REPAIRS: Small repairs possible at railway workshop.

AUTHORITY: Office National des Transports – Onatra.

AGENT: Comexas, S.A. B.P. 83, Matadi, Republic Zaire. Tel: 22.33 and 22.35. Cables: Comexas. Telex: 814.

LATE REPORTS

Albania

DURRES

SHIPMASTER'S REPORT: January 1979

NAVIGATION: Incoming vessels are to anchor in position 41° 15' N., 19° 27' E. (2.5 miles from breakwater) and await orders. The danger area shown on BA. chart No. 2701 is reportedly non-existent.

COMMUNICATIONS: The local radio station Call sign ZAD is to be contacted on anchoring. The radio transmitter is sealed on berthing. The Agents have a telex machine which works intermittently. Telephone calls to Northern Europe possible but subject to delay.

PILOT: Equipped with VHF Channel 16, boards at anchorage.

TUGS: Two medium size tugs available for docking. One salvage tug stationed in port.

DRAFT: Pilots advised 27 ft. 06 in. max draft alongside and in approaches.

CARGO FACILITIES: Loaded 14,000 tonnes of cement in 50 kg. bags from rail and road trucks. 3 shift system. Used both shore cranes and ships derricks. As cargo comes from cement factory in interior by rail, presentation is very intermittent, and vessel rarely informed of working prospects more than a few hours in advance. Sundays are normally holidays. Loading rate averaged 1,000 tons approx. per working day but ranged from 200 to 1,700 depending on labour and cargo availability.

FORMALITIES: ETA's required 5 and 2 days in advance, also include length, tonnage, flag, state of health, etc.

Documents required: 6 crew lists, 2 lists of foreign currency, 2 personal effects lists, 1 health declaration, 3 stores lists. Bond is sealed but Customs will open on request.

REPAIR FACILITIES: Small shipyard for minor repairs available.

SURVEYS: Agents advise that government surveyor available for radio surveys, etc. No classification Society Surveyor available.

CASH: Lek is currency – 1 Lek = approx. 14 US cents (7 Leks = $1). Foreign currency may be exchanged (approx. 5 days notice).

PROVISIONS: Government ship chandler. Fresh vegetables good, fish available at moderate prices, meat not recommended.

LAUNDRY: Available. Reasonable price, average standard.

CREW: Repatriation is reportedly possible, however it takes 3 days to get an exit visa.

Shore leave is permitted to seaman's club only until 2300 hrs. A special pass has to be obtained to visit the town (1500 to 1900 hrs. only). Tours to Tirana can be arranged by car, if one day's notice is given. Casual dress (jeans) also long hair prohibited outside dock gates.

Gangway guards in attendance throughout stay.

Considerable difficulty experienced in arranging tour for Chinese ratings.

PORT FACILITIES: Berthing facilities for 10 ocean-going vessels. Sufficient 5-ton shore cranes available. Railway tracks to most quays. Main imports coal/coke. Exports, low grade chrome ore. Priority for Albanian vessels. One floating crane. Lack of mechanisation reduces work rate. No fork lifts or proper palletisation observed.

AGENCY: Adtare (government agency) in port area. The Agents visit vessel twice daily and speak adequate English and are reasonably helpful.

FRESH WATER: Available from barge at $1.50 per ton approx.

FUEL OIL: Prices January 1st, 1979: Heavy Oil $98 per ton and Diesel $141 per ton delivered by road tankers (limited amounts).

LOCAL REGULATIONS: Permission to immobilise engines must be obtained. Garbage is collected (compulsorily) daily in plastic sacks. Permission required prior to de-ballasting.

Watchmen: Not required as gangway guards provided.

Algeria

GENERAL:

SHIPS OFFICERS REPORT: January 1979.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

SKIDKA (Formerly Philippeville): 36.54 N. 06.54 E.

SHIPMASTER'S REPORT: March 1979.

PILOTAGE: Pilotage is compulsory. When entering the port Pilot is arranged with the Harbour Control. When leaving, the ship contacts Harbour Control on VHF radio once all documentation has been completed and the vessel is ready to leave. There are 6 Pilots attached to the port, 3 Egyptians, 2 Bulgarians and 1 Algerian.

ANCHORAGE: The anchorage is sheltered from the South through West to N.N.W. by hills, but is open from the North through to the East.

During our stay at the anchorage the wind varied from S.W. to North, and at times a large swell built up, obviously from a disturbance away from the coast. I found secure holding ground in 30 to 40 m. of water 1 mile North of the main breakwater of Skikda harbour for the 3 times we had to anchor, with 4.5 shackles of cable out on the starboard anchor. Our vessel rode out several severe squalls when other ships in the vicinity were dragging their anchors.

RADIO: There is a local radio station working VHF only, call sign "Skikda Radio", calling frequency Channel 16 and working frequency Channel 26. Local telephone calls to Skikda are handled very quickly, but overseas telephone calls can be subject to long delays, this is because they first have to go on the land line to Alger (Algiers) and this line can be congested, the same delay is also experienced when telephoning overseas from ashore.

There is a local Port Control radio, Call sign "Skikda Port Control", calling frequency Channel 16 VHF, and working frequencies Channels 12 or 14 VHF. When approaching the port ships should call the "Port Control" and give the following:

(a) Ships Name.
(b) Nationality.
(c) Gross tonnage.
(d) Draft.
(e) Length overall.
(f) Tonnage and type of cargo for discharge at Skikda.
(g) Last port.

After which stand-by on Channel 16 for instructions. When at the anchorage it is a good idea to contact the Port Control each day to see if they have any instructions. Control seem to give the ships as much prior notice of movement as they can, and the Pilot will call on Channel 16 when he is on his way to the vessel.

TUGS: Tugs are compulsory for vessels over 1,500 g.r.t., the number used depending on the size of the vessel. There are 4 tugs attached to the port, all of at least 2,500 h.p. in order to handle the large tankers and gas tankers that use the port in what is called the "New Port", which is a new port complex built 1 mile to the East of Skikda to handle the export of natural gas. The tugs are really too big for use with vessels of the size of our vessel (3,200 d.w.t., 1,597 g.r.t.).

STEVEDORING/PORT FACILITIES: The stevedores are part of a nationalised concern. General cargo discharge or loading is carried out by a combination of shore cranes and ships gear. The main grain discharge berth is by the silo, this berth is out of action for grain at present as the machinery is under repair, the latest estimate for recommencing discharge there is July. Once the machinery is in full working order they expect to be able to produce figures of up to 3,000 tonnes per day.

We lay at the other grain berth on the outer harbour wall where discharge was commenced with a mobile sucker into a hopper, however, on the second day of work the machine became inoperative. They did try to work with a mobile crane, but the condition of the quay was such that the crane was unable to find a secure platform for work so we had to wait for another berth to become vacant and discharge by shore crane with a grab into hopper then into lorries. Once on the final berth the discharge progressed quickly taking 3 working days, that is from 0630 hrs. through to 0230 hrs. with 1 hour break for lunch, and 1 hour break at the change of shift at 1930 hrs.

The port is well equipped with mobile machinery, i.e., forklifts large and small, mobile cranes of different types, however, maintainence appears to be a problem. There is a floating crane of unknown lifting capacity, there was no safe working load marked on any of the cranes. There is a firefighting launch in the harbour equipped with several knozzles, the tugs are also fitted for firefighting.

STORES: A limited amount of fresh provisions can be obtained, including fresh meat, however, it is expensive. We found that items such as cooking oil, butter and flour simply could not be obtained. The ship chandler is part of the Agency so once again is part of a nationalised concern. Fresh water is laid on to most quays, but whilst we were at Skikda it was only available for 3 hours each morning each day, and at one stage the water supply system stopped functioning for 4 days. The Harbour Master seems to do his best to find ships a berth inside when they reach the desperate stage for fresh water and stores.

AUTHORITIES: Skikda is unique in the ports of Algeria in the fact that when at anchor ships come under the jurisdiction of the local Algerian Coastguard. This means that Coastguard officers board when the ships have anchored, examine the crew declaration, stores list, bonded stores list, currency declaration, crew cabins, and then seal the Bond. If laying at anchor for a long time they will come out and give an issue from the Bond if the Agents contact them.

Once inside the port the local Customs Authorities take over. They visit on arrival alongside and also require, crew declaration, stores list, bonded stores list, currency declaration; dangerous drugs list and crew lists. They will give an issue from the bond, but only sufficient for use whilst the ship is in port.

The Port Health and Immigration Officers also board on arrival alongside. Port Health requires the usual Maritime Declaration of Health and a list of vaccination (smallpox) dates, and Immigration require a crew list. If going out of the dock gate crew need passport, Seamens I.D. card or discharge book for presentation at the gate where they are issued with a shore pass and book is left in Police care until crew member returns to the dock area.

It is a Police regulation that a shore watchman is employed day and night. The Agency arrange this, deal with the paperwork and present the bill for signature.

AGENCY: There is only one agency in the port. The agency is Compagnie Nationale Algerienne de Navigation (CNAN), a copy of their instructions to Masters is presented below. One man being appointed to look after each vessel.

NOTICE:

Compagnie Nationale Algerienne de Navigation: Agency of Skikda.

Notice:

Dear Captain,

In order to fix all necessary arrangements for your call and give the best possible turn-around, you are kindly requested to follow the instructions hereunder stated:

1. ETA to be addressed to: Traffic Department. Cable: CNALNAV SKIKDA. Telex: 92.815. Telephone: 95-57-51; 95-57-52; 95-50-29.

1st ETA: 72 hrs., 2nd ETA: 48 hrs. and confirm via Skikda Radio definite ETA 24 hrs. before arrival.

2. Specify nature and quantity of cargo on board for Skikda together with dangerous goods if any.

3. State details of heavy cargo and clarify whether to be unloaded with ship's gear or shore cranes.

4. Bunkers: Should be ordered from the Agent 24 hrs. before arrival and must be received from suppliers at latest 24 hrs. before sailing. This is very important in order to avoid delay.

5. Shipchandler: Requirements should be ordered from the Agent or direct from the suppliers immediately on arrival and delivered latest 12 hrs. before sailing. The bills should be signed by Master before ship's departure.

6. Medical Assistance: Medical visits are fixed twice a day: 0900 hrs. and 1500 hrs. Emergencies excepted.

Master should declare Crew members for doctor, morning for afternoon visit. Afternoon for next morning.

All medicine should be ordered only by Master by letter addressed to the Agent.

7. Disembarking/Embarking: All Customs and Immigration formalities should be arranged 24 hrs. before sailing.

Master should declare Crew members for repatriation latest 24 hrs. before sailing, otherwise no disembarking will be arranged.

8. Custom's Fine: All penalties for whatever should be the reason must be paid by Master to Customs 24 hrs. before ship's departure.

Working hours of Customs office as follows:

Morning	0800 – 1100 hrs.
Afternoon	1430 – 1700 hrs.
Thursday	0800 – 1100 hrs.

on Friday and holidays office is closed.

9. (a) Discharging and/or loading operations must be carefully checked by Master and all remarks should be mentioned on stevedoring time sheets out-turn reports.

(b) Watchmen in holds are recommended in order to avoid pilferage.

Expenses involved for watching will be Owners or Charterers account.

10. The Agent will deliver to Master on arrival, "forms of call's report". These documents should be carefully filled in and returned before sailing.

Angola

THIS ENTRY SUPERSEDES ENTRY ON PAGE 4-5 OF THE MAIN TEXT.

CABINDA: 05.22 S. 12.11 E.

DOCUMENTS:

7 Manifests for each port of origin of cargo for Cabinda, plus 1 copy of each Bill of Lading.

8 Passengers Lists (Disembarking/in transit) even if nil.

7 Crew Lists.

8 Lists of ports previously visited.

2 Lists of Crew vaccinations.

3 Lists of Ships Stores.

3 Personal Effects Lists.

Other forms intended for Customs, Health, etc., can be filled in on arrival.

PILOTAGE: Government Pilots' service is obligatory. Radiograms giving ETA to be sent to Agents via Luanda Radio (or by telegram from previous port), and anchorage to be used which is the closest to Cabinda, provided locations permit. The vessel is visited by port authorities, and, if necessary, the vessel may shift to another anchorage.

When the cargo is for the account of Cabinda Gulf Oil, the vessel must be moved closer to Malongo where the oil companies have their own berth for discharge of various cargo into barges.

Tankers: The Mooring Master, from Cabgoc, moves arriving tankers 1 to 2 miles to the West, and assists in mooring to buoys. Assistance from a tug is unnecessary. Vessels only moor in daylight hours. Unmooring can be carried out at any time. Attention must be paid to oil wells and pipe-lines in that area. All platforms have lights which emit the letter "U" in Morse Code. Approach must be made from the West.

It is requested that vessels have on their port side and at the stern a gangway properly equipped and illuminated.

On the forecastle there must be 3 mooring cables. 1 steel cable of 0.75 in. diameter with an eye and an appropriate shackle must be rigged on the derrick.

ANCHORAGE: For vessels bound for Malongo, the anchorage is restricted where Cabinda Gulf Oil is operating, approximately between 5° 15′ S. and 5° 30′ S. being extended outwards to 12° 00′ E. Tankers must not anchor less than 2 miles to the West of the single mooring buoy.

MAX. SIZE: Cargo vessels, in the anchorage, with 32 ft. depth, may work at will. Vessels with greater draft can be accommodated further seaward but there is always the risk of swell hampering operations.

CLEARANCE: After arrival, official authorities will board the vessel for rapid clearance so that preparations may be made to berth.

In the event of arrival during the night, clearance will not be made before 0800 hrs. In the meantime, an Agent of the Customs Police will be stationed on board, and will stay until berthing takes place in daylight.

RADIO: A HF radio telephone is installed in the Malongo terminal, call sign "Malongo", listening out throughout 24 hours, on the international frequency 2182 mHz.

For communications up to approximately 50 miles, a VHF system is installed at Malongo, which uses the same call sign (Malongo) and is also manned throughout 24 hours.

Initial contact on VHF, must be made on 156.8 mc/s (Channel 16) and then by mutual agreement traffic can be passed on one of the following frequencies: 156.6 mc/s (Channel 12); 165.45 mc/s (Channel 9); 156.7 mc/s (Channel 14).

Masters of vessels are requested to advise "Cabgoc Cabinda" 72 and 24 hours in advance of the ETA, giving the name of the vessel, date and time of expected arrival, name of Master, and any other special information.

TUGS: Normally not necessary. Cabinda Gulf Oil have a small tug which will give assistance if necessary.

SINGLE BUOY MOORING: A mooring buoy is located about 8 miles S.W. of the Cabinda Gulf Oil Co. Terminal at Malongo. The position of the buoy is approx. 05° 26′ S. and 12° 05′ E.

The buoy has a white light with range 5 miles, flashing for 2 secs. and eclipsed for 18 secs.

The depth of water is 75 ft.

BERTHING: The berthing equipment is passed on board the vessel at the terminal when the Berthing Master comes on board the tanker.

The first step for mooring is to lower one of the cables from the deck, and to hook on to the buoy quickly, which will be done by the terminal launch. The tanker must have 3 cables ready on deck.

Berthing is only done in daytime from 0600 to 1900 hrs., which is considered the maximum in conditions of favourable visibility.

Handling of hoses: 2×12 in. hoses are connected to the manifold of the vessel on the port side. The handling of hoses is effected by the ship's crew, under the direction of a deck officer, in accordance with instructions of the "Berthing Master".

The derrick on the port side must be prepared with a wire of 0.75 in. diameter (minimum).

The weight of each hose is about 3 tons.

Ballast: There are no facilities for receiving dirty ballast. Vessels must arrive with clean ballast sufficient for safe manoeuvring. Deballasting operations will be constantly checked by a representative of "Cabgoc", and the slightest evidence of pollution will cause permission for deballasting to be withdrawn.

Cargo: The crude oil at Cabinda has densities varying from 26.3 API. to 34.6 API. Some of this oil contains appreciable percentages of hydrogen sulphate which can cause a toxic atmosphere during loading.

Loading: This is done by gravity, at times assisted by pumps at a rate of 30,000 bbls.p.h. About 30 minutes prior to completion, the representative of Cabgoc must be advised so that the "Shutdown" between the vessel and the terminal may be co-ordinated.

When the vessel has completed loading, the valves on land and on the buoy must be closed. Only then may the vessel's manifold valves be closed.

In an emergency the vessel may suspend loading operations.

After completion of loading, the vessel will carry out a comparison between its own load measurements and those of the terminal. The verified quantity will be transmitted by radio and lists prepared and distributed.

Cargo documentation will be delivered to the Master of the vessel by the ship's Agents and as quickly as possible.

Tankers must be cleared very quickly so that there is no delay in departure. It is imperative that the Master declares prior to loading the tonnage required. Accurate meters ashore ensure that the ordered tonnage is supplied.

STEVEDORING: It is recommended that notice be given 48 hours in advance, as to distribution and nature of cargo.

MEDICAL: Arrangements can be made for a doctor to visit the vessel on arrival. There are hospital facilities. Serious cases are sent to Luanda. Crew must have certificates of innoculation against smallpox and yellow fever.

DENSITY: 1025. Influence of the current of the River Zaire varies according to the time of the year.

FRESH WATER: Supply cannot be guaranteed.

FUEL: None available.

WATCHMEN: Not necessary. The authorities place a port policeman on board.

OPENING/CLOSING HATCHES: By the Crew or stevedores.

CERTIFICATES: Ship's register, certificates of deratting (valid) and certificate of life saving equipment.

CUSTOMS ALLOWANCE: Customs normally place no restrictions on the consumption of alcoholic drinks on board, but under no circumstances may alcohol be taken ashore.

IDENTIFICATION CARDS: Supplied by the Agents and stamped by the Immigration police before any person comes ashore.

CONSULS: None.

REPAIRS: Very limited facilities.

REPATRIATION: This can be arranged only when absolutely necessary, but solely via Luanda.
AIRPORT: Small airport about 4 miles from the town served by the internal airline with only 1 flight per day to and from Luanda.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st January, 4th February, 27th March, 1st May, 2nd November, 11th November, 10th December, 25th December.
No work is possible on any of these days.
POLICE/AMBULANCE/FIRE: Police Tel. 22456; Ambulance Tel. 22405; Fire Tel. Port Captain 22160/22159.
SERVICES: None available.
SHORE LEAVE: Shore leave for Crew members limited. Crew members who are not on board when the vessel leaves are detained and repatriated at the cost of the vessel. The vessel may also be fined.
DELAYS: Tankers are not normally delayed, but dry cargo vessels may be delayed if two or more vessels arrive simultaneously, due to a lack of sufficient barges. Also, delay in loading and unloading may be caused by rough seas.
AUTHORITY: Inspector of Operations for Northern Ports, Cabinda.

Bahamas

SOUTH RIDING POINT

The following notices were received from a ship's Master in February 1979

Burmah Oil Bahamas Ltd.
P.O. Box F-2530 Freeport, Grand, Bahama.
The Master, m.s./m.v. ....
Dear Sir,

South Riding Point Transshipment Terminal Safety Requirements

Responsibility for the safe conduct of operations on board your ship while alongside our terminal rest with you as Master. Nevertheless, since our personnel, property and other shipping may suffer serious damage in the event of accident aboard your ship, we wish, before operations start, to seek your full co-operation and understanding on the safety requirements set out in the Ship/Shore Safety Check List.

These safety requirements have been drawn up by a number of international terminal operators in conjunction with a respresentative section of the international tanker industry. They are based upon the provisions of the codes of safe practice currently accepted by the oil and tanker industries. We therefore expect you and all under your command to adhere strictly to them throughout your stay alongside this terminal. We, for our part, will ensure that our peronnel do likewise and co-operate fully with you in the mutual interest of safe and efficient operation.

In order to assure ourselves of your compliance with these safety requirements, we shall, from time to time, instruct a member of our staff to visit your ship and, after reporting to you or your deputy, join one of our officers in a routine inspection of cargo decks and accommodation spaces.

If we observe infringements on board your ship of any of these safety requirements we shall bring this immediately to the attention of yourself or your deputy for corrective action. If such action is not taken in a reasonable time we shall adopt such measures as appear to us most appropriate to deal with the situation and shall notify you accordingly.

If you observe any infringement of these requirements by terminal staff, whether on the jetty or on board your ship, please bring this immediately to the notice of our representative who is nominated as your contact during your stay in port. Should you consider any immediate threat to the safety of your ship arises from any action on our part, or equipment under our control, you are fully entitled to demand an immediate cessation of operations.

WE RESERVE THE RIGHT IN THE EVENT OF CONTINUED OR FLAGRANT DISREGARD OF THESE SAFETY REQUIREMENTS BY ANY SHIP, TO STOP ALL OPERATIONS AND ORDER THAT SHIP OFF THE BERTH FOR APPROPRIATE ACTION TO BE TAKEN BY THE CHARTERERS AND OWNERS CONCERNED.

Terminal Manager

Tug Requisition

I/we hereby request and authorise Burmah Oil Bahamas Ltd. on behalf of the s.s./m.v. .... to supply such tug or tugs as may be considered necessary by Burmah Oil Bahamas Ltd. for the moving or otherwise assisting of the vessel whilst entering, or within or leaving the Harbour Area at South Riding Point. Such hiring to be on the terms of your usual conditions as printed below.

Date:.............................
Time:.................. Signed...
Master

Conditions of Hire of Tugs

1. For the purpose of these conditions, the phrase "Whilst Towing" shall be deemed to cover the period commencing when the vessel is in a position to receive orders direct from the Hirer's vessel to pick up ropes or lines or when the towrope has been passed to or by the tug, whichever is the sooner, and ending when the final orders from the Hirer's vessel to cast off ropes or lines have been carried out, or the towrope has been finally slipped and the tug is safely clear of the vessel, whichever is the later. Towing is any operation in connection with holding, pushing, pulling or moving the ship.

2. On the employment of a tug the Master and crew thereof become the servants of and identified with the Hirer and are under the control of the Hirer or his servants or his Agents, and anyone on board the Hirer's vessel who may be employed and/or are paid by the Tug Owner shall be considered the servant of the Hirer.

3. The Tug Owner shall not, while towing, bear or be liable for damage of any description done by or to the tug, or done by or to the Hirer's vessel, or for loss of or damage to anything on board the Hirer's vessel, of or for loss of the tug or the Hirer's vessel, or for any personal injury or loss of life, arising from any cause, including negligence at any time of the Tug Owner's servants or Agent, unseaworthiness, unfitness or breakdown of tug, its machinery, boilers, towing gear, equipment or hawsers, lack of fuel, stores or speed, or otherwise, and the Hirer shall pay for all loss or damage and personal injury or loss of life and shall also indemnify the Tug Owner against all consequences thereof, and the Tug Owner shall not whilst at the request expressed or implied of the Hirer rendering any service other than towing be held responsible for any damage done to the Hirer's vessel and the Hirer shall indemnify the Tug Owner against any claim by a third party (other than a member of the crew of the tug) for personal injury or loss of life provided that any such liability for loss or damage as above set out is not caused by want of reasonable care on the part of the Tug Owner to make his tugs seaworthy for the navigation of the tugs during the towing or other services – the burden of proof of any failure to exercise such reasonable care being upon the Owner of the tug.

4. The Hirer shall not bear or be liable for any loss or damage of any description done by or to the tug otherwise than whilst towing, as herein defined or for loss of life or injury to the crew of the tug. Nevertheless nothing contained herein shall prejudice any claim the Tug Owner may have in Admiralty or at common law against the Hirer.

5. The Tug Owner may substitute one tug for another and may sub-let the work, wholly or in part, to other Tug Owners who shall also have the benefit of and be bound by these conditions.

6. The Tug Owners will not be responsible for the consequences of war, strikes, lock-outs, riots, civil commotions, disputes or labour disturbances (whether they be parties thereto or not) or anything done in contemplation of furtherance thereof, or delays of any description, however caused, including negligence of their servants or Agents.

7. These conditions shall be construed according to the law of the Commonwealth of the Bahamas and any dispute arising in any way whatsoever out of these conditions shall be determined by a single Arbitrator appointed by the parties.

Conditions of Use of Sea Berths and Inner Harbour at South Riding Point, Grand Bahama

All facilities and assistance of any sort whatsoever provided by the Company in or in connection with the Port at South Riding Point, whether or not any charge is made by the Company therefore, are provided subject to the following conditions:

1. Neither the Company nor its servants (in whatever capacity they may be acting) shall be responsible for any loss, damage, or delay from whatsoever cause arising in consequence of any assistance, advice or instructions whatsoever, given or tendered in respect of any vessel, whether by way of pilotage or berthing services, the provision of navigational facilities, including buoys or other channel markings or otherwise howsoever. In all circumstances the Master of any vessel shall remain solely responsible on behalf of his Owners or Operators for the safety and proper navigation of his vessel.

2. While the Company takes every care to ensure that all terminal facilities, which for the purposes hereof shall include berths, pipe-lines, gear, craft, premises, facilities, equipment and other property, provided by the Company are safe and suitable for vessels permitted to use them no guarantee of such safety or suitability is given and the company shall not be responsible for any loss damage or delay of any sort that may be sustained by or occur to any vessel or her Owners or Operators or her cargo or any part thereof (whether such cargo is on board or in the course of loading or discharging) by whomsoever or by whatsoever cause such loss damage or delay is occasioned and whether or not it is due in whole or in part to any act, neglect, omission or default on the part of any servant, Agent or contractor of the Company or by any fault or defect in the terminal facilities or any part thereof.

3. The Company will not be responsible for any loss, damage or delay directly or indirectly caused by or arising from strikes, lockouts or labour disputes or disturbances whether the Company, its servants, Agents or contractors are parties thereto or not, or caused by or arising from an act of God, war, weather conditions, governmental restrictions or any other cause whatsoever over which the Company has no control.

4. If in connection with or by reason of the use or intended use by any vessel of the terminal facilities or any part thereof any damage is caused to such facilities belonging to or provided by the Company, and irrespective of whether or not such damage has been caused or contributed to by the negligence of any servant, Agent or contractor of the Company, and irrespective of whether there has been any neglect or default on the part of the vessel or the Owners or Operators, in any such event the vessel and the Owners or Operators shall hold the Company harmless and indemnified against all such damage and against all such loss sustained by the Company consequent thereon. Further, the vessel and her Owners

or Operators shall hold the Company harmless against all and any claims, damages, costs and expenses arising out of any loss, damage or delay caused to any third party arising directly or indirectly from the use of the terminal facilities by the vessel or by her Master or crew or by any other servant or Agent of the Owners or Operators and further to hold the Company harmless from any claim made by any person in respect of injury or loss of life caused directly or indirectly by the use of the terminal facilities by the vessel.

5. If any vessel sinks or grounds or otherwise becomes, in the opinion of the Company, an obstruction or danger in any part of the port or the approaches thereto and the Owner or Operator of the vessel fails to remove the obstruction or danger within a period to be stipulated by the Company, the Company shall be empowered to take any steps it may deem to be necessary to remove the obstruction or danger and any expenses of such removal shall be recoverable from the Owner of the vessel at the time of the accident causing the danger or obstruction.

6. These conditions shall be construed according to the law of the Commonwealth of the Bahamas and the vessel and her Owners or Operators shall submit to the jurisdiction of the Bahamian Courts.

s,s,/m.v. ....

I hereby acknowledge receipt of a copy of the conditions of use of the Port at South Riding Point by Burmah Oil Bahamas Ltd.

BAHAMIAN LEGISLATION PROVIDES SEVERE PENALTIES, FINE AND/OR IMPRISONMENT FOR THE DISCHARGE OF OIL INTO TERRITORIAL WATERS.

Burmah Oil Bahamas Ltd.
P.O. Box F-2530 Freeport, Grand Bahama
South Riding Point Terminal.
To: Master
s.s./m.v. ....

Dear Sir,

During your stay at South Riding Point Terminal, your co-operation is requested with regard to shipboard visitations by Terminal staff.

With the exception of official visits necessary to the satisfactory performance of cargo and safety operations, none of our terminal staff should board your vessel.

We are particularly concerned in cases where food and drink have been unofficially provided by visiting ships and we would respectfully request that you bring to the attention of your crew, the need to disregard any requests of this nature.

We trust that your compliance and understanding will avoid any embarrassment for your vessel whilst alongside and that as a result our operating attentions will be rendered more efficient.

Thank you.

In consideration of Burmah Oil Bahamas Ltd. furnishing the services of tugs, line handling boats and services, crew/ferry services and a Berthing Master to any vessel for the purpose of assisting in the navigation, docking and servicing of such vessels at the facilities of Burmah Oil Bahamas Ltd., South Riding Point Transshipment Terminal, it is understood and agreed that when the Berthing Master boards such vessel he becomes the borrowed servant of the Owners and Operators of the vessel assisted in respect to giving of orders to any tugs which may be engaged in the assisting service and in respect to the handling of said vessel, and neither those furnishing any tugs, line handling boats and services, crew/ferry services and/or Berthing Masters, nor the Owners, employers, Agents or charterers, Operators or managers thereof or the Berthing Master shall be liable for any losses, damages, delays or liabilities arising from any negligence, incompetence or incapacity of any Berthing Master or the personnel of any tug or tugs line handling boats or crew/ferry boats or arising from any unseaworthiness or any insufficiency of any tug or tugs, line handling boats or crew/ferry boat.

Owner and Operator of the vessel assisted hereby agree to indemnify and hold harmless the aforesaid persons from any and all losses, damages, delays and liabilities whatsoever, whether to third parties or otherwise arising from the acts or omissions of such person or persons.

Master

Barbados

BRIDGETOWN

SHIPMASTER'S REPORT: January 1979.

PILOTAGE: Compulsory. Pilot boards 0.5 miles West of breakwater. Ladder usually required on the port side.
RESTRICTIONS: Vessels able to enter and leave at any stage of the tide. Pilots usually commence berthing and unberthing operations at daybreak.
MAX. SIZE: Max. draft 32 ft.
TUGS: Available. Use of tugs depends on which berth the vessel uses and which side to.
RADIO: Barbados Radio.
VHF: Pilot on Channels 16 and 12.
BERTHING: Vessel berthed at Berth No. 2 which is close to the entrance. Bulk handling facilities available. There is ample equipment for handling palletised cargoes, and ample storage space for breakbulk and palletised cargoes, there is also storage space for containers and sufficient equipment for handling 20 ft. and 40 ft. containers. Accommodation ladder required.
SERVICES AVAILABLE: Fresh water, fresh provisions, repair facilities, machine shop, airport, Lloyds surveyor, laundry services, telex, bunker fuel oil, diesel oil, lubricating oil, doctor, hospital, groceries and meats.

Canary Islands

LAS PALMAS

BERTHING: *Las Palmas and Puerto de La Luz:* 7,660 m. of general quays available with depths up to 19 m. and 1,175 m. of fishing vessel quays.

It is a transit and revictualling port and has installations for the supply of water and liquid fuel.

Work is almost completed on a special berth for large tankers with a draft of 22 m.

China, Peoples Republic of

SHANGHAI

SHIPMASTERS REPORT: January 1979

GENERAL: The vessel followed the recommendations of the latest "Guide to Port Entry" and Admiralty Sailing Directions for approaches to pilot station and entrance buoys.

However, the latest information was cabled to vessel by PENAVICO SHANGHAI, as agents (China Ocean Shipping Co.), as appended below, and confirmed by the Pilot and Harbour official that boarded vessel.

The notable changes are: shift of position of Chang Kiang Kou Light Vessel, and in its 'old position' is new "M-1" buoy; the channel buoys are only 'fractionally different' from those given in latest amendment of Sailing Directions.

Anchorages seem to be variable, and vessels were anchored at both positions indicated by Admiralty Sailing Directions and "Guide to Port Entry"; vessels were also anchored to the North and East of the new position of light vessel.

Pilots are recommending that vessels buy the latest Chinese Charts for up to date information on approaches to Chang Kiang Kou and all the way to the Port of Shanghai, including Woo Sung anchorage; as most charts do not have the latest buoys and Light Floats for the river passage.

Message From Penavico: (NB: Bracketed notations are Master's remarks)

Pilot Station is in 31° 03′ 30″ N, 122° 12′ 00″ E.

Dangerous Area: 30° 47′ 05″ N, 123° 03′ 00″ E. *(These positions*
30° 47′ 15″ N, 123° 05′ 54″ E *are the same*
30° 44′ 45″ N, 123° 03′ 00″ E *as indicated*
30° 44′ 45″ N, 123° 05′ 54″ E *on charts)*

Regular channel: between Chusan and Raffles Islands: routing, Tengting Is, Steep Is, Elgar Is, Bonham Is, Butten Is to Gutzlaff to Chang Kiang Kou, other channels between Chusan – Raffles Islands NOT ALLOWED. *(Again same as publicised . . . but be very wary of concentrations of fishing craft in this area and nets extending some distance).*

Chang Kiang Kou Light Vessel: 31° 03′ 32″ N, 122° 23′ 26″ E. Fl. 6 secs. *(high intensity light).* Light buoys between Chang Kiang Kou light vessel and pilot boat:

"M-1"	31° 03′ 00″ N, 122° 18′ 42″ E.	3 Fl./6 secs.

Red and White Chequered Can Shaped:

"H 12"	31° 03′ 45″ N, 122° 14′ 28″ E.	2 Fl./3 secs. Red.
"H 14"	31° 04′ 11″ N, 122° 12′ 11″ E.	2 Fl./1.5 secs. Red.
"H 16"	31° 04′ 37″ N, 122° 09′ 54″ E.	2 Fl./3 secs. Red.
"H 18"	31° 05′ 03″ N, 122° 07′ 59″ E.	2 Fl./3 secs. Red.

White Chequered Can Shaped:

"H 11"	31° 03′ 49″ N, 122° 15′ 03″ E.	2 Fl./3 secs.
"H 13"	31° 04′ 15″ N, 122° 12′ 47″ E.	2 Fl./1.5 secs.
"H 15"	31° 04′ 41″ N, 122° 10′ 30″ E.	2 Fl./3 secs.
"H 17"	31° 05′ 07″ N, 122° 08′ 14″ E.	2 Fl./3 secs.

Approach to pilot boat at 31° 03′ 30″ N, 122° 12′ 00″ E with a line joining Chang Kiang light vessel and light buoy M-1, as demarcation line for entrance channel/departure channel is at water area within 1,100 m. North or South of demarcation line. With line joining light buoys "H 12"/"H 14"/"H 16"/"H 18" as demarcation line, water area within 1,100 m. South of line open to navigation. ATTENTION: North of line not allowed to navigation . . . end of message.

Vessel's Own Observations:

With regards the latter demarcation line: this means leaving BOTH buoys i.e. "H 12/13", "H 14/15", "H 16/17" and "H 18", on the mariners starboard hand on entering and on the port hand when departing.

Caution: These buoys are very hard to observe in (a) rough sea at night and (b) daylight in similar conditions, however they can be distinguished on the radar screen. The 'run-in' from "M-1" buoy to pilot station is not a straight course as would appear from the demarcation line of the buoys, but would entail 2/3 courses if vessel keeps close to the buoys.

The Pilot on this occasion met the vessel abeam of "H 16" buoy.

There is a VHF service now operating from the pilot station, and information will be passed on Channel 16; Pilots once on board vary their channels but most commonly used is Channel 6.

Penavico have Channel 11, used from the Woosung anchorage; they also say it can be used in port, but Pilots instructions are that it cannot be used in port. There is a set time given to vessels to listen in whilst at the anchorage, again if vessel hasn't Channel 11 for direct communication then Penavico will call through Channel 16 and ask which Channel vessel has available (if nothing suitable then message will be passed on Channel 16).

Echo sounder has to be switched off when the Pilot boards.

Radar can and will be used by Pilots for river navigation and docking purposes, however they will advise vessel on this point.

Pilot boards with "Harbour official" who appears to do the 'initial clearance' whilst proceeding up river; if vessel does not have Chinese entry forms, these will be given to vessel to fill in on way up river. (They would not accept our IMCO forms or vessels forms). The "Harbour official" will also require the Master to present the following: (1) Deadweight of vessel; (2) Summer loaded draft; (3) Light ship draft; (4) Drafts for all conditions, i.e. Winter, tropical; (5) FWA; (6) If vessel has "delta" marks then only the highest gross and nett tonnage is acceptable; (7) BHP/NHP/IHP of main engine; (8) Type of engine; (9) Capacity of fuel oil and fresh water tanks; (10) He will inspect and take down the issue date and expiry date of: Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Tonnage Certificate, De-rat, Registry. (Much of this information is again required at main clearance procedure also if vessel's first call at Shanghai, then Penavico will require all the above and more on an official printed form).

Inward bound vessels will generally anchor at Woosung Anchorage for main quarantine clearance, customs clearance and immigration clearance, I found that this was quite straightforward and was done in less than one hour.

On departure the vessel has an 'inspection'; this entails all members of the vessel mustering in an area designated by the officials, whilst they then go through the discharge books/passports and their own issue of 'shore pass'. During this period three men are detailed (one from each department) to go right round the vessel, into every cabin, locker, store rooms, etc., with the port officials.

Movement of vessels takes place 24 hours a day for berthing and unberthing.

Steaming time from Pilot to Woosung Anchorage depends largely on tides and speed of vessel but averages 3 - 6 hours, for berthing from Woosung Anchorage into Shanghai port about 2 - 3 hours. However, there are wharves right throughout the river on both sides, this time only indicates the centre of Shanghai Docks.

Colombia

TURBO

SHIPMASTER'S REPORT: February 1979

PILOTAGE: It is necessary to take a Pilot at Punta Las Vacas for entrance to the bay. Thereafter, any movement inside the bay will also require a Pilot.

France

THIS ENTRY SUPERSEDES ENTRY ON PAGE 313 OF THE MAIN TEXT.

NICE: 43.42 N. 07.17 E.

PORT LIMITS: The Port is situated in the N.E. part of the Baie des Anges (Bay of Angels) between the castle hill and the Boron Mount which form at the Nice Cape a rocky promontory towards the South.

DOCUMENTS: The Captain of a vessel, when he arrives, is required to fill out an entry declaration, a copy of which is handed to him by his Agent or by the Port Captaincy.

A Crew List and a List of Passengers intended for the Port Commissariat must be drawn up before arrival at the port.

All documents required by marine regulations, i.e. health declaration, manifest, vessel's safety plan etc., . . . are required by the port services.

PILOTAGE: The pilot station operates 24 hours a day and is attended by 3 licensed Pilots. Pilotage is obligatory for vessels of LOA 50 m. and over. Pilotage is exempt for vessels of less than 50 m., and if they are equipped with VHF, vessels of less than 70 m. The licence of Pilot is valid for vessels of a length equal to or greater than 120 m. equipped with a bow thruster and VHF. Specialised vessels carrying liquid oil, gas, and toxic products are subject to pilotage.

The pilotage area of Nice-Villefranche extends as far as 3 miles from the coast between the meridians of the left bank of the Var (07° 12′ E.) and of Cap Ferrat (07° 20′ E.). Vessels must, if possible, give warning of their arrival 24 hours in advance, particularly if they intend arriving during night-time hours.

Pilots may be called up by regulation signals during the day and night or by radiotelephone to Grasse Radio or Monaco Radio both stations on VHF Channel, telephone Nice station (85 52 41) or to the Port Captaincy (Tel. 89 50 85).

ANCHORAGE: The coast being very rocky, does not allow anchorage close to the port. The Villefranche Roads, on the other hand, offers a sheltered zone, giving very good anchorage facilities. In the Villefranche Roads, 2 buoys can be used with the permission of the Nice Captaincy, by vessels merely calling at the port or waiting for a place on the quay at the Port of Nice. There is access for vessels of all dimensions.

RESTRICTIONS: The transport and handling of dangerous or infected materials, within the limits of the Nice Port, are subjected to the requirements of decree of the 1st February 1951 which controls the transport and handling of dangerous materials in maritime ports. There is no operation in this respect at night.

All operations, prescriptions, order and stipulations as laid down in the general regulations and the local regulation covering "Port Services" are governed by the Port Commandant.

MAX. SIZE: The commercial port is accessible to vessels of 137 m. in length and 6.50 m. draft.

HEALTH: Health control at the frontiers is subject to the measures prescribed by the international health conventions; the functions of health police and health guard are entrusted to an Agent in the service of Customs and Excise. Urgent medical help can be obtained through the intermediary of the radio stations of Monaco and Grasse who establish contact directly with the department concerned.

VHF: The Port Captaincy listens out from 0600 to 2200 hrs. in Winter and from 0500 to 2400 hrs. in Summer on Channel 16 (for calling up and emergency). There are 2 channels i.e. 9 and 12 for communication purposes. No communication of a private nature may be handled.

RADIO: None.

RADAR: None.

TUGS: None.

BERTHING: Length of usable quays 1,497 m. having a depth of 5.0–6.5 m. and 10 berths available.

CRANES: Quai Infernet: 2×5 tons cranes on rails (scoop and hook).
Douane: (Customs Quay) 1 fixed pivoting crane of 30 tons capacity (hook).
Ribotti: 1 crane on rails of 3 tons capacity (hook).
Commerce: (Commercial Quay) 2 cranes on rails of 6 tons capacity (scoop and hook).
Commerce: (Commercial Quay) 2 hoppers of 50 cu.m. capacity – on rails. 2 Nellen cranes on tyred wheels, capacity 4.2 tons at the end of the jib and 8 tons at 6 m. (with tackle block).

FRESH WATER: It is possible to take on fresh water at all quays by connection to the main supply. Average rate of supply 15 t.p.h. – price 3.57 Fr. per ton.

FUEL: All types available.

FIRE PRECAUTIONS: The town provides fire fighting facilities. The fire station is close to the Port.

CONSULS: Algeria, Germany (Federal), Austria, Belgium, Brazil, Colombia, Ivory Coast, Republic of Benin, Denmark, Dominican Republic, Spain, U.S.A., Finland, Gabon, Greece, Ireland, Iceland, Italy, Liberia, Luxembourg, Mauritania, Monaco, Niger, Norway, The Netherlands, Peru, Philippines, St. Marino, Sweden, Switzerland, Tunisia.

REPAIRS: All possible deck and engine repairs can be carried out. There is no dry dock. Hull careening is carried out by underwater procedure.

SURVEYORS: Lloyds of London, The Coasting Mediterranean Company, The Venturer Company, Weir (S.A.), Societe Azureenne de transports et d'affretements Maritimes, Societe Nationale Maritime Corse, Mediterranee, Pittaluga & Co., Martini & Co., Cie Charles le Borgne, Cie Fabre, Cie Fraissinet, Cie Messageries Maritimes, Nautilus Line, Barry Rogliano et Cie.

HATCHES: Hatches are opened and closed by crew.

CUSTOMS ALLOWANCES: 30 cigarettes per person per day; 1 litre of aperatif per 6 persons per day.

CARGO HANDLING FACILITIES:

Material Handling Equipment: All the handling equipment is supplied by the stevedores. 1 forklift of 4 tons capacity and 11 forklifts between 4 and 8 tons capacity.

Storage facilities: 45,000 sq. m. of open air areas. Specialised equipment for the discharge of bulk equipment (pyrite, clinker, mineral etc . . .)

1 specialised berth equipped with a vat-type storage system, for bulk liquids (oil or wine).

Unloading or loading capacity – cement 1,400 tons per day; various: 400 tons to 700 tons per day and per gang; ores in bulk: 1,200 tons per day with 2 hoppers, 2 cranes and 2 gangs. Bulk liquids 20 tons per day.

Facilities for Specialised Goods: 3 adjustable platforms for Ro-Ro traffic. Height of quays 1.23 m. and 3.06 m.

BRIDGES: None.

STEVEDORES: 87 professional dockers; 10 occasional dockers.

Employer – Bureau Central de la Main d'Oeuvre (B.C.M.O.) of the Port of Nice.

MEDICAL: Hospitals are situated in the town and give excellent treatment in the case of accidents or illnesses of any nature whatsoever.

Passengers coming from foreign countries are required to abide by the prescriptions of international agreements (vaccination certificates, health certificates, etc.).

TANKERS: No specialised installations. Only vessels carrying black products are accepted where the load does not exceed 2,000 tons. They may come alongside one of two quays specially designated for this purpose.

DENSITY: *Salinity:* varies between 34 gr. and 38 gr. per litre.

REPATRIATION: Airport and railway network in the town.

AIRPORT: International Airport 4 km. from the Port. Principal countries are served by international airlines.

TIME: GMT plus 1 hour (Winter). Summertime kept from April to October.

HOLIDAYS: These are staggered as far as dockers are concerned so that there is continuity of operation.

POLICE/AMBULANCE/FIRE: Police tel. 55 91 22 and 17; Ambulance tel. 89 70 70 and 18; Fire Brigade tel. 89 80 80 and 18.

TELEPHONES: Telephones can be installed on board at Papacino Quay, Entrecasteaux Quay, Quai du Commerce, Quai de la Traverse, and Quai Ribotti.

SHORE LEAVE: Crew members may dismbark after checking with Police.

IDENTIFICATION CARDS: For foreign seamen a permit to come ashore is issued by the Port Police.

DEVELOPMENTS: A new port is under construction to the South of Nice Airport, and will be open to passenger vessels in 1980-81 and to other activities in the following years.

GENERAL: There is a bus and taxi service very close to the port also there are coastal trading entities within the Port precincts.

AUTHORITIES: Port Captain, Port Directorate.

OVENDO

SHIPMASTERS REPORT: February 1979.

DOCUMENTS: Ship's Papers (sighted), Crew Lists (5), Passenger Lists (5), Port of Call (4), Crew's Custom Declaration (1), Marine Health (1), Arms and Ammunition (1).

PILOTAGE: Pilot boards by tug which is compulsory for docking and undocking. Vessels berthed head out for sailing.

APPROACHES: Gambia Lighthouse range 20 miles is easy to pick up, channel is well marked by buoys with good radar reflectors. No Pilot is available for the channel. After last buoy proceed directly to anchorage.

Soundings taken throughout channel showed a least depth of 20 m.

ANCHORAGE: Waiting anchorage is 0.5 to 1 mile West of the wharf.

BERTHING: A new port has been built about 4 miles South of old lighter jetties at Libreville, consisting of 1 wharf at right angles to the shore in 15 m. of water, capable of docking 2 ocean-going vessels.

STEVEDORES: Slow but efficient, about 6 tons per gang man hour.

REPATRIATION: Airport 12 miles from port, 6 flights per week direct to Paris.

TRANSPORT: Available by bus or taxi to the town.

SHORE LEAVE: Allowed.

SEAMEN'S CLUB: Within 1 mile of port with bar and swimming pool.

AGENTS: Keeps watch on VHF Channel 16.

Honduras

LA CEIBA: 15.46 N. 86.50 W.

SHIPMASTER'S REPORT: February, 1979

DOCUMENTS:

10 copies of Crew List
6 copies of Store List
6 copies of Bonded Stores List
4 copies of Vaccination List
Mail Report
Passenger Report

PILOTAGE: Compulsory. Pilot boards 0.5 miles from the pier. Two hours notice required.

ANCHORAGE: Good anchorage 5 cables, 129° from pier, depth of water 40 ft.

RESTRICTIONS: Vessels able to berth and unberth at any stage of the tide day or night. Limiting factors are length and forward draft of vessel.

MAX. SIZE: Max. LOA 600 ft. However, the after end of the vessel would overhang end of berth (This vessel loaded to 23 ft. draft).

HEALTH: Quarantine officials operate between 0600 hrs. and 1800 hrs. Two hours notice of arrival required.

RADIO: HRW – Standard Fruit operate from their own radio station. They handle vessels traffic on 6350.5, 8560 and 12750 kc/s. They also listen on 500 kc/s. and 8 mc/s.

Hours of operation: (GMT) 1355–1410, 1455–1510, 1555–1610, 1955–2010, 2055–2110 and 2355–0010.

VHF: The Agent is on Channel 16.

TUGS: Not available. Vessel is able to dock and undock with assistance of tugs.

BERTHING: One berth only available which is a finger type pier at right angles to the shore. Nature of the bottom at the berth is sand. Vessels normally berth port side to, and load through the side doors.

Mooring gang (6 men) come aboard with the Pilot to assist. The bananas are loaded direct from the rail cars using spiral elevators. It is usual to load all decks at the same time.

There are no facilities for handling bulk cargoes or Ro/Ro vessels. There are no shore cranes or floating cranes. There is no storage space for breakbulk cargo or palletised cargo.

Fendering: Pier fendered with the usual Standard Fruit type fendering, vertical uprights on a horizontal "V" bellows on horizontal girders.

CHARTS: B.A. Chart No. 513 (Isla Roatan to Puerto Cortes) and U.S.G. 5393 (positions on this chart are 2.5 miles West South West of British Admiralty chart).

CONSULS: None.

SERVICES: Fresh water, fresh provisions, airport, telex, doctor, hospital, groceries and meats all available.

Labour: Shore labour is available for contract work such as scavenge cleaning, hull painting, etc. The work carried out during our stay was satisfactory and the rate for the foreman was US $1.50 per hour and workmen US $1.00 per hour.

Indonesia

THIS ENTRY SUPERSEDES ENTRY ON PAGE 415 OF THE MAIN TEXT.

MACASSAR: 05.08 S. 119.24 E.

DOCUMENTS:

Certificate of Registry
Crew List
Log Book
Certificate of Seaworthiness
Load Line Certificate
Radio Certificate (Solas Certificate)
Health Certificate
Equipment Certificate (Solas Certificate)

Shipping documents as follows:

Manifest of cargo
Bills of Lading
Charter Party (if necessary)

PILOTAGE: Pilotage compulsory for vessels of more than 150 cu.m. in gross volumes.

To order a Pilot:

1. Contact the ship's Agent in this port via Macassar Radio (call sign PKF) by ship's radio or VHF Channel 16.

2. Also contact Macassar pilot's station tower by VHF Channel 16.

Pilotage Information:

1. Every vessel of 71 m. LOA and over under Pilot's direction for berthing and unberthing is to use the Port Administration tugs.

There are 2 tugs available with initial letters "PA" on their blue funnel,

M.T. "Anggada VII" 800 h.p.
M.T. "Selat Tanakeke" 1,160 h.p.

2. Every vessel of 31 m. LOA and over, under Pilot's direction for berthing and unberthing is to be assisted by Port Administration mooring boat.

ANCHORAGE: The anchorage for vessel's awaiting a Pilot is around the position 05° 07′ 30″ S. and 119° 22′ 30″ E. with depth of water 25 m. at LWS.

RESTRICTIONS: Every foreign vessel is to have special permission from Indonesian Government or Directorate General of Sea Communication for entering and should have representatives or handling Agent before entering this port.

Warships should contact the Indonesian Navy Commander of Territory VII (Pangdaeral VII) before entering the port.

MAX. SIZE: No length or beam restriction. Depth alongside is governing factor.

RADIO: See "Pilotage".

TUGS: See "Pilotage".

BERTHING: *Depths of water:*

Main entrance channel: 13 m. at LWS.
Soekarno wharf: 8.5 m. to 9 m. at LWS.
Hatta wharf: 8.5 m. at LWS.
Oil Jetty (Pertamina Jetty): 8 m. at LWS.
Anchorage in the inner waters: 11 m. at LWS.

Special attention in West monsoons (November to February):

All vessels alongside Soekarno and Hatta Wharf should use fore and aft mooring lines to buoys which are available, to prevent the beating of ship's hull against the wharf.

STEVEDORES: Stevedoring by Port Labour (UKA). Capacity for discharging: 12 ton gang/hour – General Cargo. 17 ton gang/hour – Bulk Cargo (in bags). No heavy cranes available.

MEDICAL: Doctor and clinic available.

FRESH WATER: Available rate 50 t.p.h.

FUEL: Available, NFO 50 t.p.h.

GANGWAY/DECK WATCHMEN: There are not special deck watchmen services but can be arranged through Agent.

OPENING/CLOSING HATCHES: Work carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco. Only sufficient for personal use (500 grams tobacco or 200 cigarettes for one passenger).

Wine and/or spirits not permitted out of bond.

IDENTIFICATION CARDS: Needed by Immigration Office.

CONSULS: Japan and Norway.

REPAIRS: Minor deck or engine repairs possible.

AIRPORT: Macassar Airport, called "Mandai Airport", distance from town about 23 km.

Services: Macassar-Kendari and Jakarta – Surabaya-Macassar Manado every day (3 times a day).

TIME: Middle Indonesian Time, GMT plus 8 hours.

HOLIDAYS: Every Sunday; New Year (January 1st); Idul Adha (November 11th); 1st Muharam 1399 H. Isa Almasih (May 15th); Proclamation Day (August 17th); Mi'radj Muhammad (July 3rd); Idul Fitri (September 9th); Maulud Muhammad (February 20th); Santa Maria (May 15th); Christmas Day (December 25th). Work can be arranged at overtime rates.

POLICE/FIRE/AMBULANCE: Police, Fire 4306. Ambulance 7227.

TELEPHONES: No arrangements exist for placing telephones on board.

DELAYS: Caused by rain (bad weather).

DEVELOPMENTS: In near future, Macassar to have bonded warehouse.

AUTHORITY: Department of Communication, Directorate of Sea Communication, Shipping Region VI, Port Administration Macassar.

Iran

SIRRI ISLAND TERMINAL

LOCATION: The jetty is located at the S.E. point of Sirri Island.

PILOTAGE: Harbour Master boards to berth vessel.

ANCHORAGE: Vessel should anchor in position 25° 54′ N, 54° 34.5′ E., (about 1 mile to the East of the lighthouse on the Island) in 20 fathoms of water. The Pilot (Harbour Master) will board from a tug in this position.

MAX. SIZE: 350,000 d.w.t.

An oil company advises us that the depth of water alongside is 28 m. and max. draft 24 m.

RADIO: Vessels should send ETA to "Sofiran – Tehran" Telex No. 212779 via "EQK".

TUGS: 2×4,000 h.p. available.

BERTHING: A mooring gang and tugs will assist with berthing operations.

AGENT: Gulf Agency Co., Khorramshahr will attend.

Israel

ASHDOD:

SHIPMASTER'S REPORT: December 1978

PILOTAGE: Compulsory. Pilot boards off the breakwater. Pilot requires 1 hours notice of vessels arrival.

ANCHORAGE: Outside breakwater.

RESTRICTIONS: Vessels able to berth and unberth at any stage of the tide day or night.

HEALTH: Radio pratique possible. Quarantine officials require 12 hours and 24 hours notice of vessel's arrival.

RADIO: Haifa Radio.

VHF: Channels 16, 12 and 14. Pilot and Port Authority both use Channel 14.

TUGS: Tugs available and are used depending on berth.

BERTHING: Vessel berthed at berth No. 4/190. Exact location is No. 1 North pier. Conditions at the berth poor due to swell and undercurrent. Nature of the bottom sand/mud. Bulk handling facilities for handling phosphate available in the port. There are 30 quay cranes available including 1 floating crane of 70 tons capacity. Ro/Ro facilities available. There is ample mechanical equipment for handling of palletised cargoes. There is also adequate storage space for breakbulk and palletised cargoes. There are 3 gantry cranes available for handling containers, also ample storage space for containers. Accommodation ladder required.

DENSITY: 1025.

IDENTIFICATION CARDS: Crew members to have passport photograph for landing pass (this is best carried out at previous port).

SERVICES AVAILABLE: Fresh water, fresh provisions, repair facilities, machine shop, Lloyds surveyor, salvage surveyor, laundry services, bunker fuel oil, diesel oil, lubricating oil, doctor and hospital, groceries and meats.

SHIPMASTER'S REPORT: January 1979.

DOCUMENTS:

1 Police Condition Slip
1 Customs Condition Slip
3 Crew Lists
1 List Ship's Stores and Bond

PILOTAGE: Compulsory. Pilot boards 0.5 miles from breakwater.

RESTRICTIONS: Vessels may berth and unberth at any stage of the tide day or night.

HEALTH: 24 hours before arrival request radio pratique from "Quarantine Haifa".

RADIO: Haifa 4X0.

VHF: Pilot and Port Authority on Channels 16 and 14.

TUGS: 3 tugs available 1×3,000 h.p., 1×1,500 h.p., 1×1,000 h.p. The use of tugs depends on which berth used and also which direction the vessel will be heading.

BERTHING: North Quay: Berths 101, 102, 103: berths located just inside the breakwater, max. draft permitted 10 m., density alongside 1029. Accommodation ladder required.

BULK HANDLING FACILITIES: Phosphate loading facilities available.

CRANES: 9×30 tons at 15 m. (15 tons at 25 m.).
9× 8 tons at 15 m. (4 tons at 25 m.).

Ample mobile cranes available. There is 1 floating crane with at least 50 tons capacity.

SPECIAL CARGO HANDLING FACILITIES: Ro/Ro facilities available. 3 container gantries available. Ample storage space for breakbulk cargoes, palletised cargoes and containers.

STEVEDORES: Labour normally refuses to rig derricks or handle hatches.

Working Hours: Sunday to Thursday (inclusive):
First Shift 0630 and 1400 hrs.
Second Shift 1500 and 2145 hrs.
Friday:
First Shift 0630 to 1300 hrs.
Second Shift 1300 to 1530 hrs.
Saturday — No work.

SERVICES AVAILABLE: Fresh water, fresh provisions, repair facilities, machine shop, Lloyds surveyor (from Haifa), salvage surveyor (from Haifa), laundry services, bunker fuel oil, diesel oil, lubricating oil, doctor and hospital, groceries and meats. Nearest airport is at Tel-Aviv.

Italy

ORISTANO, Sardinia: 39.45 N. 08.30 E.

LOCATION: Oristano is situated on the West coast of Sardinia in the Gulf of Oristano. Oristano is the chief town of the province of Oristano and the population is in the region of 29,000.

BERTHING: The port consists of 2 harbours. The outer basin being located between the 2 breakwaters and used for general cargo purposes and the inner basin being the industrial harbour. The manoeuvring area between the outer and inner basin has a diameter of 450 m. and depth of 12 m. The depth of both outer and inner basins is 12 m. The outer basin when completed will have berthing space of 1,240 m. and the inner basin (for industrial traffic) will have 2,500 m.

MEDICAL: 2 hospitals with 280 beds.

AIRPORT: Civil airport at Cagliari, Alghera and Olbia (daily connections to Rome, Milan, Naples, Bergamo, Pisa, Turin, Venice and Nice) are only 1 hour's drive from Oristano by car.

SHIPMASTER'S REPORT: January 1979.

Port under construction.

This vessel (LOA 299 ft. Extreme breadth 43 ft. 9 in. draft 16 ft. 10 in.) was the fifth vessel to call at the port. We were unable to obtain Chart 3917 however, Chart 161A together with information given in sailing directions proved sufficient for the vessel to be brought to the anchorage.

PILOTAGE: The Pilot advises that he wishes to be embarked close to a buoy in position 39° 53′ N., 08° 31′ E. which is indicated on Chart 3917. The pilot boat is a small open boat and does not have any distinctive marks. This boat would not be suitable for taking out to the 'Gulf' especially with a strong Westerly wind.

The Pilot brings the buoy astern and then proceeds on the course of approximately S.E. directly towards the harbour entrance.

ANCHORAGE: Agent requested vessel to anchor about 2 miles off "Grande Torres".

VHF: Not available.

RADIO: The Agent requested an accurate ETA as he makes arrangements for the Pilot and on seeing the vessel at the anchorage notifies the receivers by telex. This is then followed by a written notice of readiness of berthing.

BERTHING: The grain silo berth is at the North side of "Canale Industriale" at its mid-length. This vessel swung with the aid of the port anchor and berthed starboard side alongside.

The quay is constructed of solid concrete and rises to a height of about 8 ft. above the water level. At the water line there is a ridge of about 9 in. extending along the whole length of the quay. Rubber fenders about 2 ft. in diameter are chained to the face of the quay at approximately 120 ft. intervals.

Once the vessel is alongside and against the fenders, it is protected from the concrete ridge but during berthing it would be possible to land on the projection because of the spacing of the fenders.

Bollards are also approximately 120 ft. apart except for one situated ahead of the vessel which is approximately 150 ft. from the next one aft. They coincide with the fenders.

The breakwater protects the harbour but difficulty may be experienced alongside due to swell following strong winds from a Westerly direction.

PORT FACILITIES: Access to the vessel by road vehicle and fresh water facilities are still to be provided.

Harbour does not appear to provide any fire fighting facilities and when the grain silo is closed there is no telephone available.

It is about 10 miles by car to Oristano and the Agent's office. Half of the journey is by unmade road. There are no ship chandlers or repair facilities available in Oristano. Taxi drivers are reluctant to drive their vehicles over the rough ground and made additional high charges for the journey. The ship's agency was very helpful and went to great lengths to arrange for ship's laundry and to have water delivered to the vessel by truck. They also made some purchase of small items for the vessel.

The port of Oristano is likely to become a large complex and it must be assumed that provision of services to ships will be developed.

Japan

THIS ENTRY SUPERSEDES ENTRY ON PAGE 545-546 OF THE MAIN TEXT.

NISHIHARA (Buckner Bay), Okinawa: 26.14 N. 127.50 E. (See Plan Book)

LOCATION: The Nansei Sekiyu Ltd. Refinery is located in Nishihara village on the East coast of Okinawa, towards the Southern end of Nakagusuku Bay (Buckner Bay). Also see "Max. Size". There is also a Nihon Sekiyu Terminal-SBM about 1 mile North of the NSS SALM.

DOCUMENTS:

3 Manifests
6 Crew Lists
1 Passenger List
1 Store List
1 Personal Effect List
For Customs, Quarantine and Agents' Use.
Ship's Register
International Loadline Certificate
Safety Equipment Certificate
Derating Examination Certificate
Last Port Clearance.

Each Crew member will be issued with an Official Pass, which must be returned prior to vessel sailing.

PILOTAGE: Normally vessels will be expected to enter Nakagusuku Bay through entrance marked Tatsu Kuchi, and pick up Berthing Master inside bay – South of Tsuken Jima. Inside bay Berthing Master requests that vessel keeps South of buoy marking Chikunigaa Shoal. Berthing shall be carried out at day time only.

A safe convenient pilot ladder is to be provided for the Berthing Master. Berthing Master stays aboard vessel throughout discharge, except vessel berthed at the pier.

ANCHORAGE: Navigation and anchorage in the waters near the NSS product pier and crude berth will in so far as possible be restricted to those ships directed into these waters by Berthing Master. In the interests of safety, ships will not enter the restricted area unless so directed by Berthing Master. The restricted area is within the following boundaries:

Beginning at a point described as 26° 13′ 33.88″ N. Lat. and 127° 47′ 30.24″ E. Long. (N. 25,074.89, E. 29,145.48); thence running S.60° 00′ 00″ E. a distance of 200 m. to an angle point described as Lat. 26° 13′ 30.62″ N., Long. 127° 47′ 36.48″ E. (24,974.89, N. 29,318.69 E.); thence running S. 35° 40′ 45″ E. a distance of 1,170 m. to an angle point described as 26° 12′ 59.69″ N. Lat. 127° 48′ 00.98″ E. Long. (N. 24,024.88, E. 30,000.82); thence running N. 45° E. a distance of 3,350 m. to a point on the circumference of a circle described as 26° 14′ 20″ N. Lat., 127° 49′ 30″ E. Long.; thence running to the right a distance of 3,170 m. along said circumference, which is described by a radius of 1,060 m. with its centre located at 26° 13′ 56.18″ N. Lat., 127° 50′ 00.00″ E. Long. (N. 25,771, E. 33,300) to a point on the circumference described as 26° 13′ 30″ N. Lat., 127° 50′ 22″ E. Long. thence running S. 48° W. a distance of 1,780 m. to the Nakasone buoy located at 26° 12′ 54.2″ N. Lat., 127° 49′ 37.5″ E. Long. thence running S. 53° W. a distance of 1,940 m. to the Wara reef located at 26° 12′ 17.7″ N. Lat. 127° 48′ 45.0″ E. Long., thence running W. 18° N. a distance of 2,810 m. to a buoy located at 26° 12′ 44″ N. Lat., 127° 47′ 07″ E. Long., thence running N. 17° W. a distance of 710 m. to a point at 26° 12′ 46.42″ N. Lat., 127° 47′ 56.61″ E. Long., (23,616.16, N. 29,880.55 E.).

MAX. SIZE: For crude vessels a single point mooring (SALM – Single Anchor Leg Type Mooring), capable of handling vessels from 90,000 d.w.t. to 270,000 d.w.t. is established in approximate position Lat. 26° 14′ N. Long. 127° 50′ E. about 2.5 miles offshore.

Products are shipped from a pier connected to the shore – the pier has 2 berths, one for vessels up to 65,000 d.w.t. and one for small vessels up to 4,000 d.w.t.

PRATIQUE: Port Officials will board the vessel after berthing.

RADIO: Crude vessels discharging at Nishihara should report ETA at pilot station (Lat. 26° 13′ N., Long. 127° 52′ E.) 72, 48, 24 and 12 hours prior arrival. Berthing instructions and time of Pilot boarding will be relayed by a telegraph appointed Agent. Refinery has no VHF radio.

Weather reports essential – particularly during typhoon season. Naha Radio – JCX medium wave 500 kHz. Traffic lists broadcast at odd hours GMT. Short wave 6470 kHz, traffic lists broadcast at even hours GMT.

TUGS: 2 tugs and a launch are available for assisting with mooring and unmooring. The Berthing Master in consultation with the Master will decide the number of tugs required for the berthing operation and for standby during the time at berth.

CRUDE BERTH: Single buoy mooring with vessel secured by 2 heavy polypropylene lines from buoy. Lines connected to chains through bow mooring lead and secured inboard. Chains secured direct to Brega Pin or by double mooring wire or mooring rope (polypropylene 8 in. or over) to bollards, port and starboard side of forecastle head. There is 72 ft. of water at buoy position. Vessels may remain in berth in winds of up to 50 m.p.h.

Floating hoses: 2×24 in. into 2×20 in. connected to 2×16 in. are connected on vessel's port side. There is a 42 in. line from buoy to shore. The maximum pumping rate is 75,000 b.p.h.

PRODUCT PIER: A 110°-290° orientated pier allows tankers to approach the berth in a ballasted condition in either of 2 opposite directions. Vessels of 4,000 d.w.t. size and above will be handled at Berth No. 1 and smaller vessels at Berth No. 2

The water depth at the pier is approximately 47 ft. The extreme tidal variation is +7.9 ft. to −1.0 ft. and maximum storm tide will add approximately 3 ft. The maximum current is less than 1 knot.

Berth No. 1 is equipped with 1×16 in. loading arm for clean products and 2×16 in. loading arms for dark products. Each of these all-metal hydraulically controlled loading arms is fitted with a remotely operated coupling device to connect to a nominal 10 in. ASA, DIN or BS flanged connection without bolting.

Berth No. 2 is equipped with 2×6 in. loading arm for dark and clean products. These arms are part metal, part hose and are fitted with flanges to be bolted to a nominal 6 in. ASA, DIN or BS flanged connection.

Bunker fuel is available at both berths through meters and 4 in. hose connections. Each berth is provided with a gangway.

Vessels will deballast through the loading arms into a 24 in. ballast water line leading to refinery tankage. Under no circumstances should vessel discharge any ballast water directly into the bay.

Fire protection at the pier consists of a foam concentrate tank and proportioning pump, a fire water pump and distribution system, fixed combination water-foam monitors and air-foam play-pipes.

OIL POLLUTION WARNING: We wish to alert all vessels entering this port of the extreme sensitivity on the port of the community and governmental authorities regarding any incident involving oil pullution of the seas. Any oil spill, regardless of size, is considered a criminal act, and offenders are dealt with accordingly. We urge all vessels to make complete pre-arrival checks for cargo and ballast system tightness, and to strictly adhere to all pollution prevention practices, procedures and policies while discharging or deballasting at this port. Officers and crews should be extremely alert during all phases of vessel operation for potential oil spill risks and seek assistance from shore representatives should any unusual risk arise.

TIME: GMT plus nine hours.

SHORE LEAVE: Shore leave is permitted – launch service may be arranged but is at vessel's expense.

No person will be given permission to enter the refinery unless they are in the microbus which will be provided by ship's Agent.

AUTHORITY: Nansei Sekiyu Limited, Nishihara Refinery, Okinawa.

Korea (Republic of South)

CHINHAE

SHIPMASTER'S REPORT: February 1979

PILOTAGE: Pilotage for the Port of Chinhae is compulsory, Pilots only available during daytime.

Pilots board in position 35° 02′ N., 128° 47.5′ E. Ships waiting for a Pilot should anchor in the recommended anchorage situated North-east of the recommended track 306°/126° and extending from about 1 mile West to about 2 miles South-east of Yon Do Island.

PROHIBITED ANCHORAGE AREA: A "Prohibited Anchorage Area" is situated between the existing prohibited area (in approx. position 35° 00′ N., 128° 45′ E.) and the Western shore of the Kadok To Island.

The Northern limit of the "prohibited anchorage" area consists of a line running from position 35° 01.4′ N., 128° 47.2′ E. in a 070° direction to the Western shore of Kadok To Island.

The Southern limit consists of a line running from position 34° 58′

N., 128° 47.3′ E. in a 061° direction to the Southernmost point of Kadok To Island.

According to the naval authorities, anchoring within the above mentioned area is prohibited because of existing submarine cables.

BUOYS: The red conical Buoy "No. 14" in position 35° 04.9′ N., 128° 42.1′ E. is reported non-existent.

The red conical lightbuoy in position bearing 135° and 8.5 cables from the above mentioned Buoy No. 14 is also reported non-existent.

The black conical lightbuoy Gp Fl(2) 6 sec. in position 35° 04′ N., 128o 42.8′ E. is to be moved 4 cables in a 043° direction.

Malaysia

PASIR GUDANG, Malaya: 01.26 N. 103.54 E.

LOCATION: The port is situated on the Malaysian Coast of the Straits of Johore, 10 nautical miles East of Johore Bahru Town. The coordinates are: Lat. 01° 26′ 06″ N., Long. 103° 54′ 25″ E.

PILOTAGE: Pilotage is compulsory for vessels exceeding 45 m. (150 ft.) entering or leaving the Port Water Limits. Pilotage is provided by the Authority. The pilot boarding point is within the vicinity of Johore Shoal Buoy in position Lat. 01° 18′ 51″ N. Long. 104° 06′ 30″ E.

APPROACHES: *Fairway:* There is no limitation imposed on size of vessels passing through the fairway except for the draft. The main channel in the East Johore Strait has a depth of water up to approximately 11.6 m. (38 ft.).

ANCHORAGE: Anchorage areas have been designated within the port water limits for the following:

(a) General purposes.
(b) Dangerous goods and explosives.
(c) Quarantine.
(d) Petroleum.
(e) Lay-up.

RADIO: Vessels can communicate direct with the pilot control station tower via ship to shore VHF on the following Channels:

Channel	*Ship Stations*	*Shore Stations*
11	156.550 mHz	156.550 mHz
21	157.050 mHz	161.650 mHz
(Listening Frequency only) 63	156.175 mHz	160.775 mHz

VHF network links the tugs, launches and the Authority's personnel working on board vessels at the anchorages.

TUGS: Tug service is available for towage, berthing and unberthing operations within the port's water limits. This service is provided by the Authority's tugs and supplemented by privately operated tug companies. The tugs are mostly equipped with fire fighting and anti-pollution equipment.

FACILITIES: *Oil Jetty:* Depth of water 11 m. (36 ft.), L-shaped with 2 berths.

Ocean Wharves: Depth of water 11 m. (36 ft.), length 732 m. (1,200 ft.).

Coastal Wharf: Depth of water 5.5 m. (18 ft.), length 107 m. (350 ft.).

Transit Shed: 10,950 sq.m. (118,800 sq.ft.).

Godown: 5,400 sq.m. (59,400 sq.ft.).

Open Sided Shed: 10,950 sq.m. (118,800 sq.ft.).

Open Storage Yard: 3.24 hectares (8 acres).

Palm Oil Tank Installation: Present capacity for crude 31,000 tonnes. Future capacity for crude and refined 55,500 tonnes.

Liquid Chemical Installation: Present capacity 1,000 tonnes. Under construction 4,000 tonnes.

Grain Silos: 21,000 tonnes.

Fertilizer Storage: 30,000 tonnes.

Proposed Timber Terminal: 6.07 hectares (15 acres).

Proposed Warehousing and Distribution Area: 3.24 hectares (8 acres).

Other facilities such as bauxite, ore and woodchip jetties as well as a shipyard (Malaysian Shipyard and Engineering) are available and operated by private companies. The shipyard undertakes repairs and docking to vessels up to 400,000 d.w.t.

Shore Equipment:

	Capacity	*Unit*
(a) Sideloaders	52,000 lbs.	1
	9,000 lbs.	5
(b) Mobile Cranes	28 tonnes	2
	10 tonnes	2
(c) Forklift Trucks	13,000 lbs.	3
	6,000 lbs.	14
	4,000 lbs.	6
(d) Towing Tractors	4,000 lbs. Drawbar pull	1
	2,000 lbs. Drawbar pull	3
(e) Trailers	15 tonnes	5
	6 tonnes	12

Floating Equipment:

(a) Tugs	Two – 1,800 b.h.p.
	Two – 350 b.h.p.
(b) Launches	Two – pilot launches
	Two – security launches
(c) Lighters	Eight – 100 tonnes steel barges
(under construction)	Two – 100 tonnes flat-top steel barges

SHIPMASTER'S REPORT: February 1979.

PORT LIMITS: All the area of water enclosed on the West by a line drawn due South from Tanjung Bin (01° 12′ N. 103° 32.8′ E.) on the North by the Southern shores of the State of Johore, on the East by a line drawn 299° from Tanjung Stapa (01° 20.6′ N. 104° 08.2′ E.) and on the South by the limits of territorial waters of Johore, including the Johore River up to the bridge where the Johore Bahru to Kota Tinggi road crosses.

DOCUMENTS:

Customs: 2 Personal Effects Lists, 2 Narcotics Lists, 2 Arms and Ammunition Lists, 2 Stores Lists made out on ships forms only, no special forms issued by the port. Customs Boarding Officer also requires a full and correct statement of all dutiable liquor and tobacco carried as ships stores, the statement which is to be submitted in duplicate on forms provided by the Boarding Officer is to show in detail the quantities of dutiable goods held (a) in the ships stores, bars, and shops, (b) in the possession of Officers and Crew.

Immigration: 3 Crew Lists, all Crew Seamans books for entry Visa stamp.

Port Health: 1 Vaccination List, Maritime Declaration of Health.

Police: 1 Crew List.

Agent: Last Port Clearance, Manifest, Bills of Lading, Ships Certificates, Crew Agreement (Articles).

PILOTAGE: Pilots board off Johore Shoal Buoy, request for Pilot to be made via Agents. Confirmation of Pilot boarding obtained from Johore Port Control, VHF Channels 11, 21 and 63.

Pilot launch is a fast motor cruiser, with twin outboards.

Pilotage is compulsory for all vessels over 45 m. in length.

ANCHORAGE: Ships proceeding to call at any of the docks within Johore Port Limits, may be requested to use the anchorage to the East of the pilot boarding ground, or the Johore River anchorages which are about 1 mile North-East of Pulau Ubin. These 2 anchorage areas occupy about 3.5 square miles, with various depths. Vessels may also anchor approx. 0.6 miles E.S.E. off Pasir Gudang wharf, for large vessels there is a mooring buoy to restrict swinging into the channel.

RESTRICTIONS: Pilotage service for vessels entering or leaving Johore Port are at present for arrival 0600–2100 hrs. for departure 0600–2300 hrs.

MAX. SIZE: The navigational conditions in the Straits are adequate for vessels of sizes expected to call at Johore Port as determined by depths at Ocean Wharf, Oil Jetty, and Coastal Wharf. No limitations on the size of vessel passing through the fairway except for controlling draft in the East Johore Channel of up to approx. 11.6 m. Large vessels up to 400,000 d.w.t. can navigate the Straits in ballast proceeding to Malaysia Shipyard also situated in Pasir Gudang.

HEALTH: Vessels Agent to give advance notification to the Health Officer, if possible 48 hours prior to ETA of vessel, together with a list of ports visited within the preceding 14 days. Vessels from infected ports, or without valid derat exemption certificates, or with cases of sickness or death on board, must fly the quarantine flag, and proceed to quarantine anchorage until boarded by the Port Health Officer.

RADIO: Singapore Radio 9VG is the most reliable, and messages are telexed direct to local Agent in Johore Baru.

VHF: The base station is situated at Pasir Gudang, Channels presently in use are 11, 21 and 63.

TUGS: 2 tugboats of 1,800 h.p., 2 tugboats of 350 h.p. Tugs normally meet vessels off the wharf, or at anchorage when mooring to buoy. Tugs lines used.

BERTHING: Oil Jetty: Depth alongside 11.0 m.; "L" shaped jetty, with 2 berths. Ocean Wharves: Depth alongside 11.0 m.; length of wharf 732 m. Coastal Wharf: Depth alongside 5.5 m.; length of wharf 107 m. the Ocean berth is designed for general cargo vessels, and bulk carriers, of approx. 25,000 – 30,000 d.w.t.

All cargo work is carried out by ship's gear, shore equipment is available, e.g. mobile cranes, side loaders, vacuvators.

SPECIALISED CARGO HANDLING FACILITIES: Oil Jetty capable of handling Palm oil shipment. Liquid chemical installation, present capacity 1,000 tonnes, a further 4,000 tonnes capacity installation under construction. Grain silos, 21,000 tonnes capacity. Fertilizer storage 30,000 tonnes. Proposed timber terminal 15 acres.

STEVEDORES: Stevedoring and shore labour undertaken by the Port Authority. Shift times, 0700–1500, 1500–2300, 2300–0700 hrs.

MEDICAL: Medical service is available from the nearby town of Masai, which is only a short distance from the port. There is a General Hospital situated in Johore Baru to attend to serious cases.

FRESH WATER: Fresh water is available through hydrants installed at frequent intervals on the wharves and the breasting island of the oil jetty. Fire fighting hydrants are installed throughout the port area, using separate fresh water, and sea water systems. Fresh water may also be supplied to vessels in the anchorage if required either by tug, or if large quantities required by water barge from Malaysia Shipyard.

FUEL: Bunkers are available by pipe-line installed along the quay, or alternatively by barges. Bunkering is undertaken by Petronas.

FIRE PRECAUTIONS: The Port Authority maintains a fire and rescue service, with trained firemen responsible for fire fighting on board, and on shore. The brigade is equipped with modern fire fighting appliances, and salvage equipment. Tugs are also equipped with fire fighting equipment, and anti-pollution equipment.

CONSULS: Nearest Consuls are situated in Singapore, and arrangements can be made to obtain Visa to proceed to Singapore to carry out ships business.

REPAIRS/DRYDOCKS: Situated in Pasir Gudang industrial area is Malaysia Shipyard & Engineering Sdn Bhd. MSE is a fully equipped up-to-date engineering establishment, with facilities for ship repairing, new-building up to 12,000 d.w.t. and general engineering works.

(1) Drydock, length 395 m., width 80 m., depth 14 m., capable of handling ships of 400,000 d.w.t.

(2) No. 2 Drydock, length 270 m., width 46 m., depth 12.5 m., capable of handling up to 140,000 d.w.t.

(3) Newbuilding dock, length (approx.) 130 m., width 24 m., depth 8.0 m., capacity approx. 12,000 d.w.t.

Berthage – No. 1 quay, 390 m. long×7 m. draft. 1×15 ton luffing crane.
No. 2 quay, 168 m. long×7 m. draft. 1×15 ton luffing crane.
No. 3 quay, 168 m. long×7 m. draft. 1×15 ton luffing crane.

SURVEYORS: Classification Surveyors are available from Singapore, or Kuala Lumpur.

GANGWAY/DECK WATCHMEN: The Port Authority has a Security Division, responsible for the general security of the port area. The force consists of a detachment of trained armed guards. Their services are available if requested through the Agents.

HATCHES: Preferably all opening/closing to be carried out by ships crew, as the stevedoring labour is inexperienced.

CUSTOMS ALLOWANCE: Spirits 0.125 of a quart per man per day *or* wines 1 quart per man per day; beer 1 quart per man per day; cigarettes 25 in number per man per day *or* cigars 8 in number per man per day *or* tobacco 1 oz. per man per day. Customs will issue allowance for total of 3 days, and at the request of a Proper Customs Officer the seal may be broken for further issues.

CARGO GEAR: When possible all loading and discharging carried out with ships gear. Shore equipment comprises – 1 side loader capacity 52,000 lbs., 5 side loaders of capacity 9,000 lbs. each, 2×28 tonne mobile cranes, and 2×10 tonne mobile cranes. For bulk cargoes, grains, fertilizers, sulphurs, etc. shore grabs of 2 tonne capacity connected to ships gear.

REPATRIATION: Ships crew with valid or recognised International Passports are permitted to enter and sign-off through Malaysia/Singapore checkpoint at Causeway, provided they obtain a transit visa from the Malaysian Authorities through the ships Agent. Ships crew without International Passports, and only Seamens Books must join/leave ships via Kuala Lumpur.

TIME: GMT + 7.5 hrs.

HOLIDAYS: Chinese New Year 28th and 29th January*; Prophet Muhammads Birthday 9th February; Labour Day 1st May; Wesak Day 10th May; Hari Keputeraan D.Y.M.M. Seri Paduka Baginda Yand Di Pertuan Agong 6th June; First Day of Fasting Month 25th July*; Hari Raya Puasa (1399) 24th and 25th August*; Malaysia National Day 31st August; Deepavali 19th October; Hol Almarhom Sultan Ibrahim 20th October; Sultan of Johore's Birthday 28th October; Hari Raya Haji (1399) 31st October*; First Day of Muharran 21st November; Christmas 25th December.

*These dates are subject to alteration.

TELEPHONES: Telephones may be placed on board at a connection charge of $/M25.00 per day.

SERVICES: The Malaysia Shipyard & Engineering Co. has an agreement with the Port of Singapore Authority for the use of a slop barge which may be sent to the Johore Anchorage to receive slops from tankers which are proceeding to MSE for repairs. Numerous other services, and local representation for engineering and marine equipment available from Singapore.

SHORE LEAVE: Shore leave for Crew members is permissible. The nearest town is Masai, approx. 3 miles from the port. Johore Baru is approx. 23.5 miles from the port. Crew members are allowed to cross the causeway into Singapore, providing they obtain the necessary visa from the Immigration Authorities through the ships agent.

DEVELOPMENTS: Johore Port has submitted a plan for the expansion of three more wharves. The proposed berths are for dry bulk materials. The berths are to serve the needs of specialised related industries, such as fertilizers, flour, tapioca, feedmeal, and grains. The construction of silos, storage areas, and other processing plants is to be undertaken.

AUTHORITY: Johore Port Authority.

AGENT: Sri Overa Shipping Services Sdn Bhd., 10K Jalan Chenderawasih, Larkin Jaya, Johore Baru Johor, West Malaysia. Telex: Overas Ma 60751.

Netherlands Antilles

BULLEN BAY:

SHIPMASTER'S REPORT: February 1979.

RESTRICTIONS: Crude oil washing permitted subject to notice below. Tank wash piping must be tested before arrival and oxygen meters calibrated.

HEALTH: As for U.S.A.

VHF: Channel 9 to give notice of readiness and for berthing with Pilot and tugs. Call Agent on Channel 25.

BERTHING: Shore gangway at 2 largest berths.

NOTICE No. 1: Issued by Curacao Oil Terminal (C.O.T.)

Crude Oil Washing

Only tankers equipped with a well constructed inert gas installation and provided with fixed tank washing machines connected to the tank wash piping system by means of fixed steel piping may crude wash cargo tanks under the following conditions:

1. Oxygen content in cargo tank may not exceed 5% (*meters calibrated*).
2. Minimum inert gas pressure in cargo tank to be 250 mm. (10 in./water column) (0.025 hg/sq.cm.=–0.36 lb./sq.in).
3. Continuous supervision by a specifically appointed and experienced operator is mandatory.
4. The "in-line" O^2 analyser must be arranged to allow for calibration during inert gas operation.
5. The hydrants of the tankwash piping must be equipped with screwed-on heads.
6. Tankwash piping must be tested for tightness.
7. Exceed of discharge time will be for ship's account.

For each "crude washing" a request for cleaning must be submitted to the Head Operations of C.O.T.

Please sign for receipt: Curacao Oil Terminal N.V.
Signed.........................

Master
Operation Manager

NOTICE No. 2: Issued by N.V. Curacaosche Scheepvaart Maatschappij. Emmastad, Curacao, N.A.

CUSTOMS REGULATIONS
BONDED STORES

In connection with revised Customs Regulations for the ports of Curacao, we draw your attention to the following:

1. All stores on board of vessel on arrival, also personal effects, must be declared to Customs Officials when clearing in vessel.
2. While ship is in port, Customs Officials may seal bonded stores, e.g. beer, wine, spirits, cigarettes and tobacco.
   When sealing bonded stores, permission may be granted by the Customs Officials, to take out a certain amount of these stores, from the bonded store-room, before sealing the store-room.
3. Stores on board, which are *not* sealed by the Customs Officials, may be used on board vessels, but may not be taken ashore without permission of Customs.
4. All stores ordered in bond at the port of Curacao, MUST REMAIN UNBROACHED, until departure of vessel from Curacao, and it is more likely than not, that Customs Officials will board before departure for control. If bonded stores are found opened up, or missing, Customs will charge import duties, whilst the possibility exists that the ship may be fined for such breach of law.

Nigeria

FORCADOS

SHIPMASTER'S REPORT: February 1979.

DOCUMENTS: Ship's stamp to be on all documents.

5 lists ports of call; 5 arms and ammunition (3 for Agent, 2 for Customs); 4 each of vaccinations; nil passengers; nil stowaways; crew labour list (presumably DBS); 1 copy of diversion cable; 4 lists "Nil" animals or birds.

PILOTAGE: Require accommodation ladder with pilot ladder for large vessels due to swell.

VHF: Channel 8 for all communications with Pilot, Loading Terminal, and Cargo Operations.

BERTHING: Line required aft should preferably be polypropylene or one that floats.

TANKERS: Loading temperature about 99°F, will vary slightly depending on loading rate.

Panama

PUERTO ARMUELLES

SHIPMASTER'S REPORT: February 1979.

DOCUMENTS: Same as for "Almirante", and if no cargo to land at this port, 6 copies of a "Nil" declaration.

PILOTAGE: Arranged through Agent. Pilot and mooring gang board 0.75 miles East of pierhead by port accommodation ladder, from an old ship's lifeboat painted white.

ANCHORAGE: 1 mile East of pierhead in depths of 30 fathoms or more. Bottom is very steep-to, in less depth vessel can be too close to shallow water. Recommend U.S. Chart 21581, 'Ports and Anchorages S. Coast of Panama' be obtained.

RESTRICTIONS: Almost none, depth alongside over 40 ft., breadth is no restriction, berthing face is about 550 ft. long, but vessels up to about 680 ft. long could be berthed, bows projecting from pier.

HEALTH: Pratique given by doctor on arrival. If any suspected disease, vessel should advise Agent by radio beforehand. Meat products which are not usually acceptable to U.S.D.A., are generally sealed up as in U.S. Ports.

RADIO: Balbao Radio.
VHF: Channel 16 for Pilot.
TUGS: None.
BERTHING: Pier about 2,000 ft. long, lies in South-easterly direction from the shore line, vessel berths starboard side alongside on the N.E. face, seaward end.

Three buoys are moored 250/300 ft. off the berth and are used to hold off the pier, the vessel being moored about 10 ft. off at all times due to swell. Port anchor is let go approaching the berth and ship's lines used to position vessel, then very heavy mooring springs are secured, 4 at each end. Ship's lines remain on buoys for holding off. On sailing Pilot does not board, only berthing gang who leave by accommodation ladder to boat after vessel is off the berth.
FUEL: Not available.
FRESH WATER: Piped to pier, ample hydrants, charge U.S. $150.00 irrespective of amount taken.
REPAIRS: Workshop and electrical repairs can be undertaken by arrangement.
FRESH PROVISIONS: Available.
TIME: GMT minus 5 hours.
MEDICAL: All facilities available.
CUSTOMS ALLOWANCE: No restrictions as long as nothing landed, bond is sealed on arrival.
OPENING/CLOSING HATCHES: Ship's crew. For banana loading starboard side elevator hatches only.
SHORE LEAVE: No restrictions.
OPERATORS: Chiriqui Land Company.

Portugal

SINES: 37.57 N. 08.52 W. **(See Plan Book)**

(Port under construction)
LOCATION: 95 miles South of Lisbon.
MAX. SIZE: (December 1978) Only Berth No. 4 available.
DEVELOPMENTS: When construction is completed the following facilities will be available.

Berth No.	*Product Handled*	*Max. size (d.w.t.)*	*Max. draft (m.)*	*Depth (m.)*
1	Crude Oil	500,000*	28.0	37.0
2	Crude Oil	313,000	25.0	28.0
3	Crude/Products	100,000	15.0	18.0
4	Refined Products	100,000	15.0	18.0
5	Refined Products	100,000	15.0	18.0
6	L.P.G.	4,500	—	10.0
7	L.P.G.	4,500	—	10.0
8	Refined products	10,000	—	—

*This berth could be upgraded to 1,000,000 d.w.t. by extending the breakwater.
Planned storage capacity: 2,750,000 cu.m., 1,500,000 cu.m. will be allotted for crude oil.
Discharge Rates: 15,000 cu.m. per hour (crude).
Loading Rates: 4,500 cu.m. per hour for fuel oil and 2,000 cu.m. per hour for other products.
Products Produced: Propane, butane, chemical naptha, regular and premium petrol, jet fuel, kerosene, various grades of diesel and fuel oil, asphalt, residue and sulphur.
Services: Ballast treatment, sonar, fire-fighting.
Petrochemicals: Terminal with 2 berths with depths up to 12 m. will be able to handle vessels with capacity of 20,000 cu.m.
Ore Terminal: In the initial stages 4 berths will be available for simultaneous berthing of vessels of 6,000; 25,000; 45,000 and 150,000 d.w.t. Max. depth (approx.) 18.0 m. Cargo to be handled is iron ore, iron scrap and finished products.

Other facilities will include a general cargo harbour, fertiliser complex, facilities for grain reception and facilities for pyrites treatment.
AUTHORITY: Administracao do Porto De Sines.

Saudi Arabia

JUBAIL

The following report was received in March 1979:

Anchorage: Anchorage for vessels presently situated at the Pilot Boarding Area and bounded by the following co-ordinates:

27° 06.5′ N. : 27° 09.0′ N. : 27° 09.0′ N.
49° 46.0′ E. : 49° 46.0′ E. : 49° 48.5′ E.

	Jubail (Commercial)	**Jubail (Industrial)**
Entrance channel depth at LW:	14 m.	14 m.
Number of stream mooring berths available for ships and depths at LW:	Nil	4 open sea tanker terminals. Depth at LW 28 m.
No. of Quays (alongside berth):	5 Pier Berths 2 Container Berths (as of April '79) (1 Ro-Ro Berth (as of April '79) Combined with Container Berth No. 16	9 (March '79)
Length of each alongside berth:	212-250 m.	212-250 m.
Depth available at each alongside berth at LW:	12-14 m.	14 m.
Equipment:	*Port Authority:* Presently 12 mobile cranes available for the 4 operating berths, details as follows: Cranes: 6 cranes× 20-ton cap. 4 cranes× 50-ton cap. 2 cranes×100-ton cap. 1 Fuel Tanker 1 Fire Truck *Stevedoring Contractors:* 2 forklifts×35-ton cap. 2 forklifts×20-ton cap. 4 forklifts× 6-ton cap. 16 forklifts× 5-ton cap. 20 forklifts× 3-ton cap. More equipment to follow as additional berths turned over to Port Authority.	None, as no operating berth at present.
Floating cranes:	None	None at present
Mooring boats, tugs, etc:	2 Mooring Launches 2 Multi-purpose Launches. 3 Tugboats. More tugs and other marine equipment due as additional berths become operational.	None at present
Transit sheds and cold storage facilities:	2 Sheds (operational) 3 Sheds (for completion April '79)	None
Berthing/Unberthing:	24 hours	Port not operational as yet.
Pilots:	Pilots available and compulsory	
Slipways:	None	1,000 ton slipway
Repair Facilities:	None	None
Classification societies:	None	None
Oil bunkers and coal:	Bunker fuel oil, Marine diesel oil and Marine gas oil. No coal available.	Bunker fuel oil, Marine gas oil. (Dec. '79)
Fresh water:	Limited supplies available. Main supply available end of 1979.	None at present
Fresh and dry provisions:	Limited supply available.	None at present
Ship and engine room stores:	Limited supply available.	Limited supply available
Cargo lighters:	None	None
Medical facilities:	Qualified doctors and medical facilities available.	
Customs requirements:	Usual pre-arrival advice with 5 sets of manifest in English and 4 in Arabic. Vessels may be cleared at the Pilot Boarding Area or when alongside Pier Berths.	
Container Berths: (In Commercial Ports)	Two (2) Container Berths with an overall length of 500 m. are expected to be operational by mid-1979. The minimum depth alongside (at LW) is 14 m. The Container Berths are equipped with 4 container cranes (Portainers): each with a lifting capacity of 41 tons. The hinged boom outreach of the container cranes from the waterside rail is 38 m. and max. height of lift above rails to underside of spreader is 26 m. 5 straddle carriers (Transtrainers) with a lift cap. of 41 tons are also available plus 30 container Terminal Tractors and 40 forklifts. The Container Quay Office is now completed. The container storage area is approximately 130,000 sq.m. An additional 4 straddle carriers (Transtrainers) and buildings will be completed during 1979.	

United States of America

BURNSIDE (St. James)

SHIPMASTER'S REPORT: February 1979.

LOCATION: St. James – West Bank.

DOCUMENTS: Ship's stamp on cash receipts.

ANCHORAGE: Usually at Grandview, where launch service available and about 1 hour's drive to New Orleans.

From Capline (St. James) about 45 minutes drive to Baton Rouge.

VHF: All berthing and river pilotage on Channel 13.

TUGS: 3 tugs recommended.

BERTHING: Always port side to. No shore gangway, moorings 4, 2, 2 each end for tankers of 100,000 d.w.t. and upwards.

CRANES: Not available.

TANKERS: Require ship's gangway at No. 2 berth.
